### REMINGTON OIL AND GAS CORPORATION

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

##### NOTE 1. ACCOUNTING POLICIES AND BASIS OF PRESENTATION

Remington Oil and Gas Corporation is an independent oil and gas exploration and production company incorporated in Delaware. Our oil and gas properties are located in the offshore Gulf of Mexico and the onshore Gulf Coast.

We prepared these financial statements according to the instructions for Form 10-Q. Therefore, the financial statements do not include all disclosures required by generally accepted accounting principles. However, we have recorded all transactions and adjustments necessary to fairly present the financial statements included in this Form 10-Q/A. The adjustments made are normal and recurring. The following notes describe only the material changes in accounting policies, account details, or financial statement notes during the first three months of 2003. Therefore, please read these financial statements and notes to the financial statements together with the audited financial statements and notes to financial statements in our 2002 Form 10-K/A. The income statements for the three months ended March 31, 2003, cannot necessarily be used to project results for the full year. We have made certain reclassifications to prior year financial statements in order to conform to current year presentations.

##### NOTE 2. NEW ACCOUNTING POLICIES AND CUMULATIVE EFFECT OF ACCOUNTING CHANGE

We adopted Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations," effective January 1, 2003. The statement requires that we estimate the fair value for our asset retirement obligations (dismantlement and abandonment of oil and gas wells and offshore platforms) in the periods the assets are first placed in service. We then adjust the current

## Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

estimated obligation for estimated inflation and market risk contingencies to the projected settlement date of the liability. The result is then discounted to a present value from the projected settlement date to the date the asset was first placed in service. We recorded the present value of the asset retirement obligation as an additional property cost and as an asset retirement liability. A combination of the amortization of the additional property cost (using the unit of production method) and the accretion of the discounted liability is recorded as a periodic expense in our income statement.

Prior to this adoption, we accrued an estimated dismantlement, restoration and abandonment liability using the unit of production method over the life of a property and included the accrued amount in depreciation, depletion and amortization expense. The total accrued liability (\$5.5 million) was reflected as additional accumulated depreciation, depletion and amortization of oil and gas properties on our balance sheet.

5

### REMINGTON OIL AND GAS CORPORATION

#### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

In conformity with the new statement we recorded the cumulative effect of this accounting change as of January 1, 2003 as if we had used this method in the prior years. At January 1, 2003, we increased our oil and gas properties by \$9.0 million, recorded \$11.8 million as an Asset Retirement Obligation liability and reduced our accumulated depreciation by \$2.8 million (\$5.5 million accrued dismantlement in prior years less accumulated depreciation, depletion and amortization of \$2.7 million on the increased property costs). The adoption of the new standard had no material effect on our net income. The following table reflects the reconciliation of the asset retirement obligations during the first quarter of 2003.

	CAPITALIZED ASSET RETIREMENT COST -----	ACCUMULATED DEPRECIATION DEPLETION AND AMORTIZATION -----	ASSET RETIREMENT OBLIGATION LIABILITY -----
	(IN THOUSANDS)		
Balance January 1, 2003.....	\$8,985	\$2,692	\$11,807
Property additions.....	694	--	694
Settlement of liabilities.....	--	--	(296)
Asset retirement expense.....	--	250	200
	-----	-----	-----
Balance March 31, 2003.....	\$9,679	\$2,942	\$12,405
	=====	=====	=====

Of the total asset retirement obligation, \$558,000 is classified as current due to the anticipated dismantlement and abandonment of East Cameron block 305 during 2003.

SFAS No. 141, "Business Combinations" and SFAS No. 142, "Goodwill and Intangible Assets" became effective for us on July 1, 2001, and January 1, 2002, respectively. SFAS No. 141 requires all business combinations initiated after June 30, 2001, to be accounted for using the purchase method. Additionally, SFAS No. 141 requires companies to disaggregate and report separately from goodwill certain intangible assets. SFAS No. 142 establishes new guidelines for accounting for goodwill and other intangible assets. Under SFAS No. 142,

## Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

goodwill and certain other intangible assets are not amortized, but rather are reviewed annually for impairment. The appropriate application of SFAS Nos. 141 and 142 to oil and gas mineral rights held under lease and other contractual arrangements representing the right to extract such reserves is unclear. Depending on how the accounting and disclosure literature is clarified, these oil and gas mineral rights held under lease and other contractual arrangements representing the right to extract such reserves for both undeveloped and developed leaseholds may be classified separately from oil and gas properties, as intangible assets on our balance sheets. Additional disclosures required by SFAS Nos. 141 and 142 would be included in the notes to financial statements. Historically, we, like many other oil and gas companies, have included these oil and gas mineral rights held under lease and other contractual arrangements representing the right to extract such reserves as part of the oil and gas properties, even after SFAS Nos. 141 and 142 and became effective.

