**BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**

Note 1 Summary of Significant Accounting Policies

Basis of Statement Presentation

The accompanying unaudited consolidated interim financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP) with the instructions to Form 10-Q. Accordingly, certain information and disclosures required by accounting principles generally accepted in the United States of America for complete financial statements are not included herein. The interim financial statements should be read in conjunction with the financial statements of Birmingham Bloomfield Bancshares, Inc. (the Corporation) and the notes thereto included in the Corporation s annual report on Form 10-K for the year ended December 31, 2009.

All adjustments, consisting of normal recurring adjustments, which in the opinion of management are necessary for a fair presentation of financial position, results of operations, and cash flows, have been made. The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ended December 31, 2010.

Certain amounts in the prior period financial statements have been reclassified to conform to the current period presentation.

Principles of Consolidation

The consolidated financial statements include the accounts of the Corporation and its wholly-owned subsidiary the Bank of Birmingham (the Bank). All significant intercompany balances and transactions have been eliminated in consolidation.

Recent Accounting Developments

Accounting Standards Update (ASU) No. 2010-20, Receivables (Topic 310): Disclosure about Credit Quality of Financing Receivables and the Allowance For Credit Losses The objective of this guidance is for an entity to provide disclosures that facilitate the evaluation of the nature of credit risk inherent in the entity s portfolio of financing receivables; how that risk is analyzed and assessed in arriving at the allowance for doubtful accounts and; the changes and reasons for those changes in the allowance for credit losses. To achieve those objectives, disclosures on a disaggregated basis shall be provided on two defined levels: (1) portfolio segment; and (2) class of financing receivable. This guidance makes changes to existing disclosure requirements and includes additional disclosure requirements relating to financing receivables. Short-term accounts receivable, receivables measured at fair value or lower of cost or fair value and debt securities are exempt from this guidance. The guidance pertaining to disclosures as of the end of a reporting period is effective for the Corporation for interim and annual reporting periods on or after December 15, 2010. The guidance pertaining to disclosures about activity that occurs during a reporting period is effective for the Corporation for interim and annual reporting periods beginning on or after December 15, 2010. The provisions of this guidance are not expected to have a significant impact on the Corporation s consolidated financial condition, results of operations or liquidity.

BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 2 Fair Value Accounting**Valuation Hierarchy**

FASB ASC 820 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows.

Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets which the Corporation can participate.

Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument.

Level 3 inputs to the valuation methodology are unobservable and significant to the fair value measurement, and include inputs that are available in situations where there is little, if any, market activity for the related asset or liability.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

The following is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Assets*Securities available for sale*

All of the Corporation's securities available for sale are classified within Level 2 of the valuation hierarchy as quoted prices for similar assets are available in an active market.

The following table presents the financial instruments carried at fair value as of September 30, 2010, on the Consolidated Balance Sheet and by FASB ASC 820 valuation hierarchy (as described above):

Assets measured at fair value on a recurring basis as of September 30, 2010 (000s omitted):

	Quoted Prices in Active Markets	Significant Other	Significant Unobservable	Balance at
(unaudited)	for Identical Assets Level 1	Observable Inputs Level 2	Inputs Level 3	September 30,2010
Securities available for sale	\$	\$ 3,964	\$	\$ 3,964

Table of Contents

BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 2 Fair Value Accounting -continued

The Corporation has assets that under certain conditions are subject to measurement at fair value on a nonrecurring basis. The fair value of impaired loans is based on the present value of expected future cash flows using management's assumptions about future payment ability, timing of expected cash flows and the estimated realizable value of collateral (typically based on appraisals). There were \$0.6 million in impaired loans at September 30, 2010 and \$0 at September 30, 2009.

Note 3 Securities

The amortized cost and estimated fair value of securities, with gross unrealized gains and losses, follows (000s omitted):

(unaudited)	Amortized	Gross unrealized	Gross unrealized	Estimated
September 30, 2010	cost	gains	losses	fair value
U.S. Government agency securities	\$ 1,870	\$ 20	\$	\$ 1,890

BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 3 Securities -continued

As of September 30, 2010 and December 31, 2009, all securities are available for sale, with the exception of Federal Home Loan Bank stock which is restricted in that it can only be sold back to the Federal Home Loan Bank. The carrying value of the stock approximates its fair value. The securities held in our portfolio experienced no rating changes during the quarter and remain at AAA, except for two securities, a municipal holding which is Aa3 and a corporate debt security at Aa2. Both were based on ratings by Moody. At September 30, 2010 and December 31, 2009, securities were pledged to secure public deposits from the State of Michigan. The total securities pledged were \$1.85 million at September 30, 2010 and \$1.45 million at December 31, 2009, respectively.

