**Letter to Shareholders**

Dear Fellow Shareholders:

Enclosed is your semiannual report for the six-month period ended April 30, 2008. We appreciate the opportunity to correspond with you and encourage you to carefully review this report, which includes market and fund commentary from our investment team, a listing of portfolio holdings, financial data and highlights, as well as detailed information regarding performance and allocations of Calamos Global Dynamic Income Fund (CHW).

This Fund seeks to generate a high level of current income with a secondary objective of capital appreciation. To do this, the investment team has maximum flexibility to dynamically allocate among equities, fixed-income securities and alternative investments around the world. We believe the Fund's broad universe of securities and dynamic allocation strategy provides enhanced opportunities to pursue income and returns, and to manage risk over full market cycles.

During the period, market volatility and economic uncertainty created considerable turbulence across the markets. Nonetheless, the Fund provided common shareholders with steady monthly distributions of \$0.1100 per share.

As the broad market struggled, closed-end funds faced added challenges due to the conditions in the credit markets, specifically the auction rate preferred securities (ARPS) market. As do many other closed-end funds, CHW uses ARPS as a way to leverage portfolios and potentially increase returns for common shareholders. During the period, the credit crunch which originated in the subprime mortgage sector cascaded across other areas of the credit market, including ARPS market. However, unlike many other segments of the credit market, the problems in the closed-end fund ARPS market were liquidity-based, and not driven by problematic credit quality or fundamentals.

As liquidity in the ARPS market deteriorated, Calamos Investments worked diligently to protect the interests of all of the Fund's shareholders both the investors who entrusted us with funds through the ARPS market (investors in the preferred share class) and the common shareholders who account for the majority of fund assets. As we discuss in this report, we have made considerable strides in this regard, and have secured refinancing for the majority of ARPS financing in the Fund. We remain dedicated to securing financing for all ARPS, in a manner which considers the best interests of all Fund shareholders.

We recognize that periods such as these can unsettle even seasoned investors. However, our experience in the markets has taught us that investment success is best measured over full market cycles rather than quarters, months or a year. Moreover, short-term market volatility can create considerable opportunities for investors with long-term perspective. For example, we believe anxious investors sold many fundamentally strong investments during the reporting period, providing buying opportunities for our discipline.

## Economic and Market Review

*For the latest market and economic outlook, please visit our website at [www.calamos.com](http://www.calamos.com) and select the Fund Investors link.*

During the semiannual period, the global credit crisis cast a shadow over the markets as investors weighed the probability of recession in the United States and the potential implications to the global economy. Access to credit remained tight as the subprime mortgage market collapse that began in the summer of 2007 continued to reverberate. Banking and financial institutions were among those that suffered most. One of Wall Street's leading institutions, Bear Stearns, faced a near-certain demise if not for a bailout orchestrated by JP Morgan Chase and the Federal Reserve in March. Commodity prices soared to new heights, inflationary pressures increased, the housing market floundered, and the U.S. dollar weakened.

Yet, even as uncertainty prevailed, the U.S. economy persevered. First quarter GDP growth continued on a slow-yet-positive pace, as it did in the fourth quarter of 2007. Throughout the period, the Federal Reserve responded aggressively to support the economy and to shore up investor confidence. Most notably, the central bank cut the federal funds target rate five times during the six months ended April 30, from 4.5% to 2.0%.

Against this backdrop, global equity markets retreated sharply for the six-month period ended April 30, 2008. Economic concerns weighed most heavily on stocks, which returned -9.64%, as measured by the S&P 500 Index<sup>1</sup>. International equities fell nearly as far, with the MSCI EAFE<sup>®</sup> Index<sup>2</sup> returning -8.99%.

Convertible securities once again illustrated the benefits of their hybrid characteristics, and returned -5.86% (as measured by the Value Line Convertible Index)<sup>3</sup> a considerably less severe drop than the broad equity market. (Convertibles are hybrid securities in that they combine the opportunity for upside equity market participation with the potential downside protection of fixed-income securities.) Issuance trends remained favorable, as companies in the troubled financial sector turned to the convertible market for capital. Additionally, convertibles benefited from surging volatility in the equity markets. (Volatility increases the value of the conversion feature of a convertible bond.) High-yield corporate bonds also struggled. The CS High Yield Index<sup>4</sup> returned -0.90% as tight credit conditions, recessionary fears, increased volatility and stagnant supply weighed on investor sentiment. Although default and bankruptcy rates remain near historical lows, there was evidence of those rates rising in March and April. Spooked by the credit crisis, investors favored high-quality issues over the riskier, more speculative lower-grade tiers during the early portion of the reporting period. Credit spreads widened to levels not seen in years, although they did come down late in the period as investors became more willing to take on increased risk. (Credit spreads measure the yields between bonds with different levels of credit quality risk. When spreads widen, investors receive more compensation for taking on risk.)

Despite the uncertainty and volatility, investor sentiment brightened toward the end of the reporting period. The bailout of Bear Stearns, ongoing action from the Fed and strong earnings reports for the broad market (excluding the financial sector) boosted investor confidence. Stock and bond markets rallied briskly during the final weeks of the reporting period.

**Table of Contents**

Economic and Market Review

As always, we encourage investors to stay focused on the long-term. While the near-term outlook for the U.S. and global economy remains more clouded than in years past, periods of slower growth and contraction are a normal part of the economic cycle. Having invested through many different market cycles, we continue to have conviction in the Fund's portfolio and investment discipline. We believe the Fund is well positioned to provide income and total return through full market cycles.

NA	NA
NA	NA

Monthly distributions are from net investment income, short-term capital gains and/or long-term capital gains. For more details please go to the Tax Center located at [www.calamos.com](http://www.calamos.com).

**Q. How did the Fund perform during the period?**

A. The underlying portfolio (as represented by net asset value, or NAV) of Calamos Global Dynamic Income Fund returned -3.79% for the six-month period. The MSCI World Index<sup>1</sup> returned -9.12% and the Merrill Lynch Global

Broad Market Index<sup>2</sup> returned 6.03%. On a market price basis, the Fund returned -3.81% assuming reinvestment of distributions.