This interpretation of SFAS Nos. 141 and 142 would affect only our balance sheet classification of oil and gas leaseholds. Our results of operations and cash flows would not be affected, since those oil and gas mineral rights held under lease and other contractual arrangements representing the right to extract such reserves would continue to be amortized in accordance with accounting rules for oil and gas companies provided in SFAS No. 19, "Financial Accounting and Reporting by Oil and Gas Producing Companies."

At March 31, 2003, we had net leaseholds cost of approximately \$34.7 million. If we applied the interpretation currently being deliberated, this classification would require us to make the disclosures set forth under SFAS No. 142 related to these interests. We will continue to classify our oil and gas leaseholds as oil and gas properties until further guidance is provided.

### NOTE 5. NOTES PAYABLE

As of March 31, 2003, our credit facility of \$150.0 million had a borrowing base of \$75.0 million. Interest only is payable quarterly through May 3, 2004, at which time the line expires and all principal becomes due, unless the line is extended or renegotiated. On May 1, 2003, we agreed with the lenders to increase the borrowing base to \$100.0 million and to extend the term to May 3, 2006. As of May 1, 2003, we had

7

## REMINGTON OIL AND GAS CORPORATION

### NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS -- (CONTINUED)

\$37.4 million borrowed under the facility. The banks review the borrowing base semi-annually and may increase or decrease the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit. Additionally, we have agreed not to pay dividends.

### NOTE 6. CONTINGENCIES

We have no material pending legal proceedings.

# Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

## ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion will assist in understanding our financial position and results of operations. The information below should be read in conjunction with the financial statements, the related notes to financial statements, and our Form 10-K/A for the year ended December 31, 2002.

Our discussion contains both historical and forward-looking information. We assess the risks and uncertainties about our business, long-term strategy, and financial condition before we make any forward-looking statements, but we cannot guarantee that our assessment is accurate or that our goals and projections can or will be met. Statements concerning results of future exploration, exploitation, development and acquisition expenditures as well as expense and reserve levels are forward-looking statements. We make assumptions about commodity prices, drilling results, production costs, administrative expenses, and interest costs that we believe are reasonable based on currently available information.

This discussion is primarily an update to the Management's Discussion and Analysis of Financial Condition and Results of Operations included in our 2002 Form 10-K/A. We recommend that you read this discussion in conjunction with the Form 10-K/A.

Our long-term strategy is to increase our oil and gas reserves and production while keeping our finding and development costs and operating costs competitive with our industry peers. We will implement this strategy through drilling exploratory and development wells from our inventory of available prospects that we have evaluated for geologic and mechanical risk and future reserve or resource potential. Our drilling program will contain some high risk/high reserve potential opportunities as well as some lower risk/lower reserve potential opportunities, in order to achieve a balanced program of reserve and production growth. Success of this strategy is contingent on various risk factors, as discussed in our filings with the Securities and Exchange Commission.

### LIQUIDITY AND CAPITAL RESOURCES

The following table summarizes our contractual obligations and commercial commitments as of March 31, 2003.

	PAYMENTS DUE BY PERIOD				
	TOTAL	LESS THAN 1 YEAR	1-3 YEARS	4-5 YEARS	AFTER 5 YEARS
(IN THOUSANDS)

Bank debt.....	\$37,400	\$ --	\$37,400	\$ --	\$ --
Other long-term payables.....	\$ 2,951	\$1,727	\$ 1,224	\$ --	\$ --
Office lease.....	\$ 2,358	\$ 441	\$ 933	\$984	\$ --
	-----	-----	-----	-----	-----
Total.....	\$42,709	\$2,168	\$39,557	\$984	\$ --
	=====	=====	=====	=====	=====

## Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

On March 31, 2003, our current assets exceeded our current liabilities by \$13.1 million. Our current ratio was 1.23 to 1. From December 31, 2002, to March 31, 2003, our current assets increased by \$17.1 million due primarily to increased accounts receivable.

