## CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS NOTE 1 BASIS OF PRESENTATION

Independent Bank Corp. (the Company ) is a state chartered, federally registered bank holding company, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company (Rockland Trust or the Bank), a Massachusetts trust company chartered in 1907.

The Company is currently the sponsor of Independent Capital Trust V (Trust V), a Delaware statutory trust, Slade s Ferry Statutory Trust I (Slade s Ferry Trust I) a Connecticut statutory trust, and Benjamin Franklin Capital Trust I (Ben Franklin Trust I), a Delaware statutory trust, each of which was formed to issue trust preferred securities. Trust V, Slade s Ferry Trust I and Ben Franklin Trust I are not included in the Company s consolidated financial statements in accordance with Financial Accounting Standards Board (FASB) Interpretation No. 46R (FIN 46).

As of June 30, 2009, the Bank had the following corporate subsidiaries, all of which were wholly-owned by the Bank and included in the Company s consolidated financial statements:

Six Massachusetts security corporations, namely Rockland Borrowing Collateral Securities Corp., Rockland IMG Collateral Securities Corp., Rockland Deposit Collateral Securities Corp., Taunton Avenue Securities Corp., Benjamin Franklin Securities Corporation, and Benjamin Franklin Securities Corporation II, which hold securities, industrial development bonds, and other qualifying assets;

Rockland Trust Community Development Corporation (the Parent CDE ) which, in turn, has three wholly-owned corporate subsidiaries named Rockland Trust Community Development LLC ( RTC CDE I ), Rockland Trust Community Development Corporation II ( RTC CDE II ), and Rockland Trust Community Development Corporation III ( RTC CDE II ). The Parent CDE, CDE I, CDE II, and CDE III were all formed to qualify as community development entities under federal New Markets Tax Credit Program criteria; Rockland Trust Phoenix LLC, which was established in April 2009 to hold other real estate owned (OREO); and

Compass Exchange Advisors LLC ( CEA LLC ) which provides like-kind exchange services pursuant to section 1031 of the Internal Revenue Code.

All material intercompany balances and transactions have been eliminated in consolidation. Certain previously reported amounts may have been reclassified to conform to the current year s presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for

interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended June 30, 2009 are not necessarily indicative of the results that may be expected for the year ended December 31, 2009 or any other interim period.

For further information, refer to the consolidated financial statements and footnotes thereto included in the Company s Annual Report on Form 10-K for the year ended December 31, 2008 filed with the Securities and Exchange Commission.

### NOTE 2- STOCK BASED COMPENSATION

On May 27, 2009 the Company granted restricted stock awards to acquire 5,600 shares of the Company s common stock from the 2006 Non-Employee Director Stock Plan to certain directors of the Company and/or Bank. The holders of these awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights. The restricted stock awards have been determined to have a fair value of \$20.08 per share, based on the average of the high price and low price at which the Company s common stock traded on the date of grant. The restricted stock awards vest at the end of a five year period.

On May 21, 2009 the Company granted 93,000 restricted stock awards to certain executive officers of the Company and/or Bank, from the 2005 Employee Stock Plan. The holders of these awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights. The restricted stock awards have been determined to have a fair value of \$19.48, based on the average of the high price and low price at which the Company s common stock traded on the date of grant. The restricted stock awards vest over a five year period.

On April 20, 2009 the Company awarded options to purchase 5,000 shares of common stock from the 2005 Employee Stock Plan to a certain officer of the Company and/or the Bank. The expected volatility, expected life, expected dividend yield, and expected risk free interest rate for this grant used to determine the fair value of the shares as determined on April 20, 2009 were 38%, 5 years, 2.99%, and 1.80%, respectively. The options have been determined to have a fair value of \$5.25 per share. The options vest over a five year period and have a contractual life of ten years from date of grant.

On March 2, 2009 the Company awarded options to purchase 5,000 shares of common stock from the 2006 Non-Employee Director Stock Plan to a director of the Company and/or the Bank. The expected volatility, expected life, expected dividend yield, and expected risk free interest rate for this grant used to determine their fair value were determined on March 2, 2009 and were 33%, 5 years, 2.78%, and 1.82%, respectively. The options have been determined to have a fair value of \$3.32 per share. The options vest over a five year period and have a contractual life of ten years from date of grant.

On February 27, 2009 the Company granted 24,000 restricted stock awards to certain non-executive officers of the Company and/or Bank, from the 2005 Employee Stock Plan. The holders of these awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights. The restricted stock awards have been determined to have a fair value of \$14.64, based on the average of the high price and low price at which the Company s common stock traded on the date of grant. The restricted stock awards vest over a five year period.

# NOTE 3 RECENT ACCOUNTING DEVELOPMENTS

Statement of Financial Accounting Standards (SFAS) No. 165 Subsequent Events (as amended) (SFAS 165) This statement was established to set forth principles and requirements for subsequent events. In particular this statement set forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition or disclosure in the financial statements. The circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statement, and the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. SFAS 165 is effective for interim or annual financial periods ending after June 15, 2009, and shall be applied prospectively. The adoption of SFAS 165 did not have a material impact on the Company s consolidated financial position or results of operations.

SFAS No. 167, Amendments to FASB Interpretations 46(R) (as amended) (SFAS 167) The purpose of the statement is to improve financial reporting by enterprises involved with variable interest entities. This Statement amends Interpretation 46(R) to require an enterprise to perform an analysis to determine whether the enterprise s variable interest or interests give it a controlling financial interest in a variable interest entity. Additionally, an enterprise is required to assess whether it has an implicit financial responsibility to ensure that a variable interest entity operates as designed when determining whether it has the power to direct the activities of the variable interest entity that most significantly impact the entity s economic performance. This Statement shall be effective for interim or annual financial periods ending after November 15, 2009. Early adoption is not permitted. The Company does not anticipate the adoption of SFAS 167 to have a material impact on the Company s consolidated financial position or results of operations.

*SFAS No. 168, The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles (SFAS168)* In May 2009, the FASB issued SFAS No. 168, the objective of this Statement is to replace SFAS 162 The Hierarchy of Generally Accepted Accounting Principles and to establish the FASB Accounting Standards Codification as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with Generally Accepted Accounting Principles (GAAP). This Statement shall be effective for fiscal years beginning on or after September 15, 2009. The Company does not anticipate the

adoption of SFAS 168 to have a material effect on the Company s consolidated financial position or results of operations.

# NOTE 4 SECURITIES

The following table presents a summary of the cost and fair value of the Company s investment securities. The amortized cost, gross unrealized gains and losses, and fair value of securities held to maturity for the periods below were as follows:

				Credit ated	December 2008 Non-Credit Related						
	Amortize& Cost	Gains	GrosOther GrosOther Unrealizademp LossesImpai rs In Thousand	-Than- oorary Fair rmentValue	Amortizet Cost	Gains	GrosOth Unrealiz <b>T</b> d	er-Than- mporary Fair pairmentValue

(1) The Company recorded OTTI charges in this category of \$7.2 million for the year ended December 31, 2008. For securities deemed to be other-than-temporarily impaired the amortized cost reflects previous OTTI recognized in earnings. Subsequently, pursuant to the adoption of FSP FAS 115-2, which stated that previously recorded impairment charges which did not relate to credit loss should be reclassified from retained earnings to OCI, the Company recorded a cumulative effect adjustment that increased retained earnings and decreased OCI by \$6.0 million, or \$3.8 million net of tax, respectively. The table above reflects the reclass to OCI pursuant to the adoption of FSP FAS 115-2 for comparative illustrative purposes only, as the FSP was adopted effective January 1, 2009.

(2) During the second quarter the Company recorded additional OTTI of \$2.2 million of which \$1.7 million was determined to be credit related and accordingly was recorded as a charge to non-interest income and the remaining \$521,000 was recorded through OCI.

The Company recorded gross gains and losses of \$1.4 million and \$25,000, respectively, for the year and quarter ended June 30, 2009. There were no gross gains or losses for the quarter ended June 30, 2008 and there were losses of \$609,000 for the year to date period on the sale of securities available for sale. When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale.

A schedule of the contractual maturities of securities held to maturity and securities available for sale as of June 30, 2009 is presented below.

	Held to M	Available for Sale		
	Amortized	Fair	Amortized	Fair
	Cost	Value	Cost	Value
	(Dolla			
	Thouse	ands)	(Dollars In	Thousands)
Due in one year or less	\$ 13	\$ 13	\$	\$
Due from one year to five years	9,273	9,517	51,695	52,773
Due from five to ten years	9,173	9,407	135,860	139,942
Due after ten years	51,782	49,974	395,248	388,526
Total	\$ 70,241	\$ 68,911	\$ 582,803	\$581,241

The actual maturities of agency mortgage-backed securities, agency and non-agency collateralized mortgage obligations and corporate debt securities will differ from the contractual maturities, due to the ability of the issuers to prepay underlying obligations. At June 30, 2009, the Bank has \$27.6 million of callable securities in its investment portfolio.

On June 30, 2009 and December 31, 2008 investment securities carried at \$222.0 million and \$196.0 million, respectively, were pledged to secure public deposits, assets sold under repurchase agreements, treasury tax and loan notes, letters of credit, and for other purposes as required by law. Additionally, \$215.5 million and \$310.6 million of securities, at carrying value, were pledged to the Federal Home Loan Bank of Boston (FHLBB) at June 30, 2009 and December 31, 2008, respectively, to secure advances.

At June 30, 2009 and December 31, 2008, the Company had no investments in obligations of individual states, counties, or municipalities, which exceed 10% of stockholders equity.

# **Other-Than-Temporary Impairment**

The Company continually reviews investment securities for the existence of other-than-temporary impairment (OTTI), taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, the credit worthiness of the obligor of the security, volatility of earnings, current analysts evaluations, the Company s intent to sell the security or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term

other-than-temporary is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment. Management prepares an estimate of the expected cash flows for investment securities that potentially may be deemed to have OTTI. This estimate begins with the contractual cash flows of the security. This amount is then reduced by an estimate of probable credit losses associated with the security. When estimating the extent of probable losses on the securities, management considers the strength of the underlying issuers of the securities. Indicators of diminished credit quality of the issuers includes defaults, interest deferrals, or "payments in kind." Management also considers those factors listed in paragraph 25 of FSP FAS 115-2 and 124-2 when estimating the ultimate realizability of the cash flows for each individual security. The resulting estimate of cash flows after considering credit is then subject to a present value computation using a discount rate equal to the current yield used to accrete the beneficial interest or, if not within the scope of EITF Issue No. 99-20, the effective interest rate implicit in the security at the date of acquisition. If the present value of the estimated cash flows is less than the current amortized cost basis, an OTTI is considered to have occurred and the security is written down to the fair value indicated by the cash flows analysis. Any portion of decline in fair value considered to be OTTI charge that is not due to the reduction in cash flows due to credit is considered a decline due to other factors such as liquidity or interest rates. As part of the analysis, management considers whether it intends to sell the security or whether it is more than likely that it would be required to sell the security before the recovery of its amortized cost

basis.

In determining which portion of the OTTI charge is related to credit, and what portion is related to other factors, management considers the reductions in the cash flows due to credit and ascribe that portion of the OTTI charge to credit. Simply, to the extent the estimated cash flows do not support the amortized cost, that amount is considered credit loss and the remainder of the OTTI charge is considered due to other factors, thus not recognized in earnings, but rather through other comprehensive income.

The following tables show the gross unrealized losses and fair value of the Company s investments in an unrealized loss position, which the Company has not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at June 30, 2009 and December 31, 2008.

