Items 10, 11, 12, 13 and 14 are incorporated by reference into Part III of this Form 10-K from the Baldwin Technology Company, Inc. Proxy Statement for the 2010 Annual Meeting of Stockholders. (A definitive proxy statement will be filed with the Securities and Exchange Commission within 120 days after the close of the fiscal year covered by this Form 10-K.)

Table of Contents**EXPLANATORY NOTE**

Baldwin Technology Company, Inc. (the Company) originally filed its Annual Report on Form 10-K for the year ended June 30, 2010 on September 28, 2010. The Company is filing this Amendment No. 1 on Form 10-K/A to restate its consolidated financial statements and other financial information to properly account for certain revenue and costs related to the Company's Japanese operations that had been improperly recognized and booked. Specifically, the improper revenue cut-off primarily affected the three months ended June 30, 2010 (Q4 in the fiscal year ended June 30, 2010), when revenue and related costs were recorded prematurely and the three months ended September 30, 2010 and the three and six months period ended December 31, 2010 (Q1 and Q2 of fiscal year ended June 30, 2011) when such sales transactions were fulfilled and revenue earned. As illustrated in the table below, the correction of the above mentioned errors resulted in (i) reduction of net sales and operating income for the three months and year ended June 30, 2010 by \$4,037 and \$1,984, respectively, (ii) increase in net sales and decrease in operating loss in the three months ended September 30, 2010 by \$3,382 and \$1,674, respectively, (iii) increase of net sales and decrease of operating loss for the three months ended December 31, 2010 by \$655 and \$310, respectively, and (iv) increase in net sales and decrease of operating loss for the six months ended December 31, 2010 by \$4,037 and \$1,984, respectively.

Table of Contents

There was no impact to previously reported total cash flows from operations, investing or financing activities.

Management determined certain financial amounts reflected in Items 1, 6, 7 and 8 to our originally filed Form 10-K needed to be restated to reflect these adjustments. The amended items have been amended and restated in their entirety.

As a result of this restatement, we have revised Item 9A, Controls and Procedures, and have included new certifications pursuant to Section 302 and 906 of the Sarbanes-Oxley Act of 2002 as reflected in Exhibits 31.01, 31.02, 32.01 and 32.02. In addition, we have also included revised report of our independent registered public accounting firm, Grant Thornton LLP, as well as a revised Exhibit 23, Consent of Independent Registered Public Accounting Firm.

Except as set forth above, this Form 10-K/A does not modify or update other disclosures in the original Form 10-K, including the nature and character of such disclosure to reflect events occurring after the filing date of the original Form 10-K. While we are amending only certain portions of our Form 10-K, for convenience and ease of reference, we are filing the entire Form 10-K, except for certain exhibits. The disclosures in this amendment do not reflect events occurring after the filing of the original Form 10-K. Accordingly, this amendment should be read in conjunction with our other filings made with the Securities and Exchange Commission subsequent to the filing of the originally filed Form 10-K, including any amendments to those filings, as information in such filings may update or supersede certain information contained in those filings as well as in this amendment.

CAUTIONARY STATEMENT This Annual Report on Form 10-K as amended may contain forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995 or by the Securities and Exchange Commission (SEC) in its rules, regulations and releases. Baldwin Technology Company, Inc. (the Company) cautions investors that any such forward-looking statements made by the Company are not guarantees of future performance and that actual results may differ materially from those in the forward-looking statements. Some of the factors that could cause actual results to differ materially from estimates contained in the Company's forward-looking statements are set forth in Item 1A Risk Factors to this Annual Report on Form 10-K for the fiscal year ended June 30, 2010.

Table of Contents**PART I****Item 1. Business**

Baldwin Technology Company, Inc. (Baldwin or the Company) is a leading global supplier of process automation equipment for the printing and publishing industry. The Company offers its customers a broad range of products designed to enhance the product quality and the productivity and cost-efficiency of the print manufacturing process, while addressing safety issues and reducing the environmental impact from the printing process. Baldwin's products include cleaning systems and related consumables, fluid management and ink control systems, web press protection systems, drying and curing systems, blending and packaging services, and related services and parts.

The Company sells its products both to printing press manufacturers who incorporate the Company's products into their own printing press systems for sale to printers and publishers and directly to printers and publishers to upgrade the quality and capability of their existing and new printing presses. The Company does not consider its business to be seasonal. However, customer order patterns and delivery schedules could cause revenue in select periods to fluctuate. The Company has product development and production facilities, and sales and service operations, in strategic markets worldwide.

Industry Overview

The Company defines its business as that of providing process automation equipment for the printing and publishing industry. The Company believes that, as an independent company, it produces one of the most complete lines of process automation products in the printing industry.

The Company's products are used by printers engaged in all commercial and newspaper printing processes including lithography, flexography and digital printing. The largest share of its business is in offset (lithographic) printing. Offset printing is the largest segment of the domestic and international printing market and is used primarily for general commercial printing as well as printing books, magazines, business forms, catalogs, greeting cards, packaging and newspapers. The Company's products are designed to improve the printing process in terms of quality, effect on the environment, safety, productivity and reduction of waste.

While offset printing represents the largest segment of the U.S. printing industry, it is also the dominant technology in the international printing market. The Company believes that the future growth of its products in international markets will be attributable in part to the increased use of its products in emerging markets. The Company has established operations in strategic geographic locations to take advantage of growth opportunities in those markets. Baldwin's worldwide operations enable it to closely monitor market and new product developments in different printing markets and to introduce new products, or adapt existing ones, to meet the printing equipment requirements of specific local markets throughout the world.

Principal Products

The Company produces and sells many different products and systems to printers and printing press manufacturers. Thus, its product development efforts are focused on the needs of printers and the printing press manufacturers. Typically, it takes a new product several years after its introduction to make a significant contribution to the Company's net sales. As a product progresses through its life cycle, the percentage of sales to printing press manufacturers generally increases as the product's acceptance by the printing industry increases and printers begin to specify certain of the Company's products as part of the process automation equipment package selected when ordering new printing presses. Historically, the Company's products have had a long life cycle as the Company continually upgrades and refines its product lines to meet customer needs and changes in printing press technology. Baldwin's principal products are described below:

Cleaning Systems. The Company's Cleaning Systems and related consumable products clean the rollers, cylinders and paper of a printing press and include the Press Washer, Automatic Blanket Cleaner, Newspaper Blanket Cleaner, Chill Roll Cleaner, Digital Plate Cleaner, Guide Roll Cleaner and Web Paper Cleaner, all of which reduce paper waste, volatile organic compound (VOC) emissions and press downtime, as well as improve productivity, print quality and safety of operation for the press operator. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Cleaning Systems represented approximately 53.4%, 49.6% and 50.8% of the Company's net sales, respectively.

Fluid Management Systems. The Company's Fluid Management Systems measure and control the supply, temperature, cleanliness, chemical balance and certain other characteristics of the fluids used in the printing process.

Among the most important of

1

Table of Contents

these products are the Company's Refrigerated Circulators and Spray Dampening Systems. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Fluid Management Systems represented approximately 15.5%, 19.0% and 18.9% of the Company's net sales, respectively.

Other Process Automation Products, Parts, Services and Miscellaneous Products. The Company's Web Press Protection Systems (web severers and web catchers), designed in response to the increasing number of web leads used in printing today's colorful newspapers as well as to the growing demand for high speed commercial web presses, provide an auto-arming electronic package offering high quality press protection in the event of a web break. The Company's Ink Control Systems regulate many aspects of the ink feed systems on a printing press. These products include Ink Agitators, Ink Mixers and Ink Level Systems, which reduce ink and paper waste. Other products include Ultraviolet and Infrared Dryers, Gluing Systems and service and parts. In addition, the Company provides customized dry ingredient blending and packaging services to the food industry and offers a variety of anti-offset spray powders to the graphic arts industry. In the fiscal years ended June 30, 2010, 2009 and 2008, net sales of Other Products represented approximately, 31.1%, 31.4% and 30.2% of the Company's net sales, respectively.

Worldwide Operations

The Company believes that it is one of the few providers of process automation products for the printing and publishing industry that has product development, manufacturing and marketing capabilities in the Americas, Europe, Asia and Australia. The Company, as an international business, is subject to various changing competitive, economic, political, legal and social conditions. The Company currently has subsidiaries in 11 countries, and the results of operations may be adversely or positively affected by currency fluctuations. The results of the operations and financial positions of the Company's subsidiaries outside of the United States are reported in the relevant foreign currencies and then translated into U.S. dollars at the applicable exchange rates for inclusion in the Company's Consolidated Financial Statements. The exchange rates between the currencies and the U.S. dollar may fluctuate substantially. Because the Company generates a significant percentage of its revenues and operating expenses in currencies other than the U.S. dollar, fluctuations in the value of the U.S. dollar against other currencies may have a material effect on the Company's operating income. The Company's results and financial condition are particularly affected by changes in the value of the U.S. dollar in relation to the euro, Japanese yen and Swedish krona. Since the Company's foreign subsidiaries primarily manufacture, incur expenses and earn revenue in the local countries in which they operate, the impact of cross currency fluctuations is somewhat mitigated.

The following table sets forth the percentages of the Company's net sales attributable to its geographic regions for the fiscal years ended June 30, 2010, 2009 and 2008:

	Years Ended June 30,		
	(Restated)		
	2010	2009	2008
Americas	23%	23%	21%
Europe	48%	48%	53%
Asia/Australia	29%	29%	26%
Total	100%	100%	100%

In North, Central and South America, the Company operates through its U.S. subsidiaries and throughout Central and South America through dealers. In Europe, the Company operates through its subsidiaries in Germany, Sweden, France, England and the Netherlands. In Asia, the Company operates through its subsidiaries in India, Japan, China and Singapore. The Company also operates in Australia through its Australian subsidiary. All of the Company's subsidiaries are wholly owned except for two subsidiaries, one in which the Company holds a 90% interest, and another in which the Company holds an 80% interest.

Acquisition Strategy

As part of its growth strategy, the Company investigates potential strategic acquisitions of companies and product lines in related business areas. This strategy involves: (i) acquiring entities that will strengthen the Company's position

in the field of process automation equipment and related consumables for the printing and publishing industry and whose products can be sold through the Company's existing distribution network; (ii) acquiring entities allowing entry to new end-user market segments and extending existing markets; and (iii) acquiring companies which contribute new products to the Company and which can benefit from the Company's manufacturing and marketing expertise and financial support. Subsequent to an acquisition, the Company's intention would be to integrate the processes and controls of the acquired company with those of the Company with the objective of enhancing sales, productivity and operating results.

Table of Contents

Marketing, Sales and Support

Marketing and Sales. While the Company markets its products in most countries throughout the world, the product mix and distribution channels vary from country to country. The Company has approximately 95 employees devoted to marketing and sales activities in its three principal markets and more than 124 dealers, distributors and representatives worldwide. The Company markets its products throughout the world through these direct sales representatives, distributors and dealer networks to printing press manufacturers (OEMs), newspaper publishers, and commercial printers. For the fiscal year ended June 30, 2010, approximately 35% of the Company's net sales were to OEMs and approximately 65% were directly to printers.

Support. The Company is committed to after-sales service and support of its products throughout the world. Baldwin employs approximately 101 service technicians, who are complemented by product engineers, to provide field service for the Company's products on a global basis.

Backlog. The Company's backlog represents unfilled product orders which Baldwin has received from its customers under valid contracts or purchase orders. The Company's backlog was \$33,917,000, including \$4,365,000 associated with the acquisition of Nordson UV Ltd. and Horizon Lamps, Inc. (Nordson UV), as of June 30, 2010, \$38,693,000 as of June 30, 2009 and \$48,420,000 as of June 30, 2008.

Customers. For the fiscal year ended June 30, 2010, one customer accounted for more than 10% of the Company's net sales and trade accounts receivable. Koenig and Bauer Aktiengesellschaft (KBA) accounted for approximately 14% of the Company's net sales and trade accounts receivable. The ten largest customers of Baldwin (including KBA) accounted for approximately, 39%, 48% and 46%, respectively, of the Company's net sales for the fiscal years ended June 30, 2010, 2009 and 2008. Sales of Baldwin's products are not considered seasonal.

Engineering and Development

The Company believes its engineering and development, including research, efforts have been an important factor in establishing and maintaining its leadership position in the field of process automation equipment for the printing and publishing industry. Baldwin has devoted substantial efforts to adapt its products to almost all models and sizes of printing presses in use worldwide.

The Company's product development takes place at its centers of competence for commercial printing located in Germany and for newspaper printing located in Sweden. The Company believes that this approach to engineering and development has helped the Company to target the needs of its customers quicker and more precisely and coordinate the Company's product development activities. The Company's engineering and development organization focuses attention on opportunities within the respective markets, while avoiding duplicative efforts within the Company.

Baldwin employs approximately 101 persons whose primary function is new product development, application engineering or modification of existing products. The Company's total expenditures for engineering and development for the fiscal years ended June 30, 2010, 2009 and 2008 were approximately 8.9%, 8.4% and 7.9% of the Company's net sales in each such fiscal year, respectively.

Patents

The Company owns a number of patents and patent applications relating to a substantial number of Baldwin's products; and patented products represent a significant portion of the Company's net sales for all periods presented. The Company's patents expire at different times during the next twenty years. The expiration of patents in the near future is not expected to have a material adverse effect on the Company's net sales. The Company has also relied upon and intends to continue to rely upon unpatented proprietary technology, including the proprietary engineering required to adapt its products to a wide range of models and sizes of printing presses. The Company believes its rights under, and interests in, its patents and patent applications, as well as its proprietary technology, are sufficient for its business as currently conducted.

Manufacturing

The Company conducts its operations, primarily assembly and quality control, through a number of operating subsidiaries. In North America, the Company has facilities in Kansas, Illinois and Pennsylvania. In Europe, the Company has facilities in Germany, Sweden and the U.K. In Asia, Baldwin has facilities in India, Japan and China.

Table of Contents

In general, materials required in the Company's business can be obtained from various sources in the quantities desired. The Company has no long-term supply contracts and does not consider itself dependent on any individual supplier. In addition, the Company uses various subcontractors to provide required services, but is not dependent on any individual subcontractor.

The nature of the Company's operations is such that there is little, if any, negative effect upon the environment, and the Company has not experienced any substantive problems in complying with environmental protection laws and regulations.

Competition

Within the diverse market for process automation equipment for the printing and publishing industry, the Company produces and markets what it believes to be the most complete line of process automation equipment. Numerous companies, including vertically integrated printing press manufacturers, manufacture and sell products which compete with one or more of the Company's products. The printing press manufacturers generally have larger staffs and greater financial resources than the Company.

The Company competes by offering customers a broad, technologically advanced product line, combined with a well-known reputation for the reliability of its products and its commitment to service and after-sale support. The Company's ability to compete effectively in the future will depend upon the continued reliability of its products, its after-sale support, its ability to keep its market position with new proprietary technology and its ability to develop innovative new products which meet the changing demands of the printing and publishing industry.

Employees

At June 30, 2010, the Company employed 592 persons (plus 78 temporary and part-time employees) of which 206 are production employees, 95 are marketing, sales and customer service employees, 202 are development, engineering and technical service employees and 89 are management and administrative employees. In Europe, some employees are represented by various unions under contracts with indefinite terms: in Sweden, approximately 71 of the Company's 88 employees are represented by the Ledarna (SALF), Metall, or Svenska Industritjänstemanna Forbundet unions. The Company considers relations with its employees and with its unions to be good.

Item 1A. Risk Factors

Set forth below and elsewhere in this Annual Report on Form 10-K as amended and in other documents that the Company files with the SEC are risks that should be considered in evaluating the Company's stock, as well as risks and uncertainties that could cause the actual future results of the Company to differ from those expressed or implied in the forward-looking statements contained in this Report and in other public statements the Company makes. Additionally, because of the following risks and uncertainties, as well as other variables affecting the Company's operating results, the Company's past financial performance should not be considered an indicator of future performance.

Company Risks

Intellectual property and proprietary technology are important to the continued success of the Company's business. Failure to protect or defend this proprietary technology may impair the Company's competitive position. The Company's success and ability to compete depend to a certain extent on the Company's innovative proprietary technology since that is one of the methods by which the Company persuades customers to buy its products, both present and future. The Company currently relies on copyright and trademark laws, trade secrets, confidentiality procedures, contractual provisions and patents to protect its innovative proprietary technologies. The Company may have to engage in litigation to protect patents and other intellectual property rights, or to determine the validity or scope of the proprietary rights claimed by others. This kind of litigation can be time-consuming and expensive, regardless of whether the Company wins or loses. Because it is important to the Company's success that the Company is able to prevent competitors from copying the Company's innovations, the Company will usually seek patent and trade secret protection for the Company's technologies. The process of seeking patent protection can be long and expensive and the Company cannot be certain that any currently pending or future applications will actually result in issued patents, or that, even if patents are issued, they will be of sufficient strength and scope to provide it with meaningful protection or commercial advantage. Further, others may develop technologies that are similar or superior to the Company's technology or design around the Company's patents. The Company also relies on trade secret protection for its technology, in part through confidentiality agreements with the Company's employees, consultants

and third parties. These agreements may be breached, and if they are, depending upon the circumstance, the Company may not have adequate remedies. In any case, others may come to know about the Company's trade secrets in various ways. In addition,

Table of Contents

the laws of some countries in which the Company manufactures or sells products may not protect the Company's intellectual property rights to the same extent as the laws of the United States.

Despite the Company's efforts, intellectual property rights, particularly existing or future patents, may be invalidated, circumvented, challenged, rendered unenforceable or infringed or required to be licensed to others. Furthermore, others may develop technologies that are similar or superior to the Company's, duplicate or reverse engineer the Company's technology or design around patents owned or licensed by the Company. If the Company fails to protect its technology so that others may not use or copy it, the Company would be less able to differentiate its products and revenues could decline.

The Company's operating results are subject to fluctuations from period-to-period, which could cause it to miss expectations about these results and, consequently, could adversely affect the trading price of the Company's stock. The results of the Company's operations for any quarter are not necessarily indicative of results to be expected in future periods. The Company's operating results have in the past been, and will continue to be, subject to quarterly fluctuations as a result of factors such as the impact of continuing economic difficulties, increased competition in the printing equipment industry, the introduction and market acceptance of new and alternative printing and information distribution technologies and standards, changes in general economic conditions and changes in economic conditions specific to the Company's industry. Further, the Company's revenues may vary significantly from quarter to quarter as a result of, among other factors, the timing of shipments by customers, changes in demand and mix for the Company's products and consumables, and the timing of new product announcements and releases by the Company or its competitors. Finally, the operating results of the Company are dependent upon management's ability to control manufacturing costs as well as operating expenses in view of the Company's business environment.

