FORWARD LOOKING STATEMENTS

This report contains forward-looking statements. Forward-looking statements relate to our expectations, beliefs, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts or that necessarily depend upon future events. In some cases, you can identify forward-looking statements by words like may, will, should, could, would, expect, plan, anticipate, believe, estimate, potential and similar expressions. Specifically, this report contains, among others, forward-looking statements about:

our expectations regarding financial condition or results of operations for periods after December 31, 2005;

the agreement by Fresenius Medical Care to acquire Renal Care Group;

our critical accounting policies;

our business strategies and our ability to grow our business;

the reimbursement levels of third-party payors; and

our future sources of and needs for liquidity and capital resources.

The forward-looking statements included in this report reflect our current views about future events. They are based on assumptions and are subject to known and unknown risks and uncertainties. Many factors could cause actual results or achievements to differ materially from future results or achievements that may be expressed in or implied by our forward-looking statements. Many of the factors that will determine future events or achievements are beyond our ability to control or predict. Important factors that could cause actual results or achievements to differ materially from the results or achievements reflected in our forward-looking statements include, among other things, the factors discussed on pages 18 to 27 of this report under the heading Risk Factors.

You should read this report, the information incorporated by reference into this report and the documents filed as exhibits to this report completely and with the understanding that our actual future results or achievements may be materially different from what we expect or anticipate.

The forward-looking statements contained in this report reflect our views and assumptions only as of the date this report is filed with the Securities and Exchange Commission. Except as required by law, we assume no responsibility to update any forward-looking statements.

Before you invest in our common stock, you should understand that the occurrence of any of the events described in the Risk Factors section, located elsewhere in this annual report on Form 10-K or incorporated by reference into this annual report on Form 10-K and other events that we have not predicted or assessed could have a material adverse effect on our earnings, financial condition and business. If the events described in the Risk Factors or other unpredicted events occur, then the trading price of our common stock could decline, and you may lose all or part of your investment.

We qualify all of our forward-looking statements by these cautionary statements. In addition, with respect to all of our forward-looking statements, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995.

Unless otherwise indicated, Renal Care Group, we, us, our, and the Company refer to Renal Care Group, Inc. and our consolidated subsidiaries.

PART I

Item 1. Business

ACQUISITION BY FRESENIUS MEDICAL CARE

On May 3, 2005 we entered into a definitive merger agreement with Fresenius Medical Care AG in which Fresenius Medical Care agreed to acquire all of Renal Care Group's outstanding stock. Fresenius Medical Care will pay \$48.00 for each of our outstanding shares of common stock. Fresenius Medical Care will acquire Renal Care Group subject to its outstanding indebtedness.

Table of Contents

Our Board of Directors and the management and supervisory boards of Fresenius Medical Care have approved the transaction, and on August 24, 2005 our stockholders voted to approve the transaction. Completion of the transaction is subject to customary conditions to closing, including the termination or expiration of the waiting period under the Hart-Scott Rodino Antitrust Improvements Act of 1976, as amended. In June 2005, we received a request for additional information under the Hart-Scott Rodino Act from the Federal Trade Commission. Management believes the transaction will close by March 31, 2006.

GENERAL

Renal Care Group, Inc. provides dialysis services to patients with chronic kidney failure, also known as end-stage renal disease (ESRD). As of December 31, 2005, we provided dialysis and ancillary services to over 32,300 patients through 456 outpatient dialysis centers in 34 states, in addition to providing acute dialysis services to more than 200 hospitals. Renal Care Group was formed in 1996 by leading nephrologists with the objective of creating a company with the clinical and financial capability to manage the full range of care for ESRD patients on a cost-effective basis. As of December 31, 2005, there were 1,314 nephrologists with privileges to practice at one or more of our outpatient dialysis centers.

In our dialysis facilities, ESRD patients receive dialysis treatments, generally three times a week, in a technologically advanced outpatient setting. According to the Centers for Medicare & Medicaid Services (CMS), there were more than 4,500 facilities providing outpatient dialysis services in the United States at the end of 2003. Because of the critical role of dialysis in the treatment of patients with ESRD, many outpatient dialysis facilities were, in the 1980's and 1990's, owned by practicing nephrologists and comprised an integral component of their practice. The dialysis services industry has been consolidating since before we were formed. As a result, we believe that as of December 31, 2005, approximately 67% of outpatient dialysis centers are now owned by multi-center dialysis companies, approximately 15% are owned by independent physicians, small chains and other small operators, and approximately 18% are owned by hospitals.