The Company does not intend to sell these investments and has determined, based upon available evidence that it is more likely than not that the company will not be required to sell the security before the recovery of its amortized cost basis. As a result, the Company does not consider these investments to be OTTI. The Company was able to determine this by reviewing various qualitative and quantitative factors regarding each investment category information such as current market conditions, extent and nature of change in fair value, issuer rating changes and trends, volatility of earnings, and current analysts evaluations. As a result of the Company s review of these qualitative and quantitative factors, the causes of the impairments listed in the table above by category are as follows:

United States Treasury Securities: The unrealized loss on the Company s investment in U.S. Treasury securities is attributable to changes in interest rates and not due to credit deterioration, as these securities are implicitly guaranteed by the U.S. Government or one of its agencies.

Agency Mortgage-Backed Securities: The unrealized loss on the Company s investment in Agency Mortgage-Backed Securities is attributable to changes in interest rates and not due to credit deterioration, as these securities are implicitly guaranteed by the U.S. Government or one of its agencies.

Agency Collateralized Mortgage Obligations: The unrealized loss on the Company s investment in Agency Collateralized Obligations is attributable to changes in interest rates and

not due to credit deterioration, as these securities are implicitly guaranteed by the U.S. Government or one of its agencies.

Non-Agency Collateralized Mortgage Obligations (CMOs): The unrealized loss on this security, which is below investment grade, is attributable to the credit rating downgrades received during the quarter and the general uncertainty surrounding the housing market and it s potential impact on securitized mortgage loans. Management evaluates various factors, including current and expected performance of underlying collateral, to determine collectability of amounts due.

City, State, and Local Municipal Bonds: The unrealized losses on the Company s investment in City, State and Local Municipal Bonds are due to current disruptions in the municipal insurance business, rather than credit concerns.

Single Issuer Trust Preferred Securities: This portfolio consists of four securities, one of which is investment grade, two of which are below investment grade and one which is not rated. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market in the current economic environment. Management evaluates various financial metrics for each of the issuers, including capitalization rates.

Pooled Trust Preferred Securities: This portfolio consists of both investment grade and below investment grade securities. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market and the significant risk premiums required in the current economic environment. Management evaluates collateral credit and instrument structure, including current and expected deferral and default rates and timing. In addition, discount rates are determined by evaluating comparable spreads observed currently in the market for similar instruments.

The following securities are monitored more closely than all other categories of investment securities as these categories have been associated with the vast majority of previously recorded impairment charges. The following table summarizes pertinent information that was considered by management in determining if OTTI existed.

\* Excess subordination represents the additional default/losses in excess of both current and projected defaults/losses that the security can absorb before the security experiences any credit impairment.

Per review of the factors outlined above it was determined that three of the above securities were deemed to be OTTI. The remaining securities were not deemed to be OTTI as the Company does not intend to sell these investments and has determined, based upon available evidence that it is more likely than not that the company will not be required to sell the security before the recovery of its amortized cost basis.

The Company recorded OTTI of \$2.2 million during the second quarter of 2009, of which \$1.7 million was determined to be credit related. The remaining \$521,000 was deemed to be non-credit related and accordingly was recorded through OCI. For the year ended December 31, 2008 the Company recorded OTTI on certain investment grade pooled trust preferred securities, which resulted in a charge to non-interest income of \$7.2 million. Pursuant to FASB Staff Position FAS 115-2 Recognition and Presentation of Other-Than-Temporary Impairment, which stated that previously recorded impairment charges which did not relate to credit loss should be reclassified from retained earnings to OCI, as of January 1, 2009, the Company recorded a cumulative effect adjustment that increased retained earnings

and decreased OCI by \$6.0 million, or \$3.8 million, net of tax. The remaining \$1.2 million of the original \$7.2 million OTTI charge was deemed to be credit related. The following table shows the credit related component of other-than-temporary impairment.

### NOTE 5 FAIR VALUE

SFAS No. 157, defines fair value, and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS No. 157 are described below:

Level 1 Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. A financial instrument s level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company s own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. FASB Staff Position (FSP) Financial Accounting Standard 157-4 Determining Fair Value When the Volume and Level of Activity for the Asset or Liability have Significantly Decreased and Identifying Transaction that are Not Orderly provides that even if there has been a significant

16

\$(2,889)

decrease in the volume and level of activity for the asset or liability and regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. The Company uses prices and inputs that are current as of the measurement date, including during periods of market dislocation. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from one level to another.

# Valuation Techniques

There have been no changes in the valuation techniques used during the current period.

# Trading Income Securities

These equity and fixed income securities are valued based on quoted prices from the market. These securities are categorized in Level 1 as they are actively traded and no valuation adjustments have been applied. Agency Mortgage-backed Securities

The fair value is estimated using either a matrix or benchmarks. The inputs used include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. These securities are categorized as Level 2.

# <u>Agency/Non-Agency Collateralized Mortgage Obligations ( CMOs</u> )

The valuation model for these securities is volatility-driven and ratings based, and uses multi-dimensional spread tables. The inputs used include benchmark yields, recent reported trades, new issue data, broker and dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these CMO s are categorized as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2. <u>Municipal Bonds</u>

The fair value is estimated using a valuation matrix with inputs including bond interest rate tables, recent transactions, and yield relationships. Municipal bonds are categorized as Level 2 within the fair value hierarchy. Corporate Bonds

The fair value is estimated using market prices (to the extent they are available and observable), recently executed transactions, and bond spreads. Corporate bonds are categorized as Level 2.

<u>Single/Pooled Issuer Trust Preferred Securities</u> <u>Single Issuer and Collateralized Debt Obligations (CDOs</u>) The fair value of Trust Preferred Securities, including pooled CDO s and single issued preferred securities, is estimated using external pricing models, discounted cash flow methodologies or similar techniques. The inputs used in these valuations include benchmark yields, recent reported trades, new issue data, broker and dealer quotes and collateral performance. Accordingly, these Trust Preferred CDOs are categorized as Level 3 within the fair value hierarchy.

# **Derivatives**

# **Derivative Financial Instruments**

The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The derivative financial instruments are categorized as Level 2 of the fair value hierarchy. Residential Mortgage Loan Commitments and Forward Sales Agreements

The fair value of the commitments and agreements are estimated using the anticipated market price based on pricing indications provided from syndicate banks. These commitments and agreements are categorized as Level 2. Impaired Loans

Loans that are deemed to be impaired in accordance with SFAS No. 114, Accounting by Creditors for Impairment of a Loan, are valued based upon the lower of cost or fair value of the underlying collateral or based upon discounted cash flow analyses. The inputs used in the appraisals of the collateral are not always observable, and therefore the loans may be categorized as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2. The inputs used in performing discounted cash flow analyses are not observable and therefore such loans are classified as Level 3.

# Loans Held for Sale

Loans held for sale are carried at the lower of cost or market value. Fair value is measured on a non-recurring basis using quoted market prices when available. If quoted market prices are not available, comparable market values or discounted cash flow analysis may be utilized. These assets are typically categorized as Level 2.

# Other Real Estate Owned

The fair values are estimated based upon recent appraisal values of the property. Certain inputs used in appraisals are not always observable, and therefore Other Real Estate Owned maybe categorized as Level 3 within the fair value hierarchy. When inputs in appraisals are observable, they are classified as Level 2 within the fair value hierarchy. <u>Mortgage Servicing Asset</u>

The mortgage servicing asset is subject to impairment testing. A valuation model, which utilizes a discounted cash flow analysis using interest rates and prepayment speed assumptions currently quoted for comparable instruments and a discount rate determined by management, is used for impairment testing. If the valuation model reflects a value less than the carrying value, loan servicing rights are adjusted to fair value through a valuation allowance as determined by the model. As such, the Company classifies the mortgage servicing asset as Level 3.

# Goodwill and Other Intangible Assets

Goodwill and identified intangible assets are subject to impairment testing. The Company conducts an annual impairment test of goodwill in the third quarter of each year, more often if necessary. The Company utilizes both a comparable analysis of relevant price multiples in

recent market transactions and discounted cash flow analysis to estimate the fair value of the intangible assets. Both valuation models require a significant degree of management judgment. In the event the fair value as determined by the valuation model is less than the carrying value, goodwill may be impaired. If the impairment testing resulted in impairment, the Company would classify goodwill and other intangible assets subjected to non-recurring fair value adjustments as Level 3.

Assets and Liabilities Measured at Fair Value on a Recurring Basis as of June 30, 2009 and December 31, 2008 are as follows:

<ul><li>(a) The fair value values presented are based on quoted market</li></ul>					

prices, where available. If quoted market prices are not available, fair values are based on quoted market prices of comparable instruments and/or discounted cash flow analyses.

(b) Fair value is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities or cash flows.

- (c) Fair value was determined by discounting anticipated future cash payments using rates currently available for instruments with similar remaining maturities.
- (d) Fair value was determined based upon market prices of securities with similar terms and maturities.

(e) The book value of net loans is shown net of loans held for sale.

This summary excludes financial assets and liabilities for which the carrying value approximates fair value. For financial assets, these include cash and due from banks, federal funds sold, short-term investments, Federal Home Loan Bank of Boston stock, and Bank Owned Life Insurance. For financial liabilities, these include demand, savings, money market deposits, and federal funds purchased and assets sold under repurchase agreements. The

estimated fair value of demand, savings and money market deposits is the amount payable at the reporting date. SFAS 107 requires the use of carrying value because the accounts have no stated maturity date and the customer has the ability to withdraw funds immediately. Also excluded from the summary are financial instruments measured at fair value on a recurring and nonrecurring basis, as previously described.

# NOTE 6 EARNINGS PER SHARE

Basic earnings per share (EPS) are calculated by dividing net income available to the common shareholder by the weighted average number of common shares (excluding shares of unvested restricted stock) outstanding before any dilution during the period. Diluted earnings per share have been calculated in a manner similar to that of basic earnings per share except that the weighted average number of common shares outstanding is increased to include the number of additional common shares that would have been outstanding if all potentially dilutive common shares (such as those resulting from the exercise of stock options, unvested restricted stock awards, and outstanding warrants) were issued during the period, computed using the treasury stock method.

Earnings per share consisted of the following components for the three and six months ended June 30, 2009 and 2008:

For the Three Months Ended June 30,	nded June 30, Net Income	
	2009 2008	
	(Dollars in T	housands)

Restricted Stock <b>NOTE 7 EMPLOYEE BENEFITS</b>	9,704		29,699	1,692	

# POST RETIREMENT BENEFITS, SUPPLEMENTAL EXECUTIVE RETIREMENT PLANS & DEFINED BENEFIT PENSION PLAN

The Company maintains a defined benefit pension plan (Pension Plan) administered by Pentegra Retirement Services (the Fund), a multiple employer plan. The Fund does not segregate the assets or liabilities of all participating employers, accordingly, disclosure of accumulated vested and non-vested benefits is not possible. Effective July 1, 2006, the Company froze the Pension Plan by eliminating all future benefit accruals, with the exception of the employees that were participants on July 1, 2006 but that were not yet fully vested. The Pension Plan year is July 1st through June 30th. Contributions for the 2008-2009 plan year were all paid in 2008. It has not yet been determined what the pension expense is expected to be related to the 2009-2010 plan year. During the three months ended June 30, 2009 and 2008, \$142,000 and \$260,000 of pension expense had been recognized, respectively. During the six months ended June 30, 2009 and 2008, \$374,000 and \$519,000 of pension expense had been recognized, respectively.

As a result of the acquisition of Slade s Ferry Bancorp Inc. (Slades) in 2008, the Company acquired a defined benefit pension plan (Slades Pension Plan) that covers substantially all of Slades previous employees that met certain eligibility requirements and that were employed up to January 1, 1998 when the plan was frozen. During the first quarter of 2009, the Company merged the Slades Pension Plan with and into the Company s existing Pension Plan.

The Company administers a post-retirement benefit plan and a supplemental executive retirement plan (SERP). Additionally, the Company acquired an additional post-retirement benefit plan and additional SERPs, resulting from the Slades and Benjamin Franklin Bancorp. Inc. (Ben Franklin) acquisitions.

