Ultradata Systems CEO Interviewed on WallSt.net Web Site

St. Louis, Missouri May 10, 2004 - Ultradata Systems, Inc. (OTC Bulletin Board:ULTR.OB), said today that an interview with Monte Ross, chairman and CEO, will be available on the Web site of Wallst.net for two weeks beginning today.

In the interview, Mr. Ross explains Ultradata's recent significant improvement in financial results and discusses the market for the company's hand-held electronic road travel information systems. Ultradata's sales were up a total of more than 400 percent in the fourth quarter of 2003 and the first quarter of 2004, and earnings for the six-month period were \$957,000, compared with a loss of \$1.4 million for the comparable period a year ago.

The interview can be accessed at [www.wallst.net](http://www.wallst.net).

Ultradata Systems, Incorporated is a leader in the field of hand-held electronic information systems. Based in St. Louis, Missouri, the Company develops, manufactures and markets hand-held travel information computers, global positioning system (GPS) products and information systems used for locating destinations and trip planning. The Company's lead product, the handheld electronic travel information guide, has sold more than three million units and is marketed through major distributors to retail chains, cable TV direct marketers, credit-card insert marketers, premium incentive catalogs, and other channels. These products use the Company's patented data-compression technology and proprietary database to provide directions to thousands of destinations and services along highways and in major metropolitan areas.

The WallSt.net interview contains forward-looking statements within the meaning of applicable federal securities laws. The company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or other changes. Readers are cautioned not to place undue reliance on these forward-looking statements. Risk factors that may cause future results to differ from those implied in these forward-looking statements include, but are not limited to, the fact that our limited financial resources may be insufficient to permit us to develop products and introduce them to the market, the fact that we rely on a small number of customers so that the loss of a significant customer could imperil the marketing of an entire product line, and the difficulty of attracting mass-market retailers to a seasonal product like the Talking Road WhizTM. Additional information relating to historical financial and operational performance, the company's strategies, competitive risks, and market conditions are available in Ultradata Systems' reports on