The Company relies on subcontractors to help manufacture its products and if they are unable to adequately supply components and products, the Company may be unable to deliver products to customers on time or without defects. The Company employs a number of unaffiliated subcontractors to manufacture components for the Company's products. Because the Company relies on subcontractors, however, the Company cannot be sure that it will be able to maintain an adequate supply of components or products. Moreover, the Company cannot be sure that the components the Company purchases will satisfy the Company's quality standards and be delivered on time. The Company's business could suffer if it fails to maintain its relationships with its subcontractors or fails to develop sufficient alternative sources for its purchased components.

The Company's business is subject to risks as a result of its international operations. A significant portion of the Company's business is conducted internationally. Accordingly, future results could be materially adversely affected by a variety of uncontrollable and changing factors including, among others, regulatory, political and economic conditions in a specific country or region, trade protection measures and other regulatory requirements, business and government spending patterns, and natural disasters. Because the Company generates revenues and expenses in various currencies, including the U.S. dollar, euro, Swedish krona and Japanese yen, the Company's financial results are subject to the effects of fluctuations of currency exchange rates. The Company cannot predict, however, when exchange rates or price controls or other restrictions on the conversion of foreign currencies could impact the Company's business. Any or all of these factors could have an adverse impact on the Company's business and results of operations.

The Company's growth strategy may include alliances and/or licenses or acquisitions of technologies or businesses, which entail a number of risks. As part of the Company's strategy to grow its business, the Company may pursue alliances and/or licenses of technologies from third parties or acquisitions of complementary product lines or companies, and such transactions could entail a number of risks. The Company may expend significant costs in investigating and pursuing such transactions, and such transactions may not be consummated. If such transactions are consummated, the Company may not be successful in integrating the acquired technology or business into the Company's existing business to achieve the desired synergies. Integrating acquired technologies or businesses may also require a substantial commitment of the Company's management's time and attention. The Company may expend significant funds to implement an alliance and/or acquire such technologies or businesses, and may incur unforeseen liabilities in connection with any alliance and/or acquisition of a technology or business. Any of the foregoing risks could result in an adverse effect on the Company's business, results of operations and financial conditions.

The Company's ability to maintain its competitive position depends to a certain extent on the efforts and abilities of its senior management and the ability to attract highly skilled employees. The Company's senior management possesses significant managerial, technical and other expertise in the printing industry. Their expertise would be difficult to quickly replace, and if the Company loses the services of one or more of its executive officers, or if one or more of them decided to join a competitor or otherwise compete directly or indirectly with the Company, the Company's business could be seriously harmed. In addition, the Company's ability to develop, market and sell its products and services and to maintain its competitive position depends on its ability to attract, retain and motivate highly skilled technical, sales and marketing and other personnel. If the Company fails to recruit these personnel, its ability to develop new products and provide service could suffer.

Table of Contents

Reliance on significant customers. In fiscal 2010, the Company had one significant customer that individually accounted for 14% of net sales. The Company anticipates, but cannot assure, that this customer will continue to be significant in fiscal 2011. The loss of, or a significant decrease in sales to, this customer would have a material adverse effect on the Company's financial condition and results of operation. In addition, the Company's ten largest customers accounted for approximately 39% of the Company's net sales for the fiscal year ended June 30, 2010.

Banking and financing relationships. The Company's continued effective operating presence in the marketplace is dependent upon its financing arrangements with its banks. The Company cannot predict if those relationships will always be supportive.

Industry Risks

If the United States and other significant global economies remain in recession, the demand for the Company's products could remain lower and the Company's revenue may be materially adversely affected. The demand for the Company's products is dependent upon various factors, many of which are beyond the Company's control. For example, general economic conditions may affect or delay expenditures for advertising and printing, which may in turn affect the overall capital spending by publishers and printers, particularly for capital equipment such as printing presses. If, as a result of general economic uncertainty or otherwise, companies reduce their capital spending levels, such a decrease in spending could reduce demand for the Company's products and have a material adverse effect on the Company's business.

Since 2008, financial markets throughout the world have been experiencing disruption, including volatility in securities prices, diminished liquidity and credit availability, failure and potential failures of major financial institutions and unprecedented government support of financial institutions. These developments and the continuing economic downturn have and will adversely impact the Company's business and financial condition in a number of ways, including impacts beyond those typically associated with other recent downturns in the U.S. and foreign economies. As the slowdown continues, reduced capital spending by OEMs and end users has already adversely affected and may continue to adversely affect the Company's product sales. The impact from the slowdown could necessitate further testing for impairment of goodwill, other intangible assets, and long-lived assets and may negatively impact the valuation allowance with respect to the Company's deferred tax assets. In addition, cost reduction actions may be necessary which would lead to additional restructuring charges. As credit in financial markets tightens, the general economic downturn has adversely affected the ability of the Company's customers and suppliers to obtain financing for significant purchases. The tightening could result in a decrease in or cancellation of orders for the Company's products and services, could negatively impact the Company's ability to collect its accounts receivable on a timely basis, could result in additional reserves for uncollectible accounts receivable being required, and in the event of continued contraction in the Company's sales, could lead to dated inventory and require additional reserves for obsolescence.

The Company may not be able to adequately respond to changes in technology affecting the printing industry. The Company's continuing product development efforts have focused on refining and improving the performance of the Company's products as they relate to printing, and the Company anticipates that it will continue to focus its efforts in this area. The printing and publishing industry has been characterized in recent years by rapid and significant technological changes and frequent new product introductions. Current competitors or new market entrants could introduce new or enhanced products with new features or with features incorporating the Company's technologies which could render the Company's technologies obsolete or less marketable. The Company's future success will depend, in part, on the Company's ability to:

- use leading technologies effectively;

- continue to develop the Company's technical expertise and patented position;

- enhance the Company's current products and develop new products that meet changing customer needs;

- time new product introductions in a way that minimizes the impact of customers delaying purchases of existing products in anticipation of new product releases;

adjust the prices of the Company's existing products to increase customer demand;

successfully advertise and market the Company's products;

influence and respond to emerging industry standards and other technological changes; and

adjust products and services to accommodate substitution of non-traditional digital technologies for traditional print on paper.

The Company may not be successful in effectively using new technologies, developing new products or enhancing its existing products and technology on a timely basis. The Company's new technologies or enhancements may not achieve market acceptance. The Company's pursuit of new technologies may require substantial time and expense. The Company may need to license new

Table of Contents

technologies to respond to technological change. These licenses may not be available to the Company on terms that the Company can accept. Finally, the Company may not succeed in adapting the Company's products to new technologies as they emerge. Any of these factors, either individually or collectively, could have an adverse impact on the Company's business and results of operation.

Investment Risks

Failure to achieve and maintain effective internal controls could adversely affect the Company's ability to report its financial condition and results of operations accurately or on a timely basis. As a result, current and potential stockholders could lose confidence in the Company's financial reporting, which could harm its business and the trading price of its stock. As required by Section 404 of the Sarbanes-Oxley Act of 2002, management is required to periodically evaluate the design and effectiveness of disclosure controls and procedures and assess the effectiveness of internal controls over financial reporting. Management had originally concluded that internal controls and procedures over financial reporting were effective as to design and effectiveness as of June 30, 2010. As a result of the restatement of the financial statements disclosed in the current Report on Form 8-K dated May 10, 2011 and the identification of the material weaknesses identified as a result of the errors that led to the restatement, management has concluded that disclosure controls and procedures were not effective as of June 30, 2010. Management had previously concluded that the identified and reported material weakness as of June 30, 2009 had been effectively remediated. However, as a result of the restatement of financial statements, disclosed on Form 8-K dated May 10, 2011 and the material weaknesses identified management has concluded that disclosure controls and procedures as well as internal controls over financial reporting were not effective. Failure to maintain existing effective controls could have an adverse effect on the Company's business, operating results and stock price. For a more detailed discussion of the Company's disclosure controls and procedures and internal control over financial reporting, see Item 9A of this Annual Report on Form 10-K/A.

The Company's stock price has been and could continue to be volatile. The market price of the Company's stock has been subject to significant fluctuations. The securities markets have experienced, and are likely to experience in the future, significant price and volume fluctuations that could adversely affect the market price of the Company's stock without regard to the Company's operating performance. In addition, the trading price of the Company's stock could be subject to significant fluctuations in response to:

actual or anticipated variations in the Company's quarterly operating results;

significant announcements by industry participants;

changes in national or regional economic conditions;

changes in securities analysts' estimates for the Company, the Company's competitors or the Company's industry, or the Company's failure to meet analysts' expectations; and

general market conditions.

These factors may materially and adversely affect the Company's stock price, regardless of the Company's operating performance.

Risks associated with indebtedness

The Company has indebtedness. As of June 30, 2010, the Company's total indebtedness was \$20,980,000 including \$13,933,000 under its secured credit facility. Borrowings under the Company's Credit Agreement are secured by the assets of the Company. Under the terms of the Credit Agreement, the Company is required to satisfy certain financial covenants. At June 30, 2010, after the restatement, the Company was not in compliance with the financial covenants contained in its Credit Agreement; however, on May 16, 2011 the Company entered into Waiver and Amendment No. 10 to the Credit Agreement and was therefore in compliance.

On September 28, 2010, the Company entered into Amendment #8 to the Credit Agreement (the Amendment #8) with Bank of America. The terms of the Amendment #8 provide covenants through the term of the Credit Agreement. The Company expects to be in compliance with the covenants in the Amendment #8, but a decline in the Company's

financial performance could have a material adverse effect on the Company, including the Company's ability to retain its existing financing or obtain additional financing; or any such financing may not be available on terms favorable to the Company. The Company's ability to make expected repayments of borrowings under its Credit Agreement and to meet its other debt or contractual obligations (including compliance with applicable financial covenants) will depend upon the Company's future performance and its cash flows from operations, both of which are subject to prevailing economic conditions and financial, business, and other known and unknown risks and uncertainties, certain of which are beyond the Company's control.

The Company's Credit Facility matures November 21, 2011, and the Company may be unable to renew or replace this financing. The Company has significantly reduced the carrying value of its Credit Facility and is, and has been, in compliance with all debt covenants, as amended. The Company has begun preliminary discussions regarding renewal of its Credit Facility and anticipates finalizing a renewal or replacement Credit Agreement although there are no assurances that such agreement will be completed by the loan maturity date.

Table of Contents**Item 1B. Unresolved Staff Comments**

None

Item 2. Properties

The Company owns and leases various manufacturing and office facilities aggregating approximately 491,000 square feet at June 30, 2010. The table below presents the locations and ownership of these facilities: (in thousands)

	Square Feet Owned	Square Feet Leased	Total Square Feet
United States	0	179	179
Germany	0	144	144
Sweden	13	53	66
Japan	0	24	24
All other, foreign	0	78	78
Total square feet owned and leased	13	478	491

The Company believes that its facilities are adequate to carry on its business as currently conducted.

Item 3. Legal Proceedings

Baldwin is involved from time to time in various legal proceedings, including actions with respect to commercial, intellectual property and employment matters. The Company believes that it has meritorious defenses against the claims currently asserted against it and intends to defend them vigorously. However, the outcome of litigation is inherently uncertain, and the Company cannot be sure that it will prevail in any of the cases currently in litigation. The Company believes that the ultimate outcome of any such cases will not have a material adverse effect on its results of operations, financial position or cash flows; however, there can be no assurances that an adverse determination would not have a material adverse effect on the Company.

Additionally, information regarding legal proceedings is included in the Notes to Consolidated Financial Statements (see Note 20) and is incorporated herein by reference.

Item 4. Reserved**PART II****Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****Price Range of Class A Common Stock**

The Company's Class A Common Stock was traded on the American Stock Exchange (AMEX) until October 1, 2008, when the AMEX was acquired by the NYSE Euronext. Since October 1, 2008, the Company's Class A Common Stock has been traded on the New York Stock Exchange (NYSE Amex) under the symbol BLD . The following chart sets forth, for the calendar year periods indicated, the range of closing prices for the Company's Class A Common Stock on the consolidated market, as reported by the AMEX during the period prior to October 1, 2008, and as reported by the NYSE Amex since October 1, 2008.

Table of Contents

	High	Low
2008 (calendar year)

Third Quarter (through September 10, 2010)	\$ 1.38	\$ 1.14

Class B Common Stock

The Company's Class B Common Stock has no established public trading market. However, Class B shares are convertible, one-for-one, into Class A shares, upon demand. During the fiscal year ended June 30, 2010, one holder of the Company's Class B Common Stock converted 50,000 shares into shares of the Company's Class A Common Stock.

Approximate Number of Equity Security Holders

As of September 10, 2010, the number of record holders of the Company's Class A and Class B Common Stock totaled 217 and 17, respectively. The Company believes, however, that there are approximately 1,500 beneficial owners of its Class A Common Stock.

Dividends

Declarations of dividends depend upon the earnings and financial position of the Company and are within the discretion of the Company's Board of Directors. However, the Company's Credit Agreement prohibits the payment of dividends. Under the Company's Certificate of Incorporation, no dividend in cash or property also permitted to be declared or paid on shares of the Company's Class B Common Stock unless simultaneously therewith there is declared or paid, as the case may be, a dividend in cash or property on shares of Class A Common Stock of at least 105% of the dividend on the shares of Class B Common Stock (see Note 11 to the Consolidated Financial Statements).

Purchases of Equity Securities by Issuer and Affiliated Purchasers

There was no activity under the Company's stock repurchase program during the quarter ended June 30, 2010.

Performance Graph

The following Performance Graph compares the Company's cumulative total stockholder return on its Class A Common Stock for the five fiscal years ended June 30, 2010 with the cumulative total return of the NYSE Amex Composite Index, and a peer group composed of publicly traded companies (customers and competitors) in the printing equipment business. The companies included in the peer group are: Baldwin Technology Company, Inc., Heidelberger Druckmaschinen, Koenig & Bauer AG, Komori Corporation, Presstek, Inc. and technotrans AG (the currencies of all foreign listed companies were converted to USD for the time periods indicated). The comparison assumes \$100 was invested on June 30, 2005 in the Company's Class A Common Stock and in each of the foregoing indices and assumes reinvestment of all dividends. Total stockholder return is calculated using the closing price of the stock on the last trade date of each fiscal year. The stock price performance shown is not intended to forecast or be indicative of the possible future performance of the Company's Class A Common Stock.

Table of Contents**Comparison of Five Year Cumulative Total Return (*) Among Baldwin Technology Company Inc., the NYSE Amex Composite Index and a Peer Group**

For the year ended	Baldwin Technology	Peer	NYSE Amex
June 30,	Company, Inc.	Group	Composite
2006	174.19	145.45	124.41
2007	194.52	159.02	155.25
2008	76.13	91.32	152.02
2009	32.26	40.38	112.25
2010	38.06	48.00	133.12

* \$100 invested on June 30, 2005 in stock or index including reinvestment of dividends. (Fiscal year ending June 30.)

Unregistered Sales of Equity Securities

On July 8, 2010, the Company entered into an advisory agreement (the **Advisory Agreement**) with OBX Partners LLC (**OBX**), a Florida limited liability company, under which OBX will act as a financial advisor and strategic consultant to the Ad Hoc Advisory Committee of the Board of Directors of the Company. As part of the consideration for the services to be rendered pursuant to the Advisory Agreement, the Company granted to OBX an option (the **Option**) to purchase 300,000 shares of the Company's Class A Common Stock (the **Shares**) at an exercise price per share of \$1.26, exercisable on or after October 1, 2011. The Option will terminate on November 16, 2010 if OBX has not substantially completed the engagement; if not previously terminated, the Option will terminate on September 30, 2020. Neither the Option nor the Shares to be issued upon exercise of the Option have been registered under the Securities Act of 1933 in reliance upon the exemption from registration afforded by Section 4(2) of the Securities Act of 1933, as amended.

Item 6. Selected Financial Data**(amounts in thousands except per share data)**

The Company's statement of operations and balance sheet data have been derived from the Company's audited, Consolidated Financial Statements (including the Consolidated Balance Sheets of the Company at June 30, 2010 and 2009 and the related Consolidated Statements of Operations of the Company for the fiscal years ended June 30, 2010, 2009 and 2008 appearing elsewhere herein). Certain transactions have affected comparability: Fiscal year 2010 results continued to be negatively affected by the impact of the ongoing global economic downturn on the printing and publishing marketplace and tightening in credit markets. As a result, during the fourth quarter of fiscal year ended June 30, 2010 the Company recorded a restructuring charge of \$540. In addition, during the fourth quarter of the fiscal year ended June 30, 2010, the Company concluded the acquisition of Nordson UV. The acquisition resulted in a gain of \$2,960, and the acquired company is included in the financial statements from the date of acquisition. During the first quarter of the fiscal year ended June 30, 2010, the Company received \$9,600 in cash and recorded a gain on the settlement of a long standing patent infringement lawsuit of \$9,266 and incurred \$911 of costs related to an investigation of violations of the Company's internal control policies and procedures and \$1,183 of costs associated with an amendment to its credit facility. During the fiscal year ended June 30, 2009, as the global economic climate continued to deteriorate and the market for printing equipment faced significant challenges, the Company implemented cost reduction and restructuring programs and recorded \$4,747 of charges associated with the restructuring. In addition, during the third quarter of fiscal year 2009, the Company recorded a goodwill impairment charge of \$5,658 and additional inventory and accounts receivable reserves totaling \$4,715. During the fiscal year ended June 30, 2008, the Company released approximately \$1,640 of the valuation allowance for net deferred tax assets associated with its U.S. operations. In addition, fiscal year ended June 30, 2008 reflects a full year of ownership of both the Oxy-Dry group of companies (**Oxy-Dry**) and Hildebrand Systeme GmbH (**Hildebrand**). During the fiscal year ended June 30, 2007, the Company acquired Oxy-Dry and Hildebrand. The results of the acquired companies are

included in the financial statements from the dates of acquisition. Also, during fiscal year 2007, the Company released approximately \$2,500 of the valuation allowance for net deferred tax assets associated with its U.S. operations.

The following information should be read in conjunction with the aforementioned financial statements and with Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

(amounts in thousands except share and per share data)

General. The following is management's discussion and analysis of certain factors which have affected the Consolidated Financial Statements of Baldwin Technology Company, Inc. (Baldwin or the Company).