Cash flow from operations increased by \$22.0 million, primarily because of higher oil and gas revenues during the first quarter of 2003 compared to the first quarter of 2002 and changes in our working capital accounts. Gas sales increased by \$16.4 million, or 134%, and oil sales increased by \$6.5 million, or 93%. The increases in sales related primarily to higher average prices in 2003 compared to the prior year.

Significant changes in our working capital accounts during the first quarter of 2003 include an increase in accounts receivable due to the increase in balances due from our joint interest participants due to an increase in operating activities and an increase in oil and gas sales during the quarter. Prepaid expenses and other current assets increased due to an increase in prepaid drilling costs on non-operated properties. In addition, due to the increase in our operating activities our accounts payable increased by \$6.6 million.

9

During the first quarter of 2003, our capital expenditures totaled \$24.6 million of which \$22.3 million was spent in the Gulf of Mexico where we incurred costs to drill and complete wells and fabricate and install new platforms and facilities. We have budgeted \$96.1 million for capital expenditures during 2003. This capital and exploration budget includes \$51.3 million for 30 exploratory wells, \$25.8 million for offshore platforms and development drilling, and \$19.0 million for workovers and property and seismic acquisitions. We expect that our cash, estimated future cash flow from operations, and available bank line of credit will be adequate to fund these expenditures for the remainder of 2003.

If our exploratory drilling results in significant new discoveries, we will commit additional capital above our existing budget in order to finance the completion, development, and potential additional opportunities generated by our success. We believe that, because of the additional reserves resulting from the exploratory success and our record of reserve growth in recent years, should such outlays exceed our operating cash flow we will be able to fund such needs through bank financing and /or offerings of debt or equity securities.

As of March 31, 2003, our credit facility of \$150.0 million had a borrowing base of \$75.0 million. Interest only is payable quarterly through May 3, 2004, at which time the line expires and all principal becomes due, unless the line is extended or renegotiated. On May 1, 2003, we agreed with the lenders to increase the borrowing base to \$100.0 million and to extend the term to May 3, 2006. As of May 1, 2003, we had \$37.4 million borrowed under the facility. The banks review the borrowing base semi-annually and may increase or decrease the borrowing base relative to a redetermined estimate of proved oil and gas reserves. Our oil and gas properties are pledged as collateral for the line of credit. Additionally, we have agreed not to pay dividends.

### RESULTS OF OPERATIONS

The following table reflects oil and gas revenues, production, and prices during the first quarter of 2003 compared to the first quarter of 2002.

THREE MONTHS ENDED MARCH 31,  
-----

Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

	2003	% INCREASE (DECREASE)	2002
	(DOLLARS	IN THOUSANDS,	EXCEPT UNIT
	IN	PRICES)	PRICES)
Oil production volume (MBbls).....	426	16%	367
Oil sales revenue.....	\$13,653	93%	\$ 7,068
Price per barrel.....	\$ 32.05	66%	\$ 19.26
Increase (decrease) in oil sales revenue due to:			
Change in prices.....	\$ 4,694		
Change in production volume.....	1,891		
	-----		
Total (decrease) in oil sales revenue.....	\$ 6,585		
	=====		
Gas production volume (MMcf).....	4,505	(5)%	4,755
Gas sales revenue.....	\$28,651	133%	\$12,307
Price per Mcf.....	\$ 6.36	146%	\$ 2.59
(Decrease) in gas sales revenue due to:			
Change in prices.....	\$17,926		
Change in production volume.....	(1,582)		
	-----		
Total (decrease) in gas sales revenue.....	\$16,344		
	=====		
Total production Mcfe.....	7,061		6,957
Price per Mcfe.....	\$ 5.99	116%	\$ 2.78

Oil sales revenue increased by \$6.6 million, or 93%. An increase of 59,000 barrels (16%) in oil production, primarily from new properties in the offshore Gulf of Mexico, provided an increase in revenue of

10

approximately \$1.9 million. Offshore Gulf of Mexico production increased by 82,000 barrels, or 31%, during the first quarter of 2003 compared to 2002 primarily because of production from five new properties. Onshore Gulf coast production decreased due to property sales and natural depletion of oil and gas fields.