The amortized cost and estimated fair value of securities at September 30, 2010, by contractual maturity are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations without call or prepayment penalties. The contractual maturities of securities are as follows (000s omitted):

(unaudited)	Amortized Cost	Estimated fair value
Due in one year or less	\$ 1,200	\$ 1,208
Due in one year through five years	851	880
Due in five years through ten years	718	726
Due after ten years		
Subtotal	\$ 2,769	\$ 2,814
Mortgage backed securities	882	988
FHLB Stock	162	162
Total	\$ 3,813	\$ 3,964

Note 4 Loans

A summary of the balances of portfolio loans are as follows (000s omitted):

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 6 Leases and Commitments

The Corporation has entered into a lease agreement for its main office. Payments began in February 2005 and the initial term of the lease expires in October 2015. In October 2007, the Corporation exercised its first renewal option on the property which expires in October 2025. The main office lease has one additional ten year renewal option. The Corporation also entered into a lease agreement for its branch office in Bloomfield Township which provided for lease payments to begin in March 2006 and expire February 2016. The Bloomfield Township branch office lease was terminated effective January 18, 2010 pursuant to an agreement with the leaseholder. The termination agreement provided for a one-time payment of \$110,000 to the leaseholder to end the lease which was expensed in 2009 and paid in 2010. In January 2010, a six month lease agreement was signed for office space to house a business development officer at a lease rate of \$900 per month. In July 2010, a six month lease was signed for additional office space in the building next to the main office at a rate of \$700 per month. Rent expense under all these agreements was \$59,000 and \$70,000 for the quarters ended September 30, 2010 and September 30, 2009. Rent expense under these agreements was \$185,000 and \$139,000 for the nine month periods ended September 30, 2010 and 2009, respectively. The following is a schedule of future minimum rental payments under operating leases on a calendar year basis (000s omitted):

2010	\$ 59
2011	230
2012	234
2013	239
2014	244
Thereafter	2,976
Total	\$ 3,982

Note 7 Fair Value of Financial Instruments

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Corporation's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. FASB ASC 825 excludes certain financial instruments and all non-financial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Corporation.

The following methods and assumptions were used by the Corporation in estimating fair value disclosures for financial instruments:

Cash and Cash Equivalents - The carrying values of cash and cash equivalents approximate fair values.

Securities - Fair values of securities are based on quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices for similar securities.

Table of Contents

BIRMINGHAM BLOOMFIELD BANCSHARES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 7 Fair Value of Financial Instruments continued

Loans Receivable - For variable-rate loans that re-price frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for other loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values of nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities - The fair values disclosed for demand deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). The carrying amounts of variable-rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Accrued Interest - The carrying value of accrued interest approximates fair value.

Other Financial Instruments - The fair value of other financial instruments, including loan commitments and unfunded letters of credit, based on discounted cash flow analyses, is not material.

The carrying values and estimated fair values of financial instruments at September 30, 2010 and December 31, 2009, are as follows (in thousands):

	(unaudited)			
	September 30, 2010		December 31, 2009	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
Financial assets:

Note 8 Minimum Regulatory Capital Requirements

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The prompt corrective action regulations provide four classifications, well capitalized, adequately capitalized, undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required. The Bank was well-capitalized as of September 30, 2010. At September 30, 2010, the Corporation qualifies for an exemption from regulatory capital requirements due to its asset size.

The Bank's actual capital amounts and ratios as of September 30, 2010 and December 31, 2009 are presented in the following table (000s omitted):

(unaudited)	Actual		For Capital		To be

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Disclosure Regarding Forward Looking Statements

