Item 1. Reports to Shareholders.

The Trust's semi-annual report transmitted to shareholders pursuant to Rule 30e-1 under the Investment Company Act of 1940 is as follows:

Welcome, Shareholder

In this report, you'll learn about how your investment in Van Kampen Senior Income Trust performed during the semi-annual period. The portfolio management team will provide an overview of the market conditions and discuss some of the factors that affected investment performance during the reporting period. In addition, this report includes the trust's financial statements and a list of trust investments as of January 31, 2004.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the trust will achieve its investment objective. The trust is subject to market risk, which is the possibility that the market values of securities owned by the trust will decline and, therefore, the value of the trust shares may be less than what you paid for them. Accordingly, you can lose money investing in this trust.

marked improvement in balance sheets across most industries. In spite of limited top-line revenue growth, companies were generally able to reap the benefits of rising productivity, lower operating costs and low interest rates to boost profitability. Market leaders were typically those companies that had proactively restructured their businesses to thrive in an era of lower prices and greater global competition.

These positive financial results formed the backdrop for a period of strong performance in both the senior-loan market and its sibling, the high-yield market. Yield spreads contracted over much of the period, which enabled many companies to access the senior-loan market at the best terms since 1999. The market was further boosted by an increase in demand, much of which came from institutional investors drawn to the attractive yields and improving credit quality. This was especially evident in the last two months of the period, when investors began accepting issuance from companies with slightly higher debt ratios than had previously been the case. The surge of interest in the asset class led to the easy absorption of the healthy supply of new issuance during the period.

PERFORMANCE ANALYSIS

A closed-end fund's return can be calculated based upon either the market price or the net asset value (NAV) of its shares. NAV per share is determined by dividing the value of the trust's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding, while market price reflects the supply and demand for the shares. As a result, the two returns

TOTAL RETURN FOR THE SIX-MONTH PERIOD ENDED JANUARY 31, 2004

-----	-----
BASED ON NAV	BASED ON MARKET PRICE
8.11%	13.65%
-----	-----

Past performance is no guarantee of future results. Investment return, net asset value and common share market price will fluctuate and trust shares, when sold, may be worth more or less than their original cost. See Performance Summary for additional performance information.

can differ significantly. On a market-price basis, the trust returned 13.65 percent. On an NAV basis, the trust returned 8.11 percent.

We remained focused on maintaining a high level of diversification in the trust's portfolio during the period in order to minimize the risk of over-concentration in any one sector or security. While we follow a bottom-up security-selection process and generally do not practice sector rotation, we did move to limit the portfolio's exposure to certain industries facing ongoing challenges. For example, we found the textile industry particularly unappealing given the growing occurrence of import substitution, and we limited the trust's

Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

holdings in this sector. We avoided the auto industry because we believe that with the industry's continuing re-structuring, weaknesses may become evident throughout the supply chain. We followed a similar path in telecommunications, where ongoing problems with overcapacity have yet to be resolved.

Through thorough fundamental research, we identified issuers in several sectors that offered what we believed to be compelling value relative to our assessment of their financial prospects. Within the cable industry, for example, prices remained depressed throughout much of the period in the wake of the Adelphia reorganization. Our analysis indicated that the market was not properly pricing the underlying strength of the cable business model. By investing in the companies' senior secured debt, we were able to capitalize on these pricing opportunities from a somewhat protected standpoint, relative to investors in traditional high-yield bonds.

The trust also benefited during the period from our use of leverage. We use leverage on an ongoing basis in an effort to enhance the trust's overall returns.

Subject to change daily. All percentages are as a percentage of total assets. Provided for informational purposes only and should not be deemed as a recommendation to buy securities in the industries shown above. 3

To implement this approach, the trust borrows and invests at interest rates that roughly track current market rates. As a result, this approach minimizes the risks inherent in traditional leveraged strategies (which exploit the difference between short- and long-term interest rates), especially in periods of rising interest rates, and can help boost returns.