**Q. Did the Fund provide steady distributions throughout the period?**

A. Throughout the period, the Fund provided common shareholders with a steady distribution stream, with monthly payments of \$0.11 per share. The Fund's current annualized distribution rate was 11.07%, based on its closing market price of \$11.92

as of  
April 30, 2008.

**Q. What's the difference between market return and NAV return?**

A. Closed-end funds trade on exchanges, where the price of a share may be driven by factors other than the value of the underlying securities. The price of a share in the market is called the market value. The market value may be influenced by factors that are unrelated to the performance of the Fund's holdings. The Fund's NAV return measures the return of the individual securities within the portfolio less Fund expenses, but more importantly, it is a measure of how well the manager is able to avoid or capitalize on market disruptions or opportunities. The higher the return, the more value the Fund's management team added through its security selection decisions.

**Table of Contents****Investment Team Interview**

Fund asset allocations are based on total investments (excluding security lending collateral) and may vary over time.

**QUALITY ALLOCATION**

Weighted Average Credit Quality

AAA	7.2%
AA	1.8
A	11.0
BBB	7.3
BB	17.1
B	6.8
CCC or below	0.8
Not Rated	48.0

Data is based on a portion of portfolio holdings. Credit quality shown reflects the higher of the ratings of Standard & Poor's Corporation or Moody's Investors Service, Inc. Ratings are relative, subjective and not absolute standards of quality. Excludes equity securities, options, cash and short-term investments.

**REGIONAL ALLOCATION**

North America	49.3%
Europe	38.2
Asia Pacific	9.8
Latin America	1.1
Middle East / Africa	0.9
Caribbean	0.7

Region allocations are based on portfolio holdings.

Typically, the market price will trade at a premium or discount to NAV. It is our practice to monitor excessive premiums and discounts in order to serve the interests of the shareholders.

**Q. What factors influenced performance?**

A. Given the global credit crisis that has developed since the middle of 2007, the Fund benefited from its significant underweight position to the financial sector. In addition to doubting the large banks' prospects for high growth, we questioned valuations and had struggled with understanding the levels of risk in the large banks in recent years. The portfolio also benefited from strong security selection in the health care sector and large-capitalization stocks.

As we discuss in the Economic and Market Review, the six-month period was very volatile across markets due to concerns about global credit conditions and the potential for a U.S. recession. These conditions created an inhospitable climate, and the Fund declined against this backdrop. That said, we continue to have a high degree of conviction in the Fund and encourage investors to maintain a long-term perspective.

The portfolio's underweight position in the more cyclical energy sector also hurt performance. We continue to question the sustainability of earnings growth as well as valuations in this area. An overweight position within the information technology sector also hindered the portfolio. In addition, the convertible arbitrage portion of the portfolio performed poorly and hampered relative returns for the period.

**Q. How is the Fund positioned?**

A. We continue to favor traditional growth sectors, with information technology and health care sectors still being among the largest weightings in the Fund. From a geographic perspective, we have trimmed our position in Japan, partly due to disappointment with a slowdown in government reform but also due to company-specific factors. We have added to our position within the United Kingdom and Germany. We remain selective within emerging markets, and our total exposure to the area is less than 10%.

Convertibles continue to be an important component of the strategy and account for approximately 12% of the portfolio. (Convertible securities combine characteristics of stocks and fixed-income securities. Like stocks, convertibles provide the opportunity for participation in equity market upside. Like fixed-income securities,

convertibles provide coupon income and potential downside protection in falling markets.) The use of convertibles helps us manage volatility and the overall risk/reward profile of the portfolio. From a sector standpoint, the risk/reward characteristics of convertibles look particularly attractive versus stocks in areas such as energy and materials, as well as in some industries within the consumer discretionary and financials sector. We reduced the Fund's allocation to the consumer sectors and have added to positions within industrials. Our view is that infrastructure rebuilding is a dire need (both in the United States and globally), and will provide a tailwind to industrial companies involved in repairing public structures, such as dams and highways.

Greece	1.2
Other Combined	10.8

Country allocation is based on portfolio holdings and may vary over time.

**Q. Please explain how the Fund employs leverage.**

A. Leverage strategies continued to contribute favorably to the returns earned by the Fund's common shareholders despite the turmoil in the credit markets. Leverage strategies typically entail borrowing at short-term interest rates and investing the proceeds at higher rates of return. Traditionally, closed-end funds, including CHW, have leveraged auction rate preferred stock (ARPS), which are long-term, high-quality equity securities in which the interest rates are adjusted every seven days through an auction process.

**Q. Haven't some of these auctions been failing?**

A. Yes. Many auctions, including those of CHW, failed early this year because of a confluence of events. In simple terms, a failed auction results when there are not enough buyers entering the market to purchase the shares available for sale. When an auction fails, the pre-auction preferred holders keep the securities and are paid a maximum dividend from a calculation based on other, more liquid short-term rates such as commercial paper or LIBOR (London Interbank Offered Rate). As the ARPS auctions began to falter, limited trading initially occurred, but eventually shares stopped changing hands due to an absence of buyers. Potential sellers were not able to liquidate their positions. This is a problem that has affected the entire ARPS market and is not particular to CHW. These failed auctions are liquidity events and they are not related to the underlying ability of CHW to pay dividends on the ARPS. While rating agencies are monitoring the situation, a liquidity issue does not trigger a downgrade. Rating agency guidelines are driven by the ratings or valuations of the underlying fund portfolio. Net asset values in many funds in the final days of the period moved higher as the general markets have rebounded. The ARPS in CHW have continued to maintain their AAA/Aaa credit ratings.

