PECO ENERGY CO
Form 424B3
August 27, 2002

Filed Pursuant to Rule 424(b)(3)
Registration Statement No. 333-97401

\$250,000,000

PECO Energy Company
[LOGO]
Peco/R/
An Exelon Company

Offer to Exchange
\$250,000,000 5.95% First and Refunding Mortgage Bonds Due 2011 (Exchange Bonds)
Which have been registered under the Securities Act

For Any and All Outstanding
\$250,000,000 5.95% First and Refunding Mortgage Bonds Due 2011
Which have not been so registered

TERMS OF THE EXCHANGE OFFER

- . The exchange offer expires at 5:00 p.m., Eastern Time, on September 26, 2002, unless extended by us in our sole discretion, subject to applicable law.
- . The terms of the exchange bonds are identical to the original bonds, except that the exchange bonds are registered under the Securities Act and the transfer restrictions and registration rights applicable to the original bonds do not apply to the exchange bonds.
- . All original bonds that are validly tendered and not validly withdrawn will be exchanged.
- . Tenders of original bonds may be withdrawn at any time prior to expiration of the exchange offer.
- . We do not intend to apply for listing of the exchange bonds on any securities exchange or to arrange for them to be quoted on any quotation system.
- . The exchange offer is subject to customary conditions, including the condition that the exchange offer not violate applicable law or any applicable interpretation of the staff of the Securities and Exchange Commission.
- . We will not receive any proceeds from the exchange offer.
- . You will not incur any material United States Federal income tax consequences from your participation in the exchange offer.

Each broker-dealer that receives exchange bonds for its own account pursuant to the exchange offer must acknowledge that it will deliver a prospectus in connection with any resale of those exchange bonds. The letter of transmittal states that by so acknowledging and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an "underwriter" within the meaning of the Securities Act. This prospectus, as it may be amended or supplemented from

Edgar Filing: PECO ENERGY CO - Form 424B3

time to time, may be used by a broker-dealer in connection with resales of exchange bonds received in exchange for original bonds where the original bonds were acquired by the broker-dealer as a result of market-making activities or other trading activities.

Until the Expiration Date (as defined herein), all broker-dealers that effect transactions in these securities may be required to deliver a prospectus. This is in addition to the broker-dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotment of subscriptions. We have agreed that, starting on the Expiration Date and ending on the close of business one year after the Expiration Date, we will make this prospectus available to any broker-dealer for use in connection with any such resale. See "Plan of Distribution."

Please see "Risk Factors" beginning on page 8 for a discussion of factors you should consider in connection with the exchange offer.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of the exchange bonds or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is August 27, 2002.

When we refer to "original bonds," we are referring to the \$250,000,000 5.95% First and Refunding Mortgage bonds due 2011, which were not registered under the Securities Act. When we refer to "exchange bonds," we are referring to the \$250,000,000 5.95% First and Refunding Mortgage Bonds due 2011, which have been registered under the Securities Act and are to be exchanged for the original bonds.

Edgar Filing: PECO ENERGY CO - Form 424B3

When we refer to the term "bonds" or "bonds," we are referring to both the original bonds and the exchange bonds to be issued in the exchange offer. When we refer to "holders" of the bonds, we are referring to those persons who are the registered holders of bonds on the books of the registrar appointed under the indenture. Unless the context otherwise indicates, all references to "we," "us" or "our" in this prospectus mean PECO Energy Company, a Pennsylvania corporation, and its consolidated subsidiaries.

No dealer, salesperson or other person is authorized to give any information or to represent anything not contained in this prospectus. You must not rely on any unauthorized information or representations. This prospectus is an offer only of the exchange bonds to be issued in exchange for the original bonds, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus is current only as of its date.

WHERE TO FIND MORE INFORMATION

In connection with the exchange offer, we have filed with the Securities and Exchange Commission (the "SEC") a registration statement under the Securities Act of 1933, as amended (the "Securities Act"), which offers to exchange the original bonds for exchange bonds. As permitted by SEC rules, this prospectus omits information included in the registration statement. For a more complete understanding of this exchange offer, you should refer to the registration statement, including its exhibits.

i

The public may read and copy any reports or other information that we file with the SEC at the SEC's public reference room, Room 1024 at Judiciary Plaza, 450 Fifth Street, N.W., Washington, D.C. 20549, or at the SEC's regional offices located at 233 Broadway, New York, New York 10279, and Suite 900, 175 W. Jackson Boulevard, Chicago, Illinois 60604. The public may obtain information on the operation of the public reference room by calling the SEC at 1-800-SEC-0330. These documents are also available to the public from commercial document retrieval services and at the web site maintained by the SEC at <http://www.sec.gov>. You may also obtain a copy of the exchange offer registration statement at no cost by writing us at the following address:

PECO Energy Company
Attn: Investor Relations
10 South Dearborn Street, 36th Floor
P.O. Box 805379
Chicago, IL 60680-5379

To obtain timely delivery, securities holders must request the information no later than five business days before the date securities holders intend to make their exchange decision.

ii

PROSPECTUS SUMMARY

The following information is qualified in its entirety by the more detailed information and financial statements appearing elsewhere in this prospectus. An investment in the exchange bonds involves certain risks relating to our business, prospects, financial condition and results of operations and certain other risks relating to the terms of the exchange bonds. These risks are

Edgar Filing: PECO ENERGY CO - Form 424B3

described in "Risk Factors" beginning on page 8.

Summary of the Exchange Offer

The Exchange Offer..... We are offering to exchange an aggregate of \$250,000,000 principal amount of exchange bonds of one series, due 2011 for the \$250,000,000 5.95% First and Refunding Mortgage Bonds due 2011. The original bonds may be exchanged only in minimum denominations of \$1,000 and multiples thereof.

The Original Bonds..... The original bonds were issued and sold on October 30, 2001 in a transaction not requiring registration under the Securities Act. At the time we issued the original bonds, we entered into a registration rights agreement which obligates us to make this exchange offer.

Required Representations.... In order to participate in the exchange offer, you will be required to make representations in a letter of transmittal, including that:

- . you are not affiliated with us;
- . you are not a broker-dealer who bought your original bonds directly from us;
- . you will acquire the exchange bonds in the ordinary course of business; and
- . you have not agreed with anyone to distribute the exchange bonds.

If you are a broker-dealer that purchased original bonds for your own account as part of market-making or trading activities, you must represent to us that you have agreed with us or our affiliates not to distribute the exchange bonds. If you make this representation, you need not make the last representation provided for above. Each broker-dealer that receives exchange bonds for its own account in exchange for original bonds, where the original bonds were acquired by the broker-dealer as a result of market-making activities or other trading activities, must acknowledge that it will deliver a prospectus in connection with any resale of exchange bonds. See "Plan of Distribution."

1

Resale of the Exchange Bonds We are making the exchange offer in reliance on the position of the staff of the Division of Corporation Finance of the SEC outlined in certain interpretive letters issued to other companies in other transactions. We believe that the exchange bonds acquired in this exchange offer may be freely traded without compliance with the provisions of the Securities Act that

Edgar Filing: PECO ENERGY CO - Form 424B3

call for registration and delivery of a prospectus, except as described in the following paragraph.

The exchange bonds will be freely tradable only if the holders meet the conditions described under "Required Representations" above. If you are a broker-dealer that purchased original bonds for your own account as part of market-making or trading activities, you must deliver a prospectus when you sell the exchange bonds. We have agreed in the registration rights agreement relating to the original bonds to allow you to use this prospectus for this purpose during the one-year period following the Expiration Date, subject to our right under some circumstances to restrict your use of this prospectus. See "The Exchange Offer--Resales of Exchange Bonds."

Broker-dealers that acquired original bonds directly from us may not rely on the staff of the Division of Corporation Finance's interpretations and must comply with the registration and prospectus delivery requirements of the Securities Act, including being named as a selling security holder, in order to resell the original bonds or the exchange bonds.

- Accrued Interest on the Exchange Bonds..... The exchange bonds will bear interest at an annual rate of 5.95%. Any interest that has accrued on the original bonds before their tender in this exchange offer will be payable on the exchange bonds on the first interest payment date after the conclusion of this exchange offer.

- Procedures for Exchanging Bonds..... The procedures for exchanging original bonds involve notifying the exchange agent before the Expiration Date of your intention to do so. These procedures are described in this prospectus under the heading "The Exchange Offer--Procedures for Tendering Original Bonds."

- Expiration Date..... 5:00 p.m., Eastern Time, on September 26, 2002, unless the exchange offer is extended ("Expiration Date").

- Exchange Date..... We will notify the exchange agent of the date of acceptance of the original bonds for exchange.

- Withdrawal Rights..... If you tender your original bonds for exchange in this exchange offer and later wish to withdraw them, you may do so at any time before 5:00 p.m., Eastern Time, on the Expiration Date.

- Acceptance of Original Bonds and Delivery of Exchange Bonds..... We will accept any original bonds that are properly tendered for exchange before 5:00 p.m., Eastern Time, on the Expiration Date. The exchange bonds will be delivered promptly after

Edgar Filing: PECO ENERGY CO - Form 424B3

the Expiration Date.

2

Tax Consequences..... You will not incur any material United States Federal income tax consequences from your participation in this exchange offer. The exchange of bonds will not constitute a taxable exchange for U.S. Federal income tax purposes. For a discussion of other U.S. Federal income tax consequences resulting from the exchange and the acquisition, ownership and disposition of the exchange bonds, see "Certain United States Federal Income Tax Considerations."

Use of Proceeds..... We will not receive any cash proceeds from this exchange offer.

Exchange Agent..... Wachovia Bank, National Association is serving as the exchange agent. Its address and telephone number are provided in this prospectus under the heading "The Exchange Offer--Exchange Agent."

Effect on Holders of Original Bonds..... Any original bonds that remain outstanding after this exchange offer will continue to be subject to restrictions on their transfer. The original bonds may not be offered or sold in the U.S. for the account of or benefit of U.S. persons within the meaning of the Securities Act, except pursuant to an exemption from or in a transaction not subject to, the registration requirements of the Securities Act. After this exchange offer, holders of original bonds will not (with limited exceptions) have any further rights under the registration rights agreement. Any market for original bonds that are not exchanged could be adversely affected by the consummation of this exchange offer.

3

Summary of the Exchange Bonds

This exchange offer applies to \$250,000,000 aggregate principal amount of the original bonds. The terms of the exchange bonds will be the same as the original bonds, except that the exchange bonds will not contain language restricting their transfer, and holders of the exchange bonds generally will not be entitled to further registration rights under the registration rights agreement. The exchange bonds will be issued under the same mortgage indenture as the original bonds and under a supplemental mortgage indenture substantially similar to the supplemental mortgage indenture under which the original bonds were issued.

The following summary of the mortgage does not purport to be complete and is subject to, and is qualified in its entirety by reference to, all provisions of the mortgage. Certain terms used in this section are defined in the mortgage. Copies of the First and Refunding Mortgage and the ninety-seven supplemental

Edgar Filing: PECO ENERGY CO - Form 424B3

mortgage indentures are on file with the SEC. A copy of the supplemental mortgage indenture relating to the bonds may be obtained by contacting us as described under "Where You Can Find More Information."

Issuer..... PECO Energy Company

Securities Offered..... \$250,000,000 5.95% First and Refunding Mortgage Bonds due 2011 ("exchange bonds"), which have been registered under the Securities Act. The original bonds were and the exchange bonds will be issued under our First and Refunding Mortgage dated May 1, 1923, as amended and supplemented by ninety-seven supplemental mortgage indentures and as proposed to be further amended and supplemented by a supplemental mortgage indenture relating to the exchange bonds (herein sometimes referred to collectively as the "mortgage"). Wachovia Bank, National Association is the trustee under the mortgage ("trustee") as successor to First Union National Bank.

Interest Payment Dates..... May 1 and November 1 of each year, beginning May 1, 2002, until the principal is paid or made available for payment. Interest on the exchange bonds will accrue from the most recent date to which interest has been paid on the original bonds. Interest will be computed on the basis of a 360-day year comprised of twelve 30-day months.

Maturity..... November 1, 2011

Optional Redemption..... We may, at our option, redeem the exchange bonds in whole or in part at any time at a price equal to the greater of:

100% of the principal amount of the exchange bonds being redeemed plus accrued interest to the redemption date; or

as determined by the Quotation Agent, the sum of the present values of the remaining scheduled payments of principal and interest on the exchange bonds to be redeemed (not including any portion of payments of interest accrued as of the redemption date) discounted to the redemption date on a semi-annual basis at the Adjusted Treasury Rate plus 30 basis points, plus accrued interest to the redemption date. See "Description of Exchange Bonds--Redemption at Our Option."

The redemption price will be calculated assuming a 360-day year consisting of twelve 30-day months.

We will mail notice of any redemption at least 30 days but not more than 45 days before the redemption date to each registered holder of the exchange bonds to be redeemed.

Edgar Filing: PECO ENERGY CO - Form 424B3

Unless we default in payment of the redemption price, on and after the redemption date, interest will cease to accrue on the exchange bonds or portions of the exchange bonds called for redemption.

See "Description of the Exchange Bonds" for certain definitions used in this summary.

Security..... The exchange bonds will be secured equally with all other bonds outstanding or hereafter issued under the mortgage (sometimes referred to herein as the "mortgage bonds") by the lien of the mortgage. The lien of the mortgage, subject to (1) minor exceptions and certain excepted encumbrances that are defined in the mortgage and (2) the trustee's prior lien for compensation and expenses, constitutes a first lien on substantially all of our properties. The mortgage does not constitute a lien on any property owned by our subsidiaries. Our properties consist principally of electric transmission and distribution lines and substations, gas distribution facilities and general office and service buildings.

We may not issue securities which will rank ahead of the mortgage bonds as to security. We may acquire property subject to prior liens. If such property is made the basis for the issuance of additional bonds after we acquire it, all additional bonds issued under the prior lien must be pledged with the trustee as additional security under the mortgage.

Form..... The exchange bonds will be book-entry only and registered in the name of a nominee of DTC.

Summary Information About PECO Energy Company

The following summary contains basic information about PECO Energy Company. It may not contain all of the information that may be important to you in making a decision to exchange your original bonds for the exchange bonds. You should read this entire prospectus, and the documents to which we refer, before making your decision.

PECO ENERGY COMPANY

We are a subsidiary of Exelon Corporation ("Exelon") and are engaged principally in the purchase, transmission, distribution and sale of electricity to residential, commercial, industrial and wholesale customers and in the purchase, distribution and sale of natural gas to residential, commercial and industrial customers. We deliver electricity to approximately 1.5 million customers and natural gas to approximately 440,000 customers.

Our traditional retail service territory covers 2,107 square miles in southeastern Pennsylvania. We provide electric delivery service in an area of

Edgar Filing: PECO ENERGY CO - Form 424B3

1,972 square miles, with a population of approximately 3.6 million, including 1.6 million in the City of Philadelphia. Natural gas service is supplied in a 1,475 square mile area in southeastern Pennsylvania adjacent to Philadelphia, with a population of 1.9 million.

Pursuant to the Pennsylvania Electricity Generation Customer Choice and Competition Act (the "Competition Act"), the Commonwealth of Pennsylvania required the unbundling of retail electric services in Pennsylvania into separate generation, transmission and distribution services with open retail competition for generation services. Since the commencement of deregulation in 1999, we have served as the local distribution company providing electric distribution services to all customers in our service territory and bundled electric service to provider-of-last-resort customers, which are customers who do not or cannot choose an alternate electric generation supplier.

As a result of deregulation, Exelon undertook a corporate restructuring to separate its unregulated generation and other competitive businesses from its regulated energy delivery businesses. As part of the corporate restructuring, effective January 1, 2001, our unregulated operations were transferred to separate subsidiaries of Exelon. The transferred assets and liabilities related to nuclear, fossil and hydroelectric generation and wholesale services and unregulated gas and electric sales activities, and administrative, information technology and other support for all other business activities of Exelon and its subsidiaries. In connection with the restructuring, we entered into a power purchase agreement with Exelon Generation Company, LLC ("Exelon Generation"), a wholly owned subsidiary of Exelon, to supply us with all of our electric load requirements for customers through 2010.

As a public utility under the Pennsylvania Public Utility Code, we are subject to regulation by the Pennsylvania Public Utility Commission ("PUC"), including regulation as to electric distribution rates, retail gas rates, issuances of securities and certain other aspects of our operations. As a subsidiary of Exelon, a registered holding company under the Public Utility Holding Company Act of 1935 ("PUHCA"), we are subject to a number of restrictions under PUHCA. As an electric utility under the Federal Power Act, we are also subject to regulation by the Federal Energy Regulatory Commission ("FERC") as to transmission rates and certain other aspects of our business, including interconnections and sales of transmission related assets.

Our principal executive offices are located at 2301 Market Street, Philadelphia, PA 19101-8699 and our telephone number is (215) 841-4000.

6

CORPORATE STRUCTURE

We were incorporated in Pennsylvania in 1929. We are an indirect wholly owned subsidiary of Exelon, a public utility holding company. Exelon is the result of the merger in October 2000 between us and Unicom Corporation ("Unicom"), the former parent company of Commonwealth Edison Company ("ComEd"). As part of a corporate restructuring of Exelon effective January 1, 2001, our power generation assets and wholesale power marketing business, as well as ComEd's power generation assets and wholesale power marketing business, were transferred to Exelon Generation.

Exelon Corporation

|

Edgar Filing: PECO ENERGY CO - Form 424B3

RISK FACTORS

In addition to the information contained elsewhere in this prospectus, you should carefully consider the risks described below. Each of the following factors could have a material adverse effect on our business and could result in a loss or a decrease in the value of your investment.

The rates we charge for electric distribution and retail gas are regulated by the Pennsylvania Public Utility Commission; failure to obtain adequate and timely rate relief could negatively affect our business.

We are a public utility under the Pennsylvania Public Utility Code and, as a result, the PUC regulates our electric distribution rates and retail gas rates and also matters such as the issuance of securities and certain other aspects of our operations. Substantially all of our retail revenues are subject to regulation by the PUC. The rates are set by the PUC and are effective until a new rate case is brought. Limited categories of costs, principally the cost of gas, are recovered through adjustment charges that are periodically set to reflect actual costs. If our costs to serve customers exceed the amount included in our adjustment charges, there will be a negative effect on our cash flow.

We are subject to the risks inherent in the utility business and our cash flow and earnings could be adversely affected by increased customer demand for energy, a failure to deliver on the part of our suppliers or, after our long-term contracts expire, high prices and volatile markets for purchased electricity.

The utility business involves many operating risks. If our operating expenses exceed the levels recovered from retail customers for an extended period of time our cash flow and earnings would be negatively affected. In addition, after our power purchase agreement with our affiliate Exelon Generation expires in 2010, our results could be affected by increases in purchased power costs. In addition, our provider-of-last-resort obligation may

Edgar Filing: PECO ENERGY CO - Form 424B3

continue past the expiration of this contract, which, depending upon the volatility of the market for electricity at the time, could affect our operating expenses and therefore results. Factors that could cause purchased power costs to increase include, but are not limited to:

- . increases in demand due to, for example, weather, customer growth or customer obligations;
- . below normal energy available on the market;
- . increases in purchases in wholesale markets at prices above the amount recovered in retail rates;
- . extended outages of any thermal or other generating facilities or the transmission lines that deliver energy to load centers; and
- . failure to perform on the part of any party from which we purchase capacity or energy.

Our financial performance depends on our operation of our facilities.

Failures of equipment or facilities in our distribution system may cause interruption of the electric services we provide, which could adversely affect our business. Failures of equipment or facilities could result in lost revenues, additional costs and possible claims against us for damages incurred by customers as a result of the outage. Our efforts to repair or replace equipment may not be successful or we may be unsuccessful in making necessary improvements to our transmission and distribution system, causing other outages, having an adverse affect on our business.

If our operating expenses exceed the levels recovered from retail customers for an extended period of time our cash flow and earnings would be negatively affected

Our business may be adversely affected by regulatory changes in the electric power and natural gas industries.

Transmission and distribution of electricity remain regulated industries, while in many states, including the Commonwealth of Pennsylvania, electricity generation has been deregulated. The regulation of the electric power and natural gas industries, however, continues to undergo substantial changes at both the federal and state level.

8

These changes have significantly affected the whole industry and the manner in which its participants conduct their businesses. Future changes in laws and regulations, including changes resulting from market volatility and increased security concerns, may have an effect on our business in ways that we cannot predict.

Our revenues will be affected by rate reductions and rate caps currently in effect and any that may be imposed in the future. The rate caps limit our ability to recover increased expenses and the costs of investments in new transmission and distribution facilities through rates. As a result, our future results of operations will depend on our ability:

- . to deliver electricity and gas to our customers cost-effectively, particularly in light of the current caps on rates;

Edgar Filing: PECO ENERGY CO - Form 424B3

- . to realize cost savings; and
- . to manage our provider of last resort responsibilities.

Our financial performance depends on our ability to predict our load requirements.

Under electric restructuring legislation in Pennsylvania, we are required to provide generation and distribution services as the "provider-of-last-resort" to customers who cannot or do not choose alternate suppliers or who choose to return to our utility after taking service elsewhere. This obligation may continue past the expiration of our power purchase agreement with Exelon Generation in 2010. Because the choice of electricity generation supplier lies with the customer, it is difficult for us to predict and plan for the level of customers and associated energy demand. If these obligations remain unchanged, we could be required to maintain reserves sufficient to serve 100% of the service territory load at a tariffed rate on the chance that customers who switched to new suppliers come back to us as a "last resort" option. A significant over- or under-estimation of such reserves may cause us to take a commodity price risk. We continue to be obligated to provide a reliable delivery system under cost-based rates.

Recession, acts of war or terrorism could negatively impact our business.

The consequences of a prolonged recession and adverse market conditions may include the continued uncertainty of energy prices--which could increase our provider-of-last-resort obligations--and uncertainty in the capital and commodity markets. We cannot predict the impact of any continued economic downturn, uncertain capital and commodity markets or fluctuating energy prices on our business. The impact, however, could have a material adverse effect on our financial condition, results of operations and net cash flows.

Like other operators of major industrial facilities, our transmission and distribution facilities may be targets of terrorist activities that could result in disruption of our ability to distribute some portion of our electricity and gas. Any such disruption could result in a significant decrease in revenues and/or significant additional costs to repair, which could have a material adverse impact on our financial condition, results of operation and net cash flows.

We are subject to control by Exelon.

We are ultimately controlled by Exelon and, therefore, Exelon controls decisions regarding our business and has control over our management and affairs. In circumstances involving a conflict of interest between Exelon, on the one hand, and our creditors, on the other, Exelon could exercise its power to control us in a manner that would benefit Exelon to the detriment of our creditors, including the holders of the exchange bonds.

Conflicts of interest may arise between us and our affiliate.

We rely on purchases from our affiliate Exelon Generation under long-term contracts in order to supply electricity to our customers. Conflicts of interest may arise if we need to enforce the terms of agreements between us and Exelon Generation. Decisions concerning the interpretation or operation of these agreements could be made from perspectives other than the interests solely of our company or its creditors, including the holders of the exchange bonds.

Edgar Filing: PECO ENERGY CO - Form 424B3

We are subject to regulation by FERC.

We also provide wholesale transmission service under rates established by FERC. FERC has used its regulation of transmission to encourage competition for wholesale generation services and the development of regional structures to facilitate regional wholesale markets. FERC continues to propose regulations regarding evolving wholesale markets. Further regulation by FERC in this area could affect our business in ways we cannot predict.

There is no public market for the exchange bonds.

Following the completion of this exchange offer, the exchange bonds will be freely tradable by most holders. See "The Exchange Offer." We do not intend to list the exchange bonds on any United States or foreign securities exchange. We can give no assurances concerning the liquidity of any market that may develop for the exchange bonds, the ability of any investor to sell the exchange bonds, or the price at which investors would be able to sell their exchange bonds. If a market for the exchange bonds does not develop, investors may be unable to resell the exchange bonds for an extended period of time, if at all. Consequently, investors may not be able to liquidate their investment readily, and lenders may not readily accept the exchange bonds as collateral for loans.

If you fail to exchange the original bonds, they will remain subject to transfer restrictions.

Any original bonds that remain outstanding after this exchange offer will continue to be subject to restrictions on their transfer. After this exchange offer, holders of original bonds will not (with limited exceptions) have any further rights under the exchange and registration rights agreement. Any market for original bonds that are not exchanged could be adversely affected by the conclusion of this exchange offer.

Late deliveries of the original bonds and other required documents could prevent a holder from exchanging its bonds.

Holders are responsible for complying with all exchange offer procedures. Issuance of exchange bonds in exchange for original bonds will only occur upon completion of the procedures described in this prospectus under the heading "The Exchange Offer--Procedures for Tendering Original bonds." Therefore, holders of original bonds who wish to exchange them for exchange bonds should allow sufficient time for completion of the exchange procedure. We are not obligated to notify you of any failure to follow the proper procedure.

If you are a broker-dealer, your ability to transfer the bonds may be restricted.

A broker-dealer that purchased original bonds for its own account as part of market-making or trading activities must deliver a prospectus when it sells the exchange bonds. Our obligation to make this prospectus available to broker-dealers is limited. Consequently, we cannot guarantee that a proper prospectus will be available to broker-dealers wishing to resell their exchange bonds.

FORWARD-LOOKING STATEMENTS

This prospectus includes "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. All statements, other

Edgar Filing: PECO ENERGY CO - Form 424B3

than statements of historical facts, included in this prospectus that address activities, events or developments that we expect or anticipate will or may occur in the future, including such matters as our projections, future capital expenditures, business strategy, competitive strengths, goals, expansion, market and industry developments and the growth of our businesses and operations, are forward-looking statements. These statements are based on assumptions and analyses made by us in light of our experience and our perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. These statements involve a number of risks and uncertainties, many of which are beyond our control. The following are among the most important factors that could cause actual results to differ materially from the forward-looking statements:

- . the significant considerations and risks discussed in this prospectus;
- . general and local economic, market or business conditions;
- . fluctuations in demand for electricity, capacity and ancillary services in the markets in which we operate;
- . uncertain obligations due to customers' right to choose generation suppliers;
- . changes in laws or regulations that are applicable to us;
- . environmental constraints on construction and operation; and
- . access to capital.

Consequently, all of the forward-looking statements made in this prospectus are qualified by these cautionary statements and we cannot assure you that the results or developments anticipated by us will be realized or, even if realized, will have the expected consequences to or effects on us or our business prospects, financial condition or results of operations. You should not place undue reliance on these forward-looking statements in making your investment decision. We expressly disclaim any obligation or undertaking to release publicly any updates or revisions to these forward-looking statements to reflect events or circumstances that occur or arise or are anticipated to occur or arise after the date hereof. In making an investment decision regarding the exchange bonds, we are not making, and you should not infer, any representation about the likely existence of any particular future set of facts or circumstances.

USE OF PROCEEDS

The exchange offer is being made in accordance with requirements of the registration rights agreement. We will not receive any cash proceeds from the issuance of the exchange bonds in the exchange offer. In exchange for issuing the exchange bonds as described in this prospectus, we will receive an equal principal amount of original bonds, which will be canceled.

The net proceeds from the sale of the original bonds, together with available cash balances, were used to repay \$250 million aggregate principal amount of our First and Refunding Mortgage Bonds, 5 5/8% Series due November 1, 2001.

CAPITALIZATION

Edgar Filing: PECO ENERGY CO - Form 424B3

The following table sets forth our capitalization as of June 30, 2002. This table should be read in conjunction with our consolidated financial statements and related notes for the quarter ended June 30, 2002, included in this prospectus.

	As of June 30, 2002
	(\$ in millions)
Short-term debt (a).....	\$1,085

Capitalization:	
Long-term debt (b):	
Transition bonds (c).....	\$4,132
First mortgage bonds.....	509
Other long-term debt.....	228
Preferred securities.....	284
Shareholders' equity.....	385

Total capitalization.....	\$5,538
	=====

-
- (a) Includes current maturities of long-term debt of \$910 million, of which \$280 million are transition bonds.
 - (b) Includes unamortized debt discounts and premiums. Excludes current maturities.
 - (c) Transition bonds represent bonds issued by our subsidiary to securitize a portion of our stranded cost recovery.

12

SELECTED HISTORICAL CONSOLIDATED FINANCIAL DATA

The following table sets forth our selected historical consolidated financial data. The historical consolidated income statement data for the years ended December 31, 2001, December 31, 2000 and December 31, 1999 have been derived from our audited financial statements included elsewhere in this prospectus. The historical consolidated balance sheet data as of December 31, 2001 and 2000 have been derived from our audited financial statements included elsewhere in this prospectus. As part of Exelon's restructuring, effective January 1, 2001, our unregulated generation and other competitive businesses and related assets and liabilities were transferred to separate subsidiaries of Exelon. The restructuring has had a significant impact on our assets, liabilities and equity and our results of operations. Our results of operations and assets and liabilities prior to January 2001 do not reflect the restructuring. The information set forth below should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") and the Consolidated Financial Statements and accompanying Notes to Consolidated Financial Statements included elsewhere in this prospectus.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

On October 20, 2000, we became a wholly owned subsidiary of Exelon as a result of the transactions relating to the merger.

During January 2001, Exelon undertook a restructuring to separate its generation and other competitive businesses from its regulated energy delivery

Edgar Filing: PECO ENERGY CO - Form 424B3

business. As part of the restructuring, our non-regulated operations and related assets and liabilities, representing the generation and enterprises business segments, were transferred to separate subsidiaries of Exelon. As a result, beginning January 2001, our operations have consisted of retail electricity distribution and transmission business in southeastern Pennsylvania and our natural gas distribution business located in the Pennsylvania counties surrounding the City of Philadelphia. The estimated impact of the restructuring reflects the effects of removing the generation and enterprises operations and obtaining energy and capacity from Exelon Generation under the terms of the Power Purchase Agreement for the year ended December 31, 2000.

RESULTS OF OPERATIONS

Three Months Ended June 30, 2002 Compared to Three Months Ended June 30, 2001

Preferred Stock Dividends.....	(2)	(3)	1	(33.3)%
	-----	-----	-----	
NET INCOME ON COMMON STOCK.....	\$ 91	\$ 82	\$ 9	11.0%
	=====	=====	=====	

Net income on common stock increased \$9 million, or 11% for the quarter ended June 30, 2002 as compared to the same 2001 period. The increase was a result of higher additional volume, favorable rate adjustments and lower interest expense on debt partially offset by increased depreciation and amortization expense.

Edgar Filing: PECO ENERGY CO - Form 424B3

Our electric sales statistics are as follows:

	For the three months ended June 30,		
Deliveries--(in GWh)	2002	2001	% Change
-----	-----	-----	-----
Bundled Deliveries (1)			
Residential.....	2,115	1,673	26.4%

	=====	=====	=====	

-
- (1) Bundled service reflects deliveries to customers taking electric service under tariffed rates, which include the cost of energy, the delivery cost of the transmission and distribution of the energy and a CTC charge.
 - (2) Revenue from customers receiving generation from an alternate supplier includes a distribution charge and a CTC charge.
 - (3) Wholesale and miscellaneous revenues include sales, transmission revenue, sales to municipalities and other wholesale energy sales.

15

The changes in electric retail revenues for the quarter ended June 30, 2002, as compared to the same 2001 period, are as follows:

	Variance

	(in millions)
Customer Choice.....	\$ 85
Rate Changes.....	13
Weather.....	1
Other Effects.....	19

Electric Retail Revenue	\$118
	=====

Customer Choice. All our customers have a choice to purchase energy from other suppliers. This choice generally does not impact kWh deliveries, but reduces revenue collected from customers because they are not obtaining generation supply from us.

As of June 30, 2002, the customer load served by alternate suppliers was 991 MW or 12.8% as compared to 1,102 MW or 14.5% as of June 30, 2001. For the quarter ended June 30, 2002, the percent of our total retail deliveries for which we were the electric supplier was 93.4% in 2002, an 18.3% increase as compared to 75.1% in 2001. As of June 30, 2002, the number of customers served by alternate suppliers was 308,866 or 20.2% as compared to June 30, 2001 of 400,972 or 26.4%. The increases in the customer load and the percentage of MWh served by us, and the decrease in the number of customers served by alternative suppliers primarily resulted from customers selecting or returning to us as their electric generation supplier.

In February 2002, we were notified by New Power Company ("New Power") of its intent to withdraw from providing Competitive Default Service ("CDS") to approximately 180,000 residential customers. As a result of that withdrawal, those CDS customers were returned to us in the second quarter of 2002. Pursuant to a tariff filing approved by the PUC, we will serve those returned customers

Edgar Filing: PECO ENERGY CO - Form 424B3

at the discount energy rates on generation provided for under the original New Power CDS Agreement for the remaining term of that contract. Subsequently, in the second quarter of 2002, New Power also advised us it planned to withdraw from serving all of its customers in Pennsylvania, including approximately 15,000 of our non-CDS customers, and to return those customers to us in September 2002.

Rate Changes. The increase in revenues attributable to rate changes primarily reflects a \$13 million increase due to an increase in the gross receipts tax rate effective January 1, 2002.