The number of issuers in the portfolio that are in default (defined here as those not paying principal and/or interest as contractually obligated) has declined by approximately 20 percent since the beginning of the period. The process of working out previous defaults had left the portfolio with equity holdings in several companies. We took advantage of rising prices over the course of the period to sell several of these holdings and reinvested the proceeds into interest-bearing notes.

incentives for a Borrower to prepay, prepayments of Senior Loans in the Trust's portfolio may occur. As a result, the actual remaining maturity of Senior Loans held in the Trust's portfolio may be substantially less than the stated maturities shown. Although the Trust is unable to accurately estimate the actual remaining maturity of individual Senior Loans, the Trust estimates that the actual average maturity of the Senior Loans held in its portfolio will be approximately 18-24 months.

- ** Senior Loans in which the Trust invests generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as the London Inter-Bank Offered Rate ("LIBOR"), (ii) the prime rate offered by one or more major United States banks and (iii) the certificate of deposit rate. Senior Loans are generally considered to be restricted in that the Trust ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.

* If certain expenses had not been voluntarily assumed by Van Kampen, total return would have been lower and the Ratio of Operating Expenses to Average Net Assets and the Ratio of Net Investment Income to Average Net Assets would have been 1.21% and 6.90% for the period ended July 31, 1998.

** Non-Annualized

(a) Net asset value on June 24, 1998 of \$10.00 is adjusted for common share offering costs of \$.013.

(b) Total return based on common share market price assumes an investment at the common share market price at the beginning of the period indicated, reinvestment of all distributions for the period in accordance with the Trust's dividend reinvestment plan, and sale of all shares at the closing common share market price at the end of the period indicated.

(c) Calculation includes the proceeds from principal repayments and sales of variable rate senior loan interest.

(d) Calculated by subtracting the Trust's total liabilities (not including the Borrowings) from the Trust's total assets and dividing by the total number of senior indebtedness units, where one unit equals \$1,000 of senior indebtedness.

(e) As required, effective August 1, 2001, the Trust has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began amortizing premium on fixed income securities. The effect of this change for the year ended July 31, 2002 was to decrease the ratio of net investment

Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

income to average net asset applicable to common shares by .01%. Net investment income per share and net realized and unrealized gains and losses per share were unaffected by the adjustments. Per share, ratios and supplemental data for the periods prior to July 31, 2002 have not been restated to reflect this change in presentation.

NOTES TO FINANCIAL STATEMENTS

January 31, 2004 (Unaudited)

1. SIGNIFICANT ACCOUNTING POLICIES

Van Kampen Senior Income Trust (the "Trust") is registered as a non-diversified,

Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

closed-end management investment company under the Investment Company Act of 1940, as amended. The Trust's investment objective is to provide a high level of current income, consistent with preservation of capital. The Trust seeks to achieve its objective by investing primarily in a portfolio of interests in floating or variable rate senior loans to corporations, partnerships and other entities which operate in a variety of industries and geographical regions. The Trust borrows money for investment purposes which will create the opportunity for enhanced return, but also should be considered a speculative technique and may increase the Trust's volatility. The Trust commenced investment operations on June 24, 1998. Effective November 30, 2003, the Trust's investment adviser, Van Kampen Investment Advisory Corp. merged into its affiliate, Van Kampen Asset Management.

The following is a summary of significant accounting policies consistently followed by the Trust in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

A. SECURITY VALUATION The Trust's Senior Loans are valued by the Trust following valuation guidelines established and periodically reviewed by the Trust's Board of Trustees. Under the valuation guidelines, Senior Loans for which reliable market quotes are readily available are valued at the mean of such bid and ask quotes. Where reliable market quotes are not readily available, Senior Loans are valued, where possible, using independent market indicators provided by independent pricing sources approved by the Board of Trustees. Other Senior Loans are valued by independent pricing sources approved by the Board of Trustees based upon pricing models developed, maintained and operated by those pricing sources or valued by Van Kampen Asset Management (the "Adviser") by considering a number of factors including consideration of market indicators, transactions in instruments which the Adviser believes may be comparable (including comparable credit quality, interest rate, interest rate redetermination period and maturity), the credit worthiness of the Borrower, the current interest rate, the period until next interest rate redetermination and the maturity of such Senior Loan. Consideration of comparable instruments may include commercial paper, negotiable certificates of deposit and short-term variable rate securities which have adjustment periods comparable to the Senior Loans in the Trust's portfolio. The fair value of Senior Loans are reviewed and approved by the Trust's Valuation Committee and the Board of Trustees.