This report contains forward-looking statements throughout that are based on management's beliefs, assumptions, current expectations, estimates and projections about the financial services industry, the economy, and about the Corporation and the Bank. Words such as anticipates, believes, estimates, expects, forecasts, intends, is likely, plans, projects, variations of such words and similar expressions are intended to identify such forward-looking statements. These forward-looking statements are intended to be covered by the safe-harbor provisions of the Private Securities Litigation Reform Act of 1995. These statements are not guarantees of future performance and involve certain risks, uncertainties and assumptions that are difficult to predict with regard to timing, extent, likelihood and degree of occurrence. Actual results and outcomes may materially differ from what may be expressed or forecasted in the forward-looking statements. The Corporation undertakes no obligation to update, amend, or clarify forward looking statements, whether as a result of new information, future events (whether anticipated or unanticipated), or otherwise. Future factors that could cause actual results to differ materially from the results anticipated or projected include, but are not limited to, the following: the credit risks of lending activities, including changes in the level and direction of loan delinquencies and write-offs and changes in estimates of the adequacy of the allowance for loan losses; competitive pressures among depository institutions; interest rate movements and their impact on customer behavior and net interest margin; the impact of re-pricing and competitor's pricing initiatives on loan and deposit products; the ability to adapt successfully to technological changes to meet customers' needs and development in the market place; our ability to access cost-effective funding; changes in financial markets; changes in economic conditions in general and particularly as related to the automotive and related industries in the Detroit metropolitan area; new legislation or regulatory changes, including but not limited to changes in federal and/or state tax laws or interpretations thereof by taxing authorities; changes in accounting principles, policies or guidelines; and our future acquisitions of other depository institutions or lines of business. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements. Further information concerning the Corporation and its business, including additional factors that could materially affect the Corporation's financial results, is included in its filings with the Securities and Exchange Commission.

Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

The Corporation is a Michigan corporation that was incorporated in 2004 to serve as the holding company for a Michigan state chartered bank, Bank of Birmingham ("Bank"). The Bank is a full service commercial bank headquartered in Birmingham, Michigan. The Bank serves businesses and consumers across Oakland and Macomb counties with a full range of lending, deposit and Internet banking services. Bank of Birmingham has continued to grow despite the economic downturn in the state of Michigan by lending with a strong focus on credit quality. While Oakland county is not immune to these issues, the demographics of the Birmingham-Bloomfield area somewhat lessen the impact of these economic conditions.

The Corporation received funds from the sale of its preferred stock under the U.S. Treasury's Capital Purchase Program. Proceeds received during 2009 from this sale were \$3.379 million which will be used to supplement the strong capital position of the Bank.

OPERATIONS

The Corporation's (and the Bank's) main office is located at 33583 Woodward Avenue, Birmingham, MI 48009. The building is a free-standing one story office building of approximately 8,300 square feet. The Bank also operated a branch office at 4145 West Maple Road, near the intersection of Telegraph Road in Bloomfield Township, MI, which was unprofitable and subsequently closed on January 18, 2010. The main office lease commenced in October 2005 and the Bank exercised its first renewal option thereby extending the lease to October 2025. The main office lease has an additional ten year renewal option. The office lease related to the closed Bloomfield Township branch commenced in March 2006 and was terminated effective January 2010. During January 2010, a six month short term lease was executed for office space to house one of our business development officers. During July 2010, a six month short term lease was executed for office space for the remainder of 2010. During 2009, the Corporation completed the sale of fixed rate cumulative preferred stock under the United States Treasury Capital Purchase Program. These funds provided additional capital to support growth.

The Bank will continue to focus on the lending, deposit and general banking needs in the community it serves. The Bank will investigate additional product and service offerings and will consider offering those that will be of benefit to our customers and the Bank.

FINANCIAL CONDITION

At September 30, 2010, the Corporation's total assets were \$111.3 million, an increase of \$18.6 million or 20.1% from December 31, 2009. Cash and cash equivalents increased by \$4.0 million or 51.0%. Investment securities available for sale increased \$0.2 million or 3.4% from December 31, 2009 to September 30, 2010. Loans, net of the allowance for loan losses, increased by \$14.2 million or 18.1% from December 31, 2009 to September 30, 2010. Total deposits increased by \$18.5 million or 22.7% from December 31, 2009 to September 30, 2010. Basic and diluted earnings per share for the three and nine months ended September 30, 2010 were \$0.05 per share and \$0.15 per share, respectively. Basic and diluted loss per share for the three and nine months ended September 30, 2009 were \$(0.08) per share and \$(0.52) per share, respectively.

Cash and Cash Equivalents

Cash and cash equivalents increased \$4.0 million or 51.0% to \$11.7 million at September 30, 2010 up from \$7.8 million at December 31, 2009. Federal funds sold decreased \$3.1 million or 98.4% to \$50,300 at September 30, 2010. The decrease in Federal funds sold is due to the shifting of excess funds to other correspondent bank accounts which earn somewhat higher interest rates.