Renal Care Group is a Delaware corporation; our principal executive offices are located at 2525 West End Avenue, Suite 600, Nashville, Tennessee 37203; and our telephone number is (615) 345-5500. Our website is www.renalcaregroup.com.

INDUSTRY OVERVIEW

End-Stage Renal Disease

ESRD is a state of advanced kidney failure. ESRD is irreversible and, without a kidney transplant, ultimately lethal. It is most commonly a result of complications associated with diabetes, hypertension, certain renal and hereditary diseases, aging and other factors. In order to sustain life, ESRD patients must receive either dialysis for the remainder of their lives or a successful kidney transplant. By the end of 2003, dialysis was the primary treatment for approximately 72% of all ESRD patients in the United States, and the remaining 28% of ESRD patients had a functioning kidney transplant.

According to United States Renal Data System estimates, direct medical payments for ESRD totaled \$27.3 billion during 2003. Of the total direct medical payments for ESRD, approximately \$18.1 billion was paid by the federal government through the Medicare program. As a result of legislation enacted in 1972, the federal government provides Medicare benefits to patients who are diagnosed with ESRD, if they are eligible for Social Security, regardless of their age or financial circumstances.

According to CMS data, the number of ESRD patients in the United States who need dialysis grew from approximately 66,000 in 1982 to approximately 325,000 as of December 31, 2003. Based on data from the United States Renal Data System, the rate of ESRD incidence among Medicare-eligible patients was approximately 341 patients per million in 2003 as compared to 111 patients per million in 1984.

Based on these trends, United States Renal Data System forecasts indicate that the total number of ESRD patients, including those with functioning transplants, will grow from approximately 453,000 in 2003 to 621,000 in 2012. The growth in the number of ESRD patients is expected to result principally from the aging of the population along with better treatment of, and better survival rates for, diabetes and other illnesses that lead to chronic kidney disease, reduced somewhat by declines in incidence of ESRD among patients with high blood pressure as a result of better treatments for high blood pressure. In addition, as a result of improved technology, older patients and patients who

could not previously tolerate dialysis due to other illnesses can now receive life-sustaining dialysis treatment.

Table of Contents

Treatment Options for End-Stage Renal Disease

Currently, there are three treatment options for patients with ESRD:

hemodialysis performed in a hospital setting, an outpatient facility or a patient's home,

peritoneal dialysis, which is generally performed in the patient's home, and

kidney transplant surgery.

According to CMS data, in 2003 approximately 92% of patients on dialysis in the United States received hemodialysis in an outpatient setting, and approximately 8% received hemodialysis or peritoneal dialysis in their homes.

Hemodialysis is the most common form of ESRD treatment. It is generally performed in either a freestanding center or a hospital. Hemodialysis uses a dialyzer, essentially an artificial kidney, to remove toxins, fluid and chemicals from the patient's blood, while the patient is connected to another device that controls external blood flow and monitors the patient's vital signs. The dialysis process occurs across a semi-permeable membrane that divides the dialyzer into two chambers. While the blood is circulated through one chamber, a pre-mixed dialysis fluid is circulated through the adjacent chamber. The toxins and excess fluid contained in the patient's blood cross the membrane into the dialysis fluid. Hemodialysis usually takes about four hours and is usually administered three times per week for the life of the patient or until the patient receives a transplant.

Peritoneal dialysis is typically performed by the patient at home and uses the patient's abdominal cavity to eliminate fluids and toxins in the patient's blood. There are several forms of peritoneal dialysis. Continuous ambulatory peritoneal dialysis and continuous cycling peritoneal dialysis are the most common. Under each method, the patient's blood is circulated across the peritoneal membrane into a dialysis solution that removes toxins and excess fluid from the patient's blood. Patients treated at home are monitored monthly through either a visit from a staff person from a designated outpatient dialysis center or a visit by the patient to a dialysis center or home dialysis support facility.

Kidney transplants, when successful, are the most desirable form of therapy for ESRD patients. There is a shortage of donors that severely limits the availability of this procedure as a treatment option. Only about 4% of ESRD patients received kidney transplants in 2003.