Forward-looking Statements

Except for the historical information contained herein, the following statements and certain other statements contained herein are based on current expectations. Similarly, the press releases issued by the Company and other public statements made by the Company from time to time may contain language that is forward-looking. These forward-looking statements may be identified by the use of forward-looking words or phrases such as forecast, believe, expect, intend, anticipate, should, plan, estimate, and potential, among others. Such statements are forward-looking statements that involve a number of risks and uncertainties. The Company cautions investors that any such forward-looking statements made by the Company are not guarantees of future performance and that actual results may differ materially from those in the forward-looking statements. Some of the factors that could cause actual results to differ materially include, but are not limited to the following: (i) the ability to comply with requirements of credit agreements; the availability of funding under such agreements; the ability to maintain adequate liquidity in declining and challenging economic conditions impacting the Company as well as customers, (ii) general economic conditions in the U.S. and other foreign locations, (iii) the ability to obtain, maintain and defend challenges against valid patent protection of certain technology, primarily as it relates to the Company's cleaning systems, (iv) material changes in foreign currency exchange rates versus the U.S. Dollar, (v) changes in the mix of products and services comprising revenues, (vi) a decline in the rate of growth of the installed base of printing

Table of Contents

press units and the timing of new press orders, (vii) the ultimate realization of certain trade receivables and the status of ongoing business levels with the Company's large OEM customers, and (viii) competitive market influences. Additional factors are set forth in Item 1A Risk Factors in this Annual Report on Form 10-K/A for the fiscal year ended June 30, 2010, which should be read in conjunction herewith.

Critical Accounting Policies and Estimates

Baldwin's discussion and analysis of its financial condition and results of operations are based on the Company's Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires Baldwin to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. Baldwin continually evaluates its estimates, including those related to bad debts, inventories, investments, asset impairments, intangible assets, income taxes, warranty obligations, pensions and other post-retirement benefits, contingencies and litigation. Baldwin bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The following critical accounting policies affect the more significant judgments and estimates used in the preparation of the Company's Consolidated Financial Statements.

Revenue Recognition. The Company's products are sold with terms and conditions that vary depending on the nature of the product sold and the cultural and business environments in which the Company operates.

The Company recognizes revenue based on the type of product sold and the obligations under the contract. Revenue is recognized on contracts for design, manufacture and delivery of equipment without installation (equipment sales) and parts, service and consumables at the time of transfer of title or rendering of services. The Company considers revenue realized on equipment sales when it has persuasive evidence of an arrangement, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. In contracts that include additional services, including installation, start-up and/or commissioning (system sales), the Company recognizes revenue on each element of the contract as appropriate. Installation services are provided to the customer on an as-needed basis and may be contracted for separately or included in the same contract as the equipment sale. Revenue is recognized for installation services at the completion of the contractually required services.

Contracts for system sales may include multiple-element revenue arrangements. When the Company enters into multiple-element revenue arrangements, which may include installation services as a contractual element, along with the purchase price of the product as a contractual element, the arrangement is separated into its stand-alone elements for revenue recognition purposes. When the delivered item has value to the customer on a stand alone basis, there is objective and reliable evidence of the fair value of the undelivered item and the arrangement does not include a general right of return, revenue is recognized on each element as separate units of accounting. If these criteria are not met, the arrangement is accounted for as one unit of accounting which would result in revenue being deferred until the last undelivered contractual element is fulfilled.

Standard payment terms may include a deposit to be received with the customer order, progress payments until equipment is shipped and a portion of the balance due within a set number of days following shipment. In those cases when the Company renders invoices prior to performance of the service, the Company records deferred revenue until completion of the services, whereupon revenue is fully recognized.

Freight terms are generally FOB shipping dock with risk of loss passing to the purchaser at the time of shipment. If a loss should occur in transit, the Company is not responsible for and does not administer insurance claims unless the terms are FOB destination or special terms and conditions of the sale require the Company to administer such insurance claims. The customer is not contractually eligible for any refund of the purchase price or right of return of the contracted product, unless the product fails to meet published product specifications and the Company fails to perform its obligations under product warranty terms.

The terms of sale are generally recited in purchase orders, which may contain formal product acceptance clauses. Occasionally, clauses may be included in a contract or purchase order that require acceptance related to certain specifications as outlined in the contract or purchase order. In these instances, the nature of the acceptance is evaluated

to ensure that the Company has met the applicable criteria concurrent with the shipment of equipment to the customer to ensure that revenue recognition is appropriate in the circumstances.

Table of Contents

The Company sometimes uses distributors to assist in the sales function. In these cases, the Company does not recognize revenue until title for the equipment and risk of loss have passed to the ultimate customer, who then becomes obligated to pay with no right of return. In addition, the Company reviews all alliance agreements to determine whether revenue should be recognized on a gross or net basis and recognizes revenue as appropriate.

Baldwin maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of Baldwin's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances could be required.

Baldwin provides for the estimated cost of product warranties at the time revenue is recognized. While Baldwin engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component suppliers, Baldwin's warranty obligation is affected by product failure rates, material usage and service delivery costs incurred in correcting a product failure. Should actual product failure rates, material usage or service delivery costs differ from Baldwin's estimates, revisions to the estimated warranty liability would be required.

Baldwin provides reserves for estimated obsolescence in inventory or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions. If actual market conditions are less favorable than those projected by management, additional inventory reserves may be required. Due to the continued deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization, the Company recorded a \$4,250 additional reserve for obsolescence during the third quarter of fiscal year 2009 for its U.S. inventories.

Baldwin records a valuation allowance to reduce its net deferred tax assets to the amount that is more likely than not to be realized. Baldwin has considered future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance. In the event Baldwin were to determine that it would be able to realize its deferred tax assets in the future in excess of the net recorded amount, an adjustment to the deferred tax asset valuation allowance would increase income in the period such determination is made. Likewise, should Baldwin determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax asset valuation allowance would be recorded through a charge to income in the period such determination is made. Deferred tax assets and liabilities are determined using statutory tax rates for temporary differences between book and tax bases of assets and liabilities, as well as the effects of net operating losses carried forward in certain tax jurisdictions in which the Company operates that may be utilized to offset future taxable income and similar tax credits carried forward that may be utilized to reduce future taxes payable. The Company records valuation allowances on deferred tax assets when appropriate to reflect the expected future tax benefits to be realized. In determining the appropriate valuation allowances, certain judgments are made by management relating to recoverability of deferred tax assets, use of tax loss and tax credit carryforwards, levels of expected future taxable income and available tax planning strategies. The assumptions in making these judgments are updated periodically by management based on overall economic conditions and current business conditions that affect the Company. These management judgments are therefore subject to change based on factors that include, but are not limited to (1) changes in the profitability of the Company's subsidiaries as well as for the Company as a whole, (2) the ability of the Company to successfully execute its tax planning strategies, and (3) the accuracy of the Company's estimate of the potential effect that changes in tax legislation in the jurisdictions where the Company operates may have on the Company's future taxable profits. Failure by the Company to achieve forecasted taxable income or to execute its tax planning strategies may affect the ultimate realization of certain deferred tax assets. Factors that may affect the Company's ability to achieve sufficient forecasted taxable income or successfully execute its tax planning strategies include, but are not limited to, increased competition, general economic conditions, a decline in sales or earnings, loss of market share, delays in product availability and changes in tax legislation.

The Company tests goodwill for impairment at the reporting unit level at least annually in May of each fiscal year. The Company has identified seven reporting units in accordance with ASC 350-20-35 as the lowest level of an entity that is a business, that can be distinguished from other activities, operations, and assets of the entity and for which discrete financial information is available and regularly reviewed by management.

The fair value of each reporting unit is determined utilizing an equal weighting of a combination of income and market approaches of the reporting unit and comparing the fair value with its recorded book value. The income approach applies a discounted cash flow methodology to the Company's future period projections, and a market approach compares the Company's multiples of revenues and earnings with those of comparable companies. The Company considers the combination of valuation techniques, which utilizes internal analysis and external valuations and utilizes both income and market approach to determine fair value, provides a better estimate of the fair value of the reporting unit as opposed to reliance on one valuation technique. Significant estimates and assumptions are inherent in the valuations that reflect a consideration of other marketplace participants, the amount and timing of

Table of Contents

future cash flows (including expected growth rates and profitability) and the discount rate applied to cash flows. Unanticipated market or macroeconomic events or circumstances may occur that could affect the accuracy or validity of the estimates and assumptions used in the determination of fair value. A significant reduction in the estimated fair values could result in impairment charges that could materially affect financial statements in any given year.

If, during the annual impairment review, the book value of the reporting unit exceeds the fair value, the implied fair value of the reporting unit's goodwill would be compared with the carrying amount of the unit's goodwill. If the carrying amount exceeds the implied fair value, goodwill is written down to its implied fair value. ASC 350 requires management to estimate the fair value of each reporting unit, as well as the fair value of the assets and liabilities of each reporting unit, other than goodwill. The implied fair value of goodwill is determined as the difference between the fair value of a reporting unit, taken as a whole, and the fair value of the assets and liabilities of such reporting unit.

At June 30, 2010 the annual impairment test for goodwill indicated that all reporting unit fair values exceeded their respective recorded values. However, the estimated fair value of the German reporting unit which exceeded carrying value by approximately 20% has been disproportionately impacted by the economic downturn. The current valuation has the reporting unit returning to sales and earnings more consistent with long-term business plans. Failure to achieve the plans, further or continued deterioration of macro economic conditions could result in a valuation that could trigger impairment of goodwill. The amount of goodwill at the German reporting unit is approximately \$13 million.

During fiscal year ended June 30, 2009 as a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value as required. A two-step process was used to test goodwill impairment. The first step was to determine if there was an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. Upon indication of impairment, a second step would be performed to determine the amount of the impairment by comparing the implied fair value of the reporting unit's goodwill with its carrying value.

As a result of the assessment, and the impact of the deteriorating economic and market conditions that led to a reduced demand for the Company's products supplied by its Japan reporting unit, the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

Other long-lived assets are reviewed for impairment whenever events or circumstances indicate that the carrying amount of an asset may not be recoverable. Events which could trigger an impairment review include, among others, a decrease in the market value of an asset, the asset's inability to generate income from operations and positive cash flow in future periods, a decision to change the manner in which an asset is used, a physical change to the asset and a change in business climate. Baldwin calculates estimated future undiscounted cash flows, before interest and taxes, of the related operation and compares it to the carrying value of the asset in determining whether impairment potentially exists. If a potential impairment exists, a calculation is performed to determine the fair value of the long-lived asset. This calculation is based upon a valuation model and discount rate commensurate with the risks involved. Third party appraised values may also be used in determining whether impairment potentially exists. Future adverse changes in market conditions or poor operating results of a related reporting unit may require the Company to record an impairment charge in the future.

The impairment review process requires management to make significant estimates and judgments regarding the future cash flows expected to result from the use and, if applicable, the eventual disposition of the respective assets. The key variables that management must estimate in determining these expected future cash flows include sales volumes, sales prices, sales growth, production and operating costs, capital expenditures, working capital requirements, market conditions and other economic factors. Significant management judgment is involved in estimating these variables, and such estimates are inherently uncertain; however, the assumptions used are reasonable and consistent with the Company's internal planning. Management periodically evaluates and updates the estimates based on conditions that influence these variables.

The assumptions and conditions for determining impairments of property, plant and equipment, goodwill and other intangible assets reflect management's best assumptions and estimates, but these items involve inherent uncertainties as described above, many of which are not under management's control. As a result, the accounting for such items could result in different estimates or amounts if management used different assumptions or if different conditions

occur in future accounting periods.

Pension obligations and the related benefits costs are determined based upon actuarial assumptions regarding mortality, discount rates, long-term return on assets, salary increases, and other factors. Changes in these assumptions can result in changes to the recognized pension expense and recorded liabilities.

Table of Contents

For Stock-Based Compensation, the Company uses the Black-Scholes option pricing model to determine the fair value of stock options issued as compensation to key employees and non-employee directors. The model determines a fair value based on a number of key variables including the grant date price of the Company's common stock and the related exercise or strike price, estimated dividend yield, estimated term of the option prior to exercise, risk free rate of interest over the estimated term and a measure of the volatility of the Company's common stock over the estimated term. Certain of these variables encompass a degree of subjectivity whose variability could result in significantly different values for the grant date fair value of stock option awards. In addition, the Company recognizes share-based compensation cost based upon the number of awards that are expected to vest. This method implicitly includes an estimate for forfeitures based on employee turnover, reductions in force and other factors specific to the award recipient population. The Company has a policy to review its estimate of award forfeitures on an annual basis or when specific facts and circumstances warrant additional review.

Results of Operations

The following table sets forth certain of the items (expressed as a percentage of net sales) included in the Selected Financial Data and should be read in connection with the Consolidated Financial Statements of the Company, including the notes thereto, presented elsewhere in this report.

	Years Ended June 30,		
	(Restated)		
	2010	2009	2008
Net sales	100.0%	100.0%	100.0%
Cost of goods sold	70.8	69.7	68.4
Inventory reserve		2.4	
Gross profit	29.2	27.9	31.6
Selling, general and administrative expenses	22.2	20.6	18.7
Engineering and development expenses	9.1	8.4	7.9
Restructuring charges	0.4	2.7	.4

Provision (benefit) for income taxes	.8	(1.1)	.8
Net income	2.6%	(6.7)%	2.7%

Overview

Baldwin is a leading global supplier of process automation equipment for the commercial and newspaper printing industries. The Company offers its customers a broad range of market-leading technologies, products and systems that enhance the quality of printed products and improve the economic and environmental efficiency of printing presses. Headquartered in Shelton, Connecticut, the Company has sales and service centers and product development and manufacturing operations in the Americas, Asia, Australia and Europe. Baldwin's technology and products include cleaning systems and related consumables, fluid management and ink control systems, web press protection systems and drying systems, blending and packaging services, and related services and parts.

The Company manages its business as one reportable business segment built around its core competency in process automation equipment.

The market for printing equipment faced and continues to face significant challenges in the current economic environment. Several of the Company's largest customers (major OEM press manufacturers) have reported weakness in orders and sales, particularly for commercial presses. These events translated into a lower level of business activity for the Company and were reflected in lower order intake and reduced shipment levels of the Company's equipment. As a result of the slowing global economy, the Company has implemented cost reduction and restructuring programs designed to mitigate the impact of the continuing weak market for printing equipment.

Table of Contents

Highlights for Fiscal Year ended June 30, 2010

Revenues declined 16.3%, versus the year ago comparable period.

Backlog of \$33,917 at June 30, 2010 decreased 12% versus June 30, 2009.

Order intake was down 18% versus the comparable year ago period.

Cash flow provided by operations during the year ended June 30, 2010 of \$11,507 reflects cash generated from operations supplemented by cash received from settlement of a long standing patent infringement lawsuit.

The Company recorded additional restructuring charges of \$540.

On June 30, 2010 the Company successfully completed the previously announced acquisition of Nordson UV, a manufacturer of ultraviolet curing systems, lamps and parts.

See discussion below related to consolidated results of operations, liquidity and capital resources.

Fiscal Year Ended June 30, 2010 versus Fiscal Year Ended June 30, 2009

Consolidated Results

Net Sales. Net sales for the fiscal year ended June 30, 2010, decreased \$28,791, or 16% to \$147,781 from \$176,572 for the year ended June 30, 2009. Currency rate fluctuations effecting the Company's overseas operations increased net sales for the current period by \$4,490. The revenue decrease primarily reflects weakness in demand for the Company's equipment offerings.

In Europe, net sales decreased approximately \$12,852, including \$1,313 of favorable effects from exchange rate fluctuations. The decrease was attributable to reduced demand for the Company's products as a result of the global economic contraction and lack of available financing sources for equipment purchases by customers. OEM press manufacturers in Germany experienced reduced orders and sales, and printers and publishers have deferred purchases of the Company's equipment until final demand and liquidity return to the market.

In Asia, particularly Japan, net sales decreased approximately \$9,702, including \$3,177 of favorable effects from exchange rate fluctuations. The decrease reflects the impact of the slowing Asian economies in the commercial and newspaper markets in Japan for the Company's cleaning equipment.

Net Sales in the Americas decreased \$6,237, primarily reflecting lower demand in the U.S. commercial market for cleaning systems.

Gross Profit. Gross profit for the fiscal year ended June 30, 2010 decreased to \$43,152 (29.2% of sales) versus \$49,179 (27.9% of sales) for the fiscal year ended June 30, 2009. Fiscal year 2009 gross profit was negatively impacted by an inventory write-off in the U.S. of \$4,250 or 2.4% associated with a deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, a general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization. Currency rate fluctuations increased gross profit by \$1,585 in the current fiscal year. Gross profit as a percentage of net sales decreased after giving effect to the inventory write-off, (to 29.7% from 30.3%) primarily as a result of continued pricing pressures from OEM and end users and unfavorable overhead absorption related to the reduced volumes. Partially offsetting these impacts were lower costs associated with announced restructuring and cost saving initiatives resulting in lower direct and indirect labor and associated fringe benefits, lower subcontractor and lower technical service costs.

Selling, General and Administrative Expenses. Selling, general and administrative expenses (SG&A) of \$32,881 for the fiscal year ended June 30, 2010 decreased \$3,328, or 9% versus the fiscal year ended June 30, 2009. Currency rate fluctuations effecting the Company's overseas operations increased SG&A expenses for fiscal year 2010 by \$898.

G&A expenses for the fiscal year ended June 30, 2010, decreased \$1,629 or 8% including unfavorable exchange effects of \$427 compared to the fiscal year ended June 30, 2009. This decrease primarily reflects cost reduction actions leading to reductions in compensation, benefit costs, outside service costs, insurance, travel, annual meeting and investor relations costs, together with reduced cash discounts and lower bad debt expense. These reductions were

partially offset by approximately \$900 of costs related to a special investigation into violation of the Company's internal control procedures, expenses associated with the Nordson UV acquisition of \$330 and bank amendment fees of \$250.

Table of Contents

Selling expenses for the fiscal year ended June 30, 2010 decreased \$1,698, or 11%, including unfavorable exchange effects of \$471 compared to the fiscal year ended June 30, 2009. The decrease in selling expenses reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount, cost reduction actions and the lower level of sales activity.

Engineering and Development Expenses. Engineering and development expenses for the fiscal year ended June 30, 2010 decreased \$1,522, or 10%, including \$412 of unfavorable exchange effects versus the fiscal year ended June 30, 2009 and reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount. Engineering and development expenses were approximately 8% of sales for each of the fiscal years ended June 30, 2010 and June 30, 2009.

Restructuring. The Company recorded \$540 of restructuring costs during the fourth quarter of fiscal year ended June 30, 2010 versus \$4,747 in the comparable prior year period. The current year restructuring plan is designed to achieve operational efficiencies in Germany and consists of employee terminations. The fiscal year 2009 plan consisted primarily of reductions in employment levels and the consolidation of production facilities in Germany in response to continued weak market conditions.

Impairment of Goodwill. The Company's annual impairment testing of goodwill for the fiscal year ended June 30, 2010 indicated no impairment. In fiscal year 2009, as a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company's goodwill impairment assessment indicated an impairment of goodwill and the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

Legal Settlement. During the fiscal year ended June 30, 2010, the Company recorded a net gain on the settlement of a patent infringement lawsuit of \$9,266. Please refer to Note 20 in Notes to Consolidated Financial Statements for further discussion of this settlement.