Table of Contents

BIRMINGHAM BLOOMFIELD BANCSHARES, INC.

Management's Discussion and Analysis of Financial Condition and Results of Operations

Investments

Total investment securities available-for-sale increased \$0.2 million or 5.3% to \$4.0 million at September 30, 2010 up from \$3.8 million at December 31, 2009. During the nine months ended September 30, 2010, decreases in the balance were due to repayments on mortgage backed securities and six called Agency securities, three of which were called in the third quarter. The decreases were offset by purchases of five Agency securities, two municipal bonds and one corporate bond. The Corporation had no held-to-maturity securities as of September 30, 2010 or December 31, 2009.

Loans, Credit Quality and Allowance for Loan Losses

During the first nine months of 2010, loans, net of the allowance for loan losses, increased \$14.4 million or 18.3%, to \$92.9 million at September 30, 2010 up from \$78.5 million at December 31, 2009. The largest single category increase within loans, as noted in Note 4 to the financial statements, was commercial real estate which increased by \$8.0 million or 22.4% to \$43.9 million at September 30, 2010. Residential 1-4 family loans increased by \$1.9 million or 144.1% to \$3.3 million in the first nine months. Construction loans increased by \$2.2 million to \$2.7 million during the first nine months of 2010 up from \$0.5 million at December 31, 2009. Commercial non real estate loans increased as well by approximately \$1.9 million or 11.2% to \$19.1 million at September 30, 2010. Management expects further loan growth in 2010, primarily in the commercial and commercial real estate loan portfolios driven by continued business development efforts.

The allowance for loan losses was \$1.4 million or 1.51% of portfolio loans at September 30, 2010. There were no charge-offs during the three months ended September 30, 2010 while charge-offs totaled \$341,000 for the nine month period ended September 30, 2010. There were no recoveries in the current quarter, while recoveries for the nine months ended September 30, 2010 totaled \$46,000. For the three and nine month periods ended September 30, 2009, one home equity line of credit was charged-off for approximately \$18,000, with no recoveries during the period. Nonperforming loans, which consist of non-accruing loans and loans past due 90 days or more and still accruing interest, were \$199,999 at December 31, 2009. There was one nonperforming loan as of September 30, 2010 for \$25,000.

Commercial loans are reported as being in nonaccrual status if: (a) they are maintained on a cash basis because of deterioration in the financial position of the borrower, (b) payment in full of interest or principal is not expected, or (c) principal or interest has been in default for a period of 90 days or more. If it can be documented that the loan obligation is both well secured and in the process of collection, the loan may stay on accrual status. However, if the loan is not brought current before becoming 120 days past due, the loan is reported as nonaccrual. A nonaccrual asset may be restored to accrual status when none of its principal or interest is due and unpaid, when it otherwise becomes well secured, or is in the process of collection.

The primary risk element considered by management regarding each consumer and residential real estate loan is lack of timely payment. Management has a reporting system that monitors past due loans and has adopted policies to pursue its creditor's rights in order to preserve the Bank's position. The primary risk elements concerning commercial and industrial loans and commercial real estate loans are the financial condition of the borrower, the sufficiency of collateral, and lack of timely payment. Management has a policy of requesting and reviewing annual financial statements from its commercial loan customers and periodically reviews existence of collateral and its value. Management evaluates the condition of the loan portfolio on at least a quarterly basis to determine the adequacy of the allowance for loan losses. Management's evaluation of the allowance is further based on consideration of actual loss experience, the present and prospective financial condition of borrowers, adequacy of collateral, industry concentrations within the portfolio, and general economic conditions. Management believes that the present allowance is currently adequate, based on the broad range of considerations listed above.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

Although management believes that the allowance for loan losses is adequate to absorb losses as they arise, there can be no assurance that the Corporation will not sustain losses in any given period that could be substantial in relation to the size of the allowance for credit losses. Inherent risks and uncertainties related to the operation of a financial institution require management to depend on estimates, appraisals and evaluations of loans to prepare the Corporation's financial statements. Changes in economic conditions and the financial prospects of borrowers may result in changes to the estimates, appraisals and evaluations used. In addition, if circumstances and losses differ substantially from management's assumptions and estimates, the allowance for loan losses may not be sufficient to absorb all future losses and net income could be significantly impacted.