**Q. Have the higher dividend rates being paid on ARPS hurt common shareholders of the Fund?**

A. Overall, common shareholders benefitted from the Fund's use of ARPS, although not to the same degree as one might expect during more typical environments. The maximum rates of the Fund's ARPS dividends historically tracked short-term benchmarks (such as LIBOR and commercial paper), which in turn, are closely correlated with the Federal funds target rate. During the period, the Federal Reserve slashed the target rate dramatically, which drove short-term rates lower and reduced the maximum ARPS distribution rates. So, while auction failures caused the rates of ARPS to rise above short-term benchmarks, the cost of leverage actually came down during the reporting period significantly (in the neighborhood of 200 to 300 basis points).

**Q. What kind of solutions have you sought for ARPS holders?**

A. We recognize that the lack of liquidity has created both uncertainty and frustration for our preferred shareholders. On May 2, 2008, Calamos announced a plan to redeem 85.7%, or \$300 million, of the Fund's preferred securities as part of a

**Table of Contents**

Investment Team Interview

refinancing program. Our ability to refinance all preferred shares with debt was constrained by regulations that require total assets in closed-end funds to be at least three times the amount of debt leverage, which is higher than the asset-coverage the Fund must maintain when utilizing equity leverage such as preferred shares.

We remain committed to obtaining permanent financing solutions and to do so in a manner consistent with the best interests of all shareholders.

**Q. Given recent events, how do you view leverage?**

A. Our decision to refinance reflects our belief that leverage continues to contribute favorably to returns and to be in the best interests of the common shareholders. As our efforts in respect to refinancing continue, we intend to maintain this emphasis.

**Q. Do you have any closing thoughts for investors?**

A. We encourage investors to keep a long-term view of their investment plans, investment goals and measurement of success. Having invested through many market and economic environments, we remain confident in our investment philosophy, and believe that the Fund is well positioned to pursue income and total return, through its dynamically allocated global portfolio.

Moreover, our extensive experience in the markets affirms our belief that volatility can create opportunity, particularly for long-term investors such as us. We believe the current market has provided us with significant opportunity to own solid businesses at attractive prices. We continue to find securities that we believe offer the opportunity for participation in upward moving markets and for greater resilience in downward moving markets.

**NOTES TO SCHEDULE OF INVESTMENTS**

- μ Security, or portion of security, is held in a segregated account as collateral for written options, swaps, or securities sold short aggregating a total value of \$256,236,936.
  
- \* Securities issued and sold pursuant to a Rule 144A transaction are excepted from the registration requirement of the Securities Act of 1933, as amended. These securities may only be sold to qualified institutional buyers ( QIBs ), such as the fund. Any resale of these securities must generally be effected through a sale that is registered under the Act or otherwise exempted or excepted from such registration requirements. At April 30, 2008, the value

of 144A securities that could not be exchanged to the registered form is \$179,917,713 or 23% of net assets applicable to common shareholders.

Variable rate or step bond security. The interest rate shown is the rate in effect at April 30, 2008.

- # Non-income producing security.
  
- W Investment in an affiliated fund. During the period from November 1, 2007, through April 30, 2008, the fund had net purchases of \$29,133,635, and received \$1,143,738 in dividend payments from the affiliated fund. As of October 31, 2007, the fund had holdings of \$52,799,996 of the affiliated fund.

*Note: Value for Securities denominated in foreign currencies are shown in U.S. dollars. The principal amount for such securities are shown in the respective foreign currency. The date shown on options represents the expiration date of the option contract. The option contract may be exercised at any date on or before the date shown.*

\* The fund commenced operations on June 27, 2007.

See accompanying Notes to Financial Statements

**Table of Contents**

Notes to Financial Statements (unaudited)

**NOTE 1 ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES**

**Organization.** CALAMOS Global Dynamic Income Fund (the Fund) was organized as a Delaware statutory trust on April 10, 2007 and is registered under the Investment Company Act of 1940 (the 1940 Act) as a diversified, closed-end management investment company. The Fund commenced operations on June 27, 2007.

The Fund's investment objective is to generate a high level of current income, with a secondary objective of capital appreciation.

**Portfolio Valuation.** The valuation of the Fund's portfolio securities is in accordance with policies and procedures adopted by and under the ultimate supervision of the Board of Trustees.

Portfolio securities that are traded on U.S. securities exchanges, except option securities, are valued at the last current reported sales price at the time as of which a Fund determines its net asset value (NAV). Securities traded in the over-the-counter market and quoted on The NASDAQ Stock Market are valued at the NASDAQ Official Closing Price, as determined by NASDAQ, or lacking a NASDAQ Official Closing Price, the last current reported sale price on NASDAQ at the time as of which a Fund determines its NAV.

When a most recent last sale or closing price is not available, portfolio securities, other than option securities, that are traded on a U.S. securities exchange and other securities traded in the over-the-counter market are valued at the mean between the most recent bid and asked quotations in accordance with guidelines adopted by the Board of Trustees.

Each option security traded on a U.S. securities exchange is valued at the mid-point of the consolidated bid/ask quote for the option security, also in accordance with guidelines adopted by the Board of Trustees. Each over-the-counter option that is not traded through the Options Clearing Corporation is valued based on a quotation provided by the counterparty to such option under the ultimate supervision of the Board of Trustees.

Trading in securities on European and Far Eastern securities exchanges and over-the-counter markets is typically completed at various times before the close of business on each day on which the New York Stock Exchange (NYSE) is open. Each security trading on these exchanges or over-the-counter markets is evaluated utilizing a systematic fair valuation model provided by an independent pricing service approved by the Board of Trustees. The valuation of each security that meets certain criteria in relation to the valuation model is systematically adjusted to reflect the impact of movement in the U.S. market after the foreign markets close. Securities that do not meet the criteria, or that are principally traded in other foreign markets, are valued as of the last current sale price at the time as of which the Fund determines its NAV, or when reliable market prices or quotations are not readily available, at the mean between the most recent bid and asked quotations as of the close of the appropriate exchange or other designated time, in accordance with guidelines adopted by the Board of Trustees. Trading of foreign securities may not take place on every NYSE business day. In addition, trading may take place in various foreign markets on Saturdays or on other days when the NYSE is not open and on which the Fund's NAV is not calculated.

