PART I

Item 1. Business

Introduction

Goldman Sachs is a leading global investment banking, securities and investment management firm that provides a wide range of services worldwide to a substantial and diversified client base that includes corporations, financial institutions, governments and high-net-worth individuals. As of November 24, 2006, we operated offices in over 25 countries and approximately 42% of our 26,467 employees were based outside the United States.

Goldman Sachs is the successor to a commercial paper business founded in 1869 by Marcus Goldman. On May 7, 1999, we converted from a partnership to a corporation and completed an initial public offering of our common stock.

Our activities are divided into three segments: (i) Investment Banking, (ii) Trading and Principal Investments and (iii) Asset Management and Securities Services.

All references to 2006, 2005 and 2004 refer to our fiscal years ended, or the dates, as the context requires, November 24, 2006, November 25, 2005, and November 26, 2004, respectively.

When we use the terms Goldman Sachs, the firm, we, us and our, we mean The Goldman Sachs Group, Inc., a Delaware corporation, and its consolidated subsidiaries. References herein to the Annual Report on Form 10-K are to our Annual Report on Form 10-K for the fiscal year ended November 24, 2006.

Financial information concerning our business segments and geographic regions for each of 2006, 2005 and 2004 is set forth in Management's Discussion and Analysis of Financial Condition and Results of Operations, and the consolidated financial statements and the notes thereto, which are in Part II, Items 7, 7A and 8 of the Annual Report on Form 10-K.

Our Internet address is www.gs.com and the investor relations section of our web site is located at www.gs.com/our_firm/investor_relations/. We make available free of charge, on or through the investor relations section of our web site, annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as well as proxy statements, as soon as reasonably practicable after we electronically file such material with, or furnish it to, the U.S. Securities and Exchange Commission. Also posted on our web site, and available in print upon request of any shareholder to our Investor Relations Department, are our certificate of incorporation and by-laws, charters for our Audit Committee, Compensation Committee, and Corporate Governance and Nominating Committee, our Policy Regarding Director Independence Determinations, our Policy on Reporting of Concerns Regarding Accounting and Other Matters, our Corporate Governance Guidelines and our Code of Business Conduct and Ethics governing our directors, officers and employees. Within the time period required by the SEC and the New York Stock Exchange, we will post on our web site any amendment to the Code of Business Conduct and Ethics and any waiver applicable to any executive officer, director or senior financial officer (as defined in the Code). In addition, our web site includes information concerning purchases and sales of our equity securities by our executive officers and directors, as well as disclosure relating to certain non-GAAP financial measures (as defined in the SEC's Regulation G) that we may make public orally, telephonically, by webcast, by broadcast or by similar means from time to time.

Our Investor Relations Department can be contacted at The Goldman Sachs Group, Inc., 85 Broad Street, 17th Floor, New York, New York 10004, Attn: Investor Relations, telephone: 212-902-0300, e-mail: gs-investor-relations@gs.com.

Table of Contents

Cautionary Statement Pursuant to the Private Securities Litigation Reform Act of 1995

We have included or incorporated by reference in the Annual Report on Form 10-K, and from time to time our management may make, statements that may constitute forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements include statements other than historical information or statements of current condition and may relate to our future plans and objectives and results, among other things, and may also include our belief regarding the effect of various legal proceedings, as set forth under Legal Proceedings in Part I, Item 3 of the Annual Report on Form 10-K, as well as statements about the objectives and effectiveness of our liquidity policies, statements about trends in or growth opportunities for our businesses and statements about our investment banking transaction backlog, in Part II, Item 7 of the Annual Report on Form 10-K. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results may differ, possibly materially, from the anticipated results indicated in these forward-looking statements. Important factors that could cause actual results to differ from those in the forward-looking statements include, among others, those discussed below and under Risk Factors in Part I, Item 1A of the Annual Report on Form 10-K and Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of the Annual Report on Form 10-K.

In the case of statements about our investment banking transaction backlog, such statements are subject to the risk that the terms of these transactions may be modified or that they may not be completed at all; therefore, the net revenues, if any, that we actually earn from these transactions may differ, possibly materially, from those currently expected. Important factors that could result in a modification of the terms of a transaction or a transaction not being completed include, in the case of underwriting transactions, a decline in general economic conditions, outbreak of hostilities, volatility in the securities markets generally or an adverse development with respect to the issuer of the securities and, in the case of financial advisory transactions, a decline in the securities markets, an adverse development with respect to a party to the transaction or a failure to obtain a required regulatory approval.

Table of Contents

Segment Operating Results
(in millions)

		Year Ended November		
		2006	2005	2004
Investment Banking	Net revenues	\$ 5,629	\$ 3,671	\$ 3,374
	Operating expenses	4,062	3,258	2,973
	Pre-tax earnings	\$ 1,567	\$ 413	\$ 401
Trading and Principal Investments	Net revenues ⁽¹⁾	\$25,562	\$16,818	\$13,728
	Operating expenses ⁽¹⁾	14,962	10,600	8,688
	Pre-tax earnings	\$10,600	\$ 6,218	\$ 5,040
Asset Management and Securities Services	Net revenues	\$ 6,474	\$ 4,749	\$ 3,849
	Operating expenses	4,036	3,070	2,430
	Pre-tax earnings	\$ 2,438	\$ 1,679	\$ 1,419
Total	Net revenues ⁽¹⁾	\$37,665	\$25,238	\$20,951
	Operating expenses ⁽¹⁾⁽²⁾	23,105	16,965	14,275
	Pre-tax earnings	\$14,560	\$ 8,273	\$ 6,676

⁽¹⁾ Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported pre-tax earnings. See Management's Discussion and Analysis of Financial Condition and Results of Operations Results of Operations Financial Overview Operating Expenses Operating Expenses and Employees in Part II, Item 7 of the Annual Report on Form 10-K for further discussion of the effect of this reclassification.

⁽²⁾ Includes the following expenses that have not been allocated to our segments: (i) net provisions for a number of litigation and regulatory proceedings of \$45 million, \$37 million and \$103 million for the years ended November 2006, November 2005 and November 2004, respectively; (ii) \$62 million in connection with the establishment of our joint venture in China for the year ended November 2004; and (iii) the amortization of employee initial public offering awards, net of forfeitures, of \$19 million for the year ended November 2004.

(1) Includes a net provision of \$45 million for a number of litigation and regulatory proceedings, which has not been allocated to our segments.

Table of Contents

Business Segments

The primary products and activities of our business segments are set forth in the following chart:

Business Segment/<i>Component</i>	Primary Products and Activities
Investment Banking:

Financing services

Securities lending

Table of Contents

Investment Banking

Investment Banking represented 15% of 2006 net revenues. We provide a broad range of investment banking services to a diverse group of corporations, financial institutions, investment funds, governments and individuals and seek to develop and maintain long-term relationships with these clients as their lead investment bank.

Our current structure, which is organized by regional, industry and product groups, seeks to combine client-focused investment bankers with execution and industry expertise. We continually assess and adapt our organization to meet the demands of our clients in each geographic region. Through our commitment to teamwork, we believe that we provide services in an integrated fashion for the benefit of our clients.

Our goal is to make available to our clients the entire resources of the firm in a seamless fashion, with investment banking serving as front of the house. To accomplish this objective, we focus on coordination among our equity and debt underwriting businesses and our corporate risk and liability management businesses. This coordination is intended to assist our investment banking clients in managing their asset and liability exposures.

Our Investment Banking segment is divided into two components: Financial Advisory and Underwriting.

Financial Advisory

Financial Advisory includes advisory assignments with respect to mergers and acquisitions, divestitures, corporate defense activities, restructurings and spin-offs. Our mergers and acquisitions capabilities are evidenced by our significant share of assignments in large, complex transactions for which we provide multiple services, including one-stop acquisition financing and cross-border structuring expertise, as well as services in other areas of the firm, such as interest rate and currency hedging.

Underwriting

Underwriting includes public offerings and private placements of a wide range of securities and other financial instruments, including common and preferred stock, convertible and exchangeable securities, investment-grade debt, high-yield debt, sovereign and emerging market debt, municipal debt, bank loans, asset-backed securities and real estate-related securities, such as mortgage-related securities and the securities of real estate investment trusts.

Equity Underwriting. Equity underwriting has been a long-term core strength of Goldman Sachs. As with mergers and acquisitions, we have been particularly successful in winning mandates for large, complex transactions. We believe our leadership in worldwide initial public offerings and

Table of Contents

worldwide public common stock offerings reflects our expertise in complex transactions, prior experience and distribution capabilities.

Debt Underwriting. We engage in the underwriting and origination of various types of debt instruments, including investment-grade debt securities, high-yield debt securities, bank and bridge loans and emerging market debt securities, which instruments may be issued by, among others, corporate, sovereign and agency issuers. In addition, we underwrite and originate structured securities, which include mortgage-related securities and other asset-backed securities and collateralized debt obligations.

Trading and Principal Investments

Trading and Principal Investments represented 68% of 2006 net revenues. Trading and Principal Investments facilitates client transactions with a diverse group of corporations, financial institutions, investment funds, governments and individuals and takes proprietary positions through market making in, trading of and investing in fixed income and equity products, currencies, commodities and derivatives on these products. In addition, we engage in specialist and market-making activities on equities and options exchanges, and we clear client transactions on major stock, options and futures exchanges worldwide. In connection with our merchant banking and other investing activities, we make principal investments directly and through funds that we raise and manage.

To meet the needs of our clients, Trading and Principal Investments is diversified across a wide range of products. We believe our willingness and ability to take risk to facilitate client transactions distinguishes us from many of our competitors and substantially enhances our client relationships.

Our Trading and Principal Investments segment is divided into three components: Fixed Income, Currency and Commodities; Equities; and Principal Investments.

Fixed Income, Currency and Commodities and Equities

Fixed Income, Currency and Commodities (FICC) and Equities are large and diversified operations through which we engage in a variety of customer-driven and proprietary trading and investing activities.

In our customer-driven businesses, FICC and Equities strive to deliver high-quality service by offering broad market-making and market knowledge to our clients on a global basis. In addition, we use our expertise to take positions in markets, by committing capital and taking risk, to facilitate client transactions and to provide liquidity. Our willingness to make markets, commit capital and take risk in a broad range of fixed income, currency, commodity and equity products and their derivatives is crucial to our client relationships and to support our underwriting business by providing secondary market liquidity.

Table of Contents

A core activity in FICC and Equities is market making in a broad array of securities and products. For example, we are a primary dealer in many of the largest government bond markets around the world, including the United States, Japan and the United Kingdom. We are a member of the major futures exchanges, and also have interbank dealer status in the currency markets in New York, London, Tokyo and Hong Kong.

We generate trading net revenues from our customer-driven businesses in three ways:

First, in large, highly liquid markets, we undertake a high volume of transactions for modest spreads and fees.

Second, by capitalizing on our strong relationships and capital position, we undertake transactions in less liquid markets where spreads and fees are generally larger.

Finally, we structure and execute transactions that address complex client needs.

Our FICC and Equities businesses operate in close coordination to provide clients with services and cross-market knowledge and expertise.

In our proprietary activities in both FICC and Equities, we assume a variety of risks and devote resources to identify, analyze and benefit from these exposures. We capitalize on our analytical models to analyze information and make informed trading judgments, and we seek to benefit from perceived disparities in the value of assets in the trading markets and from macroeconomic and issuer-specific trends.

FICC

Our FICC business makes markets in and trades interest rate and credit products, mortgage-related securities and loan products and other asset-backed instruments, currencies and commodities, structures and enters into a wide variety of derivative transactions, and engages in proprietary trading and investing. FICC has five principal businesses: commodities; credit products; currencies; interest rate products, including money market instruments; and mortgage-related securities and loan products and other asset-backed instruments.

Commodities. We make markets in, and trade for our clients and our own account, a wide variety of commodities and commodity derivatives, including oil and oil products, metals, natural gas and electricity, and forest products. We are also a member of or have relationships with major commodities exchanges worldwide.

As part of our commodities business, we acquire and dispose of interests in, and engage in the development and operation of, electric power generation facilities. As of January 15, 2007, we owned interests in 19 power generation facilities located in the United States. Of these facilities, seven are fueled by natural gas, eight by coal and four by waste coal. Most of our power plants have contracted to sell their electricity to utilities under long-term agreements. We seek to generate attractive risk-adjusted returns from our portfolio of power plants that have entered into these contracts by using our commodities trading and capital markets expertise to selectively restructure the underlying power sale contracts and to refinance related project-level debt.

Credit Products. We offer to and trade for our clients a broad array of credit and credit-linked products all over the world, including credit derivatives, investment-grade corporate securities, high-yield securities, bank and secured loans (origination and trading), municipal securities, and emerging market and distressed debt. For example, we enter, as principal, into complex structured transactions designed to meet client needs.

Table of Contents

In addition, we increasingly provide credit through bridge and other loan facilities to a broad range of clients. Commitments that are extended for contingent acquisition financing are often short-term in nature, as borrowers often replace them with other funding sources. As part of our ongoing credit origination activities, we may seek to reduce our credit risk on commitments by syndicating all or substantial portions of commitments to other investors or, upon funding, by securitizing the positions through investment vehicles sold to other investors. Revenues from any syndications of these commitments are included in the debt underwriting business in our Investment Banking segment. See Management's Discussion and Analysis of Financial Condition and Results of Operations Contractual Obligations and Commitments in Part II, Item 7 of the Annual Report on Form 10-K for additional information on our commitments.

Our credit products business includes making significant long-term and short-term investments for our own account (sometimes investing together with our merchant banking funds) in a broad array of asset classes (including distressed debt) globally. We opportunistically invest in debt and equity securities and secured loans, and in private equity, real estate and other assets.

Currencies. We act as a dealer in foreign exchange and trade for our clients and ourselves in most currencies on exchanges and in cash and derivative markets globally.

Interest Rate Products. We trade and make markets in a variety of interest rate products, including interest rate swaps, options and other derivatives, and government bonds, as well as money market instruments, such as commercial paper, treasury bills, repurchase agreements and other highly liquid securities and instruments. This business includes our matched book, which consists of short-term collateralized financing transactions.

Mortgage Business. We make markets in and trade for our clients and ourselves commercial and residential mortgage-related securities and loan products (including prime, subprime and other nontraditional mortgages) and other asset-backed instruments. We regularly acquire large proprietary positions in these products with a view toward securitizing the underlying positions. We also originate and service commercial mortgages and service residential mortgages.

Equities

We make markets in, trade and act as a specialist for equities and equity-related products, structure and enter into equity derivative transactions, and engage in proprietary trading. In addition, we engage in insurance activities. We generate commissions from executing and clearing client transactions on major stock, options and futures exchanges worldwide through our Equities customer franchise and clearing activities.

Equities includes three principal businesses: our customer franchise business, principal strategies and specialist activities.

Customer Franchise Business. Our customer franchise business includes primarily customer-driven activities in the shares, convertible securities and equity derivatives markets. These activities also include clearing client transactions on major stock, options and futures exchanges worldwide, as well as our options specialist and market-making businesses. Our customer franchise business increasingly involves providing our clients with access to electronic low-touch equity trading platforms, and electronic trades now account for the majority of our customer trading activity in this business. However, a majority of our net revenues in this business continues to be derived from our traditional high-touch, non-automated handling of more complex trades. We expect both types of trading activities to remain important components of our customer franchise business.

Table of Contents

We trade equity securities and equity-related products, including convertible securities, options, futures and over-the-counter (OTC) derivative instruments, on a global basis as an agent, as a market maker or otherwise as a principal. As a principal, we facilitate client transactions, often by committing capital and taking risk, to provide liquidity to clients with large blocks of stocks or options. For example, we are active in the execution of large block trades. We also execute transactions as agent and offer clients direct electronic access to trading markets.

We are a member of most of the world's major stock, options and futures exchanges and marketplaces, including those located in New York, Chicago, London, Paris, Frankfurt, Tokyo and Hong Kong.

In the options and futures markets, we structure, distribute and execute derivatives on market indices, industry groups and individual company stocks to facilitate client transactions and our proprietary activities. We develop strategies and render advice with respect to portfolio hedging and restructuring and asset allocation transactions. We also create specially tailored instruments to enable sophisticated investors to undertake hedging strategies and to establish or liquidate investment positions. We are one of the leading participants in the trading and development of equity derivative instruments. We are an active participant in the trading of futures and options on most of the major exchanges in the United States, Europe and Asia. In options, we are a specialist and market maker on the International Securities Exchange, the Chicago Board Options Exchange and NYSE Arca and a market maker on the Boston Options Exchange, the Philadelphia Stock Exchange and the American Stock Exchange.

Principal Strategies. Our principal strategies business is a multi-strategy proprietary investment business that invests and trades for our own account. Principal strategies trades and invests our capital across global markets employing strategies that are primarily focused on public markets. Most strategies involve fundamental equities and relative value trading (which involves trading strategies designed to take advantage of perceived discrepancies in the relative value of financial instruments, including equity, equity-related and debt instruments). Other strategies involve event-driven investments (which focus on event-oriented special situations such as corporate restructurings, bankruptcies, recapitalizations, mergers and acquisitions, and legal and regulatory events) as well as convertible bond trading, various types of volatility trading and principal finance (which includes private structured investments in public or private companies).

Specialist Activities. Our specialist activities business consists of our stock and exchange-traded funds (ETF) specialist and market-making businesses. We engage in specialist and market-making activities on equities exchanges. In the United States, we are one of the leading stock specialists on the NYSE. For ETFs, we are a specialist on the NYSE, the American Stock Exchange and NYSE Arca.

Insurance Activities. Through our insurance subsidiaries, we own closed blocks of variable annuity and variable life insurance contracts. In 2006, we began to participate opportunistically in both the life and annuity reinsurance and property catastrophe reinsurance businesses.

Principal Investments

Principal Investments primarily represents net revenues from four primary sources: returns on corporate and real estate investments, overrides on corporate and real estate investments, our investment in the convertible preferred stock of Sumitomo Mitsui Financial Group, Inc. (SMFG) and our investment in the ordinary shares of Industrial and Commercial Bank of China Limited (ICBC).

Returns on Corporate and Real Estate Investments. As of November 2006, the aggregate carrying value of our principal investments held directly or through our merchant banking funds, excluding our investment in the convertible preferred stock of SMFG and the ordinary shares of ICBC, was \$4.26 billion, comprised of corporate principal investments with an aggregate carrying value of \$3.68 billion and real estate investments with an aggregate carrying value of \$588 million.

Table of Contents

In addition, as of November 2006, we had outstanding unfunded equity capital commitments of up to \$6.36 billion.

Overrides. Consists of the increased share of the income and gains derived from our merchant banking funds when the return on a fund's investments over the life of the fund exceeds certain threshold returns (typically referred to as an "override"). Overrides are recognized in net revenues when all material contingencies have been resolved.

SMFG. Our investment in the convertible preferred stock of SMFG is generally nontransferable without the consent of SMFG but is freely convertible into SMFG common stock. As of November 2006, we had hedged two-thirds of the common stock underlying our investment in SMFG. Restrictions on our ability to hedge or sell the remaining shares will lapse on February 7, 2007. As of November 2006, the carrying value of our investment in the SMFG preferred stock was \$4.51 billion. See Note 2 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further discussion of our investment in SMFG.

ICBC. Our investment in the ordinary shares of ICBC was acquired on April 28, 2006. The ordinary shares acquired from ICBC are subject to transfer restrictions that, among other things, prohibit any sale, disposition or other transfer until April 28, 2009. From April 28, 2009 to October 20, 2009, we may transfer up to 50% of the aggregate ordinary shares of ICBC that we owned as of October 20, 2006. We may transfer the remaining shares after October 20, 2009. As of November 2006, the carrying value of our investment in the ordinary shares of ICBC was \$5.19 billion. A portion of our interest is held by investment funds managed by Goldman Sachs. For further information regarding our investment in the ordinary shares of ICBC, see "Management's Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies Fair Value Principal Investments" in Part II, Item 7 of the Annual Report on Form 10-K.

Asset Management and Securities Services

Asset Management and Securities Services represented 17% of 2006 net revenues. Our Asset Management business provides investment advisory and financial planning services and offers investment products (primarily through separate accounts and funds) to a diverse group of institutions and individuals worldwide and primarily generates revenues in the form of management and incentive fees. Securities Services provides prime brokerage services, financing services and securities lending services to institutional clients, including hedge funds, mutual funds, pension funds and foundations, and to high-net-worth individuals worldwide, and generates revenues primarily in the form of interest rate spreads or fees.

Our Asset Management and Securities Services segment is divided into two components: Asset Management and Securities Services.

Table of Contents

Asset Management

We offer a broad array of investment strategies, advice and planning. We provide asset management services and offer investment products (primarily through separate accounts and funds) across all major asset classes: money markets, fixed income, equities and alternative investments (including hedge funds, private equity, real estate, currencies, commodities and asset allocation strategies). Through our subsidiary, The Ayco Company, L.P. (Ayco), we also provide fee-based financial counseling and financial education in the United States.

Assets under management (AUM) typically generate fees as a percentage of asset value. In certain circumstances, we are also entitled to receive incentive fees based on a percentage of a fund's return or when the return on assets under management exceeds specified benchmark returns or other performance targets. Incentive fees are recognized when the performance period ends and they are no longer subject to adjustment. We have numerous incentive fee arrangements, many of which have annual performance periods that end on December 31. For that reason, incentive fees have been seasonally weighted to our first quarter.

AUM includes our mutual funds, alternative investment funds and separately managed accounts for institutional and individual investors. Alternative investments include our merchant banking funds, which generate revenues as described below under Management of Merchant Banking Funds. AUM does not include assets in brokerage accounts, which generate commissions, mark-ups and spreads. Net revenues from brokerage accounts are included in our Trading and Principal Investments segment. Increasingly, many of our individual clients' brokerage accounts pay fees based on the assets in their accounts rather than commissions on transactional activity in the accounts. AUM also does not include non-fee-paying assets, including money market assets that were transferred to Goldman Sachs Bank USA (GS Bank) during 2006.

The amount of AUM is set forth in the graph below. In the following graph, as well as in the following tables, substantially all assets under management are valued as of November 30.

Assets Under Management

(in billions)

11

Table of Contents

The following table sets forth AUM by asset class:

Assets Under Management by Asset Class ⁽¹⁾
(in billions)

	As of November 30		
	2006	2005	2004
Asset Class			
Alternative investments ⁽²⁾	\$145	\$110	\$95
Equity	215	167	133
Fixed income	198	154	134
Total non-money market assets	558	431	362
Money markets	118	101	90
Total assets under management	\$676	\$532	\$452

⁽¹⁾ In the first quarter of 2006, we changed the methodology for classifying certain non-money market assets. The changes were made primarily to reclassify certain assets allocated to external investment managers out of alternative investment assets and to reclassify currency funds into alternative investment assets. The changes did not impact total assets under management and prior periods have been reclassified to conform to the current presentation.

⁽²⁾ Primarily includes hedge funds, private equity, real estate, currencies, commodities and asset allocation strategies.

Clients. Our clients are institutions and individuals, including both high-net-worth and retail investors. We access institutional and high-net-worth clients through both direct and third-party channels and retail clients primarily through third-party channels. Our institutional clients include pension funds, governmental organizations, corporations, insurance companies, banks, foundations and endowments. In third-party distribution channels, we distribute our mutual funds, alternative investment funds and separately managed accounts through brokerage firms, banks, insurance companies and other financial intermediaries. Our clients are located worldwide.

The table below sets forth the amount of AUM by distribution channel and client category:

Assets Under Management by Distribution Channel ⁽¹⁾
(in billions)

	As of November 30		
	2006	2005	2004
Distribution Channel			
Directly Distributed			
Institutional	\$296	\$226	\$183
High-net-worth individuals	177	148	130

Third-Party Distributed			
Institutional, high-net-worth individuals and retail	203	158	139
Total	\$676	\$532	\$452

(1) The primary investment vehicles for these assets under management are separately managed accounts and commingled vehicles, such as mutual funds and private investment funds.

Management of Merchant Banking Funds. Goldman Sachs sponsors numerous corporate and real estate private investment funds. Our strategy with respect to these funds generally is to invest opportunistically to build a portfolio of investments that is diversified by industry, product type, geographic region, and transaction structure and type. Our corporate investment funds pursue, on a

Table of Contents

global basis, long-term investments in equity and debt securities in privately negotiated transactions, leveraged buyouts, acquisitions and investments in funds managed by external parties. Our real estate investment funds invest in real estate operating companies, debt and equity interests in real estate assets, and other real estate-related investments.

Since inception, we have raised \$70 billion of committed equity capital in these funds, of which \$51 billion relates to our corporate funds and \$19 billion relates to our real estate funds. As of November 2006, \$45 billion of the committed equity capital was funded and the amount of AUM remaining in these funds after distributions was \$44 billion.

Merchant banking activities generate three primary revenue streams. First, we receive a management fee that is generally a percentage of a fund's committed capital, invested capital, total gross acquisition cost or asset value. These annual management fees are included in our Asset Management net revenues. Second, Goldman Sachs, as a substantial investor in some of these funds, is allocated its proportionate share of the funds' unrealized appreciation or depreciation arising from changes in fair value as well as gains and losses upon realization. Third, after a fund has achieved a minimum return for fund investors, we receive an increased share of the fund's income and gains that is a percentage of the income and gains from the fund's investments. The second and third of these revenue streams are included in Principal Investments within our Trading and Principal Investments segment.

Securities Services

Securities Services provides prime brokerage services, financing services and securities lending services to institutional clients, including hedge funds, mutual funds, pension funds and foundations, and to high-net-worth individuals worldwide.

Prime brokerage services. We offer prime brokerage services to our clients, allowing them the flexibility to trade with most brokers while maintaining a single source for financing and consolidated portfolio reports. Our prime brokerage business provides clearing and custody in 45 markets and provides consolidated multi-currency accounting and reporting, offshore fund administration and other ancillary services.

Financing services. A central element of our prime brokerage business involves providing financing to our clients for their securities trading activities through margin and securities loans that are collateralized by securities, cash or other acceptable collateral.

Securities lending services. Securities lending services principally involve the borrowing and lending of securities to cover clients' and Goldman Sachs' short sales and otherwise to make deliveries into the market. In addition, we are an active participant in the broker-to-broker securities lending business and the third-party agency lending business. Net revenues in securities lending services are, as a general matter, weighted toward our second and third quarters each year due to seasonally higher activity levels in Europe.

Global Investment Research

Global Investment Research provides fundamental research on companies, industries, economies, currencies, commodities and macro strategy research on a worldwide basis.

Global Investment Research employs a team approach that as of November 2006 provided research coverage of approximately 2,750 companies worldwide and over 50 national economies. This is accomplished by the following departments:

The Equity Research Departments provide fundamental analysis, earnings forecasts and investment opinions for equity securities;

The Credit Research Department provides fundamental analysis, forecasts and investment opinions as to investment-grade and high-yield corporate bonds and credit derivatives;

Table of Contents

The Economic Research Department formulates macroeconomic forecasts for economic activity, foreign exchange and interest rates;

The Commodities Research Department provides research on the commodity markets; and

The Strategy Research Department provides equity market forecasts, opinions on both asset and industry sector allocation, equity trading strategies, credit trading strategies and options research.

Further information regarding research at Goldman Sachs is provided below under Regulation Regulations Applicable in and Outside the United States and Legal Proceedings Research Independence Matters in Part I, Item 3 of the Annual Report on Form 10-K.

Technology

Goldman Sachs is committed to the ongoing development, maintenance and use of technology throughout the organization. Our technology initiatives can be broadly categorized into four efforts:

Enhancing client service through increased connectivity and the provision of value-added, tailored products and services;

Improving our trading, execution and clearing capabilities;

Risk management; and

Overall efficiency, productivity and control.

We have tailored our services to our clients by providing them with electronic access to our products and services. In particular, we provide global electronic trading and information distribution capabilities covering many of our fixed income, currency, commodity, equity and mutual fund products around the world.

Electronic commerce and technology have changed and will continue to change the ways that securities and other financial products are traded, distributed and settled. This creates both opportunities and challenges for our businesses. We remain committed to being at the forefront of technological innovation in the global capital markets.

Business Continuity and Information Security

Business continuity and information security are high priorities for Goldman Sachs. Our Business Continuity Program has been developed to provide reasonable assurance of business continuity in the event of disruptions at the firm's critical facilities and to comply with NYSE and National Association of Securities Dealers, Inc. regulatory requirements. The key elements of the program are crisis management, business recovery, systems and data recovery, people recovery facilities and process improvement. In the area of information security, we have developed and implemented a framework of principles, policies and technology to protect the information assets of the firm and our clients. Safeguards are applied to maintain the confidentiality, integrity and availability of information resources.

Employees

Management believes that a major strength and principal reason for the success of Goldman Sachs is the quality and dedication of our people and the shared sense of being part of a team. We strive to maintain a work environment that fosters professionalism, excellence, diversity, cooperation among our employees worldwide and high standards of business ethics.

Instilling the Goldman Sachs culture in all employees is a continuous process, in which training plays an important part. All employees are offered the opportunity to participate in education and

Table of Contents

periodic seminars that we sponsor at various locations throughout the world. Another important part of instilling the Goldman Sachs culture is our employee review process. Employees are reviewed by supervisors, co-workers and employees they supervise in a 360-degree review process that is integral to our team approach.

As of November 2006, we had 26,467 employees, including 1,326 employees of Goldman Sachs consolidated property management and loan servicing subsidiaries and excluding 3,868 employees of certain consolidated entities that are held for investment purposes only. Consolidated entities held for investment purposes include entities that are held strictly for capital appreciation, have a defined exit strategy and are engaged in activities that are not closely related to our principal businesses.

Competition

The financial services industry and all of our businesses are intensely competitive, and we expect them to remain so. Our competitors are other brokers and dealers, investment banking firms, commercial banks, insurance companies, investment advisers, mutual funds, hedge funds, private equity funds and merchant banks. We compete with some of our competitors globally and with others on a regional, product or niche basis. Our competition is based on a number of factors, including transaction execution, our products and services, innovation, reputation and price.

We also face intense competition in attracting and retaining qualified employees. Our ability to continue to compete effectively in our businesses will depend upon our ability to attract new employees and retain and motivate our existing employees.

Over time, there has been substantial consolidation and convergence among companies in the financial services industry, due in part to U.S. federal legislation that has expanded the activities permissible for firms affiliated with a U.S. bank. In particular, a number of large commercial banks, insurance companies and other broad-based financial services firms have established or acquired broker-dealers or have merged with other financial institutions. Many of these firms have the ability to offer a wide range of products, from loans, deposit-taking and insurance to brokerage, asset management and investment banking services, which may enhance their competitive position. They also have the ability to support investment banking and securities products with commercial banking, insurance and other financial services revenues in an effort to gain market share, which has resulted in pricing pressure in certain of our businesses and could result in pricing pressure in other of our businesses.

Moreover, we have faced, and expect to continue to face, pressure to retain market share by committing capital to businesses or transactions on terms that offer returns that may not be commensurate with their risks. In particular, corporate clients increasingly seek such commitments (such as agreements to participate in their commercial paper backstop or other loan facilities) from financial services firms in connection with investment banking and other assignments. We provide these commitments either through our William Street entities, primarily for investment-grade clients, or through Goldman Sachs Credit Partners L.P. or our other subsidiaries, primarily for other clients. With respect to substantially all of the William Street commitments, SMFG provides us with credit loss protection that is generally limited to 95% of the first loss we realize on approved loan commitments, up to a maximum of \$1.00 billion. In addition, subject to the satisfaction of certain conditions, upon our request, SMFG will provide protection for 70% of the second loss on such commitments, up to a maximum of \$1.13 billion. We also use other financial instruments to mitigate credit risks related to certain William Street commitments not covered by SMFG. See Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II, Item 7 of the Annual Report on Form 10-K and Note 6 to our consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for more information regarding the William Street entities and for a description of the credit loss protection provided by SMFG. An increasing number of our commitments in connection with investment banking and other assignments do not meet the

Table of Contents

criteria established for the William Street entities and do not benefit from the SMFG loss protection. These commitments are issued through Goldman Sachs Credit Partners L.P. or our other subsidiaries.

The trend toward consolidation and convergence has significantly increased the capital base and geographic reach of some of our competitors. This trend has also hastened the globalization of the securities and other financial services markets. As a result, we have had to commit capital to support our international operations and to execute large global transactions. To take advantage of some of our most significant challenges and opportunities, we will have to compete successfully with financial institutions that are larger and better capitalized and that may have a stronger local presence and longer operating history outside the United States.

We have experienced intense price competition in some of our businesses in recent years. There has been considerable pressure in the pricing of block trades. Also, equity and debt underwriting discounts, as well as trading spreads, have been under pressure for a number of years and the ability to execute trades electronically, through the Internet and through other alternative trading systems, has increased the pressure on trading commissions. It appears that this trend toward electronic and other low-touch, low-commission trading will continue. We believe that we will continue to experience competitive pressures in these and other areas in the future as some of our competitors seek to obtain market share by reducing prices.

Regulation

Goldman Sachs, as a participant in the securities and commodity futures and options industries, is subject to extensive regulation in the United States and the other countries in which we operate. As a matter of public policy, regulatory bodies around the world are charged with safeguarding the integrity of the securities and other financial markets and with protecting the interests of clients participating in those markets. They are not, however, charged with protecting the interests of Goldman Sachs shareholders or creditors.

Broker-dealers, in particular, are subject to regulations that cover all aspects of the securities business, including sales methods, trade practices, use and safekeeping of clients' funds and securities, capital structure, recordkeeping, the financing of clients' purchases, and the conduct of directors, officers and employees. A number of our affiliates are regulated by investment advisory laws in the countries in which we operate. See Risk Factors. Our businesses and those of our clients are subject to extensive and pervasive regulation around the world in Part I, Item 1A of the Annual Report on Form 10-K for a further discussion of the effect that regulation may have on our businesses.

Regulation in the United States

In the United States, the SEC is the federal agency responsible for the administration of the federal securities laws. The Goldman Sachs Group, Inc. is subject to regulation by the SEC as a Consolidated Supervised Entity. As such, it is subject to group-wide supervision and examination by the SEC and to minimum capital requirements on a consolidated basis. As part of a Consolidated Supervised Entity, Goldman, Sachs & Co. (GS&Co.), our principal U.S. broker-dealer, is permitted to calculate its regulatory capital requirements in accordance with the market and credit risk standards of Appendix E of Rule 15c3-1 under the Securities Exchange Act of 1934.

GS&Co. is registered as a broker-dealer and as an investment adviser with the SEC and as a broker-dealer in all 50 states and the District of Columbia. Self-regulatory organizations, such as the NYSE and NASD, adopt rules that apply to, and examine, broker-dealers such as GS&Co. In addition, state securities and other regulators also have regulatory or oversight authority over GS&Co. Similarly, our businesses are also subject to regulation by various non-U.S. governmental and regulatory bodies and self-regulatory authorities in virtually all countries where we have offices. Goldman Sachs Execution & Clearing, L.P. (GSEC) and two of its subsidiaries are registered

Table of Contents

U.S. broker-dealers and are regulated by the SEC and NYSE, and GSEC is also regulated by the NASD. Goldman Sachs Financial Markets, L.P. is registered with the SEC as an OTC derivatives dealer and conducts certain OTC derivatives businesses.

The NYSE and the NASD, which have regulatory authority over a large amount of our businesses and activities, have announced that they intend to merge their regulatory operations into a single regulatory body, expected to begin operations in the second quarter of 2007.

The commodity futures and commodity options industry in the United States is subject to regulation under the Commodity Exchange Act. The Commodity Futures Trading Commission is the federal agency charged with the administration of the Commodity Exchange Act. Several of Goldman Sachs subsidiaries, including GS&Co. and GSEC, are registered with the CFTC and act as futures commission merchants, commodity pool operators or commodity trading advisors and are subject to the Commodity Exchange Act. The rules and regulations of various self-regulatory organizations, such as the Chicago Board of Trade and the Chicago Mercantile Exchange, other futures exchanges and the National Futures Association, also govern the commodity futures and commodity options businesses of these entities.

GS&Co. and GSEC are subject to Rule 15c3-1 of the SEC and Rule 1.17 of the CFTC, which specify uniform minimum net capital requirements and also effectively require that a significant part of the registrants' assets be kept in relatively liquid form. GS&Co. and GSEC have elected to compute their minimum capital requirements in accordance with the Alternative Net Capital Requirement as permitted by Rule 15c3-1. As of November 2006, GS&Co. and GSEC had net capital in excess of their minimum capital requirements. In addition to its alternative minimum net capital requirements, GS&Co. is also required to hold tentative net capital in excess of \$1 billion and net capital in excess of \$500 million in accordance with the market and credit risk standards of Appendix E of Rule 15c3-1. GS&Co. is required to notify the SEC in the event that its tentative net capital is less than \$5 billion. As of November 2006, GS&Co. had tentative net capital and net capital in excess of both the minimum and the notification requirements. These net capital requirements may have the effect of prohibiting these entities from distributing or withdrawing capital and may require prior notice to the SEC for certain withdrawals of capital. See Note 15 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.

Goldman Sachs has established three limited purpose trust companies under state or federal law. They are not permitted to and do not accept deposits (other than as incidental to their trust activities) or make loans and, as a result, are not considered to be banks for purposes of the Bank Holding Company Act, nor are they insured by the FDIC or subject to the Community Reinvestment Act. These entities and their regulators are: The Goldman Sachs Trust Company, N.A., a national bank that is limited to having only trust powers, is regulated by the Office of the Comptroller of the Currency and is a member bank of the Federal Reserve System; The Goldman Sachs Trust Company, a New York limited purpose trust company that is regulated by the New York State Banking Department; and The Goldman Sachs Trust Company of Delaware, a Delaware limited purpose trust company that is regulated by the Office of the Delaware State Bank Commissioner.

Goldman Sachs has established GS Bank, a wholly owned industrial bank, to extend credit and to take deposits, other than demand deposits. GS Bank is regulated by the FDIC and the State of Utah Department of Financial Institutions and is subject to minimum capital requirements. As of November 2006, GS Bank was in compliance with all regulatory capital requirements. Because it does not accept demand deposits, GS Bank is not considered to be a bank for purposes of the Bank Holding Company Act. The deposits maintained at GS Bank are insured by the FDIC to the extent provided by law.

J. Aron & Company is authorized by the Federal Energy Regulatory Commission to sell wholesale physical power at market-based rates. As a FERC-authorized power marketer, J. Aron & Company is subject to regulation under the Federal Power Act and FERC regulations.

Table of Contents

In addition, as a result of our interests in electric power generation facilities, we are subject to extensive and evolving energy, environmental and other governmental laws and regulations, as discussed under Risk Factors Our power generation interests subject us to the risks associated with owning power generation facilities in Part I, Item 1A of the Annual Report on Form 10-K.

Our U.S. insurance subsidiaries are subject to state insurance regulation in the states in which they are domiciled and in the other states in which they are licensed. A number of our other businesses, including our lending and mortgage businesses, require us to obtain licenses and adhere to applicable regulations in the states in which we conduct these businesses.

The USA PATRIOT Act of 2001 contains anti-money laundering and financial transparency laws and mandates the implementation of various new regulations applicable to broker-dealers and other financial services companies, including standards for verifying client identification at account opening, and obligations to monitor client transactions and report suspicious activities. Through these and other provisions, the USA PATRIOT Act of 2001 seeks to promote the identification of parties that may be involved in terrorism or money laundering. Anti-money laundering laws outside the United States contain some similar provisions. The obligation of financial institutions, including Goldman Sachs, to identify their clients, to watch for and report suspicious transactions, to respond to requests for information by regulatory authorities and law enforcement agencies, and to share information with other financial institutions, has required the implementation and maintenance of internal practices, procedures and controls that have increased, and may continue to increase, our costs, and any failure with respect to our programs in this area could subject us to substantial liability and regulatory fines.

Regulation Outside the United States

Goldman Sachs provides investment services in and from the United Kingdom under the regulation of the Financial Services Authority (FSA). Goldman Sachs International (GSI), our regulated U.K. broker-dealer, is subject to the capital requirements of the FSA. As of November 2006, GSI was in compliance with the FSA capital requirements. Other subsidiaries, including Goldman Sachs International Bank, are also regulated by the FSA.

Various Goldman Sachs entities are regulated by the banking and regulatory authorities of the other European countries in which Goldman Sachs operates, including, among others, the Federal Financial Supervisory Authority (BaFin) and the Bundesbank in Germany, Banque de France and the Autorité des Marchés Financiers in France, Banca d'Italia and the Commissione Nazionale per le Società e la Borsa (CONSOB) in Italy, the Federal Financial Markets Service in Russia and the Swiss Federal Banking Commission. Goldman Sachs entities are also regulated by the European securities, derivatives and commodities exchanges of which they are members.

The investment services that are subject to oversight by the FSA and other European regulators are regulated in accordance with European Union directives requiring, among other things, compliance with certain capital adequacy standards, customer protection requirements and conduct of business rules. These standards, requirements and rules are similarly implemented, under the same directives, throughout the European Union and are broadly comparable in scope and purpose to the regulatory capital and customer protection requirements imposed under the SEC and CFTC rules. Some European Union directives also permit local regulation in each jurisdiction, including those in which we operate, to be more restrictive than the requirements of such directives and these local requirements can result in certain competitive disadvantages to Goldman Sachs.

The European Union's Markets in Financial Instruments Directive (Directive 2004/39/EC) will affect several of our subsidiaries by imposing detailed pan-European requirements in areas such as internal organization (including conflict management, outsourcing and recordkeeping), best execution, real-time disclosure of completed transactions in shares, quoting obligations for internalized client orders in shares, transaction reporting to regulators, client classification and documentation, and

Table of Contents

regulation of investment services related to commodity derivatives. European Union member states were required to adopt national laws, regulations and administrative provisions complying with the directive by January 31, 2007 and must apply these laws, regulations and provisions by November 1, 2007. The United Kingdom has met the adopting deadline and is expected to meet the deadline for applying the laws and regulations. Therefore, we anticipate that we will be subject to substantial new requirements beginning November 1, 2007, which could lead to business disruptions or require us to change certain of our business practices. Certain other member states have not yet adopted the required laws and regulations and may not meet the November 1, 2007 deadline for applying them. While we are preparing for compliance with the implementing laws and regulations, we remain subject to continuing regulatory uncertainty concerning the national implementing laws and regulations.

Goldman Sachs Japan Co., Ltd. (GSJCL), our regulated Japanese broker-dealer, is subject to the capital requirements of Japan's Financial Services Agency. As of November 2006, GSJCL was in compliance with its capital adequacy requirements. GSJCL is also regulated by the Tokyo Stock Exchange, the Osaka Securities Exchange, the Tokyo Financial Exchange, the Japan Securities Dealers Association, the Tokyo Commodity Exchange and the Ministry of Economy, Trade and Industry in Japan. Prior to October 1, 2006, Goldman Sachs (Japan) Ltd., the predecessor to GSJCL, was our primary regulated subsidiary based in Japan.

Also in Asia, the Securities and Futures Commission in Hong Kong, the Monetary Authority of Singapore, the China Securities Regulatory Commission and the Korean Financial Supervisory Service, among others, regulate various of our subsidiaries and also have capital standards and other requirements comparable to the rules of the SEC.

Various Goldman Sachs entities are regulated by the banking and regulatory authorities of other non-U.S. countries in which Goldman Sachs operates, including, among others, Brazil, India and Dubai. In addition, certain of our insurance subsidiaries are regulated by the Bermuda Registrar of Companies.

Regulations Applicable in and Outside the United States

The U.S. and non-U.S. government agencies, regulatory bodies and self-regulatory organizations, as well as state securities commissions in the United States, are empowered to conduct administrative proceedings that can result in censure, fine, the issuance of cease and desist orders, or the suspension or expulsion of a broker-dealer or its directors, officers or employees. From time to time, our subsidiaries have been subject to investigations and proceedings, and sanctions have been imposed for infractions of various regulations relating to our activities, none of which has had a material adverse effect on us or our businesses.

In 2004, the Basel Committee on Banking Supervision issued the Basel II capital standards, which are designed to promote enhanced risk management practices among large, international financial services firms by aligning regulatory capital requirements more closely with the underlying risks faced by these firms. Under the currently proposed time schedule, GSI, as well as our other subsidiaries in the United Kingdom and elsewhere in Europe, would become subject to the Basel II requirements on January 1, 2008. The Consolidated Supervised Entity rules described above under Regulation in the United States, which provide for group-wide supervision, are consistent with Basel II. Complying with these new standards has required us to develop and apply new and sophisticated measurement techniques to determine our regulatory capital adequacy. As an increasing number of financial institutions become subject to Basel II, new interpretations may arise, and harmonization among regulators could then impact the regulatory capital requirements under which we operate as a Consolidated Supervised Entity, as well as the requirements for some of our regulated subsidiaries.

Our specialist businesses are subject to extensive regulation by a number of securities exchanges. The rules of these exchanges generally require our specialists to maintain orderly

Table of Contents

markets in the securities in which they are specialists. These requirements, in turn, may require us to commit significant amounts of capital to our specialist businesses.

The research areas of investment banks have been and remain the subject of regulatory scrutiny. The SEC, NYSE and NASD have adopted rules imposing restrictions on the interaction between equity research analysts and investment banking personnel at member securities firms. Various non-U.S. jurisdictions have imposed both substantive and disclosure-based requirements with respect to research and may impose additional regulations. In 2003, GS&Co. agreed to a global settlement with certain federal and state securities regulators and self-regulatory organizations to resolve investigations into equity research analysts' alleged conflicts of interest. The global settlement includes certain restrictions and undertakings that have imposed additional costs and limitations on the conduct of our businesses, including restrictions on the interaction between research and investment banking departments.

In connection with the research settlement, we have also subscribed to a voluntary initiative imposing restrictions on the allocation of shares in initial public offerings to executives and directors of public companies. The FSA in the United Kingdom has imposed requirements on the conduct of the allocation process in equity and fixed income securities offerings (including initial public offerings and secondary distributions). The SEC, NYSE and NASD have proposed rules that would further affect the manner in which securities are distributed and allocated in registered public offerings. We cannot fully predict the practical effect that these proposed requirements will have on our business, and the SEC, NYSE, NASD and non-U.S. regulators, such as the FSA, may adopt additional and more stringent rules with respect to offering procedures and the management of conflicts of interest in the future.

Our investment management businesses are subject to significant regulation in numerous jurisdictions around the world relating to, among other things, the safeguarding of client assets and our management of client funds.

As discussed above, many of our subsidiaries are subject to regulatory capital requirements in jurisdictions throughout the world. Subsidiaries not subject to separate regulation may hold capital to satisfy local tax guidelines, rating agency requirements or internal policies, including policies concerning the minimum amount of capital a subsidiary should hold based upon its underlying risk.

Certain of our businesses are subject to compliance with regulations enacted by U.S. federal and state governments, the European Union or other jurisdictions and/or enacted by various regulatory organizations or exchanges relating to the privacy of client information, and any failure to comply with these regulations could expose us to liability and/or reputational damage.

Item 1A. Risk Factors

We face a variety of risks that are substantial and inherent in our businesses, including market, liquidity, credit, operational, legal and regulatory risks. The following are some of the more important factors that could affect our businesses.

Our businesses may be adversely affected by conditions in the global financial markets and economic conditions generally.

Our business, by its nature, does not produce predictable earnings. While we have achieved record earnings per common share in each of our last three fiscal years, reflecting a favorable trading and investing environment and an increase in investment banking activity, an adverse change in these market conditions may adversely affect our results of operations.

Our businesses are materially affected by conditions in the global financial markets and economic conditions generally, and these conditions may change suddenly and dramatically. A favorable business environment is generally characterized by, among other factors, high global gross domestic product growth, stable geopolitical conditions, transparent and efficient capital markets, low

Table of Contents

inflation, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions, which can be caused by outbreaks of hostilities or other geopolitical instability, declines in business confidence, increases in inflation, corporate, political or other scandals that reduce investor confidence in capital markets, natural disasters or pandemics or a combination of these or other factors, have adversely affected, and may in the future adversely affect, our business and profitability in many ways, including the following:

We have been operating in a low interest rate market for the past several years. Increasing or high interest rates and/or widening credit spreads, especially if such changes are rapid, may create a less favorable environment for certain of our businesses.

We have been committing increasing amounts of capital in many of our businesses and generally maintain large trading, specialist and investing positions. Market fluctuations and volatility may adversely affect the value of those positions, including, but not limited to, our interest rate and credit products, currency, commodity and equity positions, and our merchant banking investments, or may reduce our willingness to enter into new transactions. From time to time, we have incurred significant trading losses in periods of market turbulence. Conversely, certain of our trading businesses depend on market volatility to provide trading and arbitrage opportunities, and decreases in volatility may reduce these opportunities and adversely affect the results of these businesses.

Industry-wide declines in the size and number of underwritings and mergers and acquisitions may have an adverse effect on our revenues and, because we may be unable to reduce expenses correspondingly, our profit margins. In particular, because a significant portion of our investment banking revenues are derived from our participation in large transactions, a decrease in the number of large transactions due to uncertain or unfavorable market conditions may adversely affect our investment banking business.

Pricing and other competitive pressures have continued, even as the volume and number of investment banking transactions have increased. In addition, the trend in the underwriting business toward multiple book runners and co-managers handling transactions, where previously there would have been a single book runner, has adversely affected our business and reduced our revenues.

Reductions in the level of the equity markets or increases in interest rates tend to reduce the value of our clients portfolios, which in turn may reduce the fees we earn for managing assets. Increases in interest rates or attractive conditions in other investments could cause our clients to transfer their assets out of our funds or other products. Even in the absence of uncertain or unfavorable economic or market conditions, investment performance by our asset management business below the performance of benchmarks or competitors could result in a decline in assets under management and in the incentive and management fees we receive as well as reputational damage that might make it more difficult to attract new investors.