The Company previously disclosed in its financial statements for the fiscal year ended December 31, 2008 that it expected to contribute \$83,000 to its post-retirement plans and \$244,000 to its SERPs in 2009. For the three months ended June 30, 2009, \$16,000 and \$41,000 of contributions have been made to the post-retirement benefit plans and the SERPs, respectively. For the six months ended June 30, 2009, \$30,000 and \$82,000 of contributions have been made to the post-retirement benefit plans and the SERPs, respectively.

Also, in connection with the acquisition of Slades and Ben Franklin, the Company acquired life insurance policies pertaining to certain former employees. The acquired companies had entered into agreements with these employees whereby the Company will pay to the employees estates or beneficiaries a portion of the death benefit that the Company will receive as a beneficiary of such policies. In accordance with EITF 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements the Company established a liability. At June 30, 2009 and December 31, 2008, the balance of the related liability was \$1.5 million and \$1.3 million, respectively.

# NOTE 8 COMPREHENSIVE INCOME

Information on the Company s comprehensive income, presented net of taxes, is set forth below for the three and six months ended June 30, 2009 and 2008.

# Comprehensive income (loss) is reported net of taxes, as follows:

(Dollars in Thousands)

	FOR THE THREE MONTHS ENDED JUNE 30, 2009 2008		FOR TH MONTHS JUNE 2009	IS ENDED

June 30, 2009 and 2008, respectively, and \$4,561 and \$140 for the six months ended June 30, 2009 and 2008, respectively.

Amortization of certain costs included in net periodic post retirement costs, net of tax of \$45 and \$30 for the three months ended June 30, 2009 and 2008, respectively, and \$89 and \$61 for the six months ended June 30, 2009 and 2008, respectively. 42 (130)84 (65)Other Comprehensive Gain/(Loss), Net of Tax: 3,490 (3,756)6,615 (3,830)\$ 4,150 \$ 2,064 \$13,662 **Comprehensive Income** \$ 8,298

- (a) Represents reclassifications of non credit related components of previously recorded OTTI pursuant to the
  - the adoption of FSP FAS 115-2.
- (b) Included \$572,000 of realized but unrecognized loss from the sale of an interest rate swap in January 2008. The loss will be recognized in earnings through January 2010, the original maturity date of the interest rate swap.
- (c) Includes\$1.4 million of realized but unrecognized

gain, net of tax, from the sale of interest rate swaps in June 2009. The gain will be recognized in earnings through December 2018, the original maturity date of the swap. and also includes \$197,000 of realized but unrecognized loss from the sale of an interest rate swap in January 2008.

## NOTE 9 ACQUISITION

On April 10, 2009 the Company, completed its acquisition of Benjamin Franklin Bancorp, Inc. (Ben Franklin) the parent of Benjamin Franklin Bank. The transaction qualified as a tax-free reorganization for federal income tax purposes, and former Ben Franklin shareholders received 0.59 shares of the Company s common stock for each share of Ben Franklin common stock which they owned. Under the terms of the merger, cash was issued in lieu of fractional shares. Based upon the Company s \$18.27 per share closing price on April 9, 2009, the transaction was valued at \$10.7793 per share of Ben Franklin common stock or approximately \$84.5 million in the aggregate. As a result of the acquisition, the Company s outstanding shares increased by 4,624,948 shares.

The Company accounted for the acquisition using the acquisition method pursuant to *SFAS 141(R) Business Combinations (SFAS 141R)*. Accordingly, the Company recorded merger and acquisition expenses of \$1.5 million during the first quarter of 2009 and \$10.8 million during the second quarter of 2009. Additionally, SFAS 141R requires an acquirer to recognize the assets acquired and the liabilities assumed at their fair values as of the acquisition date. The following table summarizes the estimated fair value of the assets acquired and liabilities assumed as of the date of the acquisition.

	<b>Net Assets Acquired</b> (Dollars in Thousands)		
Assets:			
Cash	\$ 98,089		
Investments	147,548		
Loans	687,444		
Premises and Equipment	5,919		
Goodwill	12,193		
Core Deposit & Other Intangible	7,616		
Other Assets	47,639		
Total Assets Acquired	1,006,448		
Liabilities:			
Deposits	701,407		
Borrowings	196,105		
Other Liabilities	24,433		
Total Liabilities Assumed	921,945		
Purchase Price	\$ 84,503		

As noted above, the Company acquired loans at fair value of \$687.4 million. Included in this amount was \$3.9 million of loans with evidence of deterioration of credit quality since origination for which it was probable, at the time of the acquisition, that the Company would be unable to collect all contractually required payments receivable. In accordance with Statement of Opinion 03-3 Accounting for Certain Loans or Debt Securities Acquired in a Transfer (SOP 03-3), this resulted in a non accretable difference of \$806,000, which is defined as the loan s contractually required payments receivable in excess of the amount of its cash flows expected to be collected. The Company considered factors such as payment history, collateral values, and accrual status when determining whether there was evidence of deterioration of loan s credit quality at the acquisition date.

A core deposit intangible of \$6.6 million was recorded with an expected life of ten years. There was an additional \$650,000 of other intangible recorded related to non-compete agreements with a life of one year, and other various intangibles of \$340,000.

The following summarizes the unaudited proforma results of operations as if the Company acquired Ben Franklin on January 1, 2009 (2008 amounts represent combined results for the Company and Ben Franklin).

		onths ended ne 30,	
	2009	2008

## NOTE 10 GOODWILL AND IDENTIFIABLE INTANGIBLE ASSETS

The changes in goodwill and intangible assets for the period ended June 30, 2009 are shown in the table below. During the second quarter of 2009 the Company acquired Ben Franklin resulting in additional goodwill of \$12.2 million and core deposit and other identifiable intangible assets of \$7.6 million.

	<b>Carrying Amount of Goodwill and Intangibles</b> (Dollars in Thousands)

# NOTE 11 CAPITAL PURCHASE PROGRAM

On April 22, 2009 the Company repaid \$78.2 million in preferred stock to the U.S. Treasury in conjunction with its exit from the Capital Purchase Program. As a result, during the quarter the Company recorded a \$4.4 million non-cash deemed dividend, amounting to \$0.22 per diluted share, associated with the repayment of the preferred stock to the U.S Treasury and the remaining \$141,000 preferred stock dividend for the quarter. The Company also repurchased common stock warrants issued to the Treasury for \$2.2 million, the cost of which has been reflected as a reduction in additional paid in capital.

# NOTE 12 SUBSEQUENT EVENTS

The Company has evaluated subsequent events through the filing date of this Form 10-Q. The Company has determined that there are no subsequent events that require disclosure through this date.

#### Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the consolidated financial statements, notes and tables included in the Company s Annual Report on Form 10-K for the fiscal year ended December 31, 2008, filed with the Securities and Exchange Commission.

#### **Cautionary Statement Regarding Forward-Looking Statements**

A number of the presentations and disclosures in this Form 10-Q, including, without limitation, statements regarding the level of allowance for loan losses, the rate of delinquencies and amounts of charge-offs, and the rates of loan growth, and any statements preceded by, followed by, or which include the words may, could, should. will. would. hope. might. believe. expect. anticipate. estimate. intend. plan. assume or similar expressi forward-looking statements within the meaning of the safe harbor provisions of the Private Securities Litigation Reform Act of 1995.

These forward-looking statements, implicitly and explicitly, include the assumptions underlying the statements and other information with respect to Independent Bank Corp. s (the Company s ) beliefs, plans, objectives, goals, expectations, anticipations, estimates, intentions, financial condition, results of operations, future performance and business, including the Company s expectations and estimates with respect to the Company s revenues, expenses, earnings, return on equity, return on assets, efficiency ratio, asset quality and other financial data and capital and performance ratios.

Although the Company believes that the expectations reflected in the Company s forward-looking statements are reasonable, these statements involve risks and uncertainties that are subject to change based on various important factors (some of which are beyond the Company s control). The following factors, among others, could cause the Company s financial performance to differ materially from the Company s goals, plans, objectives, intentions, expectations and other forward-looking statements:

a weakening in the strength of the United States economy in general and the strength of the regional and local economies within the New England region and Massachusetts which could result in a deterioration of credit quality, a change in the allowance for loan losses or a reduced demand for the Company s credit or fee-based products and services;

adverse changes in the local real estate market, could result in a deterioration of credit quality and an increase in the allowance for loan loss, as most of the Company s loans are concentrated in southeastern Massachusetts, including Cape Cod and Rhode Island and a substantial portion of these loans have real estate as collateral;

the effects of, and changes in, trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System, could affect the Company s business environment or affect the Company s operations;

the effects of, any changes in, and any failure by the Company to comply with tax laws generally and requirements of the federal New Markets Tax Credit program in particular could adversely affect the Company s tax provision and its financial results;

inflation, interest rate, market and monetary fluctuations could reduce net interest income and could increase credit losses;

adverse changes in asset quality could result in increasing credit risk-related losses and expenses;

competitive pressures could intensify and affect the Company s profitability, including as a result of continued industry consolidation, the increased financial services provided by non-banks and banking reform;

a deterioration in the conditions of the securities markets could adversely affect the value or credit quality of the Company s assets, the availability and terms of funding necessary to meet the Company s liquidity needs and the Company s ability to originate loans;

the potential to adapt to changes in information technology could adversely impact the Company s operations and require increased capital spending;

changes in consumer spending and savings habits could negatively impact the Company s financial results;

acquisitions may not produce results at levels or within time frames originally anticipated and may result in unforeseen integration issues or impairment of goodwill and/or other intangibles;

adverse conditions in the securities markets could lead to impairment in the value of securities in the Company s investment portfolios and consequently have an adverse effect on the Company s earnings; and

laws and programs designed to address capital and liquidity issues in the banking system, including, but not limited to, the Federal Deposit Insurance Corporation s Temporary Liquidity Guaranty Program and the U.S. Treasury Department s Capital Purchase Program and Troubled Asset Relief Program may have significant effects on the financial services industry, the exact nature and extent of which cannot be determined at this time.

If one or more of the factors affecting the Company s forward-looking information and statements proves incorrect, then the Company s actual results, performance or achievements could differ materially from those expressed in, or implied by, forward-looking information and statements contained in this Form 10-Q. Therefore, the Company cautions you not to place undue reliance on the Company s forward-looking information and statements.

The Company does not intend to update the Company s forward-looking information and statements, whether written or oral, to reflect change. All forward-looking statements attributable to the Company are expressly qualified by these cautionary statements.

#### **EXECUTIVE LEVEL OVERVIEW**

The Company reported net income of \$660,000 and \$7.0 million for the three and six month periods ending June 30, 2009 compared to \$5.8 million and \$12.1 million for the same periods in 2008 respectively. The decrease in net income from the prior quarter is primarily due to merger and acquisition expenses associated with the Benjamin Franklin Bancorp. Inc. (Ben Franklin) acquisition, increased FDIC deposit premium fees, and other-than-temporary impairment charges on investment securities partially offset by a gain resulting from an early termination of an interest rate swap agreement.

On a diluted earnings per share basis the Company reported a loss of \$0.19 and earnings of \$0.07 for the three and six month periods ending June 30, 2009 compared to earnings of \$0.36 and \$0.79 for the comparative 2008 periods. The Company s repayment of the United States Treasury Department s ( Treasury ) Capital Purchase Program ( CPP ) preferred stock, resulted in a one time \$4.4 million deemed dividend charge, which decreased net income available to common shareholders by \$0.22 per diluted share, negatively impacting the second quarter s performance.

