FOR THE NINE MONTHS ENDED
SEPTEMBER 30, 2002
(Dollar amounts in thousands, except per share data)
(unaudited)

1. Basis of Presentation

Overview

Renal Care Group, Inc. provides dialysis services to patients with chronic kidney failure, also known as end-stage renal disease (ESRD). As of September 30, 2002, the Company provided dialysis and ancillary services to nearly 20,000 patients through 260 outpatient dialysis centers in 26 states, in addition to providing acute dialysis services in more than 120 hospitals.

Renal Care Group's net revenue has been derived primarily from the following sources:

outpatient hemodialysis services;

ancillary services associated with dialysis, primarily the administration of erythropoietin (also known as Epogen® or EPO) and other drugs;

home dialysis services;

inpatient hemodialysis services provided to acute care hospitals and skilled nursing facilities;

laboratory services; and

management contracts with hospital-based and medical university dialysis programs.

Patients with end-stage renal disease typically receive three dialysis treatments each week, with reimbursement for services provided primarily by the Medicare ESRD program based on rates established by Congress or the Centers for Medicare & Medicaid Services (CMS). For the nine months ended September 30, 2002, approximately 58% of the Company's net revenue was derived from reimbursement under the Medicare and Medicaid programs. Medicare reimbursement is subject to rate and other legislative changes by Congress and periodic changes in regulations, including changes that may reduce payments under the ESRD program. Effective January 1, 2001, Congress increased the Medicare composite rate by 1.2%. An additional increase of 1.2% took effect April 1, 2001. The April 1, 2001 increase included an adjustment factor that made that 1.2% increase effective for all of 2001. Accordingly, the net result of the 1.2% increases on January 1, 2001 and April 1, 2001, plus the April adjustment factor, was an effective increase of 2.4% for calendar year 2001. Neither Congress nor CMS approved an increase in the composite rate for 2002. Although a Medicare spending bill has not been approved as of the date of this quarterly report, neither Congress nor CMS has approved an increase in the Medicare composite rate for 2003, and management believes that the likelihood that Congress or CMS will approve an increase in the dialysis composite rate for 2003 is no better than 50% as of the date of this quarterly report.

The Medicare composite rate applies to a designated group of outpatient dialysis services, including the dialysis treatment, supplies used for the treatment, certain laboratory tests and medications, and most of the home

Table of Contents

dialysis services provided by Renal Care Group. Certain other services, laboratory tests, and drugs are eligible for separate reimbursement under Medicare and are not part of the composite rate, including specific drugs such as EPO and some physician-ordered tests provided to dialysis patients.

For patients with private health insurance, dialysis is typically reimbursed at rates significantly higher than Medicare during the first 30 months of treatment. After that period Medicare becomes the primary payor. Reimbursement for dialysis services provided pursuant to a hospital contract is negotiated with the individual hospital and generally is higher than the Medicare composite rate on a per treatment equivalent basis. Because dialysis is a life-sustaining therapy to treat a chronic disease, utilization is predictable and is not subject to seasonal fluctuations.

Renal Care Group derives a significant portion of its net revenue and net income from the administration of EPO. EPO is manufactured by a single company, Amgen Inc. In April 2002, Amgen implemented its third EPO price increase of 3.9% in as many years. This increase will not affect Renal Care Group's results of operations in 2002 because Renal Care Group's contract with Amgen included price protection for all of 2002. The Company is currently engaged in negotiations with Amgen concerning its contract for 2003. Renal Care Group and Amgen have agreed in principle that the Company's current pricing formula will remain in effect for 2003. As a result, the Company believes, although it can give no assurances, that it will be able to mitigate a substantial portion of the 2002 price increase in 2003. This agreement in principle is conditioned on negotiating and finalizing a written amendment to the contract between the Company and Amgen.

Interim Financial Statements

In the opinion of management, the information contained in this quarterly report on Form 10-Q reflects all adjustments necessary to make the results of operations for the interim periods a fair representation of such operations. All such adjustments are of a normal recurring nature. Operating results for interim periods are not necessarily indicative of results that may be expected for the year as a whole. The Company suggests that persons read these financial statements in conjunction with the consolidated financial statements and the related notes thereto included in the Company's Form 10-K, as filed with the SEC on March 29, 2002.

2. Reclassifications

Certain prior period balances have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the results of operations as previously reported.

3. Goodwill and Intangible Assets

On January 1, 2002, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 142, *Goodwill and Other Intangible Assets*, which addresses the financial accounting and reporting standards for the acquisition of intangible assets and for goodwill and other intangible assets subsequent to the acquisition. This accounting standard requires that goodwill be disclosed separately from other intangible assets in the balance sheet and that goodwill no longer be amortized; instead, goodwill will be tested for impairment on a periodic basis. The provisions of this accounting standard required the Company to complete a transitional impairment test within six months of the Company's adoption of this standard, with any identified impairments treated as a cumulative effect of a change in accounting principle. The Company has completed its transitional impairment test, and it has identified no impairments.

Table of Contents

In accordance with SFAS No. 142, the Company discontinued the amortization of goodwill effective January 1, 2002. A reconciliation of previously reported net income and earnings per share to the pro forma amounts adjusted for the exclusion of goodwill amortization net of the related income tax effect follows:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2001	2002	2001	2002
Reported net income	\$ 19,897	\$ 23,430	\$ 55,971	\$ 67,565
Add: goodwill amortization, net of tax	1,031		2,925	
Pro forma adjusted net income	\$ 20,928	\$ 23,430	\$ 58,896	\$ 67,565
Reported basic earnings per share	\$ 0.41	\$ 0.48	\$ 1.17	\$ 1.37
Add: goodwill amortization, net of tax	0.02		0.06	
Pro forma adjusted basic earnings per share	\$ 0.43	\$ 0.48	\$ 1.23	\$ 1.37
Reported diluted earnings per share	\$ 0.39	\$ 0.46	\$ 1.12	\$ 1.32
Add: goodwill amortization, net of tax	0.02		0.05	
Pro forma adjusted diluted earnings per share	\$ 0.41	\$ 0.46	\$ 1.17	\$ 1.32