Premises and Equipment

Premises and equipment was \$1.4 million as of September 30, 2010 down from \$1.5 million as of December 31, 2009. The Corporation has plans to support further growth of business lines, such as mortgage lending, over the next twelve months.

Deposits

Total deposits were \$100.0 million as September 30, 2010, an increase of \$18.5 million over December 31, 2009. In the deposit categories, noninterest bearing DDA deposits were \$12.7 million, consisting of business accounts, NOW accounts which, except for limited circumstances, are owned by individuals were \$7.0 million at September 30, 2010, while money market accounts were \$10.2 million and savings accounts were \$18.3 million at the current quarter end. Certificates of deposit were \$51.8 million at September 30, 2010. Of this amount \$39.6 million was in certificates greater than \$100,000. Beginning in February 2008, the Corporation began advertising its rates on certain certificates of deposits on a national certificate of deposit network, which has attracted some deposits from outside the local market. We will continue to utilize this avenue to supplement our deposit base as we continue to focus on growing our portion of the local retail and commercial deposit market. We have also chosen to participate in the MI-CD program with the State of Michigan. This program allows us to acquire State of Michigan certificate of deposit funds at below market rates to aid in the funding of our loan portfolio.

	(unaudited)	
	As of September 30, 2010

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations****RESULTS OF OPERATIONS****Net Interest Income**

Net interest income for the three months ended September 30, 2010 and 2009 was \$1.2 million and \$0.7 million respectively. Interest income on loans was \$1.5 million and \$1.1 million for the three months ended September 30, 2010 and 2009, respectively. The growth in interest income on loans was driven by continued growth in the loan portfolio. Deposit interest expense was steady at \$0.3 million for the three month periods ended September 30, 2010 and 2009, respectively, despite significantly higher levels of deposits in the current quarter. This was the result of the Corporation paying lower rates on deposits in the current quarter compared to the same quarter in the prior year. The following table shows the Corporation's consolidated average balances of assets, liabilities, and equity. The table also details the amount of interest income or interest expense and the average yield or rate for each category of interest-earning asset or interest-bearing liability and the net interest margin for the three months ended September 30, 2010 and 2009, respectively.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

Net interest income for the nine months ended September 30, 2010 and 2009 was \$3.2 million and \$1.9 million respectively. Interest income on loans was \$4.3 million and \$2.9 million for the nine months ended September 30, 2010 and 2009, respectively. The growth in interest income on loans was driven by continued growth in the loan portfolio. Deposit interest expense remained steady at \$1.0 million for the nine month periods ended September 30, 2010 and 2009, respectively. The Corporation had significant growth in deposit balances, but at considerably lower interest rates in 2010 compared to 2009.

The following table shows the Corporation's consolidated average balances of assets, liabilities, and equity. The table also details the amount of interest income or interest expense and the average yield or rate for each category of interest-earning asset or interest-bearing liability and the net interest margin for the nine months ended September 30, 2010 and 2009, respectively.

(1) Net interest earnings divided by average interest-earning assets.

Table of Contents**BIRMINGHAM BLOOMFIELD BANCSHARES, INC.****Management's Discussion and Analysis of Financial Condition and Results of Operations**

The yield on interest-earning assets increased for the quarter ended September 30, 2010 to 5.66% from 5.30% as compared to the same period in the prior year. The increase was due to an improvement in the yield of the loan portfolio. The yield on loans receivable increased to 6.43% for the three months ended September 30, 2010 from 6.13% for the same period in 2009. The Corporation's net spread increased for the three months ended September 30, 2010 to 4.08% from 3.25% for the same period in 2009. Net spread increased as a result of a reduction in the cost of deposits combined with improvement in the earning asset yield. In the prior year, deposit rates were higher due to the competitive market as well as promotional rates offered by the Bank as we continued to attract and build the customer base. Net interest margin increased to 4.41% for the three months ended September 30, 2010 up from 3.65% for the same period in 2009. As loan growth continues, management expects to utilize excess liquidity to enhance margin and improve yield on earning assets.

The yield on interest-earning assets increased for the nine month period ended September 30, 2010 to 5.50% from 5.25% as compared to the same period in the prior year. The yield on loans receivable increased to 6.28% for the nine months ended September 30, 2010, up from 5.89% for the same period in 2009. The Corporation's interest rate spread increased for the nine months ended September 30, 2010 to 3.87%, up from 3.02% for the same period in 2009. Net interest margin increased to 4.19% for the nine months ended September 30, 2010, up from 3.43% for the same period in 2009. Management expects that the excess liquidity held in Federal Reserve balances will be utilized in the last quarter of the year through continued loan growth.