If the pricing committee determines that the valuation of a security in accordance with the methods described above is not reflective of a fair value for such security, the security is valued at a fair value by the pricing committee, under the ultimate supervision of the Board of Trustees, following the guidelines and/or procedures adopted by the Board of Trustees.

The Fund also may use fair value pricing, under the ultimate supervision of the Board of Trustees, following the guidelines and/or procedures adopted by the Board of Trustees, if the value of a foreign security it holds is materially affected by events occurring before their valuation time but after the close of the primary market or exchange on which the security is traded. Those procedures may utilize valuations furnished by pricing services approved by the Board of Trustees, which may be based on market transactions for comparable securities and various relationships between securities that are generally recognized by institutional traders, a computerized matrix system, or appraisals derived from information concerning the securities or similar securities received from recognized dealers in those securities.

When fair value pricing of securities is employed, the prices of securities used by the Fund to calculate its NAV may differ from market quotations or official closing prices.

Global Dynamic Income Fund  
**SEMIANNUAL REPORT**

---

**Table of Contents**

Notes to Financial Statements (unaudited)

**Investment Transactions.** Short-term and long-term investment transactions are recorded on a trade date basis as of April 30, 2008. Net realized gains and losses from investment transactions are reported on an identified cost basis. Interest income is recognized using the accrual method and includes accretion of original issue and market discount and amortization of premium. Dividend income is recognized on the ex-dividend date, except that certain dividends from foreign securities are recorded as soon as the information becomes available.

**Foreign Currency Translation.** Values of investments and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars using a rate quoted by a major bank or dealer in the particular currency market, as reported by a recognized quotation dissemination service.

The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments.

Recorded net realized foreign currency gains or losses arise from disposition of foreign currency, the difference in the foreign exchange rates between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the ex-date or accrual date and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes (due to the changes in the exchange rate) in the value of foreign currency and other assets and liabilities denominated in foreign currencies held at period end.

**Option Transactions.** For hedging and investment purposes, the Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as portfolio securities. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by the Fund on the expiration date as realized gains from written options. The difference between the premium and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or, if the premium is less than the amount paid for the closing purchase transaction, as a realized loss. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a written put option is exercised, the premium reduces the cost basis of the securities purchased by the Fund. The Fund as writer of an option bears the market risk of an unfavorable change in the price of the security underlying the written option.

**Allocation of Expenses Among Funds.** Expenses directly attributable to the Fund are charged to the Fund; other expenses of Calamos Investment Trust, Calamos Advisors Trust, Calamos Convertible Opportunities and Income Fund, Calamos Convertible and High Income Fund, Calamos Strategic Total Return Fund, Calamos Global Total Return Fund and Calamos Global Dynamic Income Fund are allocated proportionately among each fund in relation to the managed assets of each fund or on another reasonable basis.

**Use of Estimates.** The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

**Income Taxes.** No provision has been made for U.S. income taxes because the Fund's policy is to continue to qualify as regulated investment company under the Internal Revenue Code of 1986, as amended (the Code), and distribute to shareholders substantially all of its taxable income and net realized gains.

**Table of Contents**

## Notes to Financial Statements (unaudited)

Dividends and distributions paid to shareholders are recorded on the ex-dividend date. The amount of dividends and distributions from net investment income and net realized capital gains is determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. To the extent these book/tax differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment. These differences are primarily due to differing treatments for foreign currency transactions, contingent payment debt instruments and methods of amortizing and accreting on fixed income securities. The financial statements are not adjusted for temporary differences.

**Indemnifications.** Under the Fund's organizational documents, the Fund is obligated to indemnify its officers and trustees against certain liabilities incurred by them by reason of having been an officer or trustee of the Fund. In addition, in the normal course of business, the Fund may enter into contracts that provide general indemnifications to other parties. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund's management expects the risk of material loss in connection to a potential claim to be remote.

**New Accounting Pronouncements.** The Fund has adopted the provisions of the Financial Accounting Standards Board (FASB) Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109*. As a result, the Fund recognized no liability for unrecognized tax benefits in connection with the adoption of FIN 48. A reconciliation is not provided as the beginning and ending amounts of unrecognized benefits are zero, with no interim additions, reductions or settlements. Tax year 2007 remains subject to examination by the U.S. and the State of Illinois tax jurisdictions.

In addition, in September 2006, the Statement of Financial Accounting Standards No. 157, *Fair Value Measurements* (SFAS 157), was issued and is effective for fiscal years beginning after November 15, 2007. SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements.

Management is currently evaluating the impact the adoption of SFAS 157 will have on the Fund's financial statements and their disclosures, and its impact has not yet been determined.

In addition, in March 2008, the Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (SFAS 161), was issued and is effective for fiscal years and interim periods beginning after November 15, 2008. SFAS 161 requires that objectives for using derivative instruments be disclosed in terms of underlying risk and accounting designation. Management is currently evaluating the impact the adoption of SFAS 161 will have on the Fund's financial statements and their disclosures, and its impact has not yet been determined.

**NOTE 2 INVESTMENT ADVISOR AND TRANSACTIONS WITH AFFILIATES OR CERTAIN OTHER PARTIES**

Pursuant to an investment advisory agreement with Calamos Advisors LLC ( Calamos Advisors ), the Fund pays an annual fee, payable monthly, equal to 1.00% based on the average weekly managed assets. Calamos Advisors has contractually agreed to waive a portion of its advisory fee charged to the Fund on the Fund's investments in the Calamos Government Money Market Fund ( GMMF ), an affiliated fund and a series of Calamos Investments Trust), equal to the advisory fee attributable to the Fund's investment in GMMF, based on daily net assets. For the period ended April 30, 2008, the total advisory fee waived pursuant to such agreement was \$61,656 and is included in the Statement of Operations under the caption Less expense reduction .