Changes in the carrying amount of goodwill for the nine months ended September 30, 2002, are as follows:

Balance as of December 31, 2001	\$ 243,530
Goodwill acquired during the period	19,268
Balance as of September 30, 2002	\$ 262,798

The Company's separately identifiable intangible assets, which consist of noncompete agreements and acute dialysis services agreements, are as follows:

	December 31, 2001	September 30, 2002
Carrying amount	\$ 16,090	\$ 18,757
Accumulated amortization	(5,725)	(7,066)
Net	\$ 10,365	\$ 11,691

Separately identifiable intangible assets are being amortized over their useful lives, ranging from four to ten years. Amortization expense for the nine months ended September 30, 2002 was approximately \$1,341. Estimated amortization expense for each of the five succeeding fiscal years is as follows:

Edgar Filing: RENAL CARE GROUP INC - Form 10-Q

Year ending December 31,	Amount
2002	\$ 2,010
2003	2,139
2004	2,139
2005	2,122
2006	2,067

Table of Contents**4. Earnings Per Share (in thousands, except per share data)**

The following table sets forth the computation of basic and diluted income per share:

	<u> </u>	<u> </u>	<u> </u>	<u> </u>

5. Contingencies

On August 30, 2000, 19 patients were hospitalized and one patient died shortly after becoming ill while receiving treatment at one of the Company's dialysis centers in Youngstown, Ohio. One of the 19 hospitalized patients also died some time later. In March 2001, the Company was sued in Mahoning County, Ohio by one of the affected patients for injuries related to the August 30, 2000 illnesses. Additional suits have been filed, and, as of September 30, 2002, a total of 11 suits were pending. The suits allege negligence, medical malpractice and product liability. Additional defendants are named in each of the suits. Additional defendants in some of the suits include the water system vendors that installed and maintained the water system in the dialysis center. Renal Care Group has denied the allegations and has filed cross-claims against the water system vendors. Renal Care Group intends to pursue these cross-claims vigorously. Management believes that Renal Care Group's insurance should be adequate to cover these illnesses and does not anticipate a material adverse effect on the Company's consolidated financial position or results of operation.

On December 12, 2000, the Company reached an agreement in principle with the U.S. Attorney for the Southern District of Mississippi to settle claims arising out of alleged inadequacies in physician documentation related to lab tests performed by its laboratory subsidiary, RenaLab, Inc. The terms of such agreement provided that the Company pay \$1,980 to the Medicare program. This amount was recorded during the fourth quarter of 2000 and was paid in January 2002, when the Company and the government finalized the terms of a corporate integrity agreement.

The Company is involved in other litigation and regulatory investigations arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, these matters will be resolved without material adverse effect on the Company's consolidated financial position or results of operations.

Table of Contents

The Company generally engages practicing board-certified or board-eligible nephrologists to serve as medical directors for its centers. Medical directors are responsible for the administration and monitoring of the Company's patient care policies, including patient education, administration of dialysis treatment, development programs and assessment of all patients. The Company pays medical director fees that are consistent with the fair market value of the required supervisory services. Such medical director agreements typically have a term of seven years with a three-year renewal option.

6. Recent Accounting Pronouncements

On June 30, 2001, the Company adopted SFAS No. 141, *Business Combinations*, which eliminated the pooling-of-interests method of accounting for all business combinations initiated after June 30, 2001 and addressed the initial recognition and measurement of goodwill and other intangible assets acquired in a business combination.

As discussed in detail in Note 3, the Company adopted SFAS No. 142 on January 1, 2002.

Effective January 1, 2002, the Company adopted SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which addresses the accounting and reporting for the impairment or disposal of long-lived assets. SFAS No. 144 did not have an effect on the Company's results of operations in the nine months ended September 30, 2002.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

Results of Operations

Three Months Ended September 30, 2001 Compared to Three Months Ended September 30, 2002

Net Revenue. Net revenue increased from \$193.1 million for the three months ended September 30, 2001 to \$231.5 million for the three months ended September 30, 2002, an increase of \$38.4 million, or 19.9%. This increase resulted primarily from a 14.5% increase in the number of treatments performed by Renal Care Group from approximately 675,000 in the 2001 period to approximately 773,000 in the 2002 period. This growth in treatments is the result of the acquisition and development of various dialysis facilities and a 5.9% increase in same-market treatments for 2002 over 2001. In addition, average net revenue per dialysis treatment increased 5.7% from \$282 in 2001 to \$298 in 2002. The increase in revenue per treatment was largely due to a rate increase to private payors that Renal Care Group implemented in the fourth quarter of 2001 and an increase in utilization of certain ancillary drugs.

For convenience, the Company has historically referred to internal growth in its existing markets, as opposed to growth through acquisition or development activities in new markets, as same-center growth. This same-center growth has included increases in the number of new patients in existing dialysis centers as well as net new patients added when the Company opened a new dialysis center in an existing market. To describe this internal market growth more accurately, Renal Care Group will now use the term same-market growth instead of same-center growth.

Patient Care Costs. Patient care costs consist of costs directly related to the care of patients, including direct labor, drugs and other medical supplies, and operational costs of facilities. Patient care costs increased from \$125.0 million for the three months ended September 30, 2001, to \$151.7 million for the three months ended September 30, 2002, an increase of 21.4%. This increase was due principally to the increase in the number of treatments performed during the period, which was reflected in corresponding increases in the use of labor, drugs and supplies. Patient care costs as a percentage of net revenue increased from 64.7% in the 2001 period to 65.5% in the 2002 period. Patient care costs per treatment increased 5.9% from \$185 in the 2001 period to \$196 in the 2002 period. These increases were due to increases in the price of EPO, increased labor costs to address wage pressures in many of the Company's markets, increases in the cost of insurance, the increase in utilization of certain ancillary drugs and the increased cost of the drug Heparin following a recall by its manufacturer. Management believes that the Company will continue to face increases in the cost of EPO, insurance and labor in the remainder of 2002 and throughout 2003. Management believes that the cost of the drug Heparin will return to historic levels over the next two quarters as production of the drug returns to normal levels.