When management assesses the Company s financial performance for purposes of making day-to-day and strategic decisions it does so based upon the performance of its core banking business, which is primarily derived from the combination of net interest income and non-interest or fee income, as reduced by operating expenses, the provision for loan losses, and the impact of income taxes. The Company s financial performance as determined in accordance with Generally Accepted Accounting Principles (GAAP), however, sometimes also includes gain or loss due to items that management does not believe are related to its core banking business, such as gains or losses on the sales of securities, merger & acquisition expenses, and other items. Management, therefore, also computes the Company s non-GAAP operating earnings, which excludes these items, to measure the strength of the Company s core banking business and to identify trends that may to some extent be obscured by gains or losses which management deems not to be core to the Company s operations. Management believes that the financial impact of the items excluded when computing non-GAAP operating earnings will disappear or become immaterial within a near-term finite period.

Management s computation of the Company s non-GAAP operating earnings are set forth below because management believes it may be useful for investors to have access to the same analytical tool used by management to evaluate the Company s core operational performance so that investors may assess the Company s overall financial health and identify business and performance trends that may be more difficult to identify and evaluate when non-core items are included. Management also believes that the computation of non-GAAP operating earnings may facilitate the comparison of the Company to other companies in the financial services industry.

Non-GAAP operating earnings should not be considered a substitute for GAAP operating results. An item which management deems to be non-core and excludes when computing non-GAAP operating earnings can be of substantial importance to the Company s results for any particular quarter or year. The Company s non-GAAP operating earnings set

forth below are not necessarily comparable to non-GAAP information which may be presented by other companies.

The following table summarizes management s computation of non-GAAP operating earnings for the time periods indicated:

	Net In Available t Shareh	o Common	Diluted Earnings Per Shar			
	2009	2008	2009	2008

As indicated above second quarter 2009 results included certain items which management considers non-core. These items, net of tax, are merger and acquisition expenses of \$8.7 million, a gain of \$2.5 million on the termination

# Edgar Filing: INDEPENDENT BANK CORP - Form 10-Q

of an interest rate swap agreement and the aforementioned deemed preferred stock dividend of \$4.4 million. Excluding certain non-core items, net operating earnings were \$6.8 million, or \$0.33 per diluted common share and \$12.1 million, or \$0.66 per diluted common share for the three and six month ended June 30, 2009, respectively, down 23.3% and 27.5%, respectively, from the same period in the prior year.

Not reflected in the table above are two additional large variance items impacting the second quarter of 2009, a special FDIC assessment of \$2.1 million pre-tax or \$0.07 per share and securities impairment charges of \$1.7 million or \$0.05 per share.

While the quarter reflects certain items that negatively impacted reported earnings, there were many positive aspects of the quarter reflective of the Company s strong core performance:

The Company s net interest margin improved to 3.88% in the second quarter, up from the 3.57% reported in first quarter of 2009. A number of actions helped to improve the net interest margin including managing down a large Federal Funds sold position that existed at the end of the first quarter in addition to careful management of deposit costs.

Capital strengthened in the second quarter as the company s tangible equity ratio increased to 5.86% at the end of the second quarter as compared to 5.33% at the end of first quarter. In the same periods the non-GAAP measurement of these ratios which includes the tax deductibility of certain goodwill and other intangibles were 6.33% and 5.83%, respectively.

The Company s asset quality is stable. Non-performing loans as a percentage of loans decreased to 93 basis points in the second quarter from 108 basis points at the end of the first quarter of 2009. Loan net charge-offs were \$1.9 million in second quarter of 2009 or 23 basis points on an annualized basis compared to \$3.6 million or 53 basis points on an annualized basis in the first quarter.

Excluding the loans acquired from Ben Franklin at fair value, the reserve to loan ratio at June 30, 2009 was 1.49%, a 9 basis point increase from the quarter ended March 31, 2009. The provision for loan losses was \$4.5 million and \$4.0 million, for the quarter ended June 30, 2009 and March 31, 2009, respectively. Net charge-offs were \$5.4 million and \$3.6 million for the periods ended June 30, 2009 and March 31, 2009, respectively.

Loan delinquency is also stable at 171 basis points at the end of second quarter of 2009 as compared to 175 basis points at the end of first quarter. Commercial lending growth was strong in the second quarter amounting to \$62 million of organic growth or 15% on an annualized basis, driven by commercial and industrial lending opportunities. Growth opportunities remain strong as the pipeline is still quite high.

The Company experienced strong deposit growth in the core deposit categories particularly demand deposits, which increased \$35.7 million during the quarter. This growth was mitigated by reductions in the time deposit category as Certificates of Deposits were managed down to help reduce a large excess cash position and to manage our cost of funds.

The Ben Franklin acquisition closed in the second quarter and added \$1.0 billion in total assets prior to de-leverage. The majority of the Ben Franklin securities and borrowings were repaid, resulting in approximately \$700 million in loans and deposits, respectively, added to the Company s balance sheet.

In addition in May, the Company was awarded \$50.0 million in tax credit allocation authority under the Federal New Markets Tax Credit Program. This program focuses on making credit available to qualified entities and low income communities. The Company was the only bank in Massachusetts and one of only 30 institutions nationally to receive this designation in this round. This marks the third time the Company has received these tax credits since the program s inception in 2000.

#### **Critical Accounting Policies**

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. The Company believes that the Company s most critical accounting policies upon which the Company s financial condition depends, and which involve the most complex or subjective decisions or assessments are as follows:

Allowance for Loan Losses: The Company s allowance for loan losses provides for probable losses based upon evaluations of known and inherent risks in the loan portfolio. Arriving at an appropriate amount of allowance for loan losses involves a high degree of judgment.

The Company makes use of two components of allowances for loan losses: specific and general. A specific allowance may be assigned to a loan that is considered to be impaired. Certain loans are evaluated individually for impairment and are judged to be impaired when management believes it is probable that Rockland Trust Company ( the Bank ) will not collect all of the contractual interest and principal payments as scheduled in the loan agreement. Judgment is required with respect to designating a loan as impaired and determining the amount of the required specific allowance. Management s judgment is based upon its assessment of probability of default, loss given default, and exposure at default. Changes in these estimates could be due to a number of circumstances which may have a direct impact on the provision for loan losses and may result in changes to the amount of allowance.

The general allowance is determined based upon the application of the Company s methodology for assessing the adequacy of the allowance for loan losses, which considers historical and expected loss factors, loan portfolio composition and other relevant indicators. This methodology involves management s judgment regarding the application and use of such factors including the effects of changes to the prevailing economic environment in its estimate of the required amounts of general allowance.

The allowance is increased by provisions for loan losses and by recoveries of loans previously charged-off and is reduced by loans charged-off. For a full discussion of the Company s methodology of assessing the adequacy of the allowance for loan losses, see the Allowance for Loan Losses and Provision for Loan Losses sections within Management s Discussion and Analysis of Financial Condition and Results of Operations. For a discussion regarding Ben Franklin loans see the Loan Portfolio and Allowance for Loan Losses sections within Management s Discussion and Results of Operations.

**Income Taxes**: The Company accounts for income taxes in accordance with SFAS No. 109, Accounting for Income Taxes as interpreted by FASB Interpretation No. 48 (FIN No. 48), Accounting for Uncertainty in Income Taxes, resulting in two components of income tax expense, current and deferred. Taxes are discussed in more detail in *Note 12, Income Taxes within Notes to the Consolidated Financial Statements* included in Item 8 of the

Company s Annual Report on Form 10-K for the year ended December 31, 2008. Accrued taxes represent the net estimated amount due to or to be received from taxing authorities in the current year. In estimating accrued taxes, management assesses the relative merits and risks of the appropriate tax treatment of transactions taking into account statutory, judicial, and regulatory guidance in the context of our tax position. Deferred tax assets/liabilities represent differences between when a tax benefit or expense is recognized for book purposes and on the Company s tax return. Future tax assets are assessed for recoverability. The Company would record a valuation allowance if it believes based on available evidence, that it is more likely than not that the future tax assets recognized will not be realized before their expiration. The amount of the future income tax asset recognized and considered realizable could be reduced if projected income is not achieved due to various factors such as unfavorable business conditions. If projected income is not expected to be achieved, the Company would record a valuation allowance to reduce its future tax assets to the amount that it believes can be realized in its future tax returns. The Company had no recorded tax valuation allowance as of June 30, 2009. Additionally, deferred tax assets/liabilities are calculated based on tax rates expected to be in effect in future periods. Previously recorded tax assets and liabilities need to be adjusted when the expected date of the future event is revised based upon current information.

Valuation of Goodwill/Intangible Assets and Analysis for Impairment: The Company has increased its market share through the acquisition of entire financial institutions accounted for under the acquisition method of accounting, as well as from the acquisition of branches (not the entire institution) and other non-banking entities. For all acquisitions the Company is required to record assets acquired and liabilities assumed at their fair value which is an estimate determined by the use of internal or other valuation techniques. Goodwill is subject to ongoing periodic impairment tests and is evaluated using a two step impairment approach. Step one of the impairment testing compares book value to the market value of the Company s stock, or to the fair value of the reporting unit. If test one is failed a more detailed analysis is performed, which involves measuring the excess of the fair value of the reporting unit, as determined in step one, over the aggregate fair value of the individual assets, liabilities, and identifiable intangible sby utilizing a comparable analysis of relevant price multiples in recent market transactions. The Company s intangible assets are also subject to ongoing periodic impairment testing. The Company tests each of the intangibles by comparing the carrying value of the intangible to the sum of the undiscounted cash flows analyses to determine if impairment exists. As a result of such impairment testing, the Company determined goodwill and other intangibles were was not impaired.

Valuation of Securities and Analysis for Impairment: Securities that the Company has the ability and intent to hold until maturity are classified as securities held-to-maturity and are accounted for using historical cost, adjusted for amortization of premium and accretion of discount. Trading securities are carried at fair value, with unrealized gains and losses recorded in other non-interest income. All other securities are classified as securities available-for-sale and are carried at fair market value. The fair values of securities are based on either quoted market price, third party pricing services, or third party valuations. Unrealized gains and losses on securities available-for-sale are reported, on an after-tax basis, as a separate component of stockholders equity in accumulated other comprehensive income.

On a quarterly basis, the Company makes an assessment to determine whether there have been any events or circumstances to indicate that a security for which there is an unrealized loss is impaired on an other-than-temporary basis. The Company considers many factors including the severity and duration of the impairment; the Company s intent to sell the security or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, recent events specific to the issuer or industry; and for debt securities, external credit ratings and recent downgrades. The term other-than-temporary is not intended to indicate that the decline is permanent. It indicates that the prospects for near-term recovery are not necessarily favorable or that there is a lack of evidence to support fair values greater than or equal to the carrying value of the investment. Management prepares an estimate of the expected cash flows for investment securities that potentially may be deemed to have OTTI. This estimate begins with the contractual cash flows of the security. This amount is then reduced by an estimate of probable credit losses associated with the security. When estimating the extent of probable losses on the securities, management considers the strength of the underlying issuers of the securities. Indicators of diminished credit quality of the issuers includes defaults, interest deferrals, or payments in kind. Management also considers those factors listed in paragraph 25 of FSP FAS 115-2 and 124-2 when estimating the ultimate realizability of the cash flows for each individual security. The resulting estimate of cash flows after considering credit is then subject to a present value computation using a discount rate equal to the current yield used to accrete the beneficial interest or, if not within the scope of EITF Issue No. 99-20, the effective interest rate implicit in the security at the date of acquisition. If the present value of the estimated cash flows is less than the current amortized cost basis, an OTTI is considered to have occurred and the security is written down to the fair value indicated by the cash flows analysis. Any portion of decline in fair value considered to be OTTI charge that is not due to the reduction in cash flows due to credit is considered a decline due to other factors such as liquidity or interest rates. As part of the analysis, management considers whether it intends to sell the security or whether it is more than likely that it would be required to sell the security before the recovery of its amortized cost basis.

