**Table of Contents****Section 1 Registrant's Business and Operations****Item 1.01 Entry into a Material Definitive Agreement.**

On September 1, 2006, Macquarie Infrastructure Company ( MIC ), through a number of its majority-owned airport parking subsidiaries ( PCAA ), entered into a loan agreement providing for \$195 million of term loan borrowing. On September 1, 2006, PCAA drew down \$195 million and repaid two of its existing term loans totaling \$184 million, paid interest expense of \$1.9 million, and paid fees and expenses of \$4.9 million. PCAA also released approximately \$0.4 million from reserves. The remaining amount of the draw down, approximately \$4.6 million, will be used to fund maintenance and specific capital expenditures of the airport parking business.

The counterparty to the agreement is Capmark Finance Inc. The obligations under the credit agreements are secured by the assets of PCAA borrowing entities. The terms and conditions for the facility include events of default and representations and warranties that are generally customary for facilities of this type.

Selected details of the term and revolving credit facilities are presented below:

Lock Up Tests	<p>At three month intervals, the Borrower is required to achieve a Debt Service Coverage Constant Ratio of 1.00 to 1.00 with respect to the immediately preceding 12 month period.</p> <p>The Debt Service Coverage Constant Ratio is a ratio obtained by dividing the Cash Flow Available for Debt Service by a debt service payment obtained using the Loan Constant of 10.09%.</p> <p>If the Debt Service Coverage Constant Ratio test is not met, PCAA is required to remit Excess Cash to an Excess Cash Flow Reserve Account until the Debt Service Coverage Constant Ratio test is met at a test interval.</p> <p>The Excess Cash may be held, as determined by the Lender, as collateral for the Loan or applied against the principal amount until such time as Borrower satisfies the test.</p> <p>An event of default is triggered if the Borrower fails to make a payment of Excess Cash or fails to provide the Excess Cash calculation after receipt of notice that PCAA failed to satisfy the above test.</p>
Controlled Bank Accounts and Lockbox Account:	Operating income from collateral transferred to a lockbox account weekly.
Based on historical information, management expects that PCAA will meet the lock up test obligations on the first calculation date of December 1, 2006.