Provision for Loans Losses

The provision for loan losses was approximately \$255,700 and \$32,000 for the three months ended September 30, 2010 and 2009, respectively. The increase from the previous comparable period in provision for loan losses was due to continued loan growth and one loan that was placed on nonaccrual status and fully reserved in the current quarter. The Corporation charged off no loans in the current quarter and recovered approximately \$46,000 in loans previously charged off. During the same period of 2009, the Corporation charged-off one loan totaling \$18,000 and had no recoveries during that period.

The provision for loan losses was \$544,900 and \$180,800 for the nine month periods ended September 30, 2010 and 2009, respectively. The increase from the same period in 2009 was due to continued loan growth and the additional loans determined to be uncollectible. The Corporation has charged-off three loans in the first half of 2010 totaling \$341,000 compared to \$18,000 in the same period of 2009. The Corporation recovered \$46,000 in the first nine months of 2010. There were no recoveries in the first nine months of 2009.

Non-Interest Income

Non-interest income was \$27,400 and \$27,300 for the three months ended September 30, 2010 and 2009, respectively. Loan fees and charges decreased to approximately \$3,000 for the three months ended September 30, 2010, down from \$4,300 for the same period in 2009. The decrease is primarily due to decreases in income earned on loan origination activity. Deposit fees and charges increased approximately \$2,800 to \$22,900 in the current quarter compared to the same period in 2009. This increase is due to continued increases in deposit levels. Other income decreased approximately \$1,300 for the quarter ended September 30, 2010, down from \$2,900 for the same period in 2009.

Non-interest income was \$104,900 and \$77,500 for the nine months ended September 30, 2010 and 2009, respectively. Loan fees and charges increased to approximately \$16,500 for the first half of 2010 compared to \$10,000 for the same period in 2009. The increase was due in large part to an increase in the loan portfolio and loan origination activities. Deposit fees and charges increased to approximately \$64,100 for the nine months ended September 30, 2010, up from approximately \$54,800 for the same period in 2009. This increase is primarily due to increased levels of deposits. Other income increased to approximately \$24,300 for the nine months ended September 30, 2010, up from approximately \$12,700 for the same period in 2009.

Non-Interest Expense

Non-interest expense for the three months ended September 30, 2010 and 2009 was \$868,600 and \$866,800 respectively. Salaries and benefits continued to be the largest component of non-interest expense. Salaries and benefits increased \$29,700, or 7.5%, to \$428,300 for the quarter ended September 30, 2010 up from \$398,600 for the same period of 2009. The increase is due to adding staff in the current quarter to accommodate the growth of the Bank. Occupancy and equipment expenses decreased to \$143,400 for the quarter ended September 30, 2010 down from \$191,900 for the same period of 2009. Occupancy costs decreased as a result of the closure of an unprofitable branch location in early January 2010. The one-time costs of closure were recognized in the fourth quarter 2009. Data processing expenses were \$56,900 for the three month period ended September 30, 2010, which is consistent with the same period in 2009. Advertising expenses were \$21,900 for the three months ended September 30, 2010. Professional fees were down \$9,800, or 13.5%, to \$62,900 for the three months ended September 30, 2010 compared to \$72,700 for the same period in 2009. For the current quarter end, the Corporation recognized \$35,300 for external audit expenses, \$13,600 related to internal audit expenses, \$11,000 for legal expenses and \$17,600 for other consulting expenses. Other expenses increased to \$148,200 for the three months ended September 30, 2010 compared to \$138,100 for the same period in 2009.

Non-interest expense for the nine months ended September 30, 2010 and 2009 was \$2.5 million and \$2.7 million, respectively. Salaries and benefits increased \$50,200, or 4.3%, to \$1,226,900 for the nine months ended September 30, 2010 up from \$1,176,700 for the same period of 2009. Salaries and benefits increased in 2010 due to increased staffing in the third quarter offset by open positions in prior quarters. Occupancy and equipment expenses decreased to \$433,900 for the nine month period ended September 30, 2010 down from \$607,400 for the same period of 2009. As discussed above, occupancy expenses have been reduced with the closure of an unprofitable branch in early 2010. Data processing expenses were \$162,000 for the nine month period ended September 30, 2010, which is up slightly from the \$158,600 incurred in the same period in 2009. Advertising expenses were \$67,200 for the nine months ended September 30, 2010, up from \$56,600 for the same period in 2009. The Corporation has run additional promotions in the current year as compared to 2009. Professional fees were \$222,600 for the nine months ended September 30, 2010 compared to \$270,000 for the same period in 2009. As indicated above, the Corporation recognized \$17,200 for legal expenses related to the Capital Purchase Program Participation and \$19,000 in consulting expense related to remote deposit capture and technology consulting in the second quarter of 2009, both of which were not applicable to the same period in 2010. Other expenses increased slightly to \$401,400 for the nine months ended September 30, 2010 compared to \$396,300 for the same period in 2009.

