The accompanying notes are an integral part of these consolidated financial statements.

GLADSTONE COMMERCIAL CORPORATION
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Organization and Significant Accounting Policies

Gladstone Commercial Corporation (the Company) is a Maryland corporation that operates in a manner so as to qualify as a real estate investment trust (REIT) for federal income tax purposes and was incorporated on February 14, 2003 under the General Corporation Law of Maryland for the purpose of engaging in the business of investing in real estate properties net leased to creditworthy entities and making mortgage loans to creditworthy entities. Subject to certain restrictions and limitations, the business of the Company is managed by Gladstone Management Corporation, a Delaware corporation (the Adviser).

Subsidiaries

The Company conducts substantially all of its operations through a subsidiary, Gladstone Commercial Limited Partnership, a Delaware limited partnership, (the Operating Partnership). As the Company currently owns all of the general and limited partnership interests of the Operating Partnership through GCLP Business Trust I and II as disclosed below, the financial position and results of operations of the Operating Partnership are consolidated with those of the Company.

Gladstone Commercial Partners, LLC, a Delaware limited liability company (Commercial Partners) and a subsidiary of the Company, was organized to engage in any lawful act or activity for which a limited liability company may be organized in Delaware. Commercial Partners has the power to make and perform all contracts and to engage in all activities to carry out the purposes of the Company, and all other powers available to it as a limited liability company. As the Company currently owns all of the membership interests of Commercial Partners, the financial position and results of operations of Commercial Partners are consolidated with those of the Company.

Gladstone Lending, LLC, a Delaware limited liability company (Gladstone Lending), and a subsidiary of the Company, was created to conduct all operations related to real estate mortgage loans of the Company. As the Operating Partnership currently owns all of the membership interests of Gladstone Lending, the financial position and results of operations of Gladstone Lending are consolidated with those of the Company.

Gladstone Commercial Advisers, Inc., a Delaware corporation (Commercial Advisers) and a subsidiary of the Company, is a taxable REIT subsidiary (TRS), which was created to collect all non-qualifying income related to the Company's real estate portfolio. It is currently anticipated that this income will predominately consist of fees received by the Company related to the leasing of real estate. There have been no such fees earned to date. Since the Company owns 100% of the voting securities of Commercial Advisers, the financial position and results of operations of Commercial Advisers are consolidated with those of the Company.

GCLP Business Trust I and GCLP Business Trust II, subsidiaries of the Company, each are business trusts formed under the laws of the Commonwealth of Massachusetts on December 28, 2005. The Company transferred its 99% limited partnership interest in the Operating Partnership to GCLP Business Trust I in exchange for 100 trust shares. Commercial Partners transferred its 1% general partnership interest in the Operating Partnership to GCLP Business Trust II in exchange for 100 trust shares.

Interim financial information

Interim financial statements of the Company are prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying annual financial statements prepared in accordance with GAAP are omitted. In the opinion of management, all adjustments, consisting solely of normal recurring accruals, necessary for the fair statement of financial statements for the interim period have been included.

Investments in real estate

The Company records investments in real estate at cost and capitalizes improvements and replacements when they extend the useful life or improve the efficiency of the asset. The Company expenses costs of repairs and maintenance as incurred. The Company computes depreciation using the straight-line method over the estimated useful life of 39 years for buildings and improvements, five to seven years for equipment and fixtures and the shorter of the useful life or the remaining lease term for tenant improvements and leasehold interests.

The Company accounts for its acquisitions of real estate in accordance with Statement of Financial Accounting Standards (SFAS) No. 141, Business Combinations, which requires the purchase price of real estate to be allocated to the acquired tangible assets and liabilities, consisting of land, building, tenant improvements, long-term debt and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, the value of in-place leases, the value of unamortized lease origination costs, the value of tenant relationships and the value of capital lease obligations based in each case on their fair values.

Management's estimates of value are made using methods similar to those used by independent appraisers (e.g., discounted cash flow analysis). Factors considered by management in its analysis include an estimate of carrying costs during hypothetical expected lease-up periods considering current market conditions, and costs to execute similar leases. The Company also considers information obtained about each property as a result of its pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets and liabilities acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the expected lease-up periods, which primarily range from nine to eighteen months, depending on specific local market conditions. Management also estimates costs to execute similar leases including leasing commissions, legal and other related expenses to the extent that such costs are not already incurred in connection with a new lease origination as part of the transaction.

The Company allocates purchase price to the fair value of the tangible assets of an acquired property by valuing the property as if it were vacant. The as-if-vacant value is allocated to land, building, and tenant improvements based on management's determination of the relative fair values of these assets. Real estate depreciation expense on these tangible assets was \$2,103,633 and \$1,593,790 for the three months ended March 31, 2008 and 2007, respectively.

Above-market and below-market in-place lease values for owned properties are recorded based on the present value (using an interest rate which reflects the risks associated with the leases acquired) of the difference between (i) the contractual amounts to be paid pursuant to the in-place leases and (ii) management's estimate of fair market lease rates for the corresponding in-place leases, measured over a period equal to the remaining non-cancelable term of the lease. The capitalized above-market lease values, included in the accompanying balance sheet as part of deferred rent receivable, are amortized as a reduction of rental income over the remaining non-cancelable terms of the respective leases. Total amortization related to above-market lease values was \$63,374 for both the three months ended March 31, 2008 and 2007. The capitalized below-market lease values, included in the accompanying balance sheet as deferred rent liability, are amortized as an increase to rental income over the remaining non-cancelable terms of the respective leases. Total amortization related to below-market lease values was \$196,391 for both the three months ended March 31, 2008 and 2007.

The total amount of the remaining intangible assets acquired, which consist of in-place lease values, unamortized lease origination costs, and customer relationship intangible values, are allocated based on management's evaluation of the specific characteristics of each tenant's lease and the Company's overall relationship with that respective tenant. Characteristics to be considered by management in allocating these values include the nature and extent of our existing business relationships with the tenant, growth prospects for developing new business with the tenant, the tenant's credit quality and expectations of lease renewals (including those existing under the terms of the lease agreement), among other factors.

The value of in-place leases and unamortized lease origination costs are amortized to expense over the remaining term of the respective leases, which generally range from five to twenty years. The value of customer relationship intangibles, which is the benefit to the Company resulting from the likelihood of an existing tenant renewing its lease, are amortized to expense over the remaining term and any anticipated renewal periods in the respective leases, but in no event does the amortization period for intangible assets exceed the remaining depreciable life of the building. Should a tenant terminate its lease, the unamortized portion of the above-market and below-market lease values, in-place lease values, unamortized lease origination costs and customer relationship intangibles will be charged to expense. Total amortization expense related to these intangible assets was \$884,129 and \$824,017 for the three months ended March 31, 2008 and 2007, respectively.

The following table summarizes the net value of other intangible assets and the accumulated amortization for each intangible asset class:

	March 31, 2008		December 31, 2007	
	Lease Intangibles	Accumulated Amortization	Lease Intangibles	Accumulated Amortization
In-place leases	\$ 13,475,625	\$ (3,816,500)	\$ 12,660,732	\$ (3,414,868)
Leasing costs	9,467,919	(2,331,187)	9,290,026	(2,114,233)
Customer relationships	16,581,252	(2,297,370)	14,599,726	(2,031,827)
	\$ 39,524,796	\$ (8,445,057)	\$ 36,550,484	\$ (7,560,928)

The estimated aggregate amortization expense for the current and each of the four succeeding fiscal years is as follows:

Year	Estimated Amortization Expense
2008	\$2,854,673
2009	3,678,591
2010	3,590,188
2011	3,399,399
2012	2,998,170

Impairment

Investments in Real Estate

The Company accounts for the impairment of real estate in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which requires that the Company periodically review the carrying value of each property to determine if circumstances that indicate impairment in the carrying value of the investment exist or that depreciation periods should be modified. If circumstances support the possibility of impairment, the Company prepares a projection of the undiscounted future cash flows, without interest charges, of the specific property and determines if the investment in such property is recoverable. If impairment is indicated, the carrying

value of the property would be written down to its estimated fair value based on the Company's best estimate of the property's discounted future cash flows. There have been no impairments recognized on real estate assets in the Company's history.

Provision for Loan Losses

The Company's accounting policies require that it reflect in its financial statements an allowance for estimated credit losses with respect to mortgage loans it has made based upon its evaluation of known and inherent risks associated with its private lending assets. Management reflects provisions for loan losses based upon its assessment of general market conditions, its internal risk management policies and credit risk rating system, industry loss experience, its assessment of the likelihood of delinquencies or defaults, and the value of the collateral underlying its investments. Actual losses, if any, could ultimately differ from these estimates. There have been no provisions for loan losses in the Company's history.

Cash and cash equivalents

The Company considers all short-term, highly liquid investments that are both readily convertible to cash and have a maturity of three months or less at the time of purchase to be cash equivalents; except that any such investments purchased with funds held in escrow or similar accounts are classified as restricted cash. Items classified as cash equivalents include commercial paper and money-market funds. All of the Company's cash and cash equivalents at March 31, 2008 were held in the custody of one financial institution, and the Company's balance at times may exceed federally insurable limits. The Company mitigates this risk by depositing funds with major financial institutions.