General and Administrative Expenses. General and administrative expenses include corporate office costs and facility costs not directly related to the care of patients, including facility administration, accounting, billing and information systems. General and administrative expenses increased from \$16.4 million for the three months ended September 30, 2001 to \$19.7 million for the three months ended September 30, 2002, an increase of 19.8%. General and administrative expenses as a percentage of net revenue remained consistent at 8.5% in the 2001 and 2002 periods.

Provision for Doubtful Accounts. The provision for doubtful accounts is determined as a function of payor mix, billing practices, and other factors. Renal Care Group reserves for doubtful accounts in the period in which the revenue is recognized based on management's estimate of the net collectibility of the accounts receivable. Management estimates the net collectibility of accounts receivable based upon a variety of factors. These factors

Table of Contents

include, but are not limited to, analyzing revenues generated from payor sources, performing subsequent collection testing and regularly reviewing detailed accounts receivable agings. Based on the results of management's estimated net collectibility of accounts receivable adjustments to the allowance for doubtful accounts are recorded as necessary. The provision for doubtful accounts increased from \$5.2 million for the three months ended September 30, 2001 to \$6.0 million for the three months ended September 30, 2002, an increase of approximately \$793,000, or 15.2%. The provision for doubtful accounts as a percentage of net revenue decreased slightly from 2.7% in 2001 to 2.6 % in 2002.

Depreciation and Amortization. Depreciation and amortization increased from \$10.0 million for the three months ended September 30, 2001 to \$10.4 million for the three months ended September 30, 2002, an increase of 4.1%. This increase was due to the start-up of dialysis facilities, the normal replacement costs of dialysis facilities and equipment, the purchase of information systems, and the amortization of separately identifiable intangible assets associated with acquisitions. Depreciation and amortization as a percentage of net revenue decreased from 5.2% in the 2001 period to 4.5% in the 2002 period, primarily as a result of the implementation of SFAS No. 142, under which the Company stopped amortizing goodwill effective January 1, 2002.

Income from Operations. Income from operations increased from \$36.5 million for the three months ended September 30, 2001 to \$43.7 million for the three months ended September 30, 2002, an increase of 19.8%. Income from operations as a percentage of net revenue remained consistent at 18.9% in the 2001 and 2002 periods.

Interest Expense, Net. Interest expense increased from approximately \$198,000 for the three months ended September 30, 2001 to approximately \$569,000 for the three months ended September 30, 2002, an increase of 187.4%. This increase was principally the result of expensing some loan origination costs associated with the Company's line of credit, which was substantially amended in the quarter, and borrowings made and repaid during the three months ended September 30, 2002 to fund repurchases of Company common stock.

Minority Interest. Minority interest represents the proportionate equity interest of other partners in the Company's consolidated entities that are not wholly-owned. Minority interest as a percentage of net revenue increased to 2.3% in the 2002 period from 2.1% in the 2001 period. This increase was the result of continued operational improvements in Renal Care Group's joint ventures, primarily those in Ohio, Oregon and Washington, as well as an increase in the number of facilities operated as joint ventures.

Provision for Income Taxes. Income tax expense increased from \$12.3 million for the three months ended September 30, 2001 to \$14.4 million for the three months ended September 30, 2002, an increase of \$2.1 million or 16.9%. The increase is a result of pre-tax earnings increasing by approximately 17.4%. The effective tax rate of the Company decreased slightly from 38.2% in the 2001 period to 38.0% in the 2002 period. This decrease was primarily the result of the implementation of SFAS No. 142.

Net Income. Net income increased from \$19.9 million for the three months ended September 30, 2001 to \$23.4 million for the three months ended September 30, 2002, an increase of \$3.5 million or 17.8%. The increase is a result of the items discussed above.

Results of Operations

Nine months Ended September 30, 2001 Compared to Nine months Ended September 30, 2002

Net revenue. Net revenue increased from \$551.4 million for the nine months ended September 30, 2001 to \$660.4 million for the nine months ended September 30, 2002, an increase of \$109.0 million, or 19.8%. This increase resulted primarily from a 12.7% increase in the number of treatments from approximately 2.0 million in the 2001 period to approximately 2.2 million in the 2002 period. This growth in treatments is the result of the

Table of Contents

acquisition and development of various dialysis facilities and a 5.8% increase in same-market treatments for the 2001 period over the 2002 period. In addition, average net revenue per dialysis treatment increased 6.9% from \$275 in the 2001 period to \$294 in the 2002 period. The increase in revenue per treatment was due in part to the implementation of the 2001 Medicare composite rate increase and an increase in the utilization of certain ancillary drugs. Renal Care Group also implemented a rate increase to private payors in the fourth quarter of 2001.

Patient Care Costs. Patient care costs consist of costs directly related to the care of patients, including direct labor, drugs and other medical supplies, and operational costs of facilities. Patient care costs increased from \$357.2 million for the nine months ended September 30, 2001, to \$432.2 million for the nine months ended September 30, 2002, an increase of 21.0%. This increase was due principally to the increase in the number of treatments performed during the period, which was reflected in corresponding increases in the use of labor, drugs and supplies. Patient care costs as a percentage of net revenue increased from 64.8% in the 2001 period to 65.4% in the 2002 period. Patient care costs per treatment increased 7.2% from \$181 in the 2001 period to \$194 in the 2002 period. These increases were due to the 2001 EPO price increase, increased labor costs to address wage pressures in many of the Company's markets, increases in the cost of insurance, the increase in utilization of certain ancillary drugs and the increased cost of the drug Heparin following a recall by its manufacturer. Management believes that the Company will continue to face increases in the cost of EPO, insurance and labor in the remainder of 2002 and throughout 2003. Management believes that the cost of the drug Heparin will return to historic levels over the next two quarters as production of the drug returns to normal levels.