Equity securities are valued on the basis of prices furnished by pricing services or as determined in good faith by the Adviser under the direction of the Board of Trustees.

Short-term securities with remaining maturities of 60 days or less are valued at amortized cost, which approximates market value. Short-term loan participations are valued at cost in the absence of any indication of impairment.

NOTES TO
FINANCIAL STATEMENTS

January 31, 2004 (Unaudited)

The Trust may invest in repurchase agreements, which are short-term investments in which the Trust acquires ownership of a debt security and the

Edgar Filing: VAN KAMPEN SENIOR INCOME TRUST - Form N-CSRS

seller agrees to repurchase the security at a future time and specified price. Repurchase agreements are fully collateralized by the underlying debt security. The Trust will make payment for such securities only upon physical delivery or evidence of book entry transfer to the account of the custodian bank. The seller is required to maintain the value of the underlying security at not less than the repurchase proceeds due the Trust.

B. SECURITY TRANSACTIONS Investment transactions are recorded on a trade date basis. Realized gains and losses are determined on an identified cost basis.

C. INVESTMENT INCOME Interest income is recorded on an accrual basis. Facility fees received are treated as market discounts. Market premiums are amortized and discounts are accreted over the stated life of each applicable senior loan, note, or other fixed income security. Other income is comprised primarily of amendment fees which are recorded when received. Amendment fees are earned as compensation for agreeing to changes in loan agreements.

D. FEDERAL INCOME TAXES It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes is required.

The Trust intends to utilize provisions of the federal income tax laws which allow it to carry a realized capital loss forward for eight years following the year of the loss and offset such losses against any future realized capital gains. At July 31, 2003, the Trust had an accumulated capital loss carryforward for tax purposes of \$179,582,840, which will expire between July 31, 2009 and 2011.

At January 31, 2004, the cost and related gross unrealized appreciation and depreciation are as follows:

Cost of investments for tax purposes.....	\$2,293,531,790
	=====
Gross tax unrealized appreciation.....	\$ 49,329,669
Gross tax unrealized depreciation.....	(60,465,385)

Net tax unrealized depreciation on investments.....	\$ (11,135,716)
	=====

E. DISTRIBUTION OF INCOME AND GAINS The Trust intends to declare and pay monthly dividends from net investment income to common shareholders. Net realized gains, if any, are to be distributed at least annually to common shareholders. Distributions from net realized gains for book purposes may include short term capital gains, which are included as ordinary income for tax purposes.

NOTES TO FINANCIAL STATEMENTS

January 31, 2004 (Unaudited)

The tax character of distributions paid for the year ended July 31, 2003 was as follows:

2003

Distributions paid from:	
Ordinary income.....	\$79,888,289
Long-term capital gain.....	-0-

	\$79,888,289
	=====

As of July 31, 2003, the components of distributable earnings on a tax basis were as follows:

Undistributed ordinary income..... \$2,873,430

Net realized gains and losses may differ for financial and tax reporting purposes primarily as a result of the deferral of losses resulting from wash sale transactions.

2. INVESTMENT ADVISORY AGREEMENT AND OTHER TRANSACTIONS WITH AFFILIATES

Under the terms of the Trust's Investment Advisory Agreement, the Adviser will provide investment advice and facilities to the Trust for an annual fee of .85% of the average daily managed assets. Managed assets are defined as the gross asset value of the Trust minus the sum of accrued liabilities, other than the aggregate amount of borrowings undertaken by the Trust. In addition, the Trust will pay a monthly administrative fee to Van Kampen Investments Inc., the Trust's Administrator, at an annual rate of .20% of the average daily managed assets of the Trust. The administrative services provided by the Administrator include monitoring the provisions of the loan agreements and any agreements with respect to participations and assignments, record keeping responsibilities with respect to interests in Variable Rate Senior Loans in the Trust's portfolio and providing certain services to the holders of the Trust's securities.