Concentration of risk increases the potential for significant losses in our market-making, proprietary trading and investing, block trading, merchant banking, underwriting and lending businesses. This risk may increase to the extent we expand our proprietary trading and investing businesses or commit capital to facilitate customer-driven business. For example, in recent years large blocks of securities have increasingly been sold in block trades rather than on a marketed basis, which increases the risk that Goldman Sachs may be unable to resell the purchased securities at favorable prices and may incur significant losses as a result. Moreover, because of concentration of risk, we may suffer losses even when economic and market conditions are generally favorable for others in the industry. We also regularly enter into large transactions as part of our trading businesses. The number and size of such transactions may affect our results of operations in a given period.

Table of Contents

The volume of transactions that we execute for our clients and as a specialist or market maker may decline, which would reduce the revenues we receive from commissions and spreads. In addition, competitive pressures and other industry factors, including the increasing use by our clients of low-cost electronic trading, could cause a reduction in commissions and spreads. In our specialist businesses, we are obligated by stock exchange rules to maintain an orderly market, including by purchasing shares in a declining market. This may result in trading losses and an increased need for liquidity. Weakness in global equity markets and the trading of securities in multiple markets and on multiple exchanges could adversely impact our trading businesses and impair the value of our goodwill and identifiable intangible assets. In addition, competitive pressures have been particularly intense in the context of block trades.

The emergence of a pandemic or other widespread health emergency, or concerns over the possibility of such an emergency, could create economic and financial disruptions in emerging markets and other areas throughout the world, and could lead to operational difficulties (including travel limitations) that could impair our ability to manage our businesses around the world. In addition, unforeseen or catastrophic events, including health emergencies, terrorist attacks or natural disasters, could expose our insurance subsidiaries to significant losses.

We may incur losses as a result of ineffective risk management processes and strategies.

We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational, compliance and legal reporting systems. Our trading risk management process seeks to balance our ability to profit from trading positions with our exposure to potential losses. While we employ a broad and diversified set of risk monitoring and risk mitigation techniques, those techniques and the judgments that accompany their application cannot anticipate every economic and financial outcome or the specifics and timing of such outcomes. Thus, we may, in the course of our activities, incur losses.

The models that we use to assess and control our risk exposures reflect assumptions about the degrees of correlation or lack thereof among prices of various asset classes or other market indicators, and in times of market stress or other unforeseen circumstances previously uncorrelated indicators may become correlated, or conversely previously correlated indicators may move in different directions. In the past, these types of market movements have at times limited the effectiveness of our hedging strategies and have caused us to incur significant losses, and they may do so in the future.

Market volatility has been relatively low in recent years. An increase in volatility would increase our measured risk, which might cause us to reduce our proprietary positions or to reduce certain of our business activities. In such circumstances, we may not be able to reduce our positions or our exposure in a timely, cost-effective way or in a manner sufficient to offset the increase in measured risk.

For a further discussion of our risk management policies and procedures, see Management's Discussion and Analysis of Financial Condition and Results of Operations Risk Management in Part II, Item 7 of the Annual Report on Form 10-K.

Our liquidity and businesses may be adversely affected by an inability to access the debt capital markets or to sell assets, by a reduction in our credit ratings or by an inability of The Goldman Sachs Group, Inc. to access funds from its subsidiaries.

Liquidity is essential to our businesses. Our liquidity could be impaired by an inability to access secured and/or unsecured debt markets, an inability to sell assets or unforeseen outflows of cash or collateral. This situation may arise due to circumstances that we may be unable to control, such as a general market disruption or an operational problem that affects third parties or us. The financial

Table of Contents

instruments that we hold and the contracts to which we are a party are increasingly complex, as we employ structured products to benefit our clients and ourselves, and these complex structured products often do not have readily available markets to access in times of liquidity stress. Growth of our proprietary investing activities may lead to situations where the holdings from these activities represent a significant portion of specific markets, which could restrict liquidity for our positions. Further, our ability to sell assets may be impaired if other market participants are seeking to sell similar assets at the same time.

Our credit ratings are important to our liquidity. A reduction in our credit ratings could adversely affect our liquidity and competitive position, increase our borrowing costs, limit our access to the capital markets or trigger our obligations under certain bilateral provisions in some of our trading and collateralized financing contracts. Under these provisions, counterparties could be permitted to terminate contracts with Goldman Sachs or require us to post additional collateral. Termination of our trading and collateralized financing contracts could cause us to sustain losses and impair our liquidity by requiring us to find other sources of financing or to make significant cash payments or securities movements.

The Goldman Sachs Group, Inc. is a holding company and, therefore, depends on dividends, distributions and other payments from its subsidiaries to fund dividend payments and to fund all payments on its obligations, including debt obligations. Many of our subsidiaries, including GS&Co., are subject to laws that authorize regulatory bodies to block or reduce the flow of funds from those subsidiaries to The Goldman Sachs Group, Inc. Regulatory action of that kind could impede access to funds that The Goldman Sachs Group, Inc. needs to make payments on obligations, including debt obligations, or dividend payments.

Our businesses, profitability and liquidity may be adversely affected by a deterioration in the credit quality of, or defaults by, third parties who owe us money, securities or other assets.

We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, operational failure or other reasons. We are also subject to the risk that our rights against third parties may not be enforceable in all circumstances. In addition, a deterioration in the credit quality of third parties whose securities or obligations we hold could result in losses and/or adversely affect our ability to rehypothecate or otherwise use those securities or obligations for liquidity purposes. A significant downgrade in the credit ratings of our counterparties could also have a negative impact on our results. The amount and duration of our credit exposures have been increasing over the past several years, as has the breadth of the entities to which we have credit exposures. As a clearing member firm, we finance our client positions, and we could be held responsible for the defaults or misconduct of our clients. In addition, we have experienced, due to competitive factors, pressure to extend and price credit at levels that may not always fully compensate us for the risks we take. In particular, corporate clients sometimes seek to require credit commitments from us in connection with investment banking and other assignments. While our activities expose us to many different industries and counterparties, we routinely execute a high volume of transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment funds and other institutional clients, resulting in significant credit concentration with respect to this industry. In the ordinary course of business, we may also be subject to a concentration of credit risk to a particular counterparty, borrower or issuer.

Although we regularly review credit exposures to specific clients and counterparties and to specific industries, countries and regions that we believe may present credit concerns, default risk may arise from events or circumstances that are difficult to detect or foresee. In addition, concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions, which in turn could adversely affect Goldman Sachs.

Table of Contents

We face enhanced risks as new business initiatives lead us to transact with a broader array of clients, with new asset classes and in new markets.

A number of our recent and planned business initiatives and expansions of existing businesses may bring us into contact, directly or indirectly, with individuals and entities that are not within our traditional client base and with new asset classes and new markets. For example, we have begun providing loans to small and mid-sized businesses, increased our exposure to subprime mortgages and are transacting business and investing in new emerging markets. In addition, we are increasingly offering complex structured products and alternative investments to a wider investor base, both directly and through third-party distribution channels. Furthermore, a number of our businesses, including our proprietary investing and merchant banking activities, cause us to directly or indirectly own interests in, or otherwise become affiliated with the ownership and operation of, public services, such as airports, toll roads, shipping ports and electric power generation facilities, both within and outside the United States. These business activities expose us to new and enhanced risks, including reputational concerns arising from dealing with less sophisticated counterparties and investors, greater regulatory scrutiny of these activities, increased credit-related and operational risks, risks arising from accidents or acts of terrorism, and reputational concerns with the manner in which these assets are being operated or held.

Derivative transactions may expose us to unexpected risk and potential losses.

We are party to a large number of derivative transactions, including credit derivatives, that require that we deliver to the counterparty the underlying security, loan or other obligation in order to receive payment. In a number of cases, we do not hold the underlying security, loan or other obligation and may have difficulty obtaining, or be unable to obtain, the underlying security, loan or other obligation through the physical settlement of other transactions. As a result, we are subject to the risk that we may not be able to obtain the security, loan or other obligation within the required contractual time frame for delivery. This could cause us to forfeit the payments due to us under these contracts or result in settlement delays with the attendant credit and operational risk as well as increased costs to the firm.

Derivative contracts and other transactions entered into with third parties are not always confirmed by the counterparties on a timely basis. While the transaction remains unconfirmed, we are subject to heightened credit and operational risk and in the event of a default may find it more difficult to enforce the contract.

A failure in our operational systems or infrastructure, or those of third parties, could impair our liquidity, disrupt our businesses, damage our reputation and cause losses.

Shortcomings or failures in our internal processes, people or systems could lead to impairment of our liquidity, financial loss, disruption of our businesses, liability to clients, regulatory intervention or reputational damage. Our businesses are highly dependent on our ability to process, on a daily basis, a large number of transactions, many of which are highly complex, across numerous and diverse markets in many currencies. These transactions often must adhere to client-specific guidelines, as well as legal and regulatory standards. Our financial, accounting, data processing or other operating systems and facilities may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, adversely affecting our ability to process these transactions. The inability of our systems to accommodate an increasing volume of transactions could also constrain our ability to expand our businesses.

We also face the risk of operational failure or termination of any of the clearing agents, exchanges, clearing houses or other financial intermediaries we use to facilitate our securities transactions, and as our interconnectivity with our clients grows, we will increasingly face the risk of operational failure with respect to our clients' systems. In recent years, there has been significant consolidation among clearing agents, exchanges and clearing houses, which has increased our

Table of Contents

exposure to operational failure or termination of the particular financial intermediaries that we use and could affect our ability to find adequate and cost-effective alternatives in the event of any such failure or termination. Any such failure or termination could adversely affect our ability to effect transactions, service our clients and manage our exposure to risk.

Despite the contingency plans and facilities we have in place, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the communities in which we are located. This may include a disruption involving electrical, communications, transportation or other services used by Goldman Sachs or third parties with which we conduct business. These disruptions may occur, for example, as a result of events that affect only the buildings of Goldman Sachs or such third parties, or as a result of events with a broader impact globally, regionally or in the cities where those buildings are located. Nearly all of our employees in our primary locations, including New York, London, Frankfurt, Hong Kong, Tokyo and Bangalore, work in close proximity to one another, in one or more buildings. If a disruption occurs in one location and our employees in that location are unable to occupy our offices or communicate with or travel to other locations, our ability to service and interact with our clients may suffer, and we may not be able to successfully implement contingency plans that depend on communication or travel.

Our operations rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Although we take protective measures and endeavor to modify them as circumstances warrant, our computer systems, software and networks may be vulnerable to unauthorized access, computer viruses or other malicious code and other events that could have a security impact. If one or more of such events occur, this potentially could jeopardize our or our clients' or counterparties' confidential and other information processed and stored in, and transmitted through, our computer systems and networks, or otherwise cause interruptions or malfunctions in our, our clients', our counterparties' or third parties' operations, which could result in significant losses or reputational damage. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us.

We routinely transmit and receive personal, confidential and proprietary information by email and other electronic means. We have discussed and worked with clients and counterparties to develop secure transmission capabilities, but we do not have in place secure capabilities for all of our clients and counterparties. An interception or mishandling of personal, confidential or proprietary information being sent to or received from a client or counterparty could result in legal liability, regulatory action and reputational harm. We are exposed to similar risks arising from the interception of personal, confidential or proprietary information sent to or received from, or the misuse or mishandling of personal, confidential or proprietary information by, vendors, service providers and other third parties who may receive such information from us, and our efforts to ensure that these third parties have appropriate controls in place may not be successful.

Conflicts of interest are increasing and a failure to appropriately deal with conflicts of interest could adversely affect our businesses.

Our reputation is one of our most important assets. As we have expanded the scope of our businesses and our client base, we increasingly have to address potential conflicts of interest, including situations where our services to a particular client or our own proprietary investments or other interests conflict, or are perceived to conflict, with the interests of another client, as well as situations where one or more of our businesses have access to material non-public information that may not be shared with other businesses within the firm.

The SEC, the NASD, other federal and state regulators and regulators outside the United States, including in the United Kingdom and Japan, have announced their intention to increase their

Table of Contents

scrutiny of potential conflicts of interest, including through detailed examinations of specific transactions. There have been recent public reports that the Department of Justice is conducting an investigation regarding joint participation by certain private equity firms and other financial institutions in certain leveraged buyouts, referred to as club deals. In addition, certain complaints filed against firms other than Goldman Sachs allege the violation of antitrust laws arising from their club deal arrangements. A number of class action complaints have also been filed in connection with certain specific club deal transactions which name the relevant club deal participants among the defendants, including Goldman Sachs affiliates in several cases, and generally allege that the transactions constitute a breach of fiduciary duty by the target company and that the club participants aided and abetted such breach. We may become subject to further litigation or regulatory scrutiny in the future in this regard.

We have extensive procedures and controls that are designed to address conflicts of interest, including those designed to prevent the improper sharing of information among our businesses. However, appropriately dealing with conflicts of interest is complex and difficult, and our reputation could be damaged and the willingness of clients to enter into transactions in which such a conflict might arise may be affected if we fail, or appear to fail, to deal appropriately with conflicts of interest. In addition, potential or perceived conflicts could give rise to litigation or enforcement actions.

Our businesses and those of our clients are subject to extensive and pervasive regulation around the world.

Goldman Sachs, as a participant in the financial services industry, is subject to extensive regulation in jurisdictions around the world. We face the risk of significant intervention by regulatory authorities in all jurisdictions in which we conduct our businesses. Among other things, we could be fined, prohibited from engaging in some of our business activities or subject to limitations or conditions on our business activities.

New laws or regulations or changes in enforcement of existing laws or regulations applicable to our businesses or those of our clients may also adversely affect our businesses. Regulatory changes could lead to business disruptions, could require us to change certain of our business practices and could expose us to additional costs and liabilities as well as reputational harm. For a discussion of the extensive regulation to which our businesses are subject, see Business Regulation in Part I, Item 1 of the Annual Report on Form 10-K.

Firms in the financial services industry have been operating in a difficult regulatory environment. The industry has experienced increased scrutiny from a variety of regulators, both within and outside the United States. Penalties and fines sought by regulatory authorities have increased substantially over the last several years, and certain regulators have been more likely in recent years to commence enforcement actions. For example, regulators, both within and outside the United States, continue to scrutinize complex, structured finance transactions and have brought enforcement actions against a number of financial institutions in connection with such transactions. We seek to create innovative solutions to address our clients' needs, and we have entered into, and continue to enter into, structured transactions with clients.

This environment has led some of our clients to be less willing to engage in transactions that may carry a risk of increased scrutiny by regulators and has created uncertainty with respect to a number of transactions that had historically been entered into by financial services firms, including our firm, and that were generally believed to be permissible and appropriate. This environment also has led us and our competitors to modify transaction structures and, in some cases, to limit or cease our execution of some types of transactions. While we have policies and procedures in place that are intended to ensure that the transactions we enter into are appropriately reviewed and comply with applicable laws and regulations, it is possible that certain transactions could give rise to litigation or enforcement actions or that the regulatory scrutiny of, and litigation in connection with, transactions

Table of Contents

will make our clients less willing to enter into these transactions with us, and will adversely affect our business.

Substantial legal liability or significant regulatory action against Goldman Sachs could have material adverse financial effects or cause significant reputational harm to Goldman Sachs, which in turn could seriously harm our business prospects.

We face significant legal risks in our businesses, and the volume of claims and amount of damages and penalties claimed in litigation and regulatory proceedings against financial institutions remain high. See Legal Proceedings in Part I, Item 3 of the Annual Report on Form 10-K for a discussion of certain legal proceedings in which we are involved.

For example, federal and state authorities and other regulatory entities, including the NASD, have made informational requests regarding market timing, late trading and other activities broadly across all of the major fund companies and broker-dealers, including Goldman Sachs. While we believe that we have in place reasonable measures to detect and deter disruptive and abusive trading practices and comply with applicable legal and regulatory requirements, we cannot predict the course that these inquiries and areas of focus may take or the impact that any new laws or regulations governing mutual funds may have on our businesses.

Also, in March 2004, certain NYSE specialist firms, including our specialist unit, agreed to a settlement with the SEC and NYSE to resolve charges that the firms violated certain federal securities laws and NYSE rules in connection with their activities as NYSE specialists during the years 1999 through 2003. The settlement did not resolve the related civil actions discussed under Legal Proceedings Specialist Matters in Part I, Item 3 of the Annual Report on Form 10-K, or potential regulatory charges against individuals. In addition, we have received requests for information from regional stock exchanges and options exchanges regarding specialist activities. As a result of the settlement and any related developments, other investigations or any new laws or regulations governing specialists, our specialist businesses may be adversely affected and the value of our goodwill and identifiable intangible assets related to these businesses may be impaired.

There have been a number of highly publicized cases involving fraud or other misconduct by employees in the financial services industry in recent years, and we run the risk that employee misconduct could occur. It is not always possible to deter or prevent employee misconduct and the precautions we take to prevent and detect this activity may not be effective in all cases.

The financial services industry is highly competitive.

The financial services industry and all of our businesses are intensely competitive, and we expect them to remain so. We compete on the basis of a number of factors, including transaction execution, our products and services, innovation, reputation and price. We believe that we will continue to experience pricing pressures in the future as some of our competitors seek to increase market share by reducing prices. Over time, there has been substantial consolidation and convergence among companies in the financial services industry. U.S. federal legislation, which significantly expanded the activities permissible for firms affiliated with a U.S. bank, has accelerated this consolidation and further increased competition. This trend toward consolidation and convergence has significantly increased the capital base and geographic reach of our competitors. This trend has also hastened the globalization of the securities and other financial services markets. As a result, we have had to commit capital to support our international operations and to execute large global transactions. As our business expands into new business areas and new geographical regions, we will face competitors with more experience and more established relationships with clients, regulators and industry participants in the relevant market, which could adversely affect our ability to expand.

Table of Contents

The growth of electronic trading and the introduction of new technology may adversely affect our business and may increase competition.

Technology is fundamental to our business and our industry. The growth of electronic trading and the introduction of new technologies is changing our businesses and presenting us with new challenges. Securities, futures and options transactions are increasingly occurring electronically, both on our own systems and through other alternative trading systems, and it appears that the trend toward alternative trading systems will continue and probably accelerate. Some of these alternative trading systems compete with our trading businesses, including our specialist businesses, and we may experience continued competitive pressures in these and other areas. In addition, the increased use by our clients of low-cost electronic trading systems and direct electronic access to trading markets could cause a reduction in commissions and spreads. The NYSE's adoption of its hybrid market for trading securities may increase pressure on our Equities business as customers execute more of their NYSE-related trades electronically. We have invested significant resources into the development of electronic trading systems and expect to continue to do so, but there is no assurance that the revenues generated by these systems will yield an adequate return on our investment, particularly given the relatively lower commissions arising from electronic trades.

Our businesses may be adversely affected if we are unable to hire and retain qualified employees.

Competition from within the financial services industry and from businesses outside the financial services industry, such as hedge funds, private equity funds and venture capital funds, for qualified employees is intense, particularly in emerging markets. Our performance is largely dependent on the talents and efforts of highly skilled individuals; therefore, our continued ability to compete effectively in our businesses and to expand into new business areas depends on our ability to attract new employees and to retain and motivate our existing employees. In addition, current and future laws (including laws relating to immigration and outsourcing) may restrict our ability to move responsibilities or personnel from one jurisdiction to another. This may impact our ability to take advantage of business opportunities or potential efficiencies.

Our power generation interests subject us to the risks associated with owning power generation facilities.

The operation of our power generation facilities may be disrupted for many reasons, many of which are outside our control, including the breakdown or failure of power generation equipment, transmission lines or other equipment or processes, and performance below expected levels of output or efficiency. In addition, these facilities could be adversely affected by the failure of any of third-party suppliers or service providers to perform their contractual obligations, including the failure to obtain raw materials necessary for operation at reasonable prices. Market conditions or other factors could cause a failure to satisfy or obtain waivers under agreements with third parties, including lenders and utilities, which impose significant obligations on our subsidiaries that own such facilities. The occurrence of any of such events may prevent the affected facilities from performing under applicable power sales agreements, may impair their operations or financial results and may result in litigation or other reputational harm.

Our power generation facilities are subject to extensive and evolving federal, state and local energy, environmental and other governmental laws and regulations, including environmental laws and regulations relating to, among others, air quality, water quality, waste management, natural resources, site remediation and health and safety. In the past several years, intensified scrutiny of the energy market by federal, state and local authorities and the public has resulted in increased regulatory and legal proceedings involving companies engaged in electric power generation. In addition, we may incur substantial costs in complying with current or future laws and regulations relating to power generation, including having to commit significant capital toward environmental monitoring, installation of pollution control equipment, payment of emission fees, and application for,

Table of Contents

and holding of, permits and licenses at our power generation facilities. In certain instances, compliance with applicable laws and regulations may require us to cease or curtail operations of one or more of our power generation facilities. Our power generation facilities are also subject to the risk of unforeseen or catastrophic events, including terrorist attacks, natural disasters or other hostile or catastrophic events. We may not have insurance against these risks or other risks, including environmental risks, that such facilities face, and, in cases in which we do have insurance, the insurance proceeds may be inadequate to cover our losses. Our overall businesses and reputation may be adversely affected by legal and regulatory proceedings, particularly those related to the environmental matters, arising out of our power generation business, as well as by the occurrence of unforeseen or catastrophic events.

In conducting our businesses around the world, we are subject to political, economic, legal, operational and other risks that are inherent in operating in many countries.

In conducting our businesses and maintaining and supporting our global operations, we are subject to risks of possible nationalization, expropriation, price controls, capital controls, exchange controls and other restrictive governmental actions, as well as the outbreak of hostilities. In many countries, the laws and regulations applicable to the securities and financial services industries are uncertain and evolving, and it may be difficult for us to determine the exact requirements of local laws in every market. Our inability to remain in compliance with local laws in a particular market could have a significant and negative effect not only on our businesses in that market but also on our reputation generally. We are also subject to the enhanced risk that transactions we structure might not be legally enforceable in all cases.

Our businesses and operations are increasingly involved in emerging markets throughout the world, and we expect this trend to continue. In the last several years, various emerging market countries have experienced severe economic and financial disruptions, including significant devaluations of their currencies, capital and currency exchange controls, and low or negative growth rates in their economies. The possible effects of any of these conditions include an adverse impact on our businesses and increased volatility in financial markets generally.

Item 1B. Unresolved Staff Comments

There are no material unresolved written comments that were received from the SEC staff 180 days or more before the end of our fiscal year relating to our periodic or current reports under the Securities Exchange Act of 1934.

Item 2. Properties

Our principal executive offices are located at 85 Broad Street, New York, New York, and comprise approximately one million rentable square feet of leased space, pursuant to a lease agreement expiring in June 2008 (with options to renew for up to 20 additional years). We also occupy over 680,000 rentable square feet at One New York Plaza under lease agreements expiring primarily in 2009 (with options to renew for up to five additional years), and we lease space at various other locations in the New York metropolitan area. In total, we lease approximately 3.9 million rentable square feet in the New York metropolitan area.

In August 2005, we leased from Battery Park City Authority a parcel of land in lower Manhattan, pursuant to a ground lease. We are currently constructing a 2.1 million gross-square-foot office building on the site that will serve as our world headquarters. Under the lease, Battery Park City Authority holds title to all improvements, including the office building, subject to Goldman Sachs' right of exclusive possession and use for the 64-year duration of the lease.

Under the terms of the ground lease, we are required to make a lump-sum ground rent payment of \$161 million by June 2007 and to make additional periodic payments during the term of the lease. We are obligated under the ground lease to construct the office building by 2011 (subject

Table of Contents

to extensions in the case of force majeure) in accordance with certain pre-approved design standards. Construction began on the building in November 2005, and we expect initial occupancy of the building by 2009. The building is projected to cost between \$2.3 billion and \$2.5 billion, including acquisition, development, fitout and furnishings, financing and other related costs.

We are receiving a number of benefits from the City and State of New York based on our agreement to construct our world headquarters in lower Manhattan. These benefits are subject to recoupment or recapture if we do not proceed in accordance with our agreements with the City and State of New York.

We own an office building at 30 Hudson Street in Jersey City, New Jersey, which includes approximately 1.6 million gross square feet of office space, and we own over 300,000 square feet of additional space spread among three locations in New York and New Jersey. We have additional offices in the U.S. and elsewhere in the Americas, which together comprise approximately 2.3 million rentable square feet of leased space.

In Europe, the Middle East and Africa, we have offices that total approximately 2.0 million rentable square feet. Our European headquarters is located in London at Peterborough Court, pursuant to a lease expiring in 2026. In total, we lease approximately 1.6 million rentable square feet in London through various leases, relating to various properties.

In Asia, we have offices that total approximately 1.2 million rentable square feet. Our headquarters in this region are in Tokyo, at the Roppongi Hills Mori Tower, and in Hong Kong, at the Cheung Kong Center. In Tokyo, we currently lease approximately 390,000 rentable square feet through a lease that will expire in 2018. In Hong Kong, we currently lease approximately 220,000 rentable square feet under lease agreements, the majority of which will expire in fiscal 2012.

Our occupancy expenses include costs associated with office space held in excess of our current requirements. This excess space, the cost of which is charged to earnings as incurred, is being held for potential growth or to replace currently occupied space that we may exit in the future. We regularly evaluate our current and future space capacity in relation to current and projected staffing levels. We may incur exit costs in 2007 and thereafter to the extent we (i) reduce our space capacity or (ii) commit to, or occupy, new properties in the locations in which we operate and, consequently, dispose of existing space that had been held for potential growth. These exit costs may be material to our results of operations in a given period.

Item 3. Legal Proceedings

We are involved in a number of judicial, regulatory and arbitration proceedings (including those described below) concerning matters arising in connection with the conduct of our businesses. We believe, based on currently available information, that the results of such proceedings, in the aggregate, will not have a material adverse effect on our financial condition, but might be material to our operating results for any particular period, depending, in part, upon the operating results for such period. Given the range of litigation and investigations presently under way, our litigation expenses can be expected to remain high.

IPO Process Matters

The Goldman Sachs Group, Inc. and Goldman, Sachs & Co. are among the numerous financial services companies that have been named as defendants in a variety of lawsuits alleging improprieties in the process by which those companies participated in the underwriting of public offerings in recent years.

Certain purported class actions have been brought in the U.S. District Court for the Southern District of New York, beginning on November 3, 1998, by purchasers of securities in public offerings as well as certain purported issuers of such offerings, that allege that the defendants have conspired to fix at 7% the discount that underwriting syndicates receive from issuers of shares in certain

Table of Contents

offerings in violation of federal antitrust laws. On March 15, 1999, the purchaser plaintiffs filed a consolidated amended complaint seeking treble damages as well as injunctive relief. The defendants moved to dismiss the consolidated amended complaint on April 29, 1999. On February 9, 2001, the federal district court granted with prejudice the defendants' motion to dismiss the claims asserted by the purchasers of securities on the ground that they lacked antitrust standing. The plaintiffs in those actions appealed, and by a decision dated December 13, 2002, the U.S. Court of Appeals for the Second Circuit vacated the dismissal on the ground that the lower court had engaged in improper fact-finding on the motion and remanded for consideration of other potential bases for dismissal. On September 28, 2001, the defendants moved to dismiss the complaints filed by the issuer plaintiffs on statute of limitations grounds. On September 25, 2002, the federal district court denied the underwriter defendants' motion to dismiss. On March 26, 2003, defendants moved to dismiss the claims asserted by both the issuers and the purchasers of securities on preemption grounds, but the motion was denied on June 27, 2003. On June 24, 2003, defendants filed a motion to dismiss the claims asserted by the purchasers of securities on standing grounds, and on February 24, 2004, the district court granted the motion to dismiss as to the purchasers damages claims. Plaintiffs in both actions moved for class certification on September 16, 2004 and for summary judgment on November 16, 2005, and by a decision dated April 18, 2006, the district court denied class certification with respect to the damages claims asserted by the issuers of securities. The issuer plaintiffs have petitioned the U.S. Court of Appeals for the Second Circuit to review that certification decision on an interlocutory basis, and the petition was granted on August 1, 2006.

Goldman, Sachs & Co. is one of numerous financial services firms that have been named as defendants in purported class actions filed beginning on March 9, 2001 in the U.S. District Court for the Southern District of New York by purchasers of securities in public offerings, who claim that the defendants engaged in a conspiracy to tie allocations in certain offerings to higher customer brokerage commission rates as well as purchase orders in the aftermarket, in violation of federal antitrust laws. The plaintiffs filed a consolidated amended complaint on January 2, 2002 seeking treble damages as well as injunctive relief. The defendants moved to dismiss the consolidated amended complaint on May 24, 2002, and the motion was granted by a decision dated November 3, 2003. Plaintiffs appealed, and by a decision dated September 28, 2005, the U.S. Court of Appeals for the Second Circuit reversed and remanded the action. On March 8, 2006, the underwriter defendants filed a petition for *certiorari* with the U.S. Supreme Court seeking review of the appellate decision, and the petition was granted by order dated December 7, 2006. Goldman, Sachs & Co. has also, together with other underwriters in certain offerings as well as the issuers and certain of their officers and directors, been named as a defendant in a number of related lawsuits alleging, among other things, that the prospectuses for the offerings violated the federal securities laws by failing to disclose the existence of the alleged tying arrangements and that the alleged arrangements resulted in market manipulation. On July 1, 2002, the underwriter defendants moved to dismiss those complaints. By an opinion and order dated February 19, 2003, the federal district court denied the motion to dismiss in all material respects relating to the underwriter defendants. By a decision dated October 13, 2004, the federal district court generally granted plaintiffs' motion for class certification in six focus cases. The underwriter defendants petitioned the U.S. Court of Appeals for the Second Circuit to review that certification decision on an interlocutory basis, and the appellate court agreed to review the decision by order dated June 30, 2005. On December 5, 2006, the Second Circuit reversed the district court's order granting class certification and remanded; plaintiffs sought rehearing and rehearing en banc on January 5, 2007. On June 10, 2004, plaintiffs entered into a definitive settlement agreement with respect to their claims against the issuer defendants and the issuers' present or former officers and directors named in the lawsuits. On June 14, 2004, those parties jointly moved for approval of the proposed settlement, and the district court granted preliminary approval by a decision dated February 15, 2005. On April 20, 2006, plaintiffs announced that they had entered into a definitive settlement agreement with respect to their claims against J.P. Morgan Securities, Inc. arising from lawsuits alleging that (i) the prospectuses for certain offerings violated the federal securities laws by failing to disclose the

Table of Contents

existence of alleged arrangements to tie allocations to higher customer brokerage commission rates as well as purchase orders in the aftermarket, and (ii) such alleged underlying tying arrangements violated federal and state antitrust laws. The settlement, pursuant to which J.P. Morgan Securities, Inc. will pay \$425 million, is subject to, among other things, documentation and court approval.

Goldman, Sachs & Co. has been named as a defendant in an action commenced on May 15, 2002 in New York Supreme Court, New York County, by an official committee of unsecured creditors on behalf of eToys, Inc., alleging that the firm intentionally underpriced eToys, Inc.'s initial public offering. The action seeks, among other things, unspecified compensatory damages resulting from the alleged lower amount of offering proceeds. On August 1, 2002, Goldman, Sachs & Co. moved to dismiss the complaint. On May 2, 2003, the court granted Goldman, Sachs & Co.'s motion to dismiss as to five of the claims; plaintiff appealed from the dismissal of the five claims, and Goldman, Sachs & Co. appealed from the denial of its motion as to the remaining claim. By a decision dated May 20, 2004, the New York Appellate Division, First Department affirmed in part and reversed in part the lower court's ruling on the firm's motion to dismiss, permitting all claims to proceed except the claim for fraud, as to which the appellate court granted leave to replead. The Appellate Division granted leave to appeal, and by a decision dated June 7, 2005, the New York Court of Appeals affirmed in part and reversed in part the Appellate Division's decision, dismissing claims for breach of contract, professional malpractice and unjust enrichment, but permitting claims for breach of fiduciary duty and fraud to continue. On remand to the lower court, Goldman, Sachs & Co. moved to dismiss the claims that survived the appeal or, in the alternative, for summary judgment, but the motion was denied by a decision dated March 21, 2006.

The Goldman Sachs Group, Inc. and certain of its affiliates have, together with various underwriters in certain offerings, received subpoenas and requests for documents and information from various governmental agencies and self-regulatory organizations in connection with investigations relating to the public offering process. Goldman Sachs has cooperated with the investigations. On January 25, 2005, in connection with an investigation by the SEC of certain allocation practices employed by Goldman, Sachs & Co. and other firms, the SEC announced a settlement pursuant to which Goldman, Sachs & Co., without admitting or denying the allegations, (i) consented to the entry of an order permanently enjoining Goldman, Sachs & Co. from violating Rule 101 of Regulation M of the Securities Exchange Act of 1934, by inducing or attempting to induce customers receiving IPO allocations to buy additional shares in the aftermarket; and (ii) agreed to pay a penalty of \$40 million. In connection with effectuation of the settlement, the SEC filed a civil action against Goldman, Sachs & Co. in the U.S. District Court for the Southern District of New York on January 25, 2005, and the district court entered a final judgment on February 7, 2005 approving the settlement and granting the permanent injunctive relief.

Stock Options Litigation

Hull Trading Co. L.L.C. and Spear, Leeds & Kellogg, L.P. (now known as Goldman Sachs Execution & Clearing, L.P.), affiliates of The Goldman Sachs Group, Inc., are among the numerous market makers in listed equity options that have been named as defendants, together with five national securities exchanges, in a purported class action brought in the U.S. District Court for the Southern District of New York on behalf of persons who purchased or sold listed equity options. The consolidated class action complaint, filed on October 4, 1999 (which consolidated certain previously pending actions and added Hull Trading Co. L.L.C. and other market makers as defendants), generally alleges that the defendants engaged in a conspiracy to preclude the multiple listing of certain equity options on the exchanges and seeks treble damages under the antitrust laws as well as injunctive relief. Certain of the parties, including Hull Trading Co. L.L.C. and Spear, Leeds & Kellogg, L.P., have entered into a stipulation of settlement, subject to court approval, which originally required Hull Trading Co. L.L.C. to pay an aggregate of \$2.48 million and Spear, Leeds & Kellogg, L.P. an aggregate of \$19.59 million. On February 14, 2001, the federal district court granted the

Table of Contents

motion of certain non-settling defendants for summary judgment. By a decision dated April 24, 2001, the district court ruled that in light of that order granting summary judgment, the court lacked jurisdiction to entertain the proposed settlement. Plaintiffs appealed, and by a decision dated January 9, 2003, the U.S. Court of Appeals for the Second Circuit affirmed the grant of summary judgment, but held that the decision did not divest the lower court of jurisdiction to entertain the proposed settlement, and remanded for further proceedings. By an Order dated March 17, 2003, the U.S. Court of Appeals denied plaintiffs' motion for rehearing or rehearing en banc of the Court's January 9, 2003 decision. On October 26, 2005, certain defendants, including Spear, Leeds & Kellogg, L.P. and Hull Trading Co. L.L.C., reached an agreement to modify and restate the original settlement agreement, reducing the overall settlement payments by certain market maker defendants by approximately 25% of the original amounts. By an order dated February 8, 2006, the federal district court entered an order that, among other things, preliminarily approved the proposed modified settlement. The federal district court approved the settlement by an Order dated December 4, 2006.

Iridium Securities Litigation

Goldman, Sachs & Co. has been named as a defendant in two purported class action lawsuits commenced, beginning on May 26, 1999, in the U.S. District Court for the District of Columbia brought on behalf of purchasers of Class A common stock of Iridium World Communications, Ltd. in a January 1999 underwritten secondary offering of 7,500,000 shares of Class A common stock at a price of \$33.50 per share, as well as in the secondary market. Goldman, Sachs & Co. underwrote 996,500 shares of common stock and Goldman Sachs International underwrote 320,625 shares of common stock for a total offering price of approximately \$44 million.

The defendants in the actions include Iridium, certain of its officers and directors, Motorola, Inc. (an investor in Iridium) and the lead underwriters in the offering, including Goldman, Sachs & Co. The complaints in both actions allege violations of the disclosure requirements of the federal securities laws and seek compensatory and/or rescissory damages. On May 13, 2002, plaintiffs filed a consolidated amended complaint alleging substantively identical claims as the original complaints.

On July 15, 2002, the defendants moved to dismiss the consolidated amended complaint, and by a decision dated August 31, 2004, the motion was denied. On April 15, 2005, plaintiffs moved for class certification, and the district court granted the motion, certifying two subclasses, by a decision dated January 9, 2006. On September 30, 2005, the underwriter defendants moved for summary judgment, and by a decision dated September 15, 2006, the federal district court denied the motion as to claims under Section 11 of the Securities Act of 1933, but granted summary judgment dismissing claims under Section 12(a)(2) of the Securities Act against Goldman, Sachs & Co. and all but one of the other underwriter defendants. On November 3, 2006, the underwriter defendants entered into an agreement to settle all claims against them for a settlement payment of \$8.25 million. The settlement is subject to, among other things, documentation and court approval.

On August 13, 1999, Iridium World Communications, Ltd. filed for protection under the U.S. bankruptcy laws.

World Online Litigation

Several lawsuits have been commenced in the Netherlands courts based on alleged misstatements and omissions relating to the initial public offering of World Online in March 2000. Goldman Sachs and ABN AMRO Rothschild served as joint global coordinators of the approximately 2.9 billion offering. Goldman Sachs International underwrote 20,268,846 shares and Goldman, Sachs & Co. underwrote 6,756,282 shares for a total offering price of approximately 1.16 billion.

On September 11, 2000, several Dutch World Online shareholders as well as a Dutch entity purporting to represent the interests of certain World Online shareholders commenced a proceeding in Amsterdam District Court against ABN AMRO Bank N.V., also acting under the name of ABN AMRO Rothschild, alleging misrepresentations and omissions relating to the initial public offering of

Table of Contents

World Online. The lawsuit seeks, among other things, the return of the purchase price of the shares purchased by the plaintiffs or unspecified damages. By a decision dated May 7, 2003, the court held that the claims failed and dismissed the complaint. The plaintiffs appealed, and by a decision dated October 7, 2004, the Amsterdam Court of Appeal affirmed dismissal of the complaint.

In March 2001, a Dutch shareholders association initiated legal proceedings in Amsterdam District Court in connection with the World Online offering. Goldman Sachs International is named as a defendant in the writ served on its Dutch attorneys on March 14, 2001. The amount of damages sought is not specified in the writ. Goldman Sachs International filed its Statement of Defense on January 16, 2002 and a rejoinder on January 14, 2003. By a decision dated December 17, 2003, the court rejected the claims against Goldman Sachs International, but found World Online liable in an amount to be determined. On March 12, 2004, the Dutch shareholders association appealed from the dismissal of their claims against Goldman Sachs International. Oral hearings took place on November 13, 2006.

Owens Corning Bondholder Litigation

Goldman, Sachs & Co. has been named as a defendant in a purported class action filed on April 27, 2001 in the U.S. District Court for the District of Massachusetts arising from a 1998 offering by Owens Corning of two series of its notes. The defendants include certain of Owens Corning's officers and directors and the underwriters for the offering (including Goldman, Sachs & Co., which was the lead manager in the offering). The offering included a total of \$550 million principal amount of notes, of which Goldman, Sachs & Co. underwrote \$275 million.

The lawsuit, brought by certain institutional purchasers of the notes, alleges that the prospectus issued in connection with the offering was false and misleading in violation of the disclosure requirements of the federal securities laws. The plaintiffs are seeking, among other things, unspecified damages. The underwriter defendants moved to dismiss the complaint on November 14, 2001. By a decision dated August 26, 2002, the federal district court denied the underwriter defendants' motion to dismiss, and by a decision dated March 9, 2004, granted plaintiffs' motion for class certification. On November 4, 2005, the underwriter defendants reached an agreement in principle to settle all claims against them for an aggregate payment of \$8.25 million, of which Goldman, Sachs & Co. will contribute approximately \$2.5 million. Subsequently, on September 22, 2006, the remaining defendants advised the Court that they had entered into a separate settlement agreement in principle. All settlements remain subject to, among other things, documentation and court approval.

On October 5, 2000, Owens Corning filed for protection under the U.S. bankruptcy laws.

Research Independence Matters

The Goldman Sachs Group, Inc. and its affiliates, together with other financial services firms, have received requests for information from various governmental agencies and self-regulatory organizations in connection with their review of research independence issues. Goldman Sachs has cooperated with the requests. See *Business Regulation - Regulations Applicable in and Outside the United States* in Part I, Item 1 of the Annual Report on Form 10-K for a discussion of our global research settlement.

Goldman, Sachs & Co. is one of several investment firms that have been named as defendants in substantively identical purported class actions filed in the U.S. District Court for the Southern District of New York alleging violations of the federal securities laws in connection with research coverage of certain issuers and seeking compensatory damages. In one such action, relating to coverage of RSL Communications, Inc. commenced on July 5, 2003, Goldman, Sachs & Co. moved to dismiss the complaint on January 13, 2004, and the motion was denied by a decision dated May 21, 2004. On November 9, 2004, plaintiffs moved for class certification, and the district court granted the motion by a decision dated July 27, 2005. Defendants petitioned the U.S. Court of

Table of Contents

Appeals for the Second Circuit to review that certification decision on an interlocutory basis. The appellate court, by an order dated December 22, 2005, denied the petition in part and otherwise held the petition in abeyance for consideration by the panel assigned to review the certification decision in the action described under *IPO Process Matters* above, and, by an order dated January 26, 2007, granted the petition, vacated the district court's class certification and remanded for reconsideration in light of the appellate court's certification decision in such action. Goldman, Sachs & Co. is also a defendant in several actions relating to research coverage of Exodus Communications, Inc. that commenced beginning in May 2003. The actions were consolidated, and on March 15, 2004, Goldman, Sachs & Co. moved to dismiss, and the motion was granted with leave to replead on April 17, 2006. Plaintiff filed a second amended complaint on May 17, 2006. On July 7, 2006, defendants moved to dismiss the second amended complaint.

A purported shareholder derivative action was filed in New York Supreme Court, New York County on June 13, 2003 against The Goldman Sachs Group, Inc. and its board of directors, which, as amended, alleges that the directors breached their fiduciary duties in connection with the firm's research as well as the firm's IPO allocations practices. An amended complaint was filed on March 3, 2004, which was further amended on June 14, 2005.

The Goldman Sachs Group, Inc., Goldman, Sachs & Co. and Henry M. Paulson, Jr., the former Chairman and Chief Executive Officer of The Goldman Sachs Group, Inc., have been named as defendants in a purported class action filed originally on July 18, 2003 in the U.S. District Court for the District of Nevada on behalf of purchasers of The Goldman Sachs Group, Inc. stock from July 1, 1999 through May 7, 2002. The complaint alleges that defendants breached their fiduciary duties and violated the federal securities laws in connection with the firm's research activities. The complaint seeks, among other things, unspecified compensatory damages and/or rescission. The action was transferred on consent to the U.S. District Court for the Southern District of New York, defendants moved to dismiss the amended complaint on August 30, 2004, and the district court granted the motion with leave to amend by order dated February 17, 2005. Plaintiffs filed a second amended complaint on February 25, 2005, and defendants filed a motion to dismiss on March 24, 2005. In a decision dated September 29, 2006, the federal district court granted Mr. Paulson's motion to dismiss with leave to replead but otherwise denied the motion.

Enron Litigation Matters

Goldman Sachs affiliates are defendants in certain actions arising relating to Enron Corp., which filed for protection under the U.S. bankruptcy laws on December 2, 2001.

Goldman, Sachs & Co. and co-managing underwriters have been named as defendants in certain purported securities class and individual actions commenced beginning on December 14, 2001 in the U.S. District Court for the Southern District of Texas and California Superior Court brought by purchasers of \$222,500,000 of Exchangeable Notes of Enron Corp. in August 1999. The notes were mandatorily exchangeable in 2002 into shares of Enron Oil & Gas Company held by Enron Corp. or their cash equivalent. The complaints also name as defendants The Goldman Sachs Group, Inc. as well as certain past and present officers and directors of Enron Corp. and the company's outside accounting firm. The complaints generally allege violations of the disclosure requirements of the federal securities laws and/or state law, and seek compensatory damages. Goldman, Sachs & Co. underwrote \$111,250,000 principal amount of the notes. The Goldman Sachs Group, Inc. and Goldman, Sachs & Co. moved to dismiss the class action complaint in the Texas federal court on March 15, 2004, and by a decision dated December 5, 2005, the motion was granted as to The Goldman Sachs Group, Inc. but denied as to Goldman, Sachs & Co. One of the plaintiffs moved for class certification on August 11, 2006. Goldman, Sachs & Co. moved for judgment on the pleadings against one plaintiff on August 21, 2006, and against all plaintiffs on October 11, 2006. Plaintiffs in various consolidated actions relating to Enron entered into a

Table of Contents

settlement with Banc of America Securities LLC on July 2, 2004 and with Citigroup, Inc. on June 10, 2005, including with respect to claims relating to the Exchangeable Notes offering, as to which affiliates of those settling defendants were two of the three underwriters (together with Goldman, Sachs & Co.). The settling parties have yet to announce what portion of the settlement will apply to the Exchangeable Notes offering.

Several funds which allegedly sustained investment losses of approximately \$125 million in connection with secondary market purchases of the Exchangeable Notes as well as Zero Coupon Convertible Notes of Enron Corp. commenced an action in the U.S. District Court for the Southern District of New York on January 16, 2002. As amended, the lawsuit names as defendants the underwriters of the August 1999 offering and the company's outside accounting firm, and alleges violations of the disclosure requirements of the federal securities laws, fraud and misrepresentation. By an Order dated June 24, 2002, the Judicial Panel on Multidistrict Litigation entered an order transferring that action to the Texas federal district court for purposes of coordinated or consolidated pretrial proceedings with other matters relating to Enron Corp. On March 20, 2002, Goldman, Sachs & Co. moved to dismiss the complaint. By a decision dated December 10, 2003, the motion was granted in part and denied in part. Goldman, Sachs & Co. sought clarification and reconsideration of the decision, and on June 13, 2005, the federal district court granted Goldman, Sachs & Co.'s motion for reconsideration and provided for further briefing on Goldman, Sachs & Co.'s motion to dismiss. On August 18, 2006, the funds moved for leave to file a second amended complaint, and the district court granted the motion on January 22, 2007.

The Goldman Sachs Group, Inc. and Goldman, Sachs & Co. have been named as defendants in two substantively identical purported class actions filed on June 5, 2003 in Oregon Circuit Court, Multnomah County, on behalf of former shareholders of Portland General Corporation. The complaints generally allege that defendants breached their fiduciary duties in connection with Portland General's 1997 merger with Enron Corp., in respect of which Goldman, Sachs & Co. acted as financial advisor to Portland General. The defendants also include Arthur Andersen, LLP, Andersen-U.S., and certain former officers and directors of Portland General. The complaints seek unspecified compensatory damages. In July 2003, defendants removed the actions to the U.S. District Court for the District of Oregon, and the actions were transferred by the Judicial Panel on Multidistrict Litigation to the U.S. District Court for the Southern District of Texas for coordinated proceedings with other actions relating to Enron Corp. On February 25, 2004, The Goldman Sachs Group, Inc. and Goldman, Sachs & Co. moved to dismiss the action, and on August 5, 2004, the federal district court granted the motion to dismiss and denied plaintiffs' motion to remand the actions to state court. On October 14, 2004, plaintiffs moved for reconsideration, and on November 10, 2004, the motion was denied. On August 28, 2006, the other defendants entered into a stipulation dismissing all remaining claims, but judgment has yet to be entered.

Goldman, Sachs & Co. is among numerous defendants in two substantively identical actions filed in the U.S. Bankruptcy Court for the Southern District of New York beginning in November 2003 seeking to recover as fraudulent transfers and/or preferences payments made by Enron Corp. in repurchasing its commercial paper shortly before its bankruptcy filing. Goldman, Sachs & Co., which had acted as a commercial paper dealer for Enron Corp., resold to Enron Corp. approximately \$30 million of commercial paper as principal, and as an agent facilitated Enron Corp.'s repurchase of additional commercial paper from various customers who have also been named as defendants. Goldman, Sachs & Co. moved to dismiss the complaints on February 19, 2004, but the bankruptcy court denied the motion as well as similar motions by other defendants by a decision dated June 15, 2005. On August 1, 2005, various defendants including Goldman, Sachs & Co. petitioned to have the denial of their motion to dismiss reviewed by the U.S. District Court for the Southern District of New York.

Table of Contents

Exodus Securities Litigation

By an amended complaint dated July 11, 2002, Goldman, Sachs & Co. and the other lead underwriters for the February 2001 offering of 13,000,000 shares of common stock and \$575,000,000 of 5¹/₄% convertible subordinated notes of Exodus Communications, Inc. were added as defendants in a purported class action pending in the U.S. District Court for the Northern District of California. The complaint, which also names as defendants certain officers and directors of Exodus Communications, Inc., alleges violations of the disclosure requirements of the federal securities laws and seeks compensatory damages. On October 23, 2002, the underwriter defendants moved to dismiss the complaint. By a decision dated August 19, 2003, the district court granted the defendants' motion to dismiss with leave to replead, and the plaintiffs filed a third amended complaint on January 15, 2004. On March 12, 2004, the underwriter defendants moved to dismiss the third amended complaint, and by a decision dated August 5, 2005, the district court denied the motion. The underwriter defendants moved for reconsideration and clarification on August 30, 2005, but the motion was denied by an order dated September 12, 2005. By a decision dated June 2, 2006, the district court granted summary judgment dismissing the complaint on the grounds that the plaintiff's purchases of Exodus securities were not traceable. On May 5, 2006 and May 19, 2006, two new putative plaintiffs filed motions to intervene, respectively, those motions were denied by a decision dated August 14, 2006, and a motion by the putative intervenors to vacate the resulting judgment was denied by a decision dated October 26, 2006. Plaintiffs filed an appeal on November 27, 2006, and the underwriter defendants cross-appealed on December 11, 2006 to the extent that certain earlier grounds for dismissal had been rejected by the district court. Goldman, Sachs & Co. underwrote 5,200,000 shares of common stock for a total offering price of approximately \$96,200,000, and \$230,000,000 principal amount of the notes.