OPERATIONS

Location, Capacity and Use of Facilities

As of December 31, 2005, Renal Care Group operated 456 outpatient dialysis centers in 34 states with 7,894 certified dialysis stations and provided inpatient dialysis services to more than 200 acute care hospitals. During 2005, we provided approximately 4.8 million dialysis treatments. We estimate that on average our centers were operating at approximately 57% of capacity as of December 31, 2005, based on the assumption that a dialysis center is able to provide up to three treatments a day per station, six days a week.

Operation of Facilities

Our dialysis centers provide outpatient hemodialysis and related services to ESRD patients using technologically advanced dialysis equipment to provide effective and efficient dialysis. Our centers generally contain between 10 and 30 dialysis stations, one or more nurses' stations, a patient waiting area, examination rooms, a supply room, a water treatment space to purify water used in hemodialysis treatments, a dialyzer reprocessing room, staff work areas, offices and a staff lounge. Many of our centers are adjacent to areas used for training patients in home dialysis.

In order for our dialysis centers to be eligible to participate in the Medicare ESRD program, a qualified physician or group of physicians must act as medical director for each center and must supervise medical aspects of the center's operations. An administrator or manager manages each center. The administrator or manager is typically a registered nurse who is responsible for the day-to-day operations of the center and oversight of the staff. The staff of each center typically includes registered nurses, licensed practical or vocational nurses, patient care technicians, social workers, registered dietitians, a unit clerk and biomedical equipment technicians. We work to staff each center in a manner that allows us to adjust to the scheduling of personnel according to the number of patients receiving treatments.

Table of Contents

Home Dialysis

All of our markets offer home dialysis, either home hemodialysis, peritoneal dialysis or both. As of December 31, 2005, about 10% of the patients we were treating received home dialysis. We provide equipment and supplies, training, patient monitoring and follow-up assistance to patients who receive dialysis treatments in their homes. Management believes that home dialysis is important to providing a full range of dialysis care, and we continue to work to expand our home dialysis program.

Inpatient Care

We also provide inpatient dialysis services to hospitals in most of our markets. We often refer to these services as acute dialysis services. As of December 31, 2005, we provided inpatient services to more than 200 hospitals. Under these arrangements, we typically provide equipment, supplies and personnel to perform hemodialysis and peritoneal dialysis in connection with a hospital's inpatient services. Patients with acute renal failure resulting from accidents, medical and surgical complications, patients in early stages of renal failure and ESRD patients who need to be in the hospital for other reasons often require inpatient dialysis services. Most of our hospital acute dialysis contracts specify predetermined fees per dialysis treatment. Management believes that these fees will be subject to re-negotiation in the future as competition increases among dialysis providers and as hospitals face increased cost pressures.

Nephrologists

Caring for ESRD patients is typically the primary clinical activity of a physician specializing in nephrology (a nephrologist). A nephrologist's other clinical activities include the post-surgical care of kidney transplant patients, the diagnosis and treatment of kidney diseases in patients who are at risk for developing ESRD, and the diagnosis, treatment and management of clinical disorders including hypertension, kidney stones and autoimmune diseases. While some nephrologists practice independently or are members of multi-specialty groups, most nephrologists practice in small single-specialty groups. A nephrology group's practice often covers a relatively large geographic service area. Outside metropolitan areas, a large geographic area may be served by only one nephrology group. Most nephrologists also have a significant office practice, consult on numerous hospitalized patients who are not on dialysis and follow the progress of kidney transplant patients.

A key factor in the success of a dialysis center is the local nephrologist. An ESRD patient generally seeks treatment at a center where his or her nephrologist has privileges to admit patients. Consequently, we rely on our ability to satisfy the needs of patients of local nephrologists in order to gain new patients and to retain existing patients. As of December 31, 2005, there were 1,314 nephrologists with privileges to practice at one or more of our outpatient dialysis centers.

Medical Directors

To satisfy the requirements of the Medicare ESRD program, we must engage a medical director for each of our facilities. We generally engage practicing, board-certified or board-eligible nephrologists to serve as medical directors for our centers. The medical director is usually an independent contractor who provides services under an agreement with Renal Care Group. Medical directors are responsible for administering and monitoring our patient care policies, including patient education, administration of dialysis treatment, staff development and training programs, and assessment of all patients. Medical directors play an important role in quality assurance activities in our facilities and in coordinating the delivery of care to maintain dialysis patients' general level of health and to avoid medical complications that might require hospitalization.