Income Taxes

No income tax expense or benefit was recognized during the three and nine month periods ended September 30, 2010 or 2009 due to the tax loss carry-forward position of the Corporation. An income tax benefit may be booked in future periods when management believes that profitability will be expected for the foreseeable future.

LIQUIDITY AND CAPITAL RESOURCES; ASSET/LIABILITY MANAGEMENT

The liquidity of a bank allows it to provide funds to meet loan requests, to accommodate possible outflows of deposits, and to take advantage of other investment opportunities. Funding of loan requests providing for liability outflows and managing interest rate margins require continuous analysis to attempt to match the maturities and re-pricing of specific categories of loans and investments with specific types of deposits and borrowings. Bank liquidity depends upon the mix of the banking institution's potential sources and uses of funds. The major sources of liquidity for the Bank have been deposit growth, federal funds sold, and loans which mature within one year. Large deposit balances which might fluctuate in response to interest rate changes are closely monitored. These deposits consist mainly of certificates of deposit over \$100,000. We anticipate that we will have sufficient funds available to meet our future commitments. As of September 30, 2010, unused commitments totaled \$31.8 million. Commitments to extend credit are agreements to lend. Of this amount, approximately \$14.6 million relates to commitments to extend credit. Since many of these commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. \$16.5 million represents commercial and equity lines of credit which the Bank expects, and experience has shown, that only a relatively small portion of the unused commitments will normally be drawn upon. While we expect to see an increase in advances on the home equity lines of credit under uncertain economic times, we believe that these usage numbers will not materially impact our liquidity needs.

Additionally, the Bank had \$703,000 in commercial letters of credit. A portion (32.1%), of the Bank's time deposits of \$51.8 million matures within twelve months from September 30, 2010. The Bank continues to focus on increasing its share of the local commercial and retail deposit market and extending the duration of those deposits. We have developed several alternative funding sources to supplement our deposit base in order to satisfy our liquidity needs. We utilize an online listing service that allows us to bring in deposits from outside the local marketplace and we have chosen to participate in the State of Michigan's MI-CD program, which allows us to pull in below market rate certificate of deposit dollars to aid in the funding of our loan portfolio. In addition, we are members of the Federal Home Loan Bank of Indianapolis and have a credit line with the Federal Reserve Bank to provide additional funding sources should they be needed.

The largest uses and sources of cash and cash equivalents for the Corporation for the nine months ended September 30, 2010, as noted in the Consolidated Statement of Cash Flows, were centered primarily on the uses of cash in investing activities and the net cash provided by financing activities. The uses of cash in investing activities were largely due to the increase in loans of \$14.8 million, purchases of investment securities totaling \$3.0 million, which were offset by proceeds from the sale and maturities of investment securities and other repayments on mortgage backed securities totaling \$2.9 million. Offsetting the uses of cash in investing activities, was the cash provided from financing activities which included net increases in deposits of \$18.5 million. Total cash and cash equivalents at September 30, 2010 was \$11.7 million, which was an increase of \$4.0 million from \$7.8 million from December 31, 2009. Management expects to fund continued loan growth utilizing available cash and cash equivalents.

Banks and bank holding companies are subject to regulatory capital requirements administered by federal banking agencies. Capital adequacy guidelines and, additionally for Banks, prompt corrective action regulations, involve quantitative measures of assets, liabilities, and certain off-balance-sheet items calculated under regulatory accounting practices. Capital amounts and classifications are also subject to qualitative judgments by regulators. Failure to meet capital requirements can initiate regulatory action. The prompt corrective action regulations provide five classifications, well capitalized, adequately capitalized, undercapitalized, significantly undercapitalized and critically undercapitalized, although these terms are not used to represent overall financial condition. If adequately capitalized, regulatory approval is required to accept brokered deposits. If undercapitalized, capital distributions are limited, as is asset growth and expansion, and plans for capital restoration are required. The Bank was well-capitalized as of September 30, 2010. Note 7 to the financial statements is hereby incorporated by reference. At September 30, 2010, the Corporation qualifies for an exemption from regulatory capital requirements due to its asset size.