On September 26, 2001, Exodus Communications, Inc. filed for protection under the U.S. bankruptcy laws.

Montana Power Litigation

Goldman, Sachs & Co. and The Goldman Sachs Group, Inc. have been named as defendants in a purported class action commenced originally on October 1, 2001 in Montana District Court, Second Judicial District on behalf of former shareholders of Montana Power Company. The complaint generally alleges that Montana Power Company violated Montana law by failing to procure shareholder approval of certain corporate strategies and transactions, that the company's board breached its fiduciary duties in pursuing those strategies and transactions, and that Goldman, Sachs & Co. aided and abetted the board's breaches and rendered negligent advice in its role as financial advisor to the company. The complaint seeks, among other things, compensatory damages. In addition to Goldman, Sachs & Co. and The Goldman Sachs Group, Inc., the defendants include Montana Power Company, certain of its officers and directors, an outside law firm for the Montana Power Company, and certain companies that purchased assets from Montana Power Company and its affiliates. The Montana state court denied motions to dismiss by a decision dated August 1, 2002. On July 18, 2003, following the bankruptcies of certain defendants in the action, defendants removed the action to federal court, the U.S. District Court for the District of Montana, Butte Division.

On October 26, 2004, a creditors committee of Touch America Holdings, Inc. brought an action against Goldman, Sachs & Co., The Goldman Sachs Group, Inc., and a former outside law firm for Montana Power Company in Montana District Court, Second Judicial District. The complaint asserts that Touch America Holdings, Inc. is the successor to Montana Power Corporation and alleges substantially the same claims as in the purported class action. Defendants removed the action to federal court on November 19, 2004. On January 14, 2005, defendants moved to dismiss the complaint, but the motion was denied by a decision dated June 10, 2005.

Table of Contents

Global Crossing and Asia Global Crossing Securities Litigation

Goldman, Sachs & Co. has been named as a defendant in a consolidated class action lawsuit in the U.S. District Court for the Southern District of New York relating to various securities offerings by Global Crossing, Ltd. and Asia Global Crossing Ltd. in which Goldman, Sachs & Co. acted as an underwriter. The claims had originally been asserted in separate actions, reflected in an amended complaint filed on January 28, 2003 as to Global Crossing, Ltd. and in a complaint filed on November 8, 2002 as to Asia Global Crossing Ltd., but the claims were consolidated into a single amended complaint on August 11, 2003, which was further amended on March 22, 2004 (including to drop The Goldman Sachs Group, Inc. as a defendant). The consolidated action includes claims relating to Global Crossing, Ltd.'s concurrent April 2000 offerings of 43 million shares of common stock at \$33 per share and 4.6 million shares of 6³/₄% cumulative preferred stock at \$250 per share, as well as Asia Global Crossing Ltd.'s October 2000 initial public offering of 68,500,000 shares of common stock at a price of \$7 per share. Goldman, Sachs & Co. acted as a co-lead underwriter of both Global Crossing, Ltd. offerings, underwriting 12.9 million shares of common stock and 1,840,000 shares of convertible preferred stock for a total offering price of approximately \$886 million. Goldman, Sachs & Co. underwrote 20,670,000 shares of common stock in the Asia Global Crossing Ltd. offering for a total offering price of approximately \$145 million. The claims assert violations of the disclosure requirements of the federal securities laws as to such offerings and seek compensatory and/or rescissory damages. In addition to the lead and other underwriters in the offerings, the defendants as to such claims originally included certain officers and directors of Global Crossing, Ltd. and Asia Global Crossing Ltd. as well as the companies' former outside auditors.

On April 21, 2003, the underwriter defendants as to the Global Crossing, Ltd. offerings moved to dismiss the claims relating to such offerings; the motion was denied in significant part by a decision dated December 18, 2003. On July 23, 2004, the underwriter defendants as to the Asia Global Crossing Ltd. offering moved to dismiss the claims relating to that offering. On March 1, 2005, plaintiffs entered into a definitive settlement agreement with Citigroup, Inc. and certain related parties, including as to claims asserted against such parties in respect of the various offerings in which Goldman, Sachs & Co. participated for a total payment of \$75 million. The various officer and director defendants as well as the former auditors had separately entered into settlement agreements earlier. On March 23, 2006, the remaining underwriter defendants (including Goldman, Sachs & Co.) agreed in principle to settle all claims for a payment of \$82.5 million (of which Goldman, Sachs & Co. contributed approximately one-half), those underwriter defendants entered into a definitive settlement agreement on July 24, 2006, and that settlement was approved by the federal district court on October 27, 2006.

Global Crossing, Ltd. filed for protection under the U.S. bankruptcy laws on January 28, 2002, and Asia Global Crossing Ltd. filed for such protection on November 17, 2002.

Adelphia Communications Fraudulent Conveyance Litigations

Goldman, Sachs & Co. is among numerous entities named as defendants in two adversary proceedings commenced in the U.S. Bankruptcy Court for the Southern District of New York, one on July 6, 2003 by a creditors committee, and the second on or about July 31, 2003 by an equity committee of Adelphia Communications, Inc. The nearly identical complaints seek, among other things, to recover, as fraudulent conveyances, payments made allegedly by Adelphia Communications, Inc. and its affiliates to certain brokerage firms, including approximately \$62.9 million allegedly paid to Goldman, Sachs & Co., in respect of margin calls made in the ordinary course of business on accounts owned by members of the family that formerly controlled Adelphia Communications, Inc.

Spear, Leeds & Kellogg Specialists LLC (SLKS) and certain affiliates have received requests for information from various governmental agencies and self-regulatory organizations as part of an industry-wide investigation relating to activities of floor specialists in recent years. Goldman Sachs has cooperated with the requests.

On March 30, 2004, a final global settlement with the SEC and the NYSE was announced covering certain activities during the years 1999 through 2003 of certain specialist firms on the NYSE, including SLKS. Without admitting or denying the allegations, SLKS and the other specialist firms entered into settlements to resolve these SEC and NYSE investigations of the firms with respect to those activities. The SLKS settlement involves, among other things, (i) findings by the SEC and the NYSE that SLKS violated certain federal securities laws and NYSE rules, and in some cases failed to supervise certain individual specialists, in connection with trades that allegedly disadvantaged customer orders, (ii) a cease and desist order against SLKS, (iii) a censure of SLKS, (iv) SLKS' agreement to pay an aggregate of \$45.3 million in disgorgement and a penalty to be used to compensate customers, (v) certain undertakings with respect to SLKS' systems and procedures, and (vi) SLKS' retention of an independent consultant to review and evaluate certain of SLKS' compliance systems, policies and procedures. Comparable findings were made and sanctions imposed in the settlements with other specialist firms. The settlement did not resolve the related private civil actions against SLKS and other firms or regulatory investigations involving individuals or conduct on other exchanges.

SLKS, Spear, Leeds & Kellogg, L.P. and The Goldman Sachs Group, Inc. are among numerous defendants named in purported class actions brought beginning in October 2003 on behalf of investors in the U.S. District Court for the Southern District of New York alleging violations of the federal securities laws and state common law in connection with NYSE floor specialist activities. The actions seek unspecified compensatory damages, restitution and disgorgement on behalf of purchasers and sellers of unspecified securities between October 17, 1998 and October 15, 2003. Plaintiffs filed a consolidated amended complaint on September 16, 2004, defendants moved to dismiss the amended complaint on November 16, 2004, and the motion was granted in part and denied in part by a decision dated December 13, 2005.

Treasury Matters

On September 4, 2003, the SEC announced that Goldman, Sachs & Co. had settled an administrative proceeding arising from certain trading in U.S. Treasury bonds over an approximately eight-minute period after Goldman, Sachs & Co. received an October 31, 2001 telephone call from a Washington, D.C.-based political consultant concerning a forthcoming Treasury refunding announcement. The administrative complaint alleged that Goldman, Sachs & Co. (i) violated Section 15(c)(1) and Rule 15c1-2 of the Securities Exchange Act of 1934 as a result of the trading and (ii) violated Section 15(f) of the Securities Exchange Act of 1934 by failing to maintain policies and procedures specifically addressed to the possible misuse of information obtained by consultants from confidential government sources. Without admitting or denying the allegations, Goldman, Sachs & Co. consented to the entry of an order that, among other things, (i) censured Goldman, Sachs & Co.; (ii) directed Goldman, Sachs & Co. to cease and desist from committing or causing any violations of Section 15(c)(1)(A) and (C) and 15(f) of, and Rule 15c1-2 under, the Securities Exchange Act of 1934; (iii) ordered Goldman, Sachs & Co. to pay disgorgement and prejudgment interest in the amount of \$1,742,642, and a civil monetary penalty of \$5 million; and (iv) directed Goldman, Sachs & Co. to conduct a review of its policies and procedures and adopt, implement and maintain policies and procedures consistent with the order and that review. Goldman, Sachs & Co. also undertook to pay \$2,562,740 in disgorgement and interest relating to certain trading in U.S. Treasury bond futures during the same eight-minute period.

Table of Contents

Goldman, Sachs & Co. has been named as a defendant in a purported class action filed on March 10, 2004 in the U.S. District Court for the Northern District of Illinois on behalf of holders of short positions in 30-year U.S. Treasury futures and options on the morning of October 31, 2001. The complaint alleges that the firm purchased 30-year bonds and futures prior to the Treasury's refunding announcement that morning based on non-public information about that announcement, and that such purchases increased the costs of covering such short positions. The complaint also names as defendants the Washington, D.C.-based political consultant who allegedly was the source of the information, a former Goldman, Sachs & Co. economist who allegedly received the information, and another company and one of its employees who also allegedly received and traded on the information prior to its public announcement. The complaint alleges violations of the federal commodities and antitrust laws, as well as Illinois statutory and common law, and seeks, among other things, unspecified damages including treble damages under the antitrust laws. On June 28, 2004, Goldman, Sachs & Co. moved to dismiss the complaint, and by a decision dated March 28, 2005, the district court dismissed the antitrust and Illinois state law claims but permitted the federal commodities law claims to proceed. On December 20, 2006, plaintiff moved for class certification.

Mutual Fund Matters

Goldman, Sachs & Co. and certain mutual fund affiliates have received subpoenas and requests for information from various governmental agencies and self-regulatory organizations including the SEC as part of the industry-wide investigation relating to the practices of mutual funds and their customers. Goldman, Sachs & Co. and its affiliates have cooperated with such requests.

The Goldman Sachs Group, Inc., Goldman, Sachs & Co. and various asset management affiliates and employees have been named as defendants in several putative consolidated class and derivative actions commenced in the U.S. District Court for the Southern District of New York beginning in April 2004 by purported shareholders of certain Goldman Sachs mutual funds. The consolidated complaint also names as nominal defendants certain of the Goldman Sachs family of mutual funds. The cases are brought on behalf of all persons or entities that held shares in these mutual funds between April 2, 1999 and January 9, 2004, and allege violations of the Investment Company Act of 1940, the Investment Advisers Act of 1940 and common law breaches of fiduciary duty. The complaint alleges, among other things, that Goldman Sachs charged the mutual funds improper Rule 12b-1 fees, paid excessive brokerage commissions and made other undisclosed payments to brokers in exchange for selling shares of the mutual funds, and made untrue statements of material fact in registration statements and reports filed pursuant to the Investment Company Act. The complaint further alleges that the funds' trustees, officers and directors breached their fiduciary duties by, among other things, failing to prevent such violations. The complaint seeks compensatory and punitive damages; rescission of the funds' investment advisory agreements with Goldman Sachs and recovery of fees paid; an accounting of all fund-related fees, commissions and other payments; restitution of all unlawfully or discriminatorily-obtained fees and charges; and costs and expenses incurred in connection with these lawsuits. Defendants moved to dismiss the complaint on May 2, 2005, and the motion was granted by a Memorandum and Order dated January 13, 2006, and plaintiffs appealed on February 22, 2006. On March 31, 2006, plaintiffs withdrew their appeal from active consideration but may reactivate the appeal within 15 days after entry of a mandate in an appeal involving other parties but similar issues, or not later than March 30, 2007.

Table of Contents

Refco Securities Litigation

Goldman, Sachs & Co. and the other lead underwriters for the August 2005 initial public offering of 26,500,000 shares of common stock of Refco Inc. are among the defendants in various putative class actions filed in the U.S. District Court for the Southern District of New York beginning in October 2005 by Refco Inc. investors in response to certain publicly reported events that culminated in the October 17, 2005 filing by Refco Inc. and certain affiliates for protection under U.S. bankruptcy laws. The actions, which have been consolidated, allege violations of the disclosure requirements of the federal securities laws and seek compensatory damages. In addition to the underwriters, the consolidated complaint names as defendants Refco Inc. and certain of its affiliates, certain officers and directors of Refco Inc., Thomas H. Lee Partners, L.P. (which held a majority of Refco Inc.'s equity through certain funds it manages), Grant Thornton (Refco Inc.'s outside auditor), and BAWAG P.S.K. Bank für Arbeit und Wirtschaft und Österreichische Postsparkasse Aktiengesellschaft (BAWAG). On September 8, 2006, lead plaintiffs filed a motion for preliminary approval of a proposed settlement with BAWAG, and various defendants (including the underwriters) have objected to certain terms of the settlement. By a decision dated January 9, 2007, the district court denied preliminary approval of the settlement, based on such objection. Goldman, Sachs & Co. underwrote 5,639,200 shares of common stock at a price of \$22 per share for a total offering price of approximately \$124 million.

A purported shareholder derivative action was filed in the U.S. District Court for the Southern District of New York on November 2, 2005 on behalf of The Goldman Sachs Group, Inc. against certain of its officers and directors. The complaint alleges that the individual defendants breached their fiduciary duties by failing to ensure that adequate due diligence was conducted in connection with the Refco Inc. initial public offering.

Goldman, Sachs & Co. has, together with other underwriters of the Refco Inc. initial public offering, received requests for information from various governmental agencies and self-regulatory organizations. Goldman, Sachs & Co. is cooperating with those requests.

Short-Selling Litigation

The Goldman Sachs Group, Inc., Goldman, Sachs & Co. and Goldman Sachs Execution & Clearing, L.P. are among the numerous financial services firms that have been named as defendants in a purported class action filed on April 12, 2006 in the U.S. District Court for the Southern District of New York by customers who engaged in short-selling transactions in equity securities since April 12, 2000. The amended complaint generally alleges that the customers were charged fees in connection with the short sales but that the applicable securities were not necessarily borrowed to effect delivery, resulting in failed deliveries, and that the defendants conspired to set a minimum threshold borrowing rate for securities designated as hard to borrow. The complaint asserts a claim under the federal antitrust laws, as well as claims under the New York Business Law and common law, and seeks treble damages as well as injunctive relief.

Table of Contents

Fannie Mae Litigation

Goldman, Sachs & Co. was added as a defendant in an amended complaint filed on August 14, 2006 in a purported class action, and The Goldman Sachs Group, Inc. and Goldman, Sachs & Co. were added as defendants in an amended complaint filed on September 1, 2006 in a separate shareholder derivative action, both pending in the U.S. District Court for the District of Columbia. The complaints' allegations generally arise from allegations concerning Fannie Mae's accounting practices and, insofar as they relate to the Goldman Sachs defendants, assert violations of the federal securities laws and common law in connection with certain Fannie Mae-sponsored REMIC transactions that were allegedly arranged by Goldman, Sachs & Co. The other defendants include Fannie Mae, certain of its past and present officers and directors, accountants and other financial services firms. On November 28, 2006, the plaintiffs in the derivative action voluntarily dismissed the Goldman Sachs defendants without prejudice, subject to an agreement to toll the statute of limitations. Goldman, Sachs & Co. moved to dismiss the class action claims on November 13, 2006.

Item 4. Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the fourth quarter of our fiscal year ended November 24, 2006.

Table of Contents

EXECUTIVE OFFICERS OF THE GOLDMAN SACHS GROUP, INC.

Set forth below are the name, age, present title, principal occupation and certain biographical information for our executive officers as of February 1, 2007, all of whom have been appointed by and serve at the pleasure of our board of directors.

Lloyd C. Blankfein, 52

Mr. Blankfein has been our Chairman and Chief Executive Officer since June 2006, and a director since April 2003. Previously, he had been our President and Chief Operating Officer since January 2004. Prior to that, from April 2002 until January 2004, he was a Vice Chairman of Goldman Sachs, with management responsibility for Goldman Sachs Fixed Income, Currency and Commodities Division (FICC) and Equities Division. Prior to becoming a Vice Chairman, he had served as co-head of FICC since its formation in 1997. From 1994 to 1997, he headed or co-headed the Currency and Commodities Division. Mr. Blankfein is not on the board of any public company other than Goldman Sachs. He is affiliated with certain non-profit organizations, including as a member of the Harvard University Committee on University Resources, the Advisory Board of the Tsinghua University School of Economics and Management and the Governing Board of the Indian School of Business, an overseer of the Weill Medical College of Cornell University, and a director of the Partnership for New York City, Catalyst and The Robin Hood Foundation.

Alan M. Cohen, 56

Mr. Cohen has been an Executive Vice President of Goldman Sachs and our Global Head of Compliance since February 2004. From 1991 until January 2004, he was a partner in the law firm of O Melveny & Myers LLP. Mr. Cohen is also a board member of the Chelsea Piers Scholarship Fund, a non-profit organization.

Gary D. Cohn, 46

Mr. Cohn has been our President and Co-Chief Operating Officer and a director since June 2006. Previously, he had been the co-head of Goldman Sachs global securities businesses since January 2004. He also had been the co-head of Equities since 2003 and the co-head of FICC since September 2002. From March 2002 to September 2002, he served as co-chief operating officer of FICC. Prior to that, beginning in 1999, Mr. Cohn managed the FICC macro businesses. From 1996 to 1999, he was the global head of Goldman Sachs commodities business. Mr. Cohn is not on the board of any public company other than Goldman Sachs. He is affiliated with certain non-profit organizations, including as a member of the Treasury Borrowing Advisory Committee of the Securities Industry and Financial Markets Association and as a trustee of the Gilmour Academy, the NYU Child Study Center, the NYU Hospital, the NYU Medical School, the Harlem Children's Zone, Columbia Grammar and Preparatory School and American University.

Edward C. Forst, 46

Mr. Forst has been an Executive Vice President of Goldman Sachs and our Chief Administrative Officer since February 2004. Prior to that, he was our Chief of Staff for FICC from November 2003 to February 2004 (after having served in that position earlier from July 2000 to March 2002), our Chief of Staff for the Equities Division from August 2003 to February 2004, and co-head of Global Credit Markets in FICC from March 2002 to August 2003. Prior to July 2000, Mr. Forst served as co-head of our Global Bank Debt business. Mr. Forst serves as Co-Chair of the Securities Industry and Financial Markets Association. He also serves as a trustee of the Woods Hole Oceanographic Institution, a non-profit organization, and as Co-Chair of the Harvard University Committee on Student Excellence and Opportunity.

Table of Contents

Kevin W. Kennedy, 58

Mr. Kennedy has been our Executive Vice President Human Capital Management since December 2001. From 1999 until 2001, he served as a member of the Executive Office. From 1994 to 1999, he served as head of the Americas Group, in the Investment Banking Division, and, from 1988 to 1994, as head of Corporate Finance. Mr. Kennedy is a life trustee and a former Chairman of the Board of Hamilton College, a Managing Director and Secretary and Treasurer of the Board of the Metropolitan Opera, a trustee of the New York Public Library, a member of the Board of Directors of the Wallace Foundation and an honorary trustee of the Chewonki Foundation.

Gregory K. Palm, 58

Mr. Palm has been an Executive Vice President of Goldman Sachs since May 1999, and our General Counsel and head or co-head of the Legal Department since May 1992.

Esta E. Stecher, 49

Ms. Stecher has been an Executive Vice President of Goldman Sachs and our General Counsel and co-head of the Legal Department since December 2000. From 1994 to 2000, she was head of the firm's Tax Department, over which she continues to have senior oversight responsibility. She is also a trustee of Columbia University.

David A. Viniar, 51

Mr. Viniar has been an Executive Vice President of Goldman Sachs and our Chief Financial Officer since May 1999. He has been the head of Operations, Technology, Finance and Services Division since December 2002. He was head of the Finance Division and co-head of Credit Risk Management and Advisory and Firmwide Risk from December 2001 to December 2002. Mr. Viniar was co-head of Operations, Finance and Resources from March 1999 to December 2001. He was Chief Financial Officer of The Goldman Sachs Group, L.P. from March 1999 to May 1999. From July 1998 until March 1999, he was Deputy Chief Financial Officer and from 1994 until July 1998, he was head of Finance, with responsibility for Controllers and Treasury. From 1992 to 1994, he was head of Treasury and prior to that was in the Structured Finance Department of Investment Banking. He also serves on the Board of Trustees of Union College.

John S. Weinberg, 49

Mr. Weinberg has been a Vice Chairman of Goldman Sachs since June 2006. He has been co-head of Goldman Sachs Investment Banking Division since December 2002. From January 2002 to December 2002, he was co-head of the Investment Banking Division in the Americas. Prior to that, he served as co-head of the Investment Banking Services Department since 1997. He is affiliated with certain non-profit organizations, including as a board member at the New York-Presbyterian Hospital, The Steppingstone Foundation, the Greenwich Country Day School and Community Anti-Drug Coalitions of America.

Jon Winkelried, 47

Mr. Winkelried has been our President and Co-Chief Operating Officer and a director since June 2006. Previously, he had been the co-head of Goldman Sachs Investment Banking Division since January 2005. From 2000 to 2005, he was co-head of FICC. From 1999 to 2000, he was head of FICC in Europe. From 1995 to 1999, he was responsible for Goldman Sachs leveraged finance business. Mr. Winkelried is not on the board of any public company other than Goldman Sachs. He is also a trustee of the University of Chicago.

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

The principal market on which our common stock is traded is the NYSE. Information relating to the high and low sales prices per share of our common stock, as reported by the Consolidated Tape Association, for each full quarterly period during fiscal 2005 and 2006 is set forth under the heading "Supplemental Financial Information - Common Stock Price Range" in Part II, Item 8 of the Annual Report on Form 10-K. As of January 26, 2007, there were 6,804 holders of record of our common stock.

During fiscal 2005 and 2006, dividends of \$0.25 per share of common stock were declared on December 15, 2004, March 16, 2005, June 15, 2005, September 19, 2005 and December 14, 2005, and dividends of \$0.35 per share of common stock were declared on March 13, 2006, June 12, 2006 and September 11, 2006. The holders of our common stock share proportionately on a per share basis in all dividends and other distributions on common stock declared by our board of directors.

The declaration of dividends by Goldman Sachs is subject to the discretion of our board of directors. Our board of directors will take into account such matters as general business conditions, our financial results, capital requirements, contractual, legal and regulatory restrictions on the payment of dividends by us to our shareholders or by our subsidiaries to us, the effect on our debt ratings and such other factors as our board of directors may deem relevant. See "Business Regulation" in Part I, Item 1 of the Annual Report on Form 10-K for a discussion of potential regulatory limitations on our receipt of funds from our regulated subsidiaries.

The table below sets forth the information with respect to purchases made by or on behalf of The Goldman Sachs Group, Inc. or any affiliated purchaser (as defined in Rule 10b-18(a)(3) under the Securities Exchange Act of 1934), of our common stock during the fourth quarter of our fiscal year ended November 24, 2006.

Period	Total Number of Shares Purchased ⁽²⁾	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs ⁽³⁾	Maximum Number of Shares That May Yet Be Purchased Under the Plans or Programs ⁽³⁾
Month #1 (August 26, 2006 to September 29, 2006)	7,109,500	\$165.99	7,109,500	66,231,884
Month #2 (September 30, 2006 to October 27, 2006)	11,668,000	\$179.68	11,668,000	54,563,884
Month #3 (October 28, 2006 to November 24, 2006)	1,994,971	\$188.26	1,994,971	52,568,913
Total ⁽¹⁾	20,772,471	\$175.82	20,772,471	

- (1) Goldman Sachs generally does not repurchase shares of its common stock as part of the repurchase program during self-imposed black-out periods, which run from the last two weeks of a fiscal quarter through and including the date of the earnings release for such quarter.
- (2) No shares were purchased other than through our publicly announced repurchase program during the fourth quarter of our fiscal year ended November 24, 2006.
- (3) On March 21, 2000, we announced that our board of directors had approved a repurchase program, pursuant to which up to 15 million shares of our common stock may be repurchased. This repurchase program was increased by an aggregate of 220 million shares by resolutions of our board of directors adopted on June 18, 2001, March 18, 2002, November 20, 2002, January 30, 2004, January 25, 2005, September 16, 2005 and September 11, 2006. We use our repurchase program to help maintain the appropriate level of common equity and to substantially offset

Table of Contents

increases in share count over time resulting from employee share-based compensation. The repurchase program is effected primarily through regular open-market purchases and is influenced by our overall capital position (the comparison of our capital requirements to our current level of available capital), general market conditions and the prevailing price and trading volumes of our common stock. The total remaining authorization under the repurchase program was 39,890,613 shares as of January 26, 2007. The repurchase program has no set expiration or termination date.

Information relating to compensation plans under which equity securities of the Registrant are authorized for issuance is set forth in Part III, Item 12 of the Annual Report on Form 10-K.

Item 6. Selected Financial Data

The Selected Financial Data table is set forth under Part II, Item 8 of the Annual Report on Form 10-K.

Introduction

Goldman Sachs is a leading global investment banking, securities and investment management firm that provides a wide range of services worldwide to a substantial and diversified client base that includes corporations, financial institutions, governments and high-net-worth individuals.

Our activities are divided into three segments:

Investment Banking. We provide a broad range of investment banking services to a diverse group of corporations, financial institutions, investment funds, governments and individuals.

Trading and Principal Investments. We facilitate client transactions with a diverse group of corporations, financial institutions, investment funds, governments and individuals and take proprietary positions through market making in, trading of and investing in fixed income and equity products, currencies, commodities and derivatives on these products. In addition, we engage in specialist and market-making activities on equities and options exchanges and we clear client transactions on major stock, options and futures exchanges worldwide. In connection with our merchant banking and other investing activities, we make principal investments directly and through funds that we raise and manage.

Asset Management and Securities Services. We provide investment advisory and financial planning services and offer investment products (primarily through separate accounts and funds) across all major asset classes to a diverse group of institutions and individuals worldwide and provide prime brokerage services, financing services and securities lending services to institutional clients, including hedge funds, mutual funds, pension funds and foundations, and to high-net-worth individuals worldwide.

Unless specifically stated otherwise, all references to 2006, 2005 and 2004 refer to our fiscal years ended, or the dates, as the context requires, November 24, 2006, November 25, 2005 and November 26, 2004, respectively.

When we use the terms Goldman Sachs, we, us and our, we mean The Goldman Sachs Group, Inc. (Group Inc.), a Delaware corporation, and its consolidated subsidiaries. References herein to the Annual Report on Form 10-K are to our Annual Report on Form 10-K for the fiscal year ended November 24, 2006.

In this discussion, we have included statements that may constitute forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements are not historical facts but instead represent only our beliefs regarding future events, many of which, by their nature, are inherently uncertain and outside our control. These statements may relate to our future plans and objectives, among other things. By identifying these statements for you in this manner, we are alerting you to the possibility that our actual results may differ, possibly materially, from the anticipated results indicated in these forward-looking statements. Important factors that could cause our results to differ, possibly materially, from those indicated in the forward-looking statements include, among others, those discussed below under Certain Risk Factors That May Affect Our Business as well as Risk Factors in Part I, Item 1A of the Annual Report on Form 10-K and

Cautionary Statement Pursuant to the Private Securities Litigation Reform Act of 1995 in Part I, Item 1 of the Annual Report on Form 10-K.

Table of Contents**Executive Overview**

Our diluted earnings per common share were \$19.69 for 2006, compared with \$11.21 for 2005. Return on average tangible common shareholders' equity⁽¹⁾ was 39.8% and return on average common shareholders' equity was 32.8%. Excluding non-cash expenses of \$637 million related to the accounting for certain share-based awards under SFAS No. 123-R ⁽²⁾, diluted earnings per common share for the year were \$20.57 ⁽²⁾, return on average tangible common shareholders' equity⁽¹⁾ was 41.8% ⁽²⁾ and return on average common shareholders' equity was 34.4%⁽²⁾.

In 2006, we generated record diluted earnings per common share, which exceeded the prior year record results by 76%. Each of our three segments achieved record results. The increase in Trading and Principal Investments reflected significantly higher net revenues in Fixed Income, Currency and Commodities (FICC), Equities and Principal Investments. The increase in FICC reflected particularly strong performances across all major businesses. During 2006, FICC operated in an environment characterized by strong customer-driven activity and favorable market opportunities. The increase in Equities primarily reflected significantly higher net revenues in our customer franchise business. During 2006, Equities operated in a favorable environment characterized by strong customer-driven activity, generally higher equity prices and favorable market opportunities, although volatility levels were generally low. In FICC and Equities, as a result of the favorable trading and investing opportunities for our clients and ourselves, we increased our market risk, particularly in equity products, to capitalize on these opportunities. We grew our balance sheet as needed to support these opportunities as well as to support increased activity in Securities Services. The increase in Principal Investments reflected a significant gain related to our investment in the ordinary shares of Industrial and Commercial Bank of China Limited (ICBC) and higher gains and overrides from other principal investments, partially offset by a smaller, but still significant, gain related to our investment in the convertible preferred stock of Sumitomo Mitsui Financial Group, Inc. (SMFG). The increase in Investment Banking was due to significantly higher net revenues in Underwriting and Financial Advisory, as we benefited from strong client activity levels, reflecting favorable equity and financing markets, strong CEO confidence and growth in financial sponsor activity. The increase in Asset Management and Securities Services was primarily due to higher assets under management and significantly higher incentive fees, as well as significantly higher global customer balances in Securities Services. Assets under management increased \$144 billion or 27% to a record \$676 billion, including net asset inflows of \$94 billion during 2006.

Looking forward to 2007, our investment banking backlog at the end of 2006 was at its highest level since 2000 ⁽³⁾. In addition to potential growth in the businesses and geographic areas in which we currently operate, the expansion of the economies of China, India, Russia and Brazil, as well as those of the Middle East offer new opportunities for us to increase our presence in those markets. In Investment Banking, there is growth potential to broaden our client base by providing strategic and financing advice and capital to middle-market companies. We also see opportunities to advise governments and investors on the sale and purchase of public infrastructure assets. In addition, we are building a private banking capability as part of our strategy to provide a full-range of services to our private wealth management clients.

Though we generated record operating results in 2006, our business, by its nature, does not produce predictable earnings. Our results in any given period can be materially affected by conditions in global financial markets and economic conditions generally. For a further discussion of the factors that may affect our future operating results, see **Certain Risk Factors That May Affect Our Business** below as well as **Risk Factors** in Part I, Item 1A of the Annual Report on Form 10-K.

⁽¹⁾ Return on average tangible common shareholders' equity is computed by dividing net earnings applicable to common shareholders by average monthly tangible common shareholders' equity. See **Results of Operations** **Financial Overview** below for further information regarding our calculation of return on average tangible common shareholders' equity.

Table of Contents

- (2) Statement of Financial Accounting Standards (SFAS) No. 123-R, Share-Based Payment, focuses primarily on accounting for transactions in which an entity obtains employee services in exchange for share-based payments. In the first quarter of 2006, we adopted SFAS No. 123-R, which requires that share-based awards held by employees that were retirement-eligible, including those subject to non-compete agreements, be expensed in the year of grant. In addition to expensing current year awards, prior year awards must continue to be amortized over the relevant service period. Therefore, our compensation and benefits expenses in 2006 included (and, to a lesser extent, 2007 and 2008 will include) both amortization of prior year share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R and new awards granted to those employees. We believe that presenting our results excluding the impact of the continued amortization of these prior year share-based awards increases the comparability of period-to-period operating results and allows for a more meaningful representation of the relationship of current period compensation to net revenues.

The following tables set forth a reconciliation of diluted earnings per common share, common shareholders' equity and net earnings applicable to common shareholders, as reported, to these items excluding the impact of the continued amortization of these prior year share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R:

	Year Ended November 2006
Diluted earnings per common share	\$19.69
Impact of the continued amortization of prior year share-based awards, net of tax	0.88
Diluted earnings per common share, excluding the impact of the continued amortization of prior year share-based awards	\$20.57

	Average for the Year Ended November 2006
	(in millions)
Total shareholders' equity	\$31,048
Preferred stock	(2,400)
Common shareholders' equity	28,648
Impact of the continued amortization of prior year share-based awards, net of tax	(122)
Common shareholders' equity, excluding the impact of the continued amortization of prior year share-based awards	28,526
Goodwill and identifiable intangible assets, excluding power contracts (see footnote 1 above)	(5,013)
Tangible common shareholders' equity (see footnote 1 above), excluding the impact of the continued amortization of prior year share-based awards	\$23,513

	Year Ended November 2006
	(in millions)
Net earnings applicable to common shareholders	\$9,398
Impact of the continued amortization of prior year share-based awards, net of tax	421
Net earnings applicable to common shareholders, excluding the impact of the continued amortization of prior year share-based awards	\$9,819

⁽³⁾ Our investment banking backlog represents an estimate of our future net revenues from investment banking transactions where we believe that future revenue realization is more likely than not.

Table of Contents**Business Environment**

As an investment banking, securities and investment management firm, our businesses are materially affected by conditions in the financial markets and economic conditions generally, both in the United States and elsewhere around the world. A favorable business environment is generally characterized by, among other factors, high global gross domestic product growth, stable geopolitical conditions, transparent and efficient capital markets, low inflation, high business and investor confidence and strong business earnings. These factors provide a positive climate for our investment banking activities, for many of our trading businesses and for wealth creation, which contributes to growth in our asset management business. Although global short-term interest rates rose to modest levels and yield curves continued to flatten in 2006, economic conditions remained favorable, as global equity prices generally rose, core inflation was broadly contained and corporate activity strengthened. For a further discussion of how market conditions can affect our businesses, see **Certain Risk Factors That May Affect Our Business** below as well as **Risk Factors** in Part I, Item 1A of the Annual Report on Form 10-K. A further discussion of the business environment in 2006 is set forth below.

Global. After solid economic growth in 2005, the global economy grew at a strong pace in 2006, particularly during the first half of the year. However, during the second half of the year, economic growth in the United States and Japan showed some signs of deceleration, while the pace of growth in the Eurozone economy appeared to strengthen. Corporate activity was very strong, as mergers and acquisitions and equity and debt underwriting volumes increased significantly compared with 2005. The U.S. Federal Reserve continued to raise rates in the first half of the year, increasing its federal funds target rate by a total of 125 basis points. Despite the increase in short-term rates, fixed income markets were favorable as long-term bond yields remained low and the credit environment remained strong. Oil prices remained high throughout the year, despite declining during our fourth quarter, but this did not appear to materially affect consumer spending or global growth. In the currency markets, the U.S. dollar weakened against most major currencies, as well as against such emerging market currencies as the Brazilian real, Chinese yuan and Korean won.

United States. The U.S. economy grew at a strong pace during the year as financial conditions remained supportive of economic activity. Real gross domestic product rose by 3.4% in the 2006 calendar year, driven principally by strength in the industrial sector, solid consumer expenditure growth and a strong labor market. This growth occurred despite a decline in the housing market and residential investment. After slowing modestly in the beginning of 2006, the rate of inflation increased, particularly in the second quarter, as energy prices rose significantly. Measures of core inflation also accelerated, although they eased towards the end of the calendar year. In response to the strong economic growth and rising inflation, the U.S. Federal Reserve raised its federal funds target rate by 25 basis points in each of its meetings in 2006 through June, bringing the rate to 5.25%. However, the Federal Reserve kept rates unchanged for the remainder of the year as the pace of growth moderated, reflecting a decline in the U.S. housing market and the delayed effects of higher interest rates and energy prices. Despite the rise in short-term interest rates, the 10-year U.S. Treasury note yield ended the year only 12 basis points higher at 4.55%. The Dow Jones Industrial Average, S&P 500 Index and NASDAQ Composite Index increased by 12%, 10% and 9%, respectively, during our fiscal year.

Europe. The pace of economic growth in Europe accelerated as real gross domestic product in the Eurozone economy grew by approximately 2.7% in the 2006 calendar year. Despite a higher Euro, economic conditions in the Eurozone countries improved throughout the year, and consumer sentiment began to improve as a result of lower unemployment levels and higher domestic demand. After leaving rates unchanged for over two years, the European Central Bank raised interest rates by a total of 125 basis points during our 2006 fiscal year, bringing its policy rate to 3.25%. In the United Kingdom, real gross domestic product growth accelerated to approximately 2.7% in the 2006 calendar year, primarily reflecting strong investment spending. The Bank of England increased interest rates by 50 basis points to 5.00%, after having reduced rates by 25 basis points in 2005.

Table of Contents

Long-term bond yields in both the Eurozone and the United Kingdom ended our fiscal year modestly higher. Reflecting the improvement in economic growth, European equity markets increased significantly during our fiscal year.

Asia. Japan's economy grew at a relatively strong pace for the second year in a row, with real gross domestic product increasing by approximately 2.2% in the 2006 calendar year. The recovery in private investment and domestic demand continued to drive much of the improvement in the first part of the year, while exports drove real gross domestic product growth toward the end of the calendar year. The unemployment rate fell to 4.2% in 2006 from 4.4% in calendar 2005. The Bank of Japan ended its zero interest rate policy, which had been in place since early 2001, and raised the target overnight call rate by 25 basis points during our fiscal year. The yield on 10-year Japanese government bonds increased slightly, ending our fiscal year up 17 basis points. Despite slightly higher short- and long-term interest rates, financial conditions remained supportive of economic activity. The yen appreciated slightly against the U.S. dollar, but declined against most other major currencies, while the Nikkei 225 Index increased 6% during our fiscal year.

Elsewhere in Asia, China's real gross domestic product growth remained robust, with growth particularly reliant on net exports, as demonstrated by China's large current account surplus. China continued to allow its currency to appreciate modestly, with evidence of acceleration during the second half of the calendar year, ending our fiscal year nearly 3% higher against the U.S. dollar. Other currencies in the region also strengthened against the U.S. dollar, including the Korean won, Philippine peso and the Taiwan dollar. Growth in India also remained strong, which, together with China, supported growth throughout the region. Equity markets across the region generally rose, with markets in China, India, Hong Kong, South Korea and Taiwan all posting significant gains during our fiscal year.

Certain Risk Factors That May Affect Our Business

We face a variety of risks that are substantial and inherent in our businesses, including market, liquidity, credit, operational, legal and regulatory risks. For a discussion of how management seeks to manage some of these risks, see [Risk Management](#) below. A summary of the more important factors that could affect our business follows below. For a further discussion of these and other important factors that could affect our business, see [Risk Factors](#) in Part I, Item 1A of the Annual Report on Form 10-K.

Market Conditions and Market Risk. Our businesses are materially affected by conditions in the global financial markets and economic conditions generally, and these conditions may change suddenly and dramatically. A favorable business environment is generally characterized by, among other factors, high global gross domestic product growth, stable geopolitical conditions, transparent and efficient capital markets, low inflation, high business and investor confidence and strong business earnings. Unfavorable or uncertain economic and market conditions, which can be caused by outbreaks of hostilities or other geopolitical instability, declines in business confidence, increases in inflation, corporate, political or other scandals that reduce investor confidence in capital markets, natural disasters or pandemics or a combination of these or other factors, have adversely affected, and may in the future adversely affect, our business and profitability in many ways, including the following:

We have been operating in a low interest rate market for the past several years. Increasing or high interest rates and/or widening credit spreads, especially if such changes are rapid, may create a less favorable environment for certain of our businesses.

We have been committing increasing amounts of capital in many of our businesses and generally maintain large trading, specialist and investing positions. Market fluctuations and volatility may adversely affect the value of those positions, including, but not limited to, our interest rate and credit products, currency, commodity and equity positions and our merchant banking investments, or may reduce our willingness to enter into new transactions. From time

Table of Contents

to time, we have incurred significant trading losses in periods of market turbulence. Conversely, certain of our trading businesses depend on market volatility to provide trading and arbitrage opportunities, and decreases in volatility may reduce these opportunities and adversely affect the results of these businesses.

Industry-wide declines in the size and number of underwritings and mergers and acquisitions may have an adverse effect on our revenues and, because we may be unable to reduce expenses correspondingly, our profit margins. In particular, because a significant portion of our investment banking revenues are derived from our participation in large transactions, a decrease in the number of large transactions due to uncertain or unfavorable market conditions may adversely affect our investment banking business.

Pricing and other competitive pressures have continued, even as the volume and number of investment banking transactions have increased. In addition, the trend in the underwriting business toward multiple book runners and co-managers handling transactions, where previously there would have been a single book runner, has adversely affected our business and reduced our revenues.

Reductions in the level of the equity markets or increases in interest rates tend to reduce the value of our clients portfolios, which in turn may reduce the fees we earn for managing assets. Increases in interest rates or attractive conditions in other investments could cause our clients to transfer their assets out of our funds or other products. Even in the absence of uncertain or unfavorable economic or market conditions, investment performance by our asset management business below the performance of benchmarks or competitors could result in a decline in assets under management and in the incentive and management fees we receive as well as reputational damage that might make it more difficult to attract new investors.

Concentration of risk increases the potential for significant losses in our market-making, proprietary trading and investing, block trading, merchant banking, underwriting and lending businesses. This risk may increase to the extent we expand our proprietary trading and investing businesses or commit capital to facilitate customer-driven business. For example, in recent years large blocks of securities have increasingly been sold in block trades rather than on a marketed basis, which increases the risk that Goldman Sachs may be unable to resell the purchased securities at favorable prices and may incur significant losses as a result. Moreover, because of concentration of risk, we may suffer losses even when economic and market conditions are generally favorable for others in the industry. We also regularly enter into large transactions as part of our trading businesses. The number and size of such transactions may affect our results of operations in a given period.

The volume of transactions that we execute for our clients and as a specialist or market maker may decline, which would reduce the revenues we receive from commissions and spreads. In addition, competitive pressures and other industry factors, including the increasing use by our clients of low-cost electronic trading, could cause a reduction in commissions and spreads. In our specialist businesses, we are obligated by stock exchange rules to maintain an orderly market, including by purchasing shares in a declining market. This may result in trading losses and an increased need for liquidity. Weakness in global equity markets and the trading of securities in multiple markets and on multiple exchanges could adversely impact our trading businesses and impair the value of our goodwill and identifiable intangible assets. In addition, competitive pressures have been particularly intense in the context of block trades. For a further discussion of our goodwill and identifiable intangible assets, see Critical Accounting Policies Goodwill and Identifiable Intangible Assets below.

Table of Contents

While we employ a broad and diversified set of risk monitoring and risk mitigation techniques, those techniques and the judgments that accompany their application cannot anticipate every economic and financial outcome or the specifics and timing of such outcomes. Thus, we may, in the course of our activities, incur losses.

Market volatility has been relatively low in recent years. An increase in volatility would increase our measured risk, which might cause us to reduce our proprietary positions or to reduce certain of our business activities. In such circumstances, we may not be able to reduce our positions or our exposure in a timely, cost-effective way or in a manner sufficient to offset the increase in measured risk.

Liquidity Risk. Liquidity is essential to our businesses. Our liquidity could be impaired by an inability to access secured and/or unsecured debt markets, an inability to access funds from our subsidiaries, an inability to sell assets or unforeseen outflows of cash or collateral. This situation may arise due to circumstances that we are unable to control, such as a general market disruption or an operational problem that affects third parties or us. The financial instruments that we hold and the contracts to which we are a party are increasingly complex, as we employ structured products to benefit our clients and ourselves, and these complex structured products often do not have readily available markets to access in times of liquidity stress. Growth of our proprietary investing activities may lead to situations where the holdings from these activities represent a significant portion of specific markets, which could restrict liquidity for our positions. Further, our ability to sell assets may be impaired if other market participants are seeking to sell similar assets at the same time.

Our credit ratings are important to our liquidity. A reduction in our credit ratings could adversely affect our liquidity and competitive position, increase our borrowing costs, limit our access to the capital markets or trigger our obligations under certain bilateral provisions in some of our trading and collateralized financing contracts. Under these provisions, counterparties could be permitted to terminate contracts with Goldman Sachs or require us to post additional collateral. Termination of our trading and collateralized financing contracts could cause us to sustain losses and impair our liquidity by requiring us to find other sources of financing or to make significant cash payments or securities movements. For a discussion of the potential impact on Goldman Sachs of a reduction in our credit ratings, see [Liquidity and Funding Risk](#) [Credit Ratings](#) below.

Credit Risk. We are exposed to the risk that third parties that owe us money, securities or other assets will not perform their obligations. These parties may default on their obligations to us due to bankruptcy, lack of liquidity, operational failure or other reasons. We are also subject to the risk that our rights against third parties may not be enforceable in all circumstances. In addition, a deterioration in the credit quality of third parties whose securities or obligations we hold could result in losses and/or adversely affect our ability to rehypothecate or otherwise use those securities or obligations for liquidity purposes. A significant downgrade in the credit ratings of our counterparties could also have a negative impact on our results. The amount and duration of our credit exposures have been increasing over the past several years, as has the breadth of the entities to which we have credit exposures. As a clearing member firm, we finance our client positions, and we could be held responsible for the defaults or misconduct of our clients. In addition, we have experienced, due to competitive factors, pressure to extend and price credit at levels that may not always fully compensate us for the risks we take. In particular, corporate clients sometimes seek to require credit commitments from us in connection with investment banking and other assignments. Although we regularly review credit exposures to specific clients and counterparties and to specific industries, countries and regions that we believe may present credit concerns, default risk may arise from events or circumstances that are difficult to detect or foresee, particularly as new business initiatives lead us to transact with a broader array of clients, with new asset classes and in new markets. In addition, concerns about, or a default by, one institution could lead to significant liquidity problems, losses or defaults by other institutions, which in turn could adversely affect Goldman Sachs.

Table of Contents

Operational Risk. Shortcomings or failures in our internal processes, people or systems, or external events could lead to impairment of our liquidity, financial loss, disruption of our businesses, liability to clients, regulatory intervention or reputational damage. For example, our businesses are highly dependent on our ability to process, on a daily basis, a large number of transactions across numerous and diverse markets in many currencies. The transactions we process have become increasingly complex and often must adhere to client-specific guidelines, as well as legal and regulatory standards. Despite the contingency plans and facilities we have in place, our ability to conduct business may be adversely impacted by a disruption in the infrastructure that supports our businesses and the communities in which we are located. This may include a disruption involving electrical, communications, transportation or other services used by Goldman Sachs or third parties with which we conduct business.

Legal and Regulatory Risk. We are subject to extensive and evolving regulation in jurisdictions around the world. Substantial legal liability or a significant regulatory action against Goldman Sachs could have material adverse financial effects or cause significant reputational harm to Goldman Sachs, which in turn could seriously harm our business prospects. Firms in the financial services industry have been operating in a difficult regulatory environment. We face significant legal risks in our businesses, and the volume of claims and amount of damages and penalties claimed in litigation and regulatory proceedings against financial institutions remain high. For a discussion of how we account for our legal and regulatory exposures, see [Use of Estimates](#) below.

Investment-grade
corporate bonds

Collateralized debt obligations	192	4,199		121	4,512
Other debt securities	115	31	52	54	252
Total	\$2,704	\$6,664	\$240	\$337	\$9,945

- (2) Excludes assets related to consolidated merchant banking funds of \$6.03 billion and \$1.93 billion as of November 2006 and November 2005, respectively, for which Goldman Sachs is not at risk.
- (3) Represents an economic hedge on the unrestricted shares of common stock underlying our investment in the convertible preferred stock of SMFG. For a further discussion of our investment in SMFG, see Principal Investments below.

Table of Contents

Cash Trading Instruments. The following table sets forth the valuation of our cash trading instruments by level of price transparency:

Cash Trading Instruments by Price Transparency

(in millions)

As of November

	2006		2005	
	Financial Instruments Owned, At Fair Value	Financial Instruments Sold, But Not Yet Purchased, At Fair Value	Financial Instruments Owned, At Fair Value	Financial Instruments Sold, But Not Yet Purchased, At Fair Value
Quoted prices or alternative pricing sources with reasonable price transparency	\$231,012	\$87,110	\$198,233	\$89,565
Little or no price transparency	16,019	134	11,809	170
Total	\$247,031	\$87,244	\$210,042	\$89,735

Fair values of our cash trading instruments are generally obtained from quoted market prices in active markets, broker or dealer price quotations, or alternative pricing sources with reasonable levels of price transparency. The types of instruments valued in this manner include U.S. government and agency securities, other sovereign government obligations, liquid mortgage products, investment-grade and high-yield corporate bonds, listed equities, money market securities, state, municipal and provincial obligations, and physical commodities.

Certain cash trading instruments trade infrequently and have little or no price transparency. Such instruments include certain corporate bank loans, mortgage whole loans and distressed debt. We value these instruments initially at cost and generally do not adjust valuations unless there is substantive evidence supporting a change in the value of the underlying instrument or valuation assumptions (such as similar market transactions, changes in financial ratios or changes in the credit ratings of the underlying companies). Where there is evidence supporting a change in the value, we use valuation methodologies such as the present value of known or estimated cash flows.

Cash trading instruments we own (long positions) are marked to bid prices, and instruments we have sold but not yet purchased (short positions) are marked to offer prices. In certain circumstances, such as for positions that are illiquid or have transfer restrictions, the fair value reflects liquidity valuation adjustments based on market evidence or predetermined policies. For certain highly illiquid positions, management's estimates are used to determine these liquidity valuation adjustments. See **Recent Accounting Developments** below for a discussion of the impact of SFAS No. 157, **Fair Value Measurements** on the valuation of financial instruments.