General and Administrative Expenses. General and administrative expenses include corporate office costs and facility costs not directly related to the care of patients, including facility administration, accounting, billing and information systems. General and administrative expenses increased from \$47.2 million for the nine months ended September 30, 2001 to \$56.0 million for the nine months ended September 30, 2002, an increase of 18.7%. General and administrative expenses as a percentage of revenue decreased slightly from 8.6% in the 2001 period to 8.5% in the 2002 period.

Provision for Doubtful Accounts. The provision for doubtful accounts is determined as a function of payor mix, billing practices, and other factors. Renal Care Group reserves for doubtful accounts in the period in which the revenue is recognized based on management's estimate of the net collectibility of the accounts receivable. Management estimates the net collectibility of accounts receivable based upon a variety of factors. These factors include, but are not limited to, analyzing revenues generated from payor sources, performing subsequent collection testing and regularly reviewing detailed accounts receivable agings. The provision for doubtful accounts increased from \$14.9 million for the nine months ended September 30, 2001 to \$17.2 million for the nine months ended September 30, 2002, an increase of \$2.3 million, or 15.7%. The provision for doubtful accounts as a percentage of net revenue decreased slightly from 2.7% in the 2001 period to 2.6% in the 2002 period.

Depreciation and Amortization. Depreciation and amortization increased from \$28.1 million for the nine months ended September 30, 2001 to \$29.7 million for the nine months ended September 30, 2002, an increase of \$1.6 million, or 5.6%. This increase was due to the start-up of dialysis facilities, the normal replacement costs of dialysis facilities and equipment, the purchase of information systems, and the amortization of separately identifiable intangible assets associated with acquisitions. Depreciation and amortization as a percentage of net revenue decreased from 5.1% in the 2001 period to 4.5% in the 2002 period, primarily as a result of the implementation of SFAS No. 142, under which the Company stopped amortizing goodwill effective January 1, 2002.

Income from Operations. Income from operations increased from \$104.0 million for the nine months ended September 30, 2001 to \$125.2 million for the nine months ended September 30, 2002, an increase of \$21.3

Table of Contents

million, or 20.4%. Income from operations as a percentage of net revenue increased slightly from 18.9% in the 2001 period to 19.0% in the 2002 period as a result of the factors discussed above.

Interest Expense, Net. Interest expense decreased from \$2.5 million for the nine months ended September 30, 2001 to approximately \$880,000 for the nine months ended September 30, 2002. The decrease was the result of lower average borrowings during 2002. The Company had generally retired all debt outstanding under its credit facilities, and has recognized interest expense in 2002 primarily on short-term borrowings to fund repurchases of Renal Care Group common stock, capital leases and equipment notes payable, commitment fees and amortization of debt issuance costs. In addition, in 2002 the Company expensed some loan origination costs associated with its line of credit, which was substantially amended in the quarter ended September 30, 2002.

Minority Interest. Minority interest represents the proportionate equity interest of other partners in the Company's consolidated subsidiaries that are not wholly-owned. Minority interest as a percentage of net revenue increased to 2.3% in 2002 from 2.0% in 2001. This increase was the result of the continued operational improvements in Renal Care Group's joint ventures, primarily those in Ohio, Washington and Oregon, as well as an increase in the number of facilities operated as joint ventures.

Provision for Income Taxes. Income tax expense increased from \$34.6 million for the nine months ended September 30, 2001 to \$41.4 million for the nine months ended September 30, 2002, an increase of \$6.8 million or 19.7%. The increase is a result of pre-tax earnings increasing \$18.4 million, representing an increase of 20.3% over the 2001 period.

Net Income. Net income increased from \$56.0 million for the nine months ended September 30, 2001 to \$67.6 million for the nine months ended September 30, 2002, an increase of \$11.6 million or 20.7%. The increase is a result of the items discussed above.

Liquidity and Capital Resources

Renal Care Group requires capital primarily to acquire and develop dialysis centers, to purchase property and equipment for existing centers, to repurchase shares of its common stock and to finance working capital needs. At September 30, 2002, the Company's working capital was \$103.8 million, cash and cash equivalents were \$39.8 million, and the Company's current ratio was approximately 1.8 to 1.

Net cash provided by operating activities was \$127.4 million for the nine months ended September 30, 2002. Cash provided by operating activities consists of net income before depreciation and amortization expense, adjusted for changes in components of working capital, primarily accounts receivable. Net cash used in investing activities was \$70.2 million for the nine months ended September 30, 2002. Cash used in investing activities consisted primarily of \$49.4 million of purchases of property and equipment and \$19.9 million of cash paid for acquisitions, net of cash acquired. Net cash used in financing activities was approximately \$44.8 million for the nine months ended September 30, 2002. Cash used in financing activities primarily reflects repurchases of Renal Care Group common stock of \$62.7 million offset by a \$2.9 million investment by a joint venture partner and \$16.5 million in net proceeds from the issuance of common stock as stock options were exercised.

Effective July 1, 2002, Renal Care Group entered into two credit agreements with a group of banks totaling \$150.0 million consisting of a \$100.0 million Second Amended and Restated Loan Agreement (the "Multi-Year Facility") and a \$50.0 Loan Agreement (the "364-day Facility"). The Multi-Year Facility has a final maturity of July 1, 2005 and the 364-day Facility has a final maturity of June 30, 2003. The Multi-Year Facility replaced the Company's First Amended and Restated Loan Agreement. Borrowings under the credit agreements may be used for

Table of Contents

acquisitions, capital expenditures, working capital and general corporate purposes. No more than \$25.0 million of either credit agreement may be used for any single acquisition without the consent of the lenders. Under the Multi-Year Facility, the Company may borrow up to \$10.0 million in swingline loans for working capital purposes. These variable rate debt instruments carry a degree of interest rate risk. Specifically, variable rate debt may result in higher costs to the Company if interest rates rise.

Each of Renal Care Group's wholly-owned subsidiaries has guaranteed all of Renal Care Group's obligations under the loan agreements. Further, Renal Care Group's obligations under the loan agreement, and the obligations of each of its subsidiaries under its guaranty, are secured by a pledge of the equity interests held by Renal Care Group in each of the subsidiaries. Financial covenants are customary based on the amount and duration of this commitment.