Restricted cash

Restricted cash consists of security deposits and funds held in escrow for certain tenants. The funds held in escrow are for capital improvements, taxes, insurance and other replacement reserves for certain of our tenants. These funds will be released to the tenants upon completion of agreed upon tasks as specified in the lease agreements, mainly consisting of maintenance and repairs on the buildings, and when evidence of insurance and tax payments has been submitted to the Company.

Funds held in escrow

Funds held in escrow consist of funds held by certain of the Company's lenders for properties held as collateral by these lenders. These funds consist of replacement reserves for capital improvements, repairs and maintenance, insurance and taxes. These funds will be released to the Company upon completion of agreed upon tasks as specified in the mortgage agreements, mainly consisting of maintenance and repairs on the buildings, and when evidence of insurance and tax payments has been submitted to the lenders.

Deferred financing costs

Deferred financing costs consist of costs incurred to obtain financing, including legal fees, origination fees, and administrative fees. The costs are deferred and amortized using the straight-line method, which approximates the effective interest method, over the term of the financing secured. The Company made payments of \$35,934 and \$378,745 for deferred financing costs during the three months ended March 31, 2008 and 2007, respectively. Total amortization expense related to deferred financing costs was \$249,323 and \$164,462 for the three months ended March 31, 2008 and 2007, respectively.

Prepaid expenses and other assets

Prepaid expenses and other assets consist of accounts receivable, interest receivable, prepaid assets and deposits on real estate.

Obligation under capital lease

In conjunction with the Company's acquisition of a building in Fridley, Minnesota on February 26, 2008, it was assigned a ground lease on the parking lot of the building at the time of closing, which had a purchase obligation to acquire the land under the ground lease at the end of the term, April 1, 2014. In accordance with SFAS No. 13

Accounting for Leases, the Company accounted for the ground lease as a capital lease and recorded the corresponding obligation under the capital lease.

Revenue recognition

Rental revenue includes rents that each tenant pays in accordance with the terms of its respective lease reported on a straight-line basis over the non-cancelable term of the lease. Certain of the Company's leases currently contain rental increases at specified intervals, and straight-line basis accounting requires the Company to record an asset, and include in revenues, deferred rent receivable that will be received if the tenant makes all rent payments required through the expiration of the initial term of the lease. Deferred rent receivable in the accompanying balance sheet includes the cumulative difference between rental revenue as recorded on a straight line basis and rents received from the tenants in accordance with the lease terms, along with the capitalized above-market lease values of certain acquired properties. Accordingly, the Company determines, in its judgment, to what extent the deferred rent receivable applicable to each specific tenant is collectible. The Company reviews deferred rent receivable, as it relates to straight line rents, on a quarterly basis and takes into consideration the tenant's payment history, the financial condition of the tenant, business conditions in the industry in which the tenant operates and economic conditions in the area in which the property is located. In the event that the collectibility of deferred rent with respect to any given tenant is in doubt, the Company records an increase in the allowance for uncollectible accounts or records a direct write-off of the specific rent receivable, which would have an adverse effect on the net income for the year in which the reserve is increased or the direct write-off is recorded and would decrease total assets and stockholders' equity. No such reserves have been recorded as of March 31, 2008.

Management considers its loans and other lending investments to be held-for-investment. The Company reflects held-for-investment investments at amortized cost less allowance for loan losses, acquisition premiums or discounts, and deferred loan fees. On occasion, the Company may acquire loans at small premiums or discounts based on the credit characteristics of such loans. These premiums or discounts are recognized as yield adjustments over the lives of the related loans. Loan origination fees, as well as direct loan origination costs, are also deferred and recognized over the lives of the related loans as yield adjustments. If loans with premiums, discounts, or loan origination fees are prepaid, the Company immediately recognizes the unamortized portion as a decrease or increase in the prepayment gain or loss. Interest income is recognized using the effective interest method applied on a loan-by-loan basis. Prepayment penalties or yield maintenance payments from borrowers are recognized as additional income when received.

Certain of our mortgage loans and leases have embedded derivatives in the form of interest rate floors and ceilings. These embedded derivatives do not require separate accounting under SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities.

Income taxes

The Company has operated and intends to continue to operate in a manner that will allow it to qualify as a REIT under the Internal Revenue Code of 1986, as amended, and accordingly will not be subject to federal income taxes on amounts distributed to stockholders (except income from foreclosure property), provided it distributes at least 90% of its REIT taxable income to its stockholders and meets certain other conditions. To the extent that the Company satisfies the distribution requirement but distributes less than 100% of its taxable income, the Company will be subject to federal corporate income tax on its undistributed income.

Commercial Advisers is a wholly-owned TRS that is subject to federal and state income taxes. Though Commercial Advisers has had no activity to date, the Company would account for any future income taxes in accordance with the provisions of SFAS No. 109, Accounting for Income Taxes. Under SFAS No. 109, the Company accounts for income taxes using the asset and liability method under which deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases.

Segment information

SFAS No. 131, *Disclosures about Segments of an Enterprise and Related Information* provides standards for public companies relating to the reporting of financial and descriptive information about their operating segments in financial statements. Operating segments are defined as components of an enterprise for which separate financial information is available and is evaluated regularly by the chief operating decision maker or decision making group in determining how to allocate resources and in assessing performance. Company management is the chief decision making group. As discussed in Note 9, the Company's operations are derived from two operating segments, one segment purchases real estate (land, buildings and other improvements), which is simultaneously leased to existing users, and the other segment originates mortgage loans and collects principal and interest payments.

Foreign currency transactions

The Company purchased two properties in Canada in October of 2004. These properties were classified as held for sale as of June 30, 2006, and were sold in July 2006. All gains and losses from foreign currency transactions are reflected in discontinued operations in the Company's consolidated financial statements. The Company had a bank account in Canada, which was closed in December 2007. The cash account was re-valued at each balance sheet date to reflect the then current exchange rate. The gains or losses from the valuation of the cash were recorded on the income statement as a realized gain or loss. A realized foreign currency gain of \$7 was recorded for the three months ended March 31, 2007. There were no realized foreign currency gains or losses recorded for the three months ending March 31, 2008.

Asset retirement obligations

In March of 2005, the FASB issued Interpretation No. 47, *Accounting for Conditional Asset Retirement Obligations* (FIN 47). FIN 47 requires an entity to recognize a liability for a conditional asset retirement obligation when incurred if the liability can be reasonably estimated. FIN 47 clarifies that the term *Conditional Asset Retirement Obligation* refers to a legal obligation (pursuant to existing laws or by contract) to perform an asset retirement activity in which the timing and/or method of settlement are conditional on a future event that may or may not be within the control of the entity. FIN 47 also clarifies when an entity would have sufficient information to reasonably estimate the fair value of an asset retirement obligation. The Company has accrued a liability and corresponding increase to the cost of the related properties for disposal related to all properties constructed prior to 1985 that have, or may have, asbestos present in the building. The Company accrued a liability during the three months ended March 31, 2008 of \$259,435 related to properties acquired during the period. The Company also recorded expense of \$30,468 and \$28,160, during the three months ended March 31, 2008 and 2007, respectively, related to the cumulative accretion of the obligation.

Real estate held for sale and discontinued operations

SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, requires that the results of operations of any properties which have been sold, or are held for sale, be presented as discontinued operations in the Company's consolidated financial statements in both current and prior periods presented. Income items related to held for sale properties are listed separately on the Company's consolidated income statement. Real estate assets held for sale are measured at the lower of the carrying amount or the fair value, less the cost to sell, and are listed separately on the Company's consolidated balance sheet. Once properties are listed as held for sale, no further depreciation is recorded.

Recently Issued Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Company has only partially adopted the provisions of SFAS 157 because of the issuance of FSP SFAS 157-2 (the FSP), which allows companies to delay the effective date of SFAS 157 for non-financial assets and liabilities. The FSP permits companies that have not already issued either interim or annual financial statements reflecting the adoption of SFAS 157 to delay the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. The partial adoption had no impact on the Company's results of operations. In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). SFAS 159 allows entities to measure at fair value many financial instruments and certain other assets and liabilities that are not otherwise required to be measured at fair value. SFAS 159 is effective for fiscal years beginning after November 15, 2007. The Company adopted SFAS 159 effective for the fiscal year beginning January 1, 2008, and the adoption had no impact on the Company's results of operations.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations, SFAS No. 141(R), which replaces SFAS No. 141, Business Combinations (SFAS 141R). SFAS 141R significantly changes the accounting for acquisitions involving business combinations, as it requires that the assets and liabilities of all business combinations be recorded at fair value, with limited exceptions. SFAS 141R also requires that all expenses related to the acquisition be expensed as incurred, rather than capitalized into the cost of the acquisition as had been the previous accounting under SFAS 141. SFAS 141R is effective on a prospective basis for all business combinations for which the acquisition date is on or after the beginning of the first annual period subsequent to December 15, 2008.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (SFAS 160). SFAS 160 requires all entities to report noncontrolling (minority) interests in subsidiaries in the same way as equity in the consolidated financial statements. SFAS 160 is effective for fiscal years beginning after December 15, 2008. The Company does not believe the adoption of this pronouncement will have a material impact on its results of operations.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161), which is intended to help investors better understand how derivative instruments and hedging activities affect an entity's financial position, financial performance and cash flows through enhanced disclosure requirements. The enhanced disclosures primarily surround disclosing the objectives and strategies for using derivative instruments by their underlying risk as well as a tabular format of the fair values of the derivative instruments and their gains and losses. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008. The Company does not believe the adoption of this pronouncement will have a material impact on its results of operations.