Renal Care Group's typical medical director agreement has a term of between five and ten years with renewal options. We pay medical directors fees that management believes are consistent with the fair market value of the required services. These medical director fees are the result of arms-length negotiations. Most of our medical director agreements also include non-competition clauses with specific limitations on the medical director's ability to compete with us by owning, or providing medical director services for, another dialysis facility for certain specified periods of time and in specified geographic areas.

Table of Contents

Ancillary Services

Renal Care Group provides a variety of ancillary services to treat ESRD patients in its dialysis operations. The most significant ancillary service is the administration of erythropoietin (also known as Epogen® or EPO). EPO is a bio-engineered protein that stimulates the production of red blood cells. EPO is used in connection with all forms of dialysis to treat anemia, a complication experienced by almost all ESRD patients. EPO is manufactured by a single supplier, Amgen Inc. Through our RenaLab subsidiary, we also provide clinical laboratory services for our dialysis operations. We also offer some other ancillary services ordered by patients' physicians, including the administration of other drugs, tests for bone deterioration, electrocardiograms, nerve conduction studies to test for deterioration of a patient's nerves, Doppler flow testing to measure the effectiveness of the patient's vascular access for dialysis, and blood transfusions.

QUALITY ASSURANCE

Integral to our operating philosophy is the belief that providing high quality care is in the best interest not only of patients but also of our shareholders. Better patient care results in improved mortality and morbidity and a greater number of treatments, as patients' life spans increase and the number of days patients spend in hospitals declines. In order to optimize therapy and improve outcomes, we maintain a vigorous quality assurance program. We establish, maintain and monitor quality criteria for clinical operations and monitor patient outcomes in all of our centers.

Medical Advisory Board

Our Medical Advisory Board oversees the review of patient outcomes and the development and communication of clinical protocols. The Medical Advisory Board is chaired by Raymond Hakim, M.D., Ph.D., our Chief Medical Officer, and is composed of 12 nephrologists, each of whom is the medical director of one or more of our centers. The Medical Advisory Board is responsible for establishing, implementing and monitoring our quality assurance policies and procedures and for reviewing and recommending protocols, policies and procedures for clinical treatment. The Medical Advisory Board also works to identify deficiencies in treatment practices and to evaluate technological changes. The Medical Advisory Board's ultimate objective is to assist Renal Care Group in developing and communicating a protocol-driven clinical care model that will assist us in continuously improving the care we provide to patients, with the goal of providing optimal care to all patients.

Quality Criteria

Continuous quality improvement is our primary clinical objective. We work to achieve this objective by regularly evaluating dialysis treatments and patients' key physiological parameters. Our Quality Assurance Coordinator is a registered nurse who oversees our quality assurance program. In addition, each of our dialysis centers has a quality assurance committee that monitors the quality of care in the center and oversees compliance with applicable regulations. These committees typically include the medical director, the center administrator, nurses and other technical personnel.

CORPORATE COMPLIANCE PROGRAM

We have developed and maintain a company-wide compliance program as part of our commitment to comply fully with all laws and regulations applicable to our business and to maintain high standards of ethical conduct by our associates. The primary purposes of the program are to heighten associates' and affiliated professionals' awareness of the importance of complying with all laws and regulations that apply to our business and to take steps to identify and resolve promptly instances of non-compliance.

The compliance program has been approved by our Board of Directors. The program addresses general compliance issues and areas of particular sensitivity. Among the areas of particular sensitivity covered by the compliance program are health care fraud and abuse issues, financial reporting, conflicts of interest and antitrust. As part of the program we have published a code of conduct setting forth standards of conduct and principles of business ethics that we will follow and that we expect each employee and affiliated professional to follow. We review and update the code of conduct regularly. An internal compliance committee comprised of some of our officers and senior managers and our full-time Compliance Officer administer our corporate compliance program. The internal compliance committee and our Compliance Officer are authorized to report compliance issues directly to the Compliance Committee of our Board of Directors or, if appropriate, to the Audit Committee of our Board of Directors.

We also maintain a compliance program specific to RenaLab, our laboratory subsidiary. This program mandates laboratory-specific compliance standards, policies and procedures. The laboratory compliance program is administered by an internal laboratory

Table of Contents

compliance committee, composed of officers and senior managers of Renal Care Group and RenaLab. This committee includes our Compliance Officer and a part-time RenaLab Compliance Officer. This committee and the RenaLab Compliance Officer are authorized to report compliance issues directly to the RenaLab Board of Directors and to the Compliance Committee and the Audit Committee of Renal Care Group's Board of Directors.