In determining which portion of the OTTI charge is related to credit, and what portion is related to other factors, management considers the reductions in the cash flows due to credit and ascribe that portion of the OTTI charge to credit. Simply, to the extent the estimated cash flows do not support the amortized cost, that amount is considered credit loss and the remainder of the OTTI charge is considered due to other factors, thus not recognized in earnings, but rather through other comprehensive income.

Loan Servicing: Servicing assets are recognized as separate assets when rights are acquired through purchase or through sale of financial assets with servicing retained. Capitalized servicing rights are reported as mortgage servicing rights and are amortized into non-interest income in proportion to, and over the period of, the estimated future servicing of the underlying financial assets. Servicing assets are evaluated for impairment based upon the fair value of the rights as compared to amortized cost. Impairment is determined by stratifying rights by predominant characteristics, such as interest rates and terms. Fair value is determined using prices for similar assets with similar characteristics, when available, or based upon discounted cash flows using market-based assumptions. Impairment for an individual stratum is recognized through earnings within mortgage banking income, to the extent that fair value is less than the capitalized amount for the stratum.

# FINANCIAL POSITION

**Loan Portfolio** Total loans increased by \$717.1 million, or 27.0%, for the period ended June 30, 2009 as compared to December 31, 2008. Loan growth achieved was concentrated in the commercial real estate and residential real estate categories while the consumer (primarily automobile lending) categories were reduced. Total commercial loans (including small business loans) now represent 63.3% of the total loan portfolio. The acquisition of Ben Franklin added \$687.4 million in growth, as shown in the table below.

Loans obtained in connection with the Acquisition have been recorded at fair value in accordance with Statement of Financial accounting Standards No. 141 (revised 2007), Business Combinations (SFAS No. 141R). SFAS No. 141R, which prohibits the carry over of the allowance for credit losses. The Company's evaluation of loans with evidence of loan deterioration as of the acquisition date resulted in a non accretable difference of \$806,000, representing the loans contractually required payments receivable in excess of the amounts of its cash flows expected to be collected. Determining the fair value of the acquired loans required estimating cash flows expected to be collected on the loans. Estimated credit losses on all acquired loans were considered in the determination of fair value as of the acquisition date.

The Bank s commercial real estate portfolio, the Bank s largest portfolio, is diversified with loans secured by a variety of property types, such as owner-occupied and non-owner-occupied commercial, retail, office, industrial, warehouse and other special purpose properties, such as hotels, motels, restaurants, golf courses, and healthcare-related properties. Commercial real estate also includes loans secured by certain residential-related property types including multi-family apartment buildings, residential development tracts and, to a lesser extent, condominiums. The following pie chart shows the diversification of the commercial real estate portfolio as of June 30, 2009.

# Commercial Real Estate Portfolio by Property Type as of 6/30/09

The Bank considers a concentration of credit to a particular industry to exist when the aggregate credit exposure to a borrower, an affiliated group of borrowers or a non-affiliated group of borrowers engaged in one industry exceeds 10% of the Bank s loan portfolio which includes direct, indirect or contingent obligations. As of June 30, 2009, loans made by the Company to the industry concentration of lessors of non-residential buildings constituted 13.9% of the Company s total loan portfolio.

The Bank does not originate sub-prime real-estate loans as a line of business.

Asset Quality The Bank actively manages all delinquent loans in accordance with formally documented policies and established procedures. In addition, the Company s Board of Directors reviews delinquency statistics, by loan type, on a monthly basis. Inclusive in the discussion below are the loans acquired from Ben Franklin.

*Delinquency* The Bank s philosophy toward managing its loan portfolios is predicated upon careful monitoring which stresses early detection and response to delinquent and default situations. The Bank seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. Generally, the Bank requires that a delinquency notice be mailed to a borrower upon expiration of a grace period (typically no longer than 15 days beyond the due date). Reminder notices and telephone calls may be issued prior to the expiration of the grace period. If the delinquent status is not resolved within a reasonable time frame following the mailing of a delinquency notice, the Bank s personnel charged with managing its loan portfolios, contacts the borrower to ascertain the reasons for delinquency and the prospects for payment. Any subsequent actions taken to resolve the delinquency will depend upon the nature of the loan and the length of time that the loan has been delinquent. The borrower s needs are considered as much as reasonably possible without jeopardizing the Bank s position. A late charge is usually assessed on loans upon expiration of the grace period.

On loans secured by one-to-four family, owner-occupied properties, the Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure action. Any loans that are modified are reviewed by the Bank to identify if a troubled debt restructuring has occurred. A troubled debt restructuring is when, for economic or legal reasons related to a borrower s financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider based upon current market rates. The restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two. As of June 30, 2009 and December 31, 2008, troubled debt restructured loans amount to \$3.5 million and \$1.1 million, which was comprised of 58 and 16 loans, respectively. If such efforts by the Bank do not result in a satisfactory arrangement, the loan is referred to legal counsel at which time foreclosure proceedings are initiated. At any time prior to a sale of the property at foreclosure, the Bank may and will terminate foreclosure proceedings if the borrower is able to work out a satisfactory payment plan. On loans secured by commercial real estate or other business assets, the Bank similarly seeks to reach a satisfactory payment plan so as to avoid foreclosure or liquidation.

The following table sets forth a summary of certain delinquency information as of the dates indicated: <u>Table 2</u> <u>Summary of Delinquency Information</u>

*Nonaccrual Loans* As permitted by banking regulations, certain consumer loans past due 90 days or more continue to accrue interest. In addition, certain commercial and real estate loans that are more than 90 days past due may be kept on an accruing status if the loan is well secured and in the process of collection. As a general rule, commercial and real estate categories, as well as home equity loans more than 90 days past due with respect to principal or interest, are classified as a nonaccrual loan. Income accruals are suspended on all nonaccrual loans and all previously accrued and uncollected interest is reversed against current income. A loan remains on nonaccrual status until it becomes current with respect to principal and interest (and in certain instances remains current for up to three months), when the loan is liquidated, or when the loan is determined to be uncollectible and it is charged-off against the allowance for loan losses.

*Nonperforming Assets* Nonperforming assets are comprised of nonperforming loans, nonperforming securities, Other Real Estate Owned (OREO) and other assets. Nonperforming loans consist of loans that are more than 90 days past due but still accruing interest and nonaccrual loans. Nonperforming securities consist of securities that are on nonaccrual status. OREO includes properties held by the Bank as a result of foreclosure or by acceptance of a deed in lieu of foreclosure. As of June 30, 2009, nonperforming assets totaled \$41.0 million, an increase of \$11.1 million from December 31, 2008. The increase in nonperforming assets is attributable mainly to increases in nonperforming loans in the commercial and industrial categories, OREO, and the nonaccrual securities, which is in part due to the impact of the Ben Franklin acquisition. Nonperforming assets represented 0.92% of total assets at June 30, 2009, as compared to 0.82% at December 31, 2008. The Bank had seventeen and seven properties totaling \$6.1 million and \$1.8 million held as OREO as of June 30, 2009 and December 31, 2008, respectively.

Repossessed automobile loan balances continue to be classified as nonperforming loans and not as other assets, because the borrower has the potential to satisfy the obligation within twenty days from the date of repossession (before the Bank can schedule disposal of the collateral). The borrower can redeem the property by payment in full at any time prior to the property s disposal by the Bank. Repossessed automobile loan balances amounted to \$395,000 as of June 30, 2009, \$642,000 at December 31, 2008 and \$606,000 at June 30, 2008.

The following table sets forth information regarding nonperforming assets held by the Company at the dates indicated.

(1) There were \$1.2 million and

# Table of Contents

\$74,000 restructured, nonaccruing loans at June 30, 2009 and December 31, 2008, respectively, and there were no restructured nonaccruing loans at June 30, 2008.

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain commercial and real estate loans. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status. It is the Bank s policy to have any restructured loans which are on nonaccrual status prior to being modified, remain on nonaccrual status for approximately six months before management considers its return to accrual status. If the restructured loan is not on nonaccrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status.

Potential problem commercial loans are those, which are not included in nonaccrual or non-performing loans and which are not considered troubled debt restructures, where known information about possible credit problems of the borrowers causes management to have concerns as to the ability of such borrowers to comply with present loan repayment terms. At both June 30, 2009 and December 31, 2008, the Bank had sixty-one and forty-five potential

problem commercial loan relationships, respectively, which are not included in nonperforming loans with an outstanding balance of \$103.6 million and \$78.7 million, respectively. At June 30, 2009 and December 31, 2008, these potential problem loans continued to perform with respect to payments. Management actively monitors these loans and strives to minimize any possible adverse impact to the Bank.

See the table below for interest income that was recognized or collected on the nonaccrual loans as of the dates indicated.

restructured loans at June 30,

2008.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower s prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Impairment is measured on a loan by loan basis for commercial, commercial real estate, and construction categories by either the present value of expected future cash flows discounted at the loan s effective interest rate, the loan s obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

At June 30, 2009, impaired loans included all commercial real estate loans and commercial and industrial loans on nonaccrual status, troubled debt restructures, and other loans that have been categorized as impaired. Total impaired loans at June 30, 2009 and December 31, 2008 were \$20.6 million and \$15.6 million, respectively. Impaired loans exclude those loans acquired from Ben Franklin accounted for under SOP 03-3, such as those that had evidence of credit deterioration as of the acquisition date.

Real estate acquired by the Bank through foreclosure proceedings or the acceptance of a deed in lieu of foreclosure is classified as OREO. When property is acquired, it is recorded at the lesser of the loan s remaining principal balance or the estimated fair value of the property acquired, less estimated costs to sell. Any loan balance in excess of the estimated fair value less estimated cost to sell on the date of transfer is charged to the allowance for loan losses on that date. All costs incurred thereafter in maintaining the property, as well as subsequent declines in fair value are charged to non-interest expense.

The Company holds five collateralized debt obligation securities (CDOs) comprised of pools of trust preferred securities issued by banks and insurance companies, which are currently deferring interest payments on certain tranches within the bonds structures including the tranches held by the Company. The bonds are anticipated to continue to defer interest until cash flows are sufficient to satisfy certain collateralization levels designed to protect more senior tranches. As a result the Company has placed the five securities on nonaccrual status and has reversed any previously accrued income related to these securities.

Allowance For Loan Losses The allowance for loan losses is maintained at a level that management considers adequate to provide for probable loan losses based upon evaluation of known and inherent risks in the loan portfolio. The allowance is increased by provisions for loan losses and by recoveries of loans previously charged-off and is reduced by loans charged-off.

While management uses available information to recognize losses on loans, future additions to the allowance may be necessary based on increases in nonperforming loans, changes in economic conditions, or for other reasons. Additionally, various regulatory agencies, as an integral part of the Bank s examination process, periodically review the allowance for loan losses for adequacy.

As of June 30, 2009, the allowance for loan losses totaled \$40.1 million, or 1.19% of total loans as compared to \$37.0 million, or 1.39% of total loans, at December 31, 2008. The increase in allowance was due to a combination of factors including changes in asset quality and organic loan growth. The decrease in the ratio of allowance to total loans was the result of the inability to carry over an allowance for loan losses associated with the acquisition in accordance with SFAS 141R. Loans obtained in connection with the acquisition have been recorded at fair value in accordance SFAS 141R. Determining the fair value of the acquired loans were considered in the determination of fair value as of the acquisition date. Based on management s analysis, management believes that the level of the allowance for loan losses at June 30, 2009 is adequate.

The following table summarizes changes in the allowance for loan losses and other selected loan data for the periods presented:

The allowance for loan losses is allocated to various loan categories as part of the Bank s process of evaluating the adequacy of the allowance for loan losses. During the quarter, allocated allowance amounts increased by approximately \$2.6 million to \$40.1 million at June 30, 2009.