Pursuant to a financial accounting services agreement, the Fund also pays Calamos Advisors a fee for financial accounting services payable monthly at the annual rate of 0.0175% on the first \$1 billion of combined assets, 0.0150% on the next \$1 billion of combined assets and 0.0110% on combined assets above \$2 billion (for purposes of this calculation combined assets means the sum of the total average daily net assets of Calamos Investment Trust, Calamos Advisors Trust, and the total average weekly managed assets of Calamos Convertible and High Income Fund, Calamos Strategic Total Return Fund, Calamos Convertible Opportunities and Income Fund, Calamos Global Total Return Fund and Calamos Global Dynamic Income Fund). Managed assets means the funds' total assets (including any assets attributable to any outstanding borrowings) minus total liabilities (other than debt representing borrowings). Financial accounting services include, but are not limited to, the following: managing expenses and expense payment

processing; monitoring the calculation of expense accrual amounts; calculating, tracking and reporting tax

22	Global Dynamic Income Fund <b>SEMIANNUAL REPORT</b>	Notes to Financial Statements
----	--	-------------------------------

---

**Table of Contents**

## Notes to Financial Statements (unaudited)

adjustments on all assets; and monitoring trustee deferred compensation plan accruals and valuations. The Funds pay their pro rata share of the financial accounting services fee to Calamos Advisors based on their respective assets used in calculating the fee.

The Fund reimburses Calamos Advisors for a portion of compensation paid to the Fund's Chief Compliance Officer. This compensation is reported as part of Trustees' fees and officer compensation expenses on the Statement of Operations.

Certain officers and trustees of the Fund are also officers and directors of Calamos Financial Services LLC (CFS) and Calamos Advisors. All such officers and affiliated trustees serve without direct compensation from the Fund, except for the Chief Compliance Officer as described above.

The Fund has adopted a deferred compensation plan (the Plan). Under the Plan, a trustee who is not an interested person (as defined in the 1940 Act) of the Fund and has elected to participate in the Plan (a participating trustee) may defer receipt of all or a portion of his compensation from the Fund. The deferred compensation payable to the participating trustee is credited to the trustee's deferral account as of the business day such compensation would have been paid to the participating trustee. The value of amount deferred for a participating trustee is determined by reference to the change in value of Class I shares of one or more funds of Calamos Investment Trust designated by the participant. The value of the account increases with contributions to the account or with increases in the value of the measuring shares, and the value of the account decreases with withdrawals from the account or with declines in the value of the measuring shares. Deferred compensation investments of \$19,953 is included in Other assets on the Statement of Assets and Liabilities at April 30, 2008. The Fund's obligation to make payments under the Plan is a general obligation of the Fund and is included in Deferred compensation to Trustees on the Statement of Assets and Liabilities at April 30, 2008.

**NOTE 3 INVESTMENTS**

Purchases and sales of investments, other than short-term investments, for the six months ended April 30, 2008 were as follows:

Purchases	\$ 414,566,615
Proceeds from sales	503,227,514

The following information is presented on a federal income tax basis as of April 30, 2008. Differences between the cost basis under U.S. generally accepted accounting principles and federal income tax purposes are primarily due to timing differences.

The cost basis of investments for federal income tax purposes at April 30, 2008 was as follows:

Cost basis of investments	\$ 1,205,978,258
Gross unrealized appreciation	42,704,887
Gross unrealized depreciation	(77,296,111)
Net unrealized appreciation (depreciation)	\$ (34,591,224)

**NOTE 4 INCOME TAXES**

The Fund intends to make monthly distributions from its income available for distribution, which consists of the Fund's dividends and interest income after payment of Fund expenses, and net realized gains on stock investments. At least annually, the Fund intends to distribute all or substantially all of its net realized capital gains, if any.

Distributions are recorded on the ex-dividend date. The Fund distinguishes between distributions on a tax basis and a financial reporting basis. Accounting principles generally accepted in the United States of America require that only distributions in excess of tax basis earnings and profits be reported in the financial statements as a return of capital. Permanent differences between book and tax accounting relating to distributions are reclassified to paid-in capital. For tax purposes, distributions from short-term capital gains are considered to be from ordinary income. Distributions in

any year may include a return of capital component. The tax character of distributions for the period ended April 30, 2008 will be determined at the end of the Fund's current fiscal year.

**Table of Contents**

Notes to Financial Statements (unaudited)

Distributions during the fiscal year ended October 31, 2007 were characterized for federal income tax purposes as follows:

**Distributions paid from:**

Ordinary income	\$21,688,054
-----------------	--------------

Long-term capital gains	
-------------------------	--

As of October 31, 2007, the components of accumulated earnings/(loss) on a tax basis were as follows:

Undistributed ordinary income	\$ 515,661
Undistributed capital gains	
Total undistributed earnings	515,661
Accumulated capital and other losses	
Net unrealized gains/(losses)	32,269,860
Total accumulated earnings/(losses)	32,785,521
Other	(2,217)
Paid-in capital	840,680,755
Net assets applicable to common shareholders	\$ 873,464,059

**NOTE 5 COMMON SHARES**

There are unlimited common shares of beneficial interest authorized and 59,006,992 shares outstanding at April 30, 2008. Calamos Advisors owned 7,567 of the outstanding shares at April 30, 2008. Transactions in common shares were as follows:

	<b>Six Months Ended April 30, 2008 (unaudited)</b>	<b>Period Ended October 31, 2007</b>
Beginning shares	59,006,992	
Shares sold		59,006,992
Shares issued through reinvestment of distributions		
Ending shares	59,006,992	59,006,992

**NOTE 6 SHORT SALES**

Securities sold short represent obligations to deliver the securities at a future date. The Fund may sell a security it does not own in anticipation of a decline in the value of that security before the delivery date. When the Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. Dividends paid on securities sold short are disclosed as an expense on the Statement of Operations. A gain, limited to the price which the Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of a short sale.

To secure its obligation to deliver to the broker-dealer the securities sold short, the Fund must segregate an amount of cash or liquid securities with its custodian equal to any excess of the current value of the securities sold short over any cash or liquid securities deposited as collateral with the broker in connection with the short sale (not including the proceeds of the short sale). As a result of that requirement, the Fund will not gain any leverage merely by selling

short, except to the extent that it earns interest or other income or gains on the segregated cash or liquid securities while also being subject to the possibility of gain or loss from the security sold short.