Interest, Net and Other. Interest expense, net, of \$3,058 for the fiscal year ended June 30, 2010 increased \$790 versus the fiscal year ended June 30, 2009. Interest expense includes costs incurred during the first quarter of fiscal year 2010 related to an amendment to the Company's Credit Agreement. Certain costs associated with the amendment, together with legacy deferred financing costs aggregating approximately \$1,183, were charged to expense during the quarter ended September 30, 2009. The increase was partially offset by \$423 resulting from lower average debt and lower interest rates in the current year versus the year ended June 30, 2009. Currency rate fluctuations had no impact in the current fiscal year.

Other income and expense, net, was an expense of \$418 versus income of \$878 for the periods ended June 30, 2010 and 2009, respectively, and primarily reflects net foreign exchange gains and losses.

Gain on Bargain Purchase. During the fourth quarter of fiscal year ended June 30, 2010, the Company completed the previously announced acquisition of Nordson UV and recorded a net gain of \$2,960 on the bargain purchase, representing the excess of net assets acquired over consideration paid. Please refer to Note 15 to the Consolidated Financial Statements for further discussion.

Income (Loss) Before Income Taxes. Income before income taxes for the fiscal year ended June 30, 2010 was \$5,022 compared to loss before income taxes of \$13,824 for the fiscal year ended June 30, 2009. The income before income taxes includes the aforementioned gain on legal settlement of \$9,266 and the gain on bargain purchase of \$2,960. The loss before income taxes for the fiscal year ended June 30, 2009 includes the aforementioned goodwill impairment charge of \$5,658, restructuring charges of \$4,747 and additional inventory reserve totaling \$4,250.

Income Taxes. The Company recorded an income tax expense of \$1,145 for the fiscal year ended June 30, 2010 versus a benefit of \$2,013 during the fiscal year ended June 30, 2009. The effective tax rates of 22.8% and 14.6% for the fiscal years ended June 30, 2010 and 2009, respectively, differ from the statutory rate. In fiscal year 2010 the tax rate benefited by release of foreign contingency reserves, gain on bargain purchase and foreign rate differential offset by negative impacts of adjustments to valuation allowance related to foreign tax credit and net operating loss utilization. In fiscal year 2009 the tax rate has been negatively impacted by: (a) no benefit recognized for losses incurred in certain countries as the realization of such benefits was not more likely than not, and (b) foreign and domestic permanent items including the non-deductibility of the fiscal year 2009 goodwill impairment charge. The Company continues to assess the need for its deferred tax asset valuation allowance in the jurisdictions in which it

operates. Any adjustment to the deferred tax asset valuation allowance would be recorded in the income statement of the period that the adjustment is determined to be required.

Net Income (Loss). The Company's net income was \$3,877 for the fiscal year ended June 30, 2010 compared to net loss of \$11,811 for the fiscal year ended June 30, 2009.

Table of Contents

Non-GAAP Financial Measures. Consolidated EBITDA is a non-GAAP financial measure within the meaning of Regulation G promulgated by the Securities and Exchange Commission. This non-GAAP measure is provided because management of the Company uses this financial measure as an indicator of business performance in maintaining and evaluating the Company's on-going financial results and trends. The Company believes that both management and investors benefit from referring to this non-GAAP measure in assessing the performance of the Company's ongoing operations and liquidity and when planning and forecasting future periods. This non-GAAP measure also facilitates management's internal comparisons to the Company's historical operating results and liquidity. The following is a reconciliation of the net income (loss) as reported to Consolidated EBITDA.

	(Restated)	
	2010	2009
	(in thousands)	
Net income (loss) as reported	\$ 3,877	\$ (11,811)
Provision for income taxes	1,145	(2,013)
Interest, net	3,058	2,268
Depreciation and amortization	2,665	2,773
EBITDA	\$ 10,745	\$ (8,783)

Fiscal Year Ended June 30, 2009 versus Fiscal Year Ended June 30, 2008**Highlights for Fiscal Year ended June 30, 2009**

Revenues, excluding currency effects, declined 23%, versus the year ago comparable period.

Backlog of \$38,693 at June 30, 2009 decreased 20% versus June 30, 2008.

Order intake was down 27% versus the comparable year ago period.

Cash flow provided by operations during the year ended June 30, 2009 was \$2,631.

The Company recorded restructuring charges of \$4,747 and implemented cost saving initiatives that will result in benefits in excess of \$24,000.

The Company completed its analysis of the recoverability of goodwill and the net realizable value of inventory and recorded a non-cash goodwill impairment charge of \$5,658 and an inventory reserve adjustment of \$4,250 during the third quarter of fiscal year 2009.

Due to the charges taken by the Company during the third quarter ended March 31, 2009, the Company was not in compliance with certain provisions of its Credit Agreement. In July 2009, the Company successfully concluded an amendment to its Credit Agreement with its lenders covering the period through November 21, 2011.

The effective tax rate for the period ended June 30, 2009 differs from the statutory rate, reflecting the effect of the following factors: (i) no tax benefit recognized for losses incurred in certain jurisdictions, as the realization of any such benefit was not more likely than not; and (ii) the impairment of goodwill which has no associated tax benefit.

See discussion below related to consolidated results of operations, liquidity and capital resources.

Consolidated Results

Net Sales. Net sales for the fiscal year ended June 30, 2009, decreased \$59,758, or 25% to \$176,572 from \$236,330 for the year ended June 30, 2008. Currency rate fluctuations effecting the Company's overseas operations

decreased net sales for the current period by \$6,518. Excluding the effects of currency translation, net sales for fiscal year 2009 decreased \$53,240 or 23% when compared with fiscal year 2008. The decrease primarily reflects diminished demand for the Company's cleaning equipment.

In Europe, net sales (excluding the effects of currency translations) decreased approximately \$30,193. Reduced order and sales activity for new printing equipment with by OEM press manufacturers, primarily in Germany, and lower level demand from end user customers primarily account for the decline in sales in the commercial market.

In Asia, particularly Japan, net sales decreased approximately \$13,351 (excluding the effects of currency translations). The decrease reflects the impact of reduced demand for the Company's cleaning equipment in the Asian commercial and newspaper markets.

Net Sales in the Americas decreased \$9,696, primarily reflecting lower demand for cleaning systems in the U.S. newspaper market.

Table of Contents

Gross Profit. Gross profit for the fiscal year ended June 30, 2009 decreased to \$49,179 (27.9% of sales) versus \$74,831 (31.7% of sales) for the fiscal year ended June 30, 2008. Due to the continued deteriorating macro-economic environment, a decision to transfer equipment manufacturing from the U.S. to Germany, a general restructuring of the U.S. operations and the inability of the U.S. operation to reach target goals for inventory utilization, the Company recorded a \$4,250 write down of inventory in the U.S., negatively impacting gross profit. Excluding the adjustment for inventory, gross profit for the fiscal year ended June 30, 2009, was \$53,429 (30.3% of net sales). Currency rate fluctuations decreased gross profit by \$2,780 in the current period. Gross profit excluding the inventory write down as a percentage of net sales decreased primarily as a result of the effect of the lower volume noted above on overhead absorption, partially offset by lower warranty costs.

Selling, General and Administrative Expenses. Selling, general and administrative expenses (SG&A) of \$36,209 for the fiscal year ended June 30, 2009, including a \$465 additional reserve of a customer account receivable, decreased \$7,996, or 18% versus the fiscal year ended June 30, 2008. Currency rate fluctuations effecting the Company's overseas operations decreased SG&A expenses for fiscal year 2009 by \$1,285. Excluding the effects of currency translation, SG&A expenses for fiscal year 2009 decreased \$6,711 or 15% when compared with the corresponding year ago period.

G&A expenses, excluding the effects of currency translations of \$643 for the fiscal year ended June 30, 2009, decreased \$3,935 or 15% compared to the fiscal year ended June 30, 2008. This decrease primarily reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount (approximately \$1,400), reduced incentive compensation accruals (approximately \$1,700), and lower outside professional services and consultant cost (approximately \$1,600).

Selling expenses excluding the effects of currency translations of \$642 for the fiscal year ended June 30, 2009 decreased \$2,776 or 15% versus the fiscal year ended June 30, 2008. The decrease in selling expenses reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount and the lower level of sales activity of approximately \$1,300, coupled with reduced trade show/advertising costs of approximately \$1,500.

Engineering and Development Expenses. Engineering and development expenses excluding the effects of currency translations of \$648 for the fiscal year ended June 30, 2009 decreased \$3,003 or 16% versus the fiscal year ended June 30, 2008 and reflects reduced salary, benefit and other associated employee costs commensurate with reductions in headcount. Engineering and development expenses were approximately 8% of sales for each of the fiscal years ended June 30, 2009 and June 30, 2008.

Restructuring. The Company recorded \$4,747 of restructuring costs during the fiscal year ended June 30, 2009 versus \$960 in the comparable prior year period. The current year restructuring plan, adopted in response to continued weak market conditions, is designed to achieve operational efficiencies in Germany and consists primarily of employee terminations and the consolidation of production facilities in Germany. The fiscal year 2008 Plan consisted primarily of reductions in employment levels in Germany in an effort to achieve operational efficiencies.

Impairment of Goodwill. As a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value. As a result of the assessment, the Company recorded a non-cash goodwill impairment charge of \$5,658 related to its Japan reporting unit during the third quarter of fiscal year 2009.

Interest and Other. Interest expense of \$2,305 for the fiscal year ended June 30, 2009 decreased \$822 versus the fiscal year ended June 30, 2008. This decrease reflects lower average debt levels and lower average interest rates during the fiscal year ended June 30, 2009 versus the fiscal year ended June 30, 2008. Currency rate fluctuations decreased interest expense \$137 in the current period.

Interest income declined \$146, while other income and expense, net, amounted to income of \$868 versus income of \$271 for the periods ended June 30, 2009 and 2008, respectively, and primarily reflects net foreign exchange gains.

(Loss) Income Before Income Taxes. Loss before income taxes for the fiscal year ended June 30, 2009 was \$13,824 compared to income before income taxes of \$8,353 for the fiscal year ended June 30, 2008. The loss before income taxes reflects the aforementioned goodwill impairment charge of \$5,658, restructuring charges of \$4,747, and additional inventory and accounts receivable reserves totaling \$4,715. For the current fiscal year, currency rate fluctuations increased the loss before income taxes by \$886.

Income Taxes. The Company recorded an income tax benefit of \$2,013 for the fiscal year ended June 30, 2009 versus a provision of \$1,862 during the fiscal year ended June 30, 2008. During the year ended June 30, 2008, the Company reversed approximately

Table of Contents

\$1,642 (\$1,225 in the third quarter and \$415 in the fourth quarter) of its valuation allowance for net deferred tax assets associated with its U.S. operations. This reversal of a portion of the U.S. operations deferred tax valuation allowance is based upon i) prudent and feasible tax planning strategies, ii) the U.S. operations historical and projected operating performance, and iii) management's expectation that its operations will generate sufficient taxable income in future periods to realize a portion of the tax benefits associated with its deferred tax assets. The effective tax rates of 14.6% and 22.2% for the fiscal years ended June 30, 2009 and 2008, respectively, differ from the statutory rate, because the expected benefit in fiscal year 2009 and benefit associated with the reversal of a portion of the U.S. valuation allowance in fiscal year 2008 were partially offset by (a) foreign income taxed at rates different than the U.S. statutory rate, (b) no benefit recognized for losses incurred in certain countries as the realization of such benefits was not more likely than not, and (c) foreign and domestic permanent items including the non-deductibility of the fiscal year 2009 goodwill impairment charge. The Company continues to assess the need for its deferred tax asset valuation allowance in the jurisdictions in which it operates. Any adjustment to the deferred tax asset valuation allowance would be recorded in the income statement of the period that the adjustment is determined to be required.

Net (Loss) Income. The Company's net loss amounted to \$11,811 for the fiscal year ended June 30, 2009 compared to net income of \$6,491 for the fiscal year ended June 30, 2008. Currency translation unfavorably impacted net income by approximately \$764.

Impact of Inflation

The Company's results are affected by the impact of inflation on manufacturing and operating costs. Historically, the Company has used selling price adjustments, cost containment programs and improved operating efficiencies to offset the otherwise negative impact of inflation on its operations.

Liquidity and Capital Resources

The Company's cash flow from operating, investing and financing activities as reflected in the Consolidated Statement of Cash Flows are summarized in the tables below.

	Years Ended June 30,		
	2010	2009	2008
	(in thousands)		
Cash flow from operating activities:			
Net cash provided by operating activities	\$ 11,507	\$ 2,631	\$ 7,632

Net cash from operating activities for the year ended June 30, 2010 increased \$8,876 compared to fiscal year 2009. The increase in cash provided reflects: (i) receipt of the proceeds from the legal settlement, (ii) lower compensation payments associated with management incentives and lower utilization of vacation accruals, (iii) timing of payment of accounts and notes payable and (iv) lower restructuring payments. Partially offsetting these increases were lower collections on accounts/notes receivable and customer deposits. Net cash from operating activities for the year ended June 30, 2009 decreased \$5,001 compared to fiscal year 2008. The decrease reflects reduced profitability combined with lower levels of accounts/notes payable due to the timing of vendor payments, lower accrued compensation, as bonus payments in fiscal 2009 for fiscal year 2008 performance exceeded those in fiscal 2008 for fiscal year 2007 performance, charges to vacation accruals during extended facility shut downs, higher restructuring payments and warranty related payments. Partially offsetting these decreases were lower balances of accounts/notes receivable and inventory and an increase in customer deposits. The decreased balances in accounts/notes receivable and inventory reflect the lower revenue in fiscal 2009 versus fiscal 2008 as well as the Company's continued focus on working capital management.

Other	(533)	(628)	(111)
Net cash (used in) provided by financing activities	\$ (10,213)	\$ 3,614	\$ (11,449)

The Company's primary source of external financing is its Credit Agreement, as amended (the "Credit Agreement"), with Bank of America ("BoFA") which has a term that ends on November 21, 2011. Borrowings under the Credit Agreement are secured in the U.S. by a pledge of substantially all of the Company's domestic assets (approximately \$18,000) and in Europe by a pledge of the Company's European assets and the stock of the Company's European subsidiaries and certain Asian subsidiaries.

Cash used by financing activities of \$10,213 for the period ended June 30, 2010 primarily reflects the use of net cash proceeds from the legal settlement of a long standing patent infringement lawsuit of approximately \$7,700 to repay the term loan under the Credit Agreement in accordance with the provisions of the July 31, 2009 amendment to the Credit Agreement. In addition, cash used for financing activities reflects the scheduled term loan payments of approximately \$2,507 and payment of debt financing costs of \$818. These payments were partially offset by borrowings under the revolving loan under the Credit Agreement of \$693 and advances associated with the financing of the Nordson UV acquisition.

During fiscal year 2009, cash from financing activities of \$3,614 primarily reflected borrowings in excess of repayments of \$4,399. In addition, the Company utilized \$602 to meet long-term obligations under its capital lease and assumed liabilities obligations and \$183 of cash to purchase shares of its Class A Common Stock under its share repurchase program. At June 30, 2009, approximately \$2.4 million remained available for use under the share repurchase program. Repurchases were restricted by the terms of the Credit Agreement amendment on July 31, 2009; and no repurchases were made during fiscal year 2010.

During fiscal year 2008, the Company utilized cash in financing activities of \$11,449. The Company used its operating cash flow to make net debt repayments against its external credit facilities of \$10,578. In addition, the Company utilized \$760 of cash to purchase shares of its Class A Common Stock under its share repurchase program. At June 30, 2008, approximately \$2.5 million remained available for use under the share repurchase program.

On July 31, 2009, the Company concluded an amendment to its Credit Agreement with BoFA. The amendment modified the Credit Agreement as follows: (i) USD and Euro borrowings bear interest at LIBOR plus 4.50%, or in the case of U.S. dollar loans at the option of the Company, at the prime rate plus 3.00%, (ii) reduced the amount of revolving commitment from \$35,000 to \$25,000 provided that the aggregate of all revolving loans outstanding plus \$7,900 not exceed \$25,000, and (iii) increased collateral.

The Credit Agreement as amended on July 31, 2009 required the Company to satisfy minimum EBITDA, Fixed Charge Coverage Ratio, Total Funded Debt Ratio, Minimum Currency Adjusted Net Sales, Capital Expenditures, and Minimum Liquidity tests. Minimum EBITDA, as defined, must not be less than i) \$1,100 for the six month period ending December 31, 2009, ii) \$2,300 for the three Fiscal Quarters ending March 31, 2010, iii) \$4,100 for the fiscal year ending June 30, 2010, and iv) \$12,000 for each Four Fiscal Quarter computation period ending on or after September 30, 2010. The Fixed Charge Coverage Ratio, as defined, must not be less than 1.25 to 1.00 for the Four

Fiscal Quarter Computation Period ending on and after September 30, 2010. The Leverage Ratio must not exceed 3.00 to 1.00 for the Four Fiscal Quarter Computation Period ending on and after September 30, 2010. Currency Adjusted Net Sales must not be less than certain defined levels for the fifteen reporting periods consisting of three consecutive three-month periods commencing with the first reporting period ending on July 31, 2009 and the final reporting period ending on September 30, 2010. Capital expenditures must not exceed \$1,000 for the fiscal year ending June 30, 2010. Minimum Liquidity, as defined as the U.S. Dollar Equivalent of consolidated cash and cash equivalents of the Parent, Domestic and European Subsidiaries shall not be less than \$300. The Company may not permit borrowings under the Revolving Loan or request issuance or increase in any Letters of Credit if the sum of all Dollar Equivalent Revolving Outstandings, Letters of Credit and Specified Availability exceeds \$25,000.

Table of Contents

On May 12, 2010, the Company entered into Waiver and Amendment No. 6 to the Credit Agreement (the Waiver and Amendment) with BofA. The Waiver and Amendment provided a waiver by the lenders of the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ending April 30, 2010 and amended the Credit Agreement to change the date for delivery of the Company's financial projections for the Fiscal Year commencing July 1, 2010.

On June 9, 2010, the Company entered into Waiver and Amendment No. 7 to Credit Agreement (the Amendment) with BofA. The Amendment provided for a waiver by the lenders of the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ended May 31, 2010. The Amendment also amended the Credit Agreement to make certain modifications to the required currency adjusted net sales covenant and EBITDA financial covenants. Currency Adjusted Net Sales must not be less than certain defined levels for the periods consisting of two consecutive months ending June 30, 2010. The minimum EBITDA covenant to provide that minimum EBITDA (as defined) must not be less than \$2,769 for the fiscal year ending June 30, 2010 and \$12,000 for each Four Fiscal Quarter computation period ending on and after September 30, 2010. The Amendment also permitted the Company to acquire Nordson UV and incur certain debt in connection with the acquisition. At June 30, 2010 the Company originally concluded that it was in compliance with all financial covenants under the amended Credit Agreement. However, as a result of the required restatement, the Company failed to meet certain financial covenants and as more fully described below entered into Waiver and Amendment No. 10 to the credit agreement.