A significant component of Renal Care Group's growth strategy is the acquisition and development of dialysis facilities. There can be no assurance that Renal Care Group will be able to identify suitable acquisition candidates or to close acquisition transactions with them on acceptable terms. Management believes that existing cash and funds from operations, together with funds available under existing credit facilities, will be sufficient to meet Renal Care Group's acquisition, expansion, capital expenditure and working capital needs for the foreseeable future. However, in order to finance certain large strategic acquisition opportunities, Renal Care Group may need to incur additional short and long-term bank indebtedness or to issue equity or debt securities. The availability and terms of any future financing will depend on market and other conditions. There can be no assurance that any additional financing, if required, will be available on terms acceptable to Renal Care Group.

Capital expenditures of approximately \$65.0 million, primarily for equipment replacement, expansion of existing dialysis facilities and construction of de novo facilities, are planned in 2002. The Company has made capital expenditures of approximately \$49.4 million through September 30, 2002. The Company expects that remaining capital expenditures in 2002 will be funded with cash provided by operating activities and the Company's existing credit facilities. Management believes that capital resources available to Renal Care Group will be sufficient to meet the needs of its business, both on a short- and long-term basis.

Management, from time to time, determines the appropriateness of repurchasing its common stock in accordance with a repurchase plan initially authorized by the Board of Directors in October 2000. In the fourth quarter of 2001, Renal Care Group began repurchasing shares of its common stock by purchasing 100,000 shares of common stock for approximately \$3.1 million. In the first and second quarters of 2002, Renal Care Group repurchased 700,000 shares of common stock for approximately \$22.2 million. In July 2002, the Company announced that its Board of Directors had approved an increase in the repurchase plan from \$50.0 million to \$100.0 million. In the third quarter of 2002, the Company repurchased 1.3 million shares of common stock for approximately \$40.4 million. Subsequent to September 30, 2002 and through November 8, 2002, therefore, the Company repurchased an additional 354,000 shares of common stock for approximately \$11.4 million. Through November 8, 2002, the Company had repurchased an aggregate of 2,454,000 shares under the plan, for a total of approximately \$77.1 million. Management expects to continue to repurchase additional shares of common stock during the remainder of 2002, possibly using all of the remaining amount approved by the Board of Directors by the end of the year.

Critical Accounting Policies

On December 12, 2001, the Securities and Exchange Commission issued a financial reporting release, FR-60, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies*. In accordance with FR-60, management has identified accounting policies that it considers critical to the business of Renal Care Group. Those policies include net revenue and contractual provisions, provision for doubtful accounts, self-insurance

Table of Contents

accruals, and impairment of long-lived assets and long-lived assets to be disposed of. These policies were identified as critical based on their importance to the consolidated financial statements as well as on the degree of subjectivity and complexity involved in these policies. There have been no changes in Renal Care Group's critical accounting policies or in the application of those policies from those described in the annual report on Form 10-K, as filed with the SEC on March 29, 2002.

RISK FACTORS

You should carefully consider the risks described below before investing in Renal Care Group. The risks and uncertainties described below are not the only ones facing Renal Care Group. Other risks and uncertainties that we have not predicted or assessed may also adversely affect our company.

If any of the following risks occur, our earnings, financial condition or business could be materially harmed, and the trading price of our common stock could decline, resulting in the loss of all or part of your investment.

If Congress or CMS Changes the Medicare or Medicaid Programs for Dialysis, Then Our Revenue and Earnings Could Decrease

If the government changes the Medicare, Medicaid or similar government programs or the rates paid by those programs for our services, then our revenue and earnings may decline. We estimate that approximately 53% of our net revenue for 2000, 49% of our net revenue for 2001 and 51% of our net revenue for the nine months ended September 30, 2002 consisted of reimbursements from Medicare, including the administration of EPO to treat anemia. We also estimate that approximately 5% of our net revenue for 2000, 6% of our net revenue for 2001 and 7% of our net revenue for the nine months ended September 30, 2002 consisted of reimbursements from Medicaid or comparable state programs. Any of the following actions in connection with government programs could cause our revenue and earnings to decline:

a reduction of the amount paid to us under government programs;

an increase in the costs associated with performing our services that are subject to inflation, such as labor and supply costs, without a corresponding increase in reimbursement rates;

the inclusion of some or all ancillary services, for which we are now reimbursed separately, in the flat composite rate for a standard dialysis treatment; or

changes in laws, or the interpretations of laws, which could cause us to modify our operations.

Specifically, Congress and the Centers for Medicare & Medicaid Services, or CMS, have proposed reviewing and potentially recalculating the average wholesale prices of certain drugs, including some drugs for which we bill outside of the flat composite rate. CMS has indicated that it believes the average wholesale prices on which it currently bases reimbursement are too high and that Medicare reimbursement for these drugs is, therefore, too high. Because we are unable to predict accurately whether reimbursement will be changed and, if so, by how much, we are unable to quantify what the net effect of changes in reimbursement for these drugs would have on our revenue and earnings.

Table of Contents

In addition, the Medicaid programs in some of the states in which we operate reimburse us at rates higher than those paid by Medicare. Some of these state programs have approved reductions in reimbursement, proposed reductions or have announced that they are considering reductions. Any action to reduce those higher Medicaid reimbursement rates would adversely affect our revenue and earnings.

If Reimbursement for Epogen Decreases, Then We Could Be Less Profitable

If government or private payors decrease reimbursement rates for EPO, for which we are currently reimbursed separately outside of the flat composite rate, our revenue and earnings will decline. EPO is a bio-engineered hormone that is used to treat anemia. Revenues from the administration of EPO were approximately 26% of our net revenue for 2000, 25% of our net revenue for 2001 and 23% of our net revenue for the nine months ended September 30, 2002. Most of our payments for EPO come from government programs. For the nine months ended September 30, 2002, Medicare and Medicaid reimbursement represented approximately 58% of the total revenue we derived from EPO. A reduction in the reimbursement rate for EPO could materially and adversely affect our revenue and earnings.