As permitted by the Pennsylvania Electric Competition Act, the Pennsylvania Department of Revenue has calculated a 2002 Revenue Neutral Reconciliation ("RNR") adjustment to the gross receipts tax rate in order to neutralize the impact of electric restructuring on its tax revenues. The RNR adjustment increases the gross receipts tax rate, which will increase our annual revenues and tax obligations by approximately \$50 million in 2002. In January 2002, the PUC approved the adjustment to the gross receipts tax rate, which was implemented effective January 1, 2002. The RNR adjustment is under appeal.

Weather. The demand for electricity and gas services is impacted by weather conditions. Very warm weather in summer months and very cold weather in other months is referred to as "favorable weather conditions," because these weather conditions result in increased sales of electricity and gas. Conversely, mild weather reduces demand.

The weather impact was favorable compared to the prior year as a result of warmer summer weather.

16

Other Effects. Other items affecting revenue during the quarter ended June 30, 2002 include:

- . **Volume.** Exclusive of weather impacts, higher delivery volume affected our revenue by \$24 million compared to the same 2001 period.
- . **Other.** The payment of \$7 million to Exelon Generation related to nuclear decommissioning cost recovery under an agreement effective September 2001, which reduced our revenue compared to the prior year.

Our gas sales statistics for the quarter ended June 30, 2002 as compared to the same 2001 period are as follows:

	For the three months ended June 30,		
	2002	2001	Variance
	-----	-----	-----
Deliveries in million cubic feet (mmcf)	14,286	13,781	505
Revenue (in millions).....	\$ 84	\$ 112	\$(28)

The changes in gas revenue for the quarter ended June 30, 2002, as compared to the same 2001 period, are as follows:

Edgar Filing: PECO ENERGY CO - Form 424B3

	Variance

	(in millions)
Rate Changes	\$(28)
Weather.....	--
Volume.....	(1)
Other.....	1

Gas Revenue.	\$(28)
	====

Rate Changes. The unfavorable variance in rates is attributable to an adjustment of the purchased gas cost recovery by the PUC effective in December 2001. The average rate per million cubic feet for all customers for the quarter ended June 30, 2002 was 28% lower than the same 2001 period. Our gas rates are subject to periodic adjustments by the PUC designed to recover or refund the difference between actual cost of purchased gas and the amount included in base rates and to recover or refund increases or decreases in certain state taxes not recovered in base rates.

Weather. The weather impact was neutral during the quarter ended June 30, 2002 compared to the same 2001 period.

Volume. Exclusive of weather impact, delivery volume was consistent for the quarter ended June 30, 2002 compared to the same 2001 period.

Purchased Power and Fuel Expense

Purchased power and fuel expense for the quarter ended June 30, 2002 increased \$64 million as compared to the same 2001 period. The increase in fuel and purchased power expense was primarily attributable to \$73 million from customers in Pennsylvania selecting or returning to us as their electric generation supplier, \$9 million primarily attributable to higher delivery volume and higher PJM ancillary charges of \$8 million. These increases were partially offset by \$28 million from lower gas prices.

Operating and Maintenance Expense

O&M expense for the quarter ended June 30, 2002 increased \$5 million, or 4%, as compared to the same 2001 period. The increase in O&M expense was primarily attributable to \$5 million related to the deployment of automated meter reading technology and \$3 million related to an increased allocation of corporate expense.

17

Depreciation and Amortization Expense

Depreciation and amortization expense for the quarter ended June 30, 2002 increased \$10 million, or 10%, as compared to the same 2001 period. The increase was primarily attributable to \$9 million of additional amortization of our CTC and an increase of \$1 million related to depreciation expense associated with additional plant in service. The additional amortization of the CTC is in accordance with our original settlement under the Competition Act.

Taxes Other Than Income

Edgar Filing: PECO ENERGY CO - Form 424B3

Taxes other than income for the quarter ended June 30, 2002 increased \$22 million, or 54%, as compared to the same 2001 period. The increase was primarily attributable to additional gross receipts tax related to additional revenues and an increase in the gross receipts tax rate on electric revenue effective January 1, 2002.

Interest Charges

Interest charges consist of interest expense and distributions on Company-Obligated Mandatorily Redeemable Preferred Securities of a Partnership ("COMRPS"). Interest charges decreased \$27 million, or 21% in the quarter ended June 30, 2002 as compared to the same 2001 period. The decrease was primarily attributable to lower interest expense on long-term debt of \$22 million as a result of principal payments and lower interest rates and interest expense related to a loan from an affiliate in 2001 of \$2 million.

Other Income and Deductions

Other income and deductions excluding interest charges remained consistent in the quarter ended June 30, 2002 as compared to the same 2001 period.

Income Taxes

The effective tax rate was substantially unchanged at 34.5% for the quarter ended June 30, 2002 as compared to 34.1% for the same 2001 period.

Preferred Stock Dividends

Preferred stock dividends for the quarter ended June 30, 2002 were consistent as compared to the same 2001 period.

18

Six Months Ended June 30, 2002 Compared to Six Months Ended June 30, 2001

	-----	-----	-----	
NET INCOME ON COMMON STOCK.....	\$ 177	\$ 202	\$ (25)	(12.4)%
	=====	=====	=====	

Net income on common stock decreased \$25 million, or 12% for the six months ended June 30, 2002 as compared to the same 2001 period. The decrease was a result of lower margins due to the unplanned return of certain residential, commercial and industrial customers, milder weather, increased depreciation and amortization expense, partially offset by favorable rate adjustments.

19

20

The changes in electric retail revenues for the six months ended June 30, 2002, as compared to the same 2001 period, are as follows:

	Variance

	(in millions)
Customer Choice.....	\$165
Rate Changes.....	39
Weather.....	(18)
Other Effects.....	(12)

Electric Retail Revenue	\$174
	=====

Customer Choice. As of June 30, 2002, the customer load served by alternate suppliers was 991 MW or 12.8% as compared to 1,102 MW or 14.5% as of June 30,

Edgar Filing: PECO ENERGY CO - Form 424B3

2001. For the six months ended June 30, 2002, the percent of our total retail deliveries for which we were the electric supplier was 90.9% in 2002, an 18.2% increase as compared to 72.7% in 2001. As of June 30, 2002, the number of customers served by alternate suppliers was 308,866 or 26.4% as compared to June 30, 2001 of 400,972 or 26.4%. This increase in the customer load and the percentage of MWh served by us, and the decrease in the number of customers served by alternative suppliers primarily resulted from customers selecting or returning to us as their electric generation supplier.

Rate Changes. The increase in revenues attributable to rate changes primarily reflects the expiration of a 6% reduction in our electric rates during the first quarter of 2001 and a \$26 million increase as a result of the increase in the gross receipts tax rate effective January 1, 2002. These increases are partially offset by the timing of a \$60 million rate reduction in effect for 2001 and 2002.

Weather. The weather impact was unfavorable compared to the prior year primarily as a result of warmer winter weather. Heating degree-days decreased 15% for the six months ended June 30, 2002 compared to the same 2001 period.

Other Effects. Other items affecting revenue during the six months ended June 30, 2002 include:

Volume. Exclusive of weather impacts, higher delivery volume increased our revenue by \$7 million compared to the same 2001 period.

Other. The payment of \$14 million to Exelon Generation related to nuclear decommissioning cost recovery under an agreement effective September 2001 which reduced our revenue compared to the prior year and an \$11 million settlement of CTCs by a large customer in the first quarter of 2001.

Our gas sales statistics for the six months ended June 30, 2002 as compared to the same 2001 period are as follows:

	2002	2001	Variance
	-----	-----	-----
Deliveries in million cubic feet (mmcf)	45,643	48,011	(2,368)
Revenue (in millions).....	\$ 293	\$ 407	\$ (114)

The changes in gas revenue for the six months ended June 30, 2002, as compared to the same 2001 period, are as follows:

	Variance

	(in millions)
Rate Changes	\$ (63)
Weather.....	(30)
Volume.....	(22)
Other.....	1

Gas Revenue.	\$ (114)
	=====

Edgar Filing: PECO ENERGY CO - Form 424B3

Rate Changes. The unfavorable variance in rates is attributable to an adjustment of the purchased gas cost recovery by the PUC effective in December 2001. The average rate per million cubic feet for all customers for the six months ended June 30, 2002 was 24% lower than the same 2001 period.

Weather. The unfavorable weather impact is attributable to warmer winter weather during the six months ended June 30, 2002 as compared to the same 2001 period. Heating degree-days decreased 15% in the six months ended June 30, 2002 compared to the same 2001 period.

Volume. Exclusive of weather impacts, lower delivery volume affected revenue by \$22 million in the six months ended June 30, 2002 compared to the same 2001 period. Total deliveries to retail customers decreased 5% in the six months ended June 30, 2002 compared to the same 2001 period, primarily as a result of slower economic conditions in 2002 offset by increased customer growth.

Purchased Power and Fuel Expense

Purchased power and fuel expense for the six months ended June 30, 2002 increased \$62 million as compared to the same 2001 period. The increase in fuel and purchased power expense was primarily attributable to \$150 million from customers in Pennsylvania selecting or returning to us as their electric generation supplier and higher PJM ancillary charges of \$17 million. These increases were partially offset by \$63 million from lower gas prices, \$30 million as a result of unfavorable weather conditions and \$22 million primarily attributable to lower delivery volume primarily related to gas.

Operating and Maintenance Expense

O&M expense for the six months ended June 30, 2002 increased \$9 million, or 4%, as compared to the same 2001 period. The increase in O&M expense was primarily attributable to \$12 million related to the deployment of automated meter reading technology and \$9 million related to an increased allocation of corporate expense. These increases were partially offset by \$6 million of incremental storm costs in 2001 and \$4 million associated with a write-off of excess and obsolete inventory in 2001.

Depreciation and Amortization Expense

Depreciation and amortization expense for the six months ended June 30, 2002 increased \$21 million, or 11%, as compared to the same 2001 period. The increase was primarily attributable to \$17 million of additional amortization of our CTC and an increase of \$4 million related to depreciation expense associated with additional plant in service. The additional amortization of the CTC is in accordance with our original settlement under the Competition Act.

Taxes Other Than Income

Taxes other than income for the six months ended June 30, 2002 increased \$38 million, or 45%, as compared to the same 2001 period. The increase was primarily attributable to additional gross receipts tax related to additional revenues and an increase in the gross receipts tax rate on electric revenue effective January 1, 2002.

Interest Charges

Interest charges decreased \$40 million, or 18% in the six months ended June 30, 2002 as compared to the same 2001 period. The decrease was primarily

Edgar Filing: PECO ENERGY CO - Form 424B3

attributable to lower interest expense on long-term debt of \$32 million as a result of principal payments, lower interest rates and an \$8 million reduction in interest expense due to lower interest rates on a loan from ComEd in 2001.

22

Other Income and Deductions

Other income and deductions excluding interest charges decreased \$16 million, or 89% in the six months ended June 30, 2002 as compared to the same 2001 period. The decrease in other income and deductions was primarily attributable to lower interest income of \$6 million in 2002. The decrease was also attributable to a gain on the settlement of an interest rate swap of \$6 million and the favorable settlement of a customer contract of \$3 million, both of which occurred in 2001.

Income Taxes

The effective tax rate was 33.2% for the six months ended June 30, 2002 as compared to 35.1% for the same 2001 period. The decrease in the effective tax rate was primarily attributable to a reduction in state income taxes.

Preferred Stock Dividends

Preferred stock dividends for the quarter ended June 30, 2002 were consistent as compared to the same 2001 period.

LIQUIDITY AND CAPITAL RESOURCES

Our business is capital intensive and requires considerable capital resources. Our capital resources are primarily provided by internally generated cash flows from operations and, to the extent necessary, external financing including the issuance of commercial paper. Our access to external financing at reasonable terms is dependent on our credit ratings and general business condition and the utility industry. Capital resources are used primarily to fund construction, repayments of maturing debt and preferred securities and payment of common stock dividends to Exelon.

Cash Flows from Operating Activities

Cash flows provided by operations for the six months ended June 30, 2002 were \$468 million compared to \$427 million for the six months ended June 30, 2001. The increase in cash flows was primarily attributable to lower payments related to accounts payable of \$46 million, higher collection of deferred energy costs as a result of a change in gas rates of \$42 million and lower prepaid taxes of \$29 million. These increases were partially offset by changes in intercompany receivables and payables of \$41 million and deferred income taxes of \$32 million. Our cash flow from operating activities primarily results from sales of electricity and gas to a stable and diverse base of retail customers at fixed prices. Our future cash flows will depend upon the ability to achieve cost savings in operations, and the impact of the economy, weather and customer choice on its revenues. Although the amounts may vary from period to period as a result of the uncertainties inherent in our business, we expect that we will continue to provide a reliable and steady source of internal cash flow from operations for the foreseeable future.

Cash Flows from Investing Activities

Cash flows used in investing activities for the six months ended June 30, 2002 were \$122 million compared to \$87 million for the six months ended June

Edgar Filing: PECO ENERGY CO - Form 424B3

30, 2001. The increase in cash flows used in investing activities was primarily attributable to an increase in other investing activities. Our investing activities during the six months ended June 30, 2002 were funded primarily by operating activities.

Our projected capital expenditures for 2002 are \$284 million. Approximately one half of the budgeted 2002 expenditures are for capital additions to support customer and load growth and the remainder for additions and upgrades to existing facilities. We anticipate that we will obtain financing, when necessary, through borrowings, the issuance of preferred securities, or capital contributions from Exelon. Our proposed capital expenditures and

23

other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

Cash Flows from Financing Activities

Cash flows used in financing activities for the six months ended June 30, 2002 were \$306 million compared to \$332 million for the six months ended June 30, 2001. Cash flows used in financing activities are primarily attributable to debt service and payment of dividends to Exelon. The change in cash flows used in financing activities is primarily attributable to an increase in commercial paper borrowings of \$196 million partially offset by additional dividends paid to Exelon of \$69 million, the contribution from Exelon in 2001 of \$53 million, additional debt service of \$34 million, and proceeds from the settlement of interest rate swap agreements in 2001 of \$31 million.

Credit Issues

At June 30, 2002, we had outstanding \$175 million of notes payable consisting principally of commercial paper. Certain of the credit agreements to which we are a party require us to maintain a debt to total capitalization ratio of 65% or less, excluding securitization debt and excluding the receivable from parent recorded in our shareholders' equity. At June 30, 2002, our debt to total capitalization ratio on that basis was 38%.

Our access to the capital markets, including the commercial paper market, and our financing costs in those markets are dependent on our securities ratings. None of our borrowings are subject to default or prepayment as a result of a downgrading of securities ratings, although such a downgrading could increase interest charges under our bank credit facility. From time to time, we enter into interest rate swaps that require the maintenance of investment grade ratings. Failure to maintain investment grade ratings would allow the counterparty to terminate the derivative and settle the transaction on a net present value basis.

At June 30, 2002, our capital structure, excluding the deduction from shareholders' equity of the \$1.8 billion receivable from Exelon, consisted of 26% common equity, 2% notes payable, 3% preferred stock and COMRPS (which comprised 2% of our total capitalization structure), and 69% long-term debt including transition bonds issued by PECO Energy Transition Trust. Long-term debt included \$4.4 billion of transition bonds representing 52% of capitalization.

Under PUHCA and the Federal Power Act, we can pay dividends only from retained or current earnings. At June 30, 2002, we had retained earnings of \$277 million.

Edgar Filing: PECO ENERGY CO - Form 424B3

Contractual Obligations and Commercial Commitments

Contractual obligations represent cash obligations that are considered to be firm commitments and commercial commitments represent commitments triggered by future events. Our contractual obligations and commercial commitments as of June 30, 2002 were materially unchanged, other than in the normal course of business, from the amounts as set forth in the December 31, 2001 Form 10-K, except for an \$85 million increase in the amount of surety bonds required by our insurance policies. Approximately one-fourth of the surety bonds expire in the remainder of 2002 and the other three-fourths expire in the two-year period ending December 2004.

24

	=====	=====	=====	=====

Net Income

Net income from normal operations decreased \$11 million, or 3% in 2001 as compared to 2000. Our results from normal operations improved as a result of lower margins due to the unplanned return of certain commercial and industrial customers, milder weather, increased depreciation and amortization expense and higher interest expense partially offset by favorable rate adjustments.

25

Operating Revenues

Bundled service reflects deliveries to customers taking electric service under tariffed rates, which include the cost of energy, the delivery cost of the transmission and distribution of the energy and a transition charge (including CTC and intangible transition charge ("ITC")). Unbundled service reflects customers electing to receive electric generation service from an alternative energy supplier. Revenue from customers receiving generation from an alternate supplier includes a transmission and distribution charge and a CTC/ITC charge. Our electric sales statistics are as follows:

Deliveries--(in MWh)	2001	2000	Variance
-----	-----	-----	-----
Bundled Deliveries			
Residential.....	8,072,915	9,324,800	(1,251,885)

	=====	=====	=====

The changes in electric retail revenues for 2001, as compared to 2000, are as follows:

	Variance

	(in millions)
Customer Choice	\$276
Rate Changes...	241
Weather.....	(5)
Other Effects..	(14)

Retail Revenue.	\$498
	=====

26

Customer Choice. All our customers have choice to purchase energy from other suppliers. This choice generally does not impact kWh deliveries, but reduces revenue collected from customers because they are not obtaining generation supply from us. Customers who are served by an alternate supplier continue to pay competitive transition charges.

As of December 31, 2001, the customer load served by alternate suppliers was 1,003 MW or 13.0% as compared to the same prior year period of 2,631 MW or 34.9%. For the year ended December 31, 2001, the percent of MWh sold by us increased by 17.2% to 79.8% of total retail deliveries as compared to 62.6% in 2000. This reduction in the customer load and the percentage of MWh served by alternate suppliers, primarily resulted from small and large commercial and industrial customers selecting or returning to us as their electric generation supplier.

As of December 31, 2001, the number of customers served by alternate suppliers was 371,500 or 24.4% as compared to December 31, 2000 of 269,395 or 18.0%. The increase from the prior year is primarily a result of the Competitive Default Service ("CDS") agreements for residential customers with

Edgar Filing: PECO ENERGY CO - Form 424B3

the New Power Company and Green Mountain Energy Company. As of December 31, 2001, there were 227,349 residential customers assigned to these generation providers as part of the agreement.

Rate Changes. The increase in revenues attributable to rate changes reflects the expiration of a 6% reduction in our electric rates in effect for 2000, partially offset by a \$60 million rate reduction in effect for 2001.

Weather. The demand for electricity and gas services is impacted by weather conditions. Very warm weather in summer months and very cold weather in other months is referred to as "favorable weather conditions," because these weather conditions result in increased demand for electricity. Conversely, mild weather reduces demand. The weather impact was unfavorable compared to the prior year as a result of warmer winter weather partially offset by warmer summer weather. Cooling degree days increased 34% in 2001 compared to 2000 while heating degree days decreased 12% in 2001 compared to 2000.

Other Effects. Other items affecting revenue during 2001 include:

- . **Volume.** Exclusive of weather impacts, lower delivery volume affected our revenue by \$21 million compared to the same 2000 period. Total kWh sales to retail customers decreased 1% compared to 2000, primarily as a result of less favorable economic conditions in 2001 offset by customer growth. Large commercial and industrial sales decreased 2% and residential sales decreased 1%. These were partially offset by an increase in small commercial and industrial sales of 2%.
- . **Other.** The payment of \$29 million to Exelon Generation related to nuclear decommissioning cost recovery under an agreement effective September 2001 partially offset by an \$11 million settlement of competitive transition charges by a large customer.

Our gas sales statistics are as follows:

	2001	2000	Variance
	-----	-----	-----
Deliveries in million cubic feet (mmcf)	81,528	91,686	(10,158)
Revenue (in millions).....	\$ 654	\$ 532	\$ 122

The changes in gas revenue for 2001, as compared to 2000, are as follows:

	Variance

	(in millions)
Price.....	\$174
Weather....	(38)
Volume.....	(14)

Gas Revenue	\$122
	====

Price. The favorable variance in price is attributable to an adjustment of the purchased gas cost recovery by the PUC effective in December 2000. The average price per million cubic feet for all customers for 2001 was 38% higher

Edgar Filing: PECO ENERGY CO - Form 424B3

than in 2000. Our gas rates are subject to periodic adjustments by the PUC designed to recover or refund the difference between actual cost of purchased gas and the amount included in base rates and to recover or refund increases or decreases in certain state taxes not recovered in base rates.

27

Weather. The unfavorable weather impact is attributable to warmer temperatures in our service territory during the non-summer months of 2001 than in 2000. Heating degree days decreased 12% in 2001 compared to 2000.

Volume. Exclusive of weather impacts, lower delivery volume affected revenue by \$14 million compared to 2000. Total mcf sales to retail customers decreased 11% compared to 2000, primarily as a result of slower economic conditions in 2001 offset by increased customer growth.

Fuel and Purchased Power Expense

Fuel and purchased power expense for 2001 increased \$468 million, or 35%, as compared to the same period in 2000, excluding the effects of the restructuring. The increase in fuel and purchased power expense was primarily attributable to \$293 million from customers in Pennsylvania selecting us or returning to us as their electric generation supplier, \$174 million from increased prices related to gas and higher PJM ancillary charges of \$31 million. These increases were partially offset by \$24 million as a result of unfavorable weather conditions and \$14 million attributable to lower delivery volume related to gas.

Operating and Maintenance Expense

O&M expense for 2001 increased \$95 million, or 19%, as compared to the same 2000 period, excluding the effects of the restructuring. The increase in O&M expense was primarily attributable to \$20 million related to an increased allocation of corporate expense, \$18 million related to additional employee severance costs in 2001, \$17 million as a result of higher administrative and general costs for functions previously performed at our corporate division, \$14 million related to the deployment of the automated meters during 2001, \$12 million of incremental costs related to two storms in 2001, \$9 million related to additional uncollectible accounts expense and \$5 million associated with the write-off of excess and obsolete inventory.

Merger-Related Costs

Merger-related costs charged to income in 2000 were \$248 million consisting of \$132 million of direct incremental costs and \$116 million for employee costs. Direct incremental costs represent expenses associated with completing the merger, including professional fees, regulatory approval and settlement costs, and settlement of compensation arrangements. Employee costs represent estimated severance payments and pension and postretirement benefits provided under Exelon's Merger Separation Plan ("MSP") for 642 of our eligible employees who are expected to be involuntarily terminated before December 2002 upon completion of integration activities for the merged companies. Merger-related costs attributable to the operations transferred to affiliates in the corporate restructuring were \$181 million. The remaining \$67 million is attributable to our energy delivery segment. See Note 2--Corporate Restructuring to Consolidated Financial Statements.

Depreciation and Amortization Expense

Depreciation and amortization expense for 2001 increased \$233 million, or

Edgar Filing: PECO ENERGY CO - Form 424B3

127%, compared to the same period in 2000, excluding the effects of the restructuring. The increase was primarily attributable to \$214 million of additional amortization of our CTC and an increase of \$19 million related to depreciation expense associated with additional plant in service. The additional amortization of the CTC is in accordance with our original settlement under the Pennsylvania Competition Act.

Taxes Other Than Income

Taxes other than income for 2001 decreased \$5 million, or 3%, as compared to the same 2000 period, excluding the effects of the restructuring. The decrease was primarily attributable to the elimination of the gross receipts tax on gas sales effective July 1, 2000.

28

Interest Charges

Interest charges consist of interest expense and distributions on Company-Obligated Mandatorily Redeemable Preferred Securities of a Partnership ("COMRPS"). Interest charges increased \$6 million, or 1% in 2001. The increase was primarily attributable to additional interest on the transition bonds issued to securitize our stranded cost recovery of \$16 million and interest expense related to a loan from an affiliate in 2001 of \$8 million, partially offset by the reduction of our long-term debt with the proceeds from transition bonds, which reduced interest charges by \$18 million.

Equity In Earnings (Losses) Of Unconsolidated Affiliates

As part of the corporate restructuring, our unconsolidated affiliates were transferred to Exelon Generation and Exelon Enterprises.

Other Income and Deductions

Other income and deductions excluding interest charges and equity in earnings (losses) of unconsolidated affiliates increased \$24 million, or 109% in 2001 as compared to 2000, excluding the effects of the restructuring. The increase in other income and deductions was primarily attributable to intercompany interest income of \$10 million in the third quarter of 2001, a gain on the settlement of an interest rate swap of \$6 million and the favorable settlement of a customer contract of \$3 million.

Income Taxes

Our effective tax rate was 31.7% in 2001 as compared to 35.7% in 2000. The decrease in our effective tax rate was primarily attributable to tax benefits associated with the implementation of state tax planning strategies, a favorable adjustment to prior period income taxes in connection with the completion of the 2000 tax return and the reduced impact of investment tax credit amortization.

Extraordinary Items

In 2000, we incurred extraordinary charges aggregating \$6 million (\$4 million, net of tax) related to prepayment premiums and the write-off of unamortized deferred financing costs associated with the early retirement of debt with a portion of the proceeds from the securitization of our stranded cost recovery in May 2000.

Cumulative Effect of a Change in Accounting Principle

Edgar Filing: PECO ENERGY CO - Form 424B3

In 2000, we recorded a benefit of \$40 million (\$24 million, net of tax) representing the cumulative effect of a change in accounting method for nuclear outage costs in conjunction with the synchronization of accounting policies in connection with the merger.

Preferred Stock Dividends

Preferred stock dividends for 2001 were consistent as compared to 2000.

	-----	-----	-----	-----
	\$5,950	\$5,478	\$ 472	8.6%
	=====	=====	=====	=====

Energy Delivery. The increase in operating revenue from energy delivery was attributable to higher electric revenue of \$32 million and additional gas revenue of \$76 million. The increase in electric revenue reflects \$102 million from customers in Pennsylvania selecting us as their electric generation supplier and rate

30

adjustments in Pennsylvania, partially offset by a decrease of \$69 million as a result of lower summer volume. Regulated gas revenue reflected increases of \$44 million related to higher prices, \$29 million attributable to increased volume from new and existing customers and \$24 million from increased winter volume. These increases were partially offset by \$21 million of lower gross receipts tax collections as a result of the repeal of the gross receipts tax on gas sales in connection with gas restructuring in Pennsylvania.

Generation. The decrease in operating revenue from generation was a result of lower electric revenue of \$180 million partially offset by higher gas revenue of \$14 million. The decrease in electric revenue was principally attributable to lower sales of competitive retail electric generation services of \$132 million, of which \$196 million represented decreased volume that was partially offset by \$64 million from higher prices. In addition, the termination of the management agreement for Clinton Power Station ("Clinton") resulted in lower revenues of \$99 million. As a result of the acquisition by AmerGen Energy Company, LLC ("AmerGen") of Clinton in December 1999, the management agreement was terminated and, accordingly, the operations have been included in Equity in Earnings (Losses) of Unconsolidated Affiliates on our Consolidated Statements of Income in 2000. These decreases were partially offset by an increase of \$50 million from higher wholesale revenue attributable to \$199 million associated with higher prices partially offset by \$149 million related to lower volume. Unregulated gas revenue increased primarily as a result of \$11 million from wholesale sales of excess natural gas.

Enterprises. The increase in operating revenue from enterprises was attributable to \$530 million from the acquisition of thirteen infrastructure services companies during 2000 and 1999.

Fuel and Purchased Power Expense

Edgar Filing: PECO ENERGY CO - Form 424B3

	2000	1999	\$ Variance	Variance
	-----	-----	-----	-----
	(in millions, except percentage data)			
Energy Delivery	\$ 462	\$ 370	\$ 92	24.9%

	=====	=====	=====	=====

31

Energy Delivery. The increase in O&M expense from energy delivery was primarily attributable to the direct charging to the business segments of O&M expenses that were previously reported to our corporate division.

Generation. The decrease in O&M expense from generation was primarily attributable to O&M expenses related to the management agreement for Clinton of \$70 million in 1999 which has since been terminated, \$15 million related to the abandonment of two information system implementations in 1999, \$17 million related to lower administrative and general expenses related to the unregulated retail sales of electricity and \$15 million related to lower joint-owner expenses.

Enterprises. The O&M expense from enterprises increased \$505 million from the infrastructure services business as a result of acquisitions.

Edgar Filing: PECO ENERGY CO - Form 424B3

Corporate. Our corporate decrease in O&M expense was primarily attributable to expenses of \$56 million related to lower Year 2000 remediation expenditures, lower pension and postretirement benefits expense of \$31 million and the direct charging to business segments of O&M expenses that were previously recorded at corporate.

Merger-Related Costs

Merger-related costs charged to income in 2000 were \$248 million consisting of \$132 million of direct incremental costs and \$116 million for employee costs. Direct incremental costs represent expenses associated with completing the merger, including professional fees, regulatory approval and settlement costs, and settlement of compensation arrangements. Employee costs represent estimated severance payments and pension and postretirement benefits provided under Exelon's MSP for our 642 eligible employees who are expected to be involuntarily terminated before December 2002 upon completion of integration activities for the merged companies.

Depreciation and Amortization Expense

Depreciation and amortization expense increased \$88 million, or 37%, to \$325 million in 2000. The increase was primarily attributable to \$57 million of amortization of our CTC which commenced in 2000 and \$29 million related to depreciation and amortization expense associated with the infrastructure services business acquisitions.

Taxes Other Than Income

Taxes other than income decreased \$25 million, or 10%, to \$237 million in 2000. The decrease was primarily attributable to lower real estate taxes of \$18 million relating to a change in tax laws for utility property in Pennsylvania and \$11 million as a result of the elimination of the gross receipts tax on natural gas sales net of an increase in gross receipts tax on electric sales. This decrease was partially offset by a nonrecurring \$22 million capital stock tax credit related to a 1999 adjustment associated with the impact of our 1997 restructuring charge.

Interest Charges

Interest charges consist of interest expense and distributions on COMRPS. Interest charges increased \$48 million, or 12%, to \$465 million in 2000. The increase was primarily attributable to interest on the transition bonds issued to securitize our stranded cost recovery of \$104 million, partially offset by the reduction of our long-term debt with the proceeds from transition bonds, which reduced interest charges by \$77 million.

Equity in Earnings (Losses) of Unconsolidated Affiliates

Equity in earnings (losses) of unconsolidated affiliates decreased \$3 million, or 8%, to losses of \$41 million in 2000 as compared to losses of \$38 million in 1999. The decrease was primarily attributable to \$8 million of

additional losses from communications joint ventures, partially offset by \$4 million of earnings from AmerGen as a result of the acquisitions of Clinton and Unit No. 1 at Three Mile Island Nuclear Station ("TMI") in December 1999 and Oyster Creek Nuclear Generation Facility ("Oyster Creek") in September 2000.

Other Income and Deductions

Edgar Filing: PECO ENERGY CO - Form 424B3

Other income and deductions excluding interest charges and equity in earnings (losses) of unconsolidated affiliates decreased \$18 million, or 31%, to \$41 million in 2000 as compared to \$59 million in 1999. The decrease in other income and deductions was primarily attributable to the writedown of a communications investment of \$33 million, a \$10 million gain on the disposal of assets in 1999 and a decrease in interest income of \$2 million. These decreases were partially offset by a \$15 million write-off in 1999 of the investment in a cogeneration facility in connection with the settlement of litigation and gains on sales of investments of \$13 million.

Income Taxes

The effective tax rate was 35.7% in 2000 as compared to 36.6% in 1999.

Extraordinary Items

In 2000, we incurred extraordinary charges aggregating \$6 million (\$4 million, net of tax) related to prepayment premiums and the write-off of unamortized deferred financing costs associated with the early retirement of debt with a portion of the proceeds from the securitization of our stranded cost recovery in May 2000.

In 1999, we incurred extraordinary charges aggregating \$62 million (\$37 million, net of tax) related to prepayment premiums and the write-off of unamortized debt costs associated with the repayment and refinancing of debt.

Cumulative Effect of a Change in Accounting Principle

In 2000, we recorded a benefit of \$40 million (\$24 million, net of tax) representing the cumulative effect of a change in accounting method for nuclear outage costs in conjunction with the synchronization of accounting policies in connection with the merger.

Preferred Stock Dividends

Preferred stock dividends decreased \$2 million, or 17%, to \$10 million as compared to 1999. The decrease was attributable to the redemption of \$37 million of Mandatorily Redeemable Preferred Stock in August 1999 with a portion of the proceeds from the issuance of transition bonds. In addition, we redeemed \$19 million of Mandatorily Redeemable Preferred Stock in August 2000.

Liquidity and Capital Resources

Our capital resources are primarily provided by internally generated cash flows from operations and, to the extent necessary, external financing including the issuance of commercial paper. Our access to external financing at reasonable terms is dependent on our credit ratings and our general business condition and the utility industry. Our business is capital intensive. Capital resources are used primarily to fund our capital requirements, including construction, repayments of maturing debt and preferred securities and payment of common stock dividends to Exelon.

Cash Flows from Operating Activities

Cash flows provided by operations for 2001 were \$828 million. Our cash flow from operating activities primarily results from sales of electricity and gas to a stable and diverse base of retail customers at fixed prices. Our future cash flows will depend upon the ability to achieve cost savings in operations, and the impact of the economy, weather and customer choice on our revenues. Although the amounts may vary from period to period as a result of the uncertainties inherent in our business, we expect that we will continue to

Edgar Filing: PECO ENERGY CO - Form 424B3

provide a reliable and steady source of internal cash flow from operations for the foreseeable future.