On September 28, 2010, the Company entered into Amendment No. 8 to the Credit Agreement (the Amendment #8) with BofA. Under the terms of the Amendment, the total commitment under the revolving Credit Agreement was reduced from \$25 million to \$20 million, certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,671 shares of common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

As a result of the required restatements of the Company's financial results for the periods ended June 30, 2010, September 30, 2010 and December 31, 2010, the Company was not in compliance with the financial covenants contained in its Credit Agreement. Specifically, as a result of the restatements, at June 30, 2010, the Company failed to meet the established June 30, 2010 targets for minimum EBITDA and Currency Adjusted Net Sales. Additionally, as a result of the restatement, during the quarter ended September 30, 2010, the Company failed to meet the established target for Currency Adjusted Net Sales for the consecutive three-month periods ended July 31, 2010 and August 30, 2010.

In addition, the Company has reported that it did not meet the minimum EBITDA covenant for the period ended March 31, 2011 and did not meet the Currency Adjusted Net Sales target for the three-consecutive months ended April 30, 2011.

On May 16, 2011, the Company entered into Waiver and Amendment No. 10 to the Credit Agreement (Amendment No. 10) with BofA. Amendment No.10 provided for a waiver by the lenders of the Company's failure to meet the applicable minimum EBITDA and Currency Adjusted Net Sales for all periods noted above. Under the terms of Amendment No. 10, the Company provided the Lenders Warrants with a term of ten years to purchase 372,374 shares of the Company's Class A common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after May 16, 2013 to request a cash settlement equal to the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. Amendment No. 10 sets new covenants for Currency Adjusted Net Sales, establishes minimum EBITDA levels, adjusts interest rate provisions, approves the disposition of the assets of the Company's food blends discontinued operations and establishes certain milestones regarding refinancing the loan.

Restructuring and Cost Saving Initiatives

During each of the fiscal years ended June 30, 2010 and 2009, the Company announced a restructuring initiative in response to the significant challenges facing the market for printing equipment due to the current economic environment. These restructuring initiatives were designed to reduce the Company's worldwide cost base and

strengthen its competitive position. The Company made cash payments against these plans of \$1,899 in fiscal year 2010 and \$3,051 in fiscal 2009 and anticipates a total of approximately \$897 in addition to be paid through the second quarter of fiscal year 2011. The restructuring actions, combined with other initiatives implemented during the fiscal years 2009 and 2010, eliminated in Europe, the U.S. and Japan a total of approximately 113 full-time positions (18% of the workforce).

In addition, the Company eliminated merit increases for all of the Company's workforce (except those covered by existing union contracts), temporarily suspended the Company's matching contribution to the U.S. 401(k) plan, reduced U.S. based healthcare contributions and has entered into voluntary salary reduction agreements from senior managers. The Company estimates that annual savings from all of the above restructuring and cost saving initiatives will be approximately \$10,540.

The Company has also instituted cost reduction initiatives involving a reduction in overtime, the implementation of short-time work weeks, the reduction of external service providers and the extension of holiday shut downs, the reduced use of subcontractors and temporary labor and related travel costs, and the management of other variable costs, all of which have combined to provide additional annual savings of approximately \$13,900.

The Company maintains relationships with foreign and domestic banks, which combined, have extended credit facilities totaling \$32,256 at June 30, 2010. As of June 30, 2010, the Company had \$19,535 outstanding (including Letters of Credit and Guarantees) under these facilities. The amount available under these facilities at June 30, 2010 was \$4,521.

The Company believes that its cash flow from operations, along with its available bank lines of credit is sufficient to finance its operations and other capital requirements over the term of the Credit Agreement. However, the Company believes that, if needed, other available sources of liquidity could be limited.

At June 30, 2010 and 2009, the Company did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, established for the purpose of facilitating off-balance

Table of Contents

sheet arrangements or other contractually narrow or limited purposes. As such, the Company is not exposed to any financing, liquidity, market or credit risk that could arise if the Company had engaged in such relationships.

Contractual Obligations

The Company's contractual obligations as of June 30, 2010 are summarized below:

	Total at June 30, 2010	Fiscal Years Ending June 30,					2016 and thereafter
		2011	2012	2013	2014	2015	
				(in thousands)			
Loans payable	\$ 4,525	\$ 4,525	\$	\$	\$	\$	\$
Capital lease obligations	102	99	3				
Long-term debt	16,455	389	14,376	499	561	630	
Non-cancelable operating lease obligations	23,121	6,376	4,594	3,537	2,339	1,892	4,383

Supplemental compensation ⁽¹⁾	8,978	1,345	804	1,030	813	613	4,373
Restructuring payments	897	897					
Interest expense	1,440	852	388	96	68	36	
Total contractual cash obligations	\$ 63,629	\$ 21,766	\$ 20,993	\$ 5,162	\$ 3,781	\$ 3,171	\$ 8,756

⁽¹⁾ the amount includes estimated benefit payments as well as estimated contributions for fiscal year 2010 (See Note 13).

Recent Accounting Pronouncements**Revenue Arrangements with Multiple Deliverables**

In October 2009, the FASB issued ASC Update No. 2009-13, Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements. The consensus in Update No. 2009-13 supersedes certain guidance in Topic 605 (formerly EITF Issue No. 00-21, Multiple-Element Arrangements) and requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. The consensus eliminates the use of the residual method of allocation and requires the use of the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverables subject to ASC 605-25. The Company is required to adopt Update No. 2009-13 as of July 1, 2010. The Company does not believe adoption of Update No. 2009-13 will have a material effect on its future results of operations and financial position.

Codification

In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles (SFAS 168). SFAS 168 establishes the FASB Accounting Standards CodificationTM (Codification or ASC) as the sole source of authoritative GAAP recognized by the FASB for nongovernmental entities. Rules and interpretive releases issued by the SEC under federal securities laws are also sources of authoritative GAAP for SEC registrants. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009 (effective September 30, 2009 for the Company). The adoption of SFAS 168 did not have a material effect on the Company's Consolidated Financial Statements.

Fair Value Measurements

On July 1, 2008, the Company adopted certain provisions of a new accounting standard which defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. On July 1, 2009, the Company adopted the remaining provisions of this accounting standard as it relates to nonfinancial assets and liabilities that are not recognized or disclosed at fair value on a recurring basis. The adoption of this standard as it related to certain nonfinancial assets and liabilities did not impact the Company's consolidated financial statements in any material respect.

On July 1, 2009, the Company adopted the accounting pronouncement that provides additional guidance for estimating fair value in accordance with the accounting standard for fair value measurements when the volume and level of activity for the asset or liability has significantly decreased. This pronouncement stated that when quoted market prices may not be determinative of fair value, a

Table of Contents

reporting entity shall consider the reasonableness of a range of fair value estimates. The adoption of this standard as it related to inactive markets did not impact the Company's consolidated financial statements in any material respect.

Business Combinations

On July 1, 2009, the Company adopted the accounting pronouncements relating to business combinations, including assets acquired and liabilities assumed arising from contingencies. These pronouncements established principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree as well as provides guidance for recognizing and measuring the goodwill acquired in the business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. In addition, these pronouncements eliminate the distinction between contractual and noncontractual contingencies, including the initial recognition and measurement criteria and require an acquirer to develop a systematic and rational basis for subsequently measuring and accounting for acquired contingencies depending on their nature. The adoption of these pronouncements did have an impact on the manner in which the Company accounts for acquisitions. See Note 15 to the Consolidated Financial Statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

(amounts in thousands)

The Company operates internationally and is exposed to certain market risks arising from transactions that in the normal course of business include fluctuations in interest rates and currency exchange rates. While the Company occasionally uses derivative financial instruments in order to manage or reduce these risks, typically currency futures contracts and interest rate swap agreements, the Company does not enter into derivative or other financial instruments for trading or speculative purposes.

Interest Rate and Debt Sensitivity

As of June 30, 2010, the Company had debt totaling \$20,980, most of which bears interest at floating rates.

The Company performed a sensitivity analysis as of June 30, 2010, assuming a hypothetical one percentage point increase in interest rates. Holding other variables constant (such as foreign exchange rates and debt levels), a one percentage point increase in interest rates would affect the Company's pre-tax income by approximately \$210. However, actual increases or decreases in earnings in the future could differ materially from this analysis based on the timing and amount of both interest rate changes and amounts borrowed by the Company.

Currency Exchange Rate Sensitivity

The Company derived approximately 78% of its revenues from countries outside of the Americas for the fiscal year ended June 30, 2010. Results were and continue to be affected by fluctuations in foreign currency exchange rates. The Company's policy is to hedge the impact of currency rate fluctuations, which could have a material impact on the Company's financial results. The Company utilizes foreign currency exchange forward contracts to hedge certain of these exposures. The Company also maintains certain levels of cash denominated in various currencies, which acts as a natural hedge against adverse variations in individual currencies.

The Company performed a sensitivity analysis as of June 30, 2010 assuming a hypothetical 10% adverse change in foreign currency exchange rates. Holding all other variables constant, the analysis indicated that such a market movement would affect the Company's pre-tax income by approximately \$730. However, actual gains and losses in the future could differ materially from this analysis based on the timing and amount of both foreign currency exchange rate movements and the Company's actual exposures and hedges.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Baldwin Technology Company, Inc.

We have audited the accompanying consolidated balance sheets of Baldwin Technology Company, Inc. (a Delaware corporation) and subsidiaries as of June 30, 2010 and 2009, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the three years in the period ended June 30, 2010. Our audits of the consolidated financial statements included the financial statement schedule listed in the index appearing under Item 15(a)(2). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Baldwin Technology Company, Inc. and subsidiaries as of June 30, 2010 and 2009, and the results of their operations and their cash flows for each of the three years in the period ended June 30, 2010 in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statement taken as a whole, present fairly, in all material respects, the information set forth, therein.

As discussed in Note 3, the 2010 consolidated financial statements have been restated to correct certain misstatements.

/s/ GRANT THORNTON LLP

Table of Contents

BALDWIN TECHNOLOGY COMPANY, INC.
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in thousands except for share and per share data)

Note 1 Organization of Business:

Baldwin Technology Company, Inc. and its subsidiaries (Baldwin or the Company) are engaged primarily in the development, manufacture and sale of process automation equipment and related consumables for the printing and publishing industry. Headquartered in Shelton, Connecticut, the Company has sales and service centers and product development and manufacturing operations in the Americas, Asia, Australia and Europe. The Company manages its business as one reportable business segment built around its core competency in process automation and equipment.

Note 2 Summary of Significant Accounting Policies:

The following are the significant accounting policies followed by the Company:

Consolidation. The Consolidated Financial Statements include the accounts of Baldwin, its wholly owned subsidiaries, one 90% owned subsidiary and an 80% owned subsidiary. The minority interest amounts are not material to the Consolidated Financial Statements and therefore are not disclosed.

Cash and cash equivalents. The Company considers all highly liquid instruments (cash and short-term securities) with original maturities of three months or less to be cash equivalents.

Accounts Receivable, Notes Receivable/Payable. Accounts receivable are recorded at their net realizable value after deducting an allowance for doubtful accounts. Such allowance is estimated based on a combination of write-off history, aging analysis and specific account evaluation. When a receivable balance is known to be uncollectable, it is written off against the allowance for doubtful accounts. Notes receivable, trade reflect promissory notes issued by customers of the Company's Japanese subsidiary. Notes payable, trade reflect obligations of the Company's Japanese subsidiary to suppliers.

Translation of Foreign Currencies. All assets and liabilities of foreign subsidiaries are translated into dollars at the fiscal year-end (current) exchange rates, and revenue and expense are translated at average rates for the fiscal year. The resulting translation adjustments are included in shareholders' equity. Gains and losses on foreign currency exchange transactions are reflected in the statement of operations. Net transaction gains and losses credited or charged to Other expense (income), net for the fiscal years ended June 30, 2010, 2009 and 2008 were \$412, (\$1,025) and (\$66), respectively.

Hedging. The Company operates internationally and is exposed to certain market risks arising from transactions that in the normal course of business include fluctuations in interest rates and currency exchange rates. While the Company occasionally uses derivative financial instruments in order to manage or reduce these risks, typically currency futures contracts and interest rate swap agreements, the Company does not enter into derivative or other financial instruments for trading or speculative purposes. The Company's policy is to hedge the impact of currency rate fluctuations, which could have a material impact on the Company's financial results. The Company utilizes foreign currency forward contracts to hedge these exposures.

If a derivative is designated as a fair value hedge, the changes in the fair value of the derivative and the underlying hedged item attributable to the hedged risk are recognized in earnings. If the derivative is designated as a cash flow hedge, the effective portions of changes in fair value of the derivative are recorded in Other Comprehensive Income (OCI) and are recognized in the statement of operations when the underlying hedged item affects earnings. Ineffectiveness related to cash flow hedges is recognized in earnings and is included in Other expense (income), net . The Company did not enter into any cash flow hedges for the period ended June 30, 2010, 2009 and 2008, and the effect of fair value hedge activities is not material to the Consolidated Financial Statements for the periods ending June 30, 2010, 2009 or 2008.

Concentration of Credit Risk. Financial instruments, which potentially subject the Company to concentrations of credit risk, consist principally of trade accounts and notes receivable and cash and cash equivalents. The Company controls this risk through credit approvals, customer limits and monitoring procedures. For the fiscal years ended June 30, 2010, 2009 and 2008, one customer

Table of Contents

accounted for more than 10% of the Company's net sales and trade accounts receivable. Koenig and Bauer Aktiengesellschaft (KBA) accounted for approximately 14%, 13% and 15%, of the Company's net sales for the fiscal years ended June 30, 2010, 2009 and 2008, respectively, and 14% and 12% of trade accounts receivable at June 30, 2010 and 2009, respectively. The Company's ten largest customers accounted for approximately 39%, 48% and 46% of the Company's net sales for each of the fiscal years ended June 30, 2010, 2009 and 2008, respectively. Foreign cash balances at June 30, 2010 and 2009 were \$13,288 and \$12,090, respectively.

Marketable Securities. The Company classifies all of its marketable securities as available-for-sale securities. Available-for-sale securities are carried at fair value based on quoted market prices, with the unrealized gains and losses net of income taxes, reported as a component of other comprehensive income (loss) included within shareholders' equity. Cost is determined using the average cost method.

Inventories. Inventories are stated at the lower of cost or market. Cost is determined on the first-in, first-out (FIFO) method. Baldwin writes down its inventory for estimated obsolescence or unmarketable inventory equal to the difference between the cost of inventory and the estimated market value based upon assumptions about future demand and market conditions.

Property, Plant and Equipment. The Company depreciates its assets over their estimated useful lives. The estimated useful lives range from 27 to 30 years for buildings, 7 to 10 years for machinery and equipment, 3 to 7 years for furniture and fixtures, the shorter of the lease term or the life of the lease for leasehold improvements and 5 to 7 years for capital leases. Property, plant and equipment are carried at historical cost and are depreciated using primarily the straight-line method. Repair and maintenance expenditures are expensed as incurred. Depreciation expense amounted to \$1,412, \$1,346 and \$1,645 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

Long-lived Assets. Whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable, the Company evaluates the basis of its long-lived assets based on expectations of undiscounted cash flows related to those assets. In accordance with Accounting Standards Codification (ASC) ASC 360, Property, Plant and Equipment, the Company believes that no impairment of its long-lived assets existed at June 30, 2010 or at June 30, 2009.

Stock Based Compensation. Stock-based compensation represents the cost related to stock-based awards granted to employees and directors. The Company measures stock-based compensation cost at grant date, based on the estimated fair value of the award, and recognizes the cost as expense on a straight-line basis (net of estimated forfeitures) over the employee requisite service period. The Company estimates the fair value of stock options using a Black-Scholes valuation model. The Company typically issues new shares upon share option exercise. The Company records deferred tax assets for awards that will result in deductions on the Company's income tax returns, based on the amount of compensation cost recognized and the Company's statutory tax rate in the jurisdiction in which it will receive a deduction. Differences between the deferred tax assets recognized for financial reporting purposes and the actual tax deduction reported on the Company's income tax return are recorded in Additional Paid-in Capital (if the tax deduction exceeds the deferred tax asset) or in the Consolidated Statement of Operations (if the deferred tax asset exceeds the tax deduction and no additional paid-in capital exists from previous awards).

Goodwill and Other Intangible Assets. Goodwill is tested for impairment at the reporting unit level at least annually, (May 31) by determining the fair value utilizing a combination of income and market approaches of the reporting unit and comparing the fair value with its recorded book value. The income approach applies a discounted cash flow methodology to the Company's future period projections and a market approach compares the Company's multiples of revenues and earnings with those of comparable companies. A reporting unit is the lowest level of an entity that is a business and can be distinguished from other activities, operations, and assets of the entity. If, during the annual impairment review, the book value of the reporting unit exceeds the fair value, the implied fair value of the reporting unit's goodwill is compared with the carrying amount of the unit's goodwill. If the carrying amount exceeds the implied fair value, goodwill is written down to its implied fair value. ASC 350, Intangibles—Goodwill and Other, requires management to estimate the fair value of each reporting unit, as well as the fair value of the assets and liabilities of each reporting unit, other than goodwill. The implied fair value of goodwill is determined as the difference between the fair value of a reporting unit, taken as a whole, and the fair value of the assets and liabilities of

such reporting unit.

As a result of the deteriorating macro-economic environment, the continued market volatility and the Company's decreased market capitalization, the Company assessed the recoverability of its goodwill carrying value as required. A two-step process was used to test goodwill impairment. The first step was to determine if there is an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. Upon indication of impairment, a second step is performed to determine the amount of the impairment by comparing the implied fair value of the reporting unit's goodwill with its carrying value. As a result of the assessment, the Company recorded a non-cash goodwill impairment charge of \$5,658, primarily related to its Japan reporting unit

Table of Contents

during the third quarter of fiscal year 2009. The Company concluded based on its annual impairment test that there was no goodwill impairment during fiscal year 2010.