Table of Contents

Derivative Contracts. Derivative contracts consist of exchange-traded and over-the-counter (OTC) derivatives. The following table sets forth the fair value of our exchange-traded and OTC derivative assets and liabilities:

Derivative Assets and Liabilities
(in millions)

As of November

	2006		2005	
	Assets	Liabilities	Assets	Liabilities
Exchange-traded derivatives	\$14,407	\$13,851	\$10,869	\$ 9,083
OTC derivatives	53,136	51,645	47,663	48,746
Total	\$67,543 ⁽¹⁾	\$65,496 ⁽²⁾	\$58,532 ⁽¹⁾	\$57,829 ⁽²⁾

⁽¹⁾ Net of cash received pursuant to credit support agreements of \$24.06 billion and \$22.61 billion as of November 2006 and November 2005, respectively.

⁽²⁾ Net of cash paid pursuant to credit support agreements of \$16.00 billion and \$16.10 billion as of November 2006 and November 2005, respectively.

Fair values of our exchange-traded derivatives are generally determined from quoted market prices. OTC derivatives are valued using valuation models. We use a variety of valuation models including the present value of known or estimated cash flows and option-pricing models. The valuation models that we use to derive the fair values of our OTC derivatives require inputs including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. The selection of a model to value an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability of pricing information in the market. We generally use similar models to value similar instruments. Where possible, we verify the values produced by our pricing models to market transactions. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model selection does not involve significant judgment because market prices are readily available. For OTC derivatives that trade in less liquid markets, model selection requires more judgment because such instruments tend to be more complex and pricing information is less available in these markets. Price transparency is inherently more limited for more complex structures because they often combine one or more product types, requiring additional inputs such as correlations and volatilities. As markets continue to develop and more pricing information becomes available, we continue to review and refine the models that we use.

At the inception of an OTC derivative contract (day one), we value the contract at the model value if we can verify all of the significant model inputs to observable market data and verify the model to market transactions. When appropriate, valuations are adjusted to reflect various factors such as liquidity, bid/offer spreads and credit considerations. These adjustments are generally based on market evidence or predetermined policies. In certain circumstances, such as for highly illiquid positions, management's estimates are used to determine these adjustments.

Where we cannot verify all of the significant model inputs to observable market data and verify the model to market transactions, we value the contract at the transaction price at inception and, consequently, record no day one gain or loss in accordance with Emerging Issues Task Force (EITF) Issue No. 02-3, *Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities*.

Following day one, we adjust the inputs to our valuation models only to the extent that changes in these inputs can be verified by similar market transactions, third-party pricing services and/or broker quotes, or can be derived from other substantive evidence such as empirical market data. In circumstances where we cannot verify the model to market transactions, it is possible that a different valuation model could produce a materially different estimate of fair value. See Recent Accounting Developments below for a discussion of the impact of SFAS No. 157 on the valuation of financial instruments.

Table of Contents

The following tables set forth the fair values of our OTC derivative assets and liabilities by product and by remaining contractual maturity:

OTC Derivatives

(in millions)

Total	\$13,411	\$4,313	\$17,288	\$7,436	\$6,298	\$48,746

⁽¹⁾ Includes credit-related derivatives.

We enter into certain OTC option transactions that provide us or our counterparties with the right to extend the maturity of the underlying contract. The fair value of these option contracts is not material to the aggregate fair value of our OTC derivative portfolio. In the tables above, for option contracts that require settlement by delivery of an underlying derivative instrument, the remaining contractual maturity is generally classified based upon the maturity date of the underlying derivative instrument. In those instances where the underlying instrument does not have a maturity date or either counterparty has the right to settle in cash, the remaining contractual maturity is generally based upon the option expiration date.

Table of Contents

Principal Investments. The following table sets forth the carrying value of the investments included within the Principal Investments component of our Trading and Principal Investments segment. These investments consist of private investments, investments in the convertible preferred stock of SMFG and the ordinary shares of ICBC, and other public investments:

Principal Investments
(in millions)

As of November

	2006			2005		
	Corporate	Real Estate	Total	Corporate	Real Estate	Total
Private	\$ 2,741	\$555	\$ 3,296	\$1,538	\$716	\$2,254
Public	934	33	967	185	29	214
Subtotal ⁽¹⁾	3,675	588	4,263	1,723	745	2,468
SMFG convertible preferred stock ^{(2) (3)}	4,505		4,505	4,058		4,058
ICBC ordinary shares ⁽⁴⁾	5,194		5,194			
Total	\$13,374	\$588	\$13,962	\$5,781	\$745	\$6,526

⁽¹⁾ Excludes assets related to consolidated merchant banking funds of \$6.03 billion and \$1.93 billion as of November 2006 and November 2005, respectively, for which Goldman Sachs is not at risk.

⁽²⁾ The fair value of our Japanese yen-denominated investment in the convertible preferred stock of SMFG includes the effect of foreign exchange revaluation. We mitigate our economic exposure to exchange rate movements on our investment in SMFG by borrowing Japanese yen. Foreign exchange revaluation on the investment and the related borrowing are generally equal and offsetting. For example, if the Japanese yen appreciates against the U.S. dollar, the U.S. dollar carrying value of our SMFG investment will increase and the U.S. dollar carrying value of the related borrowing will also increase by an amount that is generally equal and offsetting.

⁽³⁾ Excludes an economic hedge on the unrestricted shares of common stock underlying our investment in the convertible preferred stock of SMFG. The fair value of this hedge was \$3.07 billion and \$1.51 billion as of November 2006 and November 2005, respectively, and is reflected in Financial instruments sold, but not yet purchased, at fair value in the consolidated statements of financial condition. For a further discussion of the restrictions on our ability to hedge or sell the common stock underlying our investment in SMFG, see below.

⁽⁴⁾ Includes interests of \$3.28 billion as of November 2006 held by investment funds managed by Goldman Sachs. The fair value of our investment in the ordinary shares of ICBC, which trade on The Stock Exchange of Hong Kong, includes the effect of foreign exchange revaluation.

Our private principal investments, by their nature, have little or no price transparency. Such investments are initially carried at cost as an approximation of fair value. Adjustments to carrying value are made if there are third-party transactions evidencing a change in value. Downward adjustments are also made, in the absence of third-party transactions, if we determine that the expected realizable value of the investment is less than the carrying value. In reaching that determination, we consider many factors including, but not limited to, the operating cash flows and financial performance of the companies or properties relative to budgets or projections, trends within sectors and/or regions, underlying business models, expected exit timing and strategy, and any specific rights or terms associated with the investment, such as conversion features and liquidation preferences. See Recent Accounting Developments below for a discussion of the impact of SFAS No. 157 on the valuation of financial instruments.

Our public principal investments, which tend to be large, concentrated holdings that result from initial public offerings or other corporate transactions, are valued using quoted market prices less a liquidity valuation adjustment based on predetermined written policies.

Table of Contents

Our investment in the convertible preferred stock of SMFG is carried at fair value, which is derived from a model that incorporates SMFG's common stock price and credit spreads, the impact of nontransferability and illiquidity, and downside protection on the conversion strike price. The fair value of our investment is particularly sensitive to movements in the SMFG common stock price. As a result of downside protection on the conversion strike price, the relationship between changes in the fair value of our investment and changes in SMFG's common stock price would be nonlinear for a significant decline in the SMFG common stock price. During the year, the fair value of our investment (excluding the economic hedge on the unrestricted shares of common stock) increased 8% (expressed in Japanese yen), reflecting the impact of passage of time in respect of the transfer restrictions on the underlying common stock.

Our investment in the convertible preferred stock of SMFG is generally nontransferable without the consent of SMFG, but is freely convertible into SMFG common stock. As of November 2006, we had hedged two-thirds of the common stock underlying our investment in SMFG. Restrictions on our ability to hedge or sell the remaining shares will lapse on February 7, 2007. As of November 2006, the conversion price was ¥318,800, subject to downward adjustment if the price of SMFG common stock at the time of conversion is less than the conversion price (subject to a floor of ¥105,100).

Our investment in the ordinary shares of ICBC is carried at fair value using quoted market prices less a liquidity valuation adjustment. The ordinary shares acquired from ICBC are subject to transfer restrictions that, among other things, prohibit any sale, disposition or other transfer until April 28, 2009. From April 28, 2009 to October 20, 2009, we may transfer up to 50% of the aggregate ordinary shares of ICBC that we owned as of October 20, 2006. We may transfer the remaining shares after October 20, 2009. A portion of our interest is held by investment funds managed by Goldman Sachs.

Controls Over Valuation of Financial Instruments. A control infrastructure, independent of the trading and investing functions, is fundamental to ensuring that our financial instruments are appropriately valued and that fair value measurements are reliable. This is particularly important in valuing instruments with lower levels of price transparency.

We employ an oversight structure that includes appropriate segregation of duties. Senior management, independent of the trading functions, is responsible for the oversight of control and valuation policies and for reporting the results of these policies to our Audit Committee. We seek to maintain the necessary resources to ensure that control functions are performed to the highest standards. We employ procedures for the approval of new transaction types and markets, price verification, review of daily profit and loss, and review of valuation models by personnel with appropriate technical knowledge of relevant products and markets. These procedures are performed by personnel independent of the revenue-producing units. For trading and principal investments with little or no price transparency, we employ, where possible, procedures that include comparisons with similar observable positions, analysis of actual to projected cash flows, comparisons with subsequent sales and discussions with senior business leaders. For a further discussion of how we manage the risks inherent in our trading and principal investing businesses, see Risk Management below.

Goodwill and Identifiable Intangible Assets

As a result of our acquisitions, principally SLK LLC (SLK) in 2000, The Ayco Company, L.P. (Ayco) in 2003, Cogentrix Energy, Inc. (Cogentrix) in 2004, National Energy & Gas Transmission, Inc. (NEGT) in 2005 and the acquisition of the variable annuity and variable life insurance business of The Hanover Insurance Group, Inc. (formerly Allmerica Financial Corporation) in 2006, we have acquired goodwill and identifiable intangible assets. Goodwill is the cost of acquired companies in excess of the fair value of net assets, including identifiable intangible assets, at the acquisition date.

Table of Contents

Goodwill. We test the goodwill in each of our operating segments for impairment at least annually in accordance with SFAS No. 142, Goodwill and Other Intangible Assets, by comparing the estimated fair value of each operating segment with its estimated net book value. We derive the fair value of each of our operating segments primarily based on price-earnings multiples. We derive the net book value of our operating segments by estimating the amount of shareholders' equity required to support the activities of each operating segment. Our last annual impairment test was performed during our 2006 fourth quarter and no impairment was identified.

The following table sets forth the carrying value of our goodwill by operating segment:

Goodwill by Operating Segment
(in millions)

	As of November	
	2006	2005
Investment Banking		
Financial Advisory	\$	\$
Underwriting	125	125
Trading and Principal Investments		
FICC	136	91
Equities ⁽¹⁾	2,381	2,390
Principal Investments	4	1
Asset Management and Securities Services		
Asset Management ⁽²⁾	421	424
Securities Services	117	117
Total	\$3,184	\$3,148

⁽¹⁾ Primarily related to SLK.

⁽²⁾ Primarily related to Ayco.

Identifiable Intangible Assets. We amortize our identifiable intangible assets over their estimated useful lives in accordance with SFAS No. 142, and test for potential impairment whenever events or changes in circumstances suggest that an asset's or asset group's carrying value may not be fully recoverable in accordance with SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. An impairment loss, calculated as the difference between the estimated fair value and the carrying value of an asset or asset group, is recognized if the sum of the estimated undiscounted cash flows relating to the asset or asset group is less than the corresponding carrying value.

Table of Contents

The following table sets forth the carrying value and range of remaining useful lives of our identifiable intangible assets by major asset class:

Identifiable Intangible Assets by Asset Class

(\$ in millions)

	As of November		
	2006	2005	
	Carrying Value	Range of Remaining Useful Lives (in years)	Carrying Value
Customer lists ⁽¹⁾	\$ 737	5 19	\$ 777
Power contracts ⁽²⁾	667	2 22	481
New York Stock Exchange (NYSE) specialist rights	542	15 ⁽⁵⁾	580
Insurance-related assets ⁽³⁾	362	7	
Exchange-traded fund (ETF) specialist rights	105	21	111
Other ⁽⁴⁾	89	1 7	106
Total	\$2,502		\$2,055

⁽¹⁾ Primarily includes our clearance and execution and NASDAQ customer lists related to SLK and financial counseling customer lists related to Ayco.

⁽²⁾ Primarily relates to above-market power contracts of consolidated power generation facilities related to Cogentrix and NEGTE. Substantially all of these power contracts have been pledged to counterparties in connection with our secured financings. The increase in the carrying value of power contracts in 2006 was due to a restructuring of certain contracts, which resulted in the consolidation of the associated power generation facilities that had been previously accounted for under the equity method.

⁽³⁾ Consists of the value of business acquired (VOBA) and deferred acquisition costs (DAC). VOBA represents the present value of estimated future gross profits of the variable annuity and variable life insurance business acquired in 2006. DAC results from commissions paid by Goldman Sachs to the primary insurer (ceding company) on life and annuity reinsurance agreements as compensation to place the business with us and to cover the ceding company's acquisition expenses. VOBA and DAC are amortized over the estimated life of the underlying contracts based on estimated gross profits, and amortization is adjusted based on actual experience. The seven year useful life represents the weighted average remaining amortization period of the underlying contracts (certain of which extend for approximately 30 years).

⁽⁴⁾ Primarily includes technology-related and other assets related to SLK.

⁽⁵⁾ During the first quarter of 2006, we reduced the estimated useful lives of our NYSE specialist rights from 22-24 years to 16 years. This change was due to higher than expected attrition in acquired NYSE specialist rights, primarily from mergers and delistings.

A prolonged period of weakness in global equity markets and the trading of securities in multiple markets and on multiple exchanges could adversely impact our businesses and impair the value of our goodwill and/or identifiable intangible assets. In addition, certain events could indicate a potential impairment of our identifiable intangible assets, including (i) changes in market structure that could adversely affect our specialist businesses, (ii) an adverse action or assessment by a regulator, (iii) a default event under a power contract or physical damage or other adverse events impacting the underlying power generation facilities, or (iv) adverse actual experience on the contracts in our variable annuity and variable life insurance business.

Table of Contents

Use of Estimates

The use of generally accepted accounting principles requires management to make certain estimates. In addition to the estimates we make in connection with fair value measurements and the accounting for goodwill and identifiable intangible assets, the use of estimates is also important in determining provisions for potential losses that may arise from litigation and regulatory proceedings and tax audits.

We estimate and provide for potential losses that may arise out of litigation and regulatory proceedings and tax audits to the extent that such losses are probable and can be estimated, in accordance with SFAS No. 5, *Accounting for Contingencies*. Significant judgment is required in making these estimates and our final liabilities may ultimately be materially different. Our total liability in respect of litigation and regulatory proceedings is determined on a case-by-case basis and represents an estimate of probable losses after considering, among other factors, the progress of each case or proceeding, our experience and the experience of others in similar cases or proceedings, and the opinions and views of legal counsel. Given the inherent difficulty of predicting the outcome of our litigation and regulatory matters, particularly in cases or proceedings in which substantial or indeterminate damages or fines are sought, we cannot estimate losses or ranges of losses for cases or proceedings where there is only a reasonable possibility that a loss may be incurred. See *Legal Proceedings* in Part I, Item 3 of the Annual Report on Form 10-K, for information on our judicial, regulatory and arbitration proceedings.

Results of Operations

The composition of our net revenues has varied over time as financial markets and the scope of our operations have changed. The composition of net revenues can also vary over the shorter term due to fluctuations in U.S. and global economic and market conditions. For a further discussion of the impact of economic and market conditions on our results of operations, see *Certain Risk Factors That May Affect Our Business* above, and *Risk Factors* in Part I, Item 1A of the Annual Report on Form 10-K.

Table of Contents**Financial Overview**

The following table sets forth an overview of our financial results:

Financial Overview
(\$ in millions, except per share amounts)

	Year Ended November		
	2006	2005	2004
Net revenues ⁽¹⁾	\$37,665	\$25,238	\$20,951
Pre-tax earnings	14,560	8,273	6,676
Net earnings	9,537	5,626	4,553
Net earnings applicable to common shareholders	9,398	5,609	4,553
Diluted earnings per common share	19.69	11.21	8.92
Return on average common shareholders' equity ⁽²⁾	32.8%	21.8%	19.8%
Return on average tangible common shareholders' equity ⁽³⁾	39.8%	26.7%	25.2%

(1) Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported net earnings.

(2) Return on average common shareholders' equity is computed by dividing net earnings applicable to common shareholders by average monthly common shareholders' equity.

(3) Tangible common shareholders' equity equals total shareholders' equity less preferred stock, goodwill and identifiable intangible assets, excluding power contracts. In 2006, we amended our calculation of tangible common shareholders' equity. We no longer deduct identifiable intangible assets associated with power contracts from total shareholders' equity because, unlike other intangible assets, less than 50% of these assets are supported by common shareholders' equity. Prior periods have been adjusted to conform to the current presentation.

We believe that return on average tangible common shareholders' equity is meaningful because it measures the performance of businesses consistently, whether they were acquired or developed internally. Return on average tangible common shareholders' equity is computed by dividing net earnings applicable to common shareholders by average monthly tangible common shareholders' equity.

The following table sets forth a reconciliation of average total shareholders' equity to average tangible common shareholders' equity:

	Average for the Year Ended November		
	2006	2005	2004
	(in millions)		
Total shareholders' equity	\$31,048	\$26,264	\$22,975
Preferred stock	(2,400)	(538)	
Common shareholders' equity	\$28,648	\$25,726	\$22,975

Goodwill and identifiable intangible assets, excluding power contracts	(5,013)	(4,737)	(4,918)
---	---------	---------	---------

Tangible common shareholders equity	\$23,635	\$20,989	\$18,057
-------------------------------------	----------	----------	----------

Table of Contents***Net Revenues***

2006 versus 2005. Our net revenues were \$37.67 billion in 2006, an increase of 49% compared with 2005, reflecting significantly higher net revenues in Trading and Principal Investments, Investment Banking, and Asset Management and Securities Services. The increase in Trading and Principal Investments reflected significantly higher net revenues in FICC, Equities and Principal Investments. The increase in FICC reflected particularly strong performances across all major businesses. During 2006, FICC operated in an environment characterized by strong customer-driven activity and favorable market opportunities. In addition, corporate credit spreads tightened, the yield curve flattened and volatility levels were generally low in interest rate and currency markets. The increase in Equities primarily reflected significantly higher net revenues in our customer franchise business. During 2006, Equities operated in a favorable environment characterized by strong customer-driven activity, generally higher equity prices and favorable market opportunities, although volatility levels were generally low. The increase in Principal Investments reflected a significant gain related to our investment in the ordinary shares of ICBC and higher gains and overrides from other principal investments, partially offset by a smaller, but still significant, gain related to our investment in the convertible preferred stock of SMFG. The increase in Investment Banking was due to significantly higher net revenues in Underwriting and Financial Advisory, as we benefited from strong client activity levels, reflecting favorable equity and financing markets, strong CEO confidence and growth in financial sponsor activity. The increase in Asset Management and Securities Services was primarily due to higher assets under management and significantly higher incentive fees, as well as significantly higher global customer balances in Securities Services. Assets under management increased \$144 billion or 27% to a record \$676 billion, including net asset inflows of \$94 billion during 2006.

2005 versus 2004. Our net revenues were \$25.24 billion in 2005, an increase of 20% compared with 2004, reflecting strong growth in Trading and Principal Investments and Asset Management and Securities Services as well as higher net revenues in Investment Banking. The increase in Trading and Principal Investments reflected significantly higher net revenues in FICC, as all major businesses performed well. During 2005, FICC operated in an environment generally characterized by strong customer-driven activity, tight, but volatile, credit spreads, higher energy prices and a flatter yield curve. Net revenues in Equities also improved significantly compared with the prior year, reflecting strong performance across the business. Equities operated in an environment characterized by generally higher equity prices, improved customer-driven activity and continued low levels of market volatility. Net revenues in our Principal Investments business also increased significantly, primarily reflecting a gain on our investment in the convertible preferred stock of SMFG as well as gains from real estate principal investments. The strong net revenue growth in Asset Management and Securities Services primarily reflected higher assets under management and higher customer balances in Securities Services. The increase in Investment Banking net revenues was due to significantly higher net revenues in debt underwriting and improved results in Financial Advisory, primarily reflecting an increase in industry-wide corporate activity, partially offset by lower net revenues in equity underwriting.

Table of Contents***Operating Expenses***

Our operating expenses are primarily influenced by compensation, headcount and levels of business activity. A substantial portion of our compensation expense represents discretionary bonuses which are significantly impacted by, among other factors, the level of net revenues, prevailing labor markets, business mix and the structure of our share-based compensation programs. For 2006, our ratio of compensation and benefits to net revenues was 43.7%. Excluding non-cash expenses of \$637 million related to the continued amortization of prior year share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R, our ratio of compensation and benefits to net revenues was 42.0% ⁽¹⁾.

- ⁽¹⁾ Our ratio of compensation and benefits to net revenues, excluding the impact of the continued amortization of these share-based awards, is computed by dividing compensation and benefits, excluding the impact of the continued amortization of these prior year share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R, by net revenues. We believe that presenting the ratio of compensation and benefits to net revenues excluding the impact of the continued amortization of these awards enhances the comparability of period-to-period compensation and benefits and allows for a more meaningful representation of the relationship of current period compensation to net revenues. The following table sets forth the reconciliation of the ratio of compensation and benefits to net revenues, as reported, to the ratio of compensation and benefits to net revenues excluding the impact of the continued amortization of these prior year share-based awards:

**Year Ended
November 2006**

(\$ in millions)

Compensation and benefits	\$16,457
Impact of the continued amortization of prior year share-based awards	(637)
Compensation and benefits, excluding the impact of the continued amortization of prior year share-based awards	\$15,820
Net revenues	\$37,665
Ratio of compensation and benefits to net revenues, excluding the impact of the continued amortization of prior year share-based awards	42.0%

Table of Contents

The following table sets forth our operating expenses and number of employees:

Operating Expenses and Employees

(\$ in millions)

	Year Ended November		
	2006	2005	2004
Compensation and benefits ^{(1) (2)}	\$16,457	\$11,758	\$ 9,681
Brokerage, clearing, exchange and distribution fees ⁽³⁾	1,985	1,416	1,172
Market development	492	378	374
Communications and technology	544	490	461
Depreciation and amortization	521	501	499
Amortization of identifiable intangible assets	173	124	125
Occupancy	850	728	646
Professional fees	545	475	338
Cost of power generation ⁽²⁾	406	386	372
Other expenses ⁽³⁾	1,132	709	607
Total non-compensation expenses	6,648	5,207	4,594
Total operating expenses	\$23,105	\$16,965	\$14,275
Employees at year end ^{(4) (5)}	26,467	23,623	21,736

(1) Compensation and benefits includes \$259 million, \$137 million and \$19 million for the years ended November 2006, November 2005 and November 2004, respectively, attributable to consolidated entities held for investment purposes. Consolidated entities held for investment purposes are entities that are held strictly for capital appreciation, have a defined exit strategy and are engaged in activities that are not closely related to our principal businesses.

(2) Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Compensation and benefits includes direct employee costs associated with our consolidated power generation facilities and cost of power generation includes the other direct costs associated with these power generation facilities and related contractual assets. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported net earnings. This reclassification increased operating expenses as follows:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Compensation and benefits	\$ 78	\$ 70	\$ 29

Cost of power generation	406	386	372
Total	\$484	\$456	\$401

- (3) Beginning in the fourth quarter of 2006, third party research and brokerage fees and asset management sales and distribution fees were reclassified from Other expenses to Brokerage, clearing, exchange and distribution fees in the consolidated statements of earnings. Prior periods have been reclassified to conform to the current presentation.
- (4) Excludes 3,868, 7,382 and 485 employees as of November 2006, November 2005 and November 2004, respectively, of consolidated entities held for investment purposes (see footnote 1 above).
- (5) Includes 1,326 employees as of November 2006 of Goldman Sachs consolidated property management and loan servicing subsidiaries. November 2005 and November 2004 have been adjusted to conform to the current presentation and include 1,198 and 1,014 employees, respectively.

Table of Contents

The following table sets forth non-compensation expenses of consolidated entities held for investment purposes and our remaining non-compensation expenses by line item:

Non-Compensation Expenses

(in millions)

	Year Ended November		
	2006	2005	2004
Non-compensation expenses of consolidated investments ⁽¹⁾	\$ 501	\$ 265	\$ 21
Non-compensation expenses excluding consolidated investments			
Brokerage, clearing, exchange and distribution fees ⁽²⁾	1,985	1,416	1,172
Market development	461	361	374
Communications and technology	537	487	461
Depreciation and amortization	444	467	499
Amortization of identifiable intangible assets	169	124	125
Occupancy	738	674	646
Professional fees	534	468	338
Cost of power generation ⁽³⁾	406	386	372
Other expenses ⁽²⁾	873	559	586
Subtotal	6,147	4,942	4,573
Total non-compensation expenses, as reported	\$6,648	\$5,207	\$4,594

⁽¹⁾ Consolidated entities held for investment purposes are entities that are held strictly for capital appreciation, have a defined exit strategy and are engaged in activities that are not closely related to our principal businesses. For example, these investments include consolidated entities that hold real estate assets, such as golf courses and hotels in Asia, but exclude investments in entities that primarily hold financial assets. We believe that it is meaningful to review non-compensation expenses excluding expenses related to these consolidated entities in order to evaluate trends in non-compensation expenses related to our principal business activities. Revenues related to such entities are included in Trading and principal investments in the consolidated statements of earnings.

⁽²⁾ Beginning in the fourth quarter of 2006, third party research and brokerage fees and asset management sales and distribution fees were reclassified from Other expenses to Brokerage, clearing, exchange and distribution fees in the consolidated statements of earnings. Prior periods have been reclassified to conform to the current presentation.

⁽³⁾ Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported net earnings.

Table of Contents

2006 versus 2005. Operating expenses were \$23.11 billion for 2006, 36% higher than 2005. Compensation and benefits expenses of \$16.46 billion increased 40% compared with 2005, primarily reflecting increased discretionary compensation due to higher net revenues, and increased levels of employment. The ratio of compensation and benefits to net revenues for 2006 was 43.7% ⁽¹⁾ compared with 46.6% ⁽¹⁾ for 2005. This lower ratio primarily reflected our strong net revenues in 2006. Employment levels increased 12% compared with November 2005.

In the first quarter of 2006, we adopted SFAS No. 123-R, which requires that share-based awards granted to retirement-eligible employees be expensed in the year of grant. In addition to expensing current year awards, prior year awards must continue to be amortized over the relevant service period. Therefore, our compensation and benefits in 2006 included (and, to a lesser extent, 2007 and 2008 will include) both amortization of prior year share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R and new awards granted to those employees.

Compensation and benefits expenses in 2006 included \$637 million in continued amortization of prior year awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R. This amount represents the majority of the expense to be recognized with respect to these awards.

Non-compensation expenses of \$6.65 billion for 2006 increased 28% compared with 2005. Excluding non-compensation expenses related to consolidated entities held for investment purposes, non-compensation expenses were 24% higher than 2005, primarily due to higher brokerage, clearing, exchange and distribution fees in Equities and FICC, and increased other expenses, primarily due to costs related to our insurance business, which was acquired in 2006. In addition, market development costs and professional fees were higher, reflecting increased levels of business activity, and occupancy expenses increased, primarily reflecting new office space and higher facility expenses.

2005 versus 2004. Operating expenses were \$16.97 billion for 2005, 19% above 2004. Compensation and benefits expenses of \$11.76 billion increased 21% compared with 2004, resulting from higher discretionary compensation, reflecting higher net revenues, and increased levels of employment. The ratio of compensation and benefits to net revenues for 2005 was 46.6%⁽¹⁾ compared with 46.2% ⁽¹⁾ for 2004. Employment levels increased 9% compared with November 2004.

Non-compensation expenses of \$5.21 billion for 2005 increased 13% compared with 2004. Excluding non-compensation expenses related to consolidated entities held for investment purposes, non-compensation expenses were 8% higher than 2004, primarily due to higher brokerage, clearing, exchange and distribution fees, reflecting higher transaction volumes in FICC and Equities, and increased professional fees, reflecting higher legal and consulting fees.

Non-compensation expenses in 2005 included \$37 million of net provisions for litigation and regulatory proceedings (included in other expenses) and \$36 million of real estate costs associated with the relocation of office space (included in occupancy). Non-compensation expenses in 2004 included \$103 million of net provisions for litigation and regulatory proceedings, \$62 million in connection with the establishment of our joint venture in China (included in market development) and \$41 million of real estate exit costs associated with reductions in our office space (included in occupancy and depreciation and amortization).

⁽¹⁾ The effect of the cost of power generation reclassification on the ratio of compensation and benefits to net revenues was to decrease the ratio by approximately 30 basis points, 60 basis points and 50 basis points for 2006, 2005 and 2004, respectively.

Table of Contents

Provision for Taxes

The effective income tax rate was 34.5% for 2006, up from 32.0% for 2005. The increase in the effective income tax rate for 2006 compared with 2005 was primarily related to a reduction in the impact of permanent benefits due to higher levels of earnings in 2006 and audit settlements in 2005. The effective income tax rate for 2005 was 32.0% compared with 31.8% for 2004. Excluding the impact of audit settlements in 2005, the effective income tax rate for 2005 would have been 33.3% ⁽¹⁾. Excluding the impact of audit settlements, the increase in the effective income tax rate for 2005 compared with 2004 was primarily due to a lower benefit from tax credits in 2005.

Our effective income tax rate can vary from period to period depending on, among other factors, the geographic and business mix of our earnings, the level of our tax credits and the effect of tax audits. Certain of these and other factors, including our history of pre-tax earnings, are taken into account in assessing our ability to realize our net deferred tax assets. See Note 14 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our provision for taxes.

- ⁽¹⁾ The effective income tax rate excluding the impact of audit settlements is calculated by dividing the provision for taxes, adjusted to exclude the impact of audit settlements, by pre-tax earnings. The impact of audit settlements decreased the effective income tax rate by 1.3% for 2005. We believe that the effective income tax rate excluding the impact of audit settlements provides a meaningful basis for period-to-period comparisons of our effective income tax rates.

Table of Contents**Segment Operating Results**

The following table sets forth the net revenues, operating expenses and pre-tax earnings of our segments:

Segment Operating Results
(in millions)

		Year Ended November		
		2006	2005	2004
Investment Banking	Net revenues	\$ 5,629	\$ 3,671	\$ 3,374
	Operating expenses	4,062	3,258	2,973
	Pre-tax earnings	\$ 1,567	\$ 413	\$ 401
Trading and Principal Investments	Net revenues ⁽¹⁾	\$25,562	\$16,818	\$13,728
	Operating expenses ⁽¹⁾	14,962	10,600	8,688
	Pre-tax earnings	\$10,600	\$ 6,218	\$ 5,040
Asset Management and Securities Services	Net revenues	\$ 6,474	\$ 4,749	\$ 3,849
	Operating expenses	4,036	3,070	2,430
	Pre-tax earnings	\$ 2,438	\$ 1,679	\$ 1,419
Total	Net revenues ⁽¹⁾	\$37,665	\$25,238	\$20,951
	Operating expenses ^{(1) (2)}	23,105	16,965	14,275
	Pre-tax earnings	\$14,560	\$ 8,273	\$ 6,676

⁽¹⁾ Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported pre-tax earnings.

⁽²⁾ Includes the following expenses that have not been allocated to our segments: (i) net provisions for a number of litigation and regulatory proceedings of \$45 million, \$37 million and \$103 million for the years ended November 2006, November 2005 and November 2004, respectively; (ii) \$62 million in connection with the establishment of our joint venture in China for the year ended November 2004; and (iii) the amortization of employee initial public offering awards, net of forfeitures, of \$19 million for the year ended November 2004.

Net revenues in our segments include allocations of interest income and interest expense to specific securities, commodities and other positions in relation to the cash generated by, or funding requirements of, such underlying positions. See Note 16 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our segments.

The cost drivers of Goldman Sachs taken as a whole — compensation, headcount and levels of business activity — are broadly similar in each of our business segments. Compensation and benefits expenses within our segments reflect, among other factors, the overall performance of Goldman Sachs as well as the performance of individual business units. Consequently, pre-tax margins in one segment of our business may be significantly affected by the performance of our other business segments. A discussion of segment operating results follows.

Table of Contents***Investment Banking***

Our Investment Banking segment is divided into two components:

Financial Advisory. Financial Advisory includes advisory assignments with respect to mergers and acquisitions, divestitures, corporate defense activities, restructurings and spin-offs.

Underwriting. Underwriting includes public offerings and private placements of a wide range of securities and other financial instruments.

The following table sets forth the operating results of our Investment Banking segment:

Investment Banking Operating Results

(in millions)

	Year Ended November		
	2006	2005	2004
Financial Advisory	\$2,580	\$1,905	\$1,737
Equity underwriting	1,365	704	819
Debt underwriting	1,684	1,062	818
Total Underwriting	3,049	1,766	1,637
Total net revenues	5,629	3,671	3,374
Operating expenses	4,062	3,258	2,973
Pre-tax earnings	\$1,567	\$ 413	\$ 401

The following table sets forth our financial advisory and underwriting transaction volumes:

Goldman Sachs Global Investment Banking Volumes ⁽¹⁾

(in billions)

	Year Ended November		
	2006	2005	2004
Announced mergers and acquisitions	\$1,112	\$807	\$395
Completed mergers and acquisitions	858	588	503
Equity and equity-related offerings ⁽²⁾	76	49	54
Debt offerings ⁽³⁾	302	270	236

⁽¹⁾ Source: Thomson Financial. Announced and completed mergers and acquisitions volumes are based on full credit to each of the advisors in a transaction. Equity and equity-related offerings and debt offerings are based on full credit for single book managers and equal credit for joint book managers. Transaction volumes may not be indicative of net revenues in a given period.

⁽²⁾ Includes public common stock offerings, convertible offerings, rights offerings and Rule 144A issues.

- ⁽³⁾ Includes non-convertible preferred stock, mortgage-backed securities, asset-backed securities and taxable municipal debt. Includes publicly registered and Rule 144A issues.

2006 versus 2005. Net revenues in Investment Banking of \$5.63 billion for 2006 increased 53% compared with 2005. Net revenues in Financial Advisory of \$2.58 billion increased 35% compared with 2005, primarily reflecting strong growth in industry-wide completed mergers and acquisitions. Net revenues in our Underwriting business of \$3.05 billion increased 73% compared with 2005. Net revenues were significantly higher in equity underwriting, reflecting increased client

Table of Contents

activity. Net revenues were also significantly higher in debt underwriting, primarily due to a significant increase in leveraged finance activity and, to a lesser extent, an increase in investment-grade activity. Our investment banking backlog at the end of 2006 was at its highest level since 2000. ⁽¹⁾

Operating expenses of \$4.06 billion for 2006 increased 25% compared with 2005, substantially all of which was due to increased compensation and benefits expenses resulting from higher levels of discretionary compensation. Pre-tax earnings were \$1.57 billion in 2006 compared with \$413 million in 2005.

2005 versus 2004. Net revenues in Investment Banking of \$3.67 billion for 2005 increased 9% compared with 2004. Net revenues in Financial Advisory of \$1.91 billion increased 10% compared with 2004, primarily reflecting an increase in industry-wide completed mergers and acquisitions. Net revenues in our Underwriting business of \$1.77 billion increased 8% compared with 2004, reflecting higher net revenues in debt underwriting, primarily due to an increase in leveraged finance and mortgage activity, partially offset by lower net revenues in equity underwriting. Our investment banking backlog at the end of 2005 was significantly higher than at the end of 2004. ⁽¹⁾

Operating expenses of \$3.26 billion for 2005 increased 10% compared with 2004, primarily due to increased compensation and benefits expenses resulting from higher levels of discretionary compensation and increased amortization expense related to prior year equity awards. In addition, professional fees were higher, principally due to increased legal and consulting fees. Pre-tax earnings of \$413 million in 2005 increased 3% compared with 2004.

Trading and Principal Investments

Our Trading and Principal Investments segment is divided into three components:

FICC. We make markets in and trade interest rate and credit products, mortgage-related securities and loan products, currencies and commodities, structure and enter into a wide variety of derivative transactions and engage in proprietary trading and investing.

Equities. We make markets in, trade and act as a specialist for equities and equity-related products, structure and enter into equity derivative transactions and engage in proprietary trading and insurance activities. We also execute and clear client transactions on major stock, options and futures exchanges worldwide.

Principal Investments. We make real estate and corporate principal investments, including our investments in the convertible preferred stock of SMFG and the ordinary shares of ICBC. We generate net revenues from returns on these investments and from the increased share of the income and gains derived from our merchant banking funds when the return on a fund's investments, over the life of the fund, exceeds certain threshold returns (overrides).

Substantially all of our inventory is marked-to-market daily and, therefore, its value and our net revenues are subject to fluctuations based on market movements. In addition, net revenues derived from our principal investments in privately held concerns and in real estate may fluctuate significantly depending on the revaluation or sale of these investments in any given period. We also regularly enter into large transactions as part of our trading businesses. The number and size of such transactions may affect our results of operations in a given period.

Net revenues from Principal Investments do not include management fees generated from our merchant banking funds. These management fees are included in the net revenues of the Asset Management and Securities Services segment.

⁽¹⁾ Our investment banking backlog represents an estimate of our future net revenues from investment banking transactions where we believe that future revenue realization is more likely than not.

Table of Contents

The following table sets forth the operating results of our Trading and Principal Investments segment:
Trading and Principal Investments Operating Results
(in millions)

	Year Ended November		
	2006	2005	2004
FICC ⁽¹⁾	\$14,262	\$ 8,940	\$ 7,723
Equities trading	4,965	2,675	1,969
Equities commissions	3,518	2,975	2,704
Total Equities	8,483	5,650	4,673
SMFG	527	1,475	771
ICBC	937		
Gross gains	1,534	767	855
Gross losses ⁽²⁾	(585)	(198)	(399)
Net other corporate and real estate investments	949	569	456
Overrides	404	184	105
Total Principal Investments	2,817	2,228	1,332
Total net revenues ⁽¹⁾	25,562	16,818	13,728
Operating expenses ⁽¹⁾	14,962	10,600	8,688
Pre-tax earnings	\$10,600	\$ 6,218	\$ 5,040

⁽¹⁾ Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported pre-tax earnings.

⁽²⁾ A substantial portion relates to interest expense on our principal investments.

2006 versus 2005. Net revenues in Trading and Principal Investments of \$25.56 billion for 2006 increased 52% compared with 2005. Net revenues in FICC of \$14.26 billion increased 60% compared with 2005, primarily due to significantly higher net revenues in credit products (which includes distressed investing) and commodities. In addition, net revenues were higher in interest rate products, currencies and mortgages. During 2006, the business operated in an environment characterized by strong customer-driven activity and favorable market opportunities. In addition, corporate credit spreads tightened, the yield curve flattened and volatility levels were generally low in interest rate and currency markets. Net revenues in Equities of \$8.48 billion increased 50% compared with 2005, primarily reflecting significantly higher net revenues in derivatives, across all regions, as well as higher net revenues in shares. The increase also reflected the contribution from our insurance business, which was acquired in 2006. In addition, principal strategies performed well, although net revenues were lower than a particularly strong 2005. During 2006, Equities operated in a favorable environment characterized by strong customer-driven activity, generally higher equity prices and favorable market opportunities, although volatility levels were generally low. Principal

Investments recorded net revenues of \$2.82 billion, reflecting a \$937 million gain related to our investment in the ordinary shares of ICBC, a \$527 million gain related to our investment in the convertible preferred stock of SMFG and \$1.35 billion in gains and overrides from other principal investments.

Table of Contents

Operating expenses of \$14.96 billion for 2006 increased 41% compared with 2005, due to increased compensation and benefits expenses, primarily resulting from higher levels of discretionary compensation due to higher net revenues and increased levels of employment, as well as higher non-compensation expenses. Excluding non-compensation expenses related to consolidated entities held for investment purposes, the increase in non-compensation expenses was primarily due to higher brokerage, clearing, exchange and distribution fees, in Equities and FICC, and increased other expenses, primarily due to costs related to our insurance business, which was acquired in 2006, and higher levels of business activity. In addition, professional fees were higher, due to increased legal and consulting fees. Pre-tax earnings of \$10.60 billion in 2006 increased 70% compared with 2005.

2005 versus 2004. Net revenues in Trading and Principal Investments of \$16.82 billion for 2005 increased 23% compared with 2004. Net revenues in FICC of \$8.94 billion increased 16% compared with 2004, primarily reflecting significantly higher net revenues in credit products (which includes distressed investing) and, to a lesser extent, interest rate products and currencies. Net revenues in commodities and mortgages were strong, but essentially unchanged compared with 2004. During 2005, FICC operated in an environment generally characterized by strong customer-driven activity, tight, but volatile, credit spreads, higher energy prices and a flatter yield curve. Net revenues in Equities of \$5.65 billion increased 21% compared with 2004, reflecting significantly higher net revenues in our customer franchise and principal strategies businesses. The increase in our customer franchise business reflected improved results in derivatives and shares, particularly in Europe and Asia, as well as in convertibles. In addition, results in principal strategies reflected strength across all regions. During 2005, Equities operated in an environment characterized by generally higher equity prices, improved customer-driven activity and continued low levels of market volatility. Principal Investments recorded net revenues of \$2.23 billion, due to a \$1.48 billion gain related to our investment in the convertible preferred stock of SMFG and \$753 million in gains and overrides from other corporate and, to a lesser extent, real estate principal investments.

Operating expenses of \$10.60 billion for 2005 increased 22% compared with 2004, primarily due to increased compensation and benefits expenses, reflecting higher discretionary compensation and increased levels of employment and, to a lesser extent, higher non-compensation expenses related to consolidated entities held for investment purposes. Excluding non-compensation expenses related to consolidated entities held for investment purposes, the increase in non-compensation expenses was primarily attributable to higher brokerage, clearing, exchange and distribution fees, principally due to increased transaction volumes in FICC and Equities, and higher professional fees, due to increased legal and consulting fees. Pre-tax earnings of \$6.22 billion in 2005 increased 23% compared with 2004.

Asset Management and Securities Services

Our Asset Management and Securities Services segment is divided into two components:

Asset Management. Asset Management provides investment advisory and financial planning services and offers investment products (primarily through separate accounts and funds) across all major asset classes to a diverse group of institutions and individuals worldwide and primarily generates revenues in the form of management and incentive fees.

Securities Services. Securities Services provides prime brokerage services, financing services and securities lending services to institutional clients, including hedge funds, mutual funds, pension funds and foundations, and to high-net-worth individuals worldwide, and generates revenues primarily in the form of interest rate spreads or fees.

Table of Contents

Assets under management typically generate fees as a percentage of asset value. In certain circumstances, we are also entitled to receive incentive fees based on a percentage of a fund's return or when the return on assets under management exceeds specified benchmark returns or other performance targets. Incentive fees are recognized when the performance period ends and they are no longer subject to adjustment. We have numerous incentive fee arrangements, many of which have annual performance periods that end on December 31. For that reason, incentive fees have been seasonally weighted to our first quarter. Based on investment performance in calendar 2006, our incentive fees will be significantly lower in fiscal 2007 than they were in fiscal 2006.

The following table sets forth the operating results of our Asset Management and Securities Services segment:

Asset Management and Securities Services Operating Results
(in millions)

	Year Ended November		
	2006	2005	2004
Management and other fees	\$3,332	\$2,629	\$2,219
Incentive fees	962	327	334
Total Asset Management	4,294	2,956	2,553
Securities Services	2,180	1,793	1,296
Total net revenues	6,474	4,749	3,849
Operating expenses	4,036	3,070	2,430
Pre-tax earnings	\$2,438	\$1,679	\$1,419

Assets under management include our mutual funds, alternative investment funds and separately managed accounts for institutional and individual investors. Substantially all assets under management are valued as of calendar month end.

The following table sets forth our assets under management by asset class:

Assets Under Management by Asset Class ⁽¹⁾
(in billions)

	As of November 30		
	2006	2005	2004
Alternative investments ⁽²⁾	\$145	\$110	\$ 95
Equity	215	167	133
Fixed income	198	154	134
Total non-money market assets	558	431	362
Money markets	118	101	90
Total assets under management	\$676	\$532	\$452

- (1) In the first quarter of 2006, we changed the methodology for classifying certain non-money market assets. The changes were made primarily to reclassify certain assets allocated to external investment managers out of alternative investment assets and to reclassify currency funds into alternative investment assets. The changes did not impact total assets under management and prior periods have been reclassified to conform to the current presentation.
- (2) Primarily includes hedge funds, private equity, real estate, currencies, commodities and asset allocation strategies.

Table of Contents

The following table sets forth a summary of the changes in our assets under management:

Changes in Assets Under Management
(in billions)

	Year Ended November 30		
	2006	2005	2004
Balance, beginning of year	\$532	\$452	\$373
Net asset inflows/ (outflows)			
Alternative investments	32	11	27
Equity	16	25	13
Fixed income	29	16	11
Total non-money market net asset inflows/ (outflows)	77	52	51
Money markets	17 ⁽¹⁾	11	1
Total net asset inflows/ (outflows)	94 ⁽²⁾	63	52
Net market appreciation/ (depreciation)	50	17	27
Balance, end of year	\$676	\$532	\$452

⁽¹⁾ Net of \$8 billion transferred from assets under management to interest-bearing deposits at Goldman Sachs Bank USA, a wholly owned subsidiary of Group Inc. These deposits are not included in assets under management.

⁽²⁾ Includes \$3 billion of net asset inflows in connection with our December 30, 2005 acquisition of the variable annuity and variable life insurance business of The Hanover Insurance Group, Inc.

2006 versus 2005. Net revenues in Asset Management and Securities Services of \$6.47 billion for 2006 increased 36% compared with 2005. Asset Management net revenues of \$4.29 billion increased 45% compared with 2005, reflecting significantly higher management and other fees, principally due to strong growth in assets under management, and significantly higher incentive fees. During the year, assets under management increased \$144 billion or 27% to \$676 billion, reflecting non-money market net asset inflows of \$77 billion, spread across all asset classes, money market net asset inflows of \$17 billion ⁽¹⁾, and market appreciation of \$50 billion, primarily in equity and fixed income assets. Securities Services net revenues of \$2.18 billion increased 22% compared with 2005, as our prime brokerage business continued to generate strong results, primarily reflecting significantly higher global customer balances in securities lending and margin lending.

Operating expenses of \$4.04 billion for 2006 increased 31% compared with 2005, primarily due to increased compensation and benefits expenses, resulting from higher levels of discretionary compensation due to higher net revenues, and increased levels of employment. Non-compensation expenses also increased, primarily due to higher distribution fees (included in brokerage, clearing, exchange and distribution fees). In addition, market development costs were higher, reflecting increased levels of business activity. Pre-tax earnings of \$2.44 billion increased 45% compared with 2005.

- (1) Net of \$8 billion transferred from assets under management to interest-bearing deposits at Goldman Sachs Bank USA, a wholly owned subsidiary of Group Inc. These deposits are not included in assets under management.

78

Table of Contents

2005 versus 2004. Net revenues in Asset Management and Securities Services of \$4.75 billion for 2005 increased 23% compared with 2004. Asset Management net revenues of \$2.96 billion increased 16% compared with 2004, primarily due to higher management fees, driven by growth in assets under management. During 2005, assets under management increased 18% to \$532 billion, reflecting net asset inflows of \$63 billion across all asset classes as well as market appreciation of \$17 billion, primarily in equity assets. Securities Services net revenues of \$1.79 billion for 2005 increased 38% compared with 2004, primarily reflecting significantly higher global customer balances in securities lending and margin lending.

Operating expenses of \$3.07 billion for 2005 increased 26% compared with 2004, primarily due to increased compensation and benefits expenses resulting from higher discretionary compensation and increased levels of employment. Other expenses also increased and professional fees were higher, principally due to increased consulting and legal fees. Pre-tax earnings of \$1.68 billion increased 18% compared with 2004.

Geographic Data

For a summary of the net revenues and pre-tax earnings of Goldman Sachs by geographic region, see Note 16 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.

Off-Balance-Sheet Arrangements

We have various types of off-balance-sheet arrangements that we enter into in the ordinary course of business. Our involvement in these arrangements can take many different forms, including purchasing or retaining residual and other interests in mortgage-backed and other asset-backed securitization vehicles; holding senior and subordinated debt, interests in limited and general partnerships, and preferred and common stock in other nonconsolidated vehicles; entering into interest rate, foreign currency, equity, commodity and credit derivatives, including total return swaps; entering into operating leases; and providing guarantees, indemnifications, loan commitments, letters of credit, representations and warranties.

We enter into these arrangements for a variety of business purposes, primarily related to the securitization of commercial and residential mortgages, home equity and auto loans, government and corporate bonds, and other types of financial assets. Other reasons for entering into these arrangements include underwriting client securitization transactions; providing secondary market liquidity; making investments in performing and nonperforming debt, equity, real estate and other assets; providing investors with credit-linked and asset-repackaged notes; and receiving or providing letters of credit to satisfy margin requirements and to facilitate the clearance and settlement process.

We engage in transactions with variable interest entities (VIEs) and qualifying special-purpose entities (QSPEs). Such vehicles are critical to the functioning of several significant investor markets, including the mortgage-backed and other asset-backed securities markets, since they provide market liquidity to financial assets by offering investors access to specific cash flows and risks created through the securitization process. Our financial interests in, and derivative transactions with, such nonconsolidated entities are accounted for at fair value, in the same manner as our other financial instruments, except in cases where we apply the equity method of accounting.

Table of Contents

The following table sets forth where a discussion of these and other off-balance-sheet arrangements may be found in Part II, Items 7 and 8 of the Annual Report on Form 10-K:

Type of Off-Balance-Sheet Arrangement	Disclosure in Annual Report on Form 10-K
Retained interests or contingent interests in assets transferred by us to nonconsolidated entities	See Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.
Leases, letters of credit, and loans and other commitments	See Contractual Obligations and Commitments below and Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.
Guarantees	See Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.
Other obligations, including contingent obligations, arising out of variable interests we have in nonconsolidated entities	See Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.
Derivative contracts	See Critical Accounting Policies above and Risk Management below and Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.