REIMBURSEMENT**Sources of Net Revenue**

The following table sets forth information regarding the sources of our net revenue:

	Year Ended December 31,		
	2003	2004	2005
Medicare	49%	49%	52%
Medicaid	6	4	4
Commercial and other payors	40	42	39
Acute dialysis services	5	5	5
Total	100%	100%	100%

Medicare

The Social Security Act provides that most U.S. citizens and resident aliens with ESRD are entitled to Medicare coverage. If a physician diagnoses an eligible person with ESRD, then the patient will be entitled to Medicare coverage (1) beginning the third month after the month in which a regular course of dialysis is initiated, or (2) as early as the month in which a kidney transplant candidate is hospitalized for the transplant if certain conditions are met.

For Medicare purposes, ESRD is defined as kidney impairment that appears irreversible and permanent and that requires a regular course of dialysis or a kidney transplant to maintain life. For a period of 30 months, Medicare coverage is secondary for patients who have qualifying employer-based health insurance. After this 30-month period, Medicare becomes the primary coverage for patients, and the patient's other health insurance generally pays applicable Medicare coinsurance payments and deductibles.

Congress mandated a change in the way we were paid beginning in 2005 for most of the drugs, including EPO, that we bill for outside of the flat composite rate. This change resulted in lower reimbursement for these drugs and a higher composite rate. In 2006 we will be reimbursed for separately billable ESRD drugs at average sales price plus 6.0%. In addition, the composite rate was increased by 14.7% for 2006 to account for the reduction in drug payments. These regulations also include a case-mix adjustment that became effective in April 2005, a geographic adjustment to the composite rate and a budget-neutrality adjustment. Management believes these changes coupled with the 1.6% increase in the Medicare composite rate in 2006 will be positive to Renal Care Group's revenue per treatment and earnings in 2006.

According to the Medicare Payment Advisory Commission, also known as MedPAC, the Medicare ESRD composite rate for outpatient dialysis services averaged \$140 per treatment in freestanding facilities during 2005. The Medicare ESRD composite rate is subject to regional differences based on a number of factors, including labor costs. CMS or Congress may periodically adjust Medicare reimbursement rates, including the ESRD composite rate, based on many factors, including legislation, executive and congressional budget reduction and control processes, inflation and costs incurred in rendering the services. Historically, adjustments in the Medicare ESRD composite rate have had little relationship to the cost of providing dialysis care.

The Medicare ESRD composite rate applies to a designated group of outpatient dialysis services, including dialysis treatment, supplies used for treatment, certain laboratory tests and some medications, and most of the home dialysis services we provide. Some other services, laboratory tests and drugs are eligible for separate reimbursement under Medicare and are not part of the composite rate. These separately reimbursed items include specific drugs such as EPO, some physician-ordered tests provided to dialysis patients and some home dialysis services.

Table of Contents

Changes in the Medicare ESRD Composite Rate

Congress approved a 1.6% increase in the Medicare ESRD composite rate for 2006, following increases of 1.6% in 2005, 2.4% in 2001 and 1.2% in 2000. Under the Medicare Prescription Drug, Improvement, and Modernization Act of 2003, or MMA, in 2006, Medicare will reimburse dialysis providers for ESRD drugs (including EPO) at an amount equal to the drug's average sales price (as determined by the Inspector General of the Department of Health and Human Services) plus 6.0%, and the Medicare ESRD composite rate will be increased by an amount estimated by HHS to be dialysis provider's average profit on these drugs before the change in drug reimbursement. To account for the changes in drug reimbursement, CMS has determined that in 2006 the composite rate will be increased from 2005 levels by approximately 14.7%, or approximately \$19, per treatment, while payments for most separately billable drugs will be reduced. In addition, Medicare has revised the geographic adjustments in the composite rate beginning in 2006. Management believes that the net effect of all of these changes in Medicare payments (including the 1.6% increase in the composite rate, the increase in the composite rate intended to offset reductions in drug reimbursements, the reductions in drug reimbursements and the change in the geographic adjustments) will be positive to the Company in 2006 in terms of average Medicare revenue per treatment.

Before 2000, the Medicare ESRD composite rate was unchanged from commencement of the program in 1972 until 1983. From 1983 through December 1990, a series of congressional actions resulted in net reductions of the average Medicare ESRD composite rate from approximately \$138 per treatment in 1983 to approximately \$125 per treatment in 1986. Our average Medicare rate per dialysis treatment was \$140 during 2005.