Other intangible assets include patents, trademarks and engineering drawings, which are amortized on a straight-line basis over the estimated useful lives of the related assets, generally 15 to 30 years. Amortization expense amounted to \$1,253, \$1,427 and \$1,182 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

Income Taxes. Deferred taxes are determined under the asset and liability approach. Deferred tax assets and liabilities are recognized on differences between the book and tax basis of assets and liabilities using presently enacted tax rates. Further, deferred tax assets are recognized for the expected benefits of available net operating loss carryforwards, capital loss carryforwards and foreign tax credit carryforwards. Valuation allowances are recognized to reduce deferred tax assets to the amount that will more likely than not be realized. In assessing the need for a valuation allowance, management considers all available evidence including past operating results, estimates of future taxable income scheduled reversal of temporary differences and the feasibility of ongoing tax planning strategies. When the Company changes its determination as to the amount of deferred tax assets that can be realized, the valuation allowance is adjusted with a corresponding impact to income tax expense in the period in which such determination is made.

Fair Value Disclosure of Financial Instruments. The Company's financial instruments consist of cash and cash equivalents, short-term securities, accounts receivable, notes receivable, marketable securities, capital lease obligations, accounts payable, notes payable, other short and long-term borrowings, and derivative financial instruments. The carrying amount of the short term instruments approximate fair market value due to their short term nature. The carrying amount of marketable securities approximates market value based on quoted market prices. The carrying amount of long term borrowings and capital lease obligations approximates fair value as their interest rate is current market rate.

Fair Value Measurements. Effective July 1, 2008, the Company adopted ASC 820, Fair Value Measurements and Disclosures which establishes a framework for fair value and expands disclosures about financial instruments.

ASC 820 requires the use of valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs. Observable inputs consist of market data obtained from independent sources while unobservable inputs reflect the Company's own market assumptions. These inputs create the following fair value hierarchy:

Level 1 Quoted prices in active markets for identical assets or liabilities

Level 2 Valuations based on quoted prices in markets that are not active, quoted prices for similar assets or liabilities or all other inputs that are observable

Level 3 Unobservable inputs for which there is little or no market data which require the Company to develop its own assumptions

If the inputs used to measure the fair value of a financial instrument fall within different levels of the hierarchy, the financial instrument is categorized based upon the lowest level input that is significant to the fair value measurement.

Whenever possible, the Company uses quoted market prices to determine fair value. In the absence of quoted market prices, the Company uses independent sources and data to determine fair value.

At June 30, 2010, the Company's financial assets and financial liabilities that are measured at fair value on a recurring basis, consistent with the fair value hierarchy provisions, and valued as Level 1 are comprised of marketable securities of \$500. At June 30, 2010, the Company did not have any assets or liabilities at fair value on a recurring basis using significant unobservable inputs (Level 3) in the Consolidated Financial Statements.

In addition to items that are measured as fair value on a recurring basis, there are also assets and liabilities that are measured at fair value on a non-recurring basis. Assets and liabilities that are measured at fair value on a non-recurring basis include certain long-lived assets (see Note 16, Goodwill and Other Intangible Assets). The Company determined that the fair value measurements included in each of these assets and liabilities rely primarily on its assumptions as unobservable inputs that are not publicly available. As such, the Company has determined that each of these fair value measurements reside within Level 3 of the fair value hierarchy.

Warranty. The Company's standard contractual warranty provisions are to repair or replace, at the Company's option, a product that is proven to be defective. The Company estimates its warranty costs as a percentage of revenues on a product-by-product basis, based on actual historical experience for each product. Hence, the Company accrues estimated warranty costs at the time of sale and includes that cost in Cost of goods sold. In addition, should the Company become aware of a specific potential warranty claim, a

Table of Contents

specific charge is recorded and accounted for separately from and in addition to the percentage of revenue discussed above. The Company has accrued estimated future warranty and customer support obligations of \$1,999 and \$2,626 at June 30, 2010 and 2009, respectively, which are included in Other accounts payable and accrued liabilities (see Note 19).

Revenue Recognition. The Company's products are sold with terms and conditions that vary depending on the nature of the product sold and the cultural and business environments in which the Company operates.

The Company recognizes revenue based on the type of product sold and the obligations under the contract. Revenue is recognized on contracts for design, manufacture and delivery of equipment without installation (equipment sales) and parts, service and consumables at the time of transfer of title or rendering of services. The Company considers revenue to be realized on equipment sales when it has persuasive evidence of an arrangement, delivery has occurred, the sales price is fixed or determinable and collectability is reasonably assured. In contracts that include additional services, including installation, start-up and/or commissioning (system sales), the Company recognizes revenue on each element of the contract as appropriate. Installation services are provided to the customer on an as-needed basis and may be contracted for separately or included in the same contract as the equipment sale. Revenue is recognized for installation services at the completion of the contractually required services.

Contracts for system sales may include multiple-element revenue arrangements. When the Company enters into multiple-element revenue arrangements, which may include installation services as a contractual element, together with the purchase price of the product as a contractual element, the arrangement is separated into its stand-alone elements for revenue recognition purposes. When the delivered item has value to the customer on a stand alone basis, there is objective and reliable evidence of the fair value of the undelivered item and the arrangement does not include a general right of return, revenue is recognized on each element as separate units of accounting. If these criteria are not met, the arrangement is accounted for as one unit of accounting which would result in revenue being deferred until the last undelivered contractual element is fulfilled.

Standard payment terms may include a deposit to be received with the customer order, progress payments until equipment is shipped and a portion of the balance due within a set number of days following shipment. In those cases when the Company renders invoices prior to performance of the service, the Company records deferred revenue until completion of the services, whereupon revenue is fully recognized.

Freight terms are generally FOB shipping dock with risk of loss passing to the purchaser at the time of shipment. If a loss should occur in transit, the Company is not responsible for, and does not administer insurance claims unless the terms are FOB destination. The customer is not contractually eligible for any refund of the purchase price or right of return of the contracted product, unless the product fails to meet published product specifications and the Company fails to perform its obligations under product warranty terms.

Products are generally ordered on purchase orders, which may contain formal product acceptance clauses. Occasionally, clauses may be included in a contract or purchase order that require acceptance related to certain specifications as outlined in the contract or purchase order. In these instances, the nature of the acceptance is evaluated to ensure that the Company has met the applicable criteria concurrent with the shipment of equipment to the customer.

The Company sometimes uses distributors to assist in the sales function. In these cases, the Company does not recognize revenue until title for the equipment and risk of loss have passed to the ultimate customer, who then becomes obligated to pay with no right of return. In addition, the Company reviews all alliance agreements to determine whether revenue should be recognized on a gross or net basis and recognizes revenue as appropriate in the circumstances.

Shipping and Handling, Advertising. Costs related to shipping and handling are included in cost of goods sold in the Consolidated Statement of Operations. The Company expenses advertising costs when incurred. Advertising expense was \$141, \$147 and \$222 for the fiscal years ended June 30, 2010, 2009 and 2008, respectively.

Deferred Financing Costs. The Company capitalizes costs associated with the issuance of debt, including bank, legal, investment advisor and accounting fees and other expenses. Deferred financing costs are amortized on a straight line basis over the term of the related financing transaction and are included in interest expense.

Engineering and Development. Engineering and development (including research) costs are expensed as incurred.

Earnings Per Share. Basic earnings per share is computed by dividing net income by the weighted average number of common shares outstanding during the period. Diluted earnings per share is similar to basic earnings per share except that it reflects the

Table of Contents

potential dilution that could occur if dilutive securities, such as stock options, were exercised or converted into common shares or resulted in the issuance of common shares.

Comprehensive Income (Loss). As shown in the Statement of Changes in Shareholders' Equity, comprehensive income (loss) is a measure of net income (loss) and all other changes in equity of the Company that result from recognized transactions and other events of the period other than transactions with shareholders.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The most significant assumptions and estimates relate to the determination of accrued expenses including warranty, accounts receivable and inventory valuations, revenue recognition, useful lives of assets, deferred tax asset valuations, stock option valuation, and goodwill and intangible valuations. Actual results could differ from those estimates.

Recent Accounting Pronouncements.**Revenue Arrangements with Multiple Deliverables**

In October 2009, the FASB issued ASC Update No. 2009-13, Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements. The consensus in Update No. 2009-13 supersedes certain guidance in Topic 605 (formerly EITF Issue No. 00-21, Multiple-Element Arrangements) and requires an entity to allocate arrangement consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. The consensus eliminates the use of the residual method of allocation and requires the use of the relative-selling-price method in all circumstances in which an entity recognizes revenue for an arrangement with multiple deliverables subject to ASC 605-25. The Company was required to adopt Update No. 2009-13 as of July 1, 2010. The Company does not believe adoption of Update No. 2009-13 will have a material effect on its future results of operations and financial position.

Codification

In June 2009, the FASB issued SFAS No. 168, The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles (SFAS 168). SFAS 168 establishes the FASB Accounting Standards CodificationTM (Codification or ASC) as the sole source of authoritative GAAP recognized by the FASB for nongovernmental entities. Rules and interpretive releases issued by the SEC under federal securities laws are also sources of authoritative GAAP for SEC registrants. SFAS 168 is effective for financial statements issued for interim and annual periods ending after September 15, 2009 (effective September 30, 2009 for the Company). The adoption of SFAS 168 did not have a material effect on the Company's Consolidated Financial Statements.

Fair Value Measurements

On July 1, 2008, the Company adopted certain provisions of a new accounting standard which defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. On July 1, 2009, the Company adopted the remaining provisions of this accounting standard as it relates to nonfinancial assets and liabilities that are not recognized or disclosed at fair value on a recurring basis. The adoption of this standard as it related to certain nonfinancial assets and liabilities did not impact the Company's consolidated financial statements in any material respect.

On July 1, 2009, the Company adopted the accounting pronouncement issued in April 2009 that provides additional guidance for estimating fair value in accordance with the accounting standard for fair value measurements when the volume and level of activity for the asset or liability has significantly decreased. This pronouncement stated that when quoted market prices may not be determinative of fair value, a reporting entity shall consider the reasonableness of a range of fair value estimates. The adoption of this standard as it related to inactive markets did not impact the Company's consolidated financial statements in any material respect.

Business Combinations

On July 1, 2009, the Company adopted the accounting pronouncements relating to business combinations, including assets acquired and liabilities assumed arising from contingencies. These pronouncements established principles and requirements for how the acquirer of a business recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, and any non-controlling interest in the acquiree as well as provides

guidance for recognizing and measuring the goodwill acquired in the

37

Table of Contents

business combination and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. In addition, these pronouncements eliminate the distinction between contractual and non-contractual contingencies, including the initial recognition and measurement criteria and require an acquirer to develop a systematic and rational basis for subsequently measuring and accounting for acquired contingencies depending on their nature. The adoption of these pronouncements will have an impact on the manner in which the Company accounts for acquisitions.

Note 3 Restatement of Consolidated Financial Statements**Background of the Restatement**

In late February 2011, allegations surfaced that profits were being manipulated at the Company's Japanese subsidiary. The Audit Committee of the Board of Directors commissioned an investigation consisting of extensive employee interviews and audit procedures to review the allegations. The investigation confirmed the premature recognition of revenue and related costs primarily during the quarter ended June 30, 2010 through intentional circumvention of internal controls apparently intended to achieve sales and earnings forecasts previously submitted by the Japanese subsidiary to corporate senior management. The investigation also revealed that no individual appeared to personally benefit from these irregularities.

On May 10, 2011 the Company announced that, as a result of the investigation, previously issued consolidated financial statements for the fiscal year 2010 included in the Company's Form 10-K and for the fiscal quarters ended September 30, 2010 and December 31, 2010, should no longer be relied upon.

Impact of Restatement

The effects of the restatement on the consolidated statement of operations for the fiscal year ended June 30, 2010 are summarized in the following table:

	Previously Reported	Adjustment (in thousands)	Restated
Net Sales	\$ 151,818	\$ (4,037)	\$ 147,781
Cost of goods sold	106,682	(2,053)	104,629
Gross profit	45,136	(1,984)	43,152
Operating income	7,514	(1,984)	5,530
Income from operations before tax	7,006	(1,984)	5,022
Provision for income taxes	1,978	(833)	1,145
Net income	5,028	(1,151)	3,877
Basic and diluted net income per share	\$ 0.32	\$ (0.07)	\$ 0.25

The effects of the restatement on the consolidated balance sheet at June 30, 2010 are summarized in the following table:

	Previously Reported	Adjustment (in thousands)	Restated
Accounts receivable trade, net	\$ 26,340	\$ (4,037)	\$ 22,303
Total current assets	71,478	(4,037)	67,441
Deferred taxes, net	6,879	833	7,712
Total assets	122,496	(3,204)	119,292
Accounts payable, trade	16,139	(2,053)	14,086
Total current liabilities	42,254	(2,053)	40,201
Total liabilities	70,747	(2,053)	68,694
Accumulated earnings	3,170	(1,151)	2,019
Total shareholder's equity	51,749	(1,151)	50,598
Total liabilities and shareholder's equity	122,496	(3,204)	119,292

There was no impact to previously reported total cash flows from operations, investing or financing activities.

As a result of the restatement, the Company failed to meet the minimum EBITDA and Currency Adjusted Net Sales covenants under its Credit Agreement at June 30, 2010. The Company and its lenders entered into waiver and Amendment No. 10 as of May 16, 2011 (see footnote 9).

See also Notes 5, 6 and 10 for amounts impacted by the above adjustments.

Note 4 Accumulated Other Comprehensive Income (Loss):

Accumulated Other Comprehensive Income (Loss) (OCI) is comprised of various items, which affect equity that result from

	\$ 389	\$ 16,066	\$ 3,534	\$ 20,300

(a) The Company's primary source of external financing is its Credit Agreement, as amended with certain lenders (the Lenders) and Bank of America (BofA) as Agent (the Credit Agreement), which has a term that ends on November 21, 2011. The borrowings under the Credit Agreement (approximately \$18,000 at June 30, 2010) are secured in the U.S. by a pledge of substantially all of the Company's domestic assets and in Europe by a pledge of the Company's European assets and the stock of the Company's European subsidiaries and certain of the Company's Asian subsidiaries.

On July 31, 2009, the Company entered into an amendment to the Credit Agreement (the July 31, 2009 Amendment) pursuant to which (i) euro borrowings bear interest at LIBOR plus 4.50%, or in the case of U.S. dollar loans, at the prime rate plus 3.00%, (ii) the amount of the revolving commitment was reduced from \$35,000 to \$25,000 provided that the aggregate of all revolving loans outstanding plus \$7,900 do not exceed \$25,000 and (iii) the collateral was increased.

The Credit Agreement, as amended, by the July 31, 2009 Amendment, requires the Company to satisfy certain minimum EBITDA, Fixed Charge Coverage Ratio, Total Funded Debt Ratio, Minimum Currency Adjusted Net Sales, Capital Expenditures, and Minimum Liquidity tests. Minimum EBITDA, as defined, must not be less than i) \$1,100 for the six month period ending December 31, 2009, ii) \$2,300 for the three Fiscal Quarters ending March 31, 2010, iii) \$4,100 for the fiscal year ending June 30, 2010 and iv) \$12,000 for each Four Fiscal Quarter Computation Period ending on or after September 30, 2010. The Fixed Charge Coverage Ratio, as defined, must not be less than 1.25 to 1.00 for the Four Fiscal Quarter Computation Period ending September 30, 2010. The Leverage Ratio must not exceed 3.00 to 1.00 for the Four Fiscal Quarter Computation Period ending September 30, 2010. Currency Adjusted Net Sales must not be less than certain defined levels for the fifteen reporting periods consisting of three consecutive three-month periods commencing with the first reporting period ending on July 31, 2009 and the final reporting period ending on September 30, 2010. Capital expenditures must not exceed \$1,000 for the fiscal year ending June 30, 2010. Minimum Liquidity, as defined as the U.S. Dollar Equivalent of consolidated cash and cash equivalents of the Company and its U.S. and European Subsidiaries shall not be less than \$300 and not permit borrowings under the Revolving Loan or request issuance or increase in any Letters of Credit if the sum of all Dollar Equivalent Revolving Outstandings, Letters of Credit and Specified Availability exceeds \$25,000. In addition the July 31, 2009 Credit Agreement Amendment required that the net proceeds related to the settlement of the patent infringement lawsuit be used to repay a portion of the Company's long-term obligation. A payment of approximately \$7,700 was made on October 15, 2009 as a result of the settlement. In May 2010 the Company made the final payment on the term loan.

The Company incurred cash costs of approximately \$1,224 associated with the July 31, 2009 Amendment. Certain of these costs, along with legacy deferred financing costs, were required to be charged to expense and the Company recorded a charge of \$1,183 during the first quarter of fiscal year 2010. Certain of these costs coupled with legacy deferred financing costs, totaling approximately \$1,279, will be amortized over the remaining term of the amended agreement.

On May 12, 2010, the Company entered into Waiver and Amendment No. 6 to Credit Agreement which waived the Company's failure to satisfy the Currency Adjusted Net Sales covenant for the consecutive three-month period ended April 30, 2010 and amended the Credit Agreement to change the date for delivery of the Company's financial projections for the Fiscal Year commencing July 1, 2010.

On June 9, 2010, the Company entered into Waiver and Amendment No. 7 to Credit Agreement which waived the Company's failure to meet the Currency Adjusted Net Sales covenant for the consecutive three-month period ended May 31, 2010 and amended the Credit Agreement to make certain modifications to (i) the required Currency Adjusted Net Sales covenant for the periods

Table of Contents

consisting of two consecutive months ending June 30, 2010, three consecutive months ending July 31, 2012, three consecutive months ending August 31, 2010 and three consecutive months ending September 30, 2010, (2) the EBITDA financial covenants, (iii) the Minimum EBITDA covenant to provide that minimum EBITDA (as defined), must not be less than \$2,769 for the fiscal year ending June 30, 2010 and \$12,000 for each Four Fiscal Quarter Computation Periods ending on or after September 30, 2010 and (iv) to permit the Company to acquire Nordson UV Ltd. and Horizon Lamps, Inc. (Nordson UV) and incur certain debt in connection with the acquisition. At June 30, 2010 the Company was in compliance with all financial covenants under the amended Credit Agreement.

On September 28, 2010, the Company entered into Amendment No. 8 to the Credit Agreement (the Amendment #8) with BofA. Under the terms of the Amendment, the total commitment under the revolving Credit Agreement was reduced from \$25 million to \$20 million, certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,671 shares of common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

As a result of the required restatements of the Company's financial results for the periods ended June 30, 2010, September 30, 2010 and December 31, 2010 the Company was not in compliance with the financial covenants contained in its Credit Agreement. Specifically, as a result of the restatement, at June 30, 2010, the Company failed to meet the established June 30, 2010 targets for minimum EBITDA and Currency Adjusted Net Sales. Additionally, as a result of the restatement, during the quarter ended September 30, 2010, the Company failed to meet the established target for Currency Adjusted Net Sales for the consecutive three-month periods ended July 31, 2010 and August 30, 2010.

In addition, the Company has reported that it did not meet the minimum EBITDA covenant for the period ended March 31, 2011 and did not meet the Currency Adjusted Net Sales target for the three-consecutive months ended April 30, 2011.