In addition, see Note 2 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for a discussion of our consolidation policies.

Equity Capital

The level and composition of our equity capital are principally determined by our consolidated regulatory capital requirements, subsidiary capital requirements and rating agency guidelines. The equity capital we hold may also be influenced by the business environment, conditions in the financial markets and an assessment of potential future losses during an extremely adverse business and market environment. As of November 2006, our total shareholders' equity was \$35.79 billion (consisting of common shareholders' equity of \$32.69 billion and preferred stock of \$3.10 billion) compared with total shareholders' equity of \$28.00 billion as of November 2005 (consisting of common shareholders' equity of \$26.25 billion and preferred stock of \$1.75 billion). In addition to total shareholders' equity, we consider the \$2.75 billion of junior subordinated debt issued to a trust (see below) part of our equity capital, as it qualifies as capital for regulatory and certain rating agency purposes.

Consolidated Regulatory Capital Requirements

During 2005, Goldman Sachs became regulated by the U.S. Securities and Exchange Commission (SEC) as a Consolidated Supervised Entity (CSE). As such, Goldman Sachs is subject to group-wide supervision and examination by the SEC and to minimum capital adequacy standards on a consolidated basis. Minimum capital adequacy standards are principally driven by the amount of our market risk, credit risk and operational risk as calculated by methodologies approved by the SEC. Eligible sources of regulatory capital include common equity and certain types of preferred stock, debt and hybrid instruments, including our junior subordinated debt issued to a trust. The recognition of preferred stock, debt and hybrid

instruments as regulatory capital is subject to limitations. Goldman Sachs was in compliance with the CSE capital adequacy standards as of November 2006 and November 2005.

Table of Contents

Subsidiary Capital Requirements

Many of our principal subsidiaries are subject to separate regulation and capital requirements in the United States and/or elsewhere. Goldman, Sachs & Co. and Goldman Sachs Execution & Clearing, L.P. are registered U.S. broker-dealers and futures commissions merchants, and their primary regulators include the SEC, the Commodity Futures Trading Commission, the Chicago Board of Trade, the NYSE, the National Association of Securities Dealers, Inc. and the National Futures Association. Goldman Sachs International, our regulated U.K. broker-dealer, is subject to regulation primarily by the U.K.'s Financial Services Authority. Goldman Sachs Japan Co., Ltd. (GSJCL), our regulated Japanese broker-dealer, is subject to regulation by Japan's Financial Services Agency. Prior to October 1, 2006, Goldman Sachs (Japan) Ltd. (GSJL), the predecessor to GSJCL, was our primary regulated subsidiary based in Japan. Several other subsidiaries of Goldman Sachs are regulated by securities, investment advisory, banking, and other regulators and authorities around the world, such as the Federal Financial Supervisory Authority (BaFin) and the Bundesbank in Germany, Banque de France and the Autorité des Marchés Financiers in France, Banca d'Italia and the Commissione Nazionale per le Società e la Borsa (CONSOB) in Italy, the Swiss Federal Banking Commission, the Securities and Futures Commission in Hong Kong, the Monetary Authority of Singapore and the China Securities Regulatory Commission. Goldman Sachs Bank USA (GS Bank), a wholly owned industrial bank, is regulated by the Federal Deposit Insurance Corporation and the State of Utah Department of Financial Institutions and is subject to minimum capital requirements. As of November 2006 and November 2005, these subsidiaries were in compliance with their local capital requirements.

As discussed above, many of our subsidiaries are subject to regulatory capital requirements in jurisdictions throughout the world. Subsidiaries not subject to separate regulation may hold capital to satisfy local tax guidelines, rating agency requirements or internal policies, including policies concerning the minimum amount of capital a subsidiary should hold based upon its underlying risk. For a discussion of our potential inability to access funds from our subsidiaries, see

Liquidity and Funding Risk Conservative Liability Structure below.

Equity investments in subsidiaries are generally funded with parent company equity capital. As of November 2006, Group Inc.'s equity investment in subsidiaries was \$32.58 billion compared with its total shareholders' equity of \$35.79 billion.

Our capital invested in non-U.S. subsidiaries is generally exposed to foreign exchange risk, substantially all of which is managed primarily through the use of derivative contracts. In addition, we generally manage the non-trading exposure to foreign exchange risk that arises from transactions denominated in currencies other than the transacting entity's functional currency.

See Note 15 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our regulated subsidiaries.

Table of Contents**Rating Agency Guidelines**

The credit rating agencies assign credit ratings to the obligations of The Goldman Sachs Group, Inc., which directly issues or guarantees substantially all of Goldman Sachs' senior unsecured obligations. The level and composition of our equity capital are among the many factors considered in determining our credit ratings. Each agency has its own definition of eligible capital and methodology for evaluating capital adequacy, and assessments are generally based on a combination of factors rather than a single calculation. See **Liquidity and Funding Risk** **Credit Ratings** below for further information regarding our credit ratings.

Equity Capital Management

Our objective is to maintain a sufficient level and optimize the composition of our equity capital. We manage our capital through repurchases of our common stock and issuances of preferred stock, junior subordinated debt issued to a trust and subordinated debt.

Share Repurchase Program. We use our share repurchase program to help maintain the appropriate level of common equity and to substantially offset increases in share count over time resulting from employee share-based compensation. The repurchase program is effected primarily through regular open-market purchases and is influenced by our overall capital position (the comparison of our capital requirements to our available capital), general market conditions and the prevailing price and trading volumes of our common stock.

The following table sets forth the level of share repurchases for the years ended November 2006 and November 2005:

	As of November	
	2006	2005
	(in millions, except per share amounts)	
Number of shares repurchased	50.23	63.73
Total cost	\$ 7,817	\$ 7,108
Average cost per share	\$155.64	\$111.57

As of November 2006, we were authorized to repurchase up to 52.6 million additional shares of common stock pursuant to our repurchase program. For additional information on our repurchase program, see **Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities** in Part II, Item 5 of the Annual Report on Form 10-K.

Table of Contents

Preferred Stock. During 2006, Goldman Sachs issued 54,000 shares of perpetual Floating Rate Non-Cumulative Preferred Stock, Series D. As of November 2006, Goldman Sachs had 124,000 shares of perpetual non-cumulative preferred stock outstanding in four series as set forth in the following table:

Preferred Stock by Series

Series	Shares Issued	Shares Authorized	Dividend Rate	Earliest Redemption Date	Redemption Value (in millions)
A	30,000	50,000	3 month LIBOR + 0.75%, with floor of 3.75% per annum	April 25, 2010	\$ 750
B	32,000	50,000	6.20% per annum	October 31, 2010	800
C	8,000	25,000	3 month LIBOR + 0.75%, with floor of 4% per annum	October 31, 2010	200
D	54,000	60,000	3 month LIBOR + 0.67%, with floor of 4% per annum	May 24, 2011	1,350
	124,000	185,000			\$3,100

Each share of preferred stock has a par value of \$0.01, has a liquidation preference of \$25,000, is represented by 1,000 depositary shares and is redeemable at our option at a redemption price equal to \$25,000 plus declared and unpaid dividends. Dividends on each series of preferred stock, if declared, are payable quarterly in arrears. Our ability to declare or pay dividends on, or purchase, redeem or otherwise acquire, our common stock is subject to certain restrictions in the event that we fail to pay or set aside full dividends on our preferred stock for the latest completed dividend period. All preferred stock also has a preference over our common stock upon liquidation.

Junior Subordinated Debt Issued to a Trust. As of November 2006, we had outstanding junior subordinated debt issued to a trust of \$2.75 billion, included in Unsecured long-term borrowings on the consolidated statements of financial condition. The inherent characteristics of these securities, including the long-term nature of the securities, our ability to defer coupon interest for up to ten consecutive semiannual periods and the subordinated nature of the obligations in our capital structure, are such that they qualify as regulatory capital for CSE purposes, and thus, are part of our equity capital.

Subordinated Debt. Although not part of our shareholders' equity, subordinated debt may be used to meet a portion of our consolidated minimum capital requirements as a CSE. As of November 2006, we had outstanding subordinated debt of \$4.67 billion.

Table of Contents**Capital Ratios and Metrics**

The following table sets forth information on our assets, shareholders' equity, leverage ratios and book value per common share:

	As of November	
	2006	2005
	(\$ in millions, except per share amounts)	
Total assets	\$838,201	\$706,804
Adjusted assets ⁽¹⁾	541,033	466,500
Total shareholders' equity	35,786	28,002
Tangible equity capital ⁽²⁾	33,517	26,030
Leverage ratio ⁽³⁾	23.4x	25.2x
Adjusted leverage ratio ⁽⁴⁾	16.1x	17.9x
Debt to equity ratio ⁽⁵⁾	3.4x	3.0x
Common shareholders' equity	32,686	26,252
Tangible common shareholders' equity ⁽⁶⁾	27,667	21,530
Book value per common share ⁽⁷⁾	\$ 72.62	\$ 57.02
Tangible book value per common share ⁽⁸⁾	61.47	46.76

- ⁽¹⁾ Adjusted assets excludes (i) low-risk collateralized assets generally associated with our matched book and securities lending businesses (which we calculate by adding our securities borrowed and financial instruments purchased under agreements to resell, and then subtracting our nonderivative short positions), (ii) cash and securities we segregate for regulatory and other purposes and (iii) goodwill and identifiable intangible assets, excluding power contracts. In 2006, we amended our calculation of adjusted assets. We no longer deduct identifiable intangible assets associated with power contracts from total assets. We amended our calculation in order to be consistent with the calculation of tangible equity capital and the adjusted leverage ratio (see footnote 2 below). Prior periods have been adjusted to conform to the current presentation.

The following table sets forth a reconciliation of total assets to adjusted assets:

	As of November	
	2006	2005
	(in millions)	
Total assets	\$ 838,201	\$ 706,804
Deduct: Securities borrowed	(219,342)	(191,800)
Financial instruments purchased under agreements to resell	(82,126)	(83,619)
Add: Financial instruments sold, but not yet purchased, at fair value	155,805	149,071
Less derivative liabilities	(65,496)	(57,829)
Subtotal	90,309	91,242
Deduct:	(80,990)	(51,405)

Cash and securities segregated for regulatory and other purposes		
Goodwill and identifiable intangible assets, excluding power contracts	(5,019)	(4,722)
Adjusted assets	\$ 541,033	\$ 466,500

- (2) Tangible equity capital equals total shareholders' equity and junior subordinated debt issued to a trust less goodwill and identifiable intangible assets, excluding power contracts. In 2006, we amended our calculation of tangible equity capital. We no longer deduct identifiable intangible assets associated with power contracts from total shareholders' equity because, unlike other intangible assets, less than 50% of these assets are supported by common shareholders' equity. Prior periods have been adjusted to conform to the current presentation. We consider junior subordinated debt issued to a trust to be a component of our tangible equity capital base due to the inherent characteristics of these securities, including the long-term nature of the securities, our ability to defer coupon interest for up to ten consecutive semiannual periods and the subordinated nature of the obligations in our capital structure.

Table of Contents

The following table sets forth the reconciliation of total shareholders' equity to tangible equity capital:

	As of November	
	2006	2005
	(in millions)	
Total shareholders' equity	\$35,786	\$28,002
Add: Junior subordinated debt issued to a trust	2,750	2,750
Deduct: Goodwill and identifiable intangible assets, excluding power contracts	(5,019)	(4,722)
Tangible equity capital	\$33,517	\$26,030

- (3) Leverage ratio equals total assets divided by total shareholders' equity.
- (4) Adjusted leverage ratio equals adjusted assets divided by tangible equity capital. We believe that the adjusted leverage ratio is a more meaningful measure of our capital adequacy than the leverage ratio because it excludes certain low-risk collateralized assets that are generally supported with little or no capital and reflects the tangible equity capital deployed in our businesses.
- (5) Debt to equity ratio equals unsecured long-term borrowings divided by total shareholders' equity.
- (6) Tangible common shareholders' equity equals total shareholders' equity less preferred stock, goodwill and identifiable intangible assets, excluding power contracts. In 2006, we amended our calculation of tangible common shareholders' equity. We no longer deduct identifiable intangible assets associated with power contracts from total shareholders' equity because, unlike other intangible assets, less than 50% of these assets are supported by common shareholders' equity. Prior periods have been adjusted to conform to the current presentation.

The following table sets forth a reconciliation of total shareholders' equity to tangible common shareholders' equity:

	As of November	
	2006	2005
	(in millions)	
Total shareholders' equity	\$35,786	\$28,002
Deduct: Preferred stock	(3,100)	(1,750)
Common shareholders' equity	32,686	26,252
Deduct: Goodwill and identifiable intangible assets, excluding power contracts	(5,019)	(4,722)
Tangible common shareholders' equity	\$27,667	\$21,530

- (7) Book value per common share is based on common shares outstanding, including restricted stock units granted to employees with no future service requirements, of 450.1 million and 460.4 million as of November 2006 and November 2005, respectively.
- (8) Tangible book value per common share is computed by dividing tangible common shareholders' equity by the number of common shares outstanding, including restricted stock units granted to employees with no future service requirements.

Table of Contents**Contractual Obligations and Commitments**

Goldman Sachs has contractual obligations to make future payments related to our unsecured long-term borrowings, secured long-term financings, long-term noncancelable lease agreements and purchase obligations and has commitments under a variety of commercial arrangements.

The following table sets forth our contractual obligations by fiscal maturity date as of November 2006:

Contractual Obligations
(in millions)

	2007	2008 - 2009	2010 - 2011	2012 - Thereafter	Total
Unsecured long-term borrowings ⁽¹⁾⁽²⁾⁽³⁾	\$	\$33,262	\$20,043	\$69,537	\$122,842
Secured long-term financings ⁽¹⁾⁽²⁾⁽⁴⁾		6,412	6,999	12,723	26,134
Minimum rental payments	564	758	535	2,195	4,052
Purchase obligations ⁽⁵⁾	1,448	535	18	18	2,019

(1) Obligations maturing within one year of our financial statement date or redeemable within one year of our financial statement date at the option of the holder are excluded from this table and are treated as short-term obligations. See Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our secured financings.

(2) Obligations that are repayable prior to maturity at the option of Goldman Sachs are reflected at their contractual maturity dates. Obligations that are redeemable prior to maturity at the option of the holder are reflected at the dates such options become exercisable.

(3) Includes \$7.25 billion of hybrid financial instruments accounted for at fair value under SFAS No. 155 as of November 2006.

(4) Included in Other secured financings in the consolidated statements of financial condition.

(5) Primarily includes construction-related obligations.

As of November 2006, our unsecured long-term borrowings were \$122.84 billion and consisted principally of senior borrowings with maturities extending to 2036. See Note 5 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our unsecured long-term borrowings.

As of November 2006, our future minimum rental payments, net of minimum sublease rentals, under noncancelable leases were \$4.05 billion. These lease commitments, principally for office space, expire on various dates through 2069. Certain agreements are subject to periodic escalation provisions for increases in real estate taxes and other charges. See Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our leases.

Our occupancy expenses include costs associated with office space held in excess of our current requirements. This excess space, the cost of which is charged to earnings as incurred, is being held for potential growth or to replace currently occupied space that we may exit in the future. We regularly evaluate our current and future space capacity in relation to current and projected staffing levels. We may incur exit costs in 2007 and thereafter to the extent we (i) reduce our space capacity or (ii) commit to, or occupy, new properties in the locations in which we operate and, consequently, dispose of existing space that had been held for potential growth. These exit costs may be material to

our results of operations in a given period.

As of November 2006 and November 2005, we had construction-related obligations of \$1.63 billion and \$579 million, respectively, including purchase obligations of \$1.07 billion and

Table of Contents

\$481 million, respectively, related to the development of wind energy projects. Construction-related obligations also include outstanding purchase obligations of \$500 million and \$47 million as of November 2006 and November 2005, respectively, related to our new world headquarters in New York City, which is expected to cost between \$2.3 billion and \$2.5 billion.

The following table sets forth our commitments as of November 2006:

Commitments
(in millions)

Commitment Amount by Fiscal Period of Expiration

	2007	2008 - 2009	2010 - 2011	2012 - Thereafter	Total
Commitments to extend credit					
William Street program	\$ 1,540	\$ 2,664	\$13,442	\$ 1,185	\$ 18,831
Other commercial lending:					
Investment-grade	4,606	1,463	1,535		7,604
Non-investment-grade	2,437	11,999	30,415	12,166	57,017
Warehouse financing	15,488	1,538			17,026
Total commitments to extend credit	24,071	17,664	45,392	13,351	100,478
Forward starting resale and securities borrowing agreements	18,285				18,285
Forward starting repurchase and securities lending agreements	17,148				17,148
Commitments under letters of credit issued by banks to counterparties	5,714	4	1	15	5,734
Merchant banking commitments	4,058	457	487	1,353	6,355
Underwriting commitments	2,620				2,620
Other investment commitments	356	1,201	143	182	1,882
Total	\$72,252	\$19,326	\$46,023	\$14,901	\$152,502

Our commitments to extend credit are agreements to lend to counterparties that have fixed termination dates and are contingent on the satisfaction of all conditions to borrowing set forth in the contract. In connection with our lending activities, we had outstanding commitments to extend credit of \$100.48 billion as of November 2006 compared with \$61.12 billion as of November 2005. Since these commitments may expire unused or be reduced or cancelled at the counterparty's request, the total commitment amount does not necessarily reflect the actual future cash flow requirements. Our commercial lending commitments outside the William Street credit extension program are generally extended in connection with contingent acquisition financing and other types of corporate lending. We may seek to reduce our credit risk on these commitments by syndicating all or substantial portions of commitments to other investors. In addition, commitments that are extended for contingent acquisition financing are often short-term in nature, as

borrowers often replace them with other funding sources.

Substantially all of the commitments provided under the William Street credit extension program are to investment-grade corporate borrowers. Commitments under the program are primarily extended by William Street Commitment Corporation (Commitment Corp.), a consolidated wholly owned subsidiary of Group Inc. whose assets and liabilities are legally separated from other assets

Table of Contents

and liabilities of Goldman Sachs, and, to a lesser extent, by William Street Credit Corporation, another consolidated wholly owned subsidiary of Group Inc. A majority of the commitments extended by Commitment Corp. are supported by funding raised by William Street Funding Corporation (Funding Corp.), another consolidated wholly owned subsidiary of Group Inc. whose assets and liabilities are also legally separated from other assets and liabilities of Goldman Sachs. With respect to substantially all of the William Street commitments, SMFG provides us with credit loss protection that is generally limited to 95% of the first loss we realize on approved loan commitments, up to a maximum of \$1.00 billion. In addition, subject to the satisfaction of certain conditions, upon our request, SMFG will provide protection for 70% of the second loss on such commitments, up to a maximum of \$1.13 billion. We also use other financial instruments to mitigate credit risks related to certain William Street commitments not covered by SMFG.

Our commitments to extend credit also include financing for the warehousing of financial assets to be securitized, primarily in connection with collateralized debt obligations (CDOs) and mortgage securitizations, which are expected to be repaid from the proceeds of the related securitizations for which we may or may not act as underwriter. These arrangements are secured by the warehoused assets, primarily consisting of mortgage-backed and other asset-backed securities, residential and commercial mortgages and corporate debt instruments.

See Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our commitments, contingencies and guarantees.

Risk Management

Management believes that effective risk management is of primary importance to the success of Goldman Sachs. Accordingly, we have a comprehensive risk management process to monitor, evaluate and manage the principal risks we assume in conducting our activities. These risks include market, credit, liquidity, operational, legal and reputational exposures.

Risk Management Structure

We seek to monitor and control our risk exposure through a variety of separate but complementary financial, credit, operational, compliance and legal reporting systems. In addition, a number of committees are responsible for monitoring risk exposures and for general oversight of our risk management process, as described further below. These committees (including their subcommittees), meet regularly and consist of senior members of both our revenue-producing units and departments that are independent of our revenue-producing units.

Segregation of duties and management oversight are fundamental elements of our risk management process. In addition to the committees described below, functions that are independent of the revenue-producing units, such as Compliance, Finance, Legal, Management Controls (Internal Audit) and Operations, perform risk management functions, which include monitoring, analyzing and evaluating risk.

Management Committee. All risk control functions ultimately report to our Management Committee. Through both direct and delegated authority, the Management Committee approves all of our operating activities, trading risk parameters and customer review guidelines.

Risk Committees. The Firmwide Risk Committee reviews the activities of existing businesses, approves new businesses and products, approves firmwide and divisional market risk limits, reviews business unit market risk limits, approves market risk limits for selected sovereign markets and business units, approves sovereign credit risk limits and credit risk limits by ratings group, and reviews scenario analyses based on abnormal or catastrophic market movements.

Table of Contents

The Divisional Risk Committee sets market risk limits for our trading activities subject to overall firmwide risk limits, based on a number of measures, including Value-at-Risk (VaR), stress tests and scenario analyses. Several other committees oversee various risk, valuation, operational, credit and business practice issues related to our asset management business.

Business unit risk limits are established by the various risk committees and may be further allocated by the business unit managers to individual trading desks. Trading desk managers have the first line of responsibility for managing risk within prescribed limits. These managers have in-depth knowledge of the primary sources of risk in their respective markets and the instruments available to hedge their exposures.

Market risk limits are monitored by the Finance Division and are reviewed regularly by the appropriate risk committee. Limit violations are reported to the appropriate risk committee and business unit managers and addressed, as necessary. Credit risk limits are also monitored by the Finance Division and reviewed by the appropriate risk committee.

Business Practices Committee. The Business Practices Committee assists senior management in its oversight of compliance, legal and operational risks and related reputational concerns, such as potential conflicts of interest. The Business Practices Committee also reviews Goldman Sachs' business practices, policies, and procedures for consistency with our business principles. The Business Practices Committee reviews these areas and makes recommendations for improvements as necessary to mitigate potential risks and assist in achieving adherence to our business principles.

Firmwide Capital Committee. The Firmwide Capital Committee reviews and approves transactions involving commitments of our capital. Such capital commitments include, but are not limited to, extensions of credit, alternative liquidity commitments, certain bond underwritings and certain distressed debt and principal finance activities. The Firmwide Capital Committee is also responsible for establishing business and reputational standards for capital commitments and ensuring that they are maintained on a global basis.

Commitments Committee. The Commitments Committee reviews and approves underwriting and distribution activities, primarily with respect to offerings of equity and equity-related securities, and sets and maintains policies and procedures designed to ensure that legal, reputational, regulatory and business standards are maintained in conjunction with these activities. In addition to reviewing specific transactions, the Commitments Committee periodically conducts strategic reviews of industry sectors and products and establishes policies in connection with transaction practices.

Credit Policy Committee. The Credit Policy Committee establishes and reviews broad credit policies and parameters that are implemented by the Credit Department.

Finance Committee. The Finance Committee establishes and oversees our liquidity policies, sets certain inventory position limits and has oversight responsibility for liquidity risk, the size and composition of our balance sheet and capital base, and our credit ratings. The Finance Committee regularly reviews our funding position and capitalization and makes adjustments in light of current events, risks and exposures.

New Products Committee. The New Products Committee, under the oversight of the Firmwide Risk Committee, is responsible for reviewing and approving new products and businesses globally.

Operational Risk Committee. The Operational Risk Committee provides oversight of the ongoing development and implementation of our operational risk policies, framework and methodologies, and monitors the effectiveness of operational risk management.

Structured Products Committee. The Structured Products Committee reviews and approves structured product transactions entered into with our clients that raise legal, regulatory, tax or accounting issues or present reputational risk to Goldman Sachs.

Table of Contents

Market Risk

The potential for changes in the market value of our trading and investing positions is referred to as market risk. Such positions result from market-making, specialist, proprietary trading and investing, and underwriting activities.

Categories of market risk include exposures to interest rates, equity prices, currency rates and commodity prices. A description of each market risk category is set forth below:

Interest rate risks primarily result from exposures to changes in the level, slope and curvature of the yield curve, the volatility of interest rates, mortgage prepayment speeds and credit spreads.

Equity price risks result from exposures to changes in prices and volatilities of individual equities, equity baskets and equity indices.

Currency rate risks result from exposures to changes in spot prices, forward prices and volatilities of currency rates.

Commodity price risks result from exposures to changes in spot prices, forward prices and volatilities of commodities, such as electricity, natural gas, crude oil, petroleum products, and precious and base metals.

We seek to manage these risks by diversifying exposures, controlling position sizes and establishing economic hedges in related securities or derivatives. For example, we may hedge a portfolio of common stocks by taking an offsetting position in a related equity-index futures contract. The ability to manage an exposure may, however, be limited by adverse changes in the liquidity of the security or the related hedge instrument and in the correlation of price movements between the security and related hedge instrument.

In addition to applying business judgment, senior management uses a number of quantitative tools to manage our exposure to market risk for our long and short financial instruments. These tools include:

risk limits based on a summary measure of market risk exposure referred to as VaR;

scenario analyses, stress tests and other analytical tools that measure the potential effects on our trading net revenues of various market events, including, but not limited to, a large widening of credit spreads, a substantial decline in equity markets and significant moves in selected emerging markets; and

inventory position limits for selected business units.

VaR

VaR is the potential loss in value of Goldman Sachs trading positions due to adverse market movements over a defined time horizon with a specified confidence level.

For the VaR numbers reported below, a one-day time horizon and a 95% confidence level were used. This means that there is a 1 in 20 chance that daily trading net revenues will fall below the expected daily trading net revenues by an amount at least as large as the reported VaR. Thus, shortfalls from expected trading net revenues on a single trading day greater than the reported VaR would be anticipated to occur, on average, about once a month. Shortfalls on a single day can exceed reported VaR by significant amounts. Shortfalls can also accumulate over a longer time horizon such as a number of consecutive trading days.

The modeling of the risk characteristics of our trading positions involves a number of assumptions and approximations. While management believes that these assumptions and approximations are reasonable, there is no standard methodology for estimating VaR, and different assumptions and/or approximations could produce materially different VaR estimates.

Table of Contents

We use historical data to estimate our VaR and, to better reflect current asset volatilities, we generally weight historical data to give greater importance to more recent observations. Given its reliance on historical data, VaR is most effective in estimating risk exposures in markets in which there are no sudden fundamental changes or shifts in market conditions. An inherent limitation of VaR is that the distribution of past changes in market risk factors may not produce accurate predictions of future market risk. Different VaR methodologies and distributional assumptions could produce a materially different VaR. Moreover, VaR calculated for a one-day time horizon does not fully capture the market risk of positions that cannot be liquidated or offset with hedges within one day. Changes in VaR between reporting periods are generally due to changes in levels of exposure, volatilities and/or correlations among asset classes.

The following tables set forth the daily VaR:

Average Daily VaR ⁽¹⁾
(in millions)

Risk Categories	Year Ended November		
	2006	2005	2004
Interest rates	\$ 49	\$ 37	\$ 36
Equity prices	72	34	32
Currency rates	21	17	20
Commodity prices	30	26	20
Diversification effect ⁽²⁾	(71)	(44)	(41)
Total	\$101	\$ 70	\$ 67

⁽¹⁾ Beginning in the first quarter of 2006, we excluded from our calculation of VaR certain equity positions generally due to their transfer restrictions or illiquidity. The effect of excluding these positions was not material to prior periods and, accordingly, such periods have not been adjusted. For a further discussion of the market risk associated with these positions, see **Other Market Risk Measures** below.

⁽²⁾ Equals the difference between total VaR and the sum of the VaRs for the four risk categories. This effect arises because the four market risk categories are not perfectly correlated.

Our average daily VaR increased to \$101 million in 2006 from \$70 million in 2005. We increased our level of exposure across all risk categories, particularly equity prices and interest rates.

Our average daily VaR increased to \$70 million in 2005 from \$67 million in 2004. The increase was primarily due to higher levels of exposure to commodity prices, equity prices and interest rates, partially offset by reduced exposures to currency rates, as well as reduced volatilities, particularly in interest rate and equity assets.

Table of Contents**Daily VaR ⁽¹⁾**
(in millions)

Risk Categories	As of November		Year Ended November 2006	
	2006	2005	High	Low
Interest rates	\$ 51	\$ 45	\$ 68	\$ 35
Equity prices	84	54	106	49
Currency rates	15	10	47	9
Commodity prices	21	18	49	17
Diversification effect ⁽²⁾	(52)	(44)		
Total	\$119	\$ 83	\$135	\$ 73

⁽¹⁾ Beginning in the first quarter of 2006, we excluded from our calculation of VaR certain equity positions generally due to their transfer restrictions or illiquidity. The effect of excluding these positions was not material to prior periods and, accordingly, such periods have not been adjusted. For a further discussion of the market risk associated with these positions, see Other Market Risk Measures below.

⁽²⁾ Equals the difference between total VaR and the sum of the VaRs for the four risk categories. This effect arises because the four market risk categories are not perfectly correlated.

Our daily VaR increased to \$119 million as of November 2006 from \$83 million as of November 2005. We increased our level of exposure across all risk categories, particularly equity prices.

The following chart presents our daily VaR during 2006:

92

Table of Contents

Trading Net Revenues Distribution

Substantially all of our inventory positions are marked-to-market on a daily basis and changes are recorded in net revenues. The following chart sets forth the frequency distribution of our daily trading net revenues for substantially all inventory positions included in VaR for the year ended November 2006:

- (1) Beginning in the fourth quarter of 2006, we excluded daily net revenues from our insurance business and our power generation facilities from this chart. Amounts for the full year have been adjusted accordingly.

As part of our overall risk control process, daily trading net revenues are compared with VaR calculated as of the end of the prior business day. Trading losses incurred on a single day exceeded our 95% one-day VaR on three occasions during 2006.

Other Market Risk Measures

Certain portfolios and individual positions are not included in VaR, where VaR is not the most appropriate measure of risk (e.g., due to transfer restrictions and/or illiquidity). The market risk related to our investments in the convertible preferred stock of SMFG and the ordinary shares of ICBC is measured by estimating the potential reduction in net revenues associated with a 10% decline in the SMFG common stock price and a 10% decline in the ICBC ordinary share price, respectively. The market risk related to the remaining positions is measured by estimating the potential reduction in net revenues associated with a 10% decline in asset values.

The sensitivity analyses for equity and debt positions in our trading portfolio and equity, debt (primarily mezzanine instruments) and real estate positions in our non-trading portfolio are measured by the impact of a decline in the asset values (including the impact of leverage in the underlying investments for real estate positions in our non-trading portfolio) of such positions. The fair values of the underlying positions may be sensitive to changes in a number of factors, including, but not limited to, the financial performance of the companies or properties relative to budgets or projections, the projected timing and amount of future cash flows, discount rates, trends within sectors and/or regions, underlying business models and equity prices.

Table of Contents

The sensitivity analysis of our investment in the convertible preferred stock of SMFG, net of the economic hedge on the unrestricted shares of common stock underlying a portion of our investment, is measured by the impact of a decline in the SMFG common stock price. This sensitivity should not be extrapolated to a significant decline in the SMFG common stock price, as the relationship between the fair value of our investment and the SMFG common stock price would be nonlinear due to downside protection on the conversion stock price.

The sensitivity analysis of our investment in the ordinary shares of ICBC excludes interests held by investment funds managed by Goldman Sachs.

The following table sets forth market risk for positions not included in VaR. These measures do not reflect diversification benefits across asset categories and, given the differing likelihood of such events occurring, these measures have not been aggregated:

Asset Categories	10% Sensitivity Measure	10% Sensitivity Measure	
		Amount as of November 2006	Amount as of November 2005 ⁽¹⁾
(in millions)			
Trading Risk ⁽²⁾			
Equity	Underlying asset value	\$377	\$127
Debt	Underlying asset value	725	634
Non-trading Risk			
SMFG	SMFG common stock price	140	262
ICBC	ICBC ordinary share price	191	N/A
Other Equity	Underlying asset value	390	172
Debt	Underlying asset value	199	63
Real Estate ⁽³⁾	Underlying asset value	341	145

⁽¹⁾ Beginning in the first quarter of 2006, we excluded from our calculation of VaR certain equity positions generally due to their transfer restrictions or illiquidity. The effect of excluding these positions from VaR was not material to prior periods and, accordingly, VaR for such periods has not been adjusted. We have calculated the 10% sensitivity measure for these equity positions (i.e., Trading Risk – Equity) as of November 2005 to provide a period-to-period comparison. To the extent that other market risk measures in the above table were affected, such measures have been adjusted to conform to the current presentation.

⁽²⁾ In addition to the positions in these portfolios, which are accounted for at fair value, we make investments accounted for under the equity method and we also make direct investments in real estate, both of which are included in Other assets in the consolidated statements of financial condition. Direct investments in real estate are accounted for at cost less accumulated depreciation. See Note 10 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for information on Other assets.

⁽³⁾ Relates to interests in our real estate investment funds.

During 2006, the market risk for equity positions in our trading portfolio increased due to new investments as well as an increase in the fair value of the portfolio. The increase in market risk in 2006 for debt positions in our trading portfolio and debt, real estate and other equity positions in our non-trading portfolio was primarily due to new

investments.

The decrease in market risk in 2006 for SMFG was primarily due to the impact of additional hedging with respect to the second one-third installment of unrestricted shares underlying our investment, partially offset by the increase in the fair value of our investment due to the passage of time in respect of the transfer restrictions on the underlying common stock.

Credit Risk

Credit risk represents the loss that we would incur if a counterparty or an issuer of securities or other instruments we hold fails to perform under its contractual obligations to us, or upon a deterioration in the credit quality of third parties whose securities or other instruments, including OTC

Table of Contents

derivatives, we hold. Our exposure to credit risk principally arises through our trading, investing and financing activities. To reduce our credit exposures, we seek to enter into netting agreements with counterparties that permit us to offset receivables and payables with such counterparties. In addition, we attempt to further reduce credit risk with certain counterparties by (i) entering into agreements that enable us to obtain collateral from a counterparty on an upfront or contingent basis, (ii) seeking third-party guarantees of the counterparty's obligations, and/or (iii) transferring our credit risk to third parties using credit derivatives and/or other structures and techniques.

To measure and manage our credit exposures, we use a variety of tools, including credit limits referenced to both current exposure and potential exposure. Potential exposure is generally based on projected worst-case market movements over the life of a transaction. In addition, as part of our market risk management process, for positions measured by changes in credit spreads, we use VaR and other sensitivity measures. To supplement our primary credit exposure measures, we also use scenario analyses, such as credit spread widening scenarios, stress tests and other quantitative tools.

Our global credit management systems monitor credit exposure to individual counterparties and on an aggregate basis to counterparties and their affiliates. These systems also provide management, including the Firmwide Risk and Credit Policy Committees, with information regarding credit risk by product, industry sector, country and region.

While our activities expose us to many different industries and counterparties, we routinely execute a high volume of transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment funds and other institutional clients, resulting in significant credit concentration with respect to this industry. In the ordinary course of business, we may also be subject to a concentration of credit risk to a particular counterparty, borrower or issuer.

As of both November 2006 and November 2005, we held U.S. government and federal agency obligations that represented 6% and 7% of our total assets, respectively. In addition, most of our financial instruments purchased under agreements to resell as well as some derivatives are collateralized by U.S. government, federal agency and other sovereign obligations. As of November 2006 and November 2005, we did not have credit exposure to any other counterparty that exceeded 5% of our total assets. However, over the past several years, the amount and duration of our credit exposures have been increasing, due to, among other factors, the growth of our lending and OTC derivative activities and market evolution towards longer dated transactions. A further discussion of our derivative activities follows below.

Credit Risk on Derivatives

Derivative contracts are instruments, such as futures, forwards, swaps or option contracts, that derive their value from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts, which are often referred to as OTC derivatives, or they may be listed and traded on an exchange.

Substantially all of our derivative transactions are entered into to facilitate client transactions, to take proprietary positions or as a means of risk management. In addition to derivative transactions entered into for trading purposes, we enter into derivative contracts to manage currency exposure on our net investment in non-U.S. operations and to manage the interest rate and currency exposure on our long-term borrowings and certain short-term borrowings.

Derivatives are used in many of our businesses, and we believe that the associated market risk can only be understood relative to all of the underlying assets or risks being hedged, or as part of a broader trading strategy. Accordingly, the market risk of derivative positions is managed together with our nonderivative positions.

Fair values of our derivative contracts are reflected net of cash paid or received pursuant to credit support agreements and are reported on a net-by-counterparty basis in our consolidated

Table of Contents

statements of financial condition when management believes a legal right of setoff exists under an enforceable netting agreement. For an OTC derivative, our credit exposure is directly with our counterparty and continues until the maturity or termination of such contract.

The following table sets forth the distribution, by credit rating, of substantially all of our exposure with respect to OTC derivatives as of November 2006 and November 2005, after taking into consideration the effect of netting agreements. The categories shown reflect our internally determined public rating agency equivalents:

Over-the-Counter Derivative Credit Exposure
(\$ in millions)

Credit Rating Equivalent	Exposure ⁽¹⁾	As of November 2006		As of November 2005	
		Collateral Held	Exposure Net of Collateral	Percentage of Total Exposure Net of Collateral	Percentage of Total Exposure Net of Collateral
AAA/Aaa	\$ 5,185	\$ 514	\$ 4,671	12%	12%
AA/Aa2	12,499	1,447	11,052	29	22
A/A2	16,039	4,810	11,229	29	28

⁽¹⁾ Where we have obtained collateral from a counterparty under a master trading agreement that covers multiple products and transactions, we have allocated the collateral ratably based on exposure before giving effect to such collateral.

⁽²⁾ Includes credit-related derivatives.

Table of Contents

Derivative transactions may also involve legal risks including the risk that they are not authorized or appropriate for a counterparty, that documentation has not been properly executed or that executed agreements may not be enforceable against the counterparty. We attempt to minimize these risks by obtaining advice of counsel on the enforceability of agreements as well as on the authority of a counterparty to effect the derivative transaction. In addition, certain derivative transactions (e.g., credit derivative contracts) involve the risk that we may have difficulty obtaining, or be unable to obtain, the underlying security or obligation in order to satisfy any physical settlement requirement.

Liquidity and Funding Risk

Liquidity is of critical importance to companies in the financial services sector. Most failures of financial institutions have occurred in large part due to insufficient liquidity resulting from adverse circumstances. Accordingly, Goldman Sachs has in place a comprehensive set of liquidity and funding policies that are intended to maintain significant flexibility to address both Goldman Sachs-specific and broader industry or market liquidity events. Our principal objective is to be able to fund Goldman Sachs and to enable our core businesses to continue to generate revenue even under adverse circumstances.

Management has implemented a number of policies according to the following liquidity risk management framework:

Excess Liquidity We maintain substantial excess liquidity to meet a broad range of potential cash outflows in a stressed environment including financing obligations.

Asset-Liability Management We ensure our funding sources are sufficiently long-term in order to withstand a prolonged or severe liquidity-stressed environment without having to rely on asset sales.

Conservative Liability Structure We access funding across a diverse range of markets, products and counterparties, emphasize less credit-sensitive sources of funding and conservatively manage the distribution of funding across our entity structure.

Crisis Planning We base our liquidity and funding management on stress-scenario planning and maintain a crisis plan detailing our response to a liquidity threatening event.

Excess Liquidity

Our most important liquidity policy is to pre-fund what we estimate will be our likely cash needs during a liquidity crisis and hold such excess liquidity in the form of unencumbered, highly liquid securities that may be sold or pledged to provide same-day liquidity. This Global Core Excess liquidity is intended to allow us to meet immediate obligations without needing to sell other assets or depend on additional funding from credit-sensitive markets. We believe that this pool of excess liquidity provides us with a resilient source of funds and gives us significant flexibility in managing through a difficult funding environment. Our Global Core Excess reflects the following principles:

The first days or weeks of a liquidity crisis are the most critical to a company's survival.

Focus must be maintained on all potential cash and collateral outflows, not just disruptions to financing flows. Goldman Sachs' businesses are diverse, and its cash needs are driven by many factors, including market movements, collateral requirements and client commitments, all of which can change dramatically in a difficult funding environment.

During a liquidity crisis, credit-sensitive funding, including unsecured debt and some types of secured financing agreements, may be unavailable and the terms or availability of other types of secured financing may change.

Table of Contents

As a result of our policy to pre-fund liquidity that we estimate may be needed in a crisis, we hold more unencumbered securities and have larger unsecured debt balances than our businesses would otherwise require. We believe that our liquidity is stronger with greater balances of highly liquid unencumbered securities, even though it increases our unsecured liabilities.

The size of our Global Core Excess is based on an internal liquidity model together with a qualitative assessment of the condition of the financial markets and of Goldman Sachs. Our liquidity model identifies and estimates cash and collateral outflows over a short-term horizon in a liquidity crisis, including, but not limited to:

upcoming maturities of unsecured debt and letters of credit;

potential buybacks of a portion of our outstanding negotiable unsecured debt;

adverse changes in the terms or availability of secured funding;

derivatives and other margin and collateral outflows, including those due to market moves;

potential cash outflows associated with our prime brokerage business;

additional collateral that could be called in the event of a two-notch downgrade in our credit ratings;

draws on our unfunded commitments not supported by William Street Funding Corporation ⁽¹⁾; and

upcoming cash outflows, such as tax and other large payments.

The following table sets forth the average loan value (the estimated amount of cash that would be advanced by counterparties against these securities) of our Global Core Excess:

	Year Ended November	
	2006	2005
	(in millions)	
U.S. dollar-denominated	\$40,862	\$35,310
Non-U.S. dollar-denominated	10,202	11,029
Total Global Core Excess	\$51,064	\$46,339

The U.S. dollar-denominated excess is comprised of only unencumbered U.S. government and agency securities and highly liquid mortgage securities, all of which are Federal Reserve repo-eligible, as well as overnight cash deposits. Our non-U.S. dollar-denominated excess is comprised of only unencumbered French, German, United Kingdom and Japanese government bonds and euro, British pound and Japanese yen overnight cash deposits. We strictly limit our Global Core Excess to this narrowly defined list of securities and cash that we believe are highly liquid, even in a difficult funding environment.

The majority of our Global Core Excess is structured such that it is available to meet the liquidity requirements of our parent company, Group Inc., and all of its subsidiaries. The remainder is primarily held to better match the currency and timing requirements for potential liquidity obligations of our principal non-U.S. operating entities.

(1)

The Global Core Excess excludes liquid assets of \$6.93 billion held separately by William Street Funding Corporation. See Contractual Obligations and Commitments above for a further discussion of the William Street credit extension program.

Table of Contents

In addition to our Global Core Excess, we have a significant amount of other unencumbered securities as a result of our business activities. These assets, which are located in the United States, Europe and Asia, include other government bonds, high-grade money market securities, corporate bonds and marginable equities. We do not include these securities in our Global Core Excess.

We maintain Global Core Excess and other unencumbered assets in an amount that, if pledged or sold, would provide the funds necessary to replace at least 110% of our unsecured obligations that are scheduled to mature (or where holders have the option to redeem) within the next 12 months. We assume conservative loan values that are based on stress-scenario borrowing capacity and we regularly review these assumptions asset class by asset class.

Asset-Liability Management

We seek to maintain a highly liquid balance sheet and substantially all of our inventory is marked-to-market daily. We utilize aged inventory limits for certain financial instruments as a disincentive to our businesses to hold inventory over longer periods of time. We believe that these limits provide a complementary mechanism for ensuring appropriate balance sheet liquidity in addition to our standard position limits. Although our balance sheet fluctuates due to seasonal activity, market conventions and periodic market opportunities in certain of our businesses, our total assets and adjusted assets at financial statement dates are not materially different than those occurring within our reporting periods.

We seek to manage the maturity profile of our funding base such that we should be able to liquidate our assets prior to our liabilities coming due, even in times of prolonged or severe liquidity stress. We do not rely on immediate sales of assets (other than our Global Core Excess) to maintain liquidity in a distressed environment, although we recognize orderly asset sales may be prudent and necessary in a persistent liquidity crisis.

In order to avoid reliance on asset sales, our goal is to ensure that we have sufficient total capital (unsecured long-term borrowings plus total shareholders' equity) to fund our balance sheet for at least one year. The amount of our total capital is based on an internal liquidity model, which incorporates, among other things, the following long-term financing requirements:

- the portion of financial instruments owned that we believe could not be funded on a secured basis in periods of market stress, assuming conservative loan values;

- goodwill and identifiable intangible assets, property, leasehold improvements and equipment, and other illiquid assets;

- derivative and other margin and collateral requirements;

- anticipated draws on our unfunded loan commitments; and

- capital or other forms of financing in our regulated subsidiaries that is in excess of their long-term financing requirements. See **Conservative Liability Structure** below for a further discussion of how we fund our subsidiaries.

Table of Contents

Certain financial instruments may be more difficult to fund on a secured basis during times of market stress. Accordingly, we generally hold higher levels of total capital for these assets than more liquid types of financial instruments. The table below sets forth our aggregate holdings in these categories of financial instruments:

	As of November	
	2006	2005
	(in millions)	
Mortgage whole loans and collateralized debt obligations ⁽¹⁾	\$41,017	\$31,459
Bank loans ⁽²⁾	28,196	13,843
High-yield securities	11,054	8,822
Emerging market debt securities	2,291	1,789
SMFG convertible preferred stock	4,505	4,058
ICBC ordinary shares ⁽³⁾	5,194	
Other corporate principal investments ⁽⁴⁾	3,675	1,723
Other private equity and restricted public equity securities	3,736	1,297
Real estate principal investments ⁽⁴⁾	588	745

(1) Includes certain mortgage-backed interests held in QSPEs. See Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our securitization activities.

(2) Includes funded commitments and inventory held in connection with our origination and secondary trading activities.

(3) Includes interests of \$3.28 billion as of November 2006 held by investment funds managed by Goldman Sachs.

(4) Excludes assets related to consolidated merchant banking funds of \$6.03 billion and \$1.93 billion as of November 2006 and November 2005, respectively, for which Goldman Sachs is not at risk.

A large portion of these assets are funded through secured funding markets or nonrecourse financing. We focus on demonstrating a consistent ability to fund these assets on a secured basis for extended periods of time to reduce refinancing risk and to help ensure that they have an established amount of loan value in order that they can be funded in periods of market stress.

See Note 3 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding the financial instruments we hold.

Conservative Liability Structure

We seek to structure our liabilities conservatively to reduce refinancing risk and the risk that we may redeem or repurchase certain of our borrowings prior to their contractual maturity. Our conservative liability structure reflects the following policies:

We fund a substantial portion of our inventory on a secured basis. We believe secured financing provides Goldman Sachs with a more stable source of liquidity than unsecured financing, as it is less sensitive to changes in our credit due to underlying collateral.

Our liquidity depends to an important degree on the stability of our short-term unsecured financing base. Accordingly, we prefer the use of promissory notes (in which Goldman Sachs does not make a market) over commercial paper, which we may repurchase prior to maturity through the ordinary course of business as a market maker. As of November 2006 and November 2005, our unsecured short-term borrowings, including the current portion of unsecured long-term borrowings was \$47.9 billion and \$47.2 billion, respectively. See Note 4 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our unsecured short-term borrowings.

Table of Contents

We recognize that secured funding transactions have greater refinancing risk when the underlying collateral is more difficult to fund. Consequently, we seek longer maturities for secured funding transactions collateralized by these assets. In some cases, we use extendible maturity features to obtain a rolling minimum term to the funding.

We issue substantially all of our unsecured debt without provisions that would, based solely upon an adverse change in our credit ratings, financial ratios, earnings, cash flows or stock price, trigger a requirement for an early payment, collateral support, change in terms, acceleration of maturity or the creation of an additional financial obligation.

We seek to maintain broad and diversified funding sources globally for both secured and unsecured funding. We make extensive use of the repurchase agreement and securities lending markets, as well as other secured funding markets. In addition, we issue debt through syndicated U.S. registered offerings, U.S. registered and 144A medium-term note programs, offshore medium-term note offerings and other bond offerings, U.S. and non-U.S. commercial paper and promissory note issuances, and other methods. We also arrange for letters of credit to be issued on our behalf.

We benefit from distributing our debt issuances through our own sales force to a large, diverse global creditor base and we believe that our relationships with our creditors are critical to our liquidity. Our creditors include banks, governments, securities lenders, pension funds, insurance companies and mutual funds. We access funding in a variety of markets in the United States, Europe and Asia. We have imposed various internal guidelines on investor concentration, including the amount of our commercial paper that can be owned and letters of credit that can be issued by any single investor or group of investors.

To mitigate refinancing risk, we have created internal guidelines on the principal amount of debt maturing on any one day or during any week or year. The following table sets forth our quarterly unsecured long-term borrowings maturity profile through 2012:

- (1) Our unsecured long-term borrowings include extendible debt if the earliest maturity is one year or greater from our financial statement date. Extendible debt is categorized in the maturity profile at the earliest possible maturity even though the debt can be, and in the past generally has been, extended.

Table of Contents

The weighted average maturity of our unsecured long-term borrowings as of November 2006 was approximately eight years. We swap a substantial portion of our long-term borrowings into U.S. dollar obligations with short-term floating interest rates in order to minimize our exposure to interest rates and foreign exchange movements.

For a discussion of factors that could impair our ability to access the capital markets, see **Certain Risk Factors That May Affect Our Business** above as well as **Risk Factors** in Part I, Item 1A of the Annual Report on Form 10-K.

Subsidiary Funding Policies. Substantially all of our unsecured funding is raised by our parent company, Group Inc. The parent company then lends the necessary funds to its subsidiaries, some of which are regulated, to meet their asset financing and capital requirements. In addition, the parent company provides its regulated subsidiaries with the necessary capital to meet their regulatory requirements. The benefits of this approach to subsidiary funding include enhanced control and greater flexibility to meet the funding requirements of our subsidiaries.