The Medicare ESRD composite rate has been the subject of a number of reports and studies. During 2000, Congress directed a study of the ESRD composite rate structure, which was delivered in 2003. The study reviewed items included in the composite rate and items that are currently separately billable (such as EPO and certain laboratory services) and analyzed whether the composite rate should be subject to an annual inflationary update. The study made preliminary recommendations to expand the services covered by the Medicare ESRD composite rate. The study made no final recommendations, and Congress has not acted on it.

During recent congressional sessions, there have been proposals to change numerous aspects of Medicare, not all of which were included in the MMA. We are unable to predict what, if any, future changes may occur in the Medicare ESRD composite rate. Any reductions in the Medicare ESRD composite rate or change in the items covered by the composite rate (such as EPO or certain laboratory services) could have a material adverse effect on our earnings, financial condition and business.

Medicare Reimbursement for EPO

We derive a significant portion of our revenue and earnings from the administration of EPO. Medicare reimbursement for EPO was fixed at \$10 per 1,000 units from 1994 through 2004. The Secretary of HHS has the authority to determine the Medicare reimbursement rate for EPO, which will equal its average sales price plus 6.0% for 2006. Medicare reimbursement for EPO was reduced in 2005 to \$9.76 as a result of the MMA, and it will be further reduced to \$9.57 in the first quarter of 2006 and will be adjusted quarterly in the future based on changes in the average sales price. Approximately 24% of our revenue in 2005 was generated from the administration of EPO; therefore, any further reduction in Medicare reimbursement for EPO could have a material adverse effect on our earnings, financial condition and business.

In the past CMS has placed limits on EPO reimbursement based on patients' hematocrit levels. Hematocrit is a measure of a patient's anemia. In 2005, CMS issued a national medical review policy to limit EPO reimbursement based on hematocrit levels and EPO dosage levels, which is scheduled to take effect in April 2006. Medicare's contractors often conduct medical necessity reviews of claims involving high doses of EPO for patients with relatively high hematocrits. We are unable to predict what any changes in EPO reimbursement will occur based on this new policy. Any reduction in Medicare reimbursement for EPO could have a material adverse effect on our earnings, financial condition and business.

Medicaid Reimbursement

Medicaid programs are health care programs that are partially funded by the federal government and are administered by the states. These programs generally provide coverage for uninsured patients whose income and assets are below levels determined by the states. The programs also serve as supplemental insurance programs for the

Medicare co-insurance portion and provide coverage for some items (for example, oral medications) that are not covered by Medicare. State regulations generally follow Medicare reimbursement levels and coverage without any coinsurance amounts. Some states, however, require beneficiaries to pay a share of the cost based upon their income or assets. We are a licensed ESRD Medicaid provider in all of the states in which we do business.

Table of Contents

Some of the states in which we do business have dialysis reimbursement rates for Medicaid patients that are higher than Medicare rates. Representatives of CMS and some of these states have indicated that the states should consider reducing these higher reimbursement levels, and, as a result, several states have implemented reductions in Medicaid reimbursement. We currently do business in two states in which Medicaid reimbursement remains substantially higher than Medicare rates—Alaska and New Mexico. Reductions in Medicaid reimbursement in these states could have an adverse effect on our earnings, financial condition and business.

In addition, under the Balanced Budget Act of 1997, state Medicaid programs are not required to pay the patient's Medicare cost-sharing amounts for dialysis treatment if the state Medicaid dialysis payment rates are at or below the Medicare composite rate. In such cases, the patient is not liable for the cost-sharing amounts. Since the effect of the MMA has increased the Medicare composite rate by dialysis providers' average profit on separately billable drugs, nearly all state dialysis payment rates are now below the new Medicare composite rate. Thus, if states exercise their option not to pay applicable patient cost-sharing amounts, Medicaid reimbursement in these states could be further reduced.

Non-governmental Reimbursement

Before Medicare becomes a patient's primary payor, if a patient has private health insurance coverage, then the patient's own insurance plan or other health care coverage pays for his or her ESRD treatments. We estimate that Medicare and Medicaid are the primary payors for approximately 80% of the patients to whom we provide care. Therefore, reimbursement from private payors, including acute dialysis payors, cover the other 20% of the patients to whom we provide care; however, that private reimbursement usually represents more than 40% of our net revenue. Reimbursement rates from these private payors are generally significantly higher than the rates paid by Medicare. We have negotiated contracts with most managed care payors in our markets at rates that are higher than the Medicare ESRD composite rate. Rates under these managed care contracts are, however, generally lower than those we charge other private payors. After Medicare becomes a patient's primary payor, private secondary payors generally reimburse us for the patient's copayment which is 20% of the applicable Medicare rate.