33

Cash Flows from Investing Activities

Cash flows used in investing activities for 2001 were \$235 million, primarily for capital expenditures of \$264 million. Our projected capital expenditures for 2002 are \$279 million.

Approximately one half of the budgeted 2002 expenditures are for capital additions to support customer and load growth and the remainder for additions to or upgrades of existing facilities. We anticipate that we will obtain financing, when necessary, through borrowings, the issuance of preferred securities, or capital contributions from Exelon. Our proposed capital expenditures and other investments are subject to periodic review and revision to reflect changes in economic conditions and other factors.

Cash Flows from Financing Activities

Cash flows used in financing activities were \$579 million in 2001 primarily attributable to debt service and payments of dividends to Exelon. Debt financing activities during 2001 included the refinancing of \$805 million in transition bonds. In 2001, we paid Exelon \$342 million in common stock dividends and currently expect that the 2002 dividend will be comparable to 2001.

Credit Issues

We meet our short-term liquidity requirements primarily through the issuance of commercial paper, borrowings under bank credit facilities and borrowings from the Exelon intercompany money pool. We, along with Exelon, ComEd and Generation, are parties to a \$1.5 billion unsecured revolving credit facility with a group of banks. We use this credit facility principally to support our commercial paper program. We have a \$300 million sublimit under this credit facility.

At December 31, 2001, we had outstanding \$101 million of notes payable consisting principally of commercial paper. For 2001, the average interest rate on notes payable was approximately 2.25%. Certain of the credit agreements to which we are a party requires us to maintain a debt to total capitalization ratio of 65% or less, excluding securitization debt and excluding the receivable from parent recorded in our shareholders' equity. At December 31, 2001, the debt to total capitalization ratios on that basis was 38%.

Our access to the capital markets, including the commercial paper market, and our financing costs in those markets are dependent on our securities ratings. None of our borrowings are subject to default or prepayment as a result of a downgrading of securities ratings, although such a downgrading could increase interest charges under our bank credit facility. From time to time, we enter into interest rate swap and other derivatives that require the maintenance of investment grade ratings. Failure to maintain investment grade ratings would allow the counterparty to terminate the derivative and settle the transaction on a net present value basis.

Under PUHCA and the Federal Power Act, we can pay dividends only from retained or current earnings. At December 31, 2001, we had retained earnings of \$270 million.

Edgar Filing: PECO ENERGY CO - Form 424B3

Contractual Obligations and Commercial Commitments

Our contractual obligations as of December 31, 2001 representing cash obligations that are considered to be firm commitments are as follows:

	Total	Payment due within			Due after
		1 Year	2-3 Years	4-5 Years	5 Years
(in millions)					
Long-Term Debt.....	\$5,992	\$548	\$1,008	\$1,003	\$3,433
Short-Term Debt.....	101	101	--	--	--
COMRPS and Preferred Stock with Mandatory Redemption Requirements.....	147	19	--	--	128
Operating Leases.....	13	2	4	4	3
Total Contractual Obligations.....	\$6,253	\$670	\$1,012	\$1,007	\$3,564
	=====	=====	=====	=====	=====

34

See NOTES to Consolidated Financial Statements for additional information about:

- . long-term debt (see Note 11);
- . short-term debt (see Note 10);
- . operating leases (see Note 18); and
- . COMRPS and Preferred Stock with Mandatory Redemption Requirements (see Notes 15 and 14, respectively).

Our commercial commitments as of December 31, 2001 representing commitments triggered by future events, including obligations to make payment on behalf of other parties as well as financing arrangements to secure our obligations, are as follows:

	Total	Expiration within			Expiration after
		1 Year	2-3 Years	4-5 Years	5 Years
(in millions)					
Available Lines of Credit (a).....	\$300	\$300	\$ --	\$--	\$ --
Letters of Credit (non-debt) (b).....	11	11	--	--	--
Letters of Credit (Long-Term Debt) (c)	17	--	17	--	--
Insured Long-Term Debt (d).....	154	--	154	--	--
Guarantees (e).....	100	--	--	--	100
Total Commercial Commitments.....	\$582	\$311	\$171	\$--	\$100
	=====	=====	=====	=====	=====

- (a) Lines of Credit--We, along with Exelon, ComEd and Exelon Generation, maintain a \$1.5 billion 364-day credit facility to support commercial paper issuances. We have a \$300 million sublimit under the credit facility. At December 31, 2001, there are no borrowings against the credit facility.
- (b) Letters of Credit (non-debt)--We and certain of our subsidiaries maintain non-debt letters of credit to provide credit support for certain transactions as requested by third parties.
- (c) Letters of Credit (Long-Term Debt)--Direct-pay letters of credit issued in connection with variable-rate debt in order to provide liquidity in the event that it is not possible to remarket all of the debt as required following specific events, including changes in the basis of determining the interest rate on the debt.
- (d) Insured Long-Term Debt--Borrowings that have been credit-enhanced through the purchase of insurance coverage equal to the amount of principal outstanding plus interest.
- (e) Guarantees--Provide support for lines of credit, performance contracts, surety bonds and leases as required by third parties.

Off Balance Sheet Obligations

We are party to an agreement with a financial institution under which we can sell or finance with limited recourse an undivided interest, adjusted daily, in up to \$225 million of designated accounts receivable until November 2005. At December 31, 2001, we had sold a \$225 million interest in accounts receivable, consisting of a \$170 million interest in accounts receivable which we accounted for as a sale under SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities--a Replacement of FASB Statement No. 125," and a \$55 million interest in special-agreement accounts receivable which was accounted for as a long-term note payable. We retain the servicing responsibility for these receivables. The agreement requires us to maintain the \$225 million interest, which, if not met, requires us to deposit cash in order to satisfy such requirements. At December 31, 2001 and 2000, we met this requirement and were not required to make any cash deposits.

Other Factors

We participate in defined benefit pension plans and postretirement welfare sponsored by Exelon. Essentially all of our employees are eligible to participate in these plans. In 2001, our former plans were consolidated into

35

the Exelon plans. Essentially all of our employees, hired on or after January 1, 2001 are eligible to participate in newly established Exelon cash balance pension plans. Employees who were active participants in our former pension plans on December 31, 2000 and remain employed by us on January 1, 2002, will have the opportunity to continue to participate in the pension plan or to transfer to the cash balance plan. Participants in the cash balance plan, unlike participants in the other defined benefit plans, may request a lump-sum cash payment upon employee termination which may result in increased cash requirements from pension plan assets. We may be required to increase future funding to the pension plan as a result of these increased cash requirements.

Due to the performance of the U.S. debt and equity markets in 2001, the value of assets held in trusts to satisfy the obligations of pension and postretirement benefit plans has decreased. Also, as a result of the merger and corporate restructuring, there was a larger than average number of employees taking advantage of retirement benefits in 2001. These factors may also result in additional future funding requirements of the pension and postretirement

Edgar Filing: PECO ENERGY CO - Form 424B3

benefit plans.

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles requires that management apply accounting policies and make estimates and assumptions that affect results of operations and the reported amounts of assets and liabilities in the financial statements. The following areas represent those that management believes are particularly important to the financial statements and that require the use of estimates and assumptions to describe matters that are inherently uncertain.

Regulatory Assets and Liabilities

Regulatory assets represent incurred costs that have been deferred because they are probable of future recovery in customer rates. Regulatory liabilities represent previous collections from customers to fund costs which have not yet been incurred.

We are currently subject to a rate cap that limits the opportunity to recover increased costs and the costs of new investment in facilities through rates during the rate cap period. Current rates include the recovery of our existing regulatory assets. We continually assess whether the regulatory assets are probable of future recovery by considering factors such as applicable regulatory environment changes, recent rate orders to other regulated entities in the same jurisdiction, and the status of any pending or potential deregulation legislation. If future recovery of costs ceases to be probable the assets would be required to be recognized in current period earnings.

Unbilled Energy Revenues

Revenues related to the sale of energy are generally recorded when service is rendered or energy is delivered to customers. However, the determination of the energy sales to individual customers is based on the reading of their meters which are read on a systematic basis throughout the month. At the end of each month, amounts of energy delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is estimated. This unbilled revenue is estimated each month based on daily generation volumes, estimated customer usage by class, line losses and applicable customer rates based on regression analyses reflecting significant historical trends and experience. Customer accounts receivable as of December 31, 2001 include unbilled energy revenues of \$100 million on a base of annual revenues of \$4.0 billion.

Accounting for Derivative Instruments

We use derivatives to manage our exposure to fluctuation in interest rates related to outstanding variable rate debt instruments and planned future debt issuances as well as exposure to changes in the fair value of outstanding debt that is planned for early retirement. Derivative financial instruments are accounted for under

SFAS No. 133. Hedge accounting has been used for all interest rate derivatives to date based on the probability of the transaction and the expected highly effective nature of the hedging relationship between the interest rate swap contract and the interest payment or changes in fair value of the hedged debt. Dealer quotes are available for all of our interest rate swap agreement derivatives. Accounting for derivatives continues to evolve through guidance

Edgar Filing: PECO ENERGY CO - Form 424B3

issued by the DIG of the FASB. To the extent that changes by the DIG modify current guidance, including the normal purchases and normal sales determination, the accounting treatment for derivatives may change.

Environmental Costs

As of December 31, 2001 we had accrued liabilities of \$37 million for environmental investigation and remediation costs. The liabilities are based upon estimates with respect to the number of sites for which we will be responsible, the scope and cost of work to be performed at each site, the portion of costs that will be shared with other parties and the timing of the remediation work. Where timing and amounts of expenditures can be reliably estimated, amounts are discounted. Where timing and amounts cannot be reliably estimated, a range is estimated and the low end of the range is recognized on an undiscounted basis. Estimates can be affected by factors including future changes in technology, changes in regulations or requirements of local governmental authorities and actual costs of disposal.

Outlook

General

Our primary goals are to deliver reliable service, to improve customer service and to sustain productive regulatory relationships. Achieving these goals is expected to maximize the value of our transmission and distribution assets and provide a significant and steady source of earnings.

Under restructuring regulations adopted at the federal and state levels, the role of electric utilities in the supply and delivery of energy is changing. We continue to be obligated to provide reliable delivery systems under cost-based rates. We remain obligated, as a provider-of-last-resort, to supply generation service during the transition period to a competitive supply marketplace to customers who do not or cannot choose an alternate supplier. Retail competition for generation services has resulted in reduced revenues from regulated rates and the sale of increasing amounts of energy at market-based rates.

Our revenues will be affected by rate reductions and rate caps currently in effect. The rate caps limit our ability to recover increased expenses and the costs of investments in new transmission and distribution facilities through rates. As a result, our future results of operations will be dependent on our ability:

- . to deliver electricity and gas to our customers cost-effectively;
- . to realize cost savings and synergies from the merger to offset increased costs on new investments and inflation while our delivery rates are capped; and
- . to manage our provider-of-last-resort responsibilities.

Our results will be affected by annual increases in the amortization of our stranded cost recovery through 2010. We have been authorized by the PUC to recover stranded costs of \$5.3 billion (\$4.9 billion of unamortized costs at December 31, 2001) over a twelve-year period ending December 31, 2010 with a return on the unamortized balance of 10.75%. In 2001, revenue attributable to stranded cost recovery was \$797 million and is scheduled to increase to \$932 million by 2010, the final year of stranded cost recovery. Amortization of our stranded cost recovery, which is a regulatory asset, is included in depreciation and amortization. The amortization expense for 2001 was \$271 million and will increase to \$879 million by 2010.

All of our customers have the choice of purchasing energy from other

Edgar Filing: PECO ENERGY CO - Form 424B3

electricity suppliers. At June 30, 2002, approximately 23% of our residential load, 7% of our small commercial and industrial load and 6% of our large commercial and industrial load were purchasing generation service from alternative suppliers.

37

We have entered into a long-term agreement with our affiliate Exelon Generation to procure our power needs and achieve some certainty during the next several years with respect to these obligations. Because our agreement with Exelon Generation allows us to obtain sufficient power at the rates we are allowed to charge to serve customers who do not choose alternate generation suppliers, revenues and expenses may vary with customer choice, but income will not be significantly impacted.

Transmission. We provide wholesale transmission service under rates established by FERC. FERC has used its regulation of transmission to encourage competition for wholesale generation services and the development of regional structures to facilitate regional wholesale markets. In December 1999, FERC issued Order 2000 requiring jurisdictional utilities to file a proposal to form a regional transmission operation ("RTO") or, alternatively, to describe efforts to participate in or work toward participating in an RTO or explain why they were not participating in an RTO. Order 2000 is generally designed to separate the governance and operation of the transmission system from generation companies and other market participants.

We provide regional transmission service pursuant to a regional open-access transmission tariff we and the other transmission owners who are members of Pennsylvania-New Jersey-Maryland Interconnection, LLP ("PJM") file. PJM is a power pool that integrates, through central dispatch, the generation and transmission operations of its member companies across a 50,000 square mile territory. Under the PJM tariff, transmission service is provided on a region-wide, open-access basis using the transmission facilities of the PJM members at rates based on the costs of transmission service. PJM's Office of Interconnection is the ISO for PJM ("PJM ISO") and is responsible for operation of the PJM control area and administration of the PJM open-access transmission tariff. We and the other transmission owners in PJM have turned over control of their transmission facilities to the PJM ISO. The PJM ISO and the transmission owners who are members of PJM, including us, have filed with FERC for approval of PJM as an RTO. FERC has conditionally approved the PJM RTO.

Other Factors

Inflation affects us through increased operating costs and increased capital costs for electric plant. As a result of the rate caps imposed under the legislation in Pennsylvania and price pressures due to competition, we may not be able to pass the costs of inflation through to customers.

We participate in defined benefit pension plans and postretirement welfare sponsored by Exelon. Essentially all of our employees are eligible to participate in these plans. In 2001, our former plans were consolidated into the Exelon plans. Our costs of providing pension and postretirement benefits to our retirees is dependent upon a number of factors, such as the discount rate, rates of return on plan assets, and the assumed rate of increase in health care costs. Although our pension and postretirement expense is determined using three-year averaging and is not as vulnerable to a single year's change in rates, these costs are expected to increase in 2002 and beyond as the result of the above noted plan changes along with the affects of the decline in market value of plan assets, changes in appropriate assumed rates of return on plan assets and discount rates, and increases in health care costs. For a discussion

Edgar Filing: PECO ENERGY CO - Form 424B3

of our pension and postretirement benefit plans, see Note 13--Retirement Benefits of the Notes to Consolidated Financial Statements.

Environmental. Our operations have in the past and may in the future require substantial capital expenditures in order to comply with environmental laws. Additionally, under federal and state environmental laws, we are generally liable for the costs of remediating environmental contamination of property now or formerly owned by us and of property contaminated by hazardous substances we have generated. We own or lease a number of real estate parcels, including parcels on which our operations or the operations of others may have resulted in contamination by substances that are considered hazardous under environmental laws. We have identified 28 sites where former MGP activities have or may have resulted in actual site contamination. We are currently involved in a number of proceedings relating to sites where hazardous substances have been deposited and may be subject to additional proceedings in the future.

38

As of December 31, 2001 and 2000, we had accrued \$37 million and \$54 million, respectively, for environmental investigation and remediation costs, including \$27 million and \$30 million, respectively, for MGP investigation and remediation that currently can be reasonably estimated. In conjunction with the corporate restructuring in January 2001, a portion of the environmental investigation and remediation costs were transferred to Exelon Generation. We expect to expend \$2 million for environmental remediation activities in 2002. We cannot predict whether we will incur other significant liabilities for any additional investigation and remediation costs at these or additional sites we identify, environmental agencies or others, or whether such costs will be recoverable from third parties.

Security Issues and Other Impacts of Terrorist Actions. The events of September 11, 2001 have affected our operating procedures and costs and are expected to affect the cost and availability of the insurance coverages that we carry. We have initiated security measures to safeguard our employees and critical operations and are actively participating in industry initiatives to identify methods to maintain the reliability of our delivery systems. It is expected that governmental authorities will be working to ensure that emergency plans are in place and that critical infrastructure vulnerabilities are addressed. The electric utility industry is proposing security guidelines rather than government mandated standards to protect critical infrastructures. It is not known if federal standards will be issued to the electric or gas industries. We are evaluating enhanced security measures at certain critical locations, enhanced response and recovery plans and assessing longer term design changes and redundancy measures. These measures will involve additional expense to develop and implement.

We carry property damage and liability insurance for our properties and operations. As a result of significant changes in the insurance marketplace, due in part to the September 11, 2001 terrorist acts, the available coverage and limits may be less than the amount of insurance obtained in the past, and the recovery for losses due to terrorists acts may be limited.

We are self-insured to the extent that any losses may exceed the amount of insurance maintained. Damage to our properties could disrupt the transmission or distribution electricity and significantly and adversely affect results of operations. We cannot predict the effects on operations of the availability of property damage and liability coverage or any disruptions to our delivery facilities.

Edgar Filing: PECO ENERGY CO - Form 424B3

New Accounting Pronouncements

In 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 141, SFAS No. 142, SFAS No. 143 and SFAS No. 144.

SFAS No. 141 requires that all business combinations be accounted for under the purchase method of accounting and establishes criteria for the separate recognition of intangible assets acquired in business combinations. SFAS No. 141 is effective for business combinations initiated after June 30, 2001.

SFAS No. 142 establishes new accounting and reporting standards for goodwill and intangible assets. SFAS No. 142 is effective as of January 1, 2002. Under SFAS No. 142, effective January 1, 2002, goodwill recorded is no longer subject to amortization. After January 1, 2002, goodwill will be subject to an assessment for impairment using a two-step fair value based test, the first step of which must be performed at least annually, or more frequently if events or circumstances indicate that goodwill might be impaired. The first step compares the fair value of a reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, the second step is performed. The second step compares the carrying amount of the goodwill to the fair value of the goodwill. If the fair value of goodwill is less than the carrying amount, an impairment loss would be reported as a reduction to goodwill and a charge to operating expense, except at the transition date, when the loss would be reflected as an accumulative effect of a change in accounting principle. As of December 31, 2001, we did not have any goodwill reflected on our Consolidated Balance Sheets and we do not expect the effect of adopting SFAS No. 142 to materially affect the results of operations. As a result of the corporate restructuring in January 2001, all of our goodwill was transferred to Exelon Enterprises.

39

SFAS No. 143 provides accounting requirements for retirement obligations associated with tangible long-lived assets. We expect to adopt SFAS No. 143 on January 1, 2003. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which there is a legal obligation to settle under existing or enacted law, statute, written or oral contract or by legal construction under the doctrine of promissory estoppel. We are currently in the process of evaluating the impact of SFAS No. 143 on our financial statements.

SFAS No. 144 establishes accounting and reporting standards for both the impairment and disposal of long-lived assets. This statement is effective for fiscal years beginning after December 15, 2001 and provisions of this statement are generally applied prospectively. We are in the process of evaluating the impact of SFAS No. 144 on our financial statements, and do not expect the impact to be material.

Quantitative And Qualitative Disclosures About Market Risk

Commodity Price Risk

We are exposed to market risks associated with credit and interest rates. The inherent risk in market sensitive instruments and positions is the potential loss arising from adverse changes in counterparty credit and interest rates. Exelon's corporate risk management committee sets forth risk management philosophy and objectives through a corporate policy, and establishes procedures for risk assessment, control and valuation, counterparty credit approval, and the monitoring and reporting of derivative activity and risk

Edgar Filing: PECO ENERGY CO - Form 424B3

exposures. As a result of the power purchase agreement with Exelon Generation, we do not believe we are subject to material commodity price risk.

Credit Risk

We are obligated to provide service to all electric customers within our franchised territory. As a result, we have a broad customer base. For the year ended December 31, 2001, our ten largest customers represented approximately 10% of our retail electric revenues. Our credit risk is managed by our credit and collection policies, which is consistent with state regulatory requirements.

Under the Competition Act, licensed entities, including alternate electric generating suppliers, may act as agents to provide a single bill and provide associated billing and collection services to retail customers located in our retail electric service territory. Currently, there are no third parties billing our charges to customers or providing advanced metering. However, if others enter this business, we would be subject to credit risk related to the ability of the third parties to collect such receivables from the customers.

Interest Rate Risk

We use a combination of fixed rate and variable rate debt to reduce interest rate exposure. Interest rate swaps may be used to adjust exposure when deemed appropriate based upon market conditions. We also use forward-starting interest rate swaps and treasury rate locks to lock in interest rate levels in anticipation of future financing. These strategies are employed to maintain the lowest cost of capital. As of December 31, 2001, a hypothetical 10% increase in the interest rates associated with variable rate debt would not have a material impact on pre-tax earnings for 2002.

We have entered into interest rate swaps to manage interest rate exposure associated with the floating rate series of transition bonds issued by our subsidiary, PECO Energy Transition Trust ("PETT") to securitize our stranded cost recovery. At June 30, 2002, these interest rate swaps had a fair market value exposure of \$21 million based on the present value difference between the contract and market rates at June 30, 2002.

40

The aggregate fair value exposure of the transition bond derivative instruments that would have resulted from a hypothetical 50 basis point decrease in the spot yield at June 30, 2002 is estimated to be \$23 million. If the derivative instruments had been terminated at June 30, 2002, this estimated fair value represents the amount we would have paid to the counterparties.

The aggregate fair value exposure of the transition bond derivative instruments that would have resulted from a hypothetical 50 basis point increase in the spot yield at June 30, 2002 is estimated to be \$18 million. If the derivative instruments had been terminated at June 30, 2002, this estimated fair value represents the amount we would have paid to the counterparties.

In 1999, we entered into interest rate swaps relating to the Class A-3 and Class A-5 Series 1999-A transition bonds issued by PETT in the aggregate notional amount of \$1.1 billion with an average interest rate of 6.65%. We also entered into forward-starting interest rate swaps relating to these two classes of floating rate transition bonds in the aggregate notional amount of \$1.1 billion with an average interest rate of 6.01%. In connection with the refinancing of a portion of the two floating rate series of transition bonds in the first quarter of 2001, we settled \$318 million of a forward-starting interest rate swap, resulting in a \$6 million gain which is reflected in other

Edgar Filing: PECO ENERGY CO - Form 424B3

income and deductions. Also, in connection with the refinancing, we settled a portion of the interest rate swaps and the remaining portion of the forward-starting interest rate swaps resulting in gains of \$25 million, which were deferred and are being amortized over the expected remaining lives of the related debt.

In February 2000, we entered into forward-starting interest rate swaps for a notional amount of \$1 billion in anticipation of the issuance of \$1 billion of transition bonds by PETT in the second quarter of 2000. In May 2000, we settled these forward-starting interest rate swaps and paid the counterparties \$13 million which was deferred and is being amortized over the life of the transition bonds as an increase in interest expense.

41

BUSINESS

Overview

Incorporated in Pennsylvania in October 1929, we are a wholly owned subsidiary of Exelon. We are engaged principally in the purchase, transmission, distribution and sale of electricity to residential, commercial, industrial and wholesale customers and in the purchase, distribution and sale of natural gas to residential, commercial and industrial customers. We have the franchise rights necessary to furnish electric and gas service in the various municipalities or territories in which we now supply these services. Our franchise rights, which are generally nonexclusive, consist of charter rights and certificates of public convenience issued by the PUC and/or "grandfather rights" and are generally time unlimited.

Our gas and electricity retail service territory covers 2,107 square miles in southeastern Pennsylvania.

- . We provide electric delivery service in an area of 1,972 square miles, with a population of approximately 3.6 million, including 1.6 million in the City of Philadelphia.
- . We supply natural gas service in a 1,475 square mile area in southeastern Pennsylvania counties adjacent to Philadelphia, with a population of 1.9 million.
- . We deliver electricity to approximately 1.6 million customers and natural gas to approximately 440,000 customers.

Our kilowatthour ("kWh") sales and load are generally higher, primarily during the summer periods and also during the winter periods, when temperature extremes create demand for either summer cooling or winter heating. Our highest peak load experienced to date occurred on August 14, 2002 and was 8164 MWs; and the highest peak load experienced to date during a winter season occurred on January 17, 2000 and was 6,135 MWs.

As a result of Exelon's restructuring to separate its regulated and competitive businesses, effective January 1, 2001, we transferred assets and liabilities unrelated to energy delivery to other subsidiaries of Exelon. We transferred the assets and liabilities related to nuclear, fossil and hydroelectric generation and wholesale power marketing; unregulated ventures, including communications, infrastructure services and unregulated gas and electric sales; and administrative, information technology and other support services.

Edgar Filing: PECO ENERGY CO - Form 424B3

Retail Electric Services

Electricity distribution and transmission is a regulated business. The Pennsylvania Public Utility Commission regulates electric distribution rates, retail gas rates, issuances of securities, and certain other aspects of our business. FERC regulates wholesale electric transmission and sets rates for our wholesale transmission service. Substantially all of our retail revenues are subject to regulation by the PUC. Generally, if our costs to serve customers exceed our regulated rates, we can petition the PUC and FERC for rate increases, but there is no assurance the request for a rate increase will be approved. In addition, in connection with the implementation of competition for generation services in Pennsylvania, our overall rates and rates for distribution services in Pennsylvania were subject to rate caps.

Electric utility restructuring legislation was adopted in Pennsylvania in December 1996 and electricity generation was deregulated. Through the PUC, Pennsylvania established a phased approach to competition, allowing an increasing number of customers to choose an alternative electric generation supplier, required rate reductions and imposed caps on rates during a transition period, and allowed the collection of competitive transition charges ("CTCs") from customers to recover costs that might not otherwise be recovered in a competitive market ("stranded costs").

Our distribution rates are capped through June 30, 2005 at the level in effect on December 31, 1996. Generation rates, consisting of the charge for stranded cost recovery and a shopping credit or capacity and energy charge, are capped through December 31, 2010. For 2002, the generation rate cap is \$0.0698 per kWh, increasing to \$0.0751 per kWh in 2006 and \$0.0801 per kWh in 2007. The rate caps are subject to limited exceptions, including significant increases in federal or state taxes or other significant changes in law or regulations that would not allow us to earn a fair rate of return.

Under the settlement agreement that we entered into relating to the PUC's approval of the merger between us and Unicom to form Exelon, we agreed to \$200 million in aggregate rate reductions for all customers over the period 2002 through 2005 and extended the rate cap on distribution rates through December 31, 2006.

42

We have been authorized to recover stranded costs of \$5.3 billion over a twelve-year period ending December 31, 2010 with a return on the unamortized balance of 10.75%. Our recovery of stranded costs is based on the level of transition charges established in the settlement of our restructuring case and the projected annual retail sales in our service territory. Recovery of transition charges for stranded costs and our allowed return on its recovery of stranded costs are included in operating revenue.

Under the Competition Act, all of our retail electric customers have the right to choose their generation suppliers. At June 30, 2002, approximately 23% of our residential load, 7% of our small commercial and industrial load and 6% of our large commercial and industrial load were purchasing generation service from alternative suppliers.

In order to have a reliable electricity delivery system during the transition to a competitive market for electricity generation, the PUC required utilities in Pennsylvania to provide generation services (power and energy) to those customers who do not or cannot choose an alternate generation provider or, who choose to come back to us after taking service from an alternate supplier (called the "provider-of-last-resort obligation"). Because the choice

Edgar Filing: PECO ENERGY CO - Form 424B3

is with the customer, it is hard for us to predict and plan for any level of customers and associated energy demand. We have entered into a power purchase agreement with our affiliate Exelon Generation to provide as much generation as we need at a fixed price through 2010. After that contract expires, if we still have provider-of-last-resort obligations, we could be faced with having to provide power and energy to an ever-increasing customer base, returning to us in order to receive the benefit of regulated rates. Without changes to the provider-of-last-resort obligations, we could be required to maintain sufficient reserves to service 100% of our traditional service territory load at the tariffed rate on the chance that all customers decide to come back. Significant over or under estimations of the market or the necessary reserves could have serious consequences for our business.

As part of a 1998 settlement agreement that we entered into with the PUC, we developed certain forward-looking financial information. The following table shows the estimated average levels of stranded cost recovery and the amortization of the remaining portion of our authorized stranded cost recovery (\$4.8 billion at June 30, 2002) for the years 2002 through 2010, based on estimated 0.8% annual sales growth assumed in the 1998 settlement. The following table shows the estimated average levels of competitive transition charges and/or intangible transition charges for the years 2002 through 2010, based on estimated 0.8% annual sales growth assumed in the restructuring settlement. The projected amounts included within the Annual Stranded Cost Amortization and Return disclosure in this section were not prepared with a view toward compliance with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of financial projections or generally accepted accounting principles. Additionally, PricewaterhouseCoopers LLP, as described in the "Experts" section, has neither examined nor compiled these projected amounts.

43

Annual Stranded Cost Amortization And Return

Year	Annual Sales (1)	Stranded Cost Recovery Charge (2)	Revenue Excluding Gross Receipts Tax		
			Total	Return @ 10.75%	Amortization
	MWh	\$/kWh	(\$000)	(\$000)	(\$000)
2002	34,381,485	0.0251	825,004	516,869	308,135
2003	34,656,537	0.0247	818,352	482,401	335,951
2004	34,933,789	0.0243	811,540	444,798	366,742
2005	35,213,260	0.0240	807,933	403,555	404,378
2006	35,494,966	0.0266	902,623	353,070	549,553
2007	35,778,925	0.0266	909,844	290,627	619,217
2008	36,065,157	0.0266	917,123	220,312	696,811
2009	36,353,678	0.0266	924,459	141,229	783,231
2010	36,644,507	0.0266	931,855	52,381	879,474

(1) Subject to reconciliation of actual sales and collections.

(2) Subject to periodic adjustments for over- or under- recovery.

Edgar Filing: PECO ENERGY CO - Form 424B3

The Competition Act provides for the imposition and collection of non-bypassable CTCs on customers' bills as a mechanism for utilities to recover their allowed stranded costs. CTCs are assessed to and collected from all retail customers who have been assigned stranded cost responsibility and who access the utilities' transmission and distribution systems. As a result, they will be assessed regardless of whether such customer purchases electricity from the utility or an alternate electric generation supplier. The Competition Act provides, however, that the utility's right to collect CTCs is contingent on the continued operation at reasonable availability levels of the assets for which the stranded costs were awarded, except where continued operation is no longer cost efficient because of the transition to a competitive market. In the 1998 settlement of its restructuring case, we agreed to negotiate with certain of our large customers for the payment of their stranded investment obligations in a single lump sum. On January 11, 2002, a complaint was brought by a municipal authority requesting that the PUC require us to adopt specific procedures for such negotiations, including setting a specific discount rate. The complaint alleges that we are using an inappropriate discount rate in our evaluations, thus making the lump-sum payment of CTC financially unattractive to customers. A procedural schedule for this matter has been set, and it will be litigated through the fourth quarter of 2002.

Under the Competition Act, licensed entities, including alternate electric generation suppliers, may act as agents to provide a single bill and provide associated billing and collection services to retail customers located in our retail electric service territory. In that event, the alternative supplier or other third party replaces the customer as the obligor of the customer's bill and we generally have no right to collect these receivables from the customer. We can only physically disconnect or reconnect a customer's distribution service. Third-party billing would change our customer profile (and risk of non-payment by customers) by replacing multiple customers with the entity providing third-party billing for those customers. PUC-licensed entities may also finance, install, own, maintain, calibrate and remotely read advanced meters for service to retail customers in our retail electric service territory. To date, no third parties are providing billing of our charges to customers or advanced metering.

As permitted by the Competition Act and the settlements, we securitized \$4 billion and \$1 billion of our stranded cost recovery in 1999 and 2000, respectively, by the issuance of transition bonds through a special purpose financing entity. As required by the Competition Act, the proceeds from the securitizations were applied to reduce our stranded costs, including related capitalization. In March 2001, approximately \$805 million of the first series of transition bonds were refinanced.

44

The 1998 settlement also included a number of provisions designed to encourage competition for generation services. Shopping credits for generation service were intended to provide an economic incentive for customers to choose an alternate supplier. Effective January 1, 2001, we also agreed to assign 20% of our non-shopping residential customers to competitive default service provided by one or more alternate suppliers. If, on January 1, 2003, 50% of our residential and commercial customers are not obtaining generation services from alternate generation suppliers, then non-shopping customers will be assigned to alternate generation suppliers to reach that level.

On November 29, 2000, the PUC approved a bilateral contract between us and New Power Company to move 22% of our non-shopping residential customers to New Power for competitive default service ("CDS"). Under this contract, New Power agreed to provide generation services through January 2004, at specified

Edgar Filing: PECO ENERGY CO - Form 424B3

discounted rates, to nearly 300,000 of our residential customers who were taking our generation service. On February 22, 2002, however, New Power sent us a notice of intent to withdraw from providing CDS to approximately 180,000 residential customers in May 2002. As a result of that withdrawal, approximately 180,000 CDS customers were returned to us in the second quarter of 2002. Pursuant to a tariff filing approved by the PUC, we will serve those returned customers at the discount energy rates on generation provided for under the original New Power CDS Agreement for the remaining term of that contract. Subsequently, in the second quarter of 2002, New Power also advised us that it planned to withdraw from serving all of its customers in Pennsylvania, including approximately 15,000 of our non-CDS customers, and to return those customers to us in September 2002.