Use of estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could materially differ from those estimates.

Reclassifications

Certain amounts from prior years' financial statements have been reclassified to conform to the current year presentation. These reclassifications had no effect on previously reported net income or stockholders' equity.

2. Management Advisory Fee

The Company has been externally managed pursuant to a contractual investment advisory arrangement with its Adviser, under which its Adviser has directly employed all of the Company's personnel and paid its payroll, benefits, and general expenses directly. The Company's initial investment advisory agreement with its Adviser was in place from August 12, 2003 through December 31, 2006 (the "Initial Advisory Agreement"). On January 1, 2007, the Company entered into an amended and restated investment advisory agreement with its Adviser (the "Amended Advisory Agreement") and an administration agreement (the "Administration Agreement") with Gladstone Administration, LLC (the "Administrator"). The management services and fees in effect under the Amended Advisory and Administration Agreements are described below.

Amended Advisory Agreement

The Amended Advisory Agreement provides for an annual base management fee equal to 2% of the Company's total stockholders equity, less the recorded value of any preferred stock, and an incentive fee based on funds from operations ("FFO"). For the three months ended March 31, 2008 and 2007, the Company recorded a base management fee of \$431,868 and \$482,044, respectively. For purposes of calculating the incentive fee, FFO includes any realized capital gains and capital losses, less any dividends paid on preferred stock, but FFO does not include any unrealized capital gains or losses. The incentive fee rewards the Adviser if the Company's quarterly FFO, before giving effect to any incentive fee ("pre-incentive fee FFO"), exceeds 1.75%, or 7% annualized, (the "hurdle rate") of total stockholders equity, less the recorded value of any preferred stock. The Adviser receives 100% of the amount of the pre-incentive fee FFO that exceeds the hurdle rate, but is less than 2.1875% of the Company's pre-incentive fee FFO. The Adviser also receives an incentive fee of 20% of the amount of the Company's pre-incentive fee FFO that exceeds 2.1875%. For the three months ended March 31, 2008 and 2007, the Company recorded an incentive fee of \$704,667 and \$585,768 offset by a credit related to an unconditional and irrevocable voluntary waiver issued by the Adviser of \$562,355 and \$585,768, for a net incentive fee for the three months ended March 31, 2008 and 2007 of \$142,312 and \$0, respectively. The board of directors of the Company accepted the Adviser's offer to waive a portion of the incentive fee for the three months ended March 31, 2008 and the offer to waive the entire incentive fee for the three months ended March 31, 2007 in order to support the current level of distributions to the Company's stockholders.

Administration Agreement

Under the Administration Agreement, the Company pays separately for its allocable portion of the Administrator's overhead expenses in performing its obligations including, but not limited to, rent for employees of the Administrator, and its allocable portion of the salaries and benefits expenses of its chief financial officer, chief compliance officer, controller, treasurer and their respective staffs. The amount of overhead expenses allocated to the Company is determined by calculating the percentage of total assets of the Company to the total assets managed by the Administrator. For the three months ended March 31, 2008 and 2007, the Company recorded an administration fee of \$212,196 and \$207,018, respectively.

3. Earnings per Common Share

The following tables set forth the computation of basic and diluted earnings per share for the three months ended March 31, 2008 and 2007:

	For the three months ended March	
	2008	2007
Net income available to common stockholders	\$ 393,265	\$ 506,905
Denominator for basic & diluted weighted average shares	8,565,264	8,565,264
Basic & diluted earnings per common share	\$ 0.05	\$ 0.06

4. Real Estate

A summary of the 56 properties held by the Company as of March 31, 2008 is as follows:

	Total real estate, net	5,948,638		\$ 353,335,334

The following table sets forth the components of the Company's investments in real estate, including capitalized leases:

	March 31, 2008	December 31, 2007
Real estate:		
Land	\$ 52,703,103	\$ 48,867,482
Building	309,025,312	283,829,987
Tenant improvements	9,449,186	7,802,937
Accumulated depreciation	(17,842,267)	(15,738,634)
Real estate, net	\$ 353,335,334	\$ 324,761,772

Included in investments in real estate is land held under a capitalized lease valued at approximately \$1.1 million.

On January 29, 2008, the Company acquired a 42,900 square foot industrial building in Reading, Pennsylvania for approximately \$7.2 million, including transaction costs. At closing, the Company extended a 20 year triple net lease with the sole tenant, and the tenant has four options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of approximately \$0.72 million.

On February 26, 2008, the Company acquired a 74,160 square foot office building in Fridley, Minnesota for approximately \$10.6 million, including transaction costs. At closing, the Company was assigned the previously existing triple net lease with the sole tenant, which had a remaining term of approximately five years. The tenant has two options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of approximately \$0.95 million. The Company was also assigned a ground lease on the parking lot at the time of closing, which has a remaining term of approximately six years. At the end of the term, the Company is required to purchase the land. The rent due under the ground lease had been prepaid by the previous owner through the end of the term.

On March 31, 2008, the Company acquired a 273,300 square foot industrial building in Concord Township, Ohio for approximately \$15.3 million, including transaction costs. At closing, the Company extended a 20 year triple net lease with the sole tenant, and the tenant has three options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of approximately \$1.72 million.

In accordance with SFAS No. 141, Business Combinations, the Company allocated the purchase price of the properties acquired during the three months ended March 31, 2008 as follows:

	Land	Building	Tenant Improvements	In-place leases	Leasing Costs	Customer relationships	Capital Lease Obligations	Total Purchase Price
Reading, Pennsylvania	\$ 490,646	\$ 6,187,954	\$ 14,208	\$362,479	\$ 1,786	\$ 141,232	\$	\$ 7,198,305
Fridley, Minnesota	1,354,233	7,453,621	619,428	452,414	171,005	807,950	(225,067)	10,633,584
Concord Township, Ohio	2,020,982	11,256,703	1,012,613		5,102	1,032,347		15,327,747
	\$3,865,861	\$24,898,278	\$1,646,249	\$814,893	\$177,893	\$1,981,529	\$(225,067)	\$33,159,636

The weighted average amortization period, for properties acquired during the three months ended March 31, 2008, for in-place leases was approximately 17.0 years, for leasing costs was approximately 18.4 years, for customer relationships was approximately 21.7 years, and for all intangible assets was approximately 16.7 years. There were no allocations to above or below market lease intangibles for the three acquisitions during the quarter.

Future operating lease payments under non-cancelable leases, excluding customer reimbursement of expenses, in effect at March 31, 2008, were as follows:

Year	Lease Payments
2008	\$ 27,403,705
2009	35,816,344
2010	35,537,782
2011	35,099,588
2012	34,378,696
Thereafter	188,940,657

In accordance with the lease terms, substantially all tenant expenses are required to be paid by the tenant; however, the Company would be required to pay property taxes on the respective properties, and ground lease payments on the property located in Tulsa, Oklahoma, in the event the tenant fails to pay them. The total annualized property taxes for all properties held by the Company at March 31, 2008 was approximately \$5.4 million, and the total annual ground lease payments on the Tulsa, Oklahoma property were approximately \$134,000.

5. Discontinued Operations

On July 21, 2006, the Company sold its two Canadian properties for approximately \$6.9 million, for a gain on the sale of approximately \$1.4 million. The Company incurred approximately \$315,000 in taxes related to the gain on the sale in 2006. The 2006 tax returns were subsequently filed in March of 2007, and the amount owed was approximately \$236,000. The Company received a refund in the amount of approximately \$79,000, which is reflected on the income statement in discontinued operations under taxes refunded on sale of real estate. The operating expense recorded during the three months ended March 31, 2008 is legal fees related to the Canadian entities which have been dissolved.