Our intercompany funding policies are predicated on an assumption that, unless legally provided for, funds or securities are not freely available from a subsidiary to its parent company or other subsidiaries. In particular, many of our subsidiaries are subject to laws that authorize regulatory bodies to block or limit the flow of funds from those subsidiaries to Group Inc. Regulatory action of that kind could impede access to funds that Group Inc. needs to make payments on obligations, including debt obligations. As such, we assume that capital or other financing provided to our regulated subsidiaries is not available to our parent company or other subsidiaries. In addition, we assume that the Global Core Excess held in our principal non-U.S. operating entities will not be available to our parent company or other subsidiaries and therefore is available only to meet the potential liquidity requirements of those entities.

We also manage our liquidity risk by requiring senior and subordinated intercompany loans to have maturities equal to or shorter than the maturities of the aggregate borrowings of the parent company. This policy ensures that the subsidiaries' obligations to the parent company will generally mature in advance of the parent company's third-party borrowings. In addition, many of our subsidiaries and affiliates pledge collateral to the parent company to cover their intercompany borrowings (other than subordinated debt) in order to mitigate parent company liquidity risk.

Group Inc. has provided substantial amounts of equity and subordinated indebtedness, directly or indirectly, to its regulated subsidiaries; for example, as of November 2006, Group Inc. had \$17.32 billion of such equity and subordinated indebtedness invested in Goldman, Sachs & Co., its principal U.S. registered broker-dealer; \$23.87 billion invested in Goldman Sachs International, a regulated U.K. broker-dealer; \$2.50 billion invested in Goldman Sachs Execution & Clearing, L.P., a U.S. registered broker-dealer; and \$2.79 billion invested in Goldman Sachs Japan Co., Ltd. (GSJCL) a regulated Japanese broker-dealer. Group Inc. also had \$46.25 billion of unsubordinated loans to these entities as of November 2006, as well as significant amounts of capital invested in and loans to its other regulated subsidiaries.

Crisis Planning

In order to be prepared for a liquidity event, or a period of market stress, we base our liquidity risk management framework and our resulting funding and liquidity policies on conservative stress-scenario assumptions. Our planning incorporates several market-based and operational stress scenarios. We also periodically conduct liquidity crisis drills to test our lines of communication and backup funding procedures.

In addition, we maintain a liquidity crisis plan that specifies an approach for analyzing and responding to a liquidity-threatening event. The plan provides the framework to estimate the likely impact of a liquidity event on Goldman Sachs based on some of the risks identified above and outlines which and to what extent liquidity maintenance activities should be implemented based on

Table of Contents

the severity of the event. It also lists the crisis management team and internal and external parties to be contacted to ensure effective distribution of information.

Credit Ratings

We rely upon the short-term and long-term debt capital markets to fund a significant portion of our day-to-day operations. The cost and availability of debt financing is influenced by our credit ratings. Credit ratings are important when we are competing in certain markets and when we seek to engage in longer term transactions, including OTC derivatives. We believe our credit ratings are primarily based on the credit rating agencies' assessment of our liquidity, market, credit and operational risk management practices, the level and variability of our earnings, our capital base, our franchise, reputation and management, our corporate governance and the external operating environment. See

Certain Risk Factors That May Affect Our Business above for a discussion of the risks associated with a reduction in our credit ratings.

The following table sets forth our unsecured credit ratings as of November 2006:

	Short-Term Debt	Long-Term Debt	Subordinated Debt ⁽¹⁾	Preferred Stock
Dominion Bond Rating Service Limited	R-1 (middle)	AA (low)	Not applicable	Not applicable
Fitch, Inc.	F1+	AA-	A+	A+
Moody's Investors Service	P1	Aa3	A1	A2
Standard & Poor's ⁽²⁾	A-1+	AA-	A+	A

⁽¹⁾ During 2006, we issued \$4.46 billion of subordinated debt. See Note 5 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding our subordinated debt.

⁽²⁾ During the fourth quarter of 2006, Standard & Poor's raised our short-term debt rating from A-1 to A-1+, our long-term debt rating from A+ to AA-, our subordinated debt from A to A+ and our preferred stock from A- to A.

As of November 2006, collateral or termination payments pursuant to bilateral agreements with certain counterparties of approximately \$595 million would have been required in the event of a one-notch reduction in our long-term credit ratings. In evaluating our liquidity requirements, we consider additional collateral or termination payments that would be required in the event of a two-notch downgrade in our long-term credit ratings, as well as collateral that has not been called by counterparties, but is available to them.

Cash Flows

As a global financial institution, our cash flows are complex and interrelated and bear little relation to our net earnings and net assets and, consequently, we believe that traditional cash flow analysis is less meaningful in evaluating our liquidity position than the excess liquidity and asset-liability management policies described above. Cash flow analysis may, however, be helpful in highlighting certain macro trends and strategic initiatives in our business.

Year Ended November 2006. Our cash and cash equivalents decreased by \$3.97 billion to \$6.29 billion at the end of 2006. We raised \$53.40 billion in net cash from financing activities, primarily in long-term borrowings as well as through secured financings, partially offset by common stock repurchases. We used net cash of \$57.37 billion in our operating and investing activities, primarily to capitalize on trading and investing opportunities for our clients and

ourselves.

Year Ended November 2005. Our cash and cash equivalents increased by \$5.90 billion to \$10.26 billion at the end of 2005. We raised \$19.37 billion in net cash from financing activities, primarily in long-term borrowings, in light of the favorable debt financing environment, as well as through secured financings, partially offset by common stock repurchases. We used net cash of \$13.48 billion in our operating and investing activities, primarily to capitalize on trading and investing opportunities for our clients and ourselves.

Table of Contents

Year Ended November 2004. Our cash and cash equivalents decreased by \$2.72 billion to \$4.37 billion at the end of 2004. We raised \$31.75 billion in net cash from financing activities, primarily in long-term borrowings, in light of the favorable debt financing environment, as well as through secured financings. We used net cash of \$34.48 billion in our operating and investing activities, primarily to capitalize on trading and investing opportunities for our clients and ourselves, to meet additional collateral requirements at securities exchanges and clearing organizations and to provide additional funding support for our William Street loan commitments program.

Operational Risk

Operational risk relates to the risk of loss arising from shortcomings or failures in internal processes, people or systems, and from external events. Operational risk can arise from many factors ranging from routine processing errors to potentially costly incidents arising, for example, from major systems failures. Operational risk may also cause reputational harm. Thus, efforts to identify, manage and mitigate operational risk must be equally sensitive to the risk of reputational damage as well as the risk of financial loss.

We manage operational risk through the application of long-standing, but continuously evolving, firmwide control standards: the training, supervision and development of our people; the active participation and commitment of senior management in a continuous process of identifying and mitigating key operational risks across Goldman Sachs; and a framework of strong and independent control departments that monitor operational risk on a daily basis. Together, these elements form a strong firmwide control culture that serves as the foundation of our efforts to minimize events that create operational risk and the damage they can cause.

The Operational Risk Department, an independent risk management function, is responsible for developing and implementing a standardized framework to identify, measure, monitor and manage operational risk across Goldman Sachs. This framework, which evolves with the changing needs of our businesses and regulatory guidance, takes into account internal and external operational risk events, business environment and internal control factors, the ongoing analysis of business-specific risk metrics and the use of scenario analysis. While individual business units have direct responsibility for the control and mitigation of operational risk, this framework provides a consistent methodology for identifying and monitoring operational risk factors at the business unit and firmwide level. For a further discussion of operational risk see Risk Factors in Part I, Item 1A of the Annual Report on Form 10-K.

Recent Accounting Developments

SFAS No. 123-R. In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123-R, Share-Based Payment, which is a revision to SFAS No. 123, Accounting for Stock-Based Compensation. SFAS No. 123-R focuses primarily on accounting for transactions in which an entity obtains employee services in exchange for share-based payments. Under SFAS No. 123-R, the cost of employee services received in exchange for an award of equity instruments is generally measured based on the grant-date fair value of the award. Under SFAS No. 123-R, share-based awards that do not require future service (i.e., vested awards) are expensed immediately. Share-based employee awards that require future service are amortized over the relevant service period. We adopted SFAS No. 123-R under the modified prospective adoption method. Under that method of adoption, the provisions of SFAS No. 123-R are generally applied only to share-based awards granted subsequent to adoption. The accounting treatment of share-based awards granted to retirement-eligible employees prior to our adoption of SFAS No. 123-R has not changed and financial statements for periods prior to adoption are not restated for the effects of adopting SFAS No. 123-R.

SFAS No. 123-R requires the immediate expensing of share-based awards granted to retirement-eligible employees, including awards subject to non-compete agreements. Share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R must continue to be amortized over the stated service period of the award (and accelerated if the

Table of Contents

employee actually retires). Consequently, our compensation and benefits expenses in 2006 included (and, to a lesser extent, 2007 and 2008 will include) both the amortization of awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R as well as the full grant-date fair value of new awards granted to such employees under SFAS No. 123-R. If we had amortized share-based compensation prior to the adoption of SFAS No. 123-R over a period beginning on the date of grant and ending on the earlier of the vesting date or the date of retirement eligibility, compensation and benefits expenses would have been \$637 million lower in 2006, approximately \$350 million higher in 2005 and approximately \$375 million higher in 2004.

SFAS No. 123-R requires expected forfeitures to be included in determining share-based employee compensation expense. Prior to the adoption of SFAS No. 123-R, forfeiture benefits were recorded as a reduction to compensation and benefits expense when an employee left Goldman Sachs and forfeited the award. In the first quarter of 2006, we recorded a benefit for expected forfeitures on all outstanding share-based awards. The transition impact of adopting SFAS No. 123-R as of the first day of our 2006 fiscal year, including the effect of accruing for expected forfeitures on outstanding share-based awards, was not material to our results of operations.

EITF Issue No. 04-5. In June 2005, the EITF reached consensus on Issue No. 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights*, which requires general partners to consolidate their partnerships or to provide limited partners with rights to remove the general partner or to terminate the partnership. Goldman Sachs, as the general partner of numerous merchant banking and asset management partnerships, was required to adopt the provisions of EITF Issue No. 04-5 (i) immediately for partnerships formed or modified after June 29, 2005 and (ii) in the first quarter of 2007 for partnerships formed on or before June 29, 2005 that have not been modified. We have generally provided limited partners in these funds with rights to remove Goldman Sachs as the general partner or to terminate the partnerships. Therefore, the adoption of EITF Issue No. 04-5 did not have a material effect on our financial condition, results of operations or cash flows in 2006 for partnerships formed or modified after June 29, 2005 and is not expected to have a material effect in 2007.

SFAS No. 155. In February 2006, the FASB issued SFAS No. 155, *Accounting for Certain Hybrid Financial Instruments* an amendment of FASB Statements No. 133 and 140. SFAS No. 155 permits an entity to measure at fair value any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. As permitted, we early adopted SFAS No. 155 in the first quarter of 2006. Adoption did not have a material effect on our financial condition, results of operations or cash flows.

SFAS No. 156. Effective for the first quarter of 2006, we adopted SFAS No. 156, *Accounting for Servicing of Financial Assets* an amendment of FASB Statement No. 140, which permits entities to elect to measure servicing assets and servicing liabilities at fair value and report changes in fair value in earnings. Goldman Sachs acquires residential mortgage servicing rights in connection with its mortgage securitization activities and has elected under SFAS No. 156 to account for these servicing rights at fair value. Adoption did not have a material effect on our financial condition, results of operations or cash flows.

FIN No. 46-R-6. In April 2006, the FASB issued FASB Staff Position (FSP) FIN No. 46-R-6, *Determining the Variability to Be Considered in Applying FASB Interpretation No. 46-R*. This FSP addresses how a reporting enterprise should determine the variability to be considered in applying FIN No. 46-R by requiring an analysis of the purpose for which an entity was created and the variability that the entity was designed to create. This FSP must be applied prospectively to all entities with which a reporting enterprise first becomes involved and to all entities previously required to be analyzed under FIN No. 46-R when a reconsideration event has occurred. As permitted, we early adopted FSP FIN No. 46-R-6 in the third quarter of 2006. Adoption did not have a material effect on our financial condition, results of operations or cash flows.

Table of Contents

FIN No. 48. In June 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109. FIN No. 48 requires that management determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets this recognition threshold, the position is measured to determine the amount of benefit to be recognized in the financial statements. We expect to adopt the provisions of FIN No. 48 beginning in the first quarter of 2008. We are currently evaluating the impact of adopting FIN No. 48 on our financial condition, results of operations and cash flows.

SFAS No. 157. In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 clarifies that fair value is an exit price, representing the amount that would be exchanged to sell an asset or transfer a liability in an orderly transaction between market participants. SFAS No. 157 nullifies the consensus reached in EITF Issue No. 02-3 prohibiting the recognition of day one gain or loss on derivative contracts (and hybrid instruments measured at fair value under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as modified by SFAS No. 155) where we cannot verify all of the significant model inputs to observable market data and verify the model to market transactions. However, SFAS No. 157 requires that a fair value measurement technique include an adjustment for risks inherent in a particular valuation technique (such as a pricing model) and/or the risks inherent in the inputs to the model, if market participants would also include such an adjustment. In addition, SFAS No. 157 prohibits the recognition of block discounts for large holdings of unrestricted financial instruments where quoted prices are readily and regularly available in an active market. The provisions of SFAS No. 157 are to be applied prospectively, except for changes in fair value measurements that result from the initial application of SFAS No. 157 to existing derivative financial instruments measured under EITF Issue No. 02-3, existing hybrid instruments measured at fair value and block discounts, which are to be recorded as an adjustment to opening retained earnings in the year of adoption.

We intend to adopt SFAS No. 157 in the first quarter of 2007. To determine the transition adjustment to opening retained earnings, we have performed an analysis of existing derivative instruments measured under EITF Issue 02-3, hybrid financial instruments and block discounts. To determine the prospective transition adjustment that will be recorded in net revenues in the first quarter of 2007, we will perform an analysis of all other positions. With respect to principal investments, the prospective transition adjustment may include positive changes to investment valuations based on available market evidence even if there have been no third-party transactions in the capital structure of the underlying investee. The transition adjustment to opening retained earnings will not have a material effect on our financial condition. We are currently evaluating the impact of SFAS No. 157 on our results of operations for the first quarter of 2007.

SFAS No. 158. In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132-R. SFAS No. 158 requires an entity to recognize in its statement of financial condition the funded status of its defined benefit pension and postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. SFAS No. 158 also requires an entity to recognize changes in the funded status of a defined benefit pension and postretirement plan within accumulated other comprehensive income, net of tax, to the extent such changes are not recognized in earnings as components of periodic net benefit cost. SFAS No. 158 is effective as of the end of the fiscal year ending after December 15, 2006. We will adopt SFAS No. 158 as of the end of 2007. We do not expect that the adoption of SFAS No. 158 will have a material effect on our financial condition, results of operations or cash flows.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

Quantitative and qualitative disclosure about market risk is set forth under Management's Discussion and Analysis of Financial Condition and Results of Operations Risk Management in Part II, Item 7 of the Annual Report on Form 10-K.

**Management's Report on Internal Control over
Financial Reporting**

Management of The Goldman Sachs Group, Inc., together with its consolidated subsidiaries (the firm), is responsible for establishing and maintaining adequate internal control over financial reporting. The firm's internal control over financial reporting is a process designed under the supervision of the firm's principal executive and principal financial officers to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the firm's financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

As of the end of the firm's 2006 fiscal year, management conducted an assessment of the effectiveness of the firm's internal control over financial reporting based on the framework established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the firm's internal control over financial reporting as of November 24, 2006 was effective.

Our internal control over financial reporting includes policies and procedures that pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the firm; and provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the firm's assets that could have a material effect on our financial statements.

Management's assessment of the effectiveness of the firm's internal control over financial reporting as of November 24, 2006 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report appearing on pages 109 and 110, which expresses unqualified opinions on management's assessment and on the effectiveness of the firm's internal control over financial reporting as of November 24, 2006.

Table of Contents

Report of Independent Registered Public Accounting Firm

To the Board of Directors and the Shareholders of
The Goldman Sachs Group, Inc.:

We have completed integrated audits of The Goldman Sachs Group, Inc.'s consolidated financial statements and of its internal control over financial reporting as of November 24, 2006, in accordance with the standards of the Public Company Accounting Oversight Board (United States). Our opinions, based on our audits, are presented below.

Consolidated financial statements and financial statement schedule

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of The Goldman Sachs Group, Inc. and its subsidiaries (the Company) at November 24, 2006 and November 25, 2005, and the results of its operations and its cash flows for each of the three fiscal years in the period ended November 24, 2006 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit of financial statements includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Internal control over financial reporting

Also, in our opinion, management's assessment, included in Management's Report on Internal Control over Financial Reporting appearing on page 108, that the Company maintained effective internal control over financial reporting as of November 24, 2006 based on criteria established in *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), is fairly stated, in all material respects, based on those criteria. Furthermore, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of November 24, 2006, based on criteria established in *Internal Control Integrated Framework* issued by the COSO. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express opinions on management's assessment and on the effectiveness of the Company's internal control over financial reporting based on our audit. We conducted our audit of internal control over financial reporting in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. An audit of internal control over financial reporting includes obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we consider necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Table of Contents

A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

SUPPLEMENTAL DISCLOSURES:

Cash payments for interest, net of capitalized interest, were \$30.98 billion, \$17.49 billion and \$8.55 billion for the years ended November 2006, November 2005 and November 2004, respectively.

Cash payments for income taxes, net of refunds, were \$4.56 billion, \$2.47 billion and \$1.02 billion for the years ended November 2006, November 2005 and November 2004, respectively.

Non-cash activities:

The firm assumed \$498 million, \$1.15 billion and \$1.63 billion of debt in connection with business acquisitions for the years ended November 2006, November 2005 and November 2004, respectively.

The accompanying notes are an integral part of these consolidated financial statements.

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Description of Business

The Goldman Sachs Group, Inc. (Group Inc.), a Delaware corporation, together with its consolidated subsidiaries (collectively, the firm), is a leading global investment banking, securities and investment management firm that provides a wide range of services worldwide to a substantial and diversified client base that includes corporations, financial institutions, governments and high-net-worth individuals.

The firm's activities are divided into three segments:

Investment Banking. The firm provides a broad range of investment banking services to a diverse group of corporations, financial institutions, investment funds, governments and individuals.

Trading and Principal Investments. The firm facilitates client transactions with a diverse group of corporations, financial institutions, investment funds, governments and individuals and takes proprietary positions through market making in, trading of and investing in fixed income and equity products, currencies, commodities and derivatives on these products. In addition, the firm engages in specialist and market-making activities on equities and options exchanges and clears client transactions on major stock, options and futures exchanges worldwide. In connection with the firm's merchant banking and other investing activities, the firm makes principal investments directly and through funds that the firm raises and manages.

Asset Management and Securities Services. The firm provides investment advisory and financial planning services and offers investment products (primarily through separate accounts and funds) across all major asset classes to a diverse group of institutions and individuals worldwide and provides prime brokerage services, financing services and securities lending services to institutional clients, including hedge funds, mutual funds, pension funds and foundations, and to high-net-worth individuals worldwide.

Note 2. Significant Accounting Policies

Basis of Presentation

These consolidated financial statements include the accounts of Group Inc. and all other entities in which the firm has a controlling financial interest. All material intercompany transactions and balances have been eliminated.

The firm determines whether it has a controlling financial interest in an entity by first evaluating whether the entity is a voting interest entity, a variable interest entity (VIE) or a qualifying special-purpose entity (QSPE) under generally accepted accounting principles.

Voting Interest Entities. Voting interest entities are entities in which (i) the total equity investment at risk is sufficient to enable the entity to finance its activities independently and (ii) the equity holders have the obligation to absorb losses, the right to receive residual returns and the right to make decisions about the entity's activities. Voting interest entities are consolidated in accordance with Accounting Research Bulletin (ARB) No. 51, Consolidated Financial Statements, as amended. ARB No. 51 states that the usual condition for a controlling financial interest in an entity is ownership of a majority voting interest. Accordingly, the firm consolidates voting interest entities in which it has a majority voting interest.

Table of Contents

**THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Variable Interest Entities. VIEs are entities that lack one or more of the characteristics of a voting interest entity. A controlling financial interest in a VIE is present when an enterprise has a variable interest, or a combination of variable interests, that will absorb a majority of the VIE's expected losses, receive a majority of the VIE's expected residual returns, or both. The enterprise with a controlling financial interest, known as the primary beneficiary, consolidates the VIE. In accordance with Financial Accounting Standards Board (FASB) Interpretation (FIN) No. 46-R, Consolidation of Variable Interest Entities, the firm consolidates VIEs of which it is the primary beneficiary.

The firm determines whether it is the primary beneficiary of a VIE by first performing a qualitative analysis of the VIE that includes a review of, among other factors, its capital structure, contractual terms, which interests create or absorb variability, related party relationships and the design of the VIE. Where qualitative analysis is not conclusive, the firm performs a quantitative analysis. For purposes of allocating a VIE's expected losses and expected residual returns to its variable interest holders, the firm utilizes the "top down" method. Under that method, the firm calculates its share of the VIE's expected losses and expected residual returns using the specific cash flows that would be allocated to it, based on contractual arrangements and/or the firm's position in the capital structure of the VIE, under various probability-weighted scenarios.

QSPEs. QSPEs are passive entities that are commonly used in mortgage and other securitization transactions. Statement of Financial Accounting Standards (SFAS) No. 140, Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities, sets forth the criteria an entity must satisfy to be a QSPE. These criteria include the types of assets a QSPE may hold, limits on asset sales, the use of derivatives and financial guarantees, and the level of discretion a servicer may exercise in attempting to collect receivables. These criteria may require management to make judgments about complex matters, including whether a derivative is considered passive and the degree of discretion a servicer may exercise. In accordance with SFAS No. 140 and FIN No. 46-R, the firm does not consolidate QSPEs.

Equity-Method Investments. When the firm does not have a controlling financial interest in an entity but exerts significant influence over the entity's operating and financial policies (generally defined as owning a voting interest of 20% to 50%) and has an investment in common stock or in-substance common stock, the firm accounts for its investment in accordance with the equity method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock.

Other. If the firm does not consolidate an entity or apply the equity method of accounting, the firm accounts for its investment at fair value. The firm also has formed numerous nonconsolidated investment funds with third-party investors that are typically organized as limited partnerships. The firm acts as general partner for these funds and does not hold a majority of the economic interests in any fund. For funds established on or before June 29, 2005 in which the firm holds more than a minor interest and for funds established or modified after June 29, 2005, the firm has generally provided the third-party investors with rights to remove the firm as the general partner or to terminate the funds (see Recent Accounting Developments below for a discussion of the impact of Emerging Issues Task Force (EITF) Issue No. 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights). These fund investments are included in Financial instruments owned, at fair value in the consolidated statements of financial condition.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unless otherwise stated herein, all references to November 2006, November 2005 and November 2004 refer to the firm's fiscal years ended, or the dates, as the context requires, November 24, 2006, November 25, 2005 and November 26, 2004, respectively. Certain reclassifications have been made to previously reported amounts to conform to the current presentation.

Use of Estimates

These consolidated financial statements have been prepared in accordance with generally accepted accounting principles that require management to make certain estimates and assumptions. The most important of these estimates and assumptions relate to fair value measurements, the accounting for goodwill and identifiable intangible assets and the provision for potential losses that may arise from litigation and regulatory proceedings and tax audits. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Revenue Recognition

Investment Banking. Underwriting revenues and fees from mergers and acquisitions and other financial advisory assignments are recognized in the consolidated statements of earnings when the services related to the underlying transaction are completed under the terms of the engagement. Expenses associated with such transactions are deferred until the related revenue is recognized or the engagement is otherwise concluded. Underwriting revenues are presented net of related expenses. Expenses associated with financial advisory transactions are recorded as non-compensation expenses, net of client reimbursements.

Financial Instruments. Total financial instruments owned, at fair value and Financial instruments sold, but not yet purchased, at fair value are reflected in the consolidated statements of financial condition on a trade-date basis and consist of financial instruments carried at fair value or amounts that approximate fair value, with related unrealized gains or losses generally recognized in Trading and principal investments in the consolidated statements of earnings. The fair value of a financial instrument is the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

In determining fair value, the firm separates its financial instruments into three categories: cash (i.e., nonderivative) trading instruments, derivative contracts and principal investments.

Cash Trading Instruments. Fair values of the firm's cash trading instruments are generally obtained from quoted market prices in active markets, broker or dealer price quotations, or alternative pricing sources with reasonable levels of price transparency. The types of instruments valued in this manner include U.S. government and agency securities, other sovereign government obligations, liquid mortgage products, investment-grade and high-yield corporate bonds, listed equities, money market securities, state, municipal and provincial obligations, and physical commodities.

Certain cash trading instruments trade infrequently and have little or no price transparency. Such instruments include certain corporate bank loans, mortgage whole loans and distressed debt. The firm values these instruments initially at cost and generally does not adjust valuations unless there is substantive evidence supporting a change in the value of the underlying instrument or valuation assumptions (such as similar market transactions, changes in financial ratios or changes in the credit ratings of the underlying companies). Where there is evidence supporting a change in the value, the firm uses valuation methodologies such as the present value of known or estimated cash flows.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash trading instruments owned by the firm (long positions) are marked to bid prices, and instruments sold but not yet purchased (short positions) are marked to offer prices. In certain circumstances, such as for positions that are illiquid or have transfer restrictions, the fair value reflects liquidity valuation adjustments based on market evidence or predetermined policies. For certain highly illiquid positions, management's estimates are used to determine these liquidity valuation adjustments. See Recent Accounting Developments below for a discussion of the impact of SFAS No. 157, Fair Value Measurements on the valuation of financial instruments.

Derivative Contracts. Fair values of the firm's derivative contracts consist of exchange-traded and over-the-counter (OTC) derivatives and are reflected net of cash that the firm has paid and received (for example, option premiums or cash paid or received pursuant to credit support agreements). Fair values of the firm's exchange-traded derivatives are generally determined from quoted market prices. OTC derivatives are valued using valuation models. The firm uses a variety of valuation models including the present value of known or estimated cash flows and option-pricing models. The valuation models used to derive the fair values of the firm's OTC derivatives require inputs including contractual terms, market prices, yield curves, credit curves, measures of volatility, prepayment rates and correlations of such inputs. The selection of a model to value an OTC derivative depends upon the contractual terms of, and specific risks inherent in, the instrument as well as the availability of pricing information in the market. The firm generally uses similar models to value similar instruments. Where possible, the firm verifies the values produced by its pricing models to market transactions. For OTC derivatives that trade in liquid markets, such as generic forwards, swaps and options, model selection does not involve significant judgment because market prices are readily available. For OTC derivatives that trade in less liquid markets, model selection requires more judgment because such instruments tend to be more complex and pricing information is less available in these markets. Price transparency is inherently more limited for more complex structures because they often combine one or more product types, requiring additional inputs such as correlations and volatilities. As markets continue to develop and more pricing information becomes available, the firm continues to review and refine the models it uses.

At the inception of an OTC derivative contract (day one), the firm values the contract at the model value if the firm can verify all of the significant model inputs to observable market data and verify the model to market transactions. When appropriate, valuations are adjusted to reflect various factors such as liquidity, bid/offer spreads and credit considerations. These adjustments are generally based on market evidence or predetermined policies. In certain circumstances, such as for highly illiquid positions, management's estimates are used to determine these adjustments.

Where the firm cannot verify all of the significant model inputs to observable market data and verify the model to market transactions, the firm values the contract at the transaction price at inception and, consequently, records no day one gain or loss in accordance with EITF Issue No. 02-3, Issues Involved in Accounting for Derivative Contracts Held for Trading Purposes and Contracts Involved in Energy Trading and Risk Management Activities.

Following day one, the firm adjusts the inputs to its valuation models only to the extent that changes in these inputs can be verified by similar market transactions, third-party pricing services and/or broker quotes, or can be derived from other substantive evidence such as empirical market data. In circumstances where the firm cannot verify the model to market transactions, it is possible that a different valuation model could produce a materially different

Table of Contents

**THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

estimate of fair value. See Recent Accounting Developments below for a discussion of the impact of SFAS No. 157 on the valuation of financial instruments.

Principal Investments. In valuing corporate and real estate principal investments included within the Principal Investments component of our Trading and Principal Investments segment, the firm's portfolio is separated into private investments, investments in the convertible preferred stock of Sumitomo Mitsui Financial Group, Inc. (SMFG) and the ordinary shares of Industrial and Commercial Bank of China Limited (ICBC), and other public investments.

The firm's private principal investments, by their nature, have little or no price transparency. Such investments are initially carried at cost as an approximation of fair value. Adjustments to carrying value are made if there are third-party transactions evidencing a change in value. Downward adjustments are also made, in the absence of third-party transactions, if it is determined that the expected realizable value of the investment is less than the carrying value. In reaching that determination, many factors are considered including, but not limited to, the operating cash flows and financial performance of the companies or properties relative to budgets or projections, trends within sectors and/or regions, underlying business models, expected exit timing and strategy, and any specific rights or terms associated with the investment, such as conversion features and liquidation preferences. See Recent Accounting Developments below for a discussion of the impact of SFAS No. 157 on the valuation of financial instruments.

The firm's public principal investments, which tend to be large, concentrated holdings that result from initial public offerings or other corporate transactions, are valued using quoted market prices less a liquidity valuation adjustment based on predetermined written policies.

The firm's investment in the convertible preferred stock of SMFG is carried at fair value, which is derived from a model that incorporates SMFG's common stock price and credit spreads, the impact of nontransferability and illiquidity, and downside protection on the conversion strike price. The firm's investment in the convertible preferred stock of SMFG is generally nontransferable without the consent of SMFG, but is freely convertible into SMFG common stock. As of November 2006, the firm had hedged two-thirds of the common stock underlying its investment in SMFG. Restrictions on the firm's ability to hedge or sell the remaining shares will lapse on February 7, 2007. As of November 2006, the conversion price was ¥318,800, subject to downward adjustment if the price of SMFG common stock at the time of conversion is less than the conversion price (subject to a floor of ¥105,100).

The firm's investment in the ordinary shares of ICBC is carried at fair value using quoted market prices less a liquidity valuation adjustment. The ordinary shares acquired from ICBC are subject to transfer restrictions that, among other things, prohibit any sale, disposition or other transfer until April 28, 2009. From April 28, 2009 to October 20, 2009, the firm may transfer up to 50% of the aggregate ordinary shares of ICBC that the firm owned as of October 20, 2006. The firm may transfer the remaining shares after October 20, 2009. A portion of the firm's interest is held by investment funds managed by the firm.

Transfers of Financial Assets. In general, transfers of financial assets are accounted for as sales under SFAS No. 140 when the firm has relinquished control over the transferred assets. For transfers accounted for as sales, any related gains or losses are recognized in net revenues. Transfers that are not accounted for as sales are accounted for as collateralized financings, with the related interest expense recognized in net revenues over the lives of the transactions.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Collateralized Agreements and Financings. Collateralized agreements consist of resale agreements and securities borrowed. Collateralized financings consist of repurchase agreements, securities loaned and other secured financings. Interest income or expense on collateralized agreements and collateralized financings is recognized in net revenues over the life of the transaction.

Resale and Repurchase Agreements. Financial instruments purchased under agreements to resell and financial instruments sold under agreements to repurchase, principally U.S. government, federal agency and investment-grade sovereign obligations, represent short-term collateralized financing transactions and are carried in the consolidated statements of financial condition at their contractual amounts plus accrued interest. These amounts are presented on a net-by-counterparty basis when the requirements of FIN No. 41, Offsetting of Amounts Related to Certain Repurchase and Reverse Repurchase Agreements, or FIN No. 39, Offsetting of Amounts Related to Certain Contracts, are satisfied. The firm receives financial instruments purchased under agreements to resell, makes delivery of financial instruments sold under agreements to repurchase, monitors the market value of these financial instruments on a daily basis and delivers or obtains additional collateral as appropriate.

Securities Borrowed and Loaned. Securities borrowed and loaned are recorded based on the amount of cash collateral advanced or received. These transactions are generally collateralized by cash, securities or letters of credit. The firm receives securities borrowed, makes delivery of securities loaned, monitors the market value of securities borrowed and loaned, and delivers or obtains additional collateral as appropriate.

Other Secured Financings. In addition to repurchase agreements and securities loaned, the firm funds assets through the use of other secured financing arrangements and pledges financial instruments and other assets as collateral in these transactions. The firm records these financings based on the amount of cash received. See Note 3 for further information regarding these arrangements.

Power Generation. Power generation revenues associated with the firm's consolidated power generation facilities are included in Trading and principal investments in the consolidated statements of earnings when power is delivered. These revenues were \$553 million, \$496 million and \$488 million for the years ended November 2006, November 2005 and November 2004, respectively.

Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues.

Compensation and benefits includes direct employee costs associated with the firm's consolidated power generation facilities and Cost of power generation includes the other direct costs associated with these power generation facilities and related contractual assets. Prior periods have been reclassified to conform to the current presentation, with no impact to our reported net earnings. This reclassification increased operating expenses as follows:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Compensation and benefits	\$ 78	\$ 70	\$ 29
Cost of power generation	406	386	372
Total	\$484	\$456	\$401

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Commissions. Commission revenues from executing and clearing client transactions on stock, options and futures markets worldwide are recognized in Trading and principal investments in the consolidated statements of earnings on a trade-date basis.

Insurance Activities. Revenues from variable annuity and variable life insurance contracts, and from providing reinsurance of such contracts, generally consist of fees assessed on contract holder account balances for mortality charges, policy administration and surrender charges. These fees are recognized within Trading and principal investments in the consolidated statements of earnings in the period that services are provided.

Interest credited to variable annuity and life insurance account balances and changes in reserves are recognized in Other expenses in the consolidated statements of earnings.

Premiums earned for providing property catastrophe reinsurance are recognized within Trading and principal investments in the consolidated statements of earnings over the coverage period, net of premiums ceded for the cost of reinsurance. Expenses for liabilities related to property catastrophe reinsurance claims, including estimates of claims that have been incurred but not reported, are recognized within Other expenses in the consolidated statements of earnings.

Merchant Banking Overrides. The firm is entitled to receive merchant banking overrides (i.e., an increased share of a fund's income and gains) when the return on the funds' investments exceeds certain threshold returns. Overrides are based on investment performance over the life of each merchant banking fund, and future investment underperformance may require amounts of override previously distributed to the firm to be returned to the funds. Accordingly, overrides are recognized in the consolidated statements of earnings only when all material contingencies have been resolved. Overrides are included in Trading and principal investments in the consolidated statements of earnings.

Asset Management. Management fees are recognized over the period that the related service is provided based upon average net asset values. In certain circumstances, the firm is also entitled to receive incentive fees based on a percentage of a fund's return or when the return on assets under management exceeds specified benchmark returns or other performance targets. Incentive fees are generally based on investment performance over a 12-month period and are subject to adjustment prior to the end of the measurement period. Accordingly, incentive fees are recognized in the consolidated statements of earnings when the measurement period ends. Asset management fees and incentive fees are included in Asset management and securities services in the consolidated statements of earnings.

Share-Based Compensation

In the first quarter of 2006, the firm adopted SFAS No. 123-R, Share-Based Payment, which is a revision to SFAS No. 123, Accounting for Stock-Based Compensation. SFAS No. 123-R focuses primarily on accounting for transactions in which an entity obtains employee services in exchange for share-based payments. Under SFAS No. 123-R, the cost of employee services received in exchange for an award of equity instruments is generally measured based on the grant-date fair value of the award. Under SFAS No. 123-R, share-based awards that do not require future service (i.e., vested awards) are expensed immediately. Share-based employee awards that require future service are amortized over the relevant service period. The firm adopted SFAS No. 123-R under the modified prospective adoption method. Under that method of adoption, the provisions of SFAS No. 123-R are generally applied only to share-based awards granted subsequent to adoption. The accounting treatment of share-based awards granted to retirement-eligible employees prior to the firm's adoption of SFAS No. 123-R has not changed and financial statements for periods prior to adoption are not restated for the effects of adopting SFAS No. 123-R.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

SFAS No. 123-R requires the immediate expensing of share-based awards granted to retirement-eligible employees, including awards subject to non-compete agreements. Share-based awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R must continue to be amortized over the stated service period of the award (and accelerated if the employee actually retires). Consequently, the firm's compensation and benefits expenses in 2006 included (and, to a lesser extent, 2007 and 2008 will include) both the amortization of awards held by employees that were retirement-eligible on the date of adoption of SFAS No. 123-R as well as the full grant-date fair value of new awards granted to such employees under SFAS No. 123-R. If the firm had amortized share-based compensation prior to the adoption of SFAS No. 123-R over a period beginning on the date of grant and ending on the earlier of the vesting date or the date of retirement eligibility, compensation and benefits expenses would have been \$637 million lower in 2006, approximately \$350 million higher in 2005 and approximately \$375 million higher in 2004.

SFAS No. 123-R requires expected forfeitures to be included in determining share-based employee compensation expense. Prior to the adoption of SFAS No. 123-R, forfeiture benefits were recorded as a reduction to compensation and benefits expense when an employee left the firm and forfeited the award. In the first quarter of 2006, the firm recorded a benefit for expected forfeitures on all outstanding share-based awards. The transition impact of adopting SFAS No. 123-R as of the first day of the firm's 2006 fiscal year, including the effect of accruing for expected forfeitures on outstanding share-based awards, was not material to the firm's results of operations.

The firm began to account for share-based awards in accordance with the fair value method prescribed by SFAS No. 123, *Accounting for Stock-Based Compensation*, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosure*, in 2003. Share-based employee awards granted for the year ended November 29, 2002 and prior years were accounted for under the intrinsic-value-based method prescribed by APB Opinion No. 25, *Accounting for Stock Issued to Employees*, as permitted by SFAS No. 123. Therefore, no compensation expense was recognized for unmodified stock options issued for years prior to fiscal 2003 that had no intrinsic value on the date of grant.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

If the firm were to recognize compensation expense over the relevant service period, generally three years, under the fair value method per SFAS No. 123 with respect to stock options granted for the year ended November 29, 2002 and prior years, net earnings would have decreased, resulting in pro forma net earnings and earnings per common share (EPS) as set forth below:

		Year Ended November	
		2005	2004
		(in millions, except per share amounts)	
Net earnings applicable to common shareholders, as reported		\$ 5,609	\$4,553
Add:	Share-based compensation expense, net of related tax effects, included in reported net earnings	1,133	790
Deduct:	Share-based compensation expense, net of related tax effects, determined under the fair value method for all awards	(1,178)	(947)
Pro forma net earnings applicable to common shareholders		\$ 5,564	\$4,396
Earnings per common share, as reported			
	Basic	\$ 11.73	\$ 9.30
	Diluted	11.21	8.92
Pro forma earnings per common share			
	Basic	\$ 11.64	\$ 8.98
	Diluted	11.12	8.61

The firm pays cash dividend equivalents on outstanding restricted stock units. Dividend equivalents paid on restricted stock units accounted for under SFAS No. 123 and SFAS No. 123-R are charged to retained earnings when paid. SFAS No. 123-R requires dividend equivalents paid on restricted stock units expected to be forfeited to be included in compensation expense. Prior to the adoption of SFAS No. 123-R, dividend equivalents paid on restricted stock units that were later forfeited by employees were reclassified to compensation expense from retained earnings. Dividend equivalents paid on restricted stock units granted prior to 2003 were accounted for under APB Opinion No. 25 and charged to compensation expense. The tax benefit related to dividend equivalents paid on restricted stock units is accounted for as a reduction of income tax expense.

Prior to the adoption of SFAS No. 123-R, the firm presented all tax benefits resulting from share-based compensation as cash flows from operating activities in the consolidated statements of cash flows. SFAS No. 123-R requires cash flows resulting from tax deductions in excess of the grant-date fair value of share-based awards to be included in cash flows from financing activities.

In certain cases, primarily related to the death of an employee or conflicted employment (as outlined in the applicable award agreements), the firm may cash settle share-based compensation awards. Additional paid-in capital is adjusted to the extent of the difference between the current value of the award and the grant-date value of the award.

Goodwill

Goodwill is the cost of acquired companies in excess of the fair value of identifiable net assets at acquisition date. In accordance with SFAS No. 142, Goodwill and Other Intangible Assets, goodwill is tested at least annually for impairment. An impairment loss is triggered if the estimated fair value of an operating segment is less than its estimated net book value. Such loss is calculated as the difference between the estimated fair value of goodwill and its carrying value.

Table of Contents

**THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Identifiable Intangible Assets

Identifiable intangible assets, which consist primarily of customer lists, above-market power contracts, specialist rights and the value of business acquired (VOBA) and deferred acquisition costs (DAC) in the firm's insurance subsidiaries, are amortized over their estimated useful lives. Identifiable intangible assets are tested for potential impairment whenever events or changes in circumstances suggest that an asset's or asset group's carrying value may not be fully recoverable in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. An impairment loss, calculated as the difference between the estimated fair value and the carrying value of an asset or asset group, is recognized if the sum of the estimated undiscounted cash flows relating to the asset or asset group is less than the corresponding carrying value.

Property, Leasehold Improvements and Equipment

Property, leasehold improvements and equipment, net of accumulated depreciation and amortization, are included in Other assets in the consolidated statements of financial condition.

Property and equipment placed in service prior to December 1, 2001 are depreciated under the accelerated cost recovery method. Property and equipment placed in service on or after December 1, 2001 are depreciated on a straight-line basis over the useful life of the asset. Leasehold improvements for which the useful life of the improvement is shorter than the term of the lease are amortized under the accelerated cost recovery method if placed in service prior to December 1, 2001. All other leasehold improvements are amortized on a straight-line basis over the useful life of the improvement or the term of the lease, whichever is shorter. Certain costs of software developed or obtained for internal use are capitalized and amortized on a straight-line basis over the useful life of the software.

Property, leasehold improvements and equipment are tested for potential impairment whenever events or changes in circumstances suggest that an asset's or asset group's carrying value may not be fully recoverable in accordance with SFAS No. 144. An impairment loss, calculated as the difference between the estimated fair value and the carrying value of an asset or asset group, is recognized if the sum of the expected undiscounted cash flows relating to the asset or asset group is less than the corresponding carrying value.

The firm's operating leases include space held in excess of current requirements. Rent expense relating to space held for growth is included in Occupancy in the consolidated statements of earnings. In accordance with SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*, the firm records a liability, based on the remaining lease rentals reduced by any potential or existing sublease rentals, for leases where the firm has ceased using the space and management has concluded that the firm will not derive any future economic benefits. Costs to terminate a lease before the end of its term are recognized and measured at fair value upon termination.

Foreign Currency Translation

Assets and liabilities denominated in non-U.S. currencies are translated at rates of exchange prevailing on the date of the consolidated statement of financial condition, and revenues and expenses are translated at average rates of exchange for the year. Gains or losses on translation of the financial statements of a non-U.S. operation, when the functional currency is other than the U.S. dollar, are included, net of hedges and taxes, on the consolidated statements of comprehensive income. The firm seeks to reduce its net investment exposure to fluctuations in foreign exchange rates through the use of foreign currency forward contracts and foreign currency-denominated debt. For foreign currency forward contracts, hedge effectiveness is assessed based on changes in

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

forward exchange rates; accordingly, forward points are reflected as a component of the currency translation adjustment in the consolidated statements of comprehensive income. For foreign currency-denominated debt, hedge effectiveness is assessed based on changes in spot rates. Foreign currency remeasurement gains or losses on transactions in nonfunctional currencies are included in the consolidated statements of earnings.

Income Taxes

Deferred tax assets and liabilities are recognized for temporary differences between the financial reporting and tax bases of the firm's assets and liabilities. Valuation allowances are established to reduce deferred tax assets to the amount that more likely than not will be realized. The firm's tax assets and liabilities are presented as a component of

Other assets and Other liabilities and accrued expenses, respectively, in the consolidated statements of financial condition. Tax provisions are computed in accordance with SFAS No. 109, Accounting for Income Taxes. Contingent liabilities related to income taxes are recorded when the criteria for loss recognition under SFAS No. 5, Accounting for Contingencies, as amended, have been met (see Recent Accounting Developments below for a discussion of the impact of FIN No. 48, Accounting for Uncertainty in Income Taxes—an Interpretation of FASB Statement No. 109, on SFAS No. 109).

Earnings Per Common Share

Basic EPS is calculated by dividing net earnings applicable to common shareholders by the weighted average number of common shares outstanding. Common shares outstanding includes common stock and restricted stock units for which no future service is required as a condition to the delivery of the underlying common stock. Diluted EPS includes the determinants of basic EPS and, in addition, reflects the dilutive effect of the common stock deliverable pursuant to stock options and to restricted stock units for which future service is required as a condition to the delivery of the underlying common stock.

Cash and Cash Equivalents

The firm defines cash equivalents as highly liquid overnight deposits held in the ordinary course of business.

Recent Accounting Developments

EITF Issue No. 04-5. In June 2005, the EITF reached consensus on Issue No. 04-5, Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity When the Limited Partners Have Certain Rights, which requires general partners to consolidate their partnerships or to provide limited partners with rights to remove the general partner or to terminate the partnership. The firm, as the general partner of numerous merchant banking and asset management partnerships, was required to adopt the provisions of EITF Issue No. 04-5 (i) immediately for partnerships formed or modified after June 29, 2005 and (ii) in the first quarter of 2007 for partnerships formed on or before June 29, 2005 that have not been modified. The firm has generally provided limited partners in these funds with rights to remove the firm as the general partner or to terminate the partnerships. Therefore, the adoption of EITF Issue No. 04-5 did not have a material effect on the firm's financial condition, results of operations or cash flows in 2006 for partnerships formed or modified after June 29, 2005 and is not expected to have a material effect in 2007.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

SFAS No. 155. In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140. SFAS No. 155 permits an entity to measure at fair value any hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation. As permitted, the firm early adopted SFAS No. 155 in the first quarter of 2006. Adoption did not have a material effect on the firm's financial condition, results of operations or cash flows.

SFAS No. 156. Effective for the first quarter of 2006, the firm adopted SFAS No. 156, Accounting for Servicing of Financial Assets an amendment of FASB Statement No. 140, which permits entities to elect to measure servicing assets and servicing liabilities at fair value and report changes in fair value in earnings. The firm acquires residential mortgage servicing rights in connection with its mortgage securitization activities and has elected under SFAS No. 156 to account for these servicing rights at fair value. Adoption did not have a material effect on the firm's financial condition, results of operations or cash flows.

FIN No. 46-R-6. In April 2006, the FASB issued FASB Staff Position (FSP) FIN No. 46-R-6, Determining the Variability to Be Considered in Applying FASB Interpretation No. 46-R. This FSP addresses how a reporting enterprise should determine the variability to be considered in applying FIN No. 46-R by requiring an analysis of the purpose for which an entity was created and the variability that the entity was designed to create. This FSP must be applied prospectively to all entities with which a reporting enterprise first becomes involved and to all entities previously required to be analyzed under FIN No. 46-R when a reconsideration event has occurred. As permitted, the firm early adopted FSP FIN No. 46-R-6 in the third quarter of 2006. Adoption did not have a material effect on the firm's financial condition, results of operations or cash flows.

FIN No. 48. In June 2006, the FASB issued FIN No. 48, Accounting for Uncertainty in Income Taxes an Interpretation of FASB Statement No. 109. FIN No. 48 requires that the firm determine whether a tax position is more likely than not to be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. Once it is determined that a position meets this recognition threshold, the position is measured to determine the amount of benefit to be recognized in the financial statements. The firm expects to adopt the provisions of FIN No. 48 beginning in the first quarter of 2008. The firm is currently evaluating the impact of adopting FIN No. 48 on its financial condition, results of operations and cash flows.

SFAS No. 157. In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements. SFAS No. 157 clarifies that fair value is an exit price, representing the amount that would be exchanged to sell an asset or transfer a liability in an orderly transaction between market participants. SFAS No. 157 nullifies the consensus reached in EITF Issue No. 02-3 prohibiting the recognition of day one gain or loss on derivative contracts (and hybrid instruments measured at fair value under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as modified by SFAS No. 155) where the firm cannot verify all of the significant model inputs to observable market data and verify the model to market transactions. However, SFAS No. 157 requires that a fair value measurement technique include an adjustment for risks inherent in a particular valuation technique (such as a pricing model) and/or the risks inherent in the inputs to the model, if market participants would also include such an adjustment. In addition, SFAS No. 157 prohibits the recognition of block discounts for large holdings of unrestricted financial instruments where quoted prices are readily and regularly available in an active market. The provisions of SFAS No. 157 are to be applied prospectively, except for changes in fair value measurements that result from the initial application of SFAS No. 157 to existing derivative financial instruments measured under EITF Issue No. 02-3, existing hybrid instruments measured at fair value and block discounts, which are to be recorded as an adjustment to opening retained earnings in the year of adoption.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The firm intends to adopt SFAS No. 157 in the first quarter of 2007. To determine the transition adjustment to opening retained earnings, the firm has performed an analysis of existing derivative instruments measured under EITF Issue 02-3, hybrid financial instruments and block discounts. To determine the prospective transition adjustment that will be recorded in net revenues in the first quarter of 2007, the firm will perform an analysis of all other positions. With respect to principal investments, the prospective transition adjustment may include positive changes to investment valuations based on available market evidence even if there have been no third-party transactions in the capital structure of the underlying investee. The transition adjustment to opening retained earnings will not have a material effect on the firm's financial condition. The firm is currently evaluating the impact of SFAS No. 157 on its results of operations for the first quarter of 2007.

SFAS No. 158. In September 2006, the FASB issued SFAS No. 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106 and 132-R. SFAS No. 158 requires an entity to recognize in its statement of financial condition the funded status of its defined benefit pension and postretirement plans, measured as the difference between the fair value of the plan assets and the benefit obligation. SFAS No. 158 also requires an entity to recognize changes in the funded status of a defined benefit pension and postretirement plan within accumulated other comprehensive income, net of tax, to the extent such changes are not recognized in earnings as components of periodic net benefit cost. SFAS No. 158 is effective as of the end of the fiscal year ending after December 15, 2006. The firm will adopt SFAS No. 158 as of the end of 2007. The firm does not expect that the adoption of SFAS No. 158 will have a material effect on its financial condition, results of operations or cash flows.