In addition to the New Power contract, we also entered into a contract with Green Mountain Energy Company ("Green Mountain") to assign 50,000 of our non-shopping residential customers to Green Mountain for competitive default generation service, on the same terms and conditions as the New Power contract. On February 21, 2001, the PUC approved the Green Mountain contract. Beginning in May 2001, Green Mountain enrolled approximately 44,000 customers and as of June 30, 2002, approximately 16,000 customers, or 32%, have opted to return to us.

Transmission Services

We provide wholesale and unbundled retail transmission service under rates established by FERC and we provide regional transmission service pursuant to a regional open-access transmission tariff filed with FERC by us and the other transmission owners who are members of PJM. PJM is a power pool that integrates, through central dispatch, the generation and transmission operations of its member companies across a 50,000 square mile territory. Under the PJM tariff, transmission service is provided on a region-wide, open-access basis using the transmission facilities of the PJM members at rates based on the costs of transmission service. PJM's Office of Interconnection is the Independent System Operator ("ISO") for PJM ("PJM ISO") and is responsible for operation of the PJM control area and administration of the PJM open-access transmission tariff. We and the other transmission owners in PJM have turned over control of our respective transmission facilities to the PJM ISO. The PJM ISO and the transmission owners who are members of PJM, including us, have filed with FERC for approval of PJM as an RTO. FERC has conditionally approved the PJM RTO.

The Federal Power Act gives FERC exclusive rate-making jurisdiction over wholesale sales of electricity and the transmission of electricity in interstate commerce. Under the Federal Power Act, all public utilities subject to FERC's jurisdiction are required to file rate schedules with FERC for wholesale sales or transmission of electricity. Tariffs established under FERC regulation give generation companies access to transmission lines that enables them to participate in competitive wholesale markets.

In April 1996, FERC issued Order 888. The intent of Order 888 is to open the transmission grid subject to FERC's jurisdiction to all eligible customers, including sellers of power and retail customers, in states where retail access is approved. Order 888 requires that owners of transmission facilities provide access to their transmission facilities under filed tariffs at cost-based rates. In connection with Order 888, FERC issued Order 889. Under Order 889, we, along with all owners of transmission facilities, were required to file Standards of

Edgar Filing: PECO ENERGY CO - Form 424B3

Conduct, which governed the communication of non-public information between transmission personnel and employees of any affiliated wholesale merchant function. FERC recently issued a Notice of Proposed Rulemaking for the Standards of Conduct for Transmission Providers. Among other things, FERC is considering whether it would be appropriate for it to adopt measures that would limit the amount of capacity an affiliate can hold in a transmission provider.

In December 1999, FERC issued Order 2000, which encourages the voluntary restructuring of transmission operations through the use of ISOs and RTOs. A result of establishing these entities is to eliminate or reduce transmission charges imposed by successive transmission systems when wholesale generators cross several transmission systems to deliver capacity or energy. During 2000, FERC announced its intention to foster RTO development. Each transmission-owning public utility was required to file a plan to form an RTO, with December 2001 as the target date for operation. In July 2001, FERC conditionally granted RTO status to PJM and, in separate orders, directed that the various proposed RTOs combine into four regional RTOs. However, inconsistencies in the pace of RTO development and significant state public utility commission concerns caused FERC to indefinitely extend its operational target date of December 2001.

The latter half of 2001 and early 2002 have brought further change to the electric industry. In early November 2001, FERC announced its intent to complete RTO development using two parallel tracks: (1) addressing geographic scope and governance of RTOs; and (2) addressing transmission pricing and market design. Contemporaneously, FERC initiated several immediate steps to move the RTO development process forward. One of these actions was the initiation of an effort to standardize generator interconnection (a related effort concerning cost allocation is to be addressed in 2002). Also, FERC issued a Notice of Proposed Ruling on Revised Public Utility Filing Requirements, pursuant to which it is considering mandatory electronic filing of transactional data and additional public filing requirements.

Several other actions by FERC are important. First, FERC announced in late November 2001 a new market power test, the Supply Margin Assessment (the "SMA") screen. Under the SMA, if an energy company's generation capacity within a particular geographic market exceeds the market's surplus capacity above peak demand, then the energy company fails the test. Where this occurs, FERC will impose on the company and its affiliates a requirement to offer uncommitted capacity under a cost-based rate structure. The only exemption would be for companies operating under the authority of an ISO or RTO with a FERC-approved market monitoring and mitigation plan. Under this approach, it would be unlikely that a vertically integrated energy company serving franchised retail load would be able to pass the test and maintain market-based rates, unless and until the company was a member of an approved ISO or RTO.

Second, FERC continues to exhibit a commitment to increased market monitoring with an intent to ensure that high price volatility, such as was seen in California, does not occur again. As part of this commitment in early 2002, FERC announced the formation of the Office of Market Oversight and Investigation, which will report directly to the FERC Chairman. This new office will assess, among other things, market performance. It is unclear how our business may be impacted by these initiatives.

Gas

Historically, our gas sales and gas transportation revenues were derived pursuant to rates regulated by the PUC. The PUC established, through regulated proceedings, the base rates that we may charge for gas service in Pennsylvania. Our gas rates are subject to quarterly adjustments designed to recover or refund the difference between the actual cost of purchased gas and the amount included in base rates and to recover or refund increases or decreases in

Edgar Filing: PECO ENERGY CO - Form 424B3

certain state taxes not recovered in base rates.

Since 1984, large commercial and industrial customers have been able to choose their gas suppliers. Effective July 1, 2000, the Pennsylvania Natural Gas Choice and Competition Act expanded the choice of gas suppliers to residential and small commercial customers and eliminated the 5% gross receipts tax on gas

46

distribution companies' sales of gas. Approximately one-third of our current total yearly throughput is supplied by third parties. The act permits gas distribution companies to continue to make regulated sales of gas, at cost, to their customers. The act does not deregulate the transportation service provided by gas distribution companies, which remains subject to rate regulation. Gas distribution companies continue to provide billing, metering, installation, maintenance and emergency response services.

Our natural gas supply is provided by purchases from a number of suppliers for terms of up to five years. These purchases are delivered under several long-term firm transportation contracts. Our aggregate annual entitlement under these firm transportation contracts is 45 million dekatherms. Peak gas is provided by our liquefied natural gas facility and propane-air plant. We also have under contract 21.3 million dekatherms of underground storage through service agreements. Natural gas from underground storage represents approximately 34% of our 2001-2002 heating season planned supplies.

Construction Budget

The following table shows PECO's most recent estimate of capital expenditures for our plant additions and improvements in for 2002:

Transmission and Distribution	\$203 million
Gas.....	70 million
Other.....	11 million

Total.....	\$284 million

Approximately one-half of our 2002 budgeted capital expenditures are for additions to or upgrades of our existing facilities, including reliability improvements. The remainder of the capital expenditures support for new construction upgrades, customer and load growth.

Properties

Our electric substations and a portion of the transmission rights of way are owned in fee. A significant portion of the electric transmission and distribution facilities is located over or under highways, streets, other public places or property owned by others, for which permits, grants, easements or licenses, which we have deemed satisfactory, but without examination of underlying land titles, have been obtained.

Transmission and Distribution. Our higher voltage electric transmission and distribution lines owned and in service are as follows:

Edgar Filing: PECO ENERGY CO - Form 424B3

Voltage (Volts)	Circuit Miles
-----	-----
500,000....	891
220,000....	1,634
132,000....	15

Our electric distribution system includes 21,009 pole-line miles of overhead lines and 21,002 cable miles of underground lines.

Gas. The following table sets forth our gas pipeline miles at December 31, 2001:

	Pipeline Miles

Transmission..	31
Distribution..	6,199
Service piping	5,171

Total.....	11,401

47

We have a liquefied natural gas facility located in West Conshohocken, Pennsylvania that has a storage capacity of 1,200,000 million cubic feet (mcf) and a sendout capacity of 157,000 mcf/day and a propane-air plant located in Chester, Pennsylvania, with a tank storage capacity of 1,980,000 gallons and a peaking capability of 25,000 mcf/day. In addition, we own 28 natural gas city gate stations at various locations throughout our gas service territory.

Mortgage

Our principal properties are subject to the lien of our Mortgage dated May 1, 1923, as amended and supplemented, under which we have outstanding approximately \$1,139 million of first mortgage bonds as of June 30, 2002.

Our Subsidiaries with Publicly Held Securities

PECO Energy Transition Trust ("PETT"), a Delaware business trust wholly owned by us, was formed on June 23, 1998 pursuant to a trust agreement between us, as grantor, First Union Trust Company, National Association (now Wachovia Bank, National Association), as issuer trustee, and two beneficiary trustees that we appointed. PETT was created for the sole purpose of issuing transition bonds to securitize a portion of our authorized stranded cost recovery. On March 25, 1999, PETT issued \$4 billion of its Series 1999-A transition bonds. On May 2, 2000, PETT issued \$1 billion of its Series 2000-A transition bonds and on March 1, 2001, PETT issued \$805 million of its Series 2001-A transition bonds to refinance a portion of the Series 1999-A transition bonds. The transition bonds are solely obligations of PETT secured by intangible transition property, representing the right to collect transition charges sufficient to pay the principal and interest on the transition bonds, sold by us to PETT.

PECO Energy Capital Corp., our wholly owned subsidiary, is the sole general partner of PECO Energy Capital, L.P., a Delaware limited partnership (the

Edgar Filing: PECO ENERGY CO - Form 424B3

"Partnership"). The Partnership was created solely for the purpose of issuing preferred securities, representing limited partnership interests and lending to us the proceeds thereof and entering into similar financing arrangements. Our loans are evidenced by our subordinated debentures (the "Subordinated Debentures"), which are the only assets of the Partnership. The only revenues of the Partnership are interest on the Subordinated Debentures. All of the operating expenses of the Partnership are paid by PECO Energy Capital Corp. As of December 31, 2001, the Partnership held \$128 million aggregate principal amount of the Subordinated Debentures.

PECO Energy Capital Trust II ("Trust II") was created in June 1997 as a Delaware business trust solely for the purpose of issuing trust receipts ("Trust II Receipts") each representing an 8.00% Cumulative Monthly Income Preferred Security, Series C ("Series C Preferred Securities") of the Partnership. The Partnership is the sponsor of Trust II. As of December 31, 2001, Trust II had outstanding 2,000,000 Trust II Receipts. At December 31, 2001, the assets of Trust II consisted solely of 2,000,000 Series C Preferred Securities with an aggregate stated liquidation preference of \$50 million. Distributions were made on the Trust II Receipts during 2001 in the aggregate amount of \$4 million. Expenses of Trust II for 2001 were approximately \$10,000, all of which were paid by PECO Energy Capital Corp. The Trust II Receipts are issued in book-entry only form.

PECO Energy Capital Trust III ("Trust III") was created in April 1998 as a Delaware business trust solely for the purpose of issuing trust receipts ("Trust III Receipts") each representing an 7.38% Cumulative Preferred Security, Series D ("Series D Preferred Securities") of the Partnership. The Partnership is the sponsor of Trust III. As of December 31, 2001, Trust III had outstanding 78,105 Trust III Receipts. At December 31, 2001, the assets of Trust III consisted solely of 78,105 Series D Preferred Securities with an aggregate stated liquidation preference of \$78 million. Distributions were made on Trust III Receipts during 2001 in the aggregate amount of \$5.8 million. Expenses of Trust III for 2001 were approximately \$10,000, all of which were paid by PECO Energy Capital Corp. The Trust III Receipts are issued in book-entry only form.

48

Environmental Matters

General

Our operations are subject to environmental regulation by the U.S. and by the Commonwealth of Pennsylvania and its local jurisdictions. The U.S. Environmental Protection Agency ("EPA") administers certain federal statutes relating to such matters. The Pennsylvania Department of Environmental Protection ("PDEP") has jurisdiction over environmental control in the Commonwealth of Pennsylvania. State regulation includes the authority to regulate air, water and noise emissions and solid waste disposals.

Solid and Hazardous Waste

The Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended ("CERCLA"), provides for immediate response and removal actions coordinated by the EPA in the event of threatened releases of hazardous substances into the environment and authorizes the U.S. Government either to clean up sites at which hazardous substances have created actual or potential environmental hazards or to order persons responsible for the situation to do so. Under CERCLA, generators and transporters of hazardous substances, as well as past and present owners and operators of hazardous waste sites, are

Edgar Filing: PECO ENERGY CO - Form 424B3

strictly, jointly and severally liable for the cleanup costs of waste at sites, most of which are listed by the EPA on the National Priorities List ("NPL"). These potentially responsible parties ("PRPs") can be ordered to perform a cleanup, can be sued for costs associated with a EPA-directed cleanup, may voluntarily settle with the U.S. Government concerning their liability for cleanup costs, or may voluntarily begin a site investigation and site remediation under state oversight prior to listing on the NPL. Pennsylvania has enacted statutes that contain provisions substantially similar to CERCLA. In addition, the Resource Conservation and Recovery Act ("RCRA") governs treatment, storage and disposal of solid and hazardous wastes and cleanup of sites where such activities were conducted.

We have become and are likely to become parties to proceedings initiated by the EPA, state agencies and/or other responsible parties under CERCLA and RCRA with respect to a number of sites, including manufactured gas plant ("MGP") sites, or may undertake to investigate and remediate sites for which they may be subject to enforcement actions by an agency or third party.

By notice issued in December 1987, the EPA notified several entities, including us, that we may be PRPs under CERCLA with respect to wastes resulting from the treatment and disposal of transformers and miscellaneous electrical equipment at a site located in Philadelphia, Pennsylvania (the Metal Bank of America site). Several of the PRPs, including us, formed a steering committee to investigate the nature and extent of possible involvement in this matter. On May 29, 1991, a Consent Order was issued by the EPA pursuant to which the members of the steering committee agreed to perform the remedial investigation and feasibility study as described in the work plan issued with the Consent Order. Our share of the cost of study was approximately 30%. On July 19, 1995, the EPA issued a proposed plan for remediation of the site, which involves removal of contaminated soil, sediment and groundwater and which the EPA estimated would cost approximately \$17 million to implement. On June 26, 1998, the EPA issued an Order to the non-de minimis PRP group members, and others, including the owner, to implement the remedial design ("RD") and remedial action ("RA"). The PRP Group is proceeding as required by the Order. It has selected a contractor which has been approved by the EPA, and, on November 5, 1998, submitted the draft RD work plan. The EPA has approved the PRP Group's RD work plan and based upon the RD investigation, the EPA has modified the work plan. On March 5, 2001, the PRP group submitted a revised RD to the EPA, in which it estimates the cost to implement the RA to range from \$14 million to \$27 million. The EPA and the PRPs are also involved in litigation with the site owner concerning remediation liability. We are unable to estimate its share of the costs of the remedial activities.

MGP Sites

MGPs manufactured gas in Pennsylvania from approximately 1850 to 1950. We have identified twenty-eight sites where former MGP activities may have resulted in site contamination. We are presently engaged in

performing various levels of activities at these sites, including initial evaluation to determine the existence and nature of the contamination, detailed evaluation to determine the extent of the contamination and the necessity and possible methods of remediation, and implementation of remediation. Overseeing state regulatory agencies have approved the remediation of five MGP sites, while eleven other sites are currently under some degree of active study or remediation. As of June 30, 2002, we had accrued \$34 million for various environmental investigation and remediation costs that can be reasonably estimated, including \$25 million for investigation and remediation of these MGP

Edgar Filing: PECO ENERGY CO - Form 424B3

sites. We believe that we could incur additional liabilities with respect to MGP sites, which cannot be reasonably estimated at this time. We have sued a number of insurance carriers seeking indemnity/coverage for remediation costs associated with these former MGP sites.

Our budget for capital requirements for 2002 for compliance with environmental requirements total approximately \$2 million. In addition, we may be required to make significant additional expenditures not presently determinable.

Employees

As of June 30, 2002, we had approximately 2,700 employees. Over the past several years, a number of unions have filed petitions with the National Labor Relations Board to hold certification elections for different segments of our employees. In all cases, our employees have rejected union representation. On August 15, 2002, the International Brotherhood of Electrical Workers filed a petition to conduct a unionization vote of our employees.

Litigation

We are involved in a number of judicial and regulatory proceedings concerning matters arising out of the conduct of our business. We believe, based on currently available information, that the ultimate outcome of any proceedings known to us at this time will not have a material adverse effect on our financial condition or results of operations.

50

MANAGEMENT

Currently some of our officers are also officers of Exelon or one of its subsidiaries other than PECO.

Our executive officers and their ages as of December 31, 2001 are as follows:

Name	Age	Position
McNeill, Jr. Corbin A	62	Co-Chief Executive Officer and Chairman, Exelon and Director, PECO*
Rowe, John W.....	56	Co-Chief Executive Officer and President, Exelon and Director, PECO
Strobel, Pamela B....	49	Executive Vice President, Exelon and Chair, PECO and Director, PECO
Gillis, Ruth Ann M...	47	Senior Vice President and Chief Financial Officer, Exelon and Director, PECO
Lawrence, Kenneth G..	54	President and Chief Operating Officer, Energy Delivery, Exelon and Pres PECO
Frankowski, Frank F..	51	Vice President, Finance and Chief Financial Officer, PECO

* Retired as of April 23, 2002

Each of the above was elected as an executive officer effective October 20, 2000, the closing date of the merger, except for Frank F. Frankowski, who was elected effective October 22, 2001.

Each of the above executive officers holds such office at the discretion of our board of directors until his or her replacement or earlier resignation, retirement or death.

Edgar Filing: PECO ENERGY CO - Form 424B3

Corbin A. McNeill, Jr. Prior to his election to his current position, Mr. McNeill was Co-Chief Executive Officer of ComEd and President, Co-Chief Executive Officer and Chairman of PECO; Chief Executive Officer of PECO; Chief Operating Officer and Executive Vice President, Nuclear division of PECO. Mr. McNeill retired as of April 23, 2002.

John W. Rowe. Mr. Rowe is Co-Chief Executive Officer and President of Exelon and a Director of PECO and ComEd. Prior to his election to his current position, Mr. Rowe was Chairman, President and Chief Executive Officer of ComEd and Unicom Corporation; and President and Chief Executive Officer of New England Electric System. Mr. Rowe is also a director of UnumProvident Corporation. Upon Mr. McNeill's retirement, Mr. Rowe becomes Chief Executive Officer, President of Exelon and a Director of PECO.

Pamela B. Strobel. Prior to her election to her current position, Ms. Strobel was Vice Chairman of ComEd; Vice Chairman of PECO; Executive Vice President and General Counsel of ComEd and Unicom; Senior Vice President and General Counsel of ComEd and Unicom; and Vice President and General Counsel of ComEd.

Ruth Ann M. Gillis. Prior to her election to her current position, Ms. Gillis was Senior Vice President and Chief Financial Officer of ComEd and Unicom; Vice President and Treasurer of ComEd and Unicom; Vice President, Chief Financial Officer and Treasurer of the University of Chicago Hospitals and Health System; and Senior Vice President and Chief Financial Officer of American National Bank and Trust Company.

Kenneth G. Lawrence. Prior to his election to his current position, Mr. Lawrence was Senior Vice President, Distribution of PECO; Senior Vice President of PECO, President, Distribution division, of PECO; Senior Vice President, Distribution division of PECO; Senior Vice President, Finance and Chief Financial Officer of PECO; and Vice President, Gas Operations division of PECO.

Frank F. Frankowski. Prior to his election to his current position of Vice President, Finance and Chief Financial Officer of PECO Energy Company, Mr. Frankowski was Controller of PECO Energy Company; Manager, Accounting and Control of PECO Energy; and Director--Taxes of PECO Energy Company.

51

COMPENSATION

We originally established the Management Incentive Compensation Plan ("MICP") in 1988 and amended it in 1997. In connection with the merger, Exelon assumed sponsorship of the MICP.

The MICP provides for annual awards of cash, stock, or other currency ("Awards") to key employees (employees so designated by a Committee of Exelon's Board of Directors, including employees who are officers or directors) based on achievement of certain pre-established goals. The maximum annual Awards payable to any participant is two million dollars.

The MICP is administered and interpreted by a Committee ("Committee") consisting of two or more outside, non-employee directors of Exelon. The Committee has the full power to select the employees who will receive Awards under the MICP; determine the amounts and forms of Awards; determines the terms and conditions of Awards in a manner consistent with the MICP; construe and interpret the MICP and any agreement or instrument entered into under the MICP; make factual determinations; and, establish, amend, or waive rules and regulations for the MICP's administration.

Edgar Filing: PECO ENERGY CO - Form 424B3

In order to qualify as performance-based compensation, the Committee must establish performance goals and the formula for applying such goals in determining Awards (within 90 days after the commencement of the applicable performance period or before 25% of the performance period has elapsed, if shorter than 12 months). During the performance period, the Committee may modify performance goals or the formula for applying such goals; provided, however, that the Committee cannot increase the Award otherwise payable to employees subject to section 162(m) of the Internal Revenue Code under the goals and formula initially adopted. The Committee may, however, reduce or eliminate the Award otherwise payable.

The performance goals are based on business criteria chosen by the Committee from among the following alternatives, each of which may be based on absolute standards or peer industry group comparatives and may be applied at various organizational levels (e.g., corporate, business unit, division): a) total shareholder return; b) stock price increase; c) dividend payout as percentage of net income; d) return on equity; e) return on capital; f) cash flow, including operating cash flows, free cash flow, discounted cash flow return on investment, and cash flow in excess of cost of capital; g) economic value added (income in excess of capital costs); h) cost per kilowatt hour; i) market share; j) customer/employee satisfaction as measured by survey instruments; k) earnings per share; l) revenue; m) workforce diversity; n) safety; o) personal performance; p) productivity measures; q) diversification of business opportunities; r) price to earnings ratio; s) expense ratio; t) total expenditures; and u) completion of key projects.

We also originally established the Exelon Long-Term Incentive Plan ("Incentive Plan") in 1989 as the PECO Energy Company 1989 Long-Term Incentive Plan. In connection with the exchange of our shares for shares of Exelon Corporation and the merger, Exelon assumed sponsorship of the Incentive Plan and the Incentive Plan was amended to change its name and otherwise reflect the share exchange and the merger.

Employees of Exelon and its subsidiary companies (including us) are eligible to be selected to participate in the Incentive Plan. Approximately 650 persons are eligible to participate in the Incentive Plan.

The Incentive Plan authorizes the following types of grants singly, in combination or in tandem:

Stock Options. Grants consist of options to purchase shares of Exelon Common Stock, which may be "incentive stock options" or non-qualified stock options. Incentive stock options must meet the requirements of Section 422 of the Internal Revenue Code and carry some potential tax advantages for the recipient. Non-qualified stock options are not subject to those requirements and do not carry such advantages. Each stock option grant specifies the number of shares subject to the option, the manner and time of the option's exercise and the exercise price per share of stock subject to the option. The exercise price of stock option may not be less than the

52

fair market value of a share of Exelon Common Stock on the date the option is granted. The exercise price of an option may be paid by a participant in cash, shares of Exelon Common Stock owned by the participant if approved by Exelon's Compensation Committee, a combination thereof or such other consideration as the Compensation Committee may deem appropriate.

Stock Appreciation Rights. A stock appreciation right ("SAR") is a right to

Edgar Filing: PECO ENERGY CO - Form 424B3

receive a payment (either in cash, shares of Exelon Common Stock, or a combination thereof) equal to the appreciation in market value of a stated number of shares of Exelon Common Stock. The appreciation is measured by the difference between a base amount stated in the SAR and the market value of a share of Exelon Common Stock on the date of exercise of the SAR. A SAR may be granted in tandem with a stock option ("Tandem SARs") or independent of a stock option ("Non-tandem SARs"). A Tandem SAR may be granted either at the time of the grant of the related stock option or, in the case of a non-qualified stock option, at any time thereafter during the term of such option. Upon the exercise of a stock option as to some or all of the shares covered by the award, the related Tandem SAR is cancelled automatically to the extent that the number of shares subject to the Tandem SAR exceeds the number of remaining shares subject to the related stock option.

Restricted Stock. Grants are made of restricted shares of Exelon Common Stock. Such grants will be subject to such terms, conditions, restrictions and/or limitations, if any, as Exelon's Compensation Committee deems appropriate, which may include vesting periods, restrictions on transferability and requirements of continued employment.

Performance Shares and Performance Units. Performance shares are shares of Exelon Common Stock and performance units which are valued by reference to criteria chosen by Exelon's Compensation Committee. Such grants are contingent on the attainment over a specified period of time of certain performance objectives. The length of the performance period, the performance objectives to be achieved and the measure of whether and to what degree such objectives have been achieved are determined by Exelon's Compensation Committee. Amounts earned under performance shares and performance units may be paid in cash, shares of Exelon Common Stock or both.

Phantom Stock. Phantom stock is a grant expressed in terms of, but not actually represented by, a number of shares of Exelon Common Stock. Exelon's Compensation Committee establishes the initial value of the phantom stock at the time of grant, which may be greater than, equal to or less than the fair market value of a share of Exelon Common Stock. Exelon's Compensation Committee also determines the time at which the phantom stock will be paid and whether such payment will be in the form of cash, shares of Exelon Common Stock or a combination of both. Any cash payment will be the fair market value of shares of Exelon Common Stock on the payment date equal in number to the number of shares of phantom stock being paid in cash.

Dividend Equivalents. Each dividend equivalent represents the right to receive an amount in cash, or in shares of Exelon Common Stock having a fair market value, equal to the amount of each dividend paid on one share of Exelon Common Stock during a period of time established by Exelon's Compensation Committee. Dividend equivalents may be paid currently or accrued as contingent cash obligations payable at a time or times specified by Exelon's Compensation Committee. Dividend equivalents may be granted separately or in connection with grants of stock options or phantom stock under the Incentive Plan.

The Incentive Plan currently limits the maximum aggregate number of shares of Exelon Common Stock that may be granted to any given individual in any calendar year to 500,000 (proposed to be amended to 1,000,000). The proposed amendment also adds to the Incentive Plan a provision that limits the number of shares available to be granted under the Incentive Plan at full value as restricted stock, performance shares or phantom stock to 3,000,000.

Grants are evidenced by written agreements containing the terms, conditions, restrictions and/or limitations covering the grant.

Edgar Filing: PECO ENERGY CO - Form 424B3

Available Shares and Outstanding Awards. On October 20, 2000, the effective date of the exchange of our shares for shares of Exelon Common Stock and the merger, 10,800,000 shares of Exelon Common Stock were available for grants under the Incentive Plan. Since then, grants covering 9,883,672 shares have been made under the Incentive Plan and grants covering 232,651 shares have expired or been forfeited, leaving approximately 1,148,979 shares of Exelon Common Stock available for future grants under the Incentive Plan as of March 1, 2002. Approval of the proposed amendment of the Incentive Plan will increase the number of shares available for future grants under the Incentive Plan to approximately 14,148,000. As of July 1, 2002, the market price of Exelon Common Stock was \$51.44 per share.

The Exelon Corporation Employee Stock Purchase Plan ("Purchase Plan") was adopted by the Board of Directors of Exelon Corporation on May 11, 2001 and became effective on June 1, 2001, subject to approval by the shareholders of Exelon Corporation in April 2002 at the annual meeting. If shareholders do not approve the Purchase Plan, it will cease to be effective on May 10, 2002.

Under the Purchase Plan, eligible employees of Exelon and designated subsidiaries including us may authorize their employers to withhold up to 10% of their regular base pay and to use those amounts to purchase shares of Exelon Common Stock. The Purchase Plan establishes four purchase periods beginning on January 1, April 1, July 1 and October 1 of each year. A participant's payroll deductions are accumulated and used to purchase shares of Exelon Common Stock as soon as practicable after the end of each purchase period. The purchase price per share for any purchase period is equal to 90% of the lesser of the closing price on the New York Stock Exchange of a share of Exelon Common Stock on the first day of the purchase period or the last day of the purchase period on which the Exchange is open. Dividends on shares purchased under the Purchase Plan will be paid in cash unless the participant elects to have the dividends reinvested to purchase additional shares of Exelon Common Stock. Shares purchased with reinvested dividends will be purchased at fair market value with no discount. In addition to the 10% limit on payroll deductions, a participant in the Purchase Plan may not purchase more than 125 shares in any purchase period (500 shares per year) or more than \$25,000 in fair market value of stock in any calendar year. An individual's purchases under the Purchase Plan also will be limited if they would cause the employee to own 5% or more of the total combined voting power or value of all classes of stock of Exelon Corporation or any of its subsidiaries.

Under the terms of the Purchase Plan, the maximum number of shares of Exelon Common Stock that may be purchased under the Purchase Plan is 3,000,000, subject to adjustment for stock dividends, stock splits or combinations of shares of Exelon Common Stock. Through the purchase period that ended December 31, 2001, 137,648 shares of Exelon Common Stock had been purchased under the Purchase Plan. John Rowe, President and Chief Executive Officer of our parent, has purchased 394 shares under the Purchase Plan. As of June 30, 2002, approximately 27,801 employees were eligible to participate in the Purchase Plan and 3,552 were participating in the Purchase Plan.

In 2001, Exelon adopted a cash balance pension plan. All management and electing union employees who joined Exelon or one of its participating subsidiaries, including us, during 2001 become participants in the plan. Management employees who were active participants in Exelon's previous qualified defined plans at December 31, 2000 and are employed by Exelon in January 1, 2002 will be given a choice to convert to the cash balance plan. Participants in the cash balance plan, unlike participants in the other defined benefit plans, may request a lump-sum cash payment upon employee termination which may result in increased requirements for pension plan assets. Exelon may be required to increase future funding to the pension plan as a result of these

Edgar Filing: PECO ENERGY CO - Form 424B3

increased cash requirements.

54

SUMMARY COMPENSATION TABLE

Compensation of Executive Officers

The following table shows the compensation for the last three years, ending December 31, 2001, of Exelon's Co-CEO's and our executive officers who also served as our directors and officers.

Name and Principal Position	Year	Annual Compensation				Long Term	
		Bonus			Other (\$)(2)	Awards	
		Salary (\$)	Cash (\$)	Stock-Based (\$)(1)		Restricted Stock Awards (\$)	Options (#)(3)
Corbin A. McNeill, Jr.....	2001	1,050,000	1,500,300	0	84,987	1,354,104	233,000

Officer, PECO	1999	123,960	52,400	0	0	0	4,166

(1) All of the amounts shown under "Bonus--Stock-Based" and "Long Term Compensation Payouts--Stock-Based" were either paid in shares of Exelon common stock or were deferred and since the merger, are deemed to be invested in shares of Exelon common stock, and thus fully "at risk" until

Edgar Filing: PECO ENERGY CO - Form 424B3

- the end of the deferral period. Deferred amounts are noted with an asterisk.
- (2) Excludes perquisites and other benefits, unless the aggregate amount of such compensation is at least \$50,000. For 2001, includes \$42,805 paid to Mr. McNeill for financial and legal services and \$22,879 paid to Mr. Rowe for the payment of other taxes.
 - (3) Grants of options to Mr. Rowe, Ms. Strobel, and Ms. Gillis prior to the merger have been adjusted to reflect the substitution of options to acquire shares of Exelon common stock in accordance with the merger agreement.

55

Option Grants in 2001

The "grant date present values" indicated in the option grant table below are an estimate based on the Black-Scholes option pricing model. Although executives risk forfeiting these options in some circumstances, these risks are not factored into the calculated values. The actual value of these options will be determined by the excess of the stock price over the exercise price on the date that the options are exercised. There is no certainty that the actual value realized will be at or near the value estimated by the Black-Scholes option pricing model. The assumptions used for the Black-Scholes model are as of December 31, 2001 and are as follows: Risk-free interest rate: 4.85%; Volatility: 37.17%; Dividend Yield: 3.24%; Time of Exercise: 5 years.

	Individual Grants				Grant Date Value
Name	Number of Securities Underlying Options Granted (#) (1)	% of Total Options Granted to Employees in 2000	Exercise Price (\$/Sh.)	Expiration Date	Grant Date Present Value (\$)
Corbin A. McNeill, Jr.	233,300	37.08%	\$67.88	01/01/2011	\$4,710,327
John W. Rowe.....	233,300	37.08%	\$67.88	01/01/2011	\$4,710,327
Pamela B. Strobel.....	0				
Kenneth G. Lawrence...	0				
Ruth Ann M. Gillis....	0				
Frank F. Frankowski...	0				

-
- (1) Regular stock options that would have normally been granted to eligible participants in January 2001 were granted at the time of the merger in October 2000 with the exception of the Co-CEOs. Due to Plan limitations as to the maximum number of options that can be granted in a calendar year, the 10/20/2000 launch grant to the Co-CEOs was split between that date and January 2, 2001. The remaining stock options granted during 2001 were deemed "off-cycle" grants and were usually awarded as part of an employment offer.

56

Option Exercises and Year-End Value

Edgar Filing: PECO ENERGY CO - Form 424B3

This table shows the number and value of exercised and unexercised stock options for the named executive officers during 2001. Value is determined using the market value of Exelon common stock at the year-end price of \$47.88 per share, minus the value of Exelon common stock at the exercise price. All options whose exercise price exceeds the market value are valued at zero.