The Company classified its two Canadian properties as discontinued operations, in accordance with the provisions of SFAS 144. The table below summarizes the components of income from discontinued operations:

	For the three months ended March	
	2008	31, 2007
Operating expense	\$ (33,228)	\$ (4,001)
Taxes & licenses		78,667
Realized gain on foreign currency transactions		7
Income from discontinued operations	\$ (33,228)	\$ 74,673

6. Mortgage Note Receivable

On April 15, 2005, the Company originated a mortgage loan in the amount of \$10.0 million collateralized by an office building in McLean, Virginia, where the Company's Adviser and Administrator are subtenants in the building. The loan was funded using a portion of the net proceeds from the Company's initial public offering. This 12 year mortgage loan accrues interest at the greater of 7.5% per year or the one month London Interbank Offered Rate (LIBOR) rate plus 6.0% per year, with a ceiling of 10.0%. The mortgage loan is interest only for the first nine years of the term, with payments of principal commencing after the initial period. The balance of the principal and all interest remaining is due at the end of the 12 year term.

7. Mortgage Notes Payable

As of March 31, 2008 the Company had 14 fixed-rate mortgage notes payable collateralized by a total of 33 properties. The obligor under each of these notes is a wholly-owned separate borrowing entity which owns the real estate collateral. The Company is not a co-borrower but has limited recourse liabilities that could result from: a borrower voluntarily filing for bankruptcy, improper conveyance of a property, fraud or material misrepresentation, misapplication or misappropriation of rents, security deposits, insurance proceeds or condemnation proceeds, and physical waste or damage to the property resulting from a borrower's gross negligence or willful misconduct. The Company also indemnifies lenders against claims resulting from the presence of hazardous substances or activity involving hazardous substances in violation of environmental laws on a property. The weighted-average interest rate on the mortgage notes payable as of March 31, 2008 was approximately 5.8%. A summary of the mortgage notes payable is below:

Date of Issuance of Note	Principal Maturity Date	Interest Rate	Principal Balance Outstanding	
			March 31, 2008	December 31, 2007
3/16/2005	4/1/2030	6.33%	\$ 2,988,756	\$ 3,003,582
8/25/2005	9/1/2015	5.33%	21,592,384	21,664,476
9/12/2005	9/1/2015	5.21%	12,588,000	12,588,000
12/21/2005	12/8/2015	5.71%	19,397,389	19,456,000
2/21/2006	12/1/2013	5.91%	9,443,372	9,480,063
2/21/2006	6/30/2014	5.20%	19,698,296	19,782,270
3/29/2006	4/1/2016	5.92%	17,000,000	17,000,000
4/27/2006	5/5/2016	6.58%	14,451,221	14,514,214
11/22/2006	12/1/2016	5.76%	14,309,000	14,309,000
12/22/2006	1/1/2017	5.79%	21,846,000	21,846,000
2/8/2007	3/1/2017	6.00%	13,775,000	13,775,000
6/5/2007	6/8/2017	6.11%	14,240,000	14,240,000
9/6/2007	12/11/2015	5.81%	4,471,980	4,487,205
10/15/2007	11/8/2017	6.63%	15,934,652	15,974,661
			\$ 201,736,050	\$ 202,120,471

The fair market value of all fixed-rate debt outstanding as of March 31, 2008 was approximately \$184.3 million, as compared to the carrying value stated above of approximately \$201.7 million. The fair market value is calculated based on a discounted cash flow analysis, using interest rates currently available in the long term financing markets on long term debt with comparable terms.

Scheduled principal payments of mortgage notes payable are as follows:

Year	Scheduled principal payments
2008	\$ 1,209,971
2009	2,254,470
2010	2,389,806
2011	2,676,907
2012	2,953,229
Thereafter	190,251,667
	\$ 201,736,050

8. Stockholders Equity

The following table summarizes the changes in stockholders equity for the three months ended March 31, 2008:

	Common Stock	Preferred Stock	Capital in Excess of Par Value	Notes Receivable From Sale of Common Stock	Distributions in Excess of Accumulated Earnings	Total Stockholders Equity
Balance at December 31, 2007	\$ 8,565	\$ 2,150	\$ 170,640,979	\$ (2,769,923)	\$ (25,513,703)	\$ 142,368,068
Repayment of Principal on Notes Receivable				132		132
Distributions Declared to Common and Preferred Stockholders					(4,235,409)	(4,235,409)
Net income					1,416,702	1,416,702
Balance at March 31, 2008	\$ 8,565	\$ 2,150	\$ 170,640,979	\$ (2,769,791)	\$ (28,332,410)	\$ 139,549,493

Dividends paid per common share for the three months ended March 31, 2008 and 2007 were \$0.375 and \$0.36 per share, respectively. Dividends paid per share of Series A Preferred Stock for both the three months ended March 31, 2008 and 2007 were approximately \$0.48 per share. Dividends paid per share of Series B Preferred Stock for both the three months ended March 31, 2008 and 2007 were approximately \$0.47 per share.

The following table is a summary of all outstanding notes issued to employees of the Adviser for the exercise of stock options:

Date Issued	Number of Options Exercised	Strike Price of Options Exercised	Amount of Promissory Note Issued to Employees	Outstanding Balance of Employee Loans at 3/31/08	Term of Note	Interest Rate on Note
Sep-04	25,000	\$ 15.00	\$ 375,000	\$ 368,161	9 years	5.00%

	179,922		\$ 2,844,954	\$ 2,769,791		

In accordance with the note agreements with each employee, they are required to remit interest payments to the Company on their outstanding loan balance quarterly in arrears.

In accordance with Emerging Issues Task Force No. 85-1, Classifying Notes Received for Sale of Stock, receivables from employees for the issuance of capital stock to employees prior to the receipt of cash payment should be reflected in the balance sheet as a reduction to stockholders' equity. Therefore, these notes were recorded as loans to employees and are included in the equity section of the accompanying consolidated balance sheets.

9. Segment Information

As of March 31, 2008, the Company's operations were derived from two operating segments. One segment purchases real estate (land, buildings and other improvements), which is simultaneously leased to existing users and the other segment extends mortgage loans and collects principal and interest payments. The following table summarizes the Company's consolidated operating results and total assets by segment as of and for the three months ended March 31, 2008 and 2007:

	As of and for the three months ended March 31, 2008			
	Real Estate Leasing	Real Estate Lending	Other	Total
Operating revenues	\$ 9,275,184	\$ 238,297	\$	\$ 9,513,481
Operating expenses	(3,259,796)		(1,121,139)	(4,380,935)
Other expense			(3,682,616)	(3,682,616)
Discontinued operations	(33,228)			(33,228)
Net income	\$ 5,982,160	\$ 238,297	\$ (4,803,755)	\$ 1,416,702
Total Assets	\$ 391,919,723	\$ 10,000,000	\$ 9,263,355	\$ 411,183,078

	As of and for the three months ended March 31, 2007			
	Real Estate Leasing	Real Estate Lending	Other	Total
Operating revenues	\$ 7,133,771	\$ 250,000	\$	\$ 7,383,771
Operating expenses	(2,620,148)		(1,091,345)	(3,711,493)
Other expense			(2,216,609)	(2,216,609)
Discontinued operations	74,673			74,673
Net income	\$ 4,588,296	\$ 250,000	\$ (3,307,954)	\$ 1,530,342
Total Assets	\$ 304,124,119	\$ 10,000,000	\$ 13,065,216	\$ 327,189,335

The amounts included under the other column in the tables above include other income, which consists of interest income and any other miscellaneous income earned, and operating expenses that were not specifically derived from either operating segment

10. Line of Credit and Short-Term Loan

On December 29, 2006, the Company entered into a \$75 million senior revolving credit agreement with a syndicate of banks led by KeyBank National Association, which matures on December 29, 2009 with an option to extend for an additional year. The Company subsequently increased the availability under the line of credit to \$95 million in November 2007. The interest rate charged on the advances under the facility is based on the LIBOR, the prime rate or the federal funds rate, depending on market conditions, and adjusts periodically. The unused portion of the line of credit is subject to a fee of 0.15% per year. The Company's ability to access this funding source is subject to the Company continuing to meet customary lending requirements such as compliance with financial and operating

covenants and meeting certain lending limits. One such covenant requires the Company to limit its distributions to stockholders to 95% of its funds from operations, beginning with the quarter ended December 31, 2007. In addition, the maximum amount the Company may draw under this agreement is based on a percentage of the value of properties pledged as collateral to the banks, which must meet agreed upon eligibility standards. As the Company arranges for long-term mortgages for these pledged properties, the banks will release the properties from the line of credit and reduce the availability under the line of credit by the advanced amount of the removed property. Conversely, as the Company purchases new properties meeting the eligibility standards, the Company may pledge these new properties to obtain additional advances under this agreement. The Company may use the advances under the line of credit for both general corporate purposes and the acquisition of new investments. As of March 31, 2008, there was approximately \$39.1 million outstanding under the line of credit at an interest rate of approximately 4.5%. At March 31, 2008, the remaining borrowing capacity available under the line of credit was \$52.2 million.