If Amgen Raises the Price for EPO or if EPO Becomes in Short Supply, Then We Could Be Less Profitable

EPO is produced by a single manufacturer, Amgen Inc., and there are no substitute products currently marketed to dialysis providers in the United States. In April 2002, Amgen announced a 3.9% increase in the price of EPO. This price increase will not affect our earnings in 2002 because our contract with Amgen has pricing protection through 2002. In addition, Amgen implemented a 3.9% increase in the price of EPO in May 2001. That price increase will adversely affect our earnings in 2002. If Amgen imposes additional EPO price increases or if Amgen or other factors interrupt the supply of EPO, then our revenue and earnings will decline.

If Amgen Markets Aranesp® for ESRD Patients, Then We Could Be Less Profitable

Amgen has developed and obtained FDA approval for a new drug to treat anemia marketed as Aranesp® (darbepoetin alfa). Aranesp® is a longer acting form of bio-engineered protein that, like EPO, can be used to treat anemia. EPO is usually administered in conjunction with each dialysis treatment. Aranesp® can remain effective for between two and three weeks. If Amgen markets Aranesp® for the treatment of dialysis patients, then our earnings could be materially and adversely affected by either of the following factors:

our margins realized from the administration of Aranesp® could be lower than the margins realized on the administration of EPO; or

physicians could decide to administer Aranesp® in their offices, and we would not recognize revenue or profit from the administration of EPO or Aranesp®.

If Payments by Private Insurers, Hospitals or Managed Care Organizations Decrease, Then Our Revenue and Earnings Could Decrease

If private insurers, hospitals or managed care organizations reduce their rates or if we experience a significant shift in our revenue mix toward additional Medicare or Medicaid reimbursement, then our revenue and earnings will decline. We estimate that approximately 42% of our net revenue for 2000, 45% of our net revenue for 2001 and 42% of our net revenue for the nine months ended September 30, 2002 were derived from sources other than Medicare and Medicaid. In general, payments we receive from private insurers and hospitals for our services

Table of Contents

are at rates significantly higher than the Medicare or Medicaid rates. Additionally, payments we receive from managed care organizations are at rates higher than Medicare and Medicaid rates but lower than those paid by private insurers. As a result, any of the following events could have a material adverse effect on our revenue and earnings:

any number of economic or demographic factors could cause private insurers, hospitals or managed care companies to reduce the rates they pay us;

a portion of our business that is currently reimbursed by private insurers or hospitals may become reimbursed by managed care organizations, which generally have lower rates for our services; or

the scope of coverage by Medicare or Medicaid under the flat composite rate could expand and, as a result, reduce the extent of our services being reimbursed at the higher private-insurance rates.

If Our Referring Physicians Stop Referring To Our Centers or Were Prohibited From Referring for Regulatory Reasons, Then Our Revenue and Earnings Would Decline

Our dialysis centers depend on referrals from local nephrologists. Typically, one or a few physicians' patients make up all or a significant portion of the patient base at each of our dialysis centers, and the loss of the patient base of one or more referring physicians could have a material adverse effect on the operations of that center. The loss of the patient base of a significant number of referring physicians could cause our revenue and earnings to decline. In many instances, the primary referral sources for our centers are physicians who also serve as medical directors of our centers and may be shareholders. If the medical director relationship or stock ownership were deemed to violate applicable federal or state law, including fraud and abuse laws and laws prohibiting self-referrals, then the physicians acting as medical directors or owning our stock could be forced to stop referring patients to our centers. Further, we may not be able to renew or renegotiate our medical director agreements successfully, which could result in a loss of patients since dialysis patients are typically treated at a center where their physician or a member of his or her practice group serves as a medical director.

If Our Business Is Alleged or Found To Violate Health Care or Other Applicable Laws, Then Our Revenue and Earnings Could Decrease

We are subject to extensive federal, state and local regulation regarding the following:

fraud and abuse prohibitions under health care reimbursement laws;

prohibitions and limitations on patient referrals;

billing and reimbursement, including false claims prohibitions under health care reimbursement laws;

collection, use, storage and disclosure of patient health information, including the federal Health Insurance Portability and Accountability Act of 1996, referred to as HIPAA, and state law equivalents of HIPAA;

facility licensure;

Table of Contents

health and safety requirements;

environmental compliance; and

medical and toxic waste disposal.

Much of this regulation, particularly in the areas of fraud and abuse and patient referral, is complex and open to differing interpretations. Due to the broad application of the statutory provisions and the absence in many instances of regulations or court decisions addressing the specific arrangements by which we conduct our business, including our arrangements with medical directors, physician stockholders and physician joint venture partners, governmental agencies could challenge some of our practices under these laws.

New regulations governing electronic transactions and the collection, use, storage, and disclosure of health information impose significant administrative and financial obligations on our business. If, after the required compliance date, we are found to have violated these restrictions, we could be subject to:

criminal or civil penalties;

claims by persons who believe their health information has been improperly used or disclosed; and

administrative penalties by payors.

Government investigations of health care providers, including dialysis providers, have continued to increase. We have been the subject of investigations in the past, and the government may investigate our business in the future. One of our competitors, DaVita, Inc., has announced that it is the subject of an investigation by the U.S. Attorney for the Eastern District of Pennsylvania, and another competitor, Gambro Healthcare, Inc., has announced that it is the subject of an investigation by the U.S. Attorney's Office in St. Louis, Missouri. If any of our operations are found to violate applicable laws, we may be subject to severe sanctions or be required to alter or discontinue the challenged conduct or both. If we are required to alter our practices, we may not be able to do so successfully. If any of these events occurs, our revenue and earnings could decline.

Changes In the Health Care Delivery, Financing or Reimbursement Systems Could Adversely Affect Our Business

The health care industry in the United States remains in a period of change and uncertainty. Health care organizations, public or private, may dramatically change the way they operate and pay for services. Our business is designed to function within the current health care financing and reimbursement system. During the past several years, the health care industry has been subject to increasing levels of government regulation of, among other things, reimbursement rates and capital expenditures. In addition, proposals to reform the health care system have been considered by Congress. These proposals, if enacted, could further increase government regulation of or other involvement in health care, lower reimbursement rates and otherwise change the operating environment for health care companies. We cannot predict the likelihood of those events or what impact they may have on our business.