Name	Shares Acquired of Exercise (#)	Value Realized (\$)	Number of Securities Underlying Unexercised Options at 12/31/2001		Value of Unexercised In-the-Money Options at 12/31/2001	
			(#)	Exercisable Unexercisable	(\$)	Exercisable Unexercisable
Corbin A. McNeill, Jr.	32,500	\$1,478,750	545,833 E	494,967 U	\$11,586,765 E	\$ 886,265 U
John W. Rowe.....	100,000	\$2,980,000	348,000 E	525,100 U	\$ 2,936,529 E	\$ 1,058,110 U
Pamela B. Strobel.....	28,025	\$1,136,224	76,750 E	91,000 U	\$ 487,315 E	\$ 293,680 U
Kenneth G. Lawrence...	8,000	\$ 305,000	87,200 E	54,400 U	\$ 1,490,879 E	\$ 131,037 U
Ruth Ann M. Gillis....	0	\$ 0	68,500 E	65,750 U	\$ 596,790 E	\$ 221,350 U
Frank F. Frankowski...	0	\$ 0	4,834 E	6,332 U	41,171 E	38,022 U

Retirement Plans

The following table shows the estimated annual retirement benefits payable on a straight-life annuity basis to participating employees, including officers, in the earnings and year of service classes indicated, under Exelon's non-contributory retirement plans. Effective January 1, 2001, Exelon Corporation assumed sponsorship of the PECO Energy Company Service Annuity Plan. Effective December 31, 2001, this plan, along with the Commonwealth Edison Company Service Annuity System, was merged to form the Exelon Retirement Program, which incorporates the separate benefit formula of each merged plan for employees in business units formerly covered by that merged plan. Effective January 1, 2001, Exelon also established two cash balance pension plans which cover management employees and bargaining unit employees hired on or after such date. The amounts shown in the table are not subject to any deduction for Social Security or other offset amounts.

Covered compensation includes salary and bonus which is disclosed in the Summary Compensation Table on page 51 for the named executive officers. The calculation of retirement benefits under the plan is based upon average earnings for the highest consecutive five-year period under the PECO Energy Company Service Annuity Benefit Formula and for the highest four-year period (three-year for certain represented employees) under the ComEd Service Annuity Benefit Formula.

The Internal Revenue Code limits the annual benefits that can be paid from a tax-qualified retirement plan to \$170,000 as of January 1, 2001. As permitted by the Employee Retirement Income Security Act of 1974, Exelon sponsored supplemental plans, which allow the payment out of its general assets, any

Edgar Filing: PECO ENERGY CO - Form 424B3

benefits calculated under provisions of the applicable retirement plan which may be above these limits.

57

PECO Energy Service Annuity Formula Table

Highest 5-Year Average Earnings	Annual Normal Retirement Benefits After Specified Years of Service						
	10 Years (\$)	15 Years (\$)	20 Years (\$)	25 Years (\$)	30 Years (\$)	35 Years (\$)	40 Years (\$)
\$ 100,000.00.	19,272	26,407	33,543	40,679	47,815	54,950	62,086
200,000.00.	39,772	54,657	69,543	84,429	99,315	114,200	129,086
300,000.00.	60,272	82,907	105,543	128,179	150,815	173,450	196,086
400,000.00.	80,772	111,157	141,543	171,929	202,315	232,700	263,086
500,000.00.	101,272	139,407	177,543	215,679	253,815	291,950	330,086
600,000.00.	121,772	167,657	213,543	259,429	305,315	351,200	397,086
700,000.00.	142,272	195,907	249,543	303,179	356,815	410,450	464,086
800,000.00.	162,772	224,157	285,543	346,929	408,315	469,700	531,086
900,000.00.	183,272	252,407	321,543	390,679	459,815	528,950	598,086
1,000,000.00.	203,772	280,657	357,543	434,429	511,315	588,200	665,086

Upon his retirement, Mr. McNeill had 34 credited years of service under our pension program. Mr. Lawrence and Mr. Frankowski have 32 and 6 credited years of service, respectively, under our pension program.

Employment Agreements

Employment Agreement with John W. Rowe

Exelon entered into an amended employment agreement with Mr. Rowe, which amended and restated his employment agreement with Unicom Corporation and ComEd in effect at the time of the merger forming Exelon (the "prior agreement") and under which Mr. Rowe will serve as:

- . co-chief executive officer and president of Exelon, chairman of the executive committee of the Exelon board of directors and a member of the Exelon board of directors during the first half of the transition period provided for in Exelon's Bylaws, which is defined as the period from the effective time of the merger forming Exelon (October 20, 2000) until December 31, 2003;
- . co-chief executive officer of Exelon, chairman of the Exelon board of directors and a member of the Exelon board of directors during the second half of the transition period; and
- . chief executive officer of Exelon, chairman of the Exelon board of directors and a member of the Exelon board of directors after the transition period.

Mr. Rowe will succeed to the position of sole chief executive officer of Exelon or chairman of the Exelon board of directors if:

- . prior to the end of the transition period, Mr. McNeill should cease to be a co-chief executive officer of Exelon or the chairman of the Exelon

Edgar Filing: PECO ENERGY CO - Form 424B3

board of directors; and

- . Mr. Rowe is still a co-chief executive officer of Exelon at that time.

Mr. Rowe will receive an annual base salary determined by Exelon's compensation committee. Mr. Rowe will be eligible to participate in annual incentive award programs, long-term incentive plans and stock option plans on the same basis as other senior executives of Exelon. The agreement provided that a grant of options would be considered at the time the merger was completed. Mr. Rowe is entitled to participate in all savings, deferred compensation, retirement and other employee benefit plans generally available to other senior executives of Exelon. During the transition period, Mr. Rowe's base salary and participation in the plans and awards described in this paragraph will be in an amount or on a basis that is not less than that of Mr. McNeill's or on which Mr. McNeill participates.

58

Under his amended employment agreement and the prior agreement, Mr. Rowe is entitled to receive a special supplemental executive retirement plan, or SERP, benefit if he terminates due to normal retirement, early retirement, termination without cause, termination for good reason, death or disability or if he voluntarily terminates his employment for any other reason.

The term "good reason" includes the failure to appoint Mr. Rowe to the management and Exelon board of director positions described above. The special SERP benefit will equal the SERP benefit that Mr. Rowe would have received if:

- . he had attained age 60 (or his actual age, if greater);
- . he had earned 20 years of service on March 16, 1998 and one additional year of service on each anniversary after that date and prior to termination; and
- . his annual incentive awards for each of 1998 and 1999 had been \$300,000 greater than the annual incentive awards he actually received for those years.

Except as provided in the next paragraph, if Exelon terminates Mr. Rowe's employment for reasons other than cause, death or disability or if he should terminate employment for good reason on or after December 31, 2004 and not within 24 months following a change in control of Exelon, he would be entitled to the following benefits:

- . a prorated annual incentive award for the year in which termination occurs;
- . severance payments equal to his base salary for two years after termination, and for each year during such period an amount equal to the average of the annual incentive awards paid to him with respect to the three years preceding the year of termination or, if greater, his annual incentive award for the year before termination;
- . for the two-year period, continuation of his life, disability, accident, health and other welfare benefits, plus the retirement benefits described above and post-retirement health care coverage;
- . all of his exercisable options would remain exercisable until the applicable option expiration date;

Edgar Filing: PECO ENERGY CO - Form 424B3

- . unvested options would continue to become exercisable during the two-year continuation period and thereafter remain exercisable until the applicable option expiration date; and
- . all compensation earned through the date of termination and coverage and benefits under all benefit plans to which he is entitled.

Mr. Rowe will receive the termination benefits described in "Change in Control and Severance Arrangements" below, rather than the benefits described in the previous paragraph, if Exelon terminates Mr. Rowe without cause or he terminates with good reason and

- . the termination occurs within 24 months after a change in control of Exelon,
- . the termination occurs at any other time prior to the earlier of normal retirement or December 31, 2004, or
- . the termination occurs at any other time on and before normal retirement because of the failure to appoint or elect Mr. Rowe to the management or Exelon board of director positions described above.

Employment Arrangement with Corbin A. McNeill, Jr.

Although Exelon did not enter into an employment agreement with Mr. McNeill, the merger agreement provided that at any time during the transition period when Messrs. McNeill and Rowe are co-chief executive officers, each of them will receive the same salary, bonus and other compensation (including option grants and other incentive awards and all other forms of compensation) and enjoy the same other benefits and the same

59

employment security arrangements as the other. Mr. McNeill retired April 23, 2002. Under an agreement approved by the board of directors of Exelon, Mr. McNeill receives the termination benefits described in "Change in Control Severance Arrangements" below.

Change in Control Severance Arrangements

Exelon has entered into change in control agreements with certain senior executives including the senior executives listed under "Management" on page 61 which generally protect executives' positions and compensation levels through October 20, 2002 with respect to the Exelon merger in the case of certain officers, and for two years after certain future changes in control if such changes in control occur before June 1, 2003. The June 1, 2003 date is subject to annual extension if there is no change in control before June 1 of each year. In some cases, these agreements replaced change in control agreements with PECO and Unicom which became effective upon the completion of the merger and which cover employment through October 20, 2002. A material adverse change in compensation or position is included in the definition of "good reason" for purposes of these agreements. If an executive resigns for good reason or if the executive's employment is terminated by Exelon other than for cause, severance pay and benefits become payable.

The severance payments and benefits provided under the change in control agreements include:

- . Severance payments equal to either two and one-half or three multiplied by the sum of: the employee's annual base salary, plus an amount equal to

Edgar Filing: PECO ENERGY CO - Form 424B3

the average of the annual incentive awards paid to the employee for the two years preceding the year of termination or, if greater, the target award under the annual incentive award program in which the employee participates for the year in which termination occurs.

- . A prorated annual incentive award for the year in which termination occurs.
- . Continuation of life, disability, accident, health and other welfare benefit coverage for three years; thereafter, if applicable, retiree coverage is available.
- . Outplacement services.
- . All of a terminated employee's exercisable options remain exercisable until the applicable option expiration date, and all unvested options become fully exercisable and remain so until the applicable option expiration date.
- . Any deferred stock units, restricted stock, or restricted share units become fully vested and any other long-term incentive plan award which is unvested would vest.
- . For purposes of determining benefits under the supplemental retirement plan or arrangement, in which the employee participates, the employee will be credited with three additional years of credited service, age and compensation.
- . For purposes of determining eligibility for retiree welfare benefits, the employee will be deemed to have three additional years of service and age.
- . All compensation earned through the date of termination as well as all coverage and benefits under all benefit plans to which the employee is entitled.

Pursuant to the terms of offers of employment or employment agreements, certain employees are also entitled to additional service credits for purposes of retiree health care eligibility and for determining benefits under the supplemental retirement plan or arrangement in which they participate.

In connection with the severance benefits described above, each executive is subject to a non-compete agreement for 24 months from the applicable termination date. Although a participating employee does not have a duty to mitigate the amounts due from Exelon continued welfare benefit coverage would be offset during the applicable continuation period by comparable coverage provided under welfare plans of another employer.

60

Employees who are senior vice-presidents or above will receive an additional payment to cover excise taxes imposed under Section 4999 of the Internal Revenue Code on "excess parachute payments" or under similar state or local law if the after-tax amount of payments and benefits subject to these taxes exceeds 110% of the "safe harbor" amount that would not subject the employee to these excise taxes. If the after-tax amount, however, is less than 110% of the safe harbor amount, payments and benefits subject to these taxes would be reduced or eliminated to equal the safe harbor amount. Benefits payable to other employees subject to the excise taxes imposed under Section 4999 of the Internal Revenue Code will be reduced to the employees' safe harbor amount.

Edgar Filing: PECO ENERGY CO - Form 424B3

CERTAIN TRANSACTIONS

We are an indirect subsidiary of Exelon. The following describes our material relationships and agreements with Exelon and other affiliates.

Restructuring and Asset Transfers. During January 2001, Exelon undertook a restructuring to separate its generation and other competitive businesses from its regulated energy delivery business. As part of this restructuring, we and ComEd transferred our assets and liabilities unrelated to energy delivery to other subsidiaries of Exelon, including Exelon Generation. In our case, the assets and liabilities transferred to Exelon Generation related to nuclear, fossil, hydroelectric and other generation facilities and wholesale power marketing operations, rights under certain power purchase agreements and nuclear decommissioning trust funds. The liabilities that Exelon Generation assumed include: decommissioning costs for nuclear facilities; obligations to comply with all liabilities connected with or arising out of permits, licenses, exemptions, allowances, approvals and other items obtained or required in connection with the generation assets; obligations and liabilities arising under contracts assigned by us, including power purchase agreements and pollution control revenue bonds after January 1, 2001; all employment related obligations and liabilities to our employees who became Exelon Generation's employees in connection with the restructuring and associated litigation matters.

Power Purchase Agreement with Exelon Generation. The power purchase agreement between us and Exelon Generation, dated January 1, 2001, requires Exelon Generation to deliver energy to us to meet our hourly load obligations for provider-of-last-resort ("PLR") customers and provide us with rights to capacity sufficient to meet our daily unforced capacity obligation as determined by PJM through the year 2010. To ensure long-term generation reliability within the PJM control area, PJM rules require that we have rights to capacity in amounts based on our load plus a reserve margin. The bundled price for both the energy and capacity that Exelon Generation provides to us is a function of the amount we are able to charge our PLR customers. We arrange for transmission service and all other transmission service products with PJM and pay PJM for these services.

Interconnection Agreement. Following the corporate restructuring and the disaggregation of Exelon's distribution and generation businesses, interconnection agreements between us and Exelon Generation's generation facilities was filed with FERC to establish the requirements, terms and conditions for the continuing interconnection of those generation facilities with the transmission and distribution systems that we own and/or operate. The agreements govern interconnection only and it is our responsibility or the responsibility of the purchaser of capacity or energy output to make arrangements for transmission service through PJM.

Generation Reliability Services. Pursuant to the terms of certain Call Contracts for Generator Reliability Services between us and Exelon Generation dated as of January 10, 2001, Exelon Generation has agreed that, when called upon by us to do so in accordance with the terms of the Call Contracts, Exelon Generation will generate energy at the Delaware Generation Station and Moser Generating Station and deliver that energy to our distribution system in order to preserve the reliable operations of the distribution system. In exchange for receiving such services, we are obligated to pay Exelon Generation's net out-of-pocket costs associated with providing the services. The agreements are for terms of ten years, unless terminated earlier by either party upon 90 days prior written notice.

Edgar Filing: PECO ENERGY CO - Form 424B3

Transmission Services. PJM sells transmission services on our behalf to our affiliates at price terms set under FERC open-access transmission tariffs. For 2001, transmission sales on our behalf to affiliates totaled \$6.6 million.

Affiliated Services Agreements. There are several contracts among Exelon and its affiliates, including us, under which services are provided and received. Exelon Business Services Company, a wholly owned subsidiary of Exelon, provides business services, such as legal, accounting, purchasing and information technology, to Exelon and its affiliates, including us, at cost. We currently provide services to or receive services from Exelon affiliates at market prices, or if there is no prevailing price, then at fully allocated cost. We also provide and receive from Exelon Generation services, at cost, pertaining to the interface between the generation function conducted by Exelon Generation and the transmission and distribution functions provided by us. These services are limited to those necessary for the efficient operation of the facilities located at the generation station sites where generation facilities are connected to the transmission and distribution facilities (primarily switchyard facilities). Exelon Generation also provides us supply planning services, at cost, and assists us in obtaining energy supply resources to the extent energy supply is not provided by Exelon Generation.

Pollution Control Notes. In 2001, we transferred to Exelon Generation \$121 million of debt, through refundings of tax-exempt pollution control notes. On July 24, 2002, we transferred an additional \$29.5 million of tax-exempt debt through a refunding.

Consolidated Tax Return and Tax Sharing Agreement. We join with Exelon and its subsidiaries in filing a consolidated federal income tax return. The consolidated tax liability is allocated among participants in accordance with a Tax Sharing Agreement entered into with the other members of the Exelon Consolidated Group. This agreement provides an equitable method for determining the share of the affiliated group's consolidated federal tax burdens and benefits to be attributed to each member.

62

THE EXCHANGE OFFER

Purpose of the Exchange Offer

In connection with the sale of the original bonds, we entered into a registration rights agreement with the initial purchasers. Under the registration rights agreement, we agreed to use our best efforts to complete the exchange offer and to file and cause to become effective with the SEC a registration statement for the exchange of the original bonds for exchange bonds.

The terms of the exchange bonds are the same as the terms of the original bonds, except that the exchange bonds have been registered under the Securities Act and will not be subject to some restrictions on transfer that apply to the original bonds. In that regard, the original bonds provide, among other things, that if the exchange offer has not been consummated within the period specified in the original bonds, the interest rate on the original bonds will increase by 0.50% per annum, until the exchange offer is consummated.

Upon completion of the exchange offer, holders of original bonds will not be entitled to any further registration rights under the registration rights agreement, except under limited circumstances. See "Risk Factors--If you fail to exchange the original bonds, they will remain subject to transfer

Edgar Filing: PECO ENERGY CO - Form 424B3

restrictions" and "Description of the Exchange Bonds." The exchange offer is not being made to holders of original bonds in any jurisdiction in which the exchange offer or the acceptance of the bonds would not comply with securities or blue sky laws.

The original bonds were issued and are held in the book-entry system of The Depository Trust Company ("DTC"). Unless the context requires otherwise, the term "holder" with respect to the exchange offer means any person whose original bonds are held of record by DTC and who desires to deliver such original bonds by book-entry transfer at DTC. As soon as practicable after the Expiration Date, we will exchange the original bonds for a like aggregate principal amount of the exchange bonds of each series.

Completion of the exchange offer is subject to the conditions that the exchange offer not violate any applicable law or interpretation of the staff of the Division of Corporate Finance of the SEC and that no injunction, order or decree has been issued that would prohibit, prevent or materially impair our ability to proceed with the exchange offer. The exchange offer is also subject to various procedural requirements discussed below with which holders must comply. We reserve the right, in our absolute discretion, to waive compliance with these requirements subject to applicable law.

Terms of the Exchange Offer

We are offering, upon the terms and subject to the conditions described in this prospectus and in the accompanying letter of transmittal, to exchange up to \$250,000,000 aggregate principal amount of exchange bonds for a like aggregate principal amount of original bonds of the same series properly tendered on or before the Expiration Date and not properly withdrawn in accordance with the procedures described below. We will issue, promptly after the Expiration Date, up to an aggregate principal amount of up to \$250,000,000 of exchange bonds in exchange for a like principal amount of outstanding original bonds tendered and accepted in connection with the exchange offer. We will pay all charges and expenses, other than certain applicable taxes described below, in connection with the exchange offer. See "--Fees and Expenses."

Holders may tender their original bonds in whole or in part in minimum denominations of \$1,000 and multiples thereof. The exchange offer is not conditioned upon any minimum principal amount of original bonds being tendered. As of the date of this prospectus, \$250,000,000 aggregate principal amount of the original bonds is outstanding. Holders of original bonds do not have any appraisal or dissenters' rights in connection with the exchange offer. Original bonds that are not tendered or are tendered but not accepted in connection with the exchange offer will remain outstanding and be entitled to the benefits of the indenture, but will not be entitled to any further registration rights under the registration rights agreement, except under limited circumstances. See

"Risk Factors--If you fail to exchange the original bonds, they will remain subject to transfer restrictions" and "Description of the Exchange Bonds." If any tendered original bonds are not accepted for exchange because of an invalid tender, the occurrence of other events described in this prospectus or otherwise, appropriate book-entry transfer will be made, without expense, to the tendering holder of the original bonds promptly after the Expiration Date. Holders who tender original bonds in connection with the exchange offer will not be required to pay brokerage commissions or fees or, subject to the instructions in the bondholders' instruction form, transfer taxes with respect to the exchange of original bonds in connection with the exchange offer.

Edgar Filing: PECO ENERGY CO - Form 424B3

We do not make any recommendation to holders of original bonds as to whether to exchange all or any portion of their original bonds in this exchange offer. In addition, no one has been authorized to make any recommendation as to whether holders should exchange bonds in this exchange offer. Holders of original bonds must make their own decisions whether to exchange original bonds in this exchange offer and, if so, the aggregate amount of original bonds to exchange based on the holders' own financial positions and requirements.

Expiration Date; Extensions; Amendments

The term "Expiration Date" means 5:00 p.m., Eastern Time, on September 26, 2002. However, if the exchange offer is extended by us, the term "Expiration Date" will mean the latest date and time to which we extend the exchange offer.

We expressly reserve the right in our sole and absolute discretion, subject to applicable law, at any time and from time to time:

- . to delay the acceptance of the original bonds for exchange;
- . to extend the Expiration Date and retain all original bonds tendered in the exchange offer, subject, however, to the right of holders of original bonds to withdraw their tendered original bonds as described under "--Withdrawal Rights"; and
- . to waive any condition or otherwise amend the terms of the exchange offer in any respect.

If the exchange offer is amended in a manner determined by us to constitute a material change, we will promptly

- . disclose the amendment in a prospectus supplement that will be distributed to the holders of the original bonds,
- . file a post-effective amendment to the registration statement filed with the SEC with regard to the exchange bonds and the exchange offer, and
- . extend the exchange offer to the extent required by Rule 14e-1 under the Exchange Act.

We will promptly notify the exchange agent by making an oral or written public announcement of any delay in acceptance, extension, termination or amendment. This announcement in the case of an extension will be made no later than 9:00 a.m., Eastern Time, on the next business day after the previously scheduled expiration date. Without limiting the manner in which we may choose to make any public announcement and, subject to applicable law, we will have no obligation to publish, advertise or otherwise communicate any such public announcement other than by issuing a release to an appropriate news agency.

Acceptance for Exchange and Issuance of Exchange bonds

Upon the terms and subject to the conditions of the exchange offer, we will exchange and issue to the exchange agent, promptly after the Expiration Date, exchange bonds for original bonds validly tendered and not

withdrawn. In all cases, delivery of exchange bonds in exchange for original bonds tendered and accepted for exchange pursuant to the exchange offer will be made only after timely receipt by the exchange agent of:

Edgar Filing: PECO ENERGY CO - Form 424B3

- . a book-entry confirmation of a book-entry transfer of original bonds into the exchange agent's account at DTC, including an agent's message (as defined below) if the tendering holder has not delivered a letter of transmittal;
- . the letter of transmittal (or facsimile thereof), properly completed or an agent's message instead of the letter of transmittal; and
- . any other documents required by the letter of transmittal.

The term "book-entry confirmation" means a timely confirmation of a book-entry transfer of original bonds into the exchange agent's account at DTC. The term "agent's message" means a message, transmitted by DTC to and received by the exchange agent and forming a part of a book-entry confirmation, that states that DTC has received an express acknowledgment from the tendering DTC participant. This acknowledgment states that the participant has received and agrees to be bound by the letter of transmittal and that we may enforce the letter of transmittal against the participant.

If the procedures for book-entry transfer cannot be completed on a timely basis or time will not permit all required documents to reach the Exchange Agent prior to 5:00 PM Eastern Standard Time on the Expiration Date, a Notice of Guaranteed Delivery may be submitted to the Exchange Agent in the manner and at the address for the Exchange Agent below (See "--Exchange Agent"). The notice of guaranteed delivery must be signed by a member of a registered national securities exchange, or a member of the National Association of Securities Dealers or a commercial bank or trust company having an office or correspondent in the U.S., or an "eligible guarantor institution" within the meaning of Rule 17Ad-15 of the Securities Exchange Act of 1934, as amended. In addition, in order to use the guaranteed delivery procedure to render original bonds pursuant to the Exchange Offer, a completed and signed and dated Letter of Transmittal (or facsimile thereof) must also be received by the Exchange Agent prior to 5:00 PM Eastern Standard Time on the Expiration Date.

Subject to the terms and conditions of the exchange offer, we will be deemed to have accepted for exchange, and therefore exchanged, original bonds validly tendered and not withdrawn as, if and when we give oral or written notice to the exchange agent of our acceptance of such original bonds for exchange pursuant to the exchange offer. The exchange agent will act as agent for us for the purpose of receiving tenders of original bonds, letters of transmittal and related documents, and as agent for tendering holders for the purpose of receiving holders' instruction forms, letters of transmittal and related documents and transmitting exchange bonds to validly exchanging holders. The exchange will be made promptly after the Expiration Date.

If, for any reason whatsoever, acceptance for exchange or the exchange of any tendered original bonds is delayed, whether before or after our acceptance for exchange of original bonds, or we extend the exchange offer or are unable to accept for exchange or exchange tendered original bonds, then, without prejudice to the rights we have in the exchange offer, the exchange agent may, nevertheless, on our behalf and subject to Rule 14e-1(c) under the Exchange Act, retain tendered original bonds. These original bonds may not be withdrawn except to the extent tendering holders are entitled to withdrawal rights as described under "--Withdrawal Rights."

Under the letter of transmittal or agent's message, a holder of original bonds will warrant and agree that it has full power and authority to tender, exchange, sell, assign and transfer original bonds, that we will acquire good, marketable and unencumbered title to the tendered original bonds, free and clear of all liens, restrictions, charges and encumbrances, and the original bonds tendered for exchange are not subject to any adverse claims or proxies.

Edgar Filing: PECO ENERGY CO - Form 424B3

The holder also will warrant and agree that it will, upon request, execute and deliver any additional documents deemed by us or the exchange agent to be necessary or desirable to complete the exchange, sale, assignment, and transfer of the original bonds exchanged in the exchange offer.

65

Procedures for Tendering Original Bonds

Valid Tender. The tender of original bonds must follow the procedures for book-entry transfer described below and a book-entry confirmation, including an agent's message if the tendering holder has not delivered a letter of transmittal, must be received by the exchange agent, in each case on or before the Expiration Date.

If less than all of the original bonds are to be exchanged, a holder should fill in the amount of original bonds being exchanged in the appropriate box on the holder's instruction forms. The entire amount of original bonds will be deemed to have been tendered for exchange unless otherwise indicated.

The method of delivery of the holder's instruction form and all other required documents is at the option and sole risk of the tendering holder. Delivery will be deemed made only when actually received by the exchange agent. If delivery is by mail, we recommend properly insured registered mail, return receipt requested, or an overnight delivery service. In all cases, you should allow sufficient time to ensure timely delivery.

The exchange agent will establish an account with respect to the original bonds at DTC for purposes of the exchange offer within two business days after the date of this prospectus. Any financial institution that is a participant in DTC's book-entry transfer facility system may make a book-entry delivery of the original bonds by causing DTC to transfer the original bonds into the exchange agent's account at DTC in accordance with DTC's procedures for transfers. However, although delivery of original bonds may be effected through book-entry transfer into the exchange agent's account at DTC, the holder's instruction form (or facsimile thereof), properly completed and duly executed, or an agent's message instead of the letter of transmittal, and any other required documents, must in any case be delivered to and received by the exchange agent at its address listed under "--Exchange Agent" on or before the Expiration Date.

Delivery of documents to DTC in accordance with DTC's procedures does not constitute delivery to the exchange agent.

Determination of Validity. All questions as to the form of documents, validity, eligibility, including time of receipt, and acceptance for exchange of any tendered original bonds will be determined by us, in our sole discretion. Our interpretation of the terms and conditions of the exchange offer, including the bondholders' instruction form letter of transmittal and the accompanying instructions, will be final and binding.

We reserve the absolute right, in our sole and absolute discretion, to reject any and all tenders determined by us not to be in proper form or the acceptance of which, or exchange for, may, in the opinion of our counsel, be unlawful. We also reserve the absolute right, subject to applicable law, to waive any condition or irregularity in any tender by a particular holder whether or not similar conditions or irregularities are waived in the case of other holders. No tender will be deemed to have been validly made until all irregularities with respect to such tender have been cured or waived. Neither we, any of our affiliates or assigns, the exchange agent nor any other person will be under any duty to give any notification of any irregularities in

Edgar Filing: PECO ENERGY CO - Form 424B3

tenders or incur any liability for failure to give any notification.

If any bondholder instruction form, endorsement, bond power, power of attorney, or any other required document is signed by a trustee, executor, administrator, guardian, attorney-in-fact, officer of a corporation or other person acting in a fiduciary or representative capacity, that person should so indicate when signing, and unless waived by us, evidence satisfactory to us, in our sole discretion, of that person's authority must be submitted.

Resales of Exchange Bonds

We are making the exchange offer in reliance on the position of the staff of the Division of Corporation Finance of the SEC as defined in certain interpretive letters addressed to third parties in other transactions. However, we did not seek our own interpretive letter and we cannot assure that the staff of the Division of

66

Corporation Finance of the SEC would make a similar determination with respect to the exchange offer as it has in other interpretive letters to third parties. Based on these interpretations by the staff of the Division of Corporation Finance of the SEC, and subject to the two immediately following sentences, we believe that exchange bonds issued pursuant to this exchange offer in exchange for original bonds may be offered for resale, resold and otherwise transferred by a holder thereof (other than a holder who is a broker-dealer) without further compliance with the registration and prospectus delivery requirements of the Securities Act, provided that such exchange bonds are acquired in the ordinary course of the holder's business and that the holder is not participating, and has no arrangement or understanding with any person to participate, in a distribution (within the meaning of the Securities Act) of the exchange bonds.

However, any holder of original bonds who is an "affiliate" of ours or who intends to participate in the exchange offer for the purpose of distributing exchange bonds, or any broker-dealer who purchased original bonds from us to resell pursuant to Rule 144A or any other available exemption under the Securities Act:

- . will not be able to rely on the interpretations of the staff of the Division of Corporation Finance of the SEC defined in the above-mentioned interpretive letters;
- . will not be permitted or entitled to tender such original bonds in the exchange offer; and
- . must comply with the registration and prospectus delivery requirements of the Securities Act in connection with any sale or other transfer of such original bonds unless such sale is made pursuant to an exemption from such requirements.

In addition, as described below, if any broker-dealer holds original bonds acquired for its own account as a result of market-making or other trading activities and exchanges those original bonds for exchange bonds, then that broker-dealer must deliver a prospectus meeting the requirements of the Securities Act in connection with any resales of those exchange bonds. Each holder of original bonds who wishes to exchange original bonds for exchange bonds in the exchange offer will be required to represent that:

- . it is not an "affiliate" of ours;

Edgar Filing: PECO ENERGY CO - Form 424B3

- . any exchange bonds to be received by it are being acquired in the ordinary course of its business;
- . it has no arrangement or understanding with any person to participate in a distribution (within the meaning of the Securities Act) of such exchange bonds; and
- . if the tendering holder is not a broker-dealer, that holder is not engaged in, and does not intend to engage in, a distribution (within the meaning of the Securities Act) of its exchange bonds.

In addition, we may require the holder, as a condition to that holder's eligibility to participate in the exchange offer, to furnish to us (or an agent of ours) in writing, information as to the number of "beneficial owners" (within the meaning of Rule 13d-3 under the Exchange Act) on behalf of whom that holder holds the original bonds to be exchanged in the exchange offer.

Each broker-dealer that receives exchange bonds for its own account in the exchange offer must acknowledge that it acquired the original bonds for its own account as the result of market-making activities or other trading activities and must agree that it will deliver a prospectus meeting the requirements of the Securities Act in connection with any resale of those exchange bonds. The letter of transmittal states that by making that acknowledgement and delivering a prospectus, a broker-dealer will not be deemed to admit that it is an "underwriter" within the meaning of the Securities Act. Based on the position taken by the staff of the Division of Corporation Finance of the SEC in the interpretive letters referred to above, we believe that participating broker-dealers who acquired original bonds for their own accounts as a result of market-making activities or other trading activities may fulfill their prospectus delivery requirements with respect to the exchange bonds received upon exchange of original bonds (other than original bonds that represent an unsold allotment from the initial sale of the original bonds) with a prospectus meeting the requirements of the Securities Act, which may be

67

the prospectus prepared for this exchange offer so long as it contains a description of the plan of distribution regarding the resale of the exchange bonds.

Accordingly, this prospectus, as it may be amended or supplemented from time to time, may be used by a participating broker-dealer in connection with resales of exchange bonds received in exchange for original bonds where the original bonds were acquired by the participating broker-dealer for its own account as a result of market-making or other trading activities. See "Plan of Distribution." Subject to certain provisions contained in the registration rights agreement, we have agreed that this prospectus, as it may be amended or supplemented from time to time, may be used by a participating broker-dealer in connection with resales of exchange bonds for a period not exceeding one year after the expiration date. However, a participating broker-dealer who intends to use this prospectus in connection with the resale of exchange bonds received in exchange for original bonds pursuant to the exchange offer must notify us on or before the Expiration Date that it is a participating broker-dealer. This notice may be given in the space provided for that purpose in the letter of transmittal or may be delivered to the exchange agent at one of the addresses set forth herein under "--Exchange Agent."

Any participating broker-dealer who is an "affiliate" of ours may not rely on these interpretive letters and must comply with the registration and

Edgar Filing: PECO ENERGY CO - Form 424B3

prospectus delivery requirements of the Securities Act in connection with any resale transaction. In that regard, each participating broker-dealer who surrenders original bonds in the exchange offer will be deemed to have agreed, by execution of the letter of transmittal or an agent's message, that upon receipt of notice from us of the occurrence of any event or the discovery of:

- . any fact that makes any statement contained or incorporated by reference in this prospectus untrue in any material respect, or
- . any fact that causes this prospectus to omit to state a material fact necessary in order to make the statements contained or incorporated by reference in this prospectus, in light of the circumstances under which they were made, not misleading, or
- . the occurrence of other events specified in the registration rights agreement,

that participating broker-dealer will suspend the sale of exchange bonds under this prospectus until we have amended or supplemented this prospectus to correct the misstatement or omission and have furnished copies of the amended or supplemented prospectus to the participating broker-dealer, or we have given notice that the sale of the exchange bonds may be resumed, as the case may be.