Note 3. Financial Instruments***Fair Value of Financial Instruments***

The following table sets forth the firm's financial instruments owned, at fair value, including those pledged as collateral, and financial instruments sold, but not yet purchased, at fair value:

As of November				
	2006		2005	
	Assets	Liabilities	Assets	Liabilities
	(in millions)			
Commercial paper, certificates of deposit, time deposits and other money market instruments	\$ 14,723 ⁽¹⁾	\$	\$ 14,609 ⁽¹⁾	\$
U.S. government, federal agency and sovereign obligations	64,383	51,200	68,688	51,458
Corporate and other debt obligations				
Mortgage whole loans and collateralized debt obligations	41,017	253	31,459	223
Investment-grade corporate bonds	17,485	4,745	12,415	4,232
Bank loans	28,196	1,154	13,843	288
High-yield securities	11,054	2,064	8,822	2,072
Preferred stock	7,927	118	7,315	71
Other	1,267	241	877	278
	106,946	8,575	74,731	7,164
Equities and convertible debentures	75,355	30,323	56,656	32,565
State, municipal and provincial obligations	3,688		2,524	
Derivative contracts	67,543 ⁽²⁾	65,496 ⁽³⁾	58,532 ⁽²⁾	57,829 ⁽³⁾
Physical commodities	1,923	211	1,286	55
Total	\$334,561 ⁽⁴⁾	\$155,805	\$277,026	\$149,071

⁽¹⁾ Includes \$6.93 billion and \$6.12 billion, as of November 2006 and November 2005, respectively, of money market instruments held by William Street Funding Corporation to support the William Street credit extension program (see Note 6 for further information regarding the William Street program).

- (2) Net of cash received pursuant to credit support agreements of \$24.06 billion and \$22.61 billion as of November 2006 and November 2005, respectively.
- (3) Net of cash paid pursuant to credit support agreements of \$16.00 billion and \$16.10 billion as of November 2006 and November 2005, respectively.
- (4) Includes securities held by the firm's bank and insurance subsidiaries, which are accounted for as available-for-sale (AFS) under SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities. The following table sets forth the types of AFS securities and their maturity profile:

As of November 2006

	Under One Year	1-5 Years	5-10 Years	10 Years or Greater	Total
(in millions)					
Mortgage-backed and other federal agency securities	\$2,374	\$1,031	\$146	\$111	\$3,662
Investment-grade corporate bonds	23	1,403	42	51	1,519
Collateralized debt obligations	192	4,199		121	4,512
Other debt securities	115	31	52	54	252
Total	\$2,704	\$6,664	\$240	\$337	\$9,945

Table of Contents

**THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Credit Concentrations

Credit concentrations may arise from trading, investing and financing activities and may be impacted by changes in economic, industry or political factors. The firm seeks to mitigate credit risk by actively monitoring exposures and obtaining collateral as deemed appropriate. While the firm's activities expose it to many different industries and counterparties, the firm routinely executes a high volume of transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment funds and other institutional clients, resulting in significant credit concentration with respect to this industry. In the ordinary course of business, the firm may also be subject to a concentration of credit risk to a particular counterparty, borrower or issuer.

As of both November 2006 and November 2005, the firm held U.S. government and federal agency obligations that represented 6% and 7% of the firm's total assets, respectively. In addition, most of the firm's financial instruments purchased under agreements to resell are collateralized by U.S. government, federal agency and other sovereign obligations. As of November 2006 and November 2005, the firm did not have credit exposure to any other counterparty that exceeded 5% of the firm's total assets.

Derivative Activities

Derivative contracts are instruments, such as futures, forwards, swaps or option contracts, that derive their value from underlying assets, indices, reference rates or a combination of these factors. Derivative instruments may be privately negotiated contracts, which are often referred to as OTC derivatives, or they may be listed and traded on an exchange. Derivatives may involve future commitments to purchase or sell financial instruments or commodities, or to exchange currency or interest payment streams. The amounts exchanged are based on the specific terms of the contract with reference to specified rates, securities, commodities, currencies or indices.

Certain cash instruments, such as mortgage-backed securities, interest-only and principal-only obligations, and indexed debt instruments, are not considered derivatives even though their values or contractually required cash flows are derived from the price of some other security or index. However, certain commodity-related contracts are included in the firm's derivatives disclosure, as these contracts may be settled in cash or the assets to be delivered under the contract are readily convertible into cash.

The firm enters into derivative transactions, to facilitate client transactions, to take proprietary positions and as a means of risk management. Risk exposures are managed through diversification, by controlling position sizes and by entering into offsetting positions. For example, the firm may manage the risk related to a portfolio of common stock by entering into an offsetting position in a related equity-index futures contract.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The firm applies hedge accounting under SFAS No. 133 to certain derivative contracts. The firm uses these derivatives to manage certain interest rate and currency exposures, including the firm's net investment in non-U.S. operations. The firm designates certain interest rate swap contracts as fair value hedges. These interest rate swap contracts hedge changes in the relevant benchmark interest rate (e.g., London Interbank Offered Rate (LIBOR)), effectively converting a substantial portion of the firm's unsecured long-term and certain unsecured short-term borrowings into floating rate obligations. In addition, the firm applies cash flow hedge accounting to a limited number of foreign currency forward contracts that hedge currency exposure on certain forecasted transactions in its consolidated power generation facilities. See Note 2 for information regarding the firm's policy on foreign currency forward contracts used to hedge its net investment in non-U.S. operations.

The firm applies a long-haul method to substantially all of its hedge accounting relationships to perform an ongoing assessment of the effectiveness of these relationships in achieving offsetting changes in fair value or offsetting cash flows attributable to the risk being hedged. The firm utilizes a dollar-offset method, which compares the change in the fair value of the hedging instrument to the change in the fair value of the hedged item, excluding the effect of the passage of time, to prospectively and retrospectively assess hedge effectiveness. The firm's prospective dollar-offset assessment utilizes scenario analyses to test hedge effectiveness via simulations of numerous parallel and slope shifts of the relevant yield curve. Parallel shifts change the interest rate of all maturities by identical amounts. Slope shifts change the curvature of the yield curve. For both the prospective assessment, in response to each of the simulated yield curve shifts, and the retrospective assessment, a hedging relationship is deemed to be effective if the fair values of the hedging instrument and the hedged item change inversely within a range of 80% to 125%.

For fair value hedges, gains or losses on derivative transactions are recognized in Interest expense in the consolidated statements of earnings. The change in fair value of the hedged item attributable to the risk being hedged is reported as an adjustment to its carrying value and is subsequently amortized into interest expense over its remaining life. For cash flow hedges, the effective portion of gains or losses on derivative transactions is reported as a component of Other comprehensive income. Gains or losses related to hedge ineffectiveness for all hedges are generally included in Interest expense. These gains or losses and the component of gains or losses on derivative transactions excluded from the assessment of hedge effectiveness (e.g., the effect of the passage of time on fair value hedges of the firm's borrowings) were not material to the firm's results of operations for the years ended November 2006, November 2005 and November 2004. Gains and losses on derivatives used for trading purposes are included in Trading and principal investments in the consolidated statements of earnings.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Fair values of the firm's derivative contracts are reflected net of cash paid or received pursuant to credit support agreements and are reported on a net-by-counterparty basis in the firm's consolidated statements of financial condition when management believes a legal right of setoff exists under an enforceable netting agreement. The fair value of derivative financial instruments, computed in accordance with the firm's netting policy, is set forth below:

As of November

	2006		2005	
	Assets	Liabilities	Assets	Liabilities
	(in millions)			
Forward settlement contracts	\$11,751	\$14,335	\$13,921	\$15,345
Swap agreements	28,012	22,471	25,865	22,001
Option contracts	27,780	28,690	18,746	20,483
Total	\$67,543	\$65,496	\$58,532	\$57,829

The fair values of derivatives accounted for as qualifying hedges under SFAS No. 133 consisted of \$2.66 billion and \$2.10 billion in assets as of November 2006 and November 2005, respectively, and \$551 million and \$443 million in liabilities as of November 2006 and November 2005, respectively.

The firm also has embedded derivatives that have been bifurcated from related borrowings under SFAS No. 133. Such derivatives, which are classified in unsecured short-term and unsecured long-term borrowings, had a carrying value of \$1.13 billion and \$607 million (excluding the debt host contract) as of November 2006 and November 2005, respectively. See Notes 4 and 5 for further information regarding the firm's unsecured borrowings.

Securitization Activities

The firm securitizes commercial and residential mortgages, home equity and auto loans, government and corporate bonds and other types of financial assets. The firm acts as underwriter of the beneficial interests that are sold to investors. The firm derecognizes financial assets transferred in securitizations provided it has relinquished control over such assets. Transferred assets are accounted for at fair value prior to securitization. Net revenues related to these underwriting activities are recognized in connection with the sales of the underlying beneficial interests to investors.

The firm may retain interests in securitized financial assets, primarily in the form of senior or subordinated securities, including residual interests. Retained interests are accounted for at fair value and are included in Total financial instruments owned, at fair value in the consolidated statements of financial condition.

During the years ended November 2006 and November 2005, the firm securitized \$103.92 billion and \$92.00 billion, respectively, of financial assets, including \$67.73 billion and \$65.18 billion, respectively, of residential mortgage loans and securities. Cash flows received on retained interests were approximately \$801 million and \$908 million for the years ended November 2006 and November 2005, respectively.

As of November 2006 and November 2005, the firm held \$7.08 billion and \$6.07 billion of retained interests, respectively, including \$5.18 billion and \$5.62 billion, respectively, held in QSPEs.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth the weighted average key economic assumptions used in measuring the fair values of the firm's retained interests and the sensitivity of those fair values to immediate adverse changes of 10% and 20% in those assumptions ⁽¹⁾:

	As of November 2006			As of November 2005		
	Type of Retained Interests			Type of Retained Interests		
	Mortgage-Backed	CDOs	Corporate Debt ⁽⁴⁾	Mortgage-Backed	CDOs	Corporate Debt ⁽⁴⁾
	(\$ in millions)					
Fair value of retained interests	\$4,013	\$1,973	\$1,097	\$4,190	\$ 592	\$1,283
Weighted average life (years)	6.0	7.0	2.2	6.0	5.3	2.2
Constant prepayment rate	21.2%	24.5%	N/A	19.1%	21.1%	N/A
Impact of 10% adverse change	\$ (121)	\$ (2)	\$	\$ (66)	\$ (1)	\$
Impact of 20% adverse change	(221)	(6)		(121)	(1)	
Anticipated credit losses ⁽²⁾	2.0%	2.0%	N/A	2.5%	2.5%	N/A
Impact of 10% adverse change ⁽³⁾	\$ (81)	\$ (3)	\$	\$ (36)	\$ (4)	\$
Impact of 20% adverse change ⁽³⁾	(155)	(4)		(64)	(8)	
Discount rate	9.4%	6.9%	2.4%	7.4%	4.8%	3.7%
Impact of 10% adverse change	\$ (136)	\$ (35)	\$ (9)	\$ (114)	\$ (8)	\$ (10)
Impact of 20% adverse change	(266)	(70)	(17)	(221)	(14)	(21)

⁽¹⁾ Beginning in the fourth quarter of 2006, all retained interests have been included in the sensitivity analysis. Previously, the analysis only included retained interests not valued using quoted market prices in active markets. Also, the firm changed its methodology for quantifying the sensitivity to changes in assumptions to consider negative impacts on a bond-by-bond basis rather than at the overall portfolio level and for applying anticipated credit losses. The prior year amounts have been adjusted to conform to the current presentation.

⁽²⁾ Anticipated credit losses are computed only on positions in which expected credit loss is a key assumption in the determination of fair values.

⁽³⁾

The impacts of adverse change take into account credit mitigants incorporated in the retained interests, including over-collateralization and subordination provisions.

(4) Includes retained interests in bonds and other types of financial assets that are not subject to prepayment risk.

The preceding table does not give effect to the offsetting benefit of other financial instruments that are held to mitigate risks inherent in these retained interests. Changes in fair value based on an adverse variation in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value is not usually linear. In addition, the impact of a change in a particular assumption is calculated independently of changes in any other assumption. In practice, simultaneous changes in assumptions might magnify or counteract the sensitivities disclosed above.

In addition to the retained interests described above, the firm also held interests in residential mortgage QSPEs purchased in connection with secondary market-making activities. These purchased interests approximated \$8 billion and \$5 billion as of November 2006 and November 2005, respectively.

**THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Variable Interest Entities (VIEs)

The firm, in the ordinary course of business, retains interests in VIEs in connection with its securitization activities. The firm also purchases and sells variable interests in VIEs, which primarily issue mortgage-backed and other asset-backed securities and collateralized debt obligations (CDOs), in connection with its market-making activities and makes investments in and loans to VIEs that hold performing and nonperforming debt, equity, real estate, power-related and other assets. In addition, the firm utilizes VIEs to provide investors with principal-protected notes, credit-linked notes and asset-repackaged notes designed to meet their objectives.

VIEs generally purchase assets by issuing debt and equity instruments. In certain instances, the firm provides guarantees to VIEs or holders of variable interests in VIEs. In such cases, the maximum exposure to loss included in the tables set forth below is the notional amount of such guarantees. Such amounts do not represent anticipated losses in connection with these guarantees.

The firm's variable interests in VIEs include senior and subordinated debt; loan commitments; limited and general partnership interests; preferred and common stock; interest rate, foreign currency, equity, commodity and credit derivatives; guarantees; and residual interests in mortgage-backed and asset-backed securitization vehicles and CDOs. The firm's exposure to the obligations of VIEs is generally limited to its interests in these entities.

The following tables set forth total assets in nonconsolidated VIEs in which the firm holds significant variable interests and the firm's maximum exposure to loss associated with these interests. The firm has aggregated nonconsolidated VIEs based on principal business activity, as reflected in the first column. The nature of the firm's variable interests can take different forms, as described in the columns under maximum exposure to loss.

As of November 2006

VIE Assets	Purchased and Retained Interests	Commitments and Guarantees	Derivatives ⁽¹⁾	Loans and Investments	Total
------------	----------------------------------	----------------------------	----------------------------	-----------------------	-------

(in millions)

As of November 2005

VIE Assets	Purchased and Retained Interests	Commitments and Guarantees	Derivatives ⁽¹⁾	Loans and Investments	Total
------------	----------------------------------	----------------------------	----------------------------	-----------------------	-------

(in millions)

191

Municipal bond securitizations						
Mortgage-backed and other asset-backed	4,545	208		52		260
Power-related	6,667	2	95		1,070	1,167
Principal-protected notes	1,387			1,312		1,312
Asset repackagings and credit-linked notes	1,181			215		215
Total	\$54,140	\$ 990	\$ 354	\$ 6,115	\$2,578	\$10,037

- (1) Derivatives related to CDOs consist of total return swaps on investment-grade securities issued by VIEs and out-of-the-money written put options on investment-grade collateral held by VIEs. Derivatives related to principal-protected notes consist of out-of-the-money written put options that provide principal protection to clients invested in various fund products, with risk to the firm mitigated through portfolio rebalancing. Derivatives related to asset repackagings and credit-linked notes consist of interest rate swaps, equity swaps, commodity swaps and purchased credit default protection, through which the firm creates structured notes designed for specific needs of investors. The derivative transactions included in the above table do not expose the firm to a majority of the VIE's expected losses or expected residual returns and, consequently, the firm is not the primary beneficiary of the VIE. In certain cases, the firm is the primary beneficiary in these types of transactions (see table of consolidated VIEs below).
- (2) The firm obtains interests in these VIEs in connection with making proprietary investments in real estate, distressed loans and other types of debt, mezzanine instruments and equities. The transactions included in the above table do not expose the firm to a majority of the VIE's expected losses or expected residual returns and, consequently, the firm is not the primary beneficiary of the VIE. In certain cases, the firm is the primary beneficiary in these types of transactions (see table of consolidated VIEs below).

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth the firm's total assets and maximum exposure to loss associated with its significant variable interests in consolidated VIEs where the firm does not hold a majority voting interest. The firm has aggregated consolidated VIEs based on principal business activity, as reflected in the first column.

	As of November 2006		As of November 2005	
	VIE Assets ⁽¹⁾	Maximum Exposure to Loss	VIE Assets ⁽¹⁾	Maximum Exposure to Loss
	(in millions)			
Real estate, credit-related and other investing	\$3,077	\$1,368	\$2,999	\$1,268
Municipal bond securitizations	2,715	2,715	1,587	1,587

Asset repackagings and credit-linked notes	388	36	372	4
Total	\$9,044	\$5,253	\$6,624	\$3,944

⁽¹⁾ Consolidated VIE assets include assets financed on a nonrecourse basis.

Collateralized Transactions

The firm receives financial instruments as collateral, primarily in connection with resale agreements, securities borrowed, derivative transactions and customer margin loans. Such financial instruments may include obligations of the U.S. government, federal agencies, sovereigns and corporations, as well as equities and convertibles.

In many cases, the firm is permitted to deliver or repledge these financial instruments in connection with entering into repurchase agreements, securities lending agreements and other secured financings, collateralizing derivative transactions and meeting firm or customer settlement requirements. As of November 2006 and November 2005, the fair value of financial instruments received as collateral by the firm that it was permitted to deliver or repledge was \$746.08 billion and \$629.94 billion, respectively, of which the firm delivered or repledged \$639.87 billion and \$550.76 billion, respectively.

The firm also pledges assets that it owns to counterparties who may or may not have the right to deliver or repledge them. Financial instruments owned and pledged to counterparties that have the right to deliver or repledge are reported as Financial instruments owned and pledged as collateral, at fair value in the consolidated statements of financial condition and were \$36.00 billion and \$38.98 billion as of November 2006 and November 2005, respectively. Financial instruments owned and pledged in connection with repurchase agreements, securities lending agreements and other secured financings to counterparties that did not have the right to sell or repledge are included in

Financial instruments owned, at fair value in the consolidated statements of financial condition and were \$134.31 billion and \$116.27 billion as of November 2006 and November 2005, respectively. Other assets (primarily real estate, power generation facilities and related assets, and

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

cash) owned and pledged in connection with other secured financings to counterparties that did not have the right to sell or repledge were \$5.34 billion and \$5.04 billion as of November 2006 and November 2005, respectively.

In addition to repurchase agreements and securities lending agreements, the firm obtains secured funding through the use of other arrangements. Other secured financings include arrangements that are nonrecourse, that is, only the subsidiary that executed the arrangement or a subsidiary guaranteeing the arrangement is obligated to repay the financing. Other secured financings consist of liabilities related to the firm's William Street program, consolidated variable interest entities, collateralized central bank financings, transfers of financial assets that are accounted for as financings rather than sales (primarily pledged bank loans and mortgage whole loans), consolidated power generation facilities and other structured financing arrangements.

Other secured financings are set forth in the table below:

	As of November	
	2006	2005
	(in millions)	
Other secured financings (short-term) ⁽¹⁾⁽²⁾⁽³⁾	\$24,290	\$ 7,972
Other secured financings (long-term):		
2007		2,159
2008	5,535	702
2009	877	3,420
2010	1,894	3,352
2011	5,105	812
2012-thereafter	12,723	5,224
Total other secured financings (long-term) ⁽⁴⁾⁽⁵⁾	26,134	15,669
Total other secured financings ⁽⁶⁾⁽⁷⁾	\$50,424	\$23,641

(1) As of November 2006, consists of U.S. dollar-denominated financings of \$14.28 billion with a weighted average interest rate of 5.22% and non-U.S. dollar-denominated financings of \$10.01 billion with a weighted average interest rate of 2.00%. As of November 2005, consists of U.S. dollar-denominated financings of \$5.01 billion with a weighted average interest rate of 4.16% and non-U.S. dollar-denominated financings of \$2.96 billion with a weighted average interest rate of 3.25%.

(2) Includes \$3.30 billion of hybrid financial instruments accounted for at fair value under SFAS No. 155 as of November 2006.

(3) Includes other secured financings maturing within one year of the financial statement date and other secured financings that are redeemable within one year of the financial statement date at the option of the holder.

(4) As of November 2006, consists of U.S. dollar-denominated financings of \$16.97 billion with a weighted average interest rate of 5.61% and non-U.S. dollar-denominated financings of \$9.16 billion with a weighted average interest rate of 3.81%. As of November 2005, consists of U.S. dollar-denominated financings of \$9.65 billion with a weighted average interest rate of 4.65% and non-U.S. dollar-denominated financings of

\$6.02 billion with a weighted average interest rate of 3.08%.

- (5) Secured long-term financings that are repayable prior to maturity at the option of the firm are reflected at their contractual maturity dates. Secured long-term financings that are redeemable prior to maturity at the option of the holder are reflected at the dates such options become exercisable.
- (6) Includes \$19.79 billion and \$14.29 billion of nonrecourse financings as of November 2006 and November 2005, respectively.
- (7) As of November 2006, \$47.22 billion of these financings were collateralized by financial instruments and \$3.20 billion by other assets (primarily real estate, power generation facilities and related assets, and cash). As of November 2005, \$20.51 billion of these financings were collateralized by financial instruments and \$3.13 billion by other assets.

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 4. Unsecured Short-Term Borrowings

The firm obtains unsecured short-term borrowings primarily through the issuance of promissory notes, commercial paper and hybrid debt instruments. As of November 2006 and November 2005, these borrowings were \$47.90 billion and \$47.25 billion, respectively. Such amounts include the portion of unsecured long-term borrowings maturing within one year of the financial statement date and unsecured long-term borrowings that are redeemable within one year of the financial statement date at the option of the holder. The carrying value of these short-term obligations approximates fair value due to their short-term nature.

Unsecured short-term borrowings are set forth below:

	As of November	
	2006	2005
	(in millions)	
Promissory notes	\$13,811	\$17,339
Commercial paper	1,489	5,154
Current portion of unsecured long-term borrowings	14,115	15,819
Hybrid debt instruments ⁽¹⁾	14,060	3,901
Other short-term borrowings	4,429	5,034
Total ⁽²⁾	\$47,904	\$47,247

⁽¹⁾ Hybrid debt instruments are financial instruments that contain bifurcable embedded derivatives, \$10.22 billion of which were accounted for at fair value under SFAS No. 155 as of November 2006.

⁽²⁾ The weighted average interest rates for these borrowings were 5.13% and 4.01% as of November 2006 and November 2005, respectively. The weighted average interest rates, after giving effect to hedging activities, were 5.16% and 3.99% as of November 2006 and November 2005, respectively. The weighted average interest rates as of November 2006 excluded hybrid debt instruments accounted for at fair value under SFAS No. 155.

Note 5. Unsecured Long-Term Borrowings

The firm obtains unsecured long-term borrowings that consist principally of senior borrowings with maturities extending to 2036. As of November 2006 and November 2005, these borrowings were \$122.84 billion and \$84.34 billion, respectively.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unsecured long-term borrowings are set forth below:

	As of November	
	2006	2005
	(in millions)	
Fixed rate obligations ⁽¹⁾		
U.S. dollar	\$ 41,719	\$34,792
Non-U.S. dollar	22,854	16,079
Floating rate obligations ⁽²⁾		
U.S. dollar	38,342	23,041
Non-U.S. dollar	19,927	10,426
Total ⁽³⁾	\$122,842	\$84,338

⁽¹⁾ As of both November 2006 and November 2005, interest rates on U.S. dollar fixed rate obligations ranged from 3.88% to 12.00%. As of November 2006 and November 2005, interest rates on non-U.S. dollar fixed rate obligations ranged from 0.31% to 8.88% and from 0.67% to 8.88%, respectively.

⁽²⁾ Floating interest rates generally are based on LIBOR or the federal funds rate. Certain equity-linked and indexed instruments are included in floating rate obligations.

⁽³⁾ Includes \$7.25 billion of hybrid financial instruments accounted for at fair value under SFAS No. 155 as of November 2006.

Unsecured long-term borrowings by maturity date are set forth below:

	As of November					
	2006 ⁽¹⁾⁽²⁾			2005 ⁽¹⁾⁽²⁾		
	U.S. Dollar	Non-U.S. Dollar	Total	U.S. Dollar	Non-U.S. Dollar	Total
	(in millions)					
2007	\$	\$	\$	\$11,597	\$ 766	\$12,363
2008	14,848	3,038	17,886	5,662	2,725	8,387
2009	12,398	2,978	15,376	6,123	2,793	8,916
2010	5,034	4,945	9,979	5,163	5,595	10,758
2011	5,675	4,389	10,064	4,434	1,024	5,458
2012-thereafter	42,106	27,431	69,537	24,854	13,602	38,456
Total	\$80,061	\$42,781	\$122,842	\$57,833	\$26,505	\$84,338

- (1) Unsecured long-term borrowings maturing within one year of the financial statement date and certain unsecured long-term borrowings that are redeemable within one year of the financial statement date at the option of the holder are included as unsecured short-term borrowings in the consolidated statements of financial condition.
- (2) Unsecured long-term borrowings that are repayable prior to maturity at the option of the firm are reflected at their contractual maturity dates. Unsecured long-term borrowings that are redeemable prior to maturity at the option of the holder are reflected at the dates such options become exercisable.

The firm enters into derivative contracts, such as interest rate futures contracts, interest rate swap agreements, currency swap agreements, and equity-linked and indexed contracts, to effectively convert a substantial portion of its unsecured long-term borrowings into U.S. dollar-based floating rate obligations. Accordingly, the carrying value of unsecured long-term borrowings approximated fair value as of November 2006 and November 2005.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The effective weighted average interest rates for unsecured long-term borrowings are set forth below:

As of November				
	2006		2005	
	Amount	Rate	Amount	Rate
	(\$ in millions)			
Fixed rate obligations	\$ 1,997	6.13%	\$ 2,289	6.05%
Floating rate obligations ⁽¹⁾	120,845	5.75	82,049	4.42
Total	\$122,842	5.75	\$84,338	4.46

⁽¹⁾ Includes fixed rate obligations that have been converted into floating rate obligations through derivative contracts.

Subordinated Borrowings

Unsecured long-term borrowings include \$7.51 billion and \$2.99 billion of subordinated borrowings as of November 2006 and November 2005, respectively, as set forth below.

Subordinated Notes. As of November 2006, the firm had \$4.67 billion of subordinated notes outstanding with maturities ranging from 2007 to 2036. The effective weighted average interest rate on these subordinated notes was 6.24%, after giving effect to derivative contracts used to convert fixed rate obligations into floating rate obligations. As of November 2005, the firm had \$150 million of subordinated notes outstanding with maturities ranging from 2006 to 2019 and with an effective weighted average interest rate of 6.39%. These notes are junior in right of payment to all of the firm's senior indebtedness.

Junior Subordinated Debentures. The firm issued \$2.84 billion of junior subordinated debentures in its first quarter of 2004 to Goldman Sachs Capital Trust I (the Trust), a Delaware statutory trust created for the exclusive purposes of (i) issuing \$2.75 billion of guaranteed preferred beneficial interests and \$85 million of common beneficial interests in the Trust, (ii) investing the proceeds from the sale to purchase junior subordinated debentures issued by the firm and (iii) engaging in only those other activities necessary or incidental to these purposes. The preferred beneficial interests were purchased by third parties, and, as of November 2006 and November 2005, the firm held all the common beneficial interests. The Trust is a wholly owned finance subsidiary of the firm for regulatory and legal purposes but is not consolidated for accounting purposes.

The firm pays interest semiannually on these debentures at an annual rate of 6.345% and the debentures mature on February 15, 2034. The coupon rate and the payment dates applicable to the beneficial interests are the same as the interest rate and payment dates applicable to the debentures. The firm has the right, from time to time, to defer payment of interest on the debentures, and, therefore, cause payment on the Trust's preferred beneficial interests to be deferred, in each case up to ten consecutive semiannual periods. During any such extension period, the firm will not be permitted to, among other things, pay dividends on or make certain repurchases of its common stock. The Trust is not permitted to pay any distributions on the common beneficial interests held by the firm unless all dividends payable on the preferred beneficial interests have been paid in full. These notes are junior in right of payment to all of the firm's senior indebtedness and all of the firm's subordinated notes (described above). See Note 6 for information regarding the firm's guarantee of the preferred beneficial interests issued by the Trust.

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 6. Commitments, Contingencies and Guarantees*Commitments*

Forward Starting Collateralized Agreements and Financings. The firm had forward starting resale agreements and securities borrowing agreements of \$18.29 billion and \$20.83 billion as of November 2006 and November 2005, respectively. The firm had forward starting repurchase agreements and securities lending agreements of \$17.15 billion and \$29.10 billion as of November 2006 and November 2005, respectively.

Commitments to Extend Credit. In connection with its lending activities, the firm had outstanding commitments to extend credit of \$100.48 billion and \$61.12 billion as of November 2006 and November 2005, respectively. The firm's commitments to extend credit are agreements to lend to counterparties that have fixed termination dates and are contingent on the satisfaction of all conditions to borrowing set forth in the contract. Since these commitments may expire unused or be reduced or cancelled at the counterparty's request, the total commitment amount does not necessarily reflect the actual future cash flow requirements. The firm accounts for these commitments at fair value.

The following table summarizes the firm's commitments to extend credit at November 2006 and November 2005:

Commitments to Extend Credit

	Year Ended November	
	2006	2005
	(in millions)	
William Street program	\$ 18,831	\$14,505
Other commercial lending commitments		
Investment-grade	7,604	17,592
Non-investment-grade	57,017	18,536
Warehouse financing	17,026	10,489
Total commitments to extend credit	\$100,478	\$61,122

William Street program. Substantially all of the commitments provided under the William Street credit extension program are to investment-grade corporate borrowers. Commitments under the program are primarily extended by William Street Commitment Corporation (Commitment Corp.), a consolidated wholly owned subsidiary of Group Inc. whose assets and liabilities are legally separated from other assets and liabilities of the firm, and, to a lesser extent, by William Street Credit Corporation, another consolidated wholly owned subsidiary of Group Inc. A majority of the commitments extended by Commitment Corp. are supported by funding raised by William Street Funding Corporation (Funding Corp.), another consolidated wholly owned subsidiary of Group Inc. whose assets and liabilities are also legally separated from other assets and liabilities of the firm. The assets of Commitment Corp. and of Funding Corp. will not be available to their respective shareholders until the claims of their respective creditors have been paid. In addition, no affiliate of either Commitment Corp. or Funding Corp., except in limited cases as expressly agreed in writing, is responsible for any obligation of either entity. With respect to substantially all of the William Street commitments, SMFG provides the firm with credit loss protection that is generally limited to 95% of the first loss the firm realizes on approved loan commitments, up to a maximum of \$1.00 billion. In addition, subject to the satisfaction of certain conditions, upon the firm's request, SMFG will provide protection for 70% of the second loss on such

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

commitments, up to a maximum of \$1.13 billion. The firm also uses other financial instruments to mitigate credit risks related to certain William Street commitments not covered by SMFG.

Other commercial lending commitments. In addition to the commitments issued under the William Street credit extension program, the firm extends other credit commitments, primarily in connection with contingent acquisition financing and other types of corporate lending. The total commitment amount does not necessarily reflect the actual future cash flow requirements, as the firm often syndicates all or substantial portions of these commitments, the commitments may expire unused, or the commitments may be cancelled or reduced at the request of the counterparty. In addition, commitments that are extended for contingent acquisition financing are often short-term in nature, as borrowers often replace them with other funding sources.

Warehouse financing. The firm provides financing for the warehousing of financial assets to be securitized, primarily in connection with CDOs and mortgage securitizations. These financings are expected to be repaid from the proceeds of the related securitizations for which the firm may or may not act as underwriter. These arrangements are secured by the warehoused assets, primarily consisting of mortgage-backed and other asset-backed securities, residential and commercial mortgages and corporate debt instruments.

Letters of Credit. The firm provides letters of credit issued by various banks to counterparties in lieu of securities or cash to satisfy various collateral and margin deposit requirements. Letters of credit outstanding were \$5.73 billion and \$9.23 billion as of November 2006 and November 2005, respectively.

Merchant Banking Commitments. The firm acts as an investor in merchant banking transactions, which includes making long-term investments in equity and debt instruments in privately negotiated transactions, corporate acquisitions and real estate transactions. In connection with these activities, the firm had commitments to invest up to \$6.36 billion and \$3.54 billion in corporate and real estate investment funds as of November 2006 and November 2005, respectively.

Construction-Related Commitments. As of November 2006 and November 2005, the firm had construction-related commitments of \$1.63 billion and \$579 million, respectively, including commitments of \$1.07 billion and \$481 million, respectively, related to the development of wind energy projects. Construction-related commitments also include outstanding commitments of \$500 million and \$47 million as of November 2006 and November 2005, respectively, related to the firm's new world headquarters in New York City, which is expected to cost between \$2.3 billion and \$2.5 billion.

Underwriting Commitments. As of November 2006, the firm had commitments to purchase \$2.62 billion of securities in connection with its underwriting activities. As of November 2005, the firm had no such commitments.

Other. The firm had other purchase commitments of \$393 million and \$563 million as of November 2006 and November 2005, respectively. In addition, the firm had other investment commitments of \$1.88 billion and \$81 million as of November 2006 and November 2005, respectively.

Leases. The firm has contractual obligations under long-term noncancelable lease agreements, principally for office space, expiring on various dates through 2069. Certain agreements are subject to periodic escalation provisions for increases in real estate taxes and other charges.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Future minimum rental payments, net of minimum sublease rentals, and rent charged to operating expense for the last three years are set forth below:

	(in millions)
Minimum rental payments	
2007	\$ 564
2008	387
2009	371
2010	285
2011	250
2012-thereafter	2,195
Total	\$4,052

Net rent expense	
2004	\$ 356
2005	359
2006	404

Contingencies

The firm is involved in a number of judicial, regulatory and arbitration proceedings concerning matters arising in connection with the conduct of its businesses. Management believes, based on currently available information, that the results of such proceedings, in the aggregate, will not have a material adverse effect on the firm's financial condition, but may be material to the firm's operating results for any particular period, depending, in part, upon the operating results for such period. Given the inherent difficulty of predicting the outcome of the firm's litigation and regulatory matters, particularly in cases or proceedings in which substantial or indeterminate damages or fines are sought, the firm cannot estimate losses or ranges of losses for cases or proceedings where there is only a reasonable possibility that a loss may be incurred.

In connection with its insurance business, the firm is contingently liable to provide guaranteed minimum death benefits to certain contract holders. The total account balances of contract holders to whom the firm has provided such guaranteed minimum death benefits was \$8.04 billion as of November 2006, and the weighted average attained age of these contract holders was 70 years. The net amount at risk, representing guaranteed minimum death benefits in excess of contract holder account balances, was \$1.27 billion as of November 2006. The firm has established a reserve for its liability related to guaranteed minimum death benefits (see Note 10 for more information on the firm's insurance liabilities).

Guarantees

The firm enters into various derivative contracts that meet the definition of a guarantee under FIN No. 45, Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. Such derivative contracts include credit default and total return swaps, written equity and commodity put options, written currency contracts and interest rate caps, floors and swaptions. FIN No. 45 does not require disclosures about derivative contracts if such contracts may be cash settled and the firm has no basis to conclude it is probable that the counterparties held, at inception, the underlying instruments related to the derivative contracts. The firm has concluded that these conditions have been met for certain large, internationally active commercial and investment bank end users and certain other users. Accordingly, the firm has not included such contracts in the tables below.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The firm, in its capacity as an agency lender, indemnifies most of its securities lending customers against losses incurred in the event that borrowers do not return securities and the collateral held is insufficient to cover the market value of the securities borrowed.

In connection with the firm's establishment of the Trust, Group Inc. effectively provided for the full and unconditional guarantee of the beneficial interests in the Trust held by third parties. Timely payment by Group Inc. of interest on the junior subordinated debentures and other amounts due and performance of its other obligations under the transaction documents will be sufficient to cover payments due by the Trust on its beneficial interests. As a result, management believes that it is unlikely the firm will have to make payments related to the Trust other than those required under the junior subordinated debentures and in connection with certain expenses incurred by the Trust.

In the ordinary course of business, the firm provides other financial guarantees of the obligations of third parties (e.g., standby letters of credit and other guarantees to enable clients to complete transactions and merchant banking fund-related guarantees). These guarantees represent obligations to make payments to beneficiaries if the guaranteed party fails to fulfill its obligation under a contractual arrangement with that beneficiary.

The following tables set forth certain information about the firm's derivative contracts that meet the definition of a guarantee and certain other guarantees as of November 2006 and November 2005:

As of November 2006

Maximum Payout/Notional Amount by Period of Expiration ⁽⁵⁾

	2007	2008- 2009	2010- 2011	2012- Thereafter	Total
	(in millions)				
Derivatives ⁽¹⁾	\$379,256	\$428,258	\$460,088	\$399,449	\$1,667,051
Securities lending indemnifications ⁽²⁾	19,023				19,023
Guarantees of trust preferred beneficial interest ⁽³⁾	174	349	349	6,676	7,548
Other financial guarantees ⁽⁴⁾	592	99	76	86	853

As of November 2005

Maximum Payout/Notional Amount by Period of Expiration ⁽⁵⁾

	2006	2007- 2008	2009- 2010	2011- Thereafter	Total
	(in millions)				
Derivatives ⁽¹⁾	\$356,131	\$244,163	\$259,332	\$289,459	\$1,149,085
Securities lending indemnifications ⁽²⁾	16,324				16,324

Guarantees of trust preferred beneficial interest ⁽³⁾	174	349	349	6,851	7,723
Other financial guarantees ⁽⁴⁾	516	144	230	177	1,067

- (1) The aggregate carrying value of these derivatives as of November 2006 was an asset of \$1.12 billion, consisting of contracts with an asset value of \$11.06 billion and contracts with a liability value of \$9.94 billion. The aggregate carrying value as of November 2005 was a liability of \$8.22 billion, consisting of contracts with an asset value of \$1.91 billion and contracts with a liability value of \$10.13 billion. The carrying value excludes the effect of a legal right of setoff that may exist under an enforceable netting agreement.
- (2) Collateral held by the lenders in connection with securities lending indemnifications was \$19.70 billion and \$16.89 billion as of November 2006 and November 2005, respectively.
- (3) Includes the guarantee of all payments scheduled to be made over the life of the Trust, which could be shortened in the event the firm redeems the junior subordinated debentures issued to fund the Trust. See Note 5 for further information regarding the Trust.
- (4) The carrying value of these guarantees was a liability of \$15 million and \$4 million as of November 2006 and November 2005, respectively.
- (5) Such amounts do not represent the anticipated losses in connection with these contracts.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In the ordinary course of business, the firm indemnifies and guarantees certain service providers, such as clearing and custody agents, trustees and administrators, against specified potential losses in connection with their acting as an agent of, or providing services to, the firm or its affiliates. The firm also indemnifies some clients against potential losses incurred in the event specified third-party service providers, including sub-custodians and third-party brokers, improperly execute transactions. In addition, the firm is a member of payment, clearing and settlement networks as well as securities exchanges around the world that may require the firm to meet the obligations of such networks and exchanges in the event of member defaults. In connection with its prime brokerage and clearing businesses, the firm agrees to clear and settle on behalf of its clients the transactions entered into by them with other brokerage firms. The firm's obligations in respect of such transactions are secured by the assets in the client's account as well as any proceeds received from the transactions cleared and settled by the firm on behalf of the client. In connection with joint venture investments, the firm may issue loan guarantees under which it may be liable in the event of fraud, misappropriation, environmental liabilities and certain other matters involving the borrower. The firm is unable to develop an estimate of the maximum payout under these guarantees and indemnifications. However, management believes that it is unlikely the firm will have to make any material payments under these arrangements, and no liabilities related to these guarantees and indemnifications have been recognized in the consolidated statements of financial condition as of November 2006 and November 2005.

The firm provides representations and warranties to counterparties in connection with a variety of commercial transactions and occasionally indemnifies them against potential losses caused by the breach of those representations and warranties. The firm may also provide indemnifications protecting against changes in or adverse application of certain U.S. tax laws in connection with ordinary-course transactions such as securities issuances, borrowings or derivatives. In addition, the firm may provide indemnifications to some counterparties to protect them in the event additional taxes are owed or payments are withheld, due either to a change in or an adverse application of certain non-U.S. tax laws. These indemnifications generally are standard contractual terms and are entered into in the ordinary course of business. Generally, there are no stated or notional amounts included in these indemnifications, and the contingencies triggering the obligation to indemnify are not expected to occur. The firm is unable to develop an estimate of the maximum payout under these guarantees and indemnifications. However, management believes that it is unlikely the firm will have to make any material payments under these arrangements, and no liabilities related to these arrangements have been recognized in the consolidated statements of financial condition as of November 2006 and November 2005.

Note 7. Shareholders' Equity

Dividends declared per common share were \$1.30 in 2006, \$1.00 in 2005, and \$1.00 in 2004. On December 11, 2006, the Board of Directors of Group Inc. (the Board) declared a dividend of \$0.35 per common share to be paid on February 22, 2007, to common shareholders of record on January 23, 2007.

During 2006, the firm repurchased 50.2 million shares of its common stock at a total cost of \$7.82 billion, and during 2005, the firm repurchased 63.7 million shares of its common stock at a total cost of \$7.11 billion. The average price paid per share for repurchased shares was \$155.64 and \$111.57 for the years ended November 2006 and November 2005, respectively. In addition, to satisfy minimum statutory employee tax withholding requirements related to the delivery of common stock underlying restricted stock units, the firm cancelled 3.0 million restricted stock units with a total value of \$375 million in 2006, and it canceled 1.6 million restricted stock units with a total value of \$163 million in 2005.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During 2006, the firm issued 54,000 shares of perpetual Floating Rate Non-Cumulative Preferred Stock, Series D. As of November 2006, the firm had 124,000 shares of perpetual non-cumulative preferred stock outstanding in four series as set forth in the following table:

Preferred Stock by Series

Series	Shares Issued	Shares Authorized	Dividend Rate	Earliest Redemption Date	Redemption Value (in millions)
A	30,000	50,000	3 month LIBOR + 0.75%, with floor of 3.75% per annum	April 25, 2010	\$ 750
B	32,000	50,000	6.20% per annum	October 31, 2010	800
C	8,000	25,000	3 month LIBOR + 0.75%, with floor of 4% per annum	October 31, 2010	200
D	54,000	60,000	3 month LIBOR + 0.67%, with floor of 4% per annum	May 24, 2011	1,350
	124,000	185,000			\$ 3,100

Each share of preferred stock has a par value of \$0.01, has a liquidation preference of \$25,000, is represented by 1,000 depositary shares and is redeemable at the firm's option at a redemption price equal to \$25,000 plus declared and unpaid dividends. Dividends on each series of preferred stock, if declared, are payable quarterly in arrears. The firm's ability to declare or pay dividends on, or purchase, redeem or otherwise acquire, its common stock is subject to certain restrictions in the event that the firm fails to pay or set aside full dividends on the preferred stock for the latest completed dividend period. All preferred stock also has a preference over the firm's common stock upon liquidation.

Dividends declared per preferred share were \$1,434.79, \$1,593.06, \$1,465.19 and \$709.10 for Series A, Series B, Series C and Series D preferred stock, respectively, in 2006. Dividends declared per share of Series A preferred stock were \$578.72 in 2005. On December 11, 2006, the Board declared a dividend per preferred share of \$391.28, \$387.50, \$391.28 and \$386.17 for Series A, Series B, Series C and Series D preferred stock, respectively, to be paid on February 10, 2007 to preferred shareholders of record on January 26, 2007.

The following table sets forth the firm's accumulated other comprehensive income by type:

	As of November	
	2006	2005

	(in millions)	
Currency translation adjustment, net of tax	\$ 29	\$(16)
Minimum pension liability adjustment, net of tax	(38)	(11)
Net gains/(losses) on cash flow hedges, net of tax	2	9
Net unrealized gains on available-for-sale securities, net of tax	28 ⁽¹⁾	18
Total accumulated other comprehensive income, net of tax	\$ 21	\$

⁽¹⁾ Consists of net unrealized gains of \$10 million on available-for-sale securities held by the firm's bank and insurance subsidiaries and net unrealized gains of \$18 million on available-for-sale securities held by investees accounted for under the equity method.

	Accumulated amortization	(865)	(627)
	Net carrying amount	\$2,502	\$2,055

- (1) Primarily includes the firm's clearance and execution and NASDAQ customer lists related to SLK and financial counseling customer lists related to Ayco.
- (2) Primarily relates to above-market power contracts of consolidated power generation facilities related to Cogentrix Energy, Inc. and National Energy & Gas Transmission, Inc. (NEGT). Substantially all of these power contracts have been pledged to counterparties in connection with the firm's secured financings. The weighted average remaining life of these power contracts is approximately 11 years. The increase in the carrying value of power contracts in 2006 was due to a restructuring of certain contracts, which resulted in the consolidation of the associated power generation facilities that had been previously accounted for under the equity method.
- (3) Consists of VOBA and DAC. VOBA represents the present value of estimated future gross profits of the variable annuity and variable life insurance business acquired in 2006. DAC results from commissions paid by the firm to the primary insurer (ceding company) on life and annuity reinsurance agreements as compensation to place the business with the firm and to cover the ceding company's acquisition expenses. VOBA and DAC are amortized over the estimated life of the underlying contracts based on estimated gross profits, and amortization is adjusted based on actual experience. The weighted average remaining amortization period for VOBA and DAC is seven years as of the end of 2006.
- (4) Primarily includes technology-related and other assets related to SLK.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Substantially all of the firm's identifiable intangible assets are considered to have finite lives and are amortized over their estimated useful lives. The weighted average remaining life of the firm's identifiable intangibles is approximately 12 years.

Amortization expense associated with identifiable intangible assets was \$246 million, \$165 million and \$125 million for the years ended November 2006, November 2005 and November 2004, respectively. Amortization expense associated with the firm's consolidated power generation facilities is reported within Cost of power generation in the consolidated statements of earnings.

The estimated future amortization for existing identifiable intangible assets through 2011 is set forth below:

	(in millions)
2007	\$265
2008	223
2009	210
2010	198
2011	190

Note 10. Other Assets and Other Liabilities***Other Assets***

Other assets are generally less liquid, nonfinancial assets. The following table sets forth the firm's other assets by type:

	As of November	
	2006	2005
	(in millions)	
Goodwill and identifiable intangible assets ⁽¹⁾	\$ 5,686	\$ 5,203
Property, leasehold improvements and equipment ⁽²⁾	6,990	5,097
Equity-method investments	2,764	2,965
Income tax-related assets	3,427	1,304
Miscellaneous receivables and other	3,009	2,743
Total	\$21,876	\$17,312

⁽¹⁾ See Note 9 for further information regarding the firm's goodwill and identifiable intangible assets.

⁽²⁾ Net of accumulated depreciation and amortization of \$5.06 billion and \$4.62 billion for November 2006 and November 2005, respectively.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other Liabilities

Other liabilities and accrued expenses primarily includes insurance-related liabilities, compensation and benefits, minority interest in consolidated entities, litigation and regulatory liabilities, tax-related payables, deferred revenue and other payables. The following table sets forth the firm's other liabilities and accrued expenses by type:

	As of November	
	2006	2005
	(in millions)	
Insurance-related liabilities ⁽¹⁾	\$11,471	\$
Compensation and benefits	9,165	6,598
Minority interest ⁽²⁾	4,759	3,164
Income tax-related liabilities	2,639	868
Accrued expenses and other payables	3,832	3,200
Total	\$31,866	\$13,830

⁽¹⁾ Insurance-related liabilities are set forth in the table below:

	As of November	
	2006	2005
	(in millions)	
Separate account liabilities	\$ 7,957	\$
Liabilities for future benefits and unpaid claims	2,123	
Contract holder account balances	1,134	
Reserves for guaranteed minimum death and income benefits	257	
Total insurance-related liabilities	\$11,471	\$

Separate account liabilities are offset by separate account assets, representing segregated contract holder funds under variable annuity and variable life insurance contracts. Separate account assets are included in Cash and securities segregated for regulatory and other purposes in the consolidated statements of financial condition.

Liabilities for future benefits and unpaid claims include liabilities arising from reinsurance provided by the firm to other insurers. The firm has a receivable for \$1.33 billion related to such reinsurance contracts, which is reported in Receivables from customers and counterparties in the consolidated statements of financial condition. In addition, the firm has ceded risks to reinsurers related to certain of its liabilities for future benefits and unpaid claims and has a receivable of \$786 million related to such reinsurance contracts, which is reported in Receivables from customers and counterparties in the consolidated statements of financial condition. Contracts to cede risks to reinsurers do not relieve the firm from its obligations to contract holders.

Reserves for guaranteed minimum death and income benefits represent a liability for the expected value of guaranteed benefits in excess of projected annuity account balances. These reserves are computed in accordance with AICPA Statement of Position 03-1, Accounting and Reporting by Insurance Enterprises for Certain Nontraditional Long-Duration Contracts and for Separate Accounts, and are based on total payments expected to be made less total fees expected to be assessed over the life of the contract.

⁽²⁾ Includes \$3.31 billion and \$2.04 billion related to consolidated merchant banking funds as of November 2006 and November 2005, respectively.

Note 11. Employee Benefit Plans

The firm sponsors various pension plans and certain other postretirement benefit plans, primarily healthcare and life insurance. The firm also provides certain benefits to former or inactive employees prior to retirement.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Defined Benefit Pension Plans and Postretirement Plans

Employees of certain non-U.S. subsidiaries participate in various defined benefit pension plans. These plans generally provide benefits based on years of credited service and a percentage of the employee's eligible compensation. The firm also maintains a defined benefit pension plan for substantially all U.S. employees hired prior to November 1, 2003. As of November 2004, this plan has been closed to new participants and no further benefits will be accrued to existing participants. In addition, the firm has unfunded postretirement benefit plans that provide medical and life insurance for eligible retirees and their dependents covered under these programs.