We also receive payments from hospitals under acute care contracts. Rates under these contracts for dialysis treatments are generally higher than the Medicare ESRD composite rate. Rates under these acute care contracts are the result of arms-length negotiations between the hospital and us, and management believes they approximate fair market value of the services we provide.

GOVERNMENT REGULATION

General

Federal, state, and local governments extensively regulate Renal Care Group's operations, including the dialysis centers and laboratory we own. Applicable federal and state statutes and regulations require us to meet various standards relating, among other things, to licensure, billing and reimbursement, management of dialysis centers, patient care personnel, maintenance of proper records, confidentiality of medical records, equipment and quality assurance programs, and the treatment and disposal of biomedical waste. In addition, our laboratory is subject, among other laws, to the federal Clinical Laboratory Improvement Amendments of 1988, also known as CLIA. Our dialysis centers and laboratory are subject to periodic inspection by state and federal agencies to determine if they meet applicable requirements. In addition, through certificate of need or permit programs, some states regulate the development or expansion of health care facilities and services, including dialysis centers. Our operations also are subject to regulations of the Occupational Safety and Health Administration, also known as OSHA, concerning workplace safety and employee exposure to blood and other potentially infectious materials.

We are subject to federal and state laws governing, among other things, our relationships with physicians and other health care providers, patient referrals, and false claims. See Government Regulation—Anti-Kickback Statute,

Government Regulation—Stark Law and Government Regulation—Civil Monetary Penalties. The federal government, many states and some private third-party payors have made combating fraud and abuse in the health care industry a high priority. As a result, scrutiny and investigation of health care providers and their relationships with physicians and other referral sources has increased significantly.

We believe our operations substantially comply with applicable federal and state laws. However, if a state or the federal government finds that we have not complied with these laws, then we could be required to change our

operations. We are currently under investigation by two United States Attorneys' offices (See Government Regulation Government Investigations). Any changes we are required to make as a result of a determination we have not complied with law or to settle an investigation could have a negative impact on us. To date, our dialysis centers have maintained their licenses and their Medicare and Medicaid certifications, but if there is a determination that we have not complied with law, our certifications could be revoked. Any loss of certification to participate in the Medicare and Medicaid programs or loss of any required state or federal licenses or certifications would have a negative effect on us. Management believes that the health care services industry will continue

Table of Contents

to be subject to extensive regulation at the federal, state and local levels. We cannot predict the scope and effect of future regulation of our business and cannot predict whether health care reform will require us to change our operations or whether such reform will have a negative impact on us.

We cannot predict whether we will be held responsible for actions previously taken by acquired companies or facilities before we purchased them. We also cannot predict whether our operations, or the previous operations of acquired companies or facilities, will be reviewed or challenged by the government. Any review or challenge of our operations could have a negative impact on us.

Government Investigations

Last year the federal government continued to investigate the practices of health care providers, including providers of dialysis. In March 2005, the office of the United States Attorney for the Eastern District of Missouri served a subpoena on one of our competitors, DaVita, Inc., requiring the production of a broad range of documents. In April 2005, the office of the United States Attorney for the Eastern District of Missouri served a similar subpoena on another of our competitors, Fresenius Medical Care. In December 2004, another of our competitors, Gambro Healthcare, settled an investigation conducted by the office of the United States Attorney for the Eastern District of Missouri and paid more than \$350 million in connection with the settlement.

On August 9, 2005, we received a subpoena from the office of the United States Attorney for the Eastern District of Missouri. The subpoena requires us to produce documents related to numerous aspects of our business and operations. The subpoena includes specific requests for documents related to our supply company, pharmaceutical and other ancillary services we provide to patients (including the administration of EPO), our relationships with pharmaceutical companies, our relationships with physicians, medical director compensation, joint ventures with physicians and our purchases of dialysis equipment from Fresenius Medical Care. The subpoena was issued in connection with a joint civil and criminal investigation. We are cooperating with the government's investigation; we have produced numerous documents to the government in response to this subpoena. We have incurred significant legal and other expenses responding to the subpoena and have experienced distraction of management attention. Compliance with the subpoena will require us to incur substantial additional legal and other expenses and will require further management attention. To our knowledge, no proceedings have been initiated against Renal Care Group at this time, but we cannot predict whether or when proceedings might be initiated. In addition, we cannot predict the outcome of any proceedings that may be initiated against us as a result of this investigation. Any such proceedings could have a material adverse effect on our business, financial condition and results of operations.