Gas Sales revenue increased by \$16.3 million, or 133%, because of higher average gas prices partially offset by lower production. Average gas prices increased from \$2.59 per Mcf in the first quarter of 2002 to \$6.36 per Mcf, or 146%, for the same quarter in 2003, causing gas sales revenues to increase by \$18.0 million. Production decreased by 250,000 Mcf, or 5%, primarily because of the sales of certain South Texas properties during the second quarter of 2002, partially offset by increased production from new properties in the Gulf of Mexico.

Operating expenses increased by \$1.1 million during the first quarter of 2003 compared to the prior year because of addition producing properties. Exploration expenses increased by \$3.4 million due to additional dry hole expense incurred during the first quarter of 2003 compared to 2002. Depreciation, depletion, and amortization including the amortization and accretion of the asset retirement obligation required by Statement of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations," increased by \$1.2 million, or 13%, primarily due to increased production and additional producing properties. We adopted the new accounting standard effective January 1, 2003.

Prior to this adoption, we accrued an estimated dismantlement, restoration

## Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

and abandonment liability using the unit of production method over the life of a property and included the accrued amount in depreciation, depletion and amortization expense. The total accrued liability (\$5.5 million) was reflected as additional accumulated depreciation, depletion and amortization of oil and gas properties on our balance sheet. In conformity with this new standard, at January 1, 2003, we recorded an increase in our oil and gas properties totaling \$9.0 million, recorded \$11.8 million as an Asset Retirement Obligation liability and reduced our accumulated depreciation by \$2.8 million (\$5.5 million accrued dismantlement in prior years less accumulated depreciation, depletion and amortization of \$2.7 million on the increased property costs). The adoption of the new standard had no material effect on our net income.

General and administrative expenses, which includes stock based compensation, did not change significantly. Stock based compensation expense includes the amortized compensation cost related to the contingent stock grant and the directors fees paid in common stock. Interest and financing costs decreased due to a decrease in the average debt outstanding and lower weighted average rates. Income tax expense increased by \$6.2 million because of the higher income before taxes in the first quarter of 2003 compared to the first quarter of 2002.

### ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

#### INTEREST RATE RISK

Our revolving bank line of credit is sensitive to changes in interest rates. At March 31, 2003, the unpaid principal balance under the line was \$37.4 million which approximates its fair value. The interest rate on this debt is based on a premium of 150 to 225 basis points over the London Interbank Offered Rate ("Libor"). The rate is reset periodically, usually every three months. If on March 31, 2003, Libor changed by one full percentage point (100 basis points) the fair value of our revolving debt would change by approximately \$93,000. We have not entered into any interest rate hedging contracts.

#### COMMODITY PRICE RISK

A vast majority of our production is sold on the spot markets. Accordingly, we are at risk for the volatility in the commodity prices inherent in the oil and gas industry.

Occasionally we sell forward portions of our production under physical delivery contracts that by their terms cannot be settled in cash or other financial instruments. Such contracts are not subject to the provisions of Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities." Accordingly, we do not provide sensitivity analysis for such contracts. For the period January 1, 2003, through March 31, 2003, we did not have any forward sales contracts in place. For the period

11

April 1, 2003, through December 31, 2003, we have physical delivery contracts in place to sell 21,500 MMBtu of gas per day and 1,200 barrels of oil per day at the following prices:

PERIOD -----	PRICE PER -----	
	BARREL	MMBTU -----
April 1, 2003 through June 30, 2003.....	\$30.92	\$5.16

## Edgar Filing: REMINGTON OIL & GAS CORP - Form 10-Q/A

July 1, 2003 through September 30, 2003.....	\$28.70	\$4.89
October 1, 2003 through December 31, 2003.....	\$27.41	\$4.95

### ITEM 4. CONTROLS AND PROCEDURES

As of the end of the period covered by this report, our management, including our Chief Executive Officer and our Principal Financial Officer, evaluated the effectiveness of our disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e). Based on that evaluation, our management, including the Chief Executive Officer and the Principal Financial Officer, concluded that our disclosure controls and procedures were effective as of the end of the period covered by this report. Further, during the period covered by this report, there was no significant change in internal controls over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