On December 21, 2007, the Company entered into a \$20 million unsecured term loan with KeyBank National Association, which matures on December 21, 2008 with an option to extend for an additional six months. The Company can exercise the option to extend the term as long as it is in compliance with all covenants under the loan at the time it exercises its option. The interest rate charged on the loan is based on the LIBOR, the prime rate or the federal funds rate, depending on market conditions, and adjusts periodically. The Company's ability to maintain this funding source is subject to it continuing to meet customary lending requirements such as compliance with financial and operating covenants and meeting certain lending limits. One such covenant requires the Company to limit distributions to its stockholders to 95% of its FFO beginning with the quarter ended December 31, 2007. As of March 31, 2008, the interest rate on the short-term loan was approximately 5.1%.

11. Pro Forma Financial Information

The Company acquired three properties during the three months ended March 31, 2008. The following table reflects pro-forma condensed consolidated income statements as if the three properties were acquired as of the beginning of the periods presented:

	For the three months ended March 31,	
	2008	2007
Operating Data:		
Total operating revenue	\$ 10,131,799	\$ 8,002,089
Total operating expenses	(4,472,179)	(3,802,737)
Other expense	(4,040,342)	(2,574,335)
Income from continuing operations	1,619,278	1,625,017
Dividends attributable to preferred stock	(1,023,437)	(1,023,437)
Net income from continuing operations available to common stockholders	\$ 595,841	\$ 601,580
Share and Per Share Data:		
Basic & diluted net income from continuing operations	\$ 0.07	\$ 0.07
Weighted average shares outstanding-basic & diluted	8,565,264	8,565,264

These pro-forma condensed consolidated income statements are not necessarily indicative of what actual results would have been had the Company acquired the specified properties as of the beginning of the periods presented.

12. Subsequent Events

On April 11, 2008, the Company's Board of Directors declared cash dividends of \$0.125 per common share, \$0.1614583 per share of the Series A Preferred Stock, and \$0.15625 per share of the Series B Preferred Stock for each of the months of April, May, and June of 2008. Monthly dividends will be payable on April 30, 2008, May 30, 2008 and June 30, 2008, to those stockholders of record for the dates of April 22, 2008, May 21, 2008 and June 20, 2008, respectively.

On April 30, 2008, the Company acquired a 74,950 square foot industrial building in Pineville, North Carolina for approximately \$3.9 million, including transaction costs. At closing, the Company extended a 20 year triple net lease with the sole tenant, and the tenant has three options to extend the lease for additional periods of five years each. The lease provides for prescribed rent escalations over the life of the lease, with annualized straight line rents of approximately \$0.43 million.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

All statements contained herein, other than historical facts, may constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements may relate to, among other things, future events or our future performance or financial condition. In some cases, you can identify forward-looking statements by terminology such as may, might, believe, will, provided, anticipate, future, could, growth, plan, intend, expect, should, would, potential, likely or the negative of such terms or comparable terminology. These forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by such forward-looking statements. We caution readers not to place undue reliance on any such forward-looking statements, which are made pursuant to the Private Securities Litigation Reform Act of 1995 and, as such, speak only as of the date made. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, after the date of this Form 10-Q.

OVERVIEW

Our Investment Strategy

We were incorporated under the General Corporation Laws of the State of Maryland on February 14, 2003 primarily for the purpose of investing in and owning net leased industrial and commercial real property and selectively making long-term industrial and commercial mortgage loans. Most of the portfolio of real estate we currently own is leased to a wide cross section of tenants ranging from small businesses to large public companies, many of which are corporations that do not have publicly rated debt. We have in the past entered into, and intend in the future to enter into, purchase agreements for real estate having triple net leases with terms of approximately 10 to 15 years and built in rental increases. Under a triple net lease, the tenant is required to pay all operating, maintenance and insurance costs and real estate taxes with respect to the leased property. We are actively communicating with buyout funds, real estate brokers and other third parties to locate properties for potential acquisition or to provide mortgage financing in an effort to build our portfolio. At March 31, 2008, we owned 56 properties totaling approximately 5.9 million square feet, and had one mortgage loan outstanding. All of our properties are fully leased and all tenants and our borrower are current and paying in accordance with their leases and loan, respectively. The total gross investment in these acquisitions and the mortgage loan investment was approximately \$420.7 million at March 31, 2008.

Recent Events

Investment Activities: During the three months ended March 31, 2008, we acquired three properties totaling approximately 390,000 square feet, for a total gross investment of approximately \$33.2 million.

Financing Activities: During the three months ended March 31, 2008, we had net borrowings under our line of credit of approximately \$34.7 million with approximately \$39.1 outstanding at March 31, 2008. The proceeds from the line of credit were used to fund acquisitions during the quarter.

Our Investment Adviser and Administrator

Gladstone Management Corporation, or our Adviser, is led by a management team which has extensive experience in our lines of business. Our Adviser also has a wholly-owned subsidiary, Gladstone Administration, LLC, or the Administrator, which employs our chief financial officer, chief compliance officer, controller, treasurer and their respective staffs. All of our executive officers are officers or directors, or both, of our Adviser and our Administrator.

Our Adviser and Administrator also provide investment advisory and administrative services to our affiliates, Gladstone Capital Corporation and Gladstone Investment Corporation, both publicly traded business development companies, as well as Gladstone Land Corporation, a private agricultural real estate company. All of our directors and executive officers serve as either directors or executive officers, or both, of Gladstone Capital Corporation and Gladstone Investment Corporation. In the future, our Adviser may provide investment advisory and administrative services to other funds, both public and private, of which it is the sponsor.

Our Adviser was organized as a corporation under the laws of the State of Delaware on July 2, 2002, and is a registered investment adviser under the Investment Advisers Act of 1940, as amended. Our Adviser is headquartered in McLean, Virginia, a suburb of Washington D.C., and also has offices in New York, New Jersey, Pennsylvania, Illinois, Texas and Washington.

Investment Advisory and Administration Agreements

We have been externally managed pursuant to a contractual investment advisory arrangement with our Adviser, under which our Adviser has directly employed all of our personnel and paid its payroll, benefits, and general expenses directly. Our initial investment advisory agreement with our Adviser, which we refer to as the Initial Advisory Agreement, was in place from August 12, 2003 through December 31, 2006. On January 1, 2007, we entered into an amended and restated investment advisory agreement with our Adviser, which we refer to as the Amended Advisory Agreement, and an administration agreement, which we refer to as the Administration Agreement, with our Administrator.

Under the terms of the Initial Advisory Agreement and the Amended Advisory Agreement, we were and remain responsible for all expenses incurred for our direct benefit. Examples of these expenses include legal, accounting, interest on short-term debt and mortgages, tax preparation, directors and officers insurance, stock transfer services, stockholder related fees, consulting and related fees. During the three months ended March 31, 2008 and 2007, the total amount of these expenses that we incurred was approximately \$4.4 million and \$3.1 million, respectively. All of these charges are incurred directly by us rather than by our Adviser for our benefit. Accordingly, we did not make any reimbursements to our Adviser for these amounts.

In addition, we are also responsible for all fees charged by third parties that are directly related to our business, which may include real estate brokerage fees, mortgage placement fees, lease-up fees and transaction structuring fees (although we may be able to pass some or all of such fees on to our tenants and borrowers). During the three months ended March 31, 2008 and 2007, none of these expenses were incurred by us directly. The actual amount of such fees that we incur in the future will depend largely upon the aggregate costs of the properties we acquire, the aggregate amount of mortgage loans we make, and the extent to which we are able to shift the burden of such fees to our tenants and borrowers. Accordingly, the amount of these fees that we will pay in the future is not determinable at this time.

Management Services and Fees under the Amended Advisory Agreement

The Advisory Agreement provides for an annual base management fee equal to 2.0% of our total stockholders' equity, less the recorded value of any preferred stock, and an incentive fee based on funds from operations, or FFO. For purposes of calculating the incentive fee, FFO includes any realized capital gains and capital losses, less any dividends paid on preferred stock, but FFO does not include any unrealized capital gains or losses. The incentive fee will reward our Adviser if our quarterly FFO, before giving effect to any incentive fee (pre-incentive fee FFO), exceeds 1.75%, or 7% annualized, (the hurdle rate) of total stockholders' equity, less the recorded value of any preferred stock. Our Adviser will receive 100% of the amount of the pre-incentive fee FFO that exceeds the hurdle rate, but is less than 2.1875% of our pre-incentive fee FFO. Our Adviser will also receive an incentive fee of 20% of the amount of our pre-incentive fee FFO that exceeds 2.1875%. The incentive fee may be reduced because of our line of credit covenant which limits distributions to our stockholders to 95% of FFO.

For the three months ended March 31, 2008 and 2007, the base management fee was \$431,868 and \$482,044, respectively. For the three months ended March 31, 2008 and 2007, we recorded an incentive fee of \$704,667 and \$585,768, respectively, offset by a credit from an unconditional and irrevocable voluntary waiver issued by the Adviser of \$562,355 and \$585,768, respectively, for a net incentive fee for the three months ended March 31, 2008 and 2007 of \$142,312 and \$0, respectively. Our Board of Directors accepted our Adviser's offer to waive a portion of the incentive fee for the three months ended March 31, 2008 and the entire incentive fee for the three months ended March 31, 2007 in order to maintain the current level of distributions to our stockholders. Our Adviser has indicated that it intends to continue to waive all or a portion of the incentive fee in order to support the current level of distributions to our stockholders, however, our Adviser is not required to issue any waiver, in whole or in part.