Managing rates on earning assets and interest bearing liabilities focuses on maintaining stability in the net interest margin, an important factor in earnings growth and stability. Emphasis is placed on maintaining a controlled rate

sensitivity position to avoid wide swings in margins and to manage risk due to changes in interest rates. Some of

the major areas of focus of the Corporation's Asset Liability Committee (ALCO) incorporate the following overview functions: review the interest rate risk sensitivity of the Bank to measure the impact of changing interest rates on the Bank's net interest income, review the liquidity position through various measurements, review current and projected economic conditions and the corresponding impact on the Bank, ensure that capital and adequacy of the allowance for loan losses are maintained at proper levels to sustain growth, monitor the investment portfolio, recommend policies and strategies to the Board that incorporate a better balance of our interest rate risk, liquidity, balance sheet mix and yield management, and review the current balance sheet mix and proactively determine the future product mix.

Off-Balance Sheet Arrangements

As of September 30, 2010, unused commitments totaled \$31.8 million. Of this amount, approximately \$14.6 million relates to commitments to extend credit. Commitments to extend credit are agreements to lend. Since many of these commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent future cash flow requirements. \$16.5 million represents commercial and equity lines of credit which the Bank expects, and experience has shown, that only a relatively small portion of the unused commitments will normally be drawn upon. Additionally, the Corporation had \$703,000 in commercial letters of credit.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Corporation's primary market risk exposure is interest rate risk and liquidity risk. All of the Corporation's transactions are denominated in U.S. dollars with no specific foreign exchange exposure. Any impacts that changes in foreign exchange rates would have on interest rates are assumed to be insignificant.

Interest rate risk (IRR) is the exposure of a banking organization's financial condition to adverse movements in interest rates. Accepting this risk can be an important source of profitability and shareholder value; however, excessive levels of IRR could pose a significant threat to our earnings and capital base. Accordingly, effective risk management that maintains IRR at prudent levels is essential to the Corporation's safety and soundness. The Board of Directors has instituted a policy setting limits on the amount of interest rate risk that may be assumed. Management provides information to the Board of Directors on a quarterly basis detailing interest rate risk estimates and activities to control such risk.

Evaluating a financial institution's exposure to changes in interest rates includes assessing both the adequacy of the management process used to control IRR and the organization's quantitative level of exposure. When assessing the IRR management process, the Corporation seeks to ensure that appropriate policies, procedures, management information systems and internal controls are in place to maintain IRR at prudent levels with consistency and continuity. Evaluating the quantitative level of IRR exposure requires the Corporation to assess the existing and potential future effects of changes in interest rates on its consolidated financial condition, including capital adequacy, earnings, liquidity, and, where appropriate, asset quality. This detailed analysis is performed on a quarterly basis, but is managed daily. The Bank continues to be in a liability sensitive position and management continues to work toward creating a more closely matched portfolio to minimize any potential impact that changing rates could have on earnings in the short term. The institution is well positioned to minimize the impact of rate changes, with the rate shock analysis showing that over the long term, rate changes pose only a minimal risk to our economic value of equity (EVE ratio).

The Corporation has not experienced a material change in its financial instruments that are sensitive to changes in interest rates since December 31, 2009, which information can be located in the Corporation's annual report on Form 10-K.

ITEM 4T. CONTROLS AND PROCEDURES

As of September 30, 2010, we conducted an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's chief executive officer and chief financial officer, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures, as such term is defined under Exchange Act Rules 13a-15(e) and 15d-15(e).

Based on this evaluation, the Corporation's chief executive officer and chief financial officer concluded that, as of September 30, 2010, such disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC, and accumulated and communicated to the Corporation's management, including the Corporation's chief executive officer and chief financial officer, as appropriate to allow timely decisions regarding required disclosure.

In designing and evaluating the disclosure controls and procedures, the Corporation's management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives and in reaching a reasonable level of assurance. The Corporation's management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

There were no changes in the Corporation's internal controls over financial reporting during the period ended September 30, 2010 that materially affected, or are reasonably likely to materially affect, the Corporation's internal controls over financial reporting.