**NOTE 7 FORWARD FOREIGN CURRENCY CONTRACTS**

The Fund may engage in portfolio hedging with respect to changes in currency exchange rates by entering into foreign currency contracts to purchase or sell currencies. A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. Risks associated with such contracts include, among other things, movement in the

24	Global Dynamic Income Fund <b>SEMIANNUAL REPORT</b>	Notes to Financial Statements
----	--	-------------------------------

---

**Table of Contents**

## Notes to Financial Statements (unaudited)

value of the foreign currency relative to U.S. dollar and the ability of the counterparty to perform. The net unrealized gain, if any, represents the credit risk to the Fund on a forward foreign currency contract. The contracts are valued daily at forward exchange rates and an unrealized gain or loss is recorded. The Fund realizes a gain or loss when a position is closed or upon settlement of the contracts. There were no open forward currency contracts at April 30, 2008.

**NOTE 8 PREFERRED SHARES**

There are unlimited shares of Auction Rate Cumulative Preferred Shares ( Preferred Shares ) authorized. The Preferred Shares have rights as determined by the Board of Trustees. The 14,000 shares of Preferred Shares outstanding consist of five series, 2,800 shares of M, 2,800 shares of T, 2,800 shares of W, 2,800 shares of TH, and 2,800 shares of F. The Preferred Shares have a liquidation value of \$25,000 per share plus any accumulated but unpaid dividends, whether or not declared.

Dividends on the Preferred Shares are cumulative at a rate typically reset every seven days based on the results of an auction. Dividend rates ranged from 3.90% to 8.81% for the six month period ended April 30, 2008. Under the 1940 Act, the Fund may not declare dividends or make other distributions on its common shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding Preferred Shares would be less than 200%.

If all holders of Preferred Shares who want to sell their shares are unable to do so because there are insufficient bidders in the auction at rates below the maximum rate as prescribed by the terms of the security, a failed auction results. When an auction fails, all holders receive the maximum rate and may be unable to sell their shares at the next auction. The maximum applicable rate on preferred shares is 150% of the 7-Day LIBOR rate.

During the period February 14, 2008 to April 30, 2008, the auctions Preferred Shares of the Fund were not successful. As a result, the Preferred Share dividend rates were reset to the maximum applicable rate which is 150% of the 7-Day LIBOR rate. Failed auctions result not from an event of default or a credit issue but a liquidity event.

The Preferred Shares are redeemable at the Fund's option, in whole or in part, on any dividend payment date at \$25,000 per share plus any accumulated but unpaid dividends. The Preferred Shares are also subject to mandatory redemption at \$25,000 per share plus any accumulated but unpaid dividends, whether or not declared, if certain requirements relating to the composition of the assets and liabilities of the Fund as set forth in the Statement of Preferences are not satisfied.

The holders of Preferred Shares have voting rights equal to the holders of common shares (one vote per share) and will vote together with holders of common shares as a single class except on matters affecting only the holders of Preferred Shares or only the holders of common shares, when the respective classes vote alone.

On April 30, 2008, the Fund's Board approved the redemption of 12,000 of the 14,000 Preferred Shares outstanding. Subsequent to April 30, 2008, the shares were redeemed at a price of \$25,000 per share plus any accrued and unpaid dividends (an aggregate price of \$300,215,832). Such Preferred Shares were redeemed with proceeds obtained through the issuance by the Fund of floating rate extendible senior secured notes, which were placed by Wachovia Securities. The aggregate amount of the notes issued was \$300,000,000 and the Fund will pay an annual rate at the three-month LIBOR (London Inter-bank Offered Rate) plus .50%. Prior to April 30, 2008, the Fund paid a facility fee of .75% and a one time agency fee of 1.00%.

The Notes will mature on June 1, 2009, the initial maturity date unless the notes are extended by the holder. In no event shall the notes be extended beyond May 1, 2011, the final maturity date. On May 1, 2009, and May 1, 2010, the Fund has the right to redeem all of the Notes at a price equal to 100.25% of the principal amount of the Notes.

On April 21, 2008, the Fund and other parties were named in a class action complaint filed in the U.S. District Court for the Southern District of New York (Miller v. Calamos, et al., Case No. 08 CIV 3756). The complaint alleges that CHW violated Sections 11 and 12 (a)(2) of the Securities Act of 1933 by failing to adequately disclose the risk of auction failures with respect to its auction rate preferred stock. Calamos believes the allegations in the complaint are completely without merit and that the disclosures in the fund's registration statement and prospectus were appropriate and complied with the federal securities laws.

**Table of Contents**

Notes to Financial Statements (unaudited)

**NOTE 9 SWAPS**

The Fund may engage in various swap transactions primarily to manage duration and yield curve risk or as alternatives to direct investments.

The Fund may also enter into credit default swap agreements. A credit default swap agreement may have as reference obligations one or more securities that are not currently held by the Fund. The protection buyer in a credit default contract is generally obligated to pay the protection seller an upfront or a periodic stream of payments over the term of the contract provided that no credit event, such as a default, on a reference obligation has occurred. If a credit event occurs, the seller generally must pay the buyer the par value (full notional value) of the swap in exchange for an equal face amount of deliverable obligations of the reference entity described in the swap, or the seller may be required to deliver the related net cash amount, if the swap is cash settled. The Fund may be either the buyer or the seller in the transaction. If the Fund is the buyer and no credit event occurs, the Fund may recover nothing if the swap is held through its termination date. However, if the credit event occurs, the buyer generally may elect to receive the full notional value of the swap in exchange for an equal face amount of deliverable obligations of the reference entity whose value may have significantly decreased. As a seller, the Fund generally receives an upfront payment or a fixed rate of income throughout the term of the swap provided that there is no credit event. As the seller, the Fund would effectively add leverage to its portfolio because, in addition to its total net assets, the Fund would be subject to investment exposure on the notional amount of the swap. Credit default swap agreements involve greater risks than if the Fund invested in the reference obligation.