Withdrawal Rights

Except as otherwise provided in this prospectus, tenders of original bonds may be withdrawn at any time on or before the Expiration Date. In order for a withdrawal to be effective, a written, telegraphic, telex or facsimile transmission of the notice of withdrawal must be timely received by the exchange agent at its address listed under "--Exchange Agent" on or before the Expiration Date. Any notice of withdrawal must specify the name of the person who tendered the original bonds to be withdrawn and the aggregate principal amount of original bonds to be withdrawn.

The notice of withdrawal must specify the name and number of the account at DTC to be credited with the withdrawal of original bonds, in which case a notice of withdrawal will be effective if delivered to the exchange agent by written, telegraphic, telex or facsimile transmission. Withdrawals of tenders of original bonds may not be rescinded. Original bonds properly withdrawn will not be deemed validly tendered for purposes of the exchange offer, but may be retendered at any subsequent time on or before the Expiration Date by following any of the procedures described above under "--Procedures for Tendering Original Bonds." All questions as to the validity, form and eligibility, including time of receipt, of withdrawal notices will be determined by us, in our sole discretion, and our determination will be final and binding on all parties. None of us, the exchange agent or any other person is under any duty to give any notification of any irregularities in any notice of withdrawal nor will those parties incur any liability for failure to give that notice. Any original bonds that have been tendered but which are withdrawn will be credited to the holder promptly after withdrawal.

68

Interest on Exchange Bonds

Interest on the exchange bonds will accrue at the rate of 5.95% per annum and will be payable semi-annually in arrears on May 1 and November 1 of each year, commencing May 1, 2002. We will make each interest payment to the persons in whose names the exchange bonds are registered at the close of business on record dates fixed by us which must be not more than 14 days prior to the

Edgar Filing: PECO ENERGY CO - Form 424B3

applicable interest payment date. The exchange bonds will bear interest from and including the last interest payment date on the original bonds, or if one has not yet occurred, the date of issuance of the original bonds. Accordingly, holders of original bonds that are accepted for exchange will not receive accrued but unpaid interest on original bonds at the time of tender. Rather, that interest will be payable on the exchange bonds delivered in exchange for the original bonds on the first interest payment date after the Expiration Date. Default interest will be paid in the same manner to holders as of a special record date established in accordance with the mortgage.

Accounting Treatment

The exchange bonds will be recorded at the same carrying value as the original bonds for which they are exchanged, which is the aggregate principal amount of the original bonds, as reflected in our accounting records on the date of exchange. Accordingly, no gain or loss for accounting purposes will be recognized in connection with the exchange offer. The cost of the exchange offer will be amortized over the term of the exchange bonds.

Exchange Agent

Wachovia Bank, National Association has been appointed exchange agent for the exchange offer. Delivery of the bondholders' instruction forms, letters of transmittal and any other required documents, questions, requests for assistance, and requests for additional copies of this prospectus or of the bondholders' instruction form or letters of transmittal should be directed to the exchange agent as follows:

By Registered or Certified Mail:

Wachovia Bank, National Association
PECO Energy Company
Corporate Actions Department
1525 West W.T. Harris Boulevard, 3C3
Charlotte, North Carolina 28262
Attention: Tiffany Williams

By Hand or Overnight Delivery Service:

Wachovia Bank, National Association
PECO Energy Company
Corporate Actions Department
1525 West W.T. Harris Boulevard, 3C3
Charlotte, North Carolina 28262
Attention: Tiffany Williams

By Facsimile Transmission (for Eligible Institutions only):

Wachovia Bank, National Association
Attention: Tiffany Williams
(704) 590-7628

Confirm by Telephone:

Wachovia Bank, National Association
Attention: Tiffany Williams
(704) 590-7409

Delivery to other than the above addresses or facsimile number will not constitute a valid delivery.

Fees and Expenses

We have agreed to pay the exchange agent reasonable and customary fees for its services and will reimburse it for its reasonable out-of-pocket expenses. We will also pay brokerage houses and other custodians, nominees and fiduciaries the reasonable out-of-pocket expenses incurred by them in forwarding copies of this prospectus and related documents to the beneficial owners of original bonds, and in handling or tendering for their customers. Holders who tender their original bonds for exchange will not be obligated to pay any transfer taxes in connection with the transfer. If, however, exchange bonds are to be delivered to, or are to be issued in the name of, any person other than the registered holder of the original bonds tendered, or if a transfer tax is imposed for any reason other than the exchange of original bonds in connection with the exchange offer, then the amount of any such transfer taxes, whether imposed on the registered holder or any other persons, will be payable by the tendering holder. If satisfactory evidence of payment of such taxes or exemption therefrom is not submitted with the exchanging holder's letter of instruction or the letter of transmittal, the amount of such transfer taxes will be billed directly to such tendering holder. We will not make any payment to brokers, dealers or other nominees soliciting acceptances of the exchange offer.

70

DESCRIPTION OF THE EXCHANGE BONDS

General

We issued the original bonds and will issue the exchange bonds under our First and Refunding Mortgage dated May 1, 1923, as amended and supplemented by ninety-six supplemental mortgage indentures and as proposed to be further amended and supplemented by a supplemental mortgage indenture relating to the Bonds (herein sometimes referred to collectively as the "mortgage"). Wachovia Bank, National Association (formerly First Union National Bank) is trustee under the mortgage (the "trustee").

The following summary of the mortgage does not purport to be complete and is subject to, and is qualified in its entirety by reference to, all provisions of the mortgage. Certain terms used in this section are defined in the mortgage. Copies of the First and Refunding Mortgage and the ninety-six supplemental mortgage indentures are on file with the SEC. A copy of the supplemental mortgage indenture relating to the Bonds may be obtained by accessing the Internet address provided or contacting us as described under "Where You Can Find More Information."

Principal, Maturity and Interest

The exchange bonds will be limited in aggregate principal amount to \$250,000,000. The exchange bonds will be issued in book-entry form only in denominations of \$1,000 and integral multiples thereof.

The exchange bonds will mature on June 15, 2011. Interest will be payable on the exchange bonds semiannually on May 1 and November 1, commencing on May 1, 2002 until the principal is paid or made available for payment. Interest on the exchange bonds will accrue from the most recent date to which interest has been paid or, if no interest has been paid, from the date of issuance. Interest will be computed on the basis of a 360-day year comprised of twelve 30-day months.

Edgar Filing: PECO ENERGY CO - Form 424B3

For so long as the exchange bonds are issued in book-entry form, payments of principal and interest will be made in immediately available funds by wire transfer to The Depository Trust Company ("DTC") or its nominee. If the exchange bonds are issued in certificated form to a holder other than DTC, payments of principal and interest will be made by check mailed to such holder at such holder's registered address. Payment of principal of the exchange bonds in certificated form will be made against surrender of those exchange bonds at the office or agency of our company in the City of Philadelphia, Pennsylvania and an office or agency in the Borough of Manhattan, City of New York. Payment of interest on the exchange bonds will be made to the person in whose name the exchange bonds are registered at the close of business on record dates fixed by the Company which must be not more than 14 days prior to the relevant interest payment date. Default interest will be paid in the same manner to holders as of a special record date established in accordance with the mortgage.

All amounts paid by us for the payment of principal, premium (if any) or interest on any exchange bonds that remain unclaimed at the end of two years after such payment has become due and payable will be repaid to us and the holders of such exchange bonds will thereafter look only to us for payment thereof.

Redemption at Our Option

We may, at our option, redeem the exchange bonds in whole or in part at any time at a redemption price equal to the greater of:

- . 100% of the principal amount of the exchange bonds to be redeemed, plus accrued interest to the redemption date; or
- . as determined by the Quotation Agent, the sum of the present values of the remaining scheduled payments of principal and interest on the exchange bonds to be redeemed (not including any portion of payments of interest accrued as of the redemption date) discounted to the redemption date on a semi-annual basis at the Adjusted Treasury Rate plus 30 basis points, plus accrued interest to the redemption date.

71

The redemption price will be calculated assuming a 360-day year consisting of twelve 30-day months.

We will mail notice of any redemption at least 30 days but not more than 45 days before the redemption date to each registered holder of the exchange bonds to be redeemed.

Unless we default in payment of the redemption price, on and after the redemption date, interest will cease to accrue on the exchange bonds or portions of the exchange bonds called for redemption.

"Adjusted Treasury Rate" means, with respect to any redemption date, the rate per year equal to the semi-annual equivalent yield to maturity of the Comparable Treasury Issue, assuming a price for the Comparable Treasury Issue (expressed as a percentage of its principal amount) equal to the Comparable Treasury Price for the redemption date.

"Business Day" means any day that is not a day on which banking institutions in New York City are authorized or required by law or regulation to close.

"Comparable Treasury Issue" means the U.S. Treasury security selected by the

Edgar Filing: PECO ENERGY CO - Form 424B3

Quotation Agent as having a maturity comparable to the remaining term of the Bonds that would be used, at the time of selection and in accordance with customary financial practice, in pricing new issues of corporate debt securities of comparable maturity to the remaining term of the Bonds.

"Comparable Treasury Price" means, with respect to any redemption date:

- . the average of the Reference Treasury Dealer Quotations for that redemption date, after excluding the highest and lowest of the Reference Treasury Dealer Quotations; or
- . if the trustee obtains fewer than three Reference Treasury Dealer Quotations, the average of all Reference Treasury Dealer Quotations so received.

"Quotation Agent" means the Reference Treasury Dealer appointed by us.

"Reference Treasury Dealer" means (1) each of Merrill Lynch, Pierce, Fenner & Smith Incorporated and First Union Securities, Inc. and their respective successors, unless any of them ceases to be a primary U.S. Government securities dealer in New York City (a "Primary Treasury Dealer"), in which case we shall substitute another Primary Treasury Dealer; and (2) any other Primary Treasury Dealer selected by us.

"Reference Treasury Dealer Quotations" means, with respect to each Reference Treasury Dealer and any redemption date, the average, as determined by the trustee, of the bid and asked prices for the Comparable Treasury Issue (expressed in each case as a percentage of its principal amount) quoted in writing to the trustee by that Reference Treasury Dealer at 5:00 p.m., New York City time, on the third Business Day preceding that redemption date.

Security

The exchange bonds will be secured equally with all other bonds outstanding or hereafter issued under the mortgage (sometimes referred to herein as the "mortgage bonds") by the lien of the mortgage. The lien of the mortgage, subject to (1) minor exceptions and certain excepted encumbrances that are defined in the mortgage and (2) the trustee's prior lien for compensation and expenses, constitutes a first lien on substantially all of our properties. The mortgage does not constitute a lien on any property owned by our subsidiaries. Our properties consist principally of electric transmission and distribution lines and substations, gas distribution facilities and general office and service buildings.

We may not issue securities which will rank ahead of the mortgage bonds as to security. We may acquire property subject to prior liens. If such property is made the basis for the issuance of additional bonds after we acquires it, all additional bonds issued under the prior lien must be pledged with the trustee as additional security under the mortgage.

Authentication and Delivery of Additional Bonds

The mortgage permits the issuance from time to time of additional mortgage bonds, without limit as to aggregate amount. Additional mortgage bonds may be in principal amount equal to:

- (1) the principal amount of underlying bonds secured by a prior lien upon property acquired by us after March 1, 1937 and deposited with the trustee

Edgar Filing: PECO ENERGY CO - Form 424B3

under the mortgage;

(2) the principal amount of any such underlying bonds redeemed or retired, or for the payment, redemption or retirement of which funds have been deposited in trust;

(3) the principal amount of bonds previously authenticated under the mortgage on or after March 1, 1937, which have been delivered to the trustee;

(4) the principal amount of bonds previously issued under the mortgage on or after March 1, 1937, which are being refunded or redeemed, if funds for the refunding or redemption have been deposited with the trustee;

(5) an amount not exceeding 60% of the actual cost or the fair value, whichever is less, of the net amount of permanent additions to the property subject to the lien of the mortgage, made or acquired after November 30, 1941, and of additional plants or property acquired by us after November 30, 1941, and to be used in connection with its electric or gas business as part of one connected system and located in Pennsylvania or within 150 miles of Philadelphia; and

(6) the amount of cash deposited with the trustee, which cash shall not at any time exceed \$3,000,000 or 10% of the aggregate principal amount of bonds then outstanding under the mortgage, whichever is greater, and which cash may subsequently be withdrawn to the extent of 60% of capital expenditures, as described in clause (5) above.

No additional bonds may be issued under the mortgage as outlined in clauses (5) and (6) and, in certain cases, clause (3) above, unless the net earnings test of the mortgage is satisfied. The net earnings test of the mortgage, which relates only to the issuance of additional mortgage bonds, requires for 12 consecutive calendar months, within the 15 calendar months immediately preceding the application for such bonds, that our net earnings, after deductions for amounts set aside for renewal and replacement or depreciations reserves and before provision for income taxes, must have been equal to at least twice the annual interest charges on all bonds outstanding under the mortgage (including those then applied for) and any other bonds secured by a lien on our property.

The exchange bonds will be issued against mortgage bonds being redeemed as described under clause (4) above.

Release and Substitution of Property

While no event of default exists, we may obtain the release of the lien of the mortgage on mortgaged property which is sold or exchanged if (1) we deposit or pledge cash or purchase money obligations with the trustee, or (2) in certain instances, if we substitute other property of equivalent value. The mortgage also contains certain requirements relating to our withdrawal or application of proceeds of released property and other funds held by the trustee.

Corporate Existence

We may consolidate or merge with or into or convey, transfer or lease all, or substantially all, of the mortgage property to any corporation lawfully entitled to acquire or lease and operate the property, provided that: such consolidation, merger, conveyance, transfer or lease in no respect impairs the lien of the mortgage or any rights or powers of the trustee or the holders of the outstanding mortgage bonds; and such successor corporation executes and causes to be recorded an indenture which assumes all of the terms, covenants and conditions of the mortgage and any indenture supplement thereto.

Edgar Filing: PECO ENERGY CO - Form 424B3

The mortgage does not contain any covenant or other provision that specifically is intended to afford holders of our mortgage bonds special protection in the event of a highly leveraged transaction. The issuance of long-term debt securities requires the approval of the PUC.

73

Defaults

Events of default are defined in the mortgage as (1) default for 60 days in the payment of interest on mortgage bonds or sinking funds deposits under the mortgage, (2) default in the payment of principal of bonds under the mortgage at maturity or upon redemption, (3) default in the performance of any other covenant in the mortgage continuing for a period of 60 days after written notice from the trustee, and (4) certain events of bankruptcy or insolvency.

Upon the authentication and delivery of additional mortgage bonds or the release of cash or property, we are required to file documents and reports with the trustee with respect to the absence of default.

Rights of Bondholders upon Default

Upon the occurrence of an event of default, the holders of a majority in principal amount of all the outstanding mortgage bonds may require the trustee to accelerate the maturity of the mortgage bonds and to enforce the lien of the mortgage. Prior to any sale under the mortgage, and upon the remedying of all defaults, any such acceleration of the maturity of the mortgage bonds may be annulled by the holders of at least a majority in principal amount of all the outstanding mortgage bonds. The mortgage permits the trustee to require indemnity before proceeding to enforce the lien of the mortgage.

Amendments

We and the trustee may amend the mortgage without the consent of the holders of the mortgage bonds: (1) to subject additional property to the lien to the mortgage; (2) to define the covenants and provisions permitted under or not inconsistent with the mortgage; (3) to add to the limitations of the authorized amounts, date of maturity, method, conditions and purposes of issue of any bonds issued under the mortgage; (4) to evidence the succession of another corporation to us and the assumption by a successor corporation of our covenants and obligations under the mortgage; (5) to make such provision in regard to matters or questions arising under the mortgage as may be necessary or desirable and not inconsistent with the mortgage.

We and the trustee may amend the mortgage or modify the rights of the holders of the mortgage bonds with the written consent of at least 66 2/3% of the principal amount of the mortgage bonds then outstanding; provided, that no such amendment shall, without the written consent of the holder of each outstanding mortgage bond affected thereby: (1) change the date of maturity of the principal of, or any installment hereof on, any mortgage bond, or reduce the principal amount of any mortgage bond or the interest thereon or any premium payable on the redemption thereof, or change any place of payment where, or currency in which, any mortgage bond or interest thereon is payable, or impair the right to institute suit for the enforcement of any such payment on or after the date of maturity thereof; or (2) reduce the percentage in principal amount of the outstanding mortgage bonds, the consent of whose holders is required for any amendment, waiver of compliance with the provisions of the mortgage or certain defaults and their consequences; or (3) modify any of the amendment provisions or Section 22 of Article VIII (relating to waiver

Edgar Filing: PECO ENERGY CO - Form 424B3

of default), except to increase any such percentage or to provide that certain other provisions of the mortgage cannot be modified or waived without the consent of the holder of each mortgage bond affected thereby.

Trustee

Wachovia Bank, National Association (formerly First Union National Bank), the trustee under the mortgage, is the registrar and disbursing agent for our mortgage bonds. Wachovia Bank, National Association is also our depository, from time to time makes loans to us and is trustee for a series of senior unsecured notes of Exelon Generation.

Concerning the Trustee

We and our affiliates use or will use some of the banking services of the trustee in the normal course of business.

Governing Law

The mortgage is and the exchange bonds will be governed by the laws of the Commonwealth of Pennsylvania.

74

Book-Entry, Delivery and Form

The certificates representing the exchange bonds will be in fully registered, global form without interest coupons.

Ownership of beneficial interests in a global bond will be limited to persons who have accounts with DTC ("participants") or persons who hold interests through participants. Ownership of beneficial interests in a global bond will be shown on, and the transfer of that ownership will be effected only through, records maintained by DTC or its nominee (with respect to interests of participants) and the records of participants (with respect to interests of persons other than participants).

So long as DTC or its nominee is the registered owner or holder of the global bonds, DTC or such nominee, as the case may be, will be considered the sole record owner or holder of the exchange bonds represented by such global bonds for all purposes under the indenture. No beneficial owner of an interest in the global bonds will be able to transfer that interest except in accordance with DTC's applicable procedures, in addition to those provided for under the indenture and, if applicable, Euroclear or Clearstream.

Payments of the principal of and interest on the global bonds will be made to DTC or its nominee, as the case may be, as the registered owner thereof. None of us, the trustee, or any paying agent will have any responsibility or liability for any aspect of the records relating to or payments made on account of beneficial ownership interests in the global bonds or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.

We expect that DTC or its nominee, upon receipt of any payment of principal or interest in respect of the global bonds, will credit participants, accounts with payments in amounts proportionate to their respective beneficial ownership interests in the principal amount of such global bonds, as shown on the records of DTC or its nominee. We also expect that payments by participants to owners of beneficial interests in such global bonds held through such participants will be governed by standing instructions and customary practices, as is now

Edgar Filing: PECO ENERGY CO - Form 424B3

the case with securities held for the accounts of customers registered in the names of nominees for such customers.

Such payments will be the responsibility of such participants.

DTC has advised us as follows: DTC is a limited purpose trust company organized under the laws of the State of New York, a "banking organization" within the meaning of the New York Banking Law, a member of the Federal Reserve System, a "clearing corporation" within the meaning of the New York Uniform Commercial Code and a "Clearing Agency" registered pursuant to the provisions of Section 17A of the Exchange Act. DTC was created to hold securities for its participants and facilitate the clearance and settlement of securities transactions between participants through electronic book-entry changes in accounts of its participants, thereby eliminating the need for physical movement of the exchange bonds. Participants include securities brokers and dealers, banks, trust companies and clearing corporations and certain other organizations. Indirect access to the DTC system is available to others such as banks, brokers, dealers and trust companies that clear through or maintain a custodial relationship with a participant, either directly or indirectly ("indirect participants").

Neither the trustee nor we will have any responsibility for the performance by DTC or its participants or indirect participants of their respective obligations under the rules and procedures governing their operations.

If DTC is at any time unwilling or unable to continue as a depository for the global bonds and a successor depository is not appointed within 90 days, we will issue definitive, certificated original bonds in exchange for the global bonds.

Euroclear has advised us as follows: Euroclear was created in 1968 to hold securities for its participants and to clear and settle transactions between its participants through simultaneous electronic book-entry delivery against payment, thereby eliminating the need for physical movement of certificates and any risk from lack of simultaneous transfers of securities and cash. Euroclear provides various other services, including securities lending and borrowing, and interfaces with domestic markets in several countries. Euroclear is operated by Euroclear Bank S.A./N.V. (the "Euroclear Operator"), under contract with Euroclear Clearance Systems, S.C., a

75

Belgian cooperative corporation (the "Cooperative"). All operations are conducted by the Euroclear Operator, and all Euroclear securities clearance accounts and Euroclear cash accounts are accounts with the Euroclear Operator, not the Cooperative. The Cooperative establishes policy for Euroclear on behalf of Euroclear participants. Euroclear participants include banks (including central banks), securities brokers and dealers and other professional financial intermediaries. Indirect access to Euroclear is also available to others that clear through or maintain a custodial relationship with a Euroclear participant, either directly or indirectly.

The Euroclear Operator was granted a banking license by the Belgian Banking and Finance Commission in 2000, authorizing it to carry out banking activities on a global basis. It took over operation of Euroclear from the Brussels, Belgium office of Morgan Guaranty Trust Company of New York on December 31, 2000.

Securities clearance accounts and cash accounts with the Euroclear Operator are governed by the Terms and Conditions Governing Use of Euroclear and the

Edgar Filing: PECO ENERGY CO - Form 424B3

related Operating Procedures of the Euroclear System, and applicable Belgian law (collectively, the "Terms and Conditions"). The Terms and Conditions govern transfers of securities and cash within Euroclear, withdrawals of securities and cash from Euroclear, and receipts of payments with respect to securities in Euroclear. All securities in Euroclear are held on a fungible basis without attribution of specific certificates to specific securities clearance accounts. The Euroclear Operator acts under the Terms and Conditions only on behalf of Euroclear participants and has no record of or relationship with persons holding through Euroclear participants.

Distributions with respect to exchange bonds held beneficially through Euroclear will be credited to the cash accounts of Euroclear participants in accordance with the Terms and Conditions, to the extent received by Euroclear.

Clearstream has advised us as follows: Clearstream is incorporated under the laws of The Grand Duchy of Luxembourg as a professional depository. Clearstream holds securities for its participants and facilitates the clearance and settlement of securities transactions between its participants through electronic book-entry changes in accounts of its participants, thereby eliminating the need for physical movement of certificates. Clearstream provides to its participants, among other things, services for safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Clearstream interfaces with domestic markets in several countries. As a professional depository, Clearstream is subject to regulation by the Luxembourg Monetary Institute. Clearstream participants are financial institutions around the world, including securities brokers and dealers, banks, trust companies, clearing corporations and certain other organizations. Indirect access to Clearstream is also available to others that clear through or maintain a custodial relationship with a Clearstream participant either directly or indirectly.

Distributions with respect to exchange bonds held beneficially through Clearstream will be credited to cash accounts of Clearstream participants in accordance with its rules and procedures, to the extent received by Clearstream.

76

CERTAIN UNITED STATES FEDERAL INCOME TAX CONSIDERATIONS

The following discussion is a summary of certain U.S. Federal income tax consequences relevant to the acquisition, ownership and disposition of the exchange bonds by the beneficial owners thereof ("Holders"). This discussion is limited to the tax consequences to the initial Holders of original bonds who purchased the original bonds at the issue price within the meaning of Section 1273 of the Internal Revenue Code of 1986, as amended (the "Code"), and does not address the tax consequences to subsequent purchasers of the original bonds or the exchange bonds. This summary does not purport to be a complete analysis of all of the potential U.S. Federal income tax consequences relating to the purchase of the original bonds or the exchange of original bonds for exchange bonds or the ownership and disposition of the original bonds, nor does this summary describe any federal estate or gift tax consequences.

There can be no assurance that the Internal Revenue Service ("IRS") will take a similar view of the tax consequences described herein. Furthermore, this discussion does not address all aspects of taxation that might be relevant to particular purchasers in light of their individual circumstances. For instance, this discussion does not address the alternative minimum tax provisions of the Code or special rules applicable to certain categories of purchasers (including dealers in securities or foreign currencies, insurance companies, regulated investment companies, financial institutions, tax-exempt entities, Holders

Edgar Filing: PECO ENERGY CO - Form 424B3

whose functional currency is not the U.S. dollar and, except to the extent discussed below, Foreign Holders (as defined below)), or to purchasers who hold the bonds as part of a hedge, straddle, conversion, constructive ownership or constructive sale transaction or other risk reduction transaction. This discussion is based on the provisions of the Code, the Treasury Regulations promulgated thereunder, and administrative and judicial interpretations thereof, all as in effect as of the date hereof and all of which are subject to change (possibly on a retroactive basis). This discussion below assumes that the original bonds (and the exchange bonds) have been (and will be) held as capital assets within the meaning of Code Section 1221.

You are urged to consult your tax advisor as to the specific tax consequences of an exchange of the original bonds for exchange bonds in light of such investor's particular tax situation, including the application and effect of the Code, as well as state, local and foreign income tax, estate and gift tax and other tax laws.

Tax Consequences to United States Holders

The following summary is a general description of certain U.S. Federal income tax consequences applicable to a "United States Holder." For the purpose of this discussion, the term "United States Holder" means a Holder of an original bond or an exchange bond that is for U.S. Federal income tax purposes: (1) a citizen or resident of the U.S.; (2) a corporation, partnership or other entity created or organized in or under the laws of the U.S. or of any political subdivision thereof; (3) an estate, the income of which is subject to U.S. Federal income taxation regardless of its source; or (4) a trust, the administration of which is subject to the primary supervision of a court within the U.S. and which has one or more U.S. persons with authority to control all substantial decisions, or a trust that was in existence on August 20, 1996 and has elected to continue to be treated as a U.S. trust.

If a partnership (or an entity taxable as a partnership) holds the exchange bonds, the U.S. Federal income tax treatment of a partner generally will depend upon the status of the partner and the activities of the partnership. If you are a partner in a partnership (or an entity taxable as a partnership) holding exchange bonds, you should consult your tax advisor.

Exchange Offer

The exchange of an original bond for an exchange bond pursuant to the registered exchange offer generally will not be taxable to the exchanging Holder for U.S. Federal income tax purposes. As a result, an exchanging Holder:

- . will not recognize any gain or loss on the exchange;
- . will have a holding period for the exchange bond that includes the holding period for the original bond exchanged therefor;

77

- . will have an initial adjusted tax basis in the exchange bond equal to its adjusted tax basis in the original bond exchanged therefor; and
- . will experience tax consequences upon a subsequent sale, exchange, redemption or retirement of an exchange bond similar to the tax consequences upon a sale, exchange, redemption or retirement of an original bond.

This exchange offer is not expected to result in any U.S. Federal income tax

Edgar Filing: PECO ENERGY CO - Form 424B3

consequences to a nonexchanging Holder.

Payments of Interest

Interest paid on the exchange bonds will generally be taxable to a United States Holder as ordinary interest income at the time the interest accrues or is received in accordance with such Holder's method of accounting for U.S. Federal income tax purposes.

Sale, Redemption, Retirement or Other Disposition of an Exchange Bond

In general, upon the sale, redemption, retirement or other taxable disposition of an exchange bond, a United States Holder will recognize capital gain or loss equal to the difference between the amount realized on such sale, redemption, retirement or other disposition (not including any amount attributable to accrued but unpaid interest that the United States Holder has not already included in gross income) and such Holder's adjusted tax basis in the bond. Any amount attributable to accrued but unpaid interest that the United States Holder has not already included in gross income will be treated as a payment of interest. See "Payments of Interest" above. A United States Holder's adjusted tax basis in a bond generally will equal the cost of the original bond, reduced by any principal payments received by such Holder and increased by any accrued but unpaid interest the Holder has included in income.

A noncorporate United States Holder generally will be subject to a maximum tax rate of 20% on net capital gains realized by the Holder on the disposition of capital assets (including the bonds) held for more than one year. Capital losses realized by a Holder from the disposition of capital assets (including the bonds) during any taxable year are, with minor exceptions, deductible only to the extent of capital gains realized in that taxable year or subsequent taxable years.

Tax Consequences to Foreign Holders

The following summary is a general description of certain U.S. Federal income tax consequences to a "Foreign Holder" (which, for the purpose of this discussion, means a Holder that is not a United States Holder). Special rules not discussed in this summary may apply to certain Foreign Holders, including a "controlled foreign corporation," a "passive foreign investment company," an "expatriate," or a "foreign personal holding company." The following summary is subject to the discussion below concerning backup withholding.

Exchange Offer

A Foreign Holder will not recognize gain or loss from the exchange of an original bond for an exchange bond regardless of whether such Holder is otherwise subject to U.S. Federal income tax with respect to income derived from an original bond or an exchange bond under the rules described below.

Payments of Interest

Assuming that a Foreign Holder's income from an exchange bond is not "effectively connected" with the conduct by such Holder of a trade or business in the U.S., payments of interest on an exchange bond to a Foreign Holder will not be subject to U.S. Federal income tax or withholding tax, provided that:

- . such Holder does not own, actually or constructively, 10% or more of the total combined voting power of all classes of our stock entitled to vote;

Edgar Filing: PECO ENERGY CO - Form 424B3

- . such Holder is not, for U.S. Federal income tax purposes, a controlled foreign corporation related, directly or indirectly, to us through stock ownership;
- . such Holder is not a bank receiving interest described in Code Section 881(c) (3) (A); and
- . the certification requirements imposed under Code Section 871(h) or 881(c) (summarized below) are met.

Payments of interest on an exchange bond that do not satisfy all of the foregoing requirements are generally subject to U.S. Federal income tax withholding at a flat rate of 30% (or a lower applicable treaty rate, provided certain certification requirements are met).

Except to the extent otherwise provided under an applicable tax treaty, a Foreign Holder generally will be subject to U.S. Federal income tax in the same manner as a United States Holder with respect to interest on an exchange bond if such interest is effectively connected with the conduct of a U.S. trade or business by such Holder. Effectively connected interest income will not be subject to withholding tax if the Foreign Holder delivers an IRS Form W-8ECI to the paying agent. Effectively connected interest income received by a corporate Foreign Holder may also, under certain circumstances, be subject to an additional "branch profits tax" at a 30% rate (or lower treaty rate).

Sale, Exchange, Redemption or Retirement of an Exchange Bond

In general, a Foreign Holder will not be subject to U.S. Federal income tax or withholding tax on the receipt of payments of principal on an exchange bond or on any gain recognized on the sale, redemption, retirement or other taxable disposition of an exchange bond, unless:

- . such Foreign Holder is a nonresident alien individual who is present in the U.S. for 183 or more days during the taxable year of disposition and certain other conditions are met;
- . the Foreign Holder is required to pay tax pursuant to the provisions of U.S. tax law applicable to certain U.S. expatriates;
- . the gain is effectively connected with the conduct of a U.S. trade or business by the Foreign Holder;
- . the certification requirements imposed under Code Section 871(h) or 881(c) (summarized below) are not satisfied.

Certification Requirements

In order to obtain the exemption from U.S. Federal income tax withholding described above, either (1) a Foreign Holder of an exchange bond must provide a certificate containing its name and address, and certify, under penalties of perjury, to our paying agent that such Holder is a Foreign Holder, or (2) a securities clearing organization, bank or other financial institution that holds customer securities in the ordinary course of its trade or business (a "Financial Institution") that holds an exchange bond on behalf of the Foreign Holder must (a) certify, under penalties of perjury, to our paying agent that the required certificate has been received from the Foreign Holder by it or by an intermediary Financial Institution and (b) furnish a copy of the certificates to our paying agent. A certificate described in this paragraph is effective only with respect to payments of interest made to the Foreign Holder after issuance of the certificate in the calendar year of its issuance and the two immediately succeeding calendar years. The foregoing certification may be

Edgar Filing: PECO ENERGY CO - Form 424B3

provided by the Foreign Holder on IRS Form W-8BEN, W-8IMY or W-8EXP, as applicable.

Backup Withholding and Information Reporting

Backup withholding tax (presently imposed at the rate of 30%) and certain information reporting requirements apply to certain payments of principal and interest or the proceeds of sale made to certain Holders of exchange bonds.

79

In the case of a noncorporate United States Holder, information reporting requirements will apply to payments of principal or interest made by our paying agent on an exchange bond. The payor will be required to impose backup withholding tax if:

- . a Holder fails to furnish its Taxpayer Identification Number ("TIN") (which, for an individual, is the individual's Social Security number) to the payor in the manner required;
- . a Holder furnishes an incorrect TIN and the payor is so notified by the IRS;
- . the payor is notified by the IRS that such Holder has failed to properly report payments of interest or dividends; or
- . under certain circumstances, a Holder fails to certify, under penalties of perjury, that it has furnished a correct TIN and is not subject to backup withholding for failure to report interest or dividend payments.

Backup withholding and information reporting do not apply with respect to payments made to certain exempt recipients, including a corporation.