On May 16, 2011, the Company entered into Waiver and Amendment No. 10 to the Credit Agreement (Amendment No. 10) with BofA. The Amendment provided for a waiver by the lenders of the Company's failure to meet the applicable minimum EBITDA and Currency Adjusted Net Sales for all periods noted above. Under the terms of Amendment No. 10, the Company provided the Lenders Warrants with a term of ten years to purchase 372,374 shares of the Company's Class A common stock in the Company for \$0.01 per share. The Warrants also contain a put provision that enables the Holder after May 16, 2013 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. Amendment No. 10 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels, adjusts interest rate provisions, approves the disposition of the assets of the food blends discontinued operations and establishes certain milestones regarding refinancing the loan.

(b) \$2,521 five year subordinated promissory note with principal and interest payments due and payable in five annual installments.

The Company maintains relationships with both foreign and domestic banks, which combined have extended short- and long-term credit facilities to the Company totaling \$32,256. As of June 30, 2010, the Company had \$19,535 outstanding (including Letters of Credit). The amount available under these credit facilities at June 30, 2010 was \$4,521.

Maturities of long-term debt in each fiscal year ending after June 30, 2010 are as follows:

Fiscal Year Ending June 30,	(in thousands)
2011	\$ 389
2012	14,376
2013	499
2014	561
2015	630

2016 and thereafter

\$ 16,455

Note 10 Taxes on Income:

Income (loss) before income taxes and the (benefit) provision for income taxes are comprised of:

	For the Years Ended June 30,		
	(Restated)		
	2010	2009	2008
Income (loss) before income taxes:			
Domestic	\$ (3,365)	\$ (5,549)	\$ 1,208
Foreign	8,387	(8,275)	7,145
	\$ 5,022	\$ (13,824)	\$ 8,353
(Benefit) provision for income taxes:			
Currently payable:			
Domestic	\$ 437	\$ (544)	\$ 187
Foreign	129	(240)	1,245
	566	(784)	1,432
Deferred:			
Domestic	\$ 457	\$ (1,297)	\$ (1,593)
Foreign	122	68	2,023
	579	(1,229)	430
Total income tax provision	\$ 1,145	\$ (2,013)	\$ 1,862

Table of Contents

Deferred income taxes are provided on temporary differences between the financial reporting basis and tax basis of the Company's assets and liabilities. The principal temporary differences which give rise to deferred tax assets and liabilities at June 30, 2010 and 2009 are as follows:

	(Restated) June 30, 2010	June 30, 2009
Deferred tax assets (liabilities):		
Foreign tax credit carryforwards	\$ 3,853	\$ 6,325
Foreign net operating loss carryforwards	9,358	10,575
Domestic net operating loss carryforwards	2,432	
Capital loss carryforwards	164	181
Inventories	1,426	2,408
Pension/deferred compensation	2,962	2,745
Identifiable intangibles	(2,721)	(1,830)
Other deferred tax assets, individually less than 5%	2,293	1,848
Other deferred tax liabilities, individually less than 5%	(15)	(71)
Net deferred tax asset	19,752	22,181
Valuation allowance	(10,232)	(12,687)
Total net deferred tax assets	\$ 9,520	\$ 9,494

At June 30, 2010, net operating loss carryforwards of \$44,561 may be available to reduce future foreign taxable income. The majority of the Company's foreign net operating loss (NOL) carry-forwards have an indefinite carry-forward period. In addition, as of June 30, 2010, the Company has indefinite foreign capital loss carry-forwards available in the amount of \$586. At June 30, 2010, the Company had U.S. NOL carryforwards of \$6,856, of which \$1,790 will expire in 2020 and \$5,066 which will expire in 2030. Foreign tax credits of \$3,853 expire in 2013 through 2019.

The Company establishes valuation allowances in accordance with the provisions of ASC 740, Income Taxes. The change in the valuation allowance for the period ended June 30, 2010 primarily reflects the expiration of fully reserved foreign tax credits and valuation allowance provided on certain foreign NOL and foreign tax credits.

The Company has not had to provide for income taxes on \$24,588 of cumulative undistributed earnings of subsidiaries outside the United States because of the Company's intention to indefinitely reinvest those earnings.

On June 30, 2010, the Company's unrecognized tax benefits totaled \$4,102, including \$3,726 of unrecognized tax benefits which, if recognized, would reduce the annual effective income tax rate. Approximately \$1,469 of the reduction would be in the form of foreign tax credits that would likely attract a valuation allowance.

Where applicable, the Company recognizes potential accrued interest and penalties related to unrecognized tax benefits from its global operations in income tax expense. During the fiscal years ending June 30, 2010 and 2009, the Company accrued \$18 and \$39, respectively, in potential interest and penalties associated with uncertain tax positions. To the extent interest and penalties are accrued in the Company's income tax expense, such amounts, if reversed, will reduce the effective income tax rate. At June 30, 2010, the Company had \$267 of accrued interest and penalty.

A reconciliation of the beginning and ending amount of unrecognized tax benefits, excluding interest and penalties associated with uncertain tax positions is as follows:

	Year Ended June 30, 2010	2009
	(in thousands)	
Balance as of July 1	\$ 4,999	\$ 4,855

Edgar Filing: BALDWIN TECHNOLOGY CO INC - Form 10-K/A

Additions based on tax positions related to the current year	90	144
Reductions for tax positions related to prior years	(113)	
Decrease from lapse of statute of limitation	(874)	
Balance as of June 30	\$ 4,102	\$ 4,999

The Company conducts its business globally and, as a result, the Company or one or more of its subsidiaries files income tax returns in the U.S. and various state and foreign jurisdictions. The Company is subject to ongoing tax examinations and assessments in such major jurisdictions as the U.S., Germany, Sweden and Japan. The earliest year for which the Company or its affiliates are

Table of Contents

subject to examination by tax authorities is the tax year 2000. It is reasonable possible that in the next 12 months, because of changes in facts and circumstances, the unrecognized tax benefits for tax positions taken for related to previously filed tax returns may decrease. In fiscal year 2010 the Company finalized a tax audit in the U.S. for fiscal year 2008 and in early fiscal year 2011 is expected to finalize a tax audit in Germany for the fiscal years 2000 through 2004. The range of possible decrease related to the potential settled adjustments and expiration of the statute of limitation is zero to \$2.4 million.

The reconciliation of the computed expected provision (determined by applying the United States Federal statutory income tax rate of 34% to income before income taxes) to the actual tax provision is as follows:

	For the Years Ended June 30,		
	(Restated)		
	2010	2009	2008
		(in thousands)	
Computed expected tax provision	\$ 2,381	\$ (4,700)	\$ 2,811
Permanent differences	357	445	10
Foreign income taxed at rates other than the U.S. statutory rate	(1,780)	(136)	(263)
Change in deferred tax asset valuation Allowance	2,305	761	(1,092)
Adjustment to tax liabilities	(838)	179	254
Gain on bargain purchase	(1,006)		
Goodwill impairment		1,951	
Other reconciling items	(274)	(513)	142
Total income tax provision	\$ 1,145	\$ (2,013)	\$ 1,862

Note 11 Common Stock:

Except with respect to the election or removal of Directors, and certain other matters with respect to which Delaware law requires each class to vote as a separate class, the holders of the Company's Class A Common Stock (Class A) and Class B Common Stock (Class B) vote as a single class on all matters, with each share of Class A having one vote per share and each share of Class B having ten votes per share.

With respect to the election of Directors, the holders of Class A, voting as a separate class, are entitled to elect 25% of the total number of Directors (or the nearest higher whole number) constituting the entire Board of Directors. The holders of Class B, voting as a separate class, are entitled to elect the remaining Directors, so long as the number of outstanding shares of Class B is equal to at least 12.5% of the number of outstanding shares of both classes of Common Stock as of the record date of the meeting of stockholders. If the number of outstanding shares of Class B is less than 12.5% of the total number of outstanding shares of both classes of Common Stock as of the record date of the meeting of stockholders, the remaining directors are elected by the holders of both classes of Common Stock voting together as a single class, with the holders of Class A having one vote per share and the holders of Class B having ten votes per share. As of June 30, 2010, the number of outstanding shares of Class B constituted approximately 7% of the total number of outstanding shares of both classes of Common Stock.

Class A has no conversion rights; however, shares of Class B are convertible into shares of Class A on a one-for-one basis. In addition, no dividend in cash or property may be declared or paid on shares of Class B without a dividend being declared or paid on shares of Class A of at least 105% of the dividend declared or paid on shares of Class B. The Company's current Credit Agreement prohibits the payment of dividends.

In November 1999, the Company initiated its most recent stock repurchase program. Under the program, the Company is authorized to utilize up to \$5,000 to repurchase Class A shares. As of June 30, 2010, 1,192,760 shares of Class A had been repurchased for \$2,638. During the fiscal year ended June 30, 2010 no shares of Class A were repurchased. Repurchases are restricted under the terms of the Credit Agreement.

Note 12 Stock Based Compensation:

Stock based incentive awards are provided under the terms of the Company's plans:

44

Table of Contents

The 1996 Stock Option Plan, as amended and restated (the 1996 Plan) allowed for the granting, at fair market value on the date of grant, of incentive stock options, non-qualified stock options, and tandem SARS to employees and Eligible Directors for up to a total of 1,875,000 shares of Class A. All options became exercisable in three equal annual installments commencing on the second anniversary of the date of grant. Unexercised options terminate no later than ten years from the date of grant. The 1996 Plan terminated on November 18, 2006; however, outstanding options under the 1996 Plan continue to be subject to the terms thereof.

The 1998 Non-Employee Directors Stock Option Plan provided for the granting, at fair market value on the date of grant, of options to Eligible Directors to purchase up to an aggregate of 250,000 shares of Class A Common Stock. Under the 1998 Plan, each year, each Eligible Director received a grant of options to purchase 3,000 shares of Class A Common Stock. The options vested one-third per year on each succeeding anniversary of the date of grant. Unexercised options terminate no later than ten years from the date of grant. The 1998 Plan was terminated on November 21, 2002; however, outstanding options under the 1998 Plan continue to be subject to the terms thereof.

The 2005 Equity Compensation Plan (the 2005 Plan) was approved by the Company's Board of Directors in October 2005 and by its stockholders in November 2005. The 2005 Plan was amended in August 2008 to increase by 1,000,000 shares the number of shares of Class A Common Stock that may be subject to awards outstanding under the 2005 Plan from 1,200,000 to 2,200,000. This amendment was approved by the stockholders on November 11, 2008. The 2005 Plan provides for the granting of a variety of awards to the Company's employees, non-employee directors, and others who provide services to the Company, including stock-based incentives and cash-based incentives. The maximum aggregate number of shares that may be delivered to participants or their beneficiaries pursuant to all awards granted under the 2005 Plan is now 2,200,000. During fiscal year 2010, an aggregate of 408,440 shares were granted as restricted shares/share units, long term incentive performance awards and stock options under the 2005 Plan. Canceled awards during fiscal year 2010 totaled 25,167, and will become available for future grants. Unless otherwise set forth in an award agreement, awards granted as an option to purchase shares shall vest in three equal annual installments commencing on the second anniversary of the date of such grant. Awards granted as restricted shares/share units have restrictions that generally lapse in three equal annual installments commencing on the first anniversary of the date of such award.

At June 30, 2010, the aggregate number of shares available for future grants under the 2005 Plan is 839,946.

Compensation expense recorded for all of the Company's share-based compensation plans for the fiscal years, 2010, 2009 and 2008 was \$829, \$1,092 and \$1,031, respectively. The tax benefit related to this compensation expense for the fiscal years 2010, 2009 and 2008 was \$274, \$373 and \$336, respectively.

Exercisable at June 30, 2010	37,993	\$ 5.49	\$ 5.49

The aggregate intrinsic value of options exercised during the fiscal year ended June 30, 2010 was \$15.

The following table summarizes information regarding stock options outstanding and exercisable at June 30, 2010:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Outstanding Options	Weighted Average Remaining Contractual Life	Weighted Average Outstanding Price	Number of Exercisable Options	Weighted Average Exercise Price
\$0.58 - \$1.50	133,167	1.5 years	\$ 1.01	126,167	\$ 1.00
\$1.82 - \$3.25	390,834	4.6 years	\$ 2.03	173,334	\$ 2.08
\$3.41 - \$4.90	346,668	4.8 years	\$ 4.00	320,000	\$ 3.93
\$4.95 - \$5.49	121,333	7.1 years	\$ 5.45	44,659	\$ 5.41

The aggregate intrinsic value of both outstanding and exercisable options at June 30, 2010 was \$24.

Total unrecognized compensation costs related to non-vested stock option awards at June 30, 2010 is \$251 and is expected to be recognized over the weighted average period of approximately 2.1 years.

The Company estimates the fair value of stock options at the date of grant using a Black-Scholes valuation model. Key inputs and assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the Company's stock, the risk free rate and the Company's dividend yield.

The following table presents the weighted average assumptions used for options granted.

For the Years Ended June 30,

	2010	2009	2008
	(in thousands)		
Option term ⁽¹⁾	5	5	5
Volatility ⁽²⁾	50.51	49.85	63.57
Risk free rate	2.31	3.18	4.77
Dividend yield			
Weighted average fair value	\$ 0.84	\$ 1.04	\$ 3.18

- (1) The option term is the number of years that the Company estimates, based on history, that options will be outstanding prior to exercise.
- (2) Prior to fiscal 2006, expected volatility was based on historical volatilities over the expected terms. With the adoption of SFAS 123(R) the Company continues to determine expected volatility based on historical volatilities but has incorporated adjustments associated with an unusually volatile period from its mean-reversion analysis for fiscal years commencing with 2006.

Restricted Stock

During the years ended June 30, 2010 and 2009, the Company issued restricted shares/share units under the 2005 Plan. Awards granted as restricted shares/share units have restrictions that generally lapse in three equal annual installments commencing on the first anniversary of the date of each such award. Compensation expense of \$655 and \$884 was recognized during the periods ended June 30, 2010 and 2009, respectively. The aggregate unrecognized compensation costs related to the non-vested restricted grants at June 30, 2010 was \$443 and is expected to be recognized over a weighted-average period of approximately 1.5 years.

Table of Contents

The following table summarizes outstanding and non-vested shares under the 2005 Plan for 2010, 2009 and 2008.

	Class A Units	The 2005 Plan Weighted Average Grant Date Fair Value
Outstanding at June 30, 2007	286,039	\$ 4.80
Granted	245,848	\$ 4.75

Vested	(187,774)	\$ 4.05
Outstanding at June 30, 2010	327,458	\$ 2.43

Long Term Incentive Performance Share Awards

During the fiscal years ended June 30, 2010 and 2009, the Company issued long term incentive performance share awards (PSAs) under the 2005 Plan. PSAs are stock awards where the number of shares ultimately received by the employee depends on the Company s performance against specified targets and typically vest during a three-year period. The fair value of each PSA is determined on the grant date, based on the Company s stock price. Over the performance period, the number of shares of stock that will be issued and the associated compensation expense is adjusted upward or downward based upon the probability of achievement of performance targets. The ultimate number of shares issued and the related compensation cost recognized as expense will be based on a comparison of the final performance metrics to the specified targets. The fair value of PSAs granted during the fiscal years ended June 30, 2010 and 2009, was \$183 and \$87, respectively. Total fair value of PSAs vested and compensation expense during the year ended June 30, 2010 and 2009 was \$0, based on the current assessment of the probability of achievement.

Long-term incentive performance share awards:

	Class A Units	The 2005 Plan Weighted Average Grant Date Fair Value
Outstanding at June 30, 2008	0	\$ 0.00

Granted	43,333	\$	2.15
Canceled	0	\$	0.00
Vested	0	\$	0.00
Outstanding at June 30, 2009	43,333	\$	2.15
Granted	101,440	\$	1.80
Canceled	(4,000)	\$	2.15
Vested	0	\$	0.00
Outstanding at June 30, 2010	140,773	\$	1.90

Note 13 Supplemental Compensation:

In the U.S., the Company maintains the Baldwin Technology Profit Sharing and Savings Plan. The Company typically matched up to 5% of eligible compensation and the participants' interests in the Company's contributions vest immediately. During fiscal years 2009 and 2010, the Company suspended its matching contributions to the plan. Participant contributions are made on a weekly basis, while the Company's matching contributions are made on a quarterly basis. Employer contributions charged to income were \$0, \$154 and \$254, respectively, for the fiscal years ended June 2010, 2009 and 2008. The assets of the plan are invested primarily in mutual funds, money market funds, and Class A Common Stock of the Company. The Class A Common Stock constituted approximately 1% of the total assets of the Plan at June 30, 2010.

Table of Contents

Certain subsidiaries within Europe maintain defined contribution and/or profit sharing plans. Amounts expensed under these plans based upon the age, salary and years of service of employees covered by the plans were as follows:

	For the Years Ended June 30,		
	2010	2009	2008
	(in thousands)		
Baldwin Germany GmbH	\$ 213	\$ 218	\$ 221
Baldwin IVT AB	44	48	59
Baldwin Jimek AB	75	67	77
Baldwin UK Ltd.	52	60	79
Baldwin Globaltec Ltd.	8	8	10
Total expense	\$ 392	\$ 401	\$ 446

In Germany, there is one pension plan covering one former employee, and the Company's Japanese subsidiary maintains a retirement plan covering all of its employees. These defined benefit plans provide for benefits, at maturity age, in lump sum payments on retirement or death or as a disability pension in case of disability. The fair value of 100% of plan assets are represented by insurance contracts and the expected return on plan assets is determined based on the expected long term rate of return on plan assets. The Company also has a non-qualified Supplemental Executive Retirement Plans (SERPs). The SERPs provides benefits to eligible executives, based on average earnings, years of service and age at retirement or separation of employment. The Company has established a Trust to provide a potential source of funds to pay benefits under the SERPs. The amount held in trust at June 30, 2010 and 2009 was \$1,253 and \$1,156, respectively, which represents the market value of the trust assets measured as a Level 1 type valuation as of June 30, 2010 and 2009, respectively. The Company uses a measurement date of June 30 for its defined benefits plans.

The following tables set forth the components of net periodic benefit costs, the funded status and key actuarial assumptions, and reconciliations of projected benefit obligations and fair values of plan assets of the defined benefit plans:

	For the Years Ended June 30,		
	2010	2009	2008
	(in thousands)		
Service Cost – benefits earned during the year	\$ 401	\$ 401	\$ 424
Interest on projected benefit obligation	329	336	259

Expected rate of return on plan assets	1.50%-4.00%	1.00%-4.10%

Undiscounted benefit amounts expected to be paid for each of the next five successive fiscal years and for the aggregate next five years thereafter are as follows:

Fiscal Years Ending June 30,	Amount (in thousands)
2011	\$ 1,058
2012	\$ 804
2013	\$ 1,030
2014	\$ 813
2015	\$ 613
Aggregate for 2016 through 2020	\$ 4,373

The amount expected to be contributed by the Company to its defined benefit pension plans during fiscal year 2011 is approximately \$287.