The following table sets forth the allocation of the allowance for loan losses by loan category at the dates indicated. The allocation is made to each loan category using the analytical techniques and estimation methods described herein. While these amounts represent management s best estimate of the distribution of expected losses at the evaluation dates, they are

not necessarily indicative of either the categories in which actual losses may occur or the extent of such actual losses that may be recognized within each category. The total allowance is available to absorb losses from any segment of the loan portfolio.

\* does not include acquired loans accounted for under SOP 03-3 which are excluded from the allowance for loan loss.

The allowance for loan losses is allocated to loan types using both a formula-based approach applied to groups of loans and an analysis of certain individual loans for impairment. The formula-based approach has been updated, with greater emphasis on loss factors derived from actual historical portfolio loss rates which are combined with an assessment of certain qualitative factors for allocating allowance amounts to the various loan categories.

Management has identified certain qualitative risk factors which impact the inherent risk of loss within the portfolio represented by historic measures. These include: (a) market risk factors, such as the effects of economic variability on the entire portfolio, and (b) unique portfolio risk factors that are inherent characteristics of the Bank s loan portfolio. Market risk factors consist of changes to general economic and business conditions that impact the Bank s loan portfolio customer base in terms of ability to repay and that may result in changes in value of underlying collateral. Unique portfolio risk factors may include industry concentration or covariant industry concentrations, geographic concentrations or trends that impact the inherent risk of loss in the loan portfolio resulting from economic events which the Bank may not be able to fully diversify out of its portfolios.

The formula-based approach evaluates groups of loans with common characteristics, which consist of similar loan types with similar terms and conditions, to determine the allocation appropriate within each portfolio section. This

approach incorporates qualitative adjustments based upon management s assessment of various market and portfolio specific risk factors into its formula-based estimate.

The allowance for loan loss also includes a component as an addition to the amount of allowance determined to be required using the formula-based estimation techniques described herein. This component is maintained as a margin for imprecision to account for the inherent

subjectivity and imprecise nature of the analytical processes employed. Due to the imprecise nature of the loan loss estimation process and ever changing conditions, the qualitative risk attributes may not adequately capture amounts of incurred loss in the formula-based loan loss components used to determine allocations in the Bank s analysis of the adequacy of the allowance for loan losses. As noted above, this component is allocated to the various loan types.

It is management s objective to strive to minimize the amount of allowance attributable to the margin for imprecision, as the quantitative and qualitative factors, together with the results of its analysis of individual impaired loans, are the primary drivers in estimating the required allowance and the testing of its adequacy.

Amounts of allowance may also be assigned to individual loans on the basis of loan impairment. Certain loans are evaluated individually and are judged to be impaired when management believes it is probable that the Bank will not collect all of the contractual interest and principal payments as scheduled in the loan agreement. Under this method, loans are selected for evaluation based upon a change in internal risk rating, occurrence of delinquency, loan classification, loan modifications meeting the definition of a troubled debt restructure, or non-accrual status. A specific allowance amount is allocated to an individual loan when such loan has been deemed impaired and when the amount of a probable loss is able to be estimated on the basis of: (a) the present value of anticipated future cash flows or on the loan s observable fair market value, or (b) the fair value of collateral, if the loan is collateral dependent. Loans evaluated individually for impairment and the amount of specific allowance assigned to such loans totaled \$20.6 million and \$2.8 million, respectively, at June 30, 2009 and \$15.6 million and \$2.1 million respectively, at December 31, 2008. Impaired loans at June 30, 2009 exclude those loans acquired from Ben Franklin which were recorded at fair value at the date of acquisition, and for which impaired loans were recorded based upon an estimate of cash flows to be collected over the life of the loan, which requires impaired loans identified at the acquisition date to be recorded at fair value.

**Goodwill and Identifiable Intangible Assets** Goodwill and Identifiable Intangible Assets were \$144.9 million and \$125.7 million at June 30, 2009 and December 31, 2008, respectively. The increase is due to the Ben Franklin acquisition.

**Securities** Securities increased by \$38.6 million, or 6.1%, during the quarter ended June 30, 2009 as compared to December 31, 2008. The increase was primarily attributable to the acquisition. The ratio of securities to total assets as of June 30, 2009 was 15%, compared to 18% at December 31, 2008.

The Company continually reviews investment securities for the presence of OTTI, taking into consideration current market conditions, extent and nature of change in fair value, issuer rating changes and trends, the credit worthiness of the obligator of the security, volatility of earnings, current analysts evaluations, the Company s intent to sell the security or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term other-than-temporary is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment.

Declines in the fair value of non-trading securities below their amortized cost basis that are deemed to be OTTI are written down to fair value. For those securities within the scope of EITF 99-20, management determines whether the decline in fair value is associated with an anticipated reduction in expected future cash flows or whether it is a result of change in prevailing interest rates, lack of liquidity or some other market factors as noted above. The Company assesses whether a credit loss exists by utilizing the present value of management s best estimate of expected future cash flows. In essence, to the extent amortized cost of an individual security is not supported by the estimated future cash flows, the OTTI is deemed to be related to credit loss. Any portion of a decline in value associated with credit loss will be recognized in income with the remaining non-credit related component being recognized in OCI. The Company deemed certain pooled trust preferred securities and one private collateralized mortgage backed security to be OTTI during the second quarter of 2009, and accordingly recorded OTTI of \$2.2 million. The Company determined that \$1.7 million was credit related and was therefore charged to non-interest income, with the remainder of the impairment being recorded through OCI. Further analysis of the Company s OTTI can be found in Note 4 Securities within *Condensed Notes to Unaudited Consolidated Financial Statements*.

**Federal Home Loan Bank Stock** The Company held an investment in Federal Home Loan Bank Boston (FHLBB) of \$36.4 million and \$24.6 million at June 30, 2009 and December 31, 2008, respectively. The FHLBB is a cooperative that provides services to its member banking institutions. The primary reason for joining the FHLBB was to obtain funding from the FHLBB. The purchase of stock in the FHLBB is a requirement for a member to gain access to funding. The Company purchases FHLBB stock proportional to the volume of funding received and views the purchases as a necessary long-term investment for the purposes of balance sheet liquidity and not for investment return.

In February 2009 the FHLBB announced that it has indefinitely suspended its dividend payment beginning in the first quarter of 2009, and will continue the moratorium, put into effect during the fourth quarter of 2008, on all excess stock repurchases in an effort to help preserve capital. In addition, the FHLBB reported a net loss for the year ended December 31, 2008 and for the three months ended March 31, 2009. These factors were considered by the Company s management when determining if an other-than-temporary impairments exists with respect to the Company s investment in FHLBB. The Company also reviewed recent public filings, rating agency s analysis which showed high ratings, capital position which exceeds all required capital levels, and other factors. As a result of the Company s review for OTTI, management deemed the investment in the FHLBB stock not to be OTTI as of June 30, 2009 and it will continue to be monitored closely. There can be no assurance as to the outcome of management s future evaluation of the Company s investment in the FHLBB.

**Deposits** Total deposits of \$3.3 billion increased 28.9% at June 30, 2009 compared to \$2.6 billion at December 31, 2008. The Company acquired deposits of \$701.4 as a result of the Ben Franklin acquisition. As shown in the table below, excluding the impact of the acquisition, there was organic growth of \$44.5 million, which is generally due to customers retaining additional balances in their accounts in light of a turbulent stock market, offset by reductions in the time deposit category to manage the Company s cost of funds.

# Table 7 Effect of Benjamin Franklin Bancorp. Acquisition on Deposits

**Borrowings** Total borrowings decreased \$27.4 million, or 3.9%, from December 31, 2008 to \$667.9 million at June 30, 2009.

**Stockholders Equity** Stockholders equity as of June 30, 2009 totaled \$397.6 million, as compared to \$305.3 million at December 31, 2008. The increase in equity is primarily due to the Ben Franklin acquisition. **RESULTS OF OPERATIONS** 

**Summary of Results of Operations** The Company s results of operations are largely dependent on net interest income, which is the difference between the interest earned on loans, short term investments, and securities and the interest paid on deposits and borrowings. The results of operations are also affected by the level of income/fees from loans, deposits, mortgage banking, and wealth management activities, as well as operating expenses, the provision for loan losses, the impact of federal and state income taxes, and the relative levels of interest rates and economic activity.

The Company reported net income of \$660,000, a \$5.2 million, or an 88.7% decrease, for the second quarter of 2009 as compared to the second quarter of 2008. Net loss available to the common shareholder was \$3.9 million, which includes preferred stock dividends recorded during the second quarter. There was \$4.5 million of preferred stock dividends recorded during the second quarter of 2009. On a diluted earnings per share basis the Company reported a loss of \$0.19 for the three months ended June 30, 2009, compared to earnings of \$0.36 for the three months ended June 30, 2008. The Company reported net income of \$7.0 million, a \$5.1 million, or a 41.9% decrease, for the six months ended June 30, 2009 as compared to the same period in 2008. Net income available to the common shareholder was \$1.3 million, which includes preferred stock dividends recorded for the six months ended June 30, 2009. There were no preferred stock dividends recorded during the first six months of 2008 as the Company did not have preferred stock in that period. Diluted earnings per share were \$0.07 for the six months ended June 30, 2009, compared to \$0.79 for the six months ended June 30, 2009.

**Net Interest Income** The amount of net interest income is affected by changes in interest rates and by the volume and mix of interest earning assets and interest bearing liabilities.

On a fully tax equivalent basis, net interest income for the second quarter of 2009 increased \$9.1 million, or 30.3%, to \$39.3 million, as compared to the second quarter of 2008. The Company s net interest margin was 3.88% for the quarter ended June 30, 2009 as compared to 4.01% for the quarter ended June 30, 2008. The Company s interest rate spread (the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities) was 3.58% for the second quarter of 2009 and 2008.

The yield on earning assets was 5.23% for the quarter ending June 30, 2009, compared with 5.93% in the same quarter ending in 2008. The average balance of securities has increased by \$202.1 million, or 43.4%, as compared with the prior year, while the yield on securities has decreased 42 basis points to 4.65%. The average balance of loans increased by \$750.1 million, or 29.4%, and the yield on loans decreased by 60 basis points to 5.48% for the second quarter of 2009 compared to 6.08% for the second quarter in 2008. The primary reason for these increases is the Ben Franklin acquisition.

For the three months ending June 30, 2009 the cost of funds decreased 55 basis points to 1.37% as compared to the same period in 2008 and the average balance of interest-bearing liabilities increased by \$862.2 million, or 35.0%. The average cost of these interest bearing liabilities decreased to 1.65% for the quarter ending June 30, 2009 as compared to 2.35% in the same period in 2008. The primary reason for these decreases is the active management of deposit costs.

The following tables present the Company s daily average balances, net interest income, interest rate spread, and net interest margin for the three and six months ending June 30, 2009 and June 30, 2008. For purposes of the table and the following discussion, income from interest-earning assets and net interest income are presented on a fully-taxable equivalent basis by adjusting income and yields earned on tax-exempt interest received on securities and loans, to make them equivalent to income and yields on fully-taxable earning assets. The fully-taxable equivalent was calculated assuming a federal income tax rate of 35%.

present interest income and yield on a fully tax-equivalent basis is \$531 and \$741 for the six months ended June 30, 2009 and 2008, respectively. Also, non-accrual loans have been included in the average loan category; however, unpaid interest on non-accrual					

loans has not been included for purposes of determining interest income.

(3) Interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities. Net interest margin represents annualized net interest income as a percent of average interest-earning assets.

The following table presents certain information on a fully tax-equivalent basis regarding changes in the Company s interest income and interest expense for the periods indicated. For each category of interest-earning assets and interest-bearing liabilities, information is provided with respect to changes attributable to: (1) changes in rate (change in rate multiplied by old volume), (2) changes in volume (change in volume multiplied by old rate), and (3) changes in volume/rate (change in volume multiplied by change in rate) which is allocated to the change due to rate column.