Table of Contents

The Dialysis Business Is Highly Competitive. If We Do Not Compete Effectively in Our Markets, Then We Could Lose Market Share and Our Rate of Growth Could Slow

The dialysis industry is largely consolidated, and the consolidation trend continues as large providers acquire smaller providers. There is a small number of large dialysis companies that compete for the acquisition of outpatient dialysis centers and the development of relationships with referring physicians. Two of our major competitors are part of larger companies that also manufacture dialysis equipment, which allows them to benefit from lower equipment costs. Several of our competitors, including these equipment manufacturers, are significantly larger than we are and have greater financial resources and more established operations. We cannot assure you that we will be able to compete effectively with any of our competitors.

If We Lose Any of Our Executive Officers, or Are Unable To Attract and Retain Qualified Nurses and Medical Directors, Then Our Ability To Run Our Business Could Be Adversely Affected, and Our Revenue and Earnings Could Decline

We depend on the services of our executive officers Sam A. Brooks, Jr., our Chairman, Chief Executive Officer and President, Raymond Hakim, M.D., Ph.D., R. Dirk Allison and Gary Brukardt, each an Executive Vice President. Mr. Brooks, Dr. Hakim and Mr. Brukardt have each been with Renal Care Group since its formation. The services of Mr. Brooks and these three Executive Vice Presidents would be very difficult to replace. We do not carry key-man life insurance on any of our officers. Further, our growth will depend in part upon our ability to attract and retain skilled nurses to provide services in our facilities, for whom competition is intense. We also believe that our future success will depend on our ability to attract and retain qualified physicians to serve as medical directors of our dialysis centers.

If We are Unable to Make Acquisitions in the Future, Then Our Rate of Growth Will Slow

Much of our historical growth has come from acquisitions. Although we intend to continue to pursue growth through the acquisition of dialysis centers, we may be unable to continue to identify and complete suitable acquisitions at prices we are willing to pay or we may be unable to obtain the necessary financing. Further, due to the increased size of our Company since its formation, the amount that most acquired businesses contribute to our revenue and profits will continue to be smaller on a percentage basis. Also, as a result of consolidation in the dialysis industry, the four largest providers of outpatient dialysis services own approximately 65% of the total number of outpatient dialysis facilities in the United States. We compete with these other companies to identify and complete suitable acquisitions. We expect this competition to intensify in light of the smaller pool of available acquisition candidates and other market forces. As a result, we believe it will be more difficult for us to acquire suitable companies on favorable terms. Further, the businesses we acquire may not perform well enough to justify our investment. If we are unable to make additional acquisitions on suitable terms, then we may not meet our growth expectations.

If We Complete Future Acquisitions, We May Dilute Existing Stockholders by Issuing More of Our Common Stock or We May Incur Expenses Related to Debt and Goodwill, Which Could Reduce Our Earnings

We may issue equity securities in future acquisitions that could be dilutive to our shareholders. We also may incur additional debt in future acquisitions. Interest expense on additional debt incurred to fund our acquisitions may significantly reduce our profitability. On June 29, 2001, the Financial Accounting Standards Board approved rules that eliminate the pooling-of-interests accounting method. The elimination of the pooling-of-interests method results in recording goodwill for all acquisitions after June 30, 2001. Under these new rules

Table of Contents

goodwill and other intangible assets with indefinite lives are not amortized to expense; however, we are required to review all of these assets at regular intervals for impairment and to charge an appropriate amount to expense when impairment is identified. If impairment is identified and we are required to write off a significant portion of our intangible assets at one time, then there could be a material adverse impact on our stock price.

If We Fail to Integrate Acquired Companies, Then We Will Be Less Profitable

We have grown significantly by acquisitions of other dialysis providers since our formation in February 1996. We have completed some of our acquisitions as recently as June 2002. We intend to pursue acquisitions of more dialysis businesses in the future. We are unable to predict the number and size of any future acquisitions. We face significant challenges in integrating an acquired company's management and other personnel, clinical operations, and financial and operating systems with ours, often without the benefit of continued services from key personnel of the acquired company. We may be unable to integrate the businesses we acquire successfully or to achieve anticipated benefits from an acquisition in a timely manner, which could lead to substantial costs and delays or other operational, technical or financial problems, including diverting management's attention from our existing business. Any of these results could damage our profitability and our prospects for future growth.

If Acquired Businesses Have Unknown Liabilities, Then We Could Be Exposed to Liabilities That Could Harm Our Business and Profitability

Businesses we acquire may have unknown or contingent liabilities, including liabilities for failure to comply with health care laws. Although we generally attempt to identify practices that may give rise to unknown or contingent liabilities and conform them to our standards after the acquisition, private plaintiffs or governmental agencies may still assert claims. Even though we generally seek to obtain indemnification from the sellers of businesses we buy, unknown and contingent liabilities may not be covered by indemnification or may exceed contractual limits or the financial capacity of the indemnifying party.

If Our Costs of Insurance and Claims Increase, Then Our Earnings Could Decrease

Renal Care Group currently maintains a program of general and professional liability insurance as well as directors' and officers' insurance with significant deductible amounts on each claim. We have accepted higher deductibles in each of the last several years to offset in part increases in premiums for the program. However, the deductibles and premiums increased substantially in 2002, and management believes they are likely to increase again in 2003. Our earnings could be materially and adversely affected by any of the following:

further increases in premiums and deductibles;

increases in the number of liability claims against us or the cost of settling or trying cases related to those claims; and

an inability to obtain one or more types of insurance on acceptable terms.