For the six months ended January 31, 2004, the Trust recognized expenses of approximately \$67,000 representing legal services provided by Skadden, Arps, Slate, Meagher & Flom (Illinois), counsel to the Trust, of which a trustee of the Trust is an affiliated person.

Under a Legal Services agreement, the Adviser provides legal services to the Trust. The Adviser allocates the cost of such services to each Trust. For the six months ended January 31, 2004, the Trust recognized expenses of approximately \$23,300 representing Van Kampen Investments Inc.'s or its affiliates' (collectively "Van Kampen") cost of providing legal services to the Trust, which are reported as "Legal" expenses in the Statement of Operations.

Certain officers and trustees of the Trust are also officers and directors of Van Kampen. The Trust does not compensate its officers or trustees who are officers of Van Kampen.

The Trust provides deferred compensation and retirement plans for its trustees who are not officers of Van Kampen. Under the deferred compensation plan, trustees may elect to defer all or a portion of their compensation to a later date. Benefits under the retirement

plan are payable for a ten-year period and are based upon each trustee's years of service to the Trust. The maximum annual benefit per trustee under the plan is \$2,500.

During the period, the Trust owned shares of the following affiliated companies. Affiliated companies are defined by the Investment Company Act of 1940 as those companies in which a fund holds 5% or more of the outstanding voting securities.

* Shares were acquired through the restructuring of Senior loan interests.

At January 31, 2004, Van Kampen owned 10,000 common shares of the Trust.

3. INVESTMENT TRANSACTIONS

During the period, the costs of purchases and proceeds from investments sold and repaid, excluding short-term investments, were \$1,047,387,614 and \$795,783,363, respectively.

4. COMMITMENTS

Pursuant to the terms of certain of the Variable Rate Senior Loan agreements, the Trust had unfunded loan commitments of approximately \$109,972,500 as of January 31, 2004. The Trust intends to reserve against such contingent obligations by segregating cash, liquid securities and liquid Senior Loans as a reserve.

5. SENIOR LOAN PARTICIPATION COMMITMENTS

The Trust invests primarily in participations, assignments, or acts as a party to the primary lending syndicate of a Variable Rate Senior Loan interest to United States and foreign corporations, partnerships, and other entities. When the Trust purchases a participation of a Senior Loan interest, the Trust typically enters into a contractual agreement with the lender or other third party selling the participation, but not with the borrower directly. As such, the

Trust assumes the credit risk of the borrower, selling participant or other persons interpositioned between the Trust and the borrower.

At January 31, 2004, the following sets forth the selling participants with respect to interests in Senior Loans purchased by the Trust on a participation basis.

SELLING PARTICIPANT	PRINCIPAL	
	AMOUNT (000)	VALUE (000)

Total.....	\$16,935	\$17,417
	=====	=====

6. BORROWINGS

In accordance with its investment policies, the Trust may borrow money for investment purposes in an amount up to approximately 33 1/3% of the Trust's total assets.

The Trust has entered into a \$700 million revolving credit and security agreement. This revolving credit agreement is secured by the assets of the Trust. For the six months ended January 31, 2004, the average daily balance of borrowings under the revolving credit agreement was \$543,744,565 with a weighted average interest rate of 1.11%.

7. SUBSEQUENT EVENT--PREFERRED SHARES ISSUANCE

As of February 20, 2004, the Trust issued 5,600 shares each of Series M, Series T, Series W, Series TH and Series F Auction Preferred Shares ("APS"), \$.01 par value, \$25,000 liquidation preference, for a total issuance of \$700 million. Dividends are cumulative and the dividend rates are generally reset every seven days through an auction process. The Trust used the net proceeds of the offering to pay down existing borrowings.

The Trust pays annual fees equivalent to .25% of the preferred share liquidation value for the remarketing efforts associated with the preferred auctions. These fees will be included as a component of the "Preferred Share Maintenance" expense in the Statement of Operations.

The APS are redeemable at the option of the Trust in whole or in part at the liquidation value of \$25,000 per share plus accumulated and unpaid dividends. The Trust is subject to certain asset coverage tests and the APS are subject to mandatory redemption if the tests are not met.