(1) The changes for each category of interest income and expense are divided between the portion of change attributable to the variance in volume and the portion of the change attributable to the variances in rate for that category. The unallocated change in rate or volume variance has been allocated to the rate variances.

(2) The total

amount of the adjustment to present income and yield on a fully tax-equivalent basis is \$249 and \$367 for the three months ended June 30, 2009 and 2008, respectively and \$531 and \$741 for the six months ended June 30, 2009 and 2008 respectively.

(3) Loans include portfolio loans, loans held for sale and nonperforming loans; however unpaid interest on nonaccrual loans has not been included for purposes of determining interest income.

**Provision For Loan Losses** The provision for loan losses represents the charge to expense that is required to maintain an adequate level of allowance for loan losses. Management s periodic evaluation of the adequacy of the allowance considers past loan loss experience, known and inherent risks in the loan portfolio, adverse situations which may affect the borrowers ability to repay, the estimated value of the underlying collateral, if any, and current economic conditions. Substantial portions of the Bank s loans are secured by real estate in Massachusetts. Accordingly, the ultimate collectibility of a substantial portion of the Bank s loan portfolio is susceptible to changes in property values within the state.

The provision for loan losses increased to \$4.5 million and \$8.5 million for the three and six months ended June 30, 2009, respectively, compared with \$1.9 million and 3.2 million reported in the comparable year-ago period, respectively. The ratio of the allowance for loan losses to total loans was 1.19%, at June 30, 2009 compared to 1.39%, at December 31, 2008

and 1.29% at June 30, 2008, the decrease resulted from the acquisition and the inability to carryover the allowance for loan losses as part of the acquisition.

Loans obtained in connection with the acquisition have been recorded at fair value in accordance with SFAS 141R, which prohibits the carry over of the allowance for credit losses. The Company s evaluation of loans with evidence of loan deterioration as of the acquisition date resulting in a non accretable difference of \$806,000 which represents the loans contractually required payments receivable in excess of the amounts of its cash flows expected to be collected. Determining the fair value of the acquired loans required estimating cash flows expected to be collected on the loans. Estimated credit losses on all acquired loans were considered in the determination of fair value as of the acquisition date.

The increase in the amount of the provision for loan losses is the result of a combination of factors including: shifting growth rates among various components of the Bank s loan portfolio with differing facets of risk; higher levels of net loan charge-offs in early 2009; and changing expectations with respect to the economic environment, increases in specific allocations for impaired loans, and the level of loan delinquencies and non-performing loans. While the total loan portfolio increased by 31.2% for the quarter ended June 30, 2009, as compared to the same period in 2008, growth among the commercial components of the loan portfolio outpaced growth among those consumer components, which exhibit different credit risk characteristics.

Regional and local general economic conditions continued to deteriorate during the first half of 2009, as measured in terms of employment levels, statewide economic activity, and current and leading indicators of economic confidence. Additionally, continued weakening market fundamentals were observed in residential real estate markets. These observations, when combined with financial market fallout from the sub prime mortgage crisis, have raised concern that general economic conditions may remain weak through the remainder of 2009.

Management s periodic evaluation of the adequacy of the allowance for loan losses considers past loan loss experience, known and inherent risks in the loan portfolio, adverse situations which may affect the borrowers ability to repay, the estimated value of the underlying collateral, if any, and current and prospective economic conditions. Substantial portions of the Bank s loans are secured by real estate in Massachusetts. Accordingly, the ultimate collectibility of a substantial portion of the Bank s loan portfolio is susceptible to changes in property values within the state.

**Non-Interest Income** Non-interest income increased by \$5.3 million, or 67.3%, and \$7.2 million, or 43.6%, during the three and six months ended June 30, 2009, respectively, as compared to the same period in the prior year. The change in non-interest income is attributable to the following.

Service charges on deposit accounts increased by \$295,000, or 7.4%, and \$307,000, or 4.0%, during the three and six months ended June 30, 2009, respectively.

Wealth management revenue decreased by \$404,000, or 13.0%, and \$750,000, or 13.0%. Assets under management at June 30, 2009 were \$1.2 billion, a decrease of \$99.4 million, or 8.0% as compared to the same period a year ago. The decrease is due to the

general declines in the stock market in these comparable periods, offset by positive net new client asset flows.

Mortgage banking income increased by \$1.0 million, or 107.9% and \$1.1 million, or 52.1%, as a result of increased sales activity and increased originations due to low interest rates. The balance of the mortgage servicing asset was \$2.7 million and loans serviced amounted to \$380.9 million as of June 30, 2009, as compared to a mortgage servicing asset balance of \$2.0 million and loans serviced amounting to \$259.3 million at June 30, 2008.

The Company recorded a loss of \$25,000 and a gain of \$1.4 million on the sale of securities, during the three and six months ended June 30, 2009, respectively. There was a net loss on the sale of securities of \$609,000 during the six months ended June 30, 2008.

The Company recorded a \$3.8 million gain resulting from the termination of an interest rate swap, during the quarter ended June 30, 2009, mainly due to the repayment of certain borrowings and their associated hedge positions as a result of strong balance sheet liquidity. There were no terminations of interest rate swaps during the period ended June 30, 2008

The Company deemed certain pooled trust preferred securities and one private collateralized mortgage backed security to be OTTI during the second quarter of 2009. The Company recorded a total impairment charge of \$2.2 million of which \$1.7 million was determined to be credit related and accordingly charged through earnings. The remainder of the impairment was recorded through OCI. The Company recorded no OTTI during the first quarter of 2009.

Other non-interest income increased by \$638,000, or 76.1% and \$966,000, or 55.5%, for the three and six months ended June 30, 2009, as compared to the same period in 2008.

**Non-Interest Expense** Non-interest expense increased by \$18.5 million, or 65.9% and \$22.8 million, or 43.7%, for the three and six months ended June 30, 2009, as compared to the same period in 2008.

Salaries and employee benefits increased by \$2.2 million, or 14.7% and \$2.9 million, or 10.0%. The increase in salaries and benefits is attributable the Ben Franklin acquisition, commissions, incentive programs, and medical insurance increases.

Occupancy and equipment expense increased by \$901,000, or 27.9% and \$1.7 million, or 27.8%. The increase is mainly due to an increase in rent and maintenance expense relating to the Ben Franklin acquisition.

Data processing and facilities management expense increased by \$183,000, or 12.9% and \$315,000, or 11.7%.

The Company recorded merger and acquisition expenses of \$10.8 million and \$12.4 million, associated with the acquisition of Ben Franklin for the three and six months ended June 30, 2009, consistent with new accounting standards effective January 1, 2009 regarding business combinations.

The FDIC Insurance assessment increased by \$3.8 million and \$4.3 million, mainly due to the special assessment estimated to be \$2.1 million imposed to replenish the deposit insurance fund.

During the six months ended June 30, 2008, the Company recognized a \$418,000 recovery on a 2002 WorldCom bond loss.

Other non-interest expense increased by \$954,000, or 11.9% and \$1.9 million, or 14.2%. The increase is in part attributable to increases in advertising, amortization of intangibles, legal fees, leasehold improvement write-offs, and other real estate owned valuation mark downs and the Ben Franklin acquisition.

**Income Taxes** For the quarters ending June 30, 2009 and June 30, 2008, the Company recorded combined federal and state income tax provisions of \$639,000 and \$2.0 million, respectively. The effective tax rate is positively impacted by the Company s New Market Tax Credit allocation, a schedule showing the expected tax credit recognition by year is shown in the table below.

<b>Table 11</b>	New Markets Tax Credit Recognition Schedule

Additionally, on May 27, 2009 the United States Secretary of the Treasury announced that Rockland Trust Community Development Corporation, a wholly-owned, second-tier subsidiary of the Company, was awarded \$50 million in tax credit allocation authority under the federal New Markets Tax Credit Program. The Company will be eligible to receive tax credits over a seven year period totaling 39% of its award, or \$19.5 million, as it begins to invest capital into the subsidiary which will lend to qualifying businesses in low income communities, which the Company anticipates investing in the later half of 2009.

**Return on Average Assets and Equity** The annualized consolidated returns on average common equity and average assets for the three months ended June 30, 2009 were (3.95%) and (0.35%), respectively, compared to 7.67% and 0.70%, reported for the same period last year. The annualized consolidated returns on average common equity and average assets for the six months ended June 30, 2009 were 0.76% and 0.07%, respectively, compared to 8.73% and 0.78%, reported for the same period last year.

#### **Asset/Liability Management**

The Bank s asset/liability management process monitors and manages, among other things, the interest rate sensitivity of the balance sheet, the composition of the securities portfolio, funding needs and sources, and the liquidity position. All of these factors, as well as projected asset growth, current and potential pricing actions, competitive influences, national monetary and fiscal policy, and the regional economic environment are considered in the asset/liability management process.

The Asset/Liability Management Committee ( ALCO ), whose members are comprised of the Bank s senior management, develops procedures consistent with policies established by the Board of Directors, which monitor and coordinate the Bank s interest rate sensitivity and the sources, uses, and pricing of funds. Interest rate sensitivity refers to the Bank s exposure to fluctuations in interest rates and its effect on earnings. If assets and liabilities do not re-price simultaneously and in equal volume, the potential for interest rate exposure exists. It is management s objective to maintain stability in the growth of net interest income through the maintenance of an appropriate mix of interest-earning assets and interest-bearing liabilities and, when necessary, within prudent limits, through the use of off-balance sheet hedging instruments such as interest rate swaps, floors and caps. The Committee employs simulation analyses in an attempt to quantify, evaluate, and manage the impact of changes in interest rates on the Bank s net interest income. In addition, the Bank engages an independent consultant to render advice with respect to asset and liability management strategy.

The Bank is careful to increase deposits without adversely impacting the weighted average cost of those funds. Accordingly, management has implemented funding strategies that include FHLB advances and repurchase agreement lines. These non-deposit funds are also viewed as a contingent source of liquidity and, when profitable lending and investment opportunities exist, access to such funds provides a means to leverage the balance sheet.

The Bank utilizes interest rate swap agreements and interest rates caps and floors as hedging instruments against interest rate risk. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount for a predetermined period of time from a second party. Interest rate caps and floors are agreements whereby one party agrees to pay a floating rate of interest on a notional principal amount for a predetermined period of time to a second party if certain market interest rate thresholds are realized. The amounts relating to the notional principal amount are not actually exchanged.

At June 30, 2009 and December 31, 2008 the Bank was a party to interest rate swaps, designated as cash flow hedges. The purpose of these derivative instruments are to hedge the variability in the cash outflows of variable rate borrowings attributable to changes in interest rate effectively converting the borrowings to fixed rate. The table below shows interest rate derivatives the Bank held as of June 30, 2009 and December 31, 2008:

borrowings. This resulted in a need to exit two interest rate swaps. On June 9, 2009, the Company exited two swaps totaling \$50.0 million in notional value of LIBOR based hedging three month revolving FHLB borrowings. On the date of termination, a final effectiveness test based on the Company s best estimate of the future forecasted 90 day FHLB advances was performed. Based on an internal assessment the Company concluded that \$25 million of the hedged FHLB advances were probable not to occur. The Company then used an estimate of future borrowings to build the new hypothetical derivatives to be used in the final effectiveness tests.

As a result of this final effectiveness test, the first terminated swap remained 100% effective through the date of termination. The cumulative balance of \$1.4 million in OCI will be amortized over the remaining life of the swap transaction to the extent the hedged forecasted transactions remain probable, which is in accordance with SFAS No. 133 Accounting for Derivative Instruments and Hedging Activities (SFAS 133).