The contracts are marked-to-market daily based on dealer-supplied valuations and changes in value are recorded as unrealized appreciation or depreciation. Gains or losses are realized upon termination of the contract. Premiums paid to or by the Fund are accrued daily and included in realized gain (loss) on swaps. Collateral, in the form of cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with swap contracts. Risks include changes in the return of the underlying instruments, failure of the counterparties to perform under the contracts terms and the possible lack of liquidity with respect to the contracts.

As of April 30, 2008, the Fund had outstanding swaps agreements as listed on the Schedule of Investments.

**NOTE 10 WRITTEN OPTIONS TRANSACTIONS**

The Fund may engage in option transactions and in doing so achieve the similar objectives to what it would achieve through the sale or purchase of individual securities. For the six months ended April 30, 2008, the Fund had the following transactions in options written:

	<b>Number of Contracts</b>	<b>Premiums Received</b>
Options outstanding at October 31, 2007	64,050	\$ 27,551,611
Options written	149,760	59,581,812
Options closed	(146,660)	(56,310,907)
Options expired	(475)	(191,892)
Options exercised		
Options outstanding at April 30, 2008	66,675	\$ 30,630,624

**Table of Contents**

Notes to Financial Statements (unaudited)

**NOTE 11 STRUCTURED EQUITY-LINKED SECURITIES**

The Fund may also invest in structured equity-linked securities created by third parties, typically investment banks. Structured equity-linked securities created by such parties may be designed to simulate the characteristics of traditional convertible securities or may be designed to alter or emphasize a particular feature. Traditional convertible securities typically offer stable cash flows with the ability to participate in capital appreciation of the underlying common stock. Because traditional convertible securities are exercisable at the option of the holder, the holder is protected against downside risk. Structured equity-linked securities may alter these characteristics by offering enhanced yields in exchange for reduced capital appreciation or less downside protection, or any combination of these features. Structured equity-linked instruments may include structured notes, equity-linked notes, mandatory convertibles and combinations of securities and instruments, such as a debt instrument combined with a forward contract. Cash flows received from these securities are recorded as dividends on the Statement of Operations.

## Financial Highlights

**Selected data for a common share outstanding throughout each period were as follows:**

	Six Months Ended April 30, (unaudited) <b>2008</b>	June 27, 2007* through October 31, <b>2007</b>
Net asset value, beginning of period	\$ 14.80	\$ 14.32 <sub>(a)</sub>
Income from investment operations:		
Net investment income (loss)	0.38**	0.18**
Net realized and unrealized gain (loss) from investments, short positions, written options, foreign currency and swaps	(0.89)	0.75
Distributions to preferred shareholders from:		
Net investment income (common share equivalent basis)	(0.14)	(0.04)
Total from investment operations	(0.65)	0.89
Less distributions to common shareholders from:		
Net investment income	(0.66)	(0.33)
Capital charge resulting from issuance of common and preferred shares		(0.08)
Net asset value, end of period	\$ 13.49	\$ 14.80
Market value, end of period	\$ 11.92	\$ 13.09
Total investment return based on <sup>(b)</sup> :		
Net asset value	(3.79)%	5.92%
Market value	(3.81)%	(10.59)%
Ratios and supplemental data:		
Net assets applicable to common shareholders, end of period (000 s omitted)	\$796,197	\$873,464
Preferred shares, at redemption value (\$25,000 per share liquidation preference) (000 s omitted)	\$350,000	\$350,000
Ratios to average net assets applicable to common shareholders:		
Net expenses <sup>(c)(d)</sup>	1.15%	1.22%
Gross expenses <sup>(c)(d)</sup>	1.16%	1.26%
Net investment income (loss) <sup>(c)(d)</sup>	3.90%	3.83%

Edgar Filing: Calamos Global Dynamic Income Fund - Form N-CSRS

Preferred share distributions from net investment income <sup>(c)</sup>	1.49%	0.81%
Net investment income (loss), net of preferred share distributions from net investment income <sup>(c)</sup>	2.41%	3.02%
Portfolio turnover rate	44%	9%
Average commission rate paid	\$ 0.0537	\$ 0.0427
Asset coverage per preferred share, at end of period <sup>(e)</sup>	\$ 81,882	\$ 87,404

\* Commencement of operations.

\*\* Net investment income allocated based on average shares method.

(a) Net of sales load of \$0.675 on initial shares issued and beginning net asset value of \$14.325.

(b) Total investment return is calculated assuming a purchase of common stock on the opening of the first day and a sale on the closing of the last day of the period reported. Dividends and distributions are assumed, for purposes of this calculation, to be reinvested at prices obtained under the Fund's dividend

reinvestment plan. Total return is not annualized for periods less than one year. Brokerage commissions are not reflected. NAV per share is determined by dividing the value of the Fund's portfolio securities, cash and other assets, less all liabilities, by the total number of common shares outstanding. The common share market price is the price the market is willing to pay for shares of the Fund at a given time. Common share market price is influenced by a range of factors, including supply and demand and market conditions.

- (c) Annualized for periods less than one year.
- (d) Does not reflect the effect of dividend payments to shareholders of Preferred Shares.
- (e)

Calculated by subtracting the Fund's total liabilities (not including Preferred Shares) from the Fund's total assets and dividing this by the number of Preferred Shares outstanding.

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of Calamos Global Dynamic Income Fund

We have reviewed the accompanying statement of assets and liabilities, including the schedule of investments, of Calamos Global Dynamic Income Fund (the Fund ) as of April 30, 2008, and the related statements of operations and changes in net assets and the financial highlights for the semi-annual period then ended. These interim financial statements and financial highlights are the responsibility of the Fund's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to such interim financial statements and financial highlights for them to be in conformity with accounting principles generally accepted in the United States of America.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the statement of changes in net assets of the Fund for the period from June 27, 2007 (commencement of operations) through October 31, 2007 and the financial highlights for the period then ended and in our report dated December 14, 2007, we expressed an unqualified opinion on such statement of changes in net assets and financial highlights.