Table of Contents

If Our Board of Directors Does Not Approve an Acquisition or Change in Control of Renal Care Group, Then Our Shareholders May Not Realize the Full Value of Their Stock

Our certificate of incorporation and bylaws contain a number of provisions that may delay, deter or inhibit a future acquisition or change in control of Renal Care Group that is not first approved by our board of directors. This could occur even if our shareholders receive an attractive offer for their shares or if a substantial number or even a majority of our shareholders believe the takeover may be in their best interest. These provisions are intended to encourage any person interested in acquiring Renal Care Group to negotiate with and obtain approval from our board of directors prior to pursuing the transaction. Provisions that could delay, deter or inhibit a future acquisition or change in control of Renal Care Group include the following:

a staggered board of directors that would require two annual meetings to replace a majority of the board of directors;

restrictions on calling special meetings at which an acquisition or change in control might be brought to a vote of the shareholders;

blank check preferred stock that may be issued by our board of directors without shareholder approval and that may be substantially dilutive or contain preferences or rights objectionable to an acquiror; and

a poison pill that would substantially dilute the interest sought by an acquiror.

These provisions could also discourage bids for our common stock at a premium and cause the market price of our common stock to decline.

Our Stock Price Is Volatile and, as a Result, the Value of Your Investment May Go Down for Reasons Unrelated To the Performance of Our Business

Our common stock is traded on the New York Stock Exchange. The market price of our common stock has been volatile, ranging from a low of \$27.72 per share to a high of \$33.65 per share during the three months ended September 30, 2002. The market price for our common stock could fluctuate substantially based on a variety of factors, including the following:

future announcements concerning us, our competitors or the health care market;

the threat of litigation or government investigation;

changes in government regulations; and

changes in earnings estimates by analysts.

Furthermore, stock prices for many companies fluctuate widely for reasons that may be unrelated to their operating results. These fluctuations, coupled with changes in demand or reimbursement levels for our services and general economic, political and market conditions, could cause the market price of our common stock to decline.

Forward Looking Statements

Some of the information in this quarterly report on Form 10-Q represents forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as may, will, expect, anticipate, believe, intend, estimate, continue or similar words. You should read statements that contain these words carefully for the following reasons:

the statements discuss our future expectations;

the statements contain projections of our future earnings or of our financial condition; and

the statements state other forward-looking information.

We believe it is important to communicate our expectations to our investors. There may, however, be events in the future that we are not accurately able to predict or over which we have no control. The risk factors listed above, as well as any cautionary language in or incorporated by reference into this quarterly report on Form 10-Q, provide examples of risks, uncertainties and events that may cause our actual results to differ materially from the expectations we describe in our forward-looking statements. The SEC allows us to incorporate by reference the information we file with them, which means we can disclose important information to you by referring you to those documents. Before you invest in our common stock, you should be aware that the occurrence of any of the events described in the above risk factors, elsewhere in or incorporated by reference into this quarterly report on Form 10-Q and other events that we have not predicted or assessed could have a material adverse effect on our earnings, financial condition and business. If the events described above or other unpredicted events occur, then the trading price of our common stock could decline and you may lose all or part of your investment.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

The chief executive officer and chief financial officer of the Company have evaluated Renal Care Group's disclosure controls and procedures (as defined in Rules 13a-14(c) and 15d-14(c) under the Securities Exchange Act of 1934, as amended), within 90 days prior to the filing of this quarterly report and concluded, as of the date of that evaluation, that Renal Care Group maintains disclosure controls and procedures that provide reasonable assurance that information required to be disclosed in Renal Care Group's reports under the Exchange Act is recorded, processed, summarized and reported within the periods specified in the SEC's rules and forms.

Changes in Internal Controls

There have been no significant changes in the Company's internal controls or other factors that could significantly affect these controls subsequent to the date last evaluated.

Table of Contents

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS.

As disclosed in Renal Care Group's annual report on Form 10-K filed with the SEC on March 29, 2002, we are subject to a number of lawsuits arising out of events on August 30, 2000. On that day 19 patients were hospitalized and one patient died shortly after becoming ill while receiving treatment at one of Renal Care Group's dialysis centers in Youngstown, Ohio. One of the 19 hospitalized patients also died some time later. There have been no material developments in these lawsuits in the quarter ended September 30, 2002. Management believes that Renal Care Group's insurance should be adequate to cover these illnesses and does not anticipate a material adverse effect on the Company's consolidated financial position.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K.

- (a) Exhibits:
 - 10.62 Form of Stock Option Agreement for stock option grants to executive employees under the Company's 1999 Long-Term Incentive Plan.
 - 10.63 Form of Stock Option Agreement for stock option grants to non-management directors under the Company's 1996 Stock Option Plan for Outside Directors.
- (b) Reports on Form 8-K:
 - None.

CERTIFICATION

I, SAM A. BROOKS, CHAIRMAN, PRESIDENT AND CHIEF EXECUTIVE OFFICER OF RENAL CARE GROUP, INC., CERTIFY THAT:

1. I have reviewed this quarterly report on Form 10-Q of Renal Care Group, Inc. (the registrant);
2. Based on my knowledge, this quarterly report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this quarterly report;
3. Based on my knowledge, the financial statements, and other financial information included in this quarterly report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this quarterly report;
4. The registrant's other certifying officers and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-14 and 15d-14) for the registrant and we have:
 - (a) designed such disclosure controls and procedures to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this quarterly report is being prepared;
 - (b) evaluated the effectiveness of the registrant's disclosure controls and procedures as of a date within 90 days prior to the filing date of this quarterly report (the Evaluation Date); and
 - (c) presented in this quarterly report our conclusions about the effectiveness of the disclosure controls and procedures based on our evaluation as of the Evaluation Date;
5. The registrant's other certifying officers and I have disclosed, based on our most recent evaluation, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent function):
 - (a) all significant deficiencies in the design or operation of internal controls which could adversely affect the registrant's ability to record, process, summarize and report financial data and have identified for the registrant's auditors any material weaknesses in internal controls; and

Table of Contents

(b) any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal controls; and

6. The registrant's other certifying officers and I have indicated in this quarterly report whether or not there were significant changes in internal controls or in other factors that could significantly affect internal controls subsequent to the date of our most recent evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