The second swap failed the final effectiveness test as a result of the Company s assessment that they would no longer maintain the hedged transactions through maturity. The hedge was subsequently marked to market through earnings for the second quarter through the date of termination. All amounts deferred in OCI were immediately reclassified to earnings on June 9, 2009, in accordance with SFAS 133. The mark to market adjustment and reclassification of OCI resulted in a gain of \$3.8 million, pre-tax, recognized in non interest income, in the second quarter of 2009.

In March 2008, the Company exited a \$35.0 million notional value LIBOR based interest rate swap hedging 3 month revolving FHLB advances with Bear Stearns and replaced it with a \$35.0 million notional value LIBOR based interest rate swap hedging 3 month revolving FHLB advances with Citigroup Financial. Upon exiting the swap, a \$1.2 million loss remained in OCI, net of tax, which is being amortized into interest expense on borrowings over the original maturity of the swap (until January 2010.)

Associated net amortization on these swaps of \$144,000 and \$299,000 was recognized in interest expense on borrowings in the three and six months ended June 30, 2009.

The maximum length of time over which the entity is hedging its exposure to the variability in future cash flows for forecasted transactions excluding those forecasted transactions related to the payment of variable interest on existing financial instrument is ten years.

*Customer-Related Positions* Interest rate derivatives, primarily interest-rate swaps, offered to commercial borrowers through the Bank s hedging program are designated as speculative under SFAS 133. However, the Bank believes that its exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an identical dealer transaction. The commercial customer hedging program allows the Bank to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap. For the quarter ended June 30, 2009, the Bank had a total notional amount of \$50.2 million of interest rate swap agreements with commercial borrowers and an equal notional amount of dealer transactions. It is anticipated that over time customer interest rate derivatives will reduce the interest rate risk inherent in the longer-term, fixed-rate commercial business and real estate loans. The customer-related positions summarized in Table 12 include the thirteen customer and offsetting dealer transactions.

The table below shows the fair value amounts of derivative instruments designated as hedges and their position in the balance sheet. The Bank does not offset fair value amounts recognized for derivative instruments.

# Table 13Fair Values of Derivative Instruments<br/>(In thousands)

 (a) See above for additional information on the Company s purpose for entering into derivatives not designated as hedging instruments and its overall risk management strategies.

The Company expects approximately \$2.1 million to be reclassed to earnings from OCI in the next twelve months. Additionally, the Company enters into commitments to fund residential mortgage loans with the intention of selling them in the secondary markets. The Company also enters into forward sales agreements for certain funded loans and loan commitments to protect against changes in interest rates. The Company records unfunded commitments and forward sales agreements at fair value with changes in fair value as a component of Mortgage Banking Income.

The following table set forth the fair value of residential mortgage loan commitments and forward sales agreements at the periods indicated:

# Table 15 Fair Value of Residential Mortgage Loan Commitments and Forward Sales Agreements

Residential Mortgage Loan Commitments Forward Sales Agreements			\$	

Changes in these fair values are recorded as a component of mortgage banking income.

**Market Risk** Market risk is the sensitivity of income to changes in interest rates, foreign exchange rates, commodity prices and other market-driven rates or prices. The Company has no trading operations, with the exception of accounts managed by the Company s investment management group within a trust to fund non-qualified executive retirement obligations. Additionally, the Company has a \$3.2 million equities portfolio at June 30, 2009, of which \$1.2 million was acquired as part of the Slades transaction and \$2.0 was acquired as part of the Ben Franklin transaction. The equity positions are comprised of a closed-end management investment fund whose objective is to invest in geographically specific private placement debt securities designed to support underlying economic activities such as community development and affordable housing.

Interest-rate risk is the most significant non-credit risk to which the Company is exposed. Interest-rate risk is the sensitivity of income to changes in interest rates. Changes in interest rates, as well as fluctuations in the level and duration of assets and liabilities, affect net interest income, the Company s primary source of revenue. Interest-rate risk arises directly from the Company s core banking activities. In addition to directly impacting net interest income, changes in the level of interest rates can also affect the amount of loans originated, the timing of cash flows on loans and securities and the fair value of securities and derivatives as well as other affects.

The primary goal of interest-rate risk management is to control this risk within limits approved by the Board. These limits reflect the Company s tolerance for interest-rate risk over both short-term and long-term horizons. The Company attempts to control interest-rate risk by identifying, quantifying and, where appropriate, hedging its exposure. The Company manages its interest-rate exposure using a combination of on and off-balance sheet instruments, primarily fixed rate portfolio securities, and interest rate swaps.

The Company quantifies its interest-rate exposures using net interest income simulation models, as well as simpler gap analysis, and Economic Value of Equity analysis. Key

assumptions in these simulation analyses relate to behavior of interest rates and behavior of the Company s deposit and loan customers. The most material assumptions relate to the prepayment of mortgage assets (including mortgage loans and mortgage-backed securities) and the life and sensitivity of nonmaturity deposits (e.g. DDA, NOW, savings and money market). The risk of prepayment tends to increase when interest rates fall. Since future prepayment behavior of loan customers is uncertain, the resulting interest rate sensitivity of loan assets cannot be determined exactly.

To mitigate these uncertainties, the Company gives careful attention to its assumptions. In the case of prepayment of mortgage assets, assumptions are derived from published dealer median prepayment estimates for comparable mortgage loans.

The Company manages the interest-rate risk inherent in its mortgage banking operations by entering into forward sales contracts. An increase in market interest rates between the time the Company commits to terms on a loan and the time the Company ultimately sells the loan in the secondary market will have the effect of reducing the gain (or increasing the loss) the Company records on the sale. The Company attempts to mitigate this risk by entering into forward sales commitments in amounts sufficient to cover all closed loans and a majority of rate-locked loan commitments.

The Company s policy on interest-rate risk simulation specifies that if interest rates were to shift gradually up or down 200 basis points, estimated net interest income for the subsequent 12 months should decline by less than 6.0%. Given the unusually low rate environment at June 30, 2009 the Company assumed a 100 basis point decline in interest rates, for certain points of the yield curve, in addition to the normal 200 basis point increase in rates. The Company was well within policy limits at June 30, 2009 and 2008.

The following table sets forth the estimated effects on the Company s net interest income over a 12-month period following the indicated dates in the event of the indicated increases or decreases in market interest rates:

# Table 16 Interest Rate Sensitivity

	200 Basis Point	100 Basis Point	
	Rate Increase	<b>Rate Decrease</b>	
June 30, 2009	(3.0%)	0.3%	
June 30, 2008	(3.3%)	0.0%	

The results implied in the above table indicate estimated changes in simulated net interest income for the subsequent 12 months assuming a gradual shift up in market rates of 200 basis points or down in market rates of 100 basis points across the entire yield curve. It should be emphasized, however, that the results are dependent on material assumptions such as those discussed above. For instance, asymmetrical rate behavior can have a material impact on the simulation results. If competition for deposits forced the Company to raise rates on those liabilities quicker than is assumed in the simulation analysis without a corresponding increase in asset yields, net interest income may be negatively impacted. Alternatively, if the

Company is able to lag increases in deposit rates as loans re-price upward net interest income would be positively impacted.

The most significant factors affecting market risk exposure of the Company s net interest income during the second quarter of 2009 were (i) the shape of the U.S. Government securities and interest rate swap yield curve, (ii) the level of U.S. prime interest rate and LIBOR rates, and (iii) the level of rates paid on deposit accounts.

The Company s earnings are not directly and materially impacted by movements in foreign currency rates or commodity prices. Movements in equity prices may have an indirect but modest impact on earnings by affecting the volume of activity or the amount of fees from investment-related business lines, and directly by affecting the value at the Company s trading portfolio. Also, declines in the value of certain debt securities may have an impact on earnings if the decline is determined to be other-than-temporary and the security is considered impaired .

The Company, as a separately incorporated bank holding company, has no significant operations other than serving as the sole stockholder of the Bank. Its commitments and debt service requirement at June, 2009 consist of \$61.9 million in junior subordinated debentures, including accrued interest.

The Company actively manages its liquidity position under the direction of the Asset/Liability Management Committee. Periodic review under prescribed policies and procedures is intended to ensure that the Company will maintain adequate levels of available funds. At June 30, 2009, the Company s liquidity position was above policy guidelines. Management believes that the Bank has adequate liquidity available to respond to current and anticipated liquidity demands.

**Capital Resources and Dividends** The Federal Reserve Board, the Federal Deposit Insurance Corporation, and other regulatory agencies have established capital guidelines for banks and bank holding companies. Risk-based capital guidelines issued by the federal regulatory agencies require banks to meet a minimum Tier 1 risk-based capital ratio of 4.0% and a total risk-based capital ratio of 8.0%. A minimum requirement of 4.0% Tier 1 leverage capital is also mandated.

The Company s and the Bank s actual capital amounts and ratios are also presented in the following table.

<sup>62</sup>

On January 9, 2009, the Company raised approximately \$78.2 million through the issuance of preferred stock and warrants related to its participation in the U.S. Treasury s Capital Purchase Program. All of the proceeds from this issuance were treated as Tier 1 capital for regulatory purposes. The related preferred dividend in the second quarter amounted to \$4.5 million.

# Edgar Filing: INDEPENDENT BANK CORP - Form 10-Q

Subsequent to the decision to participate in the Capital Purchase Program, management and the Board of Directors repaid, with regulatory approval, the capital to the U.S. Treasury on April 22, 2009. The Company and the Bank remain well capitalized following this event. The Company also repurchased a common stock warrant issued to the Treasury for \$2.2 million, the cost of which, is recorded as a reduction in capital, in accordance with Generally Accepted Accounting Principles.

On June 18, 2009 the Company s Board of Directors declared a cash dividend of \$0.18 per share, to stockholders of record as of the close of business on June 29, 2009. This dividend was paid on July 10, 2009. On an annualized basis, the dividend payout ratio amounted to 114.97%, based on net income available to the common shareholder of the trailing four quarters earnings.

**Off-Balance Sheet Arrangements** There have been no material changes in off-balance sheet financial instruments during the second quarter of 2009. Please refer to the 2008 Form 10-K for a complete table of contractual obligations, commitments, contingencies and off-balance sheet financial instruments.

**Contractual Obligations, Commitments, and Contingencies** There have been no material changes in commitments, or contingencies during the second quarter of 2009. There

have been no material changes in contractual obligations. Please refer to the 2008 Form 10-K for a complete table of contractual obligations, commitments, contingencies, and off-balance sheet financial instruments.

# Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information required by this Item 3 is included in Item 2 of Part I of this Form 10-Q, entitled Management s Discussion and Analysis of Financial Condition and Results of Operations.

# Item 4. Controls and Procedures

**Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures**. The Company carried out an evaluation, under the supervision and with the participation of the Company s management, including the Company s Chief Executive Officer along with the Company s Chief Financial Officer, of the effectiveness of the design and operation of the Company s disclosure controls and procedures, as such term is defined under Rule 13a-15(e) promulgated under the Exchange Act. Based upon that evaluation, the Company s Chief Executive Officer along with the Company s Chief Financial Officer concluded that the Company s disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

**Changes in Internal Controls over Financial Reporting**. There were no changes in our internal control over financial reporting that occurred during the second quarter of 2009 that have materially affected or are reasonably likely to materially affect the Company s internal controls over financial reporting.

# Item 4T. Controls and Procedures N/A PART II. OTHER INFORMATION Item 1. Legal Proceedings

The Company is not involved in any legal proceedings other than routine legal proceedings occurring in the ordinary course of business. Management believes that those routine legal proceedings involve, in the aggregate, amounts that are immaterial to the Company s financial condition and results of operations.

# Item 1A. Risk Factors

As of the date of this report, there have been no material changes with regard to the Risk Factors disclosed in Item 1A of our 2008 Annual Report on Form 10-K, which are incorporated herein by reference.

# Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) (c) Not applicable.

## Item 3. Defaults Upon Senior Securities None

## Item 4. Submission of Matters to a Vote of Security Holders