In the case of a Foreign Holder, backup withholding will not apply to payments of principal or interest made by our paying agent on an exchange bond (absent actual knowledge that the Holder is actually a United States Holder) if the Foreign Holder has provided the required certification under penalties of perjury that it is not a United States Holder or has otherwise established an exemption from backup withholding. If the Foreign Holder provides the required certification, such Holder may nevertheless be subject to withholding of U.S. Federal income tax as described above under "--Tax Consequences to Foreign Holders."

Credit for Withheld Taxes

Federal withholding tax is not an additional tax. Rather, any amount withheld from a payment to a Holder is generally allowed as a credit against such Holder's U.S. Federal income tax liability and may entitle the Holder to a refund provided that certain required information is provided to the IRS.

80

PLAN OF DISTRIBUTION

We are making the exchange offer in reliance on the position of the staff of the Division of Corporation Finance of the SEC as defined in certain interpretive letters issued to third parties in other transactions.

Edgar Filing: PECO ENERGY CO - Form 424B3

Each broker-dealer that receives exchange bonds for its own account pursuant to the exchange offer must acknowledge that it will deliver a prospectus meeting the requirements of the Securities Act in connection with any resale of such exchange bonds. This prospectus, as it may be amended or supplemented from time to time, may be used by a broker-dealer in connection with resales of exchange bonds received in exchange for original bonds where such original bonds were acquired as a result of market-making activities or other trading activities. We have agreed that, starting on the Expiration Date and ending on the close of business one year after the Expiration Date, we will make this prospectus, as amended or supplemented, available to any broker-dealer that reasonably requests such document for use in connection with any such resale. Broker-dealers who acquired original bonds directly from us may not rely on the staff's interpretations and must comply with the registration and prospectus delivery requirements of the Securities Act, including being named as a selling security holder, in order to resell the original bonds or the exchange bonds.

We will not receive any proceeds from any sale of exchange bonds by broker-dealers. Exchange bonds received by broker-dealers for their own account pursuant to the exchange offer may be sold from time to time in one or more transactions in the over-the-counter market, in negotiated transactions, through the writing of options on the exchange bonds or a combination of such methods of resale, at market prices prevailing at the time of resale, at prices related to such prevailing market prices or negotiated prices.

Any such resale may be made directly to purchasers or to or through brokers or dealers who may receive compensation in the form of commissions or concessions from any such broker-dealer and/or the purchasers of any such exchange bonds. Any broker-dealer that resells exchange bonds that were received by it for its own account pursuant to the exchange offer and any broker or dealer that participates in a distribution of such exchange bonds may be deemed to be an "underwriter" within the meaning of the Securities Act and any profit on any such resale of exchange bonds and any commissions or concessions received by any such persons may be deemed to be underwriting compensation under the Securities Act.

The letter of transmittal states that by acknowledging that it will deliver and by delivering a prospectus, a broker-dealer will not be deemed to admit that it is an "underwriter" within the meaning of the Securities Act.

For a period of one year after the exchange offer has been completed, we will promptly send additional copies of this prospectus and any amendment or supplement to this prospectus to any broker-dealer that requests such document in the letter of transmittal.

We have agreed to pay all expenses incident to the exchange offer (including the expenses of one counsel for the holders of the original bonds), other than commissions or concessions of any brokers or dealers, and will indemnify the holders of the exchange bonds (including any broker-dealers) against certain liabilities, including liabilities under the Securities Act.

By acceptance of this exchange offer, each broker-dealer that receives exchange bonds for its own account pursuant to the exchange offer agrees that, upon receipt of notice from us of the happening of any event which makes any statement in the prospectus untrue in any material respect or requires the making of any changes in the prospectus in order to make the statements therein not misleading (which notice we agree to deliver promptly to such broker-dealer), such broker-dealer will suspend use of the prospectus until we have amended or supplemented the prospectus to correct such misstatement or omission and have furnished copies of the amended or supplemental prospectus to such broker-dealer.

Edgar Filing: PECO ENERGY CO - Form 424B3

The validity of the exchange bonds, including the binding nature of debt securities to be issued by us, will be passed upon for us by Ballard Spahr Andrews & Ingersoll, LLP.

EXPERTS

The financial statements of PECO Energy Company as of December 31, 2001 and 2000 and for each of the three years in the period ended December 31, 2001 included in this prospectus have been so included in reliance on the report of PricewaterhouseCoopers LLP independent accountants, given on the authority of said firm as experts in auditing and accounting.

The projected amounts included within the Annual Stranded Cost Amortization and Returns disclosure in the "Business--Retail Electric Services" section were not prepared with a view toward compliance with published guidelines of the SEC, the guidelines established by the American Institute of Certified Public Accountants for preparation and presentation of financial projections, or generally accepted accounting principles. These projected amounts included in this prospectus have been prepared by, and are the responsibility of, our management. PricewaterhouseCoopers LLP, our accountants, has neither examined nor compiled these projections and accordingly, PricewaterhouseCoopers LLP does not express an opinion or any other form of assurance with respect thereto. The PricewaterhouseCoopers LLP report included in this prospectus relates to our historical financial information. It does not extend to the projections and should not be read to do so.

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except per share data, unless otherwise noted)

1. BASIS OF PRESENTATION

The accompanying consolidated financial statements as of June 30, 2002 and for the three and six months then ended are unaudited, but include all adjustments that PECO Energy Company (PECO) considers necessary for a fair presentation of its financial statements. All adjustments are of a normal, recurring nature, except as otherwise disclosed. The December 31, 2001 consolidated balance sheet data was derived from audited financial statements but do not include all disclosures required by generally accepted accounting principles. Certain prior-year amounts have been reclassified for comparative purposes. These reclassifications had no effect on net income or shareholders' equity. These notes should be read in conjunction with the Notes to Consolidated Financial Statements of PECO included in or incorporated by reference in Item 8 of its Annual Report on Form 10-K for the year ended

Edgar Filing: PECO ENERGY CO - Form 424B3

December 31, 2001.

2. ADOPTION OF NEW ACCOUNTING PRINCIPLES

SFAS No. 142

PECO adopted SFAS No. 142 as of January 1, 2002. SFAS No. 142 establishes new accounting and reporting standards for goodwill and intangible assets. PECO does not have significant intangible assets recorded on its consolidated balance sheets. Under SFAS No. 142, goodwill is no longer subject to amortization, however, goodwill is subject to an assessment for impairment using a two-step fair value based test, the first step of which must be performed at least annually, or more frequently if events or circumstances indicate that goodwill might be impaired. The first step compares the fair value of a reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, the second step is performed. The second step compares the carrying amount of the goodwill to the fair value of the goodwill. If the fair value of goodwill is less than the carrying amount, an impairment loss is reported as a reduction to goodwill and a charge to operating expense, except at the transition date, when the loss is reflected as a cumulative effect of a change in accounting principle.

SFAS No. 144

In August 2001, the FASB issued SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS No. 144). PECO adopted SFAS No. 144 on January 1, 2002. SFAS No. 144 establishes accounting and reporting standards for both the impairment and disposal of long-lived assets. SFAS No. 144 is effective for fiscal years beginning after December 15, 2001 and its provisions are generally applied prospectively. The adoption of this statement had no effect on PECO's reported financial positions, results of operations or cash flows.

SFAS No. 133

SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities" (SFAS No. 133) applies to all derivative instruments and requires that such instruments be recorded on the balance sheet either as an asset or a liability measured at their fair value through earnings, with special accounting permitted for certain qualifying hedges. On January 1, 2001, PECO adopted SFAS No. 133. PECO deferred a non-cash gain of \$40 million, net of income taxes, in accumulated other comprehensive income.

3. REGULATORY ISSUES

As permitted by the Pennsylvania Electric Competition Act, the Pennsylvania Department of Revenue has calculated a 2002 Revenue Neutral Reconciliation (RNR) adjustment to the gross receipts tax rate in order to

F-5

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

neutralize the impact of electric restructuring on its tax revenues. In January 2002, the Pennsylvania Public Utility Commission (PUC) approved the RNR adjustment to the gross receipts tax rate collected from customers. Effective January 1, 2002, PECO implemented the change in the gross receipts tax rate. The RNR adjustment is under appeal. The RNR adjustment increases the gross

Edgar Filing: PECO ENERGY CO - Form 424B3

receipts tax rate, which will increase PECO's annual revenues and tax obligations by approximately \$50 million in 2002.

4. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

PECO recorded net gains/(losses) in other comprehensive income relating to mark-to-market (MTM) adjustments of contracts designated as cash flow hedges of \$(7) million and \$15 million for the three months ended June 30, 2002 and 2001, respectively and \$(1) million and 8 million for the six months ended June 30, 2002 and 2001, respectively.

During the three months ended June 30, 2002 and 2001 and the six months ended June 30, 2002 and 2001, PECO reclassified other income in the Consolidated Statements of Income and Comprehensive Income, as a result of the discontinuance of cash flow hedges related to certain forecasted financing transactions that were no longer probable of occurring as follows:

	2002	2001
	----	----
Three months ended June 30,	\$--	\$--
Six months ended June 30,..	--	6

As of June 30, 2002, deferred net gains on derivative instruments accumulated in other comprehensive income are expected to be reclassified to earnings during the next twelve months are \$15 million.

Amounts in accumulated other comprehensive income related to interest rate cash flow hedges are reclassified into earnings when the forecasted interest payment occurs.

5. COMMITMENTS AND CONTINGENCIES

For information regarding capital commitments, see the Commitments and Contingencies Note in the Consolidated Financial Statements of PECO for the year ended December 31, 2001.

Environmental Liabilities

PECO has identified 28 sites where former manufactured gas plant (MGP) activities have or may have resulted in actual site contamination. As of June 30, 2002, PECO had accrued \$34 million (undiscounted) for environmental investigation and remediation costs that currently can be reasonably estimated, including \$25 million for MGP investigation and remediation.

PECO cannot predict the extent to which it will incur other significant liabilities for additional investigation and remediation costs at these or additional sites identified by environmental agencies or others, or whether such costs may be recoverable from third parties.

Litigation

General

PECO is involved in various other litigation matters. The ultimate outcome of such matters, as well as the matters discussed above, while uncertain, are not expected to have a material adverse effect on its respective financial condition or results of operations.

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

6. MERGER-RELATED COSTS

In association with the Merger, Exelon Corporation (Exelon) recorded certain reserves for restructuring costs. The reserves associated with PECO were charged to expense, while the reserves associated with Unicom Corporation were recorded as part of the application of purchase accounting and did not affect results of operations.

Merger-related costs charged to expense in 2000 were \$276 million, consisting of \$124 million for PECO employee costs and \$152 million of direct incremental costs. Direct incremental costs represent expenses directly associated with completing the Merger, including professional fees, regulatory approval and settlement costs, and settlement of compensation arrangements. Employee costs represent estimated severance costs and pension and postretirement benefits provided under Exelon's merger separation plans for eligible employees who are expected to be involuntarily terminated before December 2002 due to integration activities of the merged companies.

7. SALE OF ACCOUNTS RECEIVABLE

PECO is party to an agreement, which expires in November 2005, with a financial institution under which it can sell or finance with limited recourse an undivided interest, adjusted daily, in up to \$225 million of designated accounts receivable. As of June 30, 2002, PECO had sold a \$225 million interest in accounts receivable, consisting of a \$170 million interest in accounts receivable that PECO accounted for as a sale under SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, a Replacement of FASB Statement No. 125" and a \$55 million interest in special-agreement accounts receivable which were accounted for as a long-term note payable. PECO retains the servicing responsibility for these receivables. The agreement requires PECO to maintain the \$225 million interest, which, if not met, requires cash, which would otherwise be released to PECO under this program, to be held in escrow until the requirement is met. At June 30, 2002, PECO met this requirement.

8. RELATED-PARTY TRANSACTIONS

Effective January 1, 2001, Exelon contributed to PECO a \$2.0 billion non-interest bearing receivable from Exelon related to the 2001 corporate restructuring. This receivable is reflected as a reduction of Shareholders' Equity in PECO's Consolidated Balance Sheets and is expected to be settled over the years 2002 through 2010. As of June 30, 2002 and December 31, 2001, the balance of this receivable from Exelon was \$1.8 billion and \$1.9 billion, respectively.

PECO paid common stock dividends to Exelon of \$85 million and \$56 million for the three months ended June 30, 2002 and 2001, respectively, and \$170 million and \$101 million for the six months ended June 30, 2002 and 2001, respectively.

Effective January 1, 2001, PECO entered into a PPA with Exelon Generation (Generation). Intercompany power purchases pursuant to the PPA were \$346 million and \$264 million for the three months ended June 30, 2002 and 2001,

Edgar Filing: PECO ENERGY CO - Form 424B3

respectively, and \$649 million and \$508 million for the six months ended June 30, 2002 and 2001. As of June 30, 2002 and December 31, 2001, PECO's payable related to the PPA was \$137 million and \$90 million, respectively.

PECO receives a variety of corporate support services from Business Services Company (BSC), including legal, human resources, financial and information technology services. Such services, provided at cost including applicable overhead, were \$7 million and \$15 million for the three months ended June 30, 2002 and 2001,

F-7

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

respectively, and \$13 million and \$17 million for the six months ended June 30, 2002 and 2001, respectively. At June 30, 2002 and December 31, 2001, PECO had a \$33 million and \$41 million payable, respectively, to BSC.

PECO receives services from Exelon Enterprises (Enterprises) for construction and the deployment of automated meter reading technology. Construction services totaling \$10 million and \$14 million were capitalized in the six months ended June 30, 2002 and 2001, respectively. Automated meter reading technology services totaling \$8 million and \$4 million for the three months ended June 30, 2002 and 2001, respectively, and totaling \$16 million and \$7 million for the six months ended June 30, 2002 and 2001, respectively, were included in Operating and Maintenance from Affiliates in the Consolidated Statements of Income and Comprehensive Income. At June 30, 2002 and December 31, 2001, PECO had \$6 million and \$8 million payable, respectively, to Enterprises.

At December 31, 2000, PECO had a \$400 million payable to Commonwealth Edison Company, which was repaid in the second quarter of 2001. The average annual interest rate on this payable for the period outstanding was 6.5%. Interest expense related to this payable for the three and six months ended June 30, 2001 was \$2 million and \$8 million, respectively.

PECO provides energy to Generation for Generation's own use. Intercompany sales for the three and six months ended June 30, 2002 and 2001 were \$2 million and \$3 million, respectively.

9. NEW ACCOUNTING PRONOUNCEMENTS

In June 2001, the FASB issued SFAS No. 143, "Asset Retirement Obligations" (SFAS No. 143). In April 2002, the FASB issued SFAS No. 145, "Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13, and Technical Corrections" (SFAS No. 145). In July 2002, the FASB issued SFAS No. 146, "Accounting for Costs Associated with Exit or Disposal Activities" (SFAS No. 146).

SFAS No. 143 provides accounting requirements for retirement obligations associated with tangible long-lived assets. PECO expects to adopt SFAS No. 143 on January 1, 2003. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which there is a legal obligation to settle under existing or enacted law, statute, written or oral contract or by legal construction under the doctrine of promissory estoppel. PECO is in the process of evaluating the impact of SFAS No. 143 on its financial statements, and cannot determine the ultimate impact of adoption at this time.

Edgar Filing: PECO ENERGY CO - Form 424B3

SFAS No. 145 eliminates SFAS No. 4 "Reporting Gains and Losses from Extinguishment of Debt" (SFAS No. 4) and thus allows for only those gains or losses on the extinguishment of debt that meet the criteria of extraordinary items to be treated as such in the financial statements. SFAS No. 145 also amends Statement of Financial Accounting Standards No. 13, "Accounting for Leases" (SFAS No. 13) to require sale-leaseback accounting for certain lease modifications that have economic effects that are similar to sale-leaseback transactions. The provisions of this statement relating to the rescission of SFAS No. 4 are effective for fiscal years beginning after May 15, 2002, the provisions of this statement relating to the amendment of SFAS No. 13 are effective for transactions occurring after May 15, 2002, and all other provisions of this Statement are effective for financial statements issued on or after May 15, 2002. PECO is in the process of evaluating the impact of SFAS No. 145 on their financial statements, and do not expect the impact to be material.

SFAS No. 146 requires that the liability for costs associated with exit or disposal activities be recognized when incurred, rather than at the date of a commitment to an exit or disposal plan. SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002.

F-8

Report of Independent Accountants

To the Shareholders and Board of Directors
of PECO Energy Company:

In our opinion, the consolidated financial statements listed in the index on Page F-1 under Item II present fairly, in all material respects, the financial position of PECO Energy Company and Subsidiary Companies (PECO) at December 31, 2001 and 2000, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2001 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index on Page F-1 under Item II presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of PECO's management; our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with auditing standards generally accepted in the United States of America, which require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 2, as part of a corporate restructuring undertaken on January 1, 2001 by Exelon Corporation, the parent company of PECO, certain of PECO's operations, assets and liabilities, including those related to power generation and enterprises, were transferred to affiliated companies of PECO.

As discussed in Note 5 to the consolidated financial statements, PECO changed its method of accounting for nuclear outage costs in 2000. As discussed in Note 1 to the consolidated financial statements, PECO changed its method of accounting for derivative instruments and hedging activities effective January

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in millions, except per share data unless otherwise noted)

1. Significant Accounting Policies

Description of Business Incorporated in Pennsylvania in 1929, PECO Energy Company (PECO) is engaged principally in the production, purchase, transmission, distribution and sale of electricity to residential, commercial, industrial and wholesale customers and the distribution and sale of natural gas to residential, commercial and industrial customers. Pursuant to the Pennsylvania Electricity Generation Customer Choice and Competition Act (Competition Act), the Commonwealth of Pennsylvania has required the unbundling of retail electric services in Pennsylvania into separate generation, transmission and distribution services with open retail competition for generation services. Since the commencement of deregulation in 1999, PECO serves as the local distribution company providing electric distribution services in its franchised service territory in southeastern Pennsylvania and bundled electric service to customers who do not choose an alternate electric generation supplier.

Edgar Filing: PECO ENERGY CO - Form 424B3

PECO is a wholly owned subsidiary of Exelon Corporation (Exelon) (see Note 3--Merger). During January 2001, Exelon undertook a corporate restructuring to separate PECO's generation and other competitive businesses from its regulated energy delivery business. As part of the restructuring, the non-regulated operations and related assets and liabilities of PECO, representing the generation and enterprises business segments were transferred to separate subsidiaries of Exelon. As a result, beginning January 2001, the operations of PECO consist of its retail electricity distribution and transmission business in southeastern Pennsylvania and its natural gas distribution business located in the Pennsylvania counties surrounding the City of Philadelphia.

As a result of the corporate restructuring, certain risks and commitments and the financial condition and results of operations of PECO have changed significantly. Additionally as a result of the restructuring, PECO is no longer subject to the risks associated with nuclear insurance, decommissioning, spent fuel disposal and energy commitments, other than its purchase power agreement with Exelon Generation Company, LLC (Generation). See Note 19--Segment Information for additional financial information.

Prior to the corporate restructuring effective January 2001, PECO also engaged in the wholesale marketing of electricity on a national basis. Through its Exelon Energy division, PECO was a competitive generation supplier offering competitive energy supply to customers throughout Pennsylvania. PECO's infrastructure services subsidiary, InfraSource, Inc. (InfraSource), formerly Exelon Infrastructure Services, Inc., provided utility infrastructure services to customers in several regions of the United States. PECO owned a 50% interest in AmerGen Energy Company, LLC (AmerGen), a joint venture with British Energy, Inc., a wholly-owned subsidiary of British Energy plc (British Energy), to acquire and operate nuclear generating facilities. PECO also participated in joint ventures which provide communications services in the Philadelphia metropolitan region. As a result of the corporate restructuring effective January 1, 2001, these operations were separated from the regulated energy delivery business. See Note 2--Corporate Restructuring.

Basis of Presentation The consolidated financial statements of PECO include the accounts of its majority-owned subsidiaries after the elimination of intercompany transactions. In 2000 and 1999, PECO generally accounted for its 20% to 50% owned investments and joint ventures, in which it exerts significant influence, under the equity method of accounting. In 2000 and 1999, PECO consolidated its proportionate interest in its jointly owned electric utility plants. PECO accounts for its less than 20% owned investments under the cost method of accounting. Accounting policies for regulated operations are in accordance with those prescribed by the regulatory authorities having jurisdiction, principally the Pennsylvania Public Utility Commission (PUC), the Federal Energy Regulatory Commission (FERC) and the Securities and Exchange Commission (SEC) under the Public Utility Holding Company Act of 1935 (PUHCA).

F-15

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Accounting for the Effects of Regulation PECO accounts for all of its regulated electric and gas operations in accordance with the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards (SFAS) No. 71, "Accounting for the Effects of Certain Types of Regulation,"

Edgar Filing: PECO ENERGY CO - Form 424B3

(SFAS No. 71) requiring PECO to record in its financial statements the effects of the rate regulation. Use of SFAS No. 71 is applicable to the utility operations of PECO that meet the following criteria: (1) third-party regulation of rates; (2) cost-based rates; and (3) a reasonable assumption that all costs will be recoverable from customers through rates. PECO believes that it is probable that currently recorded regulatory assets will be recovered. If a separable portion of PECO's business no longer meets the provisions of SFAS No. 71, PECO is required to eliminate the financial statement effects of regulation for that portion.

Use of Estimates The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates have been made in the accounting for unbilled revenue, derivatives, environmental costs, retirement benefit costs and prior to the corporate restructuring, nuclear decommissioning liabilities.

Revenues Operating revenues are generally recorded as service is rendered or energy is delivered to customers. At the end of each month, PECO accrues an estimate for the unbilled amount of energy delivered or services provided to its electric and gas customers. In 2000 and 1999, PECO recognized contract revenues and profits on certain long-term fixed-price contracts from its services businesses under the percentage-of-completion method of accounting based on costs incurred as a percentage of estimated total costs of individual contracts.

Purchased Gas Adjustment Clause PECO's natural gas rates are subject to a fuel adjustment clause designed to recover or refund the difference between the actual cost of purchased gas and the amount included in base rates. Differences between the amounts billed to customers and the actual costs recoverable are deferred and recovered or refunded in future periods by means of prospective quarterly adjustments to rates.

Nuclear Fuel In 2000 and 1999, the cost of nuclear fuel was capitalized and charged to fuel expense using the unit of production method. Estimated costs of nuclear fuel storage and disposal at operating plants were charged to fuel expense as the related fuel was consumed.

Depreciation, Amortization and Decommissioning Depreciation is provided over the estimated service lives of property, plant and equipment on a straight line basis. Annual depreciation provisions for financial reporting purposes, expressed as a percentage of average service life for each asset category are presented below:

Asset Category	2001	2000	1999
-----	----	----	----
Electric--Transmission and Distribution	2.13%	1.82%	1.83%
Electric--Generation.....	--	5.15%	5.12%
Gas.....	2.34%	2.39%	2.36%
Common--Gas and Electric.....	6.26%	3.60%	4.45%
Other Property and Equipment.....	0.60%	7.82%	8.61%

Amortization of regulatory assets is provided over the recovery period as specified in the related regulatory agreement. In 2000 and 1999, goodwill associated with acquisitions was amortized over periods from 10 to 20 years.

Edgar Filing: PECO ENERGY CO - Form 424B3

Accumulated amortization of goodwill was \$35 million and \$1 million at December 31, 2000 and 1999, respectively. Due to the corporate restructuring, which was effective January 2001, the Goodwill on PECO's Consolidated Balance Sheets was transferred to Exelon Enterprises Company, LLC (Enterprises).

F-16

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Capitalized Interest Allowance for Funds Used During Construction (AFUDC) is the cost, during the period of construction, of debt and equity funds used to finance construction projects for regulated operations. AFUDC of \$2 million, \$2 million and \$4 million in 2001, 2000 and 1999, respectively, was recorded as a charge to construction work in progress and as a non-cash credit to AFUDC which is included in other income and deductions. The rates used for capitalizing AFUDC are computed under a method prescribed by regulatory authorities.

PECO uses SFAS No. 34, "Capitalizing Interest Costs," to calculate the costs during construction of debt funds used to finance its non-regulated construction projects. PECO did not record any capitalized interest in 2001, but did record capitalized interest of \$2 million and \$6 million in 2000 and 1999, respectively.

Income Taxes Deferred Federal and state income taxes are provided on all significant temporary differences between book bases and tax bases of assets and liabilities, transactions that reflect taxable income in a year different from book income and tax carryforwards. Investment tax credits previously utilized for income tax purposes have been deferred on the Consolidated Balance Sheets and are recognized in book income over the life of the related property. PECO and its subsidiaries file a consolidated Federal income tax return with Exelon. Current and deferred income taxes of the consolidated group are allocated to PECO based on the separate return method.

Gains and Losses on Reacquired Debt Recoverable gains and losses on reacquired debt related to regulated operations are deferred and amortized to interest expense over the period consistent with rate recovery for ratemaking purposes. In 2000 and 1999, prior to the corporate restructuring, gains and losses on reacquired debt were recognized in PECO's Consolidated Statements of Income as incurred.

Comprehensive Income Comprehensive income includes all changes in equity during a period except those resulting from investments by and distributions to shareholders. Comprehensive Income is reflected in the Consolidated Statements of Comprehensive Income.

Cash and Cash Equivalents PECO considers all temporary cash investments purchased with an original maturity of three months or less to be cash equivalents.

Restricted Cash Restricted cash reflects unused cash proceeds from the issuance of the transition bonds and escrowed cash to be applied to the principal and interest payment on the transition bonds.

Marketable Securities Marketable securities are classified as available-for-sale securities and are reported at fair value, with the unrealized gains and losses, net of tax, reported in other comprehensive

Edgar Filing: PECO ENERGY CO - Form 424B3

income. Prior to the corporate restructuring in which PECO's nuclear generating stations were transferred to Generation (See Note 2--Corporate Restructuring), unrealized gains and losses on marketable securities held in the nuclear decommissioning trust funds were reported in accumulated depreciation. At December 31, 2001 and 2000, PECO had no held-to-maturity or trading securities.

Property, Plant and Equipment Property, plant and equipment is recorded at cost. PECO evaluates the carrying value of property, plant and equipment and other long-term assets based upon current and anticipated undiscounted cash flows, and recognizes an impairment when it is probable that such estimated cash flows will be less than the carrying value of the asset. Measurement of the amount of impairment, if any, is based upon the difference between carrying value and fair value. The cost of maintenance, repairs and minor replacements of property are charged to maintenance expense as incurred.

Upon retirement, the cost of regulated property plus removal costs less salvage value, are charged to accumulated depreciation by the regulated subsidiaries in accordance with regulatory practices. For unregulated property, the cost and accumulated depreciation of property, plant and equipment retired or otherwise disposed of are removed from the related accounts and included in the determination of the gain or loss on disposition.

F-17

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Capitalized Software Costs Costs incurred during the application development stage of software projects for software which is developed or obtained for internal use are capitalized. At December 31, 2001 and 2000, capitalized software costs totaled \$107 million and \$131 million, respectively, net of \$31 million and \$49 million accumulated amortization, respectively. Such capitalized amounts are amortized ratably over the expected lives of the projects when they become operational, not to exceed ten years.

Derivative Financial Instruments PECO accounts for derivative financial instruments under SFAS No. 133 "Accounting for Derivatives and Hedging Activities" (SFAS No. 133). Under the provisions of SFAS No. 133, all derivatives are recognized on the balance sheet at their fair value unless they qualify for a normal purchases and normal sales exception. Changes in the fair value of the derivative financial instruments are recognized in earnings unless specific hedge accounting criteria are met. A derivative financial instrument can be designated as a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment (fair value hedge), or a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to a recognized asset or liability (cash flow hedge). Changes in the fair value of a derivative that is highly effective as, and is designated and qualifies as, a fair value hedge, along with the gain or loss on the hedged asset or liability that is attributable to the hedged risk, are recorded in earnings. Changes in the fair value of a derivative that is highly effective as, and is designated as and qualifies as a cash flow hedge are recorded in other comprehensive income, until earnings are affected by the variability of cash flows being hedged.

In connection with Exelon's Risk Management Policy (RMP), PECO enters into derivatives to manage its exposure to fluctuation in interest rates related to its variable rate debt instruments, changes in interest rates related to planned future debt issuances prior to their actual issuance and changes in the

Edgar Filing: PECO ENERGY CO - Form 424B3

fair value of outstanding debt which is planned for early retirement.

For 2000 and 1999, prior to the corporate restructuring, PECO utilized derivatives to manage the utilization of its available generating capability and provisions of wholesale energy to its affiliates. PECO also utilized energy option contracts and energy financial swap arrangements to limit the market price risk associated with forward energy commodity contracts. Prior to the adoption of SFAS No. 133, PECO applied hedge accounting only if the derivative reduced the risk of the underlying hedged item and was designated at the inception of the hedge, with respect to the hedged item. PECO recognized any gains or losses on these derivatives when the underlying physical transaction affected earnings.

New Accounting Pronouncements In 2001, the FASB issued SFAS No. 141, "Business Combinations" (SFAS No. 141), SFAS No. 142 "Goodwill and Other Intangible Assets" (SFAS No. 142), SFAS No. 143, "Asset Retirement Obligations" (SFAS No. 143), and SFAS No. 144, "Accounting for the Impairment or Disposal of Long-Lived Assets" (SFAS No. 144).

SFAS No. 141 requires that all business combinations be accounted for under the purchase method of accounting and establishes criteria for the separate recognition of intangible assets acquired in business combinations. SFAS No. 141 is effective for business combinations initiated after June 30, 2001.

SFAS No. 142 establishes new accounting and reporting standards for goodwill and intangible assets. SFAS No. 142 is effective as of January 1, 2002. Under SFAS No. 142, effective January 1, 2002, goodwill recorded is no longer subject to amortization. After January 1, 2002, goodwill will be subject to an assessment for impairment using a two-step fair value based test, the first step of which must be performed at least annually, or more frequently if events or circumstances indicate that goodwill might be impaired. The first step compares the fair value of a reporting unit to its carrying amount, including goodwill. If the carrying amount of the reporting unit exceeds its fair value, the second step is performed. The second step compares the carrying amount of the goodwill to the fair value of the goodwill. If the fair value of goodwill is less than the carrying amount, an impairment loss would be reported as a reduction to goodwill and a charge to operating expense, except at the

F-18

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

transition date, when the loss would be reflected as a cumulative effect of a change in accounting principle. As of December 31, 2001, PECO does not have any goodwill reflected on its Consolidated Balance Sheets. As a result of the corporate restructuring in January 2001, the goodwill was transferred to Enterprises.

SFAS No. 143 provides accounting requirements for retirement obligations associated with tangible long-lived assets. PECO expects to adopt SFAS No. 143 on January 1, 2003. Retirement obligations associated with long-lived assets included within the scope of SFAS No. 143 are those for which there is a legal obligation to settle under existing or enacted law, statute, written or oral contract or by legal construction under the doctrine of promissory estoppel. PECO is in the process of evaluating the impact of SFAS No. 143 on its financial statements.

SFAS No. 144 establishes accounting and reporting standards for both the

Edgar Filing: PECO ENERGY CO - Form 424B3

impairment and disposal of long-lived assets. This statement is effective for fiscal years beginning after December 15, 2001 and provisions of this statement are generally applied prospectively. PECO is in the process of evaluating the impact of SFAS No. 144 on its financial statements, and does not expect the impact to be material.

Reclassifications Certain prior year amounts have been reclassified for comparative purposes. The reclassifications did not affect net income.

2. Corporate Restructuring

During January 2001, Exelon undertook a restructuring to separate its generation and other competitive businesses from its regulated energy delivery business. As part of the restructuring, the non-regulated operations and related assets and liabilities of PECO, representing PECO's generation and enterprises business segments, were transferred to Generation and Enterprises, respectively. Additionally, certain operations and assets and liabilities of PECO were transferred to Exelon Business Services Company (BSC). As a result, effective January 1, 2001, the operations of PECO consist of its retail electricity distribution and transmission business in southeastern Pennsylvania, and its natural gas distribution business in the Pennsylvania counties surrounding the City of Philadelphia.

The corporate restructuring had the following effect on PECO's Consolidated Balance Sheet:

Decrease in Assets:	
Current Assets.....	\$(1,085)
Property, Plant and Equipment, net.	(1,212)
Investments.....	(1,262)
Other Noncurrent Assets.....	(431)
(Increase) Decrease in Liabilities:	
Current Liabilities.....	1,540
Long-Term Debt.....	205
Deferred Income Taxes.....	(441)
Other Noncurrent Liabilities.....	1,003

Net Assets Transferred.....	\$(1,683)
	=====

Consideration, based on the net book value of the net assets transferred, was as follows:

Return of Capital	\$1,608
Note Receivable..	75

	\$1,683
	=====

In connection with the transfer, PECO entered into a power purchase agreement (PPA) with Generation. Under the terms of the PPA, PECO obtains the majority of its electric supply from Generation through 2010.

Edgar Filing: PECO ENERGY CO - Form 424B3

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Also, under the terms of the transfer, PECO assigned its rights and obligations under various PPAs and fuel supply agreements to Generation. Generation supplies power to PECO from the transferred generation assets, assigned PPAs and other market sources.

As a result of the corporate restructuring, certain risks and commitments that have been disclosed in Note 18--Commitments and Contingencies and the future financial condition and results of operations will change significantly. On a prospective basis, PECO will not be subject to the risks associated with nuclear insurance, decommissioning, spent fuel disposal and energy commitments, other than its purchase power agreement with Generation. See Note 19--Segment Information for Additional Financial Information.