Administration Agreement

Under the Administration Agreement, we pay separately for our allocable portion of our Administrator's overhead expenses in performing its obligations including, but not limited to, rent for employees of our Administrator, and our allocable portion of the salaries and benefits expenses of our chief financial officer, chief compliance officer, controller, treasurer and their respective staffs. For the three months ended March 31, 2008 and 2007, we incurred \$212,196 and \$207,018, respectively.

Critical Accounting Policies

The preparation of our financial statements in accordance with generally accepted accounting principles in the United States of America, or GAAP, requires management to make judgments that are subjective in nature in order to make certain estimates and assumptions. Management relies on its experience, collects historical data and current market data, and analyzes this information in order to arrive at what it believes to be reasonable estimates. Under different conditions or assumptions, materially different amounts could be reported related to the accounting policies described below. In addition, application of these accounting policies involves the exercise of judgments on the use of assumptions as to future uncertainties and, as a result, actual results could materially differ from these estimates. A summary of all of our accounting policies is provided in Note 1 to our consolidated financial statements included elsewhere in this report. Below is a summary of accounting policies involving estimates and assumptions that require complex, subjective or significant judgments in their application and that materially affect our results of operations.

Allocation of Purchase Price

When we acquire real estate, we allocate the purchase price to the acquired tangible assets and liabilities, consisting of land, building, tenant improvements, long-term debt and identified intangible assets and liabilities, consisting of the value of above-market and below-market leases, the value of in-place leases, the value of unamortized lease origination costs and the value of tenant relationships, based in each case on their fair values.

Management's estimates of value are made using methods similar to those used by independent appraisers (e.g., discounted cash flow analysis). Factors considered by management in its analysis include an estimate of carrying costs during hypothetical expected lease-up periods considering current market conditions, and costs to execute similar leases. We also consider information obtained about each property as a result of our pre-acquisition due diligence, marketing and leasing activities in estimating the fair value of the tangible and intangible assets and liabilities acquired. In estimating carrying costs, management also includes real estate taxes, insurance and other operating expenses and estimates of lost rentals at market rates during the expected lease-up periods, which primarily range from 9 to 18 months, depending on specific local market conditions. Management also estimates costs to execute similar leases including leasing commissions, legal and other related expenses to the extent that such costs are not already incurred in connection with a new lease origination as part of the transaction. Management also considers the nature and extent of our existing business relationships with the tenant, growth prospects for developing new business with the tenant, the tenant's credit quality and expectations of lease renewals (including those existing under the terms of the lease agreement), among other factors. A change in any of the assumptions above, which are very subjective, could have a material impact on our results of operations.

The allocation of the purchase price directly affects the following in our consolidated financial statements:

The amount of acquisition costs allocated to the various tangible and intangible assets on our balance sheet;
and

The amounts allocated to the value of above-market and below-market lease values are amortized to rental income over the remaining non-cancelable terms of the respective leases. The amounts allocated to all other tangible and intangible assets are amortized to depreciation or amortization expense. Thus changes in the purchase price allocation among our assets could have a material impact on our FFO, which is used by investors of REITs to evaluate our operating performance; and

The period of time that tangible and intangible assets are depreciated over varies greatly, and thus changes in the amounts allocated to these assets will have a direct impact on our results of operations. Intangible assets are generally amortized over the respective life of the leases, which normally range from 10 to 15 years, we depreciate our buildings over 39 years, and land is not depreciated. These differences in timing could have a material impact on our result of operations.

Asset Impairment Evaluation

We periodically review the carrying value of each property to determine if circumstances that indicate impairment in the carrying value of the investment exist or that depreciation periods should be modified. If circumstances support the possibility of impairment, we prepare a projection of the undiscounted future cash flows, without interest charges, of the specific property and determine if the investment in such property is recoverable. If impairment is indicated, the carrying value of the property would be written down to its estimated fair value based on our best estimate of the property's discounted future cash flows. Any material changes to the estimates and assumptions used in this analysis could have a significant impact on our results of operations, as the changes would impact our determination if impairment is deemed to have occurred and the amount of impairment loss we would recognize.

Provision for Loan Losses

Our accounting policies require that we reflect in our financial statements an allowance for estimated credit losses with respect to mortgage loans we have made based upon our evaluation of known and inherent risks associated with our private lending assets. Management reflects provisions for loan losses based upon our assessment of general market conditions, our internal risk management policies and credit risk rating system, industry loss experience, our assessment of the likelihood of delinquencies or defaults, and the value of the collateral underlying our investments. Any material changes to the estimates and assumptions used in this analysis could have a significant impact on our results of operations.

Recently Issued Accounting Pronouncements

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in GAAP and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We have only partially adopted the provisions of SFAS 157 because of the issuance of FSP SFAS 157-2 (the FSP), which allows companies to delay the effective date of SFAS 157 for non-financial assets and liabilities. The FSP permits companies that have not already issued either interim or annual financial statements reflecting the adoption of SFAS 157 to delay the effective date of SFAS 157 for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis. The partial adoption had no impact on our results of operations.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159). SFAS 159 allows entities to measure at fair value many financial instruments and certain other assets and liabilities that are not otherwise required to be measured at fair value. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We adopted SFAS 159 effective for the fiscal year beginning January 1, 2008. There was no impact of the adoption on our results of operations.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS 141(R)), which replaces SFAS No. 141, Business Combinations. SFAS 141R significantly changes the accounting for acquisitions involving business combinations, as it requires that the assets and liabilities of all business combinations be recorded at fair value, with limited exceptions. SFAS 141R also requires that all expenses related to the acquisition be expensed as incurred, rather than capitalized into the cost of the acquisition as had been the previous accounting under SFAS 141. SFAS 141R is effective on a prospective basis for all business combinations for which the acquisition date is on or after the beginning of the first annual period subsequent to December 15, 2008.

In December 2007, the FASB issued SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (SFAS 160). SFAS 160 requires all entities to report noncontrolling (minority) interests in subsidiaries in the same way as equity in the consolidated financial statements. SFAS 160 is effective for fiscal years beginning after December 15, 2008. We do not believe the adoption of this pronouncement will have a material impact on our results of operations.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities (SFAS 161), which is intended to help investors better understand how derivative instruments and hedging activities affect an entity's financial position, financial performance and cash flows through enhanced disclosure requirements. The enhanced disclosures primarily surround disclosing the objectives and strategies for using derivative instruments by their underlying risk as well as a tabular format of the fair values of the derivative instruments and their gains and losses. SFAS 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early application encouraged. We do not believe the adoption of this pronouncement will have a material impact on our results of operations.

Results of Operations

Our weighted-average yield on the portfolio as of March 31, 2008 was approximately 9.43%. The weighted-average yield was calculated by taking the annualized straight-line rent, reflected as rental income on our consolidated statements of operations, or mortgage interest payments, reflected as interest income from mortgage notes receivable on our consolidated statements of operations, of each acquisition or mortgage loan as a percentage of the acquisition or loan price, as applicable. The weighted-average yield does not take into account the interest expense incurred on the financings placed on our properties.

A comparison of our operating results for the three months ended March 31, 2008 and 2007 is below:

	For the three months ended March 31,			
	2008	2007	\$ Change	% Change
Operating revenues				
Rental income	\$ 9,189,465	\$ 7,078,036	\$ 2,111,429	30%
Interest income from mortgage notes receivable	238,297	250,000	(11,703)	-5%

Net income available to common stockholders	\$ 393,265	\$ 506,905	\$ (113,640)	-22%

Operating Revenues

Rental income increased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily, as a result of the 14 properties acquired between March 31, 2007 and March 31, 2008, coupled with properties acquired during the three months ended March 31, 2007 that were held for the full quarter in 2008.

Interest income from mortgage notes receivable decreased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily because interest income on our mortgage loan is based on the London Interbank Offered Rate, or LIBOR, which has significantly decreased over the past year.

Tenant recovery revenue increased for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007, as a result of an increase in the number of tenants which reimbursed us for insurance expense and the reimbursement of the ground lease payments on our Tulsa, Oklahoma property acquired in March 2007.

Operating Expenses

Depreciation and amortization expenses increased during the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, as a result of the 14 properties acquired between March 31, 2007 and March 31, 2008, and properties acquired during the three months ended March 31, 2007 that were held for the full quarter in 2008.

Property operating expenses consist of franchise taxes, management fees, insurance, ground lease payments on our Tulsa, Oklahoma property acquired in March 2007 and overhead expenses paid on behalf of certain of our properties. Property operating expenses increased during the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily as a result of the 14 properties acquired between March 31, 2007 and March 31, 2008.

The base management fee decreased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, as a result of a decrease in total common stockholders' equity, the main component of the calculation. The advisory agreement is described above under *Investment Advisory and Administration Agreements*. The incentive fee increased for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007 due to the increase in FFO. The calculation of the incentive fee is described in detail above under *Investment Advisory and Administration Agreements*.