Table of Contents**Note 14 Restructuring:**October FY 2009 Plan:

On October 29, 2008, the Company committed to the principal features of a plan to restructure and achieve operational efficiencies in its operations in Germany. Actions under the Plan commenced during October 2008 and were substantially completed by December 31, 2008. No non-cash charges were contemplated in connection with the Plan. Payments made under the plan were completed by September 30, 2009.

	Initial Reserve	Payments against Reserve	Balance at June 30, 2009 (in thousands)	Payments against Reserve	Balance at June 30, 2010

Employee termination costs	\$ 681	\$ (586)	\$ 95	\$ (95)	\$
Total restructuring costs	\$ 681	\$ (586)	\$ 95	\$ (95)	\$

Quarter 3 FY 2009 Plans:

In January and March 2009, the Company committed to the principal features of plans to restructure some of its existing operations. These plans included the consolidation of production facilities in Germany, as well as employee reductions in Germany, Sweden, Italy and the U.S. The actions were taken in response to sustained weak market conditions. Actions under the plan commenced during the third quarter of Fiscal 2009; and the Company substantially completed the actions by June 30, 2009.

	Initial Reserve	Payments against Reserve	Balance at June 30, 2009 (in thousands)	Payments against Reserve	Balance at June 30, 2010
Restructuring costs:

Total restructuring costs	\$ 4,066	\$ (1,903)	\$ 2,163	\$ (1,768)	\$ 395

Quarter 4 FY 2010 Plan:

In June 2010 the Company committed to the principal features of a plan to additionally restructure its operation in Germany. Actions under the plan commenced and were completed by June 30, 2010. All costs associated with the plan are cash payments related to employee reductions. Payments will continue through the second quarter of fiscal 2011.

	Initial Reserve	Payments against Reserve (in thousands)	Balance at June 30, 2010
Restructuring costs:			
Employee termination costs	\$ 540	\$ (38)	\$ 502
Total restructuring costs	\$ 540	\$ (38)	\$ 502

Note 15 Business Acquisition:

On June 30, 2010, the Company concluded its acquisition of 100% of the outstanding shares of Nordson UV. The acquired business provides UV (ultraviolet) curing systems to the graphic arts markets, as well as a line of parts and consumables (ultraviolet lamps). The acquisition introduces the Company to delivery of UV curing systems as well as expanding opportunities in UV applications and the digital (ink jet) market sector.

In conjunction with the acquisition, the Company executed a five-year purchase note payable to Nordson Corporation, the seller. The original amount of the note payable was \$2,150. Due to a subsequent net working capital adjustment, the note will be revised to

Table of Contents

\$2,521 of which \$1,871 represents the purchase price and \$650 represents costs of the transaction funded by the seller to be repaid to the seller over the period of the note.

The following summarizes the allocation of purchase price, based on a management's valuation study, to the fair value of assets acquired and liabilities assumed at the date of acquisition.

Assets acquired:	
Accounts Receivable	\$ 1,875
Inventory	2,740
Property, plant and equipment	1,174
Existing product technology and other intangibles	1,560
Other assets	611
 Total assets acquired	 \$ 7,960
 Liabilities assumed:	
Accounts payable and other accrued liabilities	\$ 1,978
Deferred tax liability	1,151
 Net assets acquired	 4,831
Gain on bargain purchase	2,960
 Purchase price	 \$ 1,871

Note 16 Goodwill and Other Intangible Assets:

The changes in the carrying amount of goodwill for each of the fiscal years ended June 30, 2010 and 2009 are as follows:

Activity in the fiscal year ended June 30, 2010 was as follows:

	Gross Carrying Amount	Accumulated Amortization (in thousands)	Net Book Value
Balance as of July 1, 2009	\$ 22,170	\$ 1,462	\$ 20,708
Effects of currency translation	(643)	(37)	(606)
Balance as of June 30, 2010	\$ 21,527	\$ 1,425	\$ 20,102

Activity in the fiscal year ended June 30, 2009 was as follows:

	Gross Carrying Amount	Accumulated Amortization (in thousands)	Net Book Value
Balance as of July 1, 2008	\$ 31,516	\$ 3,765	\$ 27,751

Impairment *	(8,037)	(2,379)	(5,658)
Oxy-Dry price adjustment	(164)		(164)
Effects of currency translation	(1,145)	76	(1,221)
Balance as of June 30, 2009	\$ 22,170	\$ 1,462	\$ 20,708

*The Company recorded a goodwill impairment charge mainly related to its Japan reporting unit during the third quarter of fiscal year 2009.

Intangible assets subject to amortization were comprised of the following:

	Amortization Period (Years)	As of June 30, 2010		As of June 30, 2009	
		Gross Carrying Amount (in thousands)	Accumulated Amortization (in thousands)	Gross Carrying Amount (in thousands)	Accumulated Amortization (in thousands)
Intangible Assets:					
Patents and Trademarks	12-20	\$ 11,372	\$ 7,155	\$ 10,998	\$ 6,830
Customer relationships	2-13	1,066	204	644	114
Trademarks	30	1,368	163	1,508	92
Existing product technology	15	5,605	1,135	5,167	612
Non-compete/solicitation agreements	5	95	67	95	34
Other	5-30	2,165	1,848	2,195	1,715
Total		\$ 21,671	\$ 10,572	\$ 20,607	\$ 9,397

Table of Contents

The weighted average life for intangible assets at June 30, 2010 was 13 years. Amortization expense was \$1,253 for the fiscal year ended June 30, 2010, \$1,427 for the fiscal year ended June 30, 2009 and \$1,182 for the fiscal year ended June 30, 2008. The net carrying amount of intangible assets decreased \$111 for the year ended June 30, 2010 primarily due to amortization of \$1,253 and effects of currency translation of \$563, offset by intangibles created as a result of the Nordson acquisition of \$1,560 and the costs of retaining and obtaining future economic benefits of patents of \$147.

Estimated amortization expense for each of the five fiscal years is as follows:

Fiscal Years Ending June 30,	Amount (in thousands)
2011	\$ 1,312
2012	\$ 1,217
2013	\$ 1,106
2014	\$ 1,052
2015	\$ 1,014

Note 17 Commitments and Contingencies:

Future minimum annual lease payments under capital leases are as follows at June 30, 2010:

Fiscal Years Ending June 30,	Amount (in thousands)
2011	99
2012	3
2013	
2014	
2015	
Present value of minimum lease payments (net of \$2 with interest)	\$ 102

At June 30, 2010, \$3 (\$90 at June 30, 2009) was included in Other long-term liabilities representing the long-term portion of the present value of minimum lease payments, and \$99 (\$137 at June 30, 2009) was included in Other accounts payable and accrued liabilities representing the current portion of the present value of minimum lease payments. At June 30, 2010, the gross asset totaled \$95, with accumulated depreciation of \$69.

Rental expense under operating leases amounted to approximately \$7,316, \$6,697 and \$6,696 for the years ended June 30, 2010, 2009 and 2008, respectively. Aggregate future annual rentals under noncancellable operating leases for periods of more than one year at June 30, 2010 are as follows:

Fiscal Years Ending June 30,	Amount (in thousands)
2011	\$ 6,376
2012	\$ 4,594
2013	\$ 3,537
2014	\$ 2,339
2015	\$ 1,892
2016 and thereafter	\$ 4,383

Note 18 Related Parties:

Samuel B. Fortenbaugh III, a Director of the Company since 1987, has rendered legal services to the Company since September 2002. During the fiscal years ended June 30, 2010, 2009 and 2008, the Company paid \$139, \$95 and \$171, respectively to Mr. Fortenbaugh for legal services rendered.

Akira Hara, a Director of the Company from 1989 through 2008, is currently a strategic advisor to the Company and Chairman of Baldwin Japan Limited, a wholly-owned subsidiary of the Company. Mr. Hara, as strategic advisor, receives compensation of

Table of Contents

approximately \$40 per year through September 30, 2010. In addition, Mr. Hara receives benefits under a non-qualified supplemental executive retirement plan, which expires in 2015 or upon his death whichever occurs later. The estimated annual benefit payable to him under this supplemental plan is approximately \$183.

Note 19 Warranty Costs:

The Company's standard contractual warranty provisions are to repair or replace product that is proven to be defective. The Company estimates its warranty costs as a percentage of revenues on a product by product basis, based on the actual historical experience. The Company accrues estimated warranty costs, reported in other accounts payable and accrued liabilities, at the time of sale. In addition, should the Company become aware of a specific potential warranty claim, a specific charge is recorded and accounted for separate from and in addition to the percentage of revenue discussed above.

	Warranty Amount (in thousands)
Warranty reserve at June 30, 2008	\$ 5,421
Additional warranty expense accruals	2,708
Payments against reserve	(4,817)
Effects of currency rate fluctuations	(686)
Warranty reserve at June 30, 2009	\$ 2,626
Additional warranty expense accruals	2,271
Additional warranty reserve related to Nordson acquisition	240
Payments against reserve	(3,085)
Effects of currency rate fluctuations	(53)
Warranty reserve at June 30, 2010	\$ 1,999

Note 20 Legal Proceedings:

Baldwin is involved in various legal proceedings from time to time, including actions with respect to commercial, intellectual property and employment matters. The Company believes that it has meritorious defenses against the claims currently asserted against it and intends to defend them vigorously. However, the outcome of litigation is inherently uncertain, and the Company cannot be sure that it will prevail in any of the cases currently in litigation. The Company believes that the ultimate outcome of any such cases will not have a material adverse effect on its results of operations, financial position or cash flows; however, there can be no assurances that an adverse determination would not have a material adverse effect on the Company.

On September 24, 2009, the Company and technotrans AG (Technotrans) agreed to an out-of-court settlement to terminate proceedings that have been continuing for a number of years in connection with the infringement of a Baldwin patent. Under the agreement, technotrans paid to the Company Euro 6.5 million (approximately \$9.6 million) to the Company and the Company agreed to dismiss its claim for damages.

Note 21: Subsequent Event:

On July 8, 2010, the Company entered into an advisory agreement (the Advisory Agreement) with OBX Partners LLC (OBX), a Florida limited liability company, under which OBX will act as a financial advisor and strategic consultant to the Ad Hoc Advisory Committee of the Board of Directors of the Company, with regard to any transactions being contemplated by the Company during the term of the engagement, the Company's budget and business plans and the Company's financing needs and liquidity. A copy of the Advisory Agreement was filed as Exhibit 10.1 to the Company's Report on Form 8-K filed July 14, 2010. As part of the consideration for the services to be rendered pursuant to the Advisory Agreement, the Company granted to OBX an option (the Option) to purchase 300,000 shares of the Company's Class A Common Stock (the Shares) at an exercise price per share of \$1.26,

exercisable on or after October 1, 2011. The Option will terminate on November 16, 2010 if OBX shall not have substantially completed the engagement. If not previously terminated, the Option shall terminate on September 30, 2020. Neither the Option nor the Shares to be issued upon exercise of the Option have been registered under the Securities Act of 1933 in reliance upon the exemption from registration afforded by Section 4(2) of the Securities Act of 1933, as amended.

Table of Contents

On September 28, 2010, the Company entered into Amendment No. 8 to the Credit Agreement (the Amendment #8) with BofA. Under the terms of the Amendment, the total commitment under the revolving Credit Agreement was reduced from \$25 million to \$20 million, certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants with a term of 10 years to purchase 352,670 shares of common stock in the Company for \$0.01 per share. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

Operating expenses include \$465 accounts receivable reserve for a customer bankruptcy in third quarter and \$240 additional allowance for doubtful accounts in fourth quarter

(4) See Note 14 regarding details of restructuring expense

(5) Third quarter reflects a goodwill impairment charge related to the Company's Japan reporting unit

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

None.

Item 9A. Controls and Procedures

(a) Evaluation of disclosure controls and procedures

The Company maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Company's reports under the Exchange Act of 1934, as amended (the Exchange Act) is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Company's management, with participation of the Company's former Chief Executive Officer and former Chief Financial Officer, conducted an evaluation of the effectiveness of the Company's disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) as of the end of the period covered by this Annual Report on Form 10-K/A. Previously, based upon this evaluation, our former Chief Executive Officer and former Chief Financial Officer concluded that our disclosure controls and procedures were effective as of June 30, 2010. However, as a result of the restatement of the financial statements, disclosed in the Current Report on Form 8-K dated May 10, 2011, and in this Annual Report on Form 10-K/A and the material weaknesses that are described below, our current Chief Executive Officer and current Chief Financial Officer have concluded that our disclosure controls and procedures were not effective as of June 30, 2010.

Table of Contents**(b) Management's report on internal controls over financial reporting**

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. The Company's internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The Company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation and effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures of the Company may deteriorate.

Management conducted an evaluation of the effectiveness of internal control over financial reporting as of June 30, 2010 based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management's assessment included an evaluation of the design of the Company's internal control over financial reporting and testing the effectiveness of the Company's internal control over financial reporting.

Previously, our former Chief Executive Officer and former Chief Financial Officer concluded and reported that the Company's internal control over financial reporting was effective as of June 30, 2010. However, current management has identified material weaknesses in the Company's internal control over financial reporting, as described below. The Company's current management has concluded that as a result of these material weaknesses, as of June 30, 2010, the Company's internal control over financial reporting was not effective at that date.

A material weakness is a control deficiency, or combination of control deficiencies, that result in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected.

Material Weakness Identified in the Company's Operations in Japan. In late February 2011, allegations surfaced that profits had been manipulated at the Company's Japanese subsidiary. The Audit Committee of the Board of Directors oversaw an internal investigation consisting of extensive employee interviews and audit procedures to review the allegations. The investigation identified the premature recognition of revenue and related costs primarily during the quarter ended June 30, 2010 as well as the inappropriate deferral and subsequent recognition of expenses during the quarters of 2009 and 2010, which had no impact on full year fiscal 2009 and were not material in 2010. These irregularities occurred as a result of management override and intentional circumvention of established revenue recognition, purchase and expense policies and related internal controls at the Company's Japanese subsidiary. Specifically, existing policies and controls were violated as revenue was recorded prior to shipments of goods or completion of installation services and related costs were recorded prior to receipt of materials and components. This intentional circumvention of internal controls was apparently intended to achieve sales and earnings forecasts previously submitted by the Japanese subsidiary to corporate senior management, although such forecasts were not met. The investigation also revealed that no individual appeared to personally benefit from these irregularities. This circumvention of controls was the result of a material weakness in the control environment at the Japan operations. The table below sets forth the adjustments needed to the reported financial statements in order to correct the misstatements.

Table of Contents

Since August 2010, which is before the identification of the irregularities in Japan, the Company has made significant senior level and other management changes and other organizational changes. In August 2010, the former President of the Company's Japanese operations left the Company. In October 2010, the Company hired a new Chief Executive Officer. In December 2010, under the leadership of the new CEO, the Company made significant organizational changes including transforming the Company from a country-based group of silo organizations, with local management and local focus, to a globally integrated organization with multiple leaders having global

responsibility managing the Company's business units with improved reporting and personal accountabilities. Additionally, in March 2011, the Company hired a new President for its Japanese subsidiary and in April 2011, the Company hired a new Chief Financial Officer. We believe that these senior management and organizational changes will contribute significantly to remediating the issues with management override and circumvention of internal controls at the Japanese subsidiary.

Table of Contents

Additionally, as a result of the violations of Company policy and circumvention of internal controls at its Japanese subsidiary, the Company will:

Take appropriate disciplinary actions against employees in Japan who were involved in the irregularities.

Conduct updated training with respect to Baldwin's Code of Conduct and Business Ethics policy and require annual written confirmation from each employee of their understanding and adherence to this policy.

Improve the communication surrounding, and encourage the use of, the Company's whistleblower program to ensure that any issues, such as those that led to the material weaknesses, are reported in a more timely manner.

Implement a quarterly process for management of the individual subsidiaries to review and validate the appropriateness of revenue recognition with corporate management.

Conduct additional training on the revenue recognition and purchase processes at all subsidiaries to ensure that expectations are fully communicated and understood throughout the Company.

(c) Changes in internal control over financial reporting

Management had previously concluded that the Company did not maintain effective internal control over financial reporting as of June 30, 2009. Subsequent to the Company's August 20, 2009 publication of its earnings for the year ended June 30, 2009, the Company discovered that certain shipments made by employees of its Lenexa, Kansas facility prior to June 30, 2009 did not conform to internal control policies and procedures. This resulted in adjustments for improperly recorded revenue and the collectability of certain accounts receivable.

During fiscal year 2010, management took various actions to strengthen internal control over financial reporting at its Lenexa, Kansas facility according to the remediation plan previously disclosed. The following remediation activities were performed:

Terminated the General Manager and Controller of the Lenexa, Kansas facility and hired new highly qualified executives to fill those positions

Hired an internal auditor to regularly review conformance to internal control policies and procedures globally

Provided additional training in the Company's ethics and whistleblower policies, as well as the Company operating policies, procedures and internal controls, primarily in areas related to revenue.

As a result of the execution of our remediation plan and testing of the effectiveness of internal controls over financial reporting, the Company had previously concluded that its internal control over financial reporting was effective as of June 30, 2010. This conclusion has changed, however, as a result of the irregularities in the operations in Japan that are discussed above.

Except as noted above, there was no change in the Company's internal control over financial reporting that occurred in the fourth quarter ended June 30, 2010, that materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. Other Information

On September 28, 2010, the Company entered into Amendment No. 8 to the Credit Agreement (the Amendment #8), with Bank of America and the other Lenders parties thereto. Under the terms of the Amendment #8, the total commitment under the revolving credit agreement was reduced from \$25 million to \$20 million, certain adjustments were made to the interest payment provisions; and the Company provided the lenders warrants as described below. The Amendment #8 sets new covenants for currency adjusted net sales, establishes minimum EBITDA levels and sets a limit on capital expenditures for the fiscal year ended June 30, 2011.

On September 28, 2010, the Company issued to Bank of America, N.A., RBS Citizens, North America and Webster Bank, N.A. a Warrant with a term of ten (10) years to purchase an aggregate of 352,671 shares of Class A Common Stock of the Company for \$0.01 per share. If not previously exercised, the Warrant will become void on

September 28, 2020. The Warrants also contain a put provision that enables the Holder after September 28, 2012 to request a cash settlement of the then fair market value of the Warrants in an amount not to exceed \$1.50 per share. Neither the Warrants nor the shares acquirable upon the exercise thereof have been registered under the Securities Act of 1933, as Amended, or under the securities laws of any state, in reliance upon an exemption from such registration.