3. Merger

On October 20, 2000, Exelon became the parent corporation of PECO and Commonwealth Edison Company (ComEd) as a result of the completion of the transactions contemplated by an Agreement and Plan of Exchange and Merger, as amended (Merger Agreement), among PECO, Unicom Corporation (Unicom) and Exelon. As a result of the share exchange, Exelon became the owner of all of the common stock of PECO. Following the share exchange, pursuant to the Merger Agreement, Unicom merged with and into Exelon (Merger). In the Merger, each share of the outstanding common stock of Unicom was converted into 0.875 shares of common stock of Exelon plus \$3.00 in cash. As a result of the Merger, Unicom ceased to exist and its subsidiaries, including ComEd, became subsidiaries of Exelon.

Merger-Related Costs

Merger-related costs charged to expense in 2000 were \$248 million, consisting of \$132 million of direct incremental costs and \$116 million for PECO employee costs. Direct incremental costs represent expenses directly associated with completing the Merger, including professional fees, regulatory approval and settlement costs, and settlement of compensation arrangements. Employee costs represent estimated severance costs and pension and postretirement benefits provided under Exelon's Merger Separation Plan (MSP) for eligible employees who are expected to be involuntarily terminated by December 2002 due to integration activities of the merged companies.

4. Acquisitions

Sithe Energies, Inc. Acquisition On December 18, 2000, PECO acquired 49.9% of the outstanding common stock of Sithe Energies, Inc. (Sithe) for \$696 million in cash and \$8 million of acquisition costs. The transaction includes an option to purchase the remaining common stock outstanding exercisable between December 2002 and December 2005, at a price to be determined based on prevailing market conditions.

Sithe is an independent power generator in North America utilizing primarily fossil and hydro generation. The purchase involves approximately 10,000 megawatts ("MW") of generation consisting of 3,800 MW of existing merchant generation, 2,500 MW under construction, and another 3,700 MW of generation in various stages of development, as well as Sithe's domestic marketing and development businesses. The generation assets are located primarily in Massachusetts and New York, but also include plants in Pennsylvania, California, Colorado and Idaho, as well as Canada and Mexico.

Edgar Filing: PECO ENERGY CO - Form 424B3

In conjunction with the corporate restructuring in January 2001, PECO transferred its investment in Sithe and the purchase option to Generation.

F-20

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

InfraSource, Inc. Acquisitions In 2000, InfraSource, Inc. (InfraSource), an unregulated majority owned subsidiary of PECO, formerly Exelon Infrastructure Services, Inc., acquired the stock or assets of seven utility service contracting companies for an aggregate purchase price of approximately \$245 million, net of cash acquired of \$9 million, including InfraSource common stock valued at \$14 million. The acquisitions were accounted for using the purchase method of accounting. The initial estimate of the excess of the purchase price over the fair value of net assets acquired (goodwill) was approximately \$216 million.

The allocation of purchase price to the fair value of assets acquired and liabilities assumed in these acquisitions is as follows:

Current Assets (net of cash acquired)	\$ 63
Property, Plant and Equipment.....	17
Goodwill.....	216
Current Liabilities.....	(51)

Total.....	\$245
	=====

At December 31, 2000 current assets included \$70 million of costs and earnings in excess of billings on uncompleted contracts and current liabilities includes \$23 million of billings and earnings in excess of costs on uncompleted contracts, related to InfraSource.

In conjunction with the corporate restructuring in January 2001, PECO transferred InfraSource to Enterprises.

AmerGen Energy Company, LLC In August 2000, AmerGen completed the purchase of Oyster Creek Nuclear Generating Facility (Oyster Creek) from GPU, Inc. (GPU) for \$10 million. Under the terms of the purchase agreement, GPU agreed to fund outage costs not to exceed \$89 million, including the cost of fuel, for a refueling outage that occurred in 2000. AmerGen is repaying these costs to GPU in nine equal annual installments through 2009. In addition, AmerGen assumed full responsibility for the ultimate decommissioning of Oyster Creek. At the closing of the sale, GPU provided funding for the decommissioning trust of \$440 million. In conjunction with this acquisition, AmerGen has received a fully funded decommissioning trust fund which has been computed assuming the anticipated costs to appropriately decommission Oyster Creek discounted to net present value using the NRC's mandated rate of 2%. AmerGen believes that the amount of the trust fund and investment earnings thereon will be sufficient to meet its decommissioning obligation. GPU is purchasing the electricity generated by Oyster Creek pursuant to a three-year PPA.

In conjunction with the corporate restructuring in January 2001, PECO

Edgar Filing: PECO ENERGY CO - Form 424B3

transferred its investment in AmerGen to Generation.

5. Accounting Changes

On January 1, 2001, PECO recognized a deferred non-cash gain of \$40 million (net of income taxes of \$29 million), in accumulated other comprehensive income, a component of shareholders' equity, to reflect the adoption of SFAS No. 133, as amended.

During the fourth quarter of 2000, as a result of the synchronization of accounting policies with Unicom in connection with the Merger, PECO changed its method of accounting for nuclear outage costs to record such costs as incurred. Previously, PECO accrued these costs over the operating unit cycle. As a result of the change in accounting method for nuclear outage costs, PECO recorded income of \$24 million (net of income taxes of

F-21

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

\$16 million). The change is reported as a Cumulative Effect of a Change in Accounting Principle on the Consolidated Statements of Income as of December 31, 2000, representing the balance of the nuclear outage cost reserve at January 1, 2000.

6. Regulatory Issues

In 2001, the phased process to implement competition in the electric industry continued as mandated by the requirements of the PUC's Final Restructuring Order.

Customer Choice The PUC's Final Restructuring Order provided for the phase-in of customer choice of electric generation supplier (EGS) for all customers by January 1, 2000. The Final Restructuring Order also established market share thresholds to ensure that a minimum number of residential and commercial customers choose an EGS or a PECO affiliate. If less than 35% and 50% of residential and commercial customers have chosen an EGS, including residential customers assigned to an EGS as a provider of last resort default supplier, by January 1, 2001 and January 1, 2003, respectively, the number of customers sufficient to meet the necessary threshold levels shall be randomly selected and assigned to an EGS through a PUC-determined process. On January 1, 2001, the 35% threshold was met for all three customer classes as a result of agreements assigning customers to New Power Company and Green Mountain Energy Company as providers of last resort default service. During 2001, PECO experienced an increase in the number of customers selecting or returning to PECO as their EGS and at December 31, 2001, approximately 28% of PECO's residential load, 6% of its small commercial and industrial load and 5% of its large commercial and industrial load were purchasing generation from an alternative generation supplier. Customers who purchase energy from an EGS continue to pay a delivery charge.

Rate Reductions and Caps Under the Final Restructuring Order, retail electric rates were capped at year-end 1996 levels (system-wide average of 9.96 cents/kilowatt hour (kWh)) through June 2005. The Final Restructuring Order required PECO to reduce its retail electric rates by 8% from the 1996 system-wide average rate on January 1, 1999. This rate reduction decreased to 6% on January 1, 2000 until January 1, 2001. The transmission and distribution rate component was capped at a system-wide average rate of 2.98 cents/kWh

Edgar Filing: PECO ENERGY CO - Form 424B3

through June 30, 2005. Additionally, generation rate caps, defined as the sum of the applicable transition charge and energy and capacity charge, remain in effect through 2010.

On March 16, 2000, the PUC issued an order authorizing PECO to securitize up to an additional \$1 billion of its authorized stranded costs recovery. In accordance with the terms of that order, PECO provided its retail customers with rate reductions of \$60 million for calendar year 2001 only.

F-22

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Under a comprehensive settlement agreement in connection with achieving regulatory approval of the Merger, PECO agreed to \$200 million in aggregate rate reductions for all customers in Pennsylvania over the period January 1, 2002 through 2005 and extended the rate caps on PECO's retail electric distribution charges through December 31, 2006.

	=====	=====

At December 31, 2001 and 2000, the Competitive Transition Charge (CTC) includes the unamortized balance of \$4.5 billion and \$4.8 billion, respectively, of Intangible Transition Property (ITP) sold to PECO Energy Transition Trust (PETT), a wholly owned subsidiary of PECO, in connection with the securitization of PECO's stranded cost recovery. PETT financed its purchase of the ITP through the issuance of transition bonds. See Note 11--Long-Term Debt. ITP represents the irrevocable right of PECO or its assignee to collect non-bypassable charges from customers to recover stranded costs. The CTC represents PECO's stranded costs that are recoverable through regulated rates. The CTC is recoverable over a twelve-year period ending December 31, 2010 with a return on the unamortized balance of 10.75%.

8. Accounts Receivable

Accounts receivable--Customer at December 31, 2001 and 2000 included unbilled operating revenues of \$100 million and \$180 million, respectively. The allowance for uncollectible accounts at December 31, 2001 and 2000 was \$110 million and \$131 million, respectively.

Accounts receivable--Other at December 31, 2000 included demand notes receivable from a communications joint venture in the amount of \$153 million. The receivable has been adjusted for PECO's share of this joint venture's operating losses incurred in excess of its investment. The notes bear interest at the Applicable Federal Rate, compounded semi-annually. The average interest rate on the notes receivable was 6.22% at December 31, 2000. Interest income related to the notes receivable was \$10 million in 2000. In conjunction with the corporate restructuring in January 2001, these demand notes were transferred to Enterprises.

PECO is party to an agreement with a financial institution under which it can sell or finance with limited recourse an undivided interest, adjusted daily, in up to \$225 million of designated accounts receivable until

F-24

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

November 2005. At December 31, 2001, PECO had sold a \$225 million interest in accounts receivable, consisting of a \$170 million interest in accounts receivable which PECO accounted for as a sale under SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities--a Replacement of FASB Statement No. 125," and a \$55 million interest in special-agreement accounts receivable which was accounted for as a long-term note payable. See Note 11--Long-Term Debt. PECO retains the servicing responsibility for these receivables. The agreement requires PECO to maintain the \$225 million interest, which, if not met, requires PECO to deposit cash in order to satisfy such requirements. At December 31, 2001 and 2000, PECO met this requirement and was not required to make any cash deposits.

9. Property, Plant, and Equipment

Edgar Filing: PECO ENERGY CO - Form 424B3

A summary of property, plant and equipment by classification as of December 31, 2001 and 2000 is as follows:

Asset Category -----	2001	2000
Electric--Transmission and Distribution	\$4,058	\$3,836
Electric--Generation.....	--	2,086
Gas.....	1,281	1,181
Common.....	399	408
Nuclear Fuel.....	--	1,664
Construction Work in Progress.....	88	498
Leased Property.....	--	2
Other Property, Plant and Equipment....	20	197
	-----	-----
Total Property, Plant and Equipment.	5,846	9,872
Less Accumulated Depreciation.....	1,799	4,714
	-----	-----
Property, Plant and Equipment, net.....	\$4,047	\$5,158
	=====	=====

Accumulated depreciation included accumulated amortization of nuclear fuel of \$1.4 billion, as well as the nuclear decommissioning liability for the nuclear operating units of \$406 million as of December 31, 2000.

The decrease in the net property, plant and equipment balance from the prior year was primarily due to the corporate restructuring in which PECO's generation and enterprise assets were transferred to separate subsidiaries of Exelon (see Note 2--Corporate Restructuring).

10. Notes Payable

	2001	2000	1999
	-----	-----	-----
Average borrowings.....	\$ 3	\$ 186	\$ 242
Average interest rates, computed on daily basis	2.99%	6.62%	5.62%
Maximum borrowings outstanding.....	\$ 471	\$ 500	\$ 728
Average interest rates, at December 31.....	2.25%	7.18%	6.80%

PECO, along with Exelon, ComEd and Generation, is a party to a \$1.5 billion 364-day unsecured revolving credit facility on December 12, 2001 with a group of banks. PECO has a \$300 million sublimit under this credit facility, which is used principally to support PECO's commercial paper program. At December 31, 2001 and 2000, the amount of commercial paper outstanding was \$101 million and \$161 million, respectively. At December 31, 2001 and 2000, there were no borrowings under this credit facility. Interest rates on borrowings under the credit facility are based on the London Interbank Offering Rate as of the date of the advance.

In 2001, PECO Energy Transition Trust (PETT), a Delaware business trust and

Edgar Filing: PECO ENERGY CO - Form 424B3

a wholly-owned subsidiary of PECO, refinanced \$805 million of floating rate Series 1999-A transition bonds through the issuance by PECO of fixed-rate transition bonds (Series 2001-A transition bonds). Approximately 72% of Class A-3 and 70% of the Class A-5 Series 1999-A transition bonds were redeemed. The Series 2001-A transition bonds are non-callable, fixed-rate securities with an interest rate of 6.52%. The Series 2001-A transition bonds have an expected final payment date of September 1, 2010 and a termination date of December 31, 2010.

Also in 2001, PECO issued, through a private placement, \$250 million of its First and Refunding Mortgage Bonds, with an interest rate of 5.95% and a maturity date of November 11, 2011. Proceeds from the first mortgage bonds were used to repay a \$250 million aggregate principal amount of PECO's First and Refunding Mortgage Bonds having an interest rate of 5.625% and a maturity date of November 1, 2001.

F-26

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

In 1999, PECO entered into treasury forwards associated with the anticipated issuance of the Series 2000-A transition bonds. On May 2, 2000, these instruments were settled with net proceeds to the counterparties of \$13 million which has been deferred and is being amortized over the life of the Series 2000-A transition bonds as an increase to interest expense.

In 1998, PECO entered into treasury forwards and forward-starting interest rate swaps to manage interest rate exposure associated with the anticipated issuance of the Series 1999-A transition bonds. On March 18, 1999, these instruments were settled with net proceeds of \$80 million to PECO which were deferred and are being amortized over the life of the Series 1999-A transition bonds as a reduction of interest expense.

In connection with the refinancing of a portion of the two floating rate series of transition bonds in the first quarter of 2001, PECO settled \$318 million of a forward-starting interest rate swap resulting in a \$6 million gain which is reflected in other income and deductions due to the transaction no longer being probable. Also, in connection with the refinancing, PECO settled a portion of the interest rate swaps and the remaining portion of the forward-starting interest rate swaps resulting in gains of \$25 million, which were deferred and are being amortized over the expected remaining lives of the related debt.

At December 31, 2001 and 2000, the aggregate unamortized net gain on the settlement of PECO transactions was \$55 million and \$51 million, respectively.

In 2000 and 1999, PECO incurred extraordinary charges aggregating \$6 million (\$4 million, net of tax) and \$62 million (\$37 million, net of tax), respectively for prepayment premiums and the write-offs of unamortized deferred financing costs associated with the early retirement of debt.

12. Income Taxes

Income tax expense (benefit) is comprised of the following components:

Amortization of investment tax credit.....	(0.4)	(1.9)	(1.6)
Prior period income taxes.....	(1.5)	0.5	(0.7)
Other, net.....	--	0.2	(0.1)

Edgar Filing: PECO ENERGY CO - Form 424B3

Effective income tax rate.....	31.7%	35.7%	36.6%
	====	====	====

The tax effects of temporary differences giving rise to significant portions of PECO's deferred tax assets and liabilities as of December 31, 2001 and 2000 are presented below:

	2001	2000
	-----	-----
Deferred tax liabilities:		
Plant basis difference.....	\$2,990	\$2,839
Deferred investment tax credit.....	27	271
Deferred debt refinancing costs.....	31	34
	-----	-----
Total deferred tax liabilities.....	3,048	3,144
	-----	-----
Deferred tax assets:		
Deferred pension and postretirement obligations.	(12)	(187)
Other, net.....	(44)	(127)
	-----	-----
Total deferred tax assets.....	(56)	(314)
	-----	-----
Deferred income taxes (net) on the balance sheet...	\$2,992	\$2,830
	=====	=====

In accordance with regulatory treatment of certain temporary differences, PECO has recorded a regulatory asset for recoverable deferred income taxes of \$675 million and \$661 million at December 31, 2001 and 2000, respectively. These recoverable deferred income taxes include the deferred tax effects associated principally with liberalized depreciation accounted for in accordance with the ratemaking policies of the PUC, as well as the revenue impacts thereon, and assume continued recovery of these costs in future rates.

The Internal Revenue Service and certain state tax authorities are currently auditing certain tax returns of PECO. The current audits are not expected to have an adverse impact on financial condition or results of operations of PECO.

13. Retirement Benefits

PECO has adopted defined benefit pension plans and postretirement welfare benefit plans sponsored by Exelon. Essentially all PECO employees are eligible to participate in these plans. In 2001, PECO's former plans were consolidated into the Exelon plans. Essentially all PECO employees, hired on or after January 1, 2001 are eligible to participate in newly established Exelon cash balance pension plans. Employees who were active

F-28

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

participants in the former PECO pension plans on December 31, 2000 and remain employed by PECO on January 1, 2002, will have the opportunity to continue to

Edgar Filing: PECO ENERGY CO - Form 424B3

participate in the pension plan or to transfer to the cash balance plan. Benefits under these pension plans generally reflect each employee's compensation, years of service, and age at retirement. Funding is based upon actuarially determined contributions that take into account the amount deductible for income tax purposes and the minimum contribution required under the Employee Retirement Income Security Act of 1974, as amended. The following tables provide a reconciliation of benefit obligations, plan assets, and funded status for PECO's proportionate allocated interest in the plans.

on postretirement benefit obligation..... \$ 59
Effect of a one percentage point decrease in assumed health care cost trend
on total service and interest cost components..... \$ (6)
on postretirement benefit obligation..... \$ (50)

The decrease in the net benefit obligation and the fair value of plan assets in 2001 as compared to 2000 is due primarily to the corporate restructuring (See Note 2--Corporate Restructuring). Amounts of the obligation allocated to affiliates in the restructuring were primarily based on the relative number of active employees transferred to each affiliate.

Prior service cost is amortized on a straight-line basis over the average remaining service period of employees expected to receive benefits under the plans.

Edgar Filing: PECO ENERGY CO - Form 424B3

Special accounting costs of \$16 million and \$96 million in 2001 and 2000, respectively, represent accelerated separation and enhancement benefits provided to PECO employees expected to be terminated as a result of the Merger. PECO provides certain health care and life insurance benefits for retired employees through plans sponsored by Exelon. Welfare benefits for active employees are provided by several insurance policies or self-funded plans whose premiums or contributions are based upon the benefits paid during the year.

PECO has savings plans for the majority of its employees. The plans allow employees to contribute a portion of their pretax income in accordance with specified guidelines. PECO matches a percentage of the employee contribution up to certain limits. The cost of PECO's matching contribution to the savings plans totaled \$7 million, \$11 million and \$7 million in 2001, 2000, and 1999, respectively.

Total preferred stock.....	=====	1,560,120	1,745,520	\$156	\$174

(a) Redeemable, at the option of PECO, at the indicated dollar amounts per share, plus accrued dividends.

(b) None of the shares of this series is subject to redemption prior to April 1, 2003.

(c) PECO made the annual sinking fund payments of \$18.5 million on August 1,

Edgar Filing: PECO ENERGY CO - Form 424B3

2001 and August 2, 2000. The future sinking fund requirement in 2002 is \$18.5 million.

15. Company--Obligated Mandatorily Redeemable Preferred Securities of a Partnership

At December 31, 2001 and 2000, PECO Energy Capital, L.P. (Partnership), a Delaware limited partnership of which a wholly owned subsidiary of PECO is the sole general partner, had outstanding Company-Obligated Mandatorily Redeemable Preferred Securities of a Partnership (COMRPS) as set forth in the following table:

	At December 31,					
	Mandatory Redemption Date	Distribution Rate	Liquidation Value	2001 Trust	2000 Securities Outstanding	2001 2000 Amount
	----- ----- -----	----- ----- -----	----- ----- -----	----- ----- -----	----- ----- -----	----- ----- -----
PECO Energy Capital Trust II.	2037	8.00%	\$ 25	2,000,000	2,000,000	\$ 50 \$ 50
PECO Energy Capital Trust III	2028	7.38%	1,000	78,105	78,105	78 78
Total.....	====	====	=====	2,078,105	2,078,105	\$128 \$128

The securities issued by the PECO trusts represent Company-Obligated Mandatorily Redeemable Preferred Securities of a Partnership (COMRPS) having a distribution rate and liquidation value equivalent to the trust securities. The COMRPS are the sole assets of these trusts and represent limited partnership interests of PECO Energy Capital, L.P. (Partnership), a Delaware limited partnership. Each holder of a trust's securities is entitled to withdraw the corresponding number of COMRPS from the trust in exchange for the trust securities so held. Each series of COMRPS is supported by PECO's deferrable interest subordinated debentures, held by the Partnership, which bear interest at rates equal to the distribution rates on the related series of COMRPS.

The interest expense on the debentures is included in Other Income and Deductions in the Consolidated Statements of Income and is deductible for income tax purposes.

16. Common Stock

At December 31, 2001 and 2000, common stock without par value consisted of 600,000,000 and 600,000,000 shares authorized and 170,478,507 and 170,478,507 shares outstanding, respectively.

Stock Repurchase In January 2000, in connection with the Merger Agreement, PECO entered into a forward purchase agreement to purchase \$500 million of its

Edgar Filing: PECO ENERGY CO - Form 424B3

common stock from time to time. Settlement of this forward purchase agreement was, at PECO's election, on a physical, net share or net cash basis. In May 2000, PECO utilized a portion of the proceeds from the securitization of its stranded cost recovery to physically settle this agreement, resulting in the repurchase of 12 million shares of common stock for \$496 million. In connection with the settlement of this agreement, PECO received \$1 million in accumulated dividends on the repurchased shares and paid \$6 million of interest.

During 1997, PECO's Board of Directors authorized the repurchase of up to 25 million shares of its common stock from time to time through open-market, privately negotiated and/or other types of transactions in conformity with the rules of the SEC. Pursuant to these authorizations, PECO entered into forward purchase agreements to be settled from time to time, at PECO's election, on a physical, net share or net cash basis. PECO utilized the proceeds from the securitization of a portion of its stranded cost recovery in the first quarter of 1999, to physically settle these agreements, resulting in the purchase of 21 million shares of common stock for \$696 million. In connection with the settlement of these agreements, PECO received \$18 million in accumulated dividends on the repurchased shares and paid \$6 million of interest.

Shares Outstanding The following table details PECO's common stock and treasury stock:

17. Fair Value of Financial Assets and Liabilities

The carrying amounts and fair values of PECO's financial assets and liabilities as of December 31, 2001 and 2000 were as follows:

Edgar Filing: PECO ENERGY CO - Form 424B3

	2001		2000	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Non-derivatives:				
Liabilities.....				
Long-term debt (including amounts due within one year).	\$5,986	\$6,199	\$6,555	\$6,797
COMRPS.....	\$ 128	\$ 127	\$ 128	\$ 122
Mandatorily Redeemable.....				
Preferred Stock.....	\$ 19	\$ 10	\$ 37	\$ 30
Derivatives:				
Interest rate swaps.....	\$ (19)	\$ (19)	--	\$ (19)
Forward interest rate swaps.....	--	--	--	\$ 40

Cash and cash equivalents, customer accounts receivable and trust accounts for decommissioning nuclear plants are recorded at their fair value.

As of December 31, 2001 and 2000, PECO's carrying amounts of cash and cash equivalents and accounts receivable are representative of fair value because of the short-term nature of these instruments. Fair values of the trust accounts for decommissioning nuclear plants, long-term debt, COMRPS and Mandatorily Redeemable Preferred Stock are estimated based on quoted market prices for the same or similar issues. The fair value of PECO's interest rate swaps and power purchase and sale contracts is determined using quoted exchange prices, external dealer prices, or internal valuation models which utilize assumptions of future energy prices and available market pricing curves.

Financial instruments that potentially subject PECO to concentrations of credit risk consist principally of cash equivalents and customer accounts receivable. PECO places its cash equivalents with high-credit quality financial institutions. Generally, such investments are in excess of the Federal Deposit Insurance Corporation limits. Concentrations of credit risk with respect to customer accounts receivable are limited due to PECO's large number of customers and their dispersion across many industries.

In 1999, PECO entered into interest rate swaps to manage interest rate exposure in the aggregate notional amount of \$326 million. These swaps have been designated as cash-flow hedges under SFAS No. 133, and as such, as long as the hedge remains effective and the underlying transaction remains probable, changes in the fair value of these swaps will be recorded in accumulated other comprehensive income (loss) until earnings are affected by the variability of the cash flows being hedged.

The notional amount of derivatives do not represent amounts that are exchanged by the parties and, thus, are not a measure of PECO's exposure. The amounts exchanged are calculated on the basis of the notional or contract amounts, as well as on the other terms of the derivatives, which relate to interest rates and the volatility of these rates.

PECO would be exposed to credit-related losses in the event of non-performance by the counterparties that issued the derivative instruments. The credit exposure of derivatives contracts is represented by the fair value of contracts at the reporting date. PECO's interest rate swaps are documented under master agreements. Among other things, these agreements provide for a maximum credit exposure for both parties. Payments are required by the appropriate party when the maximum limit is reached.

Edgar Filing: PECO ENERGY CO - Form 424B3

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

On January 1, 2001, PECO deferred a non-cash gain of \$40 million, net of income taxes, in accumulated other comprehensive income, a component of shareholders' equity, to reflect the initial adoption of SFAS No. 133, as amended. SFAS No. 133 is applied to all derivative instruments and requires that such instruments be recorded in the balance sheet either as an asset or a liability measured at their fair value through earnings, with special accounting permitted for certain qualifying hedges.

For 2001, \$6 million (\$4 million, net of income taxes) was reclassified from accumulated other comprehensive income into earnings as a result of forecasted financing transactions no longer being probable.

As of December 31, 2001, \$15 million of deferred net gains on derivative instruments accumulated in other comprehensive income are expected to be reclassified to earnings during the next twelve months. Amounts in accumulated other comprehensive income related to interest rate cash flows are reclassified into earnings when the forecasted interest payment occurs.

18. Commitments and Contingencies

Environmental Issues PECO's operations have in the past and may in the future require substantial capital expenditures in order to comply with environmental laws. Additionally, under Federal and state environmental laws, PECO is generally liable for the costs of remediating environmental contamination of property now or formerly owned by PECO and of property contaminated by hazardous substances generated by PECO. PECO owns or leases a number of real estate parcels, including parcels on which its operations or the operations of others may have resulted in contamination by substances that are considered hazardous under environmental laws. PECO has identified 28 sites where former manufactured gas plant (MGP) activities have or may have resulted in actual site contamination. PECO is currently involved in a number of proceedings relating to sites where hazardous substances have been deposited and may be subject to additional proceedings in the future.

As of December 31, 2001 and 2000, PECO had accrued \$37 million and \$54 million, respectively, for environmental investigation and remediation costs, including \$27 million and \$30 million, respectively, for MGP investigation and remediation, that currently can be reasonably estimated. In conjunction with the corporate restructuring in January 2001, PECO transferred a portion of the environmental investigation and remediation costs to Generation. PECO cannot reasonably estimate whether it will incur other significant liabilities for additional investigation and remediation costs at these or additional sites identified by PECO, environmental agencies or others, or whether such costs will be recoverable from third parties.

Leases Minimum future operating lease payments, which consist primarily of lease payments for autos, as of December 31, 2001 were:

2002.....	\$ 2
2003.....	2
2004.....	2
2005.....	2
2006.....	2

Edgar Filing: PECO ENERGY CO - Form 424B3

Remaining years.....	3

Total minimum future lease payments	\$13
	===

Rental expense under operating leases totaled \$2 million, \$36 million, and \$54 million in 2001, 2000 and 1999, respectively.

Litigation

General. PECO is involved in various litigation matters. The ultimate outcome of such matters, while uncertain, is not expected to have a material adverse effect on its respective financial condition or results of operations.

F-34

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

19. Segment Information

As a result of the corporate restructuring in January 2001, PECO operates in one segment--energy delivery. Energy delivery consists of the retail electricity distribution and transmission business of PECO in southeastern Pennsylvania and the natural gas distribution business of PECO located in the Pennsylvania counties surrounding the City of Philadelphia. Prior to 2001, PECO operated in two other business segments, generation and enterprises. See Note 2--Corporate Restructuring.

Generation consisted of electric generating facilities, energy marketing operations and PECO's interests in Sithe and AmerGen. Enterprises consisted of competitive retail energy sales, energy and infrastructure services, communications and other investments weighted towards the communications, energy services and retail services industries. Prior to 2001, PECO evaluated the performance of its business segments based on Earnings Before Interest Expense and Income Taxes (EBIT). An analysis and reconciliation of PECO's business segment information to the respective information in the consolidated financial statements are as follows:

	Energy Delivery	Generation	Enterprises	Corporate	Intersegment Eliminations	Consolidate
Total Revenues:						
2000.....	\$ 3,373	\$2,803	\$ 697	\$ --	\$ (923)	\$ 5,950
1999.....	3,265	2,411	644	--	(842)	5,478
Intersegment Revenues:						
2000.....	\$ 4	\$ 872	\$ 47	\$ --	\$ (923)	\$ --
1999.....	--	842	--	--	(842)	--
EBIT (a):						
2000 (b).....	\$ 1,139	\$ 341	\$ (136)	\$ (172)	\$ --	\$ 1,172
1999.....	1,372	379	(212)	(194)	--	1,345
Depreciation and Amortization:						
2000.....	\$ 195	\$ 98	\$ 32	\$ --	\$ --	\$ 325
1999.....	108	125	4	--	--	237

Edgar Filing: PECO ENERGY CO - Form 424B3

Capital Expenditures:

2000.....	\$ 219	\$ 243	\$ 64	\$ 23	\$ --	\$ 549
1999.....	205	245	1	40	--	491
Total Assets:						
2000.....	\$13,100	\$1,648	\$ 991	\$ (963)	\$ --	\$14,776
1999.....	10,306	1,734	640	407	--	13,087

- (a) EBIT consists of operating income, equity in earnings (losses) of unconsolidated affiliates, and other income and expenses recorded in other, net with the exception of investment income. Investment income for 2000 and 1999 was \$50 million and \$52 million, respectively.
- (b) Includes non-recurring items of \$248 million for Merger-related expenses in 2000.

Equity in losses of communications joint ventures of \$45 million and \$38 million for 2000, and 1999, respectively, are included in the Enterprises business unit's EBIT. Equity in earnings of AmerGen and Sithe of \$4 million for 2000 are included in the generation business unit's EBIT.

20. Related Party Transactions

At December 31, 2000, PECO had a \$400 million payable to ComEd, which was repaid in the second quarter of 2001. The average annual interest rate on this payable for the period outstanding was 6.5%. Interest expense related to this payable for 2001 was \$8 million.

F-35

PECO ENERGY COMPANY AND SUBSIDIARY COMPANIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS--(Continued)

Effective January 1, 2001, Exelon contributed to PECO a \$2.0 billion non-interest bearing receivable related to Exelon's agreement to fund future income tax payments resulting from the collection of competitive transition charges. This receivable is reflected as a reduction of Shareholders' Equity in PECO's Consolidated Balance Sheets and is expected to be settled over the years 2002 through 2010. As of December 31, 2001, the balance of this receivable from Exelon was \$1.9 billion. In addition, at December 31, 2001, PECO had a \$60 million payable to Exelon related to stock options in 2000.

PECO paid common stock dividends of \$342 million to Exelon in 2001.

In connection with the transfer of the generation assets in the corporate restructuring, PECO entered into a PPA with Generation. See Note 2--Corporate Restructuring. Intercompany power purchases pursuant to the PPA for 2001 were \$1,162 million. As of December 31, 2001, PECO's payable related to the PPA was \$90 million. In addition, at December 31, 2001, PECO had a \$28 million payable to Generation for various services.

Effective January 1, 2001, upon the corporate restructuring, PECO receives a variety of corporate support services from BSC, including legal, human resources, financial and information technology services. Such services, provided at cost including applicable overhead, were \$36 million for 2001.

At December 31, 2001, there was a \$41 million payable to BSC. During 2001, PECO received intercompany interest income of \$10 million primarily related to bills and payroll paid on behalf of BSC.

Edgar Filing: PECO ENERGY CO - Form 424B3

PECO received services from Enterprises during 2001 for deployment of automated meters and meter reading services for \$24 million. At December 31, 2001, PECO had recorded a \$8 million payable to Enterprises.

21. Quarterly Data (Unaudited)

The data shown below include all adjustments which PECO considers necessary for a fair presentation of such amounts:

Quarter ended:	Operating Revenues		Operating Income		Income (Loss) Before Extraordinary Items and Cumulative Effect of a Change in Accounting Principle		Net Income (Loss)	
	2001	2000	2001	2000(a)	2001	2000(a)	2001	2000(a)
March 31.....	\$1,051	\$1,352	\$287	\$343	\$122	\$166	\$122	\$195
June 30.....	\$ 906	\$1,385	\$246	\$313	\$ 85	\$124	\$ 85	\$118
September 30.	\$1,051	\$1,629	\$258	\$449	\$104	\$238	\$104	\$235
December 31..	\$ 957	\$1,584	\$208	\$117	\$114	\$ (41)	\$114	\$ (41)

(a) Reflects incremental Merger expenses of \$11 million, \$9 million, \$13 million and \$215 million (\$129 million, net of tax) for each of the four quarters in 2000, respectively, which were reflected in Operating and Maintenance expense.