The administration fee remained relatively flat for the three months ended March 31, 2008 and 2007. The calculation of the administrative fee is described above under *Investment Advisory and Administration Agreements*.

Professional fees, consisting primarily of legal and accounting fees, decreased during the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily as a result of a reduction in legal fees paid during the three months ended March 31, 2008 combined with state tax research incurred during the three months ended March 31, 2007, which was not incurred during the current quarter.

Insurance expense consists of the premiums paid for directors and officers insurance, which is renewed annually each September. Insurance expense decreased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007 because of a decrease in the premiums for the period from September 2007 through September 2008.

Directors' fees remained flat for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007.

Stockholder related expense increased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily as a result of the increase and timing in our costs associated with printing and filing the annual report.

Asset retirement obligation expense increased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily as a result of a property acquired between March 31, 2007 and March 31, 2008 which was required to recognize an asset retirement liability, coupled with a property acquired where a liability was recorded during the three months ended March 31, 2007 that was held for the full period in 2008.

General and administrative expenses decreased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007, primarily as a result of a decrease in the number of conferences attended during 2008 and the expenses associated with traveling to these conferences, coupled with a reduction in dues and subscriptions paid.

Other Income and Expense

Interest income from temporary investments decreased during the three months ended March 31, 2008, as compared to the three months ended March 31, 2007. The decrease was primarily a result of the decrease in our average cash balances during the three months ended March 31, 2008.

During the three months ended March 31, 2008, interest income on employee loans decreased, as compared to the three months ended March 31, 2007. This decrease was a result of an employee who paid off his loan in May 2007, coupled with other partial principal repayments over the past year.

Other income, which consists primarily of management fees we received from certain tenants, remained relatively flat for the three months ended March 31, 2008 as compared to the three months ended March 31, 2007.

Interest expense increased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007. This was primarily a result of the long term financings we closed on seven of our properties subsequent to March 31, 2007, coupled with an increased amount outstanding on our line of credit during the three months ended March 31, 2008.

Discontinued Operations

The loss from discontinued operations is the expense related to our two Canadian properties, which were sold in July 2006. The expense for the three months ended March 31, 2008 increased due to legal fees associated with the dissolution of the entities which sold the properties. The 2006 tax returns were filed in March of 2007, and we were due a refund of approximately \$79,000, which is reflected on the income statement under taxes refunded on sale of real estate for the three months ended March 31, 2007.

Net income available to common stockholders

Net income available to common stockholders decreased for the three months ended March 31, 2008, as compared to the three months ended March 31, 2007. This decrease was primarily a result of increased interest expense from the increased number of properties which have long-term financing coupled with the legal fees associated with the discontinued operations. This is partially offset by the increase in our portfolio of investments in the past year and the corresponding increase in our revenues and the other events described above.

Liquidity and Capital Resources

Cash and Cash Equivalents

At March 31, 2008, we had approximately \$1.3 million in cash and cash equivalents. We have access to our existing line of credit with an available borrowing capacity of \$52.2 million, have obtained mortgages on 33 of our properties and have a \$20.0 million one-year term loan. We expect to obtain additional mortgages collateralized by some or all of our real property in the future. We anticipate continuing to borrow funds and issuing additional equity securities in order to obtain additional capital. We expect that the funds from our line of credit, our short-term loan and additional mortgages and securities offerings will provide us with sufficient capital to make additional investments and to fund our continuing operations for the foreseeable future.

Operating Activities

Net cash provided by operating activities during the three months ended March 31, 2008 was approximately \$4.0 million, compared to net cash provided by operating activities of approximately \$3.9 million for the three months ended March 31, 2007.. A majority of cash from operating activities is generated from the rental payments we receive from our tenants and the interest payment we receive from our borrower. We utilize this cash to fund our property-level operating expenses and use the excess cash primarily for debt and interest payments on our mortgage notes payable, interest payments on our line of credit and term loan, dividend payments, management fees to our Adviser, and other entity level expenses.

Investing Activities

Net cash used in investing activities during the three months ended March 31, 2008 was approximately \$34.9 million, which primarily consisted of the purchase of three properties, as described in the *Recent Events* section above, coupled with the over-funding of approximately \$760,000 in connection with an acquisition on March 31, 2008, which was refunded on April 1, 2008, as compared to net cash used in investing activities during the three months ended March 31, 2007 of approximately \$42.3 million, which primarily consisted of the purchase of three properties and one leasehold interest. We purchased these properties using borrowings under our line of credit.

Financing Activities

Net cash provided by financing activities for the three months ended March 31, 2008 was approximately \$30.9 million, which primarily consisted of the proceeds from borrowings on our line of credit, partially offset by payments for deferred financing costs, principal repayments on mortgage notes payable, repayments on our line of credit and dividend payments. Net cash provided by financing activities for the three months ended March 31, 2007 was approximately \$9.5 million, which primarily consisted of the proceeds received from the long-term financing of three of our properties, partially offset by payments for deferred financing costs, principal repayments on mortgage notes payable and dividend payments.

Future Capital Needs

As of March 31, 2008, we had investments in 56 real properties for a net value, including intangible assets, of approximately \$384.4 million and one mortgage loan receivable for \$10.0 million. During the remainder of 2008 and beyond, we expect to complete additional acquisitions of real estate and to originate additional mortgage notes. We intend to fund our contractual obligations and acquire additional properties in 2008 by borrowing all or a portion of the purchase price and collateralizing the mortgages with some or all of our real property, by borrowing against our existing line of credit, or by issuing additional equity securities. We may also use these funds for general corporate needs. If we are unable to make any required debt payments on any borrowings, our lenders could foreclose on the properties collateralizing their loans, which could cause us to lose part or all of our investments in such properties. In addition, we need sufficient capital to fund our dividends, and we may require credits to our management fees, issued from our Adviser, in order to meet these obligations.

Line of Credit

On December 29, 2006, we entered into a \$75 million senior revolving credit agreement with a syndicate of banks led by KeyBank National Association, which matures on December 29, 2009 with an option to extend for an additional year. We subsequently increased the availability under our line of credit to \$95 million in November 2007. The interest rate charged on the advances under the facility is based on LIBOR, the prime rate or the federal funds rate, depending on market conditions, and adjusts periodically. The unused portion of the line of credit is subject to a fee of 0.15% per year. Our ability to access this funding source is subject to us continuing to meet customary lending requirements such as compliance with financial and operating covenants and meeting certain lending limits. One such covenant requires us to limit distributions to our stockholders to 95% of our funds from operations, or FFO, beginning with the quarter ended December 31, 2007. In addition, the maximum amount we may draw under this agreement is based on a percentage of the value of properties pledged as collateral to the banks, which must meet agreed upon eligibility standards. As we arrange for long-term mortgages for these pledged properties, the banks will release the properties from the line of credit and reduce the availability under the line of credit by the advanced amount of the removed property. Conversely, as we purchase new properties meeting the eligibility standards, we may pledge these new properties to obtain additional advances under this agreement. We may use the advances under the line of credit for both general corporate purposes and the acquisition of new investments. As of March 31, 2008, there was approximately \$39.1 million outstanding under the line of credit at an interest rate of approximately 4.5%. At March 31, 2008, the remaining borrowing capacity available under the line of credit was \$52.2 million.

Short-Term Loan

On December 21, 2007, we entered into a \$20 million unsecured term loan with KeyBank National Association (KeyBank), which matures on December 21, 2008, with an option to extend for an additional six months. We can exercise the option to extend the term as long as we are in compliance with all covenants under the loan at the time we exercise the option. The interest rate charged on the loan is based on LIBOR, the prime rate or the federal funds rate, depending on market conditions, and adjusts periodically. Our ability to maintain this funding source is subject to us continuing to meet customary lending requirements such as compliance with financial and operating covenants and meeting certain lending limits. One such covenant requires us to limit distributions to our stockholders to 95% of our FFO beginning with the quarter ended December 31, 2007. As of March 31, 2008, the interest rate on the short-term loan was approximately 5.1%.

Off-Balance Sheet Arrangements

We did not have any off-balance sheet arrangements as defined in Item 303(a)(4)(ii) of SEC Regulation S-K as of March 31, 2008.

Contractual Obligations

The following table reflects our significant contractual obligations as of March 31, 2008:

Contractual Obligations	Total	Payments Due by Period			More than 5 Years
		Less than 1 Year	1-3 Years	3-5 Years	
Long-Term Debt Obligations ⁽¹⁾	\$ 260,786,050	\$ 21,787,286	\$ 43,760,842	\$ 5,804,836	\$ 189,433,086
Interest on Long-Term Debt Obligations ⁽²⁾	92,408,604	11,865,448	23,350,834	22,775,154	34,417,168
Capital Lease Obligations ⁽³⁾	225,067				225,067
Operating Lease Obligations ⁽⁴⁾	1,780,800	134,400	268,800	268,800	1,108,800
Purchase Obligations ⁽⁵⁾	17,400,000	17,400,000			
Total	\$ 372,600,521	\$ 51,187,134	\$ 67,380,476	\$ 28,848,790	\$ 225,184,121

(1) Long-term debt obligations represent borrowings under our line of credit, term loan and mortgage notes payable that were outstanding as of March 31, 2008. The line of credit matures in December 2009 and the term loan matures in December 2008 with an option to extend for an additional six months.