About Closed-End Funds

**What is a Closed-End Fund?**

A closed-end fund is a publicly traded investment company that raises its initial investment capital through the issuance of a fixed number of shares to investors in a public offering. Shares of a closed-end fund are listed on a stock exchange or traded in the over-the-counter market. Like all investment companies, a closed-end fund is professionally managed and offers investors a unique investment solution based on its investment objective approved by the fund's Board of Directors.

**Potential Advantages of Closed-End Fund Investing**

**Defined Asset Pool Allows Efficient Portfolio Management** Although closed-end fund shares trade actively on a securities exchange, this doesn't affect the closed-end fund manager because there are no new investors buying into or selling out of the fund's portfolio.

**More Flexibility in the Timing and Price of Trades** Investors can purchase and sell shares of closed-end funds throughout the trading day, just like the shares of other publicly traded securities.

**Closed-End Structure Makes Sense for Less-Liquid Asset Classes** A closed-end structure makes sense for investors considering less-liquid asset classes, such as high-yield bonds or micro-cap stocks.

**Ability to Put Leverage to Work** Closed-end funds may issue senior securities (such as preferred shares or debentures) or borrow money to leverage their investment positions.

**No Minimum Investment Requirements**

**OPEN-END MUTUAL FUNDS VERSUS CLOSED-END FUNDS**

**Open-End Fund**

Issues new shares on an ongoing basis

Issues equity shares

Sold at NAV plus any sales charge

Sold through the fund's distributor

Level Rate Distribution Policy

**Using a Level Rate Distribution Policy to Promote Dependable Income and Total Return**

The goal of the level rate distribution policy is to provide investors a predictable, though not assured, level of cash flow, which can either serve as a stable income stream or, through reinvestment, contribute significantly to long-term total return.

We understand the importance that investors place on the stability of dividends and their ability to contribute to long-term total return, which is why we have instituted a level rate distribution policy for the Fund. Under the policy, monthly distributions paid may include net investment income, net realized short-term capital gains and, if necessary, return of capital. In addition, a limited number of distributions per calendar year may include net realized long-term capital gains. There is no guarantee that the Fund will realize capital gains in any given year. Distributions are subject to re-characterization for tax purposes after the end of the fiscal year. All shareholders with taxable accounts will receive written notification regarding the components and tax treatment for distributions via Form 1099-DIV. Distributions from the Fund are generally subject to Federal income taxes. For purposes of maintaining the level rate distribution policy, the Fund may realize short-term capital gains on securities that, if sold at a later date, would have resulted in long-term capital gains. Maintenance of a level rate distribution policy may increase transaction and tax costs associated with the Fund.

Automatic Dividend Reinvestment Plan

**Maximizing Investment with an Automatic Dividend Reinvestment Plan**

The Automatic Dividend Reinvestment Plan offers a simple, cost-efficient and convenient way to reinvest your dividends and capital gains distributions in additional shares of the Fund, allowing you to increase your investment in the Fund.

Potential Benefits

**Compounded Growth:** By automatically reinvesting with the Plan, you gain the potential to allow your dividends and capital gains to compound over time.

**Potential for Lower Commission Costs:** Additional shares are purchased in large blocks, with brokerage commissions shared among all plan participants. There is no cost to enroll in the Plan.

**Convenience:** After enrollment, the Plan is automatic and includes detailed statements for participants. Participants can terminate their enrollment at any time.

For additional information about the Plan, please contact the Plan Agent, The Bank of New York, at 800.432.8224 or visit us on the web at [www.calamos.com/chw.aspx](http://www.calamos.com/chw.aspx). If you wish to participate in the Plan and your shares are held in your own name, simply call the Plan Agent. If your shares are not held in your name, please contact your brokerage firm, bank, or other nominee to request that they participate in the Plan on your behalf. If your brokerage firm, bank, or other nominee is unable to participate on your behalf, you may request that your shares be re-registered in your own name.

We're pleased to provide our shareholders with the additional benefit of the Fund's Dividend Reinvestment Plan and hope that it may serve your financial plan.

The Calamos Investments Advantage

Calamos history is one of performing well for our clients through nearly 30 years of advances and declines in the market. We use proprietary risk-management strategies designed to control volatility, and maintain a balance between risk and reward throughout a market cycle.

**Disciplined Investment Philosophy and Process**

Calamos Investments has developed a proprietary research and monitoring process that goes far beyond traditional security analysis. This process applies to each of our investment strategies, with emphasis varying by strategy. When combined with the company-specific research and industry insights of our investment team, the goal is nimble, dynamic management of a portfolio that allows us to anticipate and adapt to changing market conditions. In each of our investment strategies, from the most conservative to the most aggressive, our goals include maximizing return while controlling risk, protecting principal during volatile markets, avoiding short-term market timing, and maintaining a vigilant long-term outlook.

**Comprehensive Risk Management**

Our approach to risk management includes continual monitoring, adherence to our discipline, and a focus on assuring a consistent risk profile during all phases of the market cycle. Incorporating qualitative and quantitative factors as well as a strong sell discipline, this risk-control policy seeks to help preserve investors capital over the long term.

**Proven Investment Management Team**

The Calamos Family of Funds benefits from our team's decades of experience in the investment industry. We follow a one-team, one-process approach that leverages the expertise of more than 50 investment professionals, led by Co-Chief Investment Officers John P. Calamos, Sr. and Nick P. Calamos, whose investment industry experience dates back to 1970 and 1983, respectively. Through the collective industry experience and educational achievements of our research and portfolio staff, we can respond to the challenges of the market with innovative and timely ideas.

**Sound Proprietary Research**

Over the years, we have invested significant time and resources in developing and refining sophisticated analytical models that are the foundation of the firm's research capabilities, which we apply in conjunction with our assessment of broad themes. We believe evolving domestic policies, the growing global economy, and new technologies present long-term investment opportunities for those who can detect them.