The following table provides a summary of the changes in the plans' benefit obligations and the fair value of assets for November 2006 and November 2005 and a statement of the funded status of the plans as of November 2006 and November 2005:

	As of or for the Year Ended November					
	2006			2005		
	U.S. Pension	Non-U.S. Pension	Post- retirement	U.S. Pension	Non-U.S. Pension	Post- retirement
	(in millions)					
Benefit obligation						
Balance, beginning of year	\$393	\$ 486	\$ 277	\$355	\$474	\$ 215
Service cost		58	19		44	23
Interest cost	21	25	19	19	20	13

Prepaid/(accrued) benefit cost	\$ 78	\$ (44)	\$(224)	\$ 52	\$ 57	\$(176)

The accumulated benefit obligation for all defined benefit pension plans was \$944 million and \$795 million as of November 2006 and November 2005, respectively.

For plans in which the accumulated benefit obligation exceeded plan assets, the aggregate projected benefit obligation and accumulated benefit obligation was \$771 million and \$647 million, respectively, as of November 2006, and \$135 million and \$126 million, respectively, as of November 2005. The fair value of plan assets for each of these plans was \$583 million and \$64 million as of November 2006 and November 2005, respectively.

Table of Contents

Discount rate	5.25	5.50	6.00
Rate of increase in future compensation levels	5.00	5.00	5.00

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Generally, the firm determined the discount rates for its defined benefit plans by referencing indices for long-term, high-quality bonds and ensuring that the discount rate does not exceed the yield reported for those indices after adjustment for the duration of the plans' liabilities.

The firm's approach in determining the long-term rate of return for plan assets is based upon historical financial market relationships that have existed over time with the presumption that this trend will generally remain constant in the future.

For measurement purposes, an annual growth rate in the per capita cost of covered healthcare benefits of 10.74% was assumed for the year ending November 2007. The rate was assumed to decrease ratably to 5.00% for the year ending November 2015 and remain at that level thereafter.

The assumed cost of healthcare has an effect on the amounts reported for the firm's postretirement plans. A 1% change in the assumed healthcare cost trend rate would have the following effects:

	1% Increase		1% Decrease	
	2006	2005	2006	2005
	(in millions)			
Cost	\$ 9	\$ 6	\$ (7)	\$ (5)
Obligation	79	48	(62)	(37)

The following table sets forth the composition of plan assets for the U.S. and non-U.S. defined benefit pension plans by asset category:

	As of November			
	2006		2005	
	U.S. Pension	Non-U.S. Pension	U.S. Pension	Non-U.S. Pension
Equity securities	64%	61%	64%	70%
Debt securities	22	8	21	8
Other	14	31	15	22
Total	100%	100%	100%	100%

The investment approach of the firm's U.S. and major non-U.S. defined benefit pension plans involves employing a sufficient level of flexibility to capture investment opportunities as they occur, while maintaining reasonable parameters to ensure that prudence and care are exercised in the execution of the investment programs. The plans employ a total return on investment approach, whereby a mix, which is broadly similar to the actual asset allocation as of November 2006, of equity securities, debt securities and other assets, is targeted to maximize the long-term return on assets for a given level of risk. Investment risk is measured and monitored on an ongoing basis by the firm's Retirement Committee through periodic portfolio reviews, meetings with investment managers and annual liability measurements.

The firm will contribute a minimum of \$30 million to its pension plans and \$9 million to its postretirement plans in 2007.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table sets forth benefits projected to be paid from the firm's U.S. and non-U.S. defined benefit pension and postretirement plans (net of Medicare subsidy receipts) and reflects expected future service, where appropriate:

	U.S. Pension	Non-U.S. Pension	Post- retirement
	(in millions)		
2007	\$ 7	\$ 6	\$ 9
2008	7	6	10
2009	8	6	11
2010	9	6	12
2011	10	6	13
2012-2016	67	35	83

Defined Contribution Plans

The firm contributes to employer-sponsored U.S. and non-U.S. defined contribution plans. The firm's contribution to these plans was \$230 million, \$305 million and \$189 million for the years ended November 2006, November 2005 and November 2004, respectively.

Note 12. Employee Incentive Plans

Stock Incentive Plan

The firm sponsors a stock incentive plan, The Goldman Sachs Amended and Restated Stock Incentive Plan (the Amended SIP), which provides for grants of incentive stock options, nonqualified stock options, stock appreciation rights, dividend equivalent rights, restricted stock, restricted stock units and other share-based awards. In the second quarter of 2003, the Amended SIP was approved by the firm's shareholders, effective for grants after April 1, 2003, and no further awards were or will be made under the original plan after that date, although awards granted under the original plan prior to that date remain outstanding.

The total number of shares of common stock that may be issued under the Amended SIP through 2008 may not exceed 250 million shares and, in each year thereafter, may not exceed 5% of the issued and outstanding shares of common stock, determined as of the last day of the immediately preceding year, increased by the number of shares available for awards in previous years but not covered by awards granted in such years. As of November 2006 and November 2005, 180.0 million and 196.6 million shares, respectively, were available for grant under the Amended SIP, after taking into account stock-based compensation awards that were issued subsequent to year end, as part of year-end compensation.

Other Compensation Arrangements

In November 2004, the firm adopted new deferred compensation plans for eligible employees. In general, under the plans, participants are able to defer payment of a portion of their cash year-end compensation. During the deferral period, participants are able to nominally invest their deferrals in certain alternatives available under the plans. Generally, under current tax law, participants are not subject to income tax on amounts deferred or on any notional investment earnings until the returns are distributed, and the firm is not entitled to a corresponding tax deduction until the amounts are distributed. The firm has recognized compensation expense for the amounts deferred under these plans. As of November 2006 and November 2005, \$245 million and \$134 million, respectively, related to these plans was included in Other liabilities and accrued expenses in the consolidated statements of financial condition.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In November 2004, the firm adopted a discount stock program through which eligible senior executives may acquire restricted stock units in 2006 and 2005 under the firm's Amended SIP at an effective 25% discount. The 25% discount is effected by an additional grant of restricted stock units equal to one-third of the number of restricted stock units purchased by qualifying participants. The purchased restricted stock units are 100% vested when granted, but the shares underlying them are not able to be sold or transferred (other than to satisfy tax obligations) before the third anniversary of the grant date. The shares underlying the restricted stock units that are granted in order to effect the 25% discount will generally vest in equal installments on the second and third anniversaries following the grant date and will not be transferable before the third anniversary of the grant date. Compensation expense related to these restricted stock units is recognized over the vesting period. The total value of restricted stock units granted in 2006 and 2005 in order to effect the 25% discount was \$72 million and \$79 million, respectively.

Restricted Stock Units

The firm issued restricted stock units to employees under the Amended SIP, primarily in connection with year-end compensation and acquisitions. Year-end restricted stock units generally vest as outlined in the applicable restricted stock unit agreements and deliver shortly after the third anniversary of the grant date. All employee restricted stock unit agreements provide that vesting is accelerated in certain circumstances, such as upon retirement, death and extended absence. Of the total restricted stock units outstanding as of November 2006 and November 2005, (i) 26.4 million units and 30.1 million units, respectively, required future service as a condition to the delivery of the underlying shares of common stock and (ii) 38.9 million units and 25.0 million units, respectively, did not require future service. In all cases, delivery of the underlying shares of common stock is conditioned on the grantees satisfying certain vesting and other requirements outlined in the award agreements. When delivering the underlying shares to employees, the firm generally issues new shares of common stock, as opposed to reissuing treasury shares. The activity related to these restricted stock units is set forth below:

	Restricted Stock Units Outstanding		Weighted Average Grant-Date Fair Value of Restricted Stock Units Outstanding	
	Future Service Required	No Future Service Required	Future Service Required	No Future Service Required
Outstanding, November 2005 ⁽¹⁾	30,117,820	24,993,866	\$112.01	\$107.18
Granted ⁽²⁾⁽³⁾⁽⁴⁾	7,499,157	12,217,441	191.08	200.62
Forfeited	(940,930)	(189,715)	109.85	98.95
Delivered ⁽⁵⁾		(8,399,126)		92.00
Vested ⁽⁴⁾	(10,295,675)	10,295,675	101.08	101.08
Outstanding, November 2006	26,380,372	38,918,141	\$138.83	\$138.22

(1)

Includes restricted stock units granted to employees during the year ended November 2006 as part of compensation for 2005.

- (2) Includes restricted stock units granted to employees subsequent to November 2006 as part of compensation for 2006.
- (3) The weighted average grant-date fair value of restricted stock units granted during the years ended November 2006, November 2005 and November 2004 was \$196.99, \$129.03 and \$104.15, respectively.
- (4) The aggregate fair value of awards vested during the years ended November 2006, November 2005 and November 2004 was \$4.40 billion, \$2.05 billion and \$1.64 billion, respectively.
- (5) Includes restricted stock units that were cash settled.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock Options

Stock options granted to employees generally vest as outlined in the applicable stock option agreement and first become exercisable on or after the third anniversary of the grant date. Year-end stock options for 2006 and 2005 become exercisable in January 2010 and January 2009, respectively, and expire on November 25, 2016 and November 27, 2015, respectively. Shares received on exercise prior to January 2011 for year-end 2006 options and January 2010 for year-end 2005 options can not be sold, transferred or otherwise disposed of until January 2011 and January 2010, respectively. All employee stock option agreements provide that vesting is accelerated in certain circumstances, such as upon retirement, death and extended absence. In general, all stock options expire on the tenth anniversary of the grant date, although they may be subject to earlier termination or cancellation under certain circumstances in accordance with the terms of the Amended SIP and the applicable stock option agreement. The dilutive effect of the firm's outstanding stock options is included in Average common shares outstanding Diluted on the consolidated statements of earnings.

The activity related to these stock options is set forth below:

	Options Outstanding	Weighted Average Exercise Price	Aggregate Intrinsic Value (in millions)	Weighted Average Remaining Life (years)
Outstanding, November 2005 ⁽¹⁾	64,237,687	\$ 83.24		
Granted ⁽²⁾	2,937,772	199.84		
Exercised ⁽³⁾	(21,323,726)	78.09		
Forfeited	(204,637)	90.27		
Outstanding, November 2006	45,647,096	\$ 93.12	\$4,952	5.31
Exercisable, November 2006	38,781,928	81.87	4,643	4.62

⁽¹⁾ Includes stock options granted to employees during the year ended November 2006 as part of compensation for 2005.

⁽²⁾ Includes stock options granted to employees subsequent to November 2006 as part of compensation for 2006.

⁽³⁾ Includes stock options that were cash settled.

The total intrinsic value of options exercised during the years ended November 2006, November 2005 and November 2004 was \$1.52 billion, \$766 million and \$363 million, respectively.

The options outstanding as of November 2006 are set forth below:

Weighted

Exercise Price		Options Outstanding	Average Exercise Price	Weighted Average Remaining Life (years)
\$ 45.00	\$ 59.99	5,037,067	\$ 52.97	2.50
60.00	74.99			
75.00	89.99	17,604,474	81.12	4.89
90.00	104.99	16,938,811	91.91	5.09
105.00	119.99			
120.00	134.99	3,128,972	131.64	9.00
135.00	194.99			
195.00	209.99	2,937,772	199.84	10.00
Outstanding, November 2006		45,647,096		

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The weighted average fair value of options granted for 2006, 2005 and 2004 was \$49.96 per option, \$32.91 per option and \$32.22 per option, respectively. Fair value was estimated as of the grant date based on a Black-Scholes option-pricing model using the following weighted average assumptions:

	Year Ended November		
	2006	2005	2004
Risk-free interest rate	4.6%	4.5%	3.4%
Expected volatility	27.5	30.0	35.0
Dividend yield	0.7	0.9	1.0
Expected life	7.5 years	7.5 years	5 years

The fair value of options granted in 2006 and 2005 reflects an additional discount for sales restrictions on the shares of common stock underlying such options that apply until January 2011 and January 2010, respectively. The expected life of the options granted in 2006 and 2005 has been extended to 7.5 years to reflect the estimated impact of the sales restrictions on the expected life of the awards.

The following table sets forth share-based compensation and the related tax benefit:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Share-based compensation	\$3,669	\$1,758	\$1,225
Excess tax benefit related to options exercised	542	268	124
Excess tax benefit related to share-based compensation ⁽¹⁾	653	272	330

⁽¹⁾ Represents the tax benefit, recognized in additional paid-in capital, on stock options exercised and the delivery of common stock underlying restricted stock units.

As of November 2006, there was \$2.51 billion of total unrecognized compensation cost related to nonvested share-based compensation arrangements. This cost is expected to be recognized over a weighted average period of 2.15 years.

The firm's stock repurchase program is intended to maintain its total shareholders' equity at appropriate levels and to substantially offset increases in share count over time resulting from employee share-based compensation. The repurchase program has been effected primarily through regular open-market purchases and is influenced by, among other factors, the level of the firm's common shareholders' equity, its overall capital position, share-based awards and exercises of employee stock options, the prevailing market price of its common stock and general market conditions.

Note 13. Transactions with Affiliated Funds

The firm has formed numerous nonconsolidated investment funds with third-party investors. The firm generally acts as the investment manager for these funds and, as such, is entitled to receive management fees and, in certain cases, advisory fees, incentive fees or overrides from these funds. These fees amounted to \$3.37 billion, \$2.08 billion and \$1.72 billion for the years ended November 2006, November 2005 and November 2004, respectively. As of November 2006 and November 2005, the fees receivable from these funds were \$362 million and \$388 million, respectively. Additionally, the firm may invest alongside the third-party investors in certain funds. The aggregate carrying value of the firm's interests in these funds was \$3.94 billion and \$2.17 billion as of November 2006 and

November 2005, respectively. In the ordinary course of business, the firm

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

may also engage in other activities with these funds, including, among others, securities lending, trade execution, trading and custody. See Note 6 for the firm's commitments related to these funds.

Note 14. Income Taxes

The components of the net tax expense reflected in the consolidated statements of earnings are set forth below:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Current taxes			
U.S. federal	\$ 3,736	\$ 1,504	\$ 374
State and local	627	213	46
Non-U.S.	2,165	1,380	663
Total current tax expense	6,528	3,097	1,083
Deferred taxes			
U.S. federal	(635)	3	827
State and local	(262)	(4)	98
Non-U.S.	(608)	(449)	115
Total deferred tax (benefit)/expense	(1,505)	(450)	1,040
Net tax expense	\$ 5,023	\$ 2,647	\$ 2,123

Deferred income taxes reflect the net tax effects of temporary differences between the financial reporting and tax bases of assets and liabilities. These temporary differences result in taxable or deductible amounts in future years and are measured using the tax rates and laws that will be in effect when such differences are expected to reverse.

Significant components of the firm's deferred tax assets and liabilities are set forth below:

	As of November	
	2006	2005
	(in millions)	
Deferred tax assets		
Compensation and benefits	\$ 2,763	\$ 1,563
Other, net	1,104	319
	3,867	1,882
Valuation allowance ⁽¹⁾	(81)	(6)
Total deferred tax assets	3,786	1,876

Deferred tax liabilities		
Depreciation and amortization	1,040	625
Unrealized gains	367	455
Total deferred tax liabilities	\$1,407	\$1,080

⁽¹⁾ Relates primarily to the ability to utilize losses in various tax jurisdictions.

The firm permanently reinvests eligible earnings of certain foreign subsidiaries and, accordingly, does not accrue any U.S. income taxes that would arise if such earnings were repatriated. As of

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

November 2006, this policy resulted in an unrecognized net deferred tax liability of \$210 million attributable to reinvested earnings of \$2.90 billion.

During 2006, the valuation allowance was increased by \$75 million, primarily due to the acquisition of deferred tax assets considered more likely than not to expire unused. Net operating loss carryforwards were \$1.78 billion and \$352 million as of November 2006 and November 2005, respectively.

The firm had federal net operating loss carryforwards, primarily resulting from acquisitions, of \$203 million and \$24 million as of November 2006 and November 2005, respectively. The firm recorded a related net deferred income tax asset of \$69 million and \$8 million as of November 2006 and November 2005, respectively. These carryforwards are subject to annual limitations on utilization and will begin to expire in 2010. Acquired alternative minimum tax credit carryforwards of \$7 million as of November 2005 were fully utilized in 2006.

The firm had state and local net operating loss carryforwards, primarily resulting from acquisitions, of \$1.52 billion and \$328 million as of November 2006 and November 2005, respectively. The firm recorded a related net deferred income tax asset of \$31 million and \$24 million as of November 2006 and November 2005, respectively. These carryforwards are subject to annual limitations on utilization and will begin to expire in 2007.

The firm had foreign net operating loss carryforwards of \$50 million as of November 2006 and recorded a related net deferred income tax asset of \$13 million. These carryforwards are subject to limitation on utilization and can be carried forward indefinitely.

The firm is subject to examination by the U.S. Internal Revenue Service (IRS) and other taxing authorities in certain countries, such as Japan, the United Kingdom, Korea and U.S. states in which the firm has significant business operations, such as New York. The IRS is currently examining the firm's 2003 and 2004 fiscal years. During fiscal 2006, the Japanese taxing authority concluded their examination of the tax years 2000 through 2004. During fiscal 2005, the IRS concluded its examination of fiscal years 1999 through 2002, and New York State and City substantially concluded their examinations covering periods through fiscal year 2003. The firm regularly assesses the likelihood of additional assessments by each jurisdiction to which the firm pays taxes resulting from the impact of current and future examinations. Tax reserves have been established, which the firm believes are adequate in relation to the potential for additional assessments. The resolution of tax matters is not expected to have a material effect on the firm's financial condition but may be material to the firm's operating results for a particular period, depending, in part, upon the operating results for that period and the firm's effective tax rate for that period.

A reconciliation of the U.S. federal statutory income tax rate to the firm's effective income tax rate is set forth below:

	Year Ended November		
	2006	2005	2004
U.S. federal statutory income tax rate	35.0%	35.0%	35.0%
Increase related to state and local taxes, net of U.S. income tax effects	1.6	1.6	1.4
Tax credits	(0.6)	(1.6)	(3.6)
Foreign operations	(1.3)	(1.2)	(1.2)
Tax-exempt income, including dividends	(0.4)	(0.6)	(0.7)
Other	0.2	(1.2) ⁽¹⁾	0.9
Effective income tax rate	34.5%	32.0%	31.8%

⁽¹⁾ Primarily includes the effect of audit settlements.

159

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Tax benefits of approximately \$653 million in November 2006, \$272 million in November 2005 and \$330 million in November 2004, related to the delivery of common stock underlying restricted stock units and the exercise of options, were credited directly to Additional paid-in capital in the consolidated statements of financial condition and changes in shareholders' equity.

Note 15. Regulation

The firm is regulated by the U.S. Securities and Exchange Commission (SEC) as a Consolidated Supervised Entity (CSE). As such, it is subject to group-wide supervision and examination by the SEC and to minimum capital requirements on a consolidated basis. As of November 2006 and November 2005, the firm was in compliance with the CSE capital requirements.

The firm's principal U.S. regulated subsidiaries include Goldman, Sachs & Co. (GS&Co.) and Goldman Sachs Execution & Clearing, L.P. (GSEC). GS&Co. and GSEC are registered U.S. broker-dealers and futures commission merchants subject to Rule 15c3-1 of the SEC and Rule 1.17 of the Commodity Futures Trading Commission, which specify uniform minimum net capital requirements, as defined, for their registrants, and also require that a significant part of the registrants' assets be kept in relatively liquid form. GS&Co. and GSEC have elected to compute their minimum capital requirements in accordance with the Alternative Net Capital Requirement as permitted by Rule 15c3-1. As of November 2006 and November 2005, GS&Co. and GSEC had net capital in excess of their minimum capital requirements. In addition to its alternative minimum net capital requirements, GS&Co. is also required to hold tentative net capital in excess of \$1 billion and net capital in excess of \$500 million in accordance with the market and credit risk standards of Appendix E of Rule 15c3-1. GS&Co. is also required to notify the SEC in the event that its tentative net capital is less than \$5 billion. As of November 2006 and November 2005, GS&Co. had tentative net capital and net capital in excess of both the minimum and the notification requirements.

Goldman Sachs Bank USA (GS Bank), a wholly owned industrial bank, is regulated by the Federal Deposit Insurance Corporation and the State of Utah Department of Financial Institutions and is subject to minimum capital requirements. As of November 2006, GS Bank was in compliance with all regulatory capital requirements. GS Bank had approximately \$10.59 billion of interest-bearing deposits as of November 2006, which are included in Payables to customers and counterparties in the consolidated statements of financial condition.

The firm has U.S. insurance subsidiaries that are subject to state insurance regulation in the states in which they are domiciled and in the other states in which they are licensed. In addition, certain of the firm's insurance subsidiaries are regulated by the Bermuda Registrar of Companies. The firm's insurance subsidiaries were in compliance with all regulatory capital requirements as of November 2006 and November 2005.

The firm's principal non-U.S. regulated subsidiaries include Goldman Sachs International (GSI) and Goldman Sachs Japan Co., Ltd. (GSJCL). GSI, the firm's regulated U.K. broker-dealer, is subject to the capital requirements of the U.K.'s Financial Services Authority. GSJCL, the firm's regulated Japanese broker-dealer, is subject to the capital requirements of Japan's Financial Services Agency. Prior to October 1, 2006, Goldman Sachs (Japan) Ltd. (GSJL), the predecessor to GSJCL, was the primary regulated subsidiary based in Japan. As of November 2006 and November 2005, GSI, GSJCL and GSJL were in compliance with their local capital adequacy requirements. Certain other non-U.S. subsidiaries of the firm are also subject to capital adequacy requirements promulgated by authorities of the countries in which they operate. As of November 2006 and November 2005, these subsidiaries were in compliance with their local capital adequacy requirements.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The regulatory requirements referred to above restrict Group Inc.'s ability to withdraw capital from its regulated subsidiaries. As of November 2006, approximately \$14.15 billion of net assets of regulated subsidiaries were restricted as to the payment of dividends to Group Inc.

Note 16. Business Segments

In reporting to management, the firm's operating results are categorized into the following three segments: Investment Banking, Trading and Principal Investments, and Asset Management and Securities Services.

Basis of Presentation

In reporting segments, certain of the firm's business lines have been aggregated where they have similar economic characteristics and are similar in each of the following areas: (i) the nature of the services they provide, (ii) their methods of distribution, (iii) the types of clients they serve and (iv) the regulatory environments in which they operate.

The cost drivers of the firm taken as a whole—compensation, headcount and levels of business activity—are broadly similar in each of the firm's business segments. Compensation and benefits expenses within the firm's segments reflect, among other factors, the overall performance of the firm as well as the performance of individual business units. Consequently, pre-tax margins in one segment of the firm's business may be significantly affected by the performance of the firm's other business segments.

The firm allocates revenues and expenses among the three segments. Due to the integrated nature of the business segments, estimates and judgments have been made in allocating certain revenue and expense items. Transactions between segments are based on specific criteria or approximate third-party rates. Total operating expenses include corporate items that have not been allocated to individual business segments. The allocation process is based on the manner in which management views the business of the firm.

The segment information presented in the table below is prepared according to the following methodologies:
Revenues and expenses directly associated with each segment are included in determining pre-tax earnings.

Net revenues in the firm's segments include allocations of interest income and interest expense to specific securities, commodities and other positions in relation to the cash generated by, or funding requirements of, such underlying positions. Net interest is included within segment net revenues as it is consistent with the way in which management assesses segment performance.

Overhead expenses not directly allocable to specific segments are allocated ratably based on direct segment expenses.

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Segment Operating Results

Management believes that the following information provides a reasonable representation of each segment's contribution to consolidated pre-tax earnings and total assets:

		As of or for the Year Ended November		
		2006	2005	2004
		(in millions)		
Investment Banking	Net revenues	\$ 5,629	\$ 3,671	\$ 3,374
	Operating expenses	4,062	3,258	2,973
	Pre-tax earnings	\$ 1,567	\$ 413	\$ 401
	Segment assets	\$ 4,967	\$ 4,869	\$ 4,759
Trading and Principal Investments	Net revenues ⁽¹⁾	\$ 25,562	\$ 16,818	\$ 13,728
	Operating expenses ⁽¹⁾	14,962	10,600	8,688
	Pre-tax earnings	\$ 10,600	\$ 6,218	\$ 5,040
	Segment assets	\$566,499	\$505,536	\$358,137
Asset Management and Securities Services	Net revenues	\$ 6,474	\$ 4,749	\$ 3,849
	Operating expenses	4,036	3,070	2,430
	Pre-tax earnings	\$ 2,438	\$ 1,679	\$ 1,419
	Segment assets	\$266,735	\$196,399	\$167,957
Total	Net revenues ⁽¹⁾⁽²⁾	\$ 37,665	\$ 25,238	\$ 20,951
	Operating expenses ⁽³⁾	23,105	16,965	14,275
	Pre-tax earnings ⁽⁴⁾	\$ 14,560	\$ 8,273	\$ 6,676
	Total assets ⁽⁵⁾	\$838,201	\$706,804	\$531,379

⁽¹⁾ Beginning in the fourth quarter of 2006, "Cost of power generation" in the consolidated statements of earnings was reclassified to operating expenses. "Cost of power generation" was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to the firm's reported pre-tax earnings.

(2) Net revenues include net interest as set forth in the table below:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Investment Banking	\$ 16	\$ 72	\$ 88
Trading and Principal Investments	1,535	1,366	1,744
Asset Management and Securities Services	1,947	1,659	1,194
Total net interest	\$3,498	\$3,097	\$3,026

(3) Includes the following expenses that have not been allocated to the firm's segments: (i) net provisions for a number of litigation and regulatory proceedings of \$45 million, \$37 million and \$103 million for the years ended November 2006, November 2005 and November 2004, respectively; (ii) \$62 million in connection with the establishment of the firm's joint venture in China for the year ended November 2004; and (iii) the amortization of employee initial public offering awards, net of forfeitures, of \$19 million for the year ended November 2004.

Table of Contents

THE GOLDMAN SACHS GROUP, INC. and SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(4) Pre-tax earnings include total depreciation and amortization as set forth in the table below:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Investment Banking	\$119	\$143	\$183
Trading and Principal Investments	725	565	513
Asset Management and Securities Services	151	146	149
Total depreciation and amortization	\$995	\$854	\$845

(5) Includes deferred tax assets relating to the firm's conversion to corporate form and certain assets that management believes are not allocable to a particular segment for the year ended November 2004.

Geographic Information

Due to the highly integrated nature of international financial markets, the firm manages its businesses based on the profitability of the enterprise as a whole. Accordingly, management believes that profitability by geographic region is not necessarily meaningful. In addition, as a significant portion of the firm's activities require cross-border coordination in order to facilitate the needs of the firm's clients, the methodology for allocating the firm's profitability to geographic regions is dependent on the judgment of management. During 2006, the firm amended its methodology for allocating profitability by geographic region. Prior periods have been reclassified to conform to the current presentation.

Geographic results are generally allocated as follows:

Investment Banking: location of the client and investment banking team.

Fixed Income, Currency and Commodities, and Equities: location of the trading desk.

Principal Investments: location of the investment.

Asset Management: location of the sales team.

Securities Services: location of the primary market for the underlying security.

The following table sets forth the total net revenues and pre-tax earnings of the firm and its consolidated subsidiaries by geographic region allocated on the methodology described above:

	Year Ended November		
	2006	2005	2004
	(in millions)		
Net revenues			
Americas ⁽¹⁾	\$20,361	\$14,639	\$12,312
EMEA ⁽²⁾	9,354	6,063	5,107
Asia	7,950	4,536	3,532

Total net revenues	\$37,665	\$25,238	\$20,951
Pre-tax earnings			
Americas ⁽¹⁾	\$ 7,515	\$ 4,977	3,976
EMEA ⁽²⁾	3,075	1,457	1,212
Asia	4,015	1,876	1,672
Corporate ⁽³⁾	(45)	(37)	(184)
Total pre-tax earnings	\$14,560	\$ 8,273	\$ 6,676

(1) Substantially all relates to U.S. results.

(2) EMEA (Europe, Middle East and Africa).

(3) Includes the following expenses that have not been allocated to the firm's segments: (i) net provisions for a number of litigation and regulatory proceedings of \$45 million, \$37 million and \$103 million for the years ended November 2006, November 2005 and November 2004, respectively; (ii) \$62 million in connection with the establishment of the firm's joint venture in China for the year ended November 2004; and (iii) the amortization of employee initial public offering awards, net of forfeitures, of \$19 million for the year ended November 2004.

Table of Contents**SUPPLEMENTAL FINANCIAL INFORMATION****Quarterly Results (unaudited)**

The following represents the firm's unaudited quarterly results for 2006 and 2005. These quarterly results were prepared in accordance with generally accepted accounting principles and reflect all adjustments that are, in the opinion of management, necessary for a fair statement of the results. These adjustments are of a normal recurring nature.

2006 Quarter

	First	Second	Third	Fourth
(in millions, except per share data)				
Total revenues	\$17,246	\$18,002	\$15,979	\$18,126
Interest expense	6,813	7,761	8,395	8,719
Revenues, net of interest expense ⁽¹⁾	10,433	10,241	7,584	9,407
Operating expenses ⁽¹⁾⁽²⁾	6,744	6,717	5,222	4,422
Pre-tax earnings	3,689	3,524	2,362	4,985
Provision for taxes	1,210	1,212	768	1,833

Net earnings	1,512	865	1,617	1,632

Preferred stock dividend			9	8
--------------------------	--	--	---	---

Net earnings applicable to common shareholders	\$ 1,512	\$ 865	\$ 1,608	\$ 1,624
--	----------	--------	----------	----------

Earnings per common share

Basic	\$ 3.06	\$ 1.78	\$ 3.40	\$ 3.53
Diluted	2.94	1.71	3.25	3.35

Dividends declared and paid per common share	0.25	0.25	0.25	0.25
--	------	------	------	------

(1) Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to the firm's reported net earnings.

(2) The timing and magnitude of changes in the firm's bonus accruals can have a significant effect on results in a given quarter.

Table of Contents**SUPPLEMENTAL FINANCIAL INFORMATION****Common Stock Price Range**

The following table sets forth, for the quarters indicated, the high and low sales prices per share of the firm's common stock as reported by the Consolidated Tape Association.

	Sales Price					
	2006		2005		2004	
	High	Low	High	Low	High	Low
First quarter	\$146.35	\$124.23	\$113.93	\$101.79	\$108.00	\$95.73
Second quarter	169.31	139.18	114.25	95.16	109.29	90.08
Third quarter	157.00	136.79	114.87	94.75	95.15	83.29
Fourth quarter	203.35	145.66	134.99	108.86	105.40	88.46

As of January 26, 2007, there were 6,804 holders of record of the firm's common stock.

On January 26, 2007, the last reported sales price for the firm's common stock on the New York Stock Exchange was \$213.50 per share.

- (1) Beginning in the fourth quarter of 2006, Cost of power generation in the consolidated statements of earnings was reclassified to operating expenses. Cost of power generation was previously reported as a reduction to revenues. Prior periods have been reclassified to conform to the current presentation, with no impact to the firm's reported pre-tax earnings.
- (2) Book value per common share is based on common shares outstanding, including restricted stock units granted to employees with no future service requirements, of 450.1 million, 460.4 million, 494.0 million, 496.1 million and 491.2 million as of November 2006, November 2005, November 2004, November 2003 and November 2002, respectively.
- (3) Beginning in 2006, includes employees of the firm's consolidated property management and loan servicing subsidiaries. Prior periods have been adjusted to conform to the current presentation.
- (4) Substantially all assets under management are valued as of calendar month-end.
- (5) In the first quarter of 2006, the firm changed the methodology for classifying certain non-money market assets. The changes were made primarily to reclassify certain assets allocated to external investment managers out of alternative investment assets and to reclassify currency funds into alternative investment assets. The changes did not impact total assets under management and prior periods have been reclassified to conform to the current presentation.
- (6) Primarily includes hedge funds, private equity, real estate, currencies, commodities and asset allocation strategies.

Table of Contents

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

There were no changes in or disagreements with accountants on accounting and financial disclosure during the last two fiscal years.

Item 9A. Controls and Procedures

As of the end of the period covered by this report, an evaluation was carried out by Goldman Sachs management, with the participation of our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934). Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that these disclosure controls and procedures were effective as of the end of the period covered by this report. In addition, no change in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934) occurred during the fourth quarter of our fiscal year ended November 24, 2006 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control over Financial Reporting and the Report of Independent Registered Public Accounting Firm thereon are set forth in Part II, Item 8 of the Annual Report on Form 10-K.

Item 9B. Other Information

Not applicable.

Table of Contents**PART III****Item 10. Directors and Executive Officers of the Registrant**

Information relating to the Registrant's executive officers is included on pages 43 to 44 of the Annual Report on Form 10-K. Information relating to directors of the Registrant, including its audit committee and audit committee financial experts, and its executive officers will be in the Registrant's definitive Proxy Statement for its 2007 Annual Meeting of Shareholders to be held on March 27, 2007, which will be filed within 120 days of the end of our fiscal year ended November 24, 2006 (the 2007 Proxy Statement) and is incorporated herein by reference. Information relating to the Registrant's Code of Business Conduct and Ethics that applies to its senior financial officers, as defined in the Code, is included in Part I, Item 1 of the Annual Report on Form 10-K.

Item 11. Executive Compensation

Information relating to the Registrant's executive officer and director compensation will be in the 2007 Proxy Statement and is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information relating to security ownership of certain beneficial owners of the Registrant's common stock and information relating to the security ownership of the Registrant's management will be in the 2007 Proxy Statement and is incorporated herein by reference.

The following table provides information generally as of November 24, 2006, the last day of fiscal 2006 (but taking into consideration equity-based awards granted on December 15, 2006 in respect of fiscal 2006 performance), regarding securities to be issued on exercise of stock options, and securities remaining available for issuance under our equity compensation plans that were in effect during fiscal 2006.

		Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in the Second Column)
Equity compensation plans approved by security holders	The Goldman Sachs Amended and Restated Stock Incentive Plan ⁽¹⁾	45,647,096 ⁽²⁾	\$93.1232 ⁽²⁾	240,201,596 ⁽³⁾
Equity compensation plans not approved by security holders	None			

Total	45,647,096 ⁽²⁾	240,201,596 ⁽³⁾⁽⁴⁾
-------	---------------------------	-------------------------------

(1) The Goldman Sachs Amended and Restated Stock Incentive Plan (the SIP) was approved by the shareholders of Goldman Sachs at our 2003 Annual Meeting of Shareholders and is a successor plan to The Goldman Sachs 1999 Stock Incentive Plan (the 1999 Plan), which was approved by our shareholders immediately prior to our initial public offering in May 1999 and under which no additional awards have been granted since approval of the SIP.

(2) Includes options that are subject to vesting and other conditions.

(3) Of these shares, 65,070,431 shares may be issued pursuant to outstanding restricted stock units, including 64,615,717 shares granted under the SIP and 454,714 shares granted under the 1999 Plan.

Table of Contents

- (4) Represents shares remaining to be issued under the SIP (239,746,882 shares) and the 1999 Plan (454,714 shares). The total number of shares of common stock that may be delivered pursuant to awards granted under the SIP initially may not exceed 250,000,000 shares. Beginning November 29, 2008 and each fiscal year thereafter, the number of shares of common stock that may be delivered pursuant to awards granted after April 1, 2003 under the SIP may not exceed 5% of our issued and outstanding shares of common stock, determined as of the last day of the immediately preceding fiscal year, increased by the number of shares that were available for awards in previous fiscal years but were not, at the date of determination, covered by awards granted in previous years.

Item 13. Certain Relationships and Related Transactions

Information regarding certain relationships and related transactions will be in the 2007 Proxy Statement and is incorporated herein by reference.

Item 14. Principal Accountant Fees and Services

Information regarding principal accountant fees and services will be in the 2007 Proxy Statement and is incorporated herein by reference.

Cash payments for income taxes, net of refunds, were \$2.86 billion, \$1.52 billion and \$284 million for the years ended November 2006, November 2005 and November 2004, respectively.

The accompanying notes are an integral part of these condensed nonconsolidated financial statements.

Table of Contents

SCHEDULE I

**THE GOLDMAN SACHS GROUP, INC.
(PARENT COMPANY ONLY)
NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS**

Note 1. Significant Accounting Policies

Basis of Presentation

The condensed nonconsolidated financial statements of The Goldman Sachs Group, Inc. (the parent company), a Delaware corporation, should be read in conjunction with the consolidated financial statements of The Goldman Sachs Group, Inc. and subsidiaries (the firm) and notes thereto (the consolidated financial statements), which are included in Part II, Item 8 of the Annual Report on Form 10-K. These condensed nonconsolidated financial statements reflect the results of operations, financial condition and cash flows for the parent company only. Investments in subsidiaries are accounted for using the equity method of accounting prescribed by Accounting Principles Board (APB) Opinion No. 18, The Equity Method of Accounting for Investments in Common Stock.

Unless otherwise stated herein, all references to November 2006, November 2005 and November 2004 refer to the parent company's fiscal years ended, or the dates, as the context requires, November 24, 2006, November 25, 2005 and November 26, 2004, respectively. Certain reclassifications have been made to previously reported amounts to conform to the current presentation.

The parent company's significant accounting policies are identical to those used by the firm, to the extent applicable to the parent company's activities. For further information regarding the firm's significant accounting policies, refer to Note 2 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K.

Use of Estimates

These condensed nonconsolidated financial statements have been prepared in accordance with generally accepted accounting principles that require management to make certain estimates and assumptions. The most important of these estimates and assumptions relate to fair value measurements, the accounting for goodwill and identifiable intangible assets and the provision for potential losses that may arise from litigation and regulatory proceedings and tax audits. Although these and other estimates and assumptions are based on the best available information, actual results could be materially different from these estimates.

Equity Method Investments

Substantially all of the firm's unsecured funding is raised by the parent company. The parent company then lends the necessary funds to its subsidiaries, some of which are regulated, to meet their asset financing and capital requirements. In addition, the parent company provides its regulated subsidiaries with the necessary capital to meet their regulatory requirements. Such funding is included in Loans to subsidiaries and Subordinated loans to subsidiaries in the condensed nonconsolidated statements of financial condition. Intercompany exposure is managed by requiring senior and subordinated intercompany loans to have maturities equal to or shorter than the maturities of the aggregate borrowings of the parent company. This policy ensures that the subsidiaries' obligations to the parent company will generally mature in advance of the parent company's third-party borrowings. In addition, many of the subsidiaries pledge collateral at loan value to cover their intercompany borrowings (other than subordinated debt) in order to mitigate parent company liquidity risk. Equity investments in subsidiaries are generally funded with equity

(PARENT COMPANY ONLY)**

NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS (Continued)

capital and included in Investments in subsidiaries in the condensed nonconsolidated statements of financial condition.

The parent company enters into derivative contracts with subsidiaries to hedge its net investment in non-U.S. operations and to manage the interest rate and currency exposure on its unsecured long-term borrowings and certain unsecured short-term borrowings. To manage exposure on its borrowings, the parent company uses derivatives to effectively convert a substantial portion of its unsecured long-term borrowings into U.S. dollar-based floating rate obligations. The parent company applies fair value hedge accounting to derivative contracts that hedge the benchmark interest rate (i.e., London Interbank Offered Rate (LIBOR)) on its fixed rate unsecured long-term borrowings. Derivative balances with subsidiaries, included in Financial instruments owned, at fair value and Financial instruments sold, but not yet purchased, at fair value in the condensed nonconsolidated statements of financial condition, were \$6.16 billion and \$347 million, and \$2.79 billion and \$464 million, as of November 2006 and November 2005, respectively.

Interest income is largely generated from loans made to subsidiaries.

The parent company also allocates substantially all rental and other costs relating to properties occupied by certain subsidiaries. The parent company additionally allocates the cost of share-based compensation programs to subsidiaries relating to costs associated with employees of those subsidiaries.

Note 2. Unsecured Short-Term Borrowings

The parent company obtains third-party unsecured short-term borrowings primarily through the issuance of promissory notes, commercial paper and hybrid debt instruments. As of November 2006 and November 2005, these borrowings were \$32.63 billion and \$39.98 billion, respectively. Such amounts include the portion of third-party unsecured long-term borrowings maturing within one year of the financial statement date and third-party unsecured long-term borrowings that are redeemable within one year of the financial statement date at the option of the holder. The carrying value of these short-term obligations approximates fair value due to their short-term nature.

Unsecured short-term borrowings with third parties are set forth below:

	As of November	
	2006	2005
	(in millions)	
Promissory notes	\$13,811	\$17,339
Commercial paper	943	5,098
Current portion of unsecured long-term borrowings	13,755	13,905
Hybrid debt instruments ⁽¹⁾	2,275	44
Other short-term borrowings	1,848	3,590
Total ⁽²⁾	\$32,632	\$39,976

⁽¹⁾ Hybrid debt instruments are financial instruments that contain bifurcable embedded derivatives, \$1.17 billion of which were accounted for at fair value under Statement of Financial Accounting Standards (SFAS) No. 155, Accounting for Certain Hybrid Financial Instruments an amendment of FASB Statements No. 133 and 140, as of November 2006.

- (2) The weighted average interest rates for these borrowings were 5.33% and 4.17% as of November 2006 and November 2005, respectively. The weighted average interest rates, after giving effect to hedging activities, were 5.36% and 4.16% as of November 2006 and November 2005, respectively. The weighted average interest rates as of November 2006 excluded hybrid debt instruments accounted for at fair value under SFAS No. 155.

THE GOLDMAN SACHS GROUP, INC.
(PARENT COMPANY ONLY)

NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition, the parent company may borrow overnight funds from certain subsidiaries on an unsecured basis. As of November 2006 and November 2005, such amounts were \$1.54 billion and \$1.44 billion, respectively, and included in Unsecured short-term borrowings With subsidiaries in the condensed nonconsolidated statements of financial condition.

Note 3. Unsecured Long-Term Borrowings

The parent company obtains third-party unsecured long-term borrowings that consist principally of senior borrowings with maturities extending to 2036. As of November 2006 and November 2005, these borrowings were \$119.04 billion and \$79.76 billion, respectively.

Unsecured long-term borrowings with third parties are set forth below:

	As of November	
	2006	2005
	(in millions)	
Fixed rate obligations ⁽¹⁾		
U.S. dollar	\$ 40,008	\$33,053
Non-U.S. dollar	22,739	15,739
Floating rate obligations ⁽²⁾		
U.S. dollar	36,472	22,065
Non-U.S. dollar	19,824	8,899
Total ⁽³⁾	\$119,043	\$79,756

⁽¹⁾ As of both November 2006 and November 2005, interest rates on U.S. dollar fixed rate obligations ranged from 3.88% to 12.00%. As of both November 2006 and November 2005, interest rates on non-U.S. dollar fixed rate obligations ranged from 0.67% to 8.88%.

⁽²⁾ Floating interest rates generally are based on LIBOR or the federal funds rate. Certain equity-linked and indexed instruments are included in floating rate obligations.

⁽³⁾ Includes \$1.98 billion of hybrid financial instruments accounted for at fair value under SFAS No. 155 as of November 2006.

THE GOLDMAN SACHS GROUP, INC.
(PARENT COMPANY ONLY)

NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unsecured long-term borrowings with third parties by maturity date are set forth below:

As of November						
	2006 ⁽¹⁾⁽²⁾			2005 ⁽¹⁾⁽²⁾		
	U.S. Dollar	Non-U.S. Dollar	Total	U.S. Dollar	Non-U.S. Dollar	Total
	(in millions)					
2007	\$	\$	\$	\$11,193	\$ 768	\$11,961
2008	14,645	2,742	17,387	4,705	2,286	6,991
2009	12,435	2,914	15,349	6,091	2,610	8,701
2010	5,064	4,843	9,907	5,192	4,388	9,580
2011	5,703	4,420	10,123	4,431	1,051	5,482
2012-thereafter	38,633	27,644	66,277	23,506	13,535	37,041
Total	\$76,480	\$42,563	\$119,043	\$55,118	\$24,638	\$79,756

(1) Unsecured long-term borrowings maturing within one year of the financial statement date and certain unsecured long-term borrowings that are redeemable within one year of the financial statement date at the option of the holder are included as unsecured short-term borrowings in the condensed nonconsolidated statements of financial condition.

(2) Unsecured long-term borrowings that are repayable prior to maturity at the option of the parent company are reflected at their contractual maturity dates. Unsecured long-term borrowings that are redeemable prior to maturity at the option of the holder are reflected at the dates such options become exercisable.

The parent company enters into derivative contracts with subsidiaries, such as interest rate futures contracts, interest rate swap agreements, currency swap agreements, and equity-linked and indexed contracts, to effectively convert a substantial portion of its third-party unsecured long-term borrowings into U.S. dollar-based floating rate obligations. Accordingly, the carrying value of these unsecured long-term borrowings approximated fair value as of November 2006 and November 2005.

The effective weighted average interest rates for unsecured long-term borrowings with third parties are set forth below:

As of November				
	2006		2005	
	Amount	Rate	Amount	Rate
	(\$ in millions)			
Fixed rate obligations	\$ 137	8.98%	\$ 337	6.76%
Floating rate obligations ⁽¹⁾	118,906	5.73	79,419	4.49

Total	\$119,043	5.73	\$79,756	4.50
-------	-----------	------	----------	------

(1) Includes fixed rate obligations that have been converted into floating rate obligations through derivative contracts.

2009		194	194		173	173
2010	53	547	600	53	485	538
2011	2,182		2,182	2,182		2,182
2012-thereafter						
Total	\$2,235	\$1,040	\$3,275	\$2,532	\$938	\$3,470

⁽¹⁾ Unsecured long-term borrowings maturing within one year of the financial statement date and certain unsecured long-term borrowings that are redeemable within one year of the financial statement date at the

option of the holder are included as unsecured short-term borrowings in the condensed nonconsolidated statements of financial condition.

Subordinated Borrowings

Unsecured long-term borrowings with third parties include \$7.34 billion and \$2.88 billion of subordinated borrowings as of November 2006 and November 2005, respectively, as set forth below.

Subordinated Notes. As of November 2006, the parent company had \$4.50 billion of subordinated notes outstanding with maturities ranging from 2008 to 2036. The effective weighted average interest rate on these subordinated notes was 5.45%, after giving effect to derivative contracts used to convert fixed rate obligations into floating rate obligations. As of November 2005, the parent company had \$40 million of subordinated notes outstanding maturing in 2008 with an interest rate of 12.00%. These notes are junior in right of payment to all of the parent company's senior indebtedness.

(PARENT COMPANY ONLY)**

NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS (Continued)

Refer to Note 5 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for information on junior subordinated debentures issued by the parent company to Goldman Sachs Capital Trust I (the Trust).

Note 4. Commitments, Contingencies and Guarantees

Commitments

Letters of Credit. The parent company provides letters of credit issued by various banks to counterparties in lieu of securities or cash to satisfy various collateral requirements. Letters of credit outstanding were \$171 million and \$25 million as of November 2006 and November 2005, respectively.

Merchant Banking Commitments. The parent company acts as an investor in merchant banking transactions, which includes making long-term investments in equity and debt instruments in privately negotiated transactions, corporate acquisitions and real estate transactions. In connection with these activities, the parent company had commitments to invest up to \$6.34 billion and \$3.49 billion in corporate and real estate investment funds as of November 2006 and November 2005, respectively.

Construction-Related Commitments. As of November 2006 and November 2005, the parent company had construction-related commitments of \$2 million and \$19 million, respectively.

Other. The parent company had other commitments of \$2 million and \$305 million as of November 2006 and November 2005, respectively.

Leases. The parent company has contractual obligations under long-term noncancelable lease agreements, principally for office space, expiring on various dates through 2029. Certain agreements are subject to periodic escalation provisions for increases in real estate taxes and other charges. Future minimum rental payments, net of minimum sublease rentals, which are generally reimbursed by subsidiaries, are set forth below:

	(in millions)
Minimum rental payments	
2007	\$ 123
2008	127
2009	153
2010	78
2011	68
2012-thereafter	726
Total	\$1,275

Contingencies

Refer to Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for information on contingencies.

Table of Contents

(PARENT COMPANY ONLY)
NOTES TO CONDENSED NONCONSOLIDATED FINANCIAL STATEMENTS (Continued)

Guarantees

The parent company has guaranteed the payment obligations of Goldman, Sachs & Co., its principal U.S. broker-dealer subsidiary (other than nonrecourse payment obligations). In addition, the parent company guarantees many of the obligations of its other consolidated subsidiaries on a transaction-by-transaction basis, as negotiated with the counterparty. The parent company is unable to develop an estimate of the maximum payout under its subsidiary guarantees; however, because these guaranteed obligations are also obligations of consolidated subsidiaries and included in the consolidated statements of financial condition or disclosed in Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K, the parent company's liabilities as guarantor are not separately disclosed herein.

The following tables set forth certain information about the parent company's guarantees as of November 2006 and November 2005:

As of November 2006

**Maximum Payout/Notional Amount by Period of
Expiration ⁽³⁾**

	2007	2008 - 2009	2010 - 2011	2012 - Thereafter	Total

As of November 2005

**Maximum Payout/Notional Amount by Period of
Expiration ⁽³⁾**

	2006	2007 - 2008	2009 - 2010	2011 - Thereafter	Total
(in millions)					
Guarantees of trust preferred beneficial interest ⁽¹⁾	\$174	\$349	\$349	\$6,851	\$7,723
Other financial guarantees ⁽²⁾	28	137	134	146	445

⁽¹⁾ Includes the guarantee of all payments scheduled to be made over the life of the Trust, which could be shortened in the event the parent company redeems the junior subordinated debentures issued to fund the Trust. See Note 5 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding the Trust.

(2) The carrying value of these guarantees was a liability of \$4 million as of both November 2006 and November 2005.

(3) Such amounts do not represent the anticipated losses in connection with these contracts.

Refer to Note 6 to the consolidated financial statements in Part II, Item 8 of the Annual Report on Form 10-K for further information regarding the parent company's guarantees.