(2) Interest on long-term debt obligations does not include interest on our borrowings under our line of credit or term loan. The

balance and interest rate on our line of credit and term loan are variable and, thus, the amount of interest can not be calculated for purposes of this table.

- (3) Capital lease obligations represent the obligation to purchase the land held under the ground lease on our property located in Fridley, Minnesota.
- (4) Operating lease obligations represent the ground lease payments due on our Tulsa, Oklahoma property. The lease expires in June 2021.
- (5) The purchase obligations reflected in the above table represents commitments outstanding at March 31, 2008 to purchase real estate, of which one property was purchased in April 2008 for approximately \$3.9 million.

Funds from Operations

NAREIT developed FFO, as a relative non-GAAP supplemental measure of operating performance of an equity REIT, in order to recognize that income-producing real estate historically has not depreciated on the basis determined under GAAP. FFO, as defined by NAREIT, is net income (computed in accordance with GAAP), excluding gains or losses from sales of property, plus depreciation and amortization of real estate assets, and after adjustments for unconsolidated partnerships and joint ventures.

FFO does not represent cash flows from operating activities in accordance with GAAP, which, unlike FFO, generally reflects all cash effects of transactions and other events in the determination of net income, and should not be considered an alternative to net income as an indication of our performance or to cash flows from operations as a measure of liquidity or ability to make distributions. Comparison of FFO, using the NAREIT definition, to similarly titled measures for other REITs may not necessarily be meaningful due to possible differences in the application of the NAREIT definition used by such REITs.

FFO available to common stockholders is FFO adjusted to subtract preferred share dividends. We believe that net income available to common stockholders is the most directly comparable GAAP measure to FFO available to common stockholders.

Basic funds from operations per share, or Basic FFO per share, and diluted funds from operations per share, or Diluted FFO per share, is FFO available to common stockholders divided by weighted average common shares outstanding and FFO available to common stockholders divided by weighted average common shares outstanding on a diluted basis, respectively, during a period. We believe that FFO available to common stockholders, Basic FFO per share and Diluted FFO per share are useful to investors because they provide investors with a further context for evaluating our FFO results in the same manner that investors use net income and earnings per share, or EPS, in evaluating net income available to common stockholders. In addition, since most REITs provide FFO available to common stockholders, Basic FFO and Diluted FFO per share information to the investment community, we believe these are useful supplemental measures for comparing us to other REITs. We believe that net income is the most directly comparable GAAP measure to FFO, Basic EPS is the most directly comparable GAAP measure to Basic FFO per share, and that diluted EPS is the most directly comparable GAAP measure to Diluted FFO per share.

The following table provides a reconciliation of our FFO for the three months ended March 31, 2008 and 2007, to the most directly comparable GAAP measure, net income, and a computation of basic and diluted FFO per weighted average common share and basic and diluted net income per weighted average common share:

	For the three months ended March 31, 2008	For the three months ended March 31, 2007
Net income	\$ 1,416,702	\$ 1,530,342
Less: Dividends attributable to preferred stock	(1,023,437)	(1,023,437)
Net income available to common stockholders	393,265	506,905
Add: Real estate depreciation and amortization	2,987,760	2,417,812
FFO available to common stockholders	\$ 3,381,025	\$ 2,924,717
Weighted average shares outstanding basic & diluted	8,565,264	8,565,264
Basic & diluted net income per weighted average common share	\$ 0.05	\$ 0.06
Basic & diluted FFO per weighted average common share	\$ 0.39	\$ 0.34

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk includes risks that arise from changes in interest rates, foreign currency exchange rates, commodity prices, equity prices and other market changes that affect market sensitive instruments. The primary risk that we believe we will be exposed to is interest rate risk. We currently own one variable rate loan receivable, certain of our leases contain escalations based on market interest rates, and the interest rate on our existing line of credit is variable. We seek to mitigate this risk by structuring such provisions of our loans and leases to contain a minimum interest rate or escalation rate, as applicable. We are also exposed to the effects of interest rate changes as a result of the holding of our cash and cash equivalents in short-term, interest-bearing investments.

To illustrate the potential impact of changes in interest rates on our net income, we have performed the following analysis, which assumes that our balance sheet remains constant and no further actions beyond a minimum interest rate or escalation rate are taken to alter our existing interest rate sensitivity.

Under this analysis, a hypothetical increase in the one month LIBOR rate by 1% for the three months ended March 31, 2008 and 2007, would have increased our interest income and rental revenue by \$147,913 and \$36,500, respectively, and would have increased our interest expense on the line of credit and term loan by \$598,702 and \$0 respectively, for a net decrease in our net income of \$450,789, or 7.5%, for the three months ended March 31, 2008 and a net increase in our net income of \$36,500, or 1.7%, for the three months ended March 31, 2007 over the next twelve months, compared to net income for the twelve months ended March 31, 2008 and 2007. A hypothetical decrease in the one month LIBOR by 1% for the three months ended March 31, 2008 and 2007, would have decreased our interest income and rental revenue by \$101,706 and \$36,500, respectively, and decreased our interest expense on the line of credit by \$598,702 and \$0, respectively, for a net increase in our net income of \$496,996, or 8.3%, for the three months ended March 31, 2008 and a net decrease in our net income of \$36,500, or 1.7%, for the three months ended March 31, 2007 over the next twelve months, compared to net income for the twelve months ended March 31, 2008 and 2007.

Although management believes that this analysis is indicative of our existing interest rate sensitivity, it does not adjust for potential changes in credit quality, size and composition of our loan and lease portfolio on the balance sheet and other business developments that could affect net income. Accordingly, no assurances can be given that actual results would not differ materially from the results under this hypothetical analysis.

As of March 31, 2008, the fair value of our fixed rate debt outstanding was approximately \$184.3 million. Interest rate fluctuations may affect the fair value of our fixed rate debt instruments. If interest rates on our fixed rate debt instruments, using rates at March 31, 2008, had been one percentage point higher or lower, the fair value of those debt instruments on that date would have decreased or increased, respectively, by approximately \$11.0 million.

In the future, we may be exposed to additional effects of interest rate changes primarily as a result of our line of credit, term loan or long-term debt used to maintain liquidity and fund expansion of our real estate investment portfolio and operations. Our interest rate risk management objectives are to limit the impact of interest rate changes on earnings and cash flows and to lower overall borrowing costs. To achieve this objective, we will borrow primarily at fixed rates or variable rates with the lowest margins available and, in some cases, with the ability to convert variable rates to fixed rates. We may also enter into derivative financial instruments such as interest rate swaps and caps in order to mitigate the interest rate risk on a related financial instrument. We will not enter into derivative or interest rate transactions for speculative purposes.

In addition to changes in interest rates, the value of our real estate is subject to fluctuations based on changes in local and regional economic conditions and changes in the creditworthiness of lessees, all of which may affect our ability to refinance debt if necessary.

Item 4. Controls and Procedures

a) Evaluation of Disclosure Controls and Procedures

As of March 31, 2008, our management, including our chief executive officer and chief financial officer, evaluated the effectiveness of the design and operation of our disclosure controls and procedures. Based on that evaluation, management, including the chief executive officer and chief financial officer, concluded that our disclosure controls and procedures were effective as of March 31, 2008 in providing a reasonable level of assurance that information we are required to disclose in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified in applicable SEC rules and forms, including providing a reasonable level of assurance that information required to be disclosed by us in such reports is accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate to allow timely decisions regarding required disclosure. However, in evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated can provide only reasonable assurance of necessarily achieving the desired control objectives, and management was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

b) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred during the three months ended March 31, 2008 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 1. Legal Proceedings

Neither we nor any of our subsidiaries are currently subject to any material legal proceedings, nor, to our knowledge, is any material legal proceeding threatened against us or our subsidiaries.

Item 1A. Risk Factors

Our business is subject to certain risks and events that, if they occur, could adversely affect our financial condition and results of operations and the trading price of our common stock. For a discussion of these risks, please refer to the

Risk Factors section of our Annual Report on Form 10-K for the year ended December 31, 2007, filed by us with the Securities and Exchange Commission on February 27, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Not applicable.

Item 3. Defaults Upon Senior Securities

Not applicable.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were voted on during the three months ended March 31, 2008.

Item 5. Other Information

Not applicable.

Item 6. Exhibits

Exhibit Index

Exhibit	Description of Document
3.1	Amended and Restated Articles of Incorporation, incorporated by reference to Exhibit 3.1 to the Registration Statement on Form S -11 (File No. 333-106024), filed September 11, 2003.