On October 25, 2004, we received a subpoena from the office of the United States Attorney for the Eastern District of New York. This subpoena requires the production of documents related to numerous aspects of our business and operations, including those of our laboratory, RenaLab, Inc. The subpoena includes specific requests for documents related to testing for parathyroid hormone (PTH) levels and vitamin D therapies. Our competitors DaVita, Inc., Fresenius Medical Care, and Gambro Healthcare, as well as other participants in the dialysis industry, have announced that they have received similar subpoenas. We are cooperating with the government's investigation. We have produced numerous documents to the government in response to this subpoena. We have incurred significant legal and other expenses responding to the subpoena. Compliance with this subpoena will require us to incur additional legal expenses and could distract management attention. To our knowledge, no proceedings have been initiated against Renal Care Group at this time, but we cannot predict whether or when proceedings might be initiated. We cannot predict the outcome of any proceedings that may be initiated against us a result of this investigation. Any such proceedings could have a material adverse effect on our business, financial condition and results of operations.

If any aspect of our operations is found to violate applicable laws, then we may be subject to severe sanctions and we could be required to alter or discontinue the challenged conduct or both. If sanctions are imposed on us, then there could be a material adverse effect on our business, financial condition and results of operations. If we are required to alter or discontinue practices, then we may not be able to do so successfully, which could have a material adverse effect on our business, financial condition and results of operations.

The federal government also continues to investigate practices of laboratories. Each of the laboratories owned and operated by the major dialysis providers, including our laboratory, has been the subject of a government investigation in addition to the one in the Eastern District of New York described above. These laboratories, including our

laboratory, could be the subject of future investigations.

Medicare and Medicaid Certification and Reimbursement

To receive reimbursement from federal health care programs for dialysis and laboratory services, our dialysis centers and laboratory must be certified by one or more government agencies. For example, to receive Medicare reimbursement, our dialysis centers and laboratory must be certified by CMS. All of our dialysis centers and our laboratory operations are certified under the Medicare program and applicable state Medicaid programs. In connection with our participation in Medicare, we must comply with conditions for coverage, including requirements concerning personnel, management, patient care, patient rights, medical records and physical environment. We must also comply with extensive billing rules governing, among other things, medical necessity and documentation. See Government Regulation False Claims Act and Government Regulation Civil Monetary Penalties.

HHS has recently issued proposed regulations to adopt new Medicare conditions for coverage for ESRD services. The proposed changes to the Medicare conditions for coverage for ESRD facilities could require us to change our operations and may have a negative effect on our business and profitability.

The HHS Office of Inspector General, also known as the OIG, issued reports in the summer of 2000 recommending greater oversight of the quality of care in dialysis facilities. In January of 2003, the United States General Accounting Office (now the Government Accountability Office), known as the GAO, issued a report finding that efforts by CMS to ensure quality care at certain facilities including kidney dialysis facilities continue to be jeopardized by problems in the performance of state inspections, complaint investigations and enforcement of federal standards. Any increased oversight could lead to increased requirements and greater scrutiny of dialysis facilities, including those we own.

Table of Contents

The Anti-Kickback Statute

Under Medicare, Medicaid and other government-funded health care programs, such as the CHAMPUS/Tri-Care program, federal and state governments enforce provisions of the Social Security Act of 1965 that are commonly referred to as the Anti-Kickback Statute. The Anti-Kickback Statute prohibits any person from offering, paying, soliciting or receiving any type of benefit (1) in exchange for the referral of a patient covered by Medicare, Medicaid or other federal health care programs, or (2) for the leasing, purchasing, ordering or arranging for or recommending the lease, purchase or order of any item, good, facility or service covered by the programs. Remuneration prohibited by the Anti-Kickback Statute includes the payment or transfer of anything of value. Many states have similar anti-kickback statutes that are not necessarily limited to items or services paid for by a federal or state health care program.

Any person or entity that violates the Anti-Kickback Statute may be penalized. These penalties include criminal fines of up to \$25,000 per violation and imprisonment. In addition, the government may impose civil penalties of up to \$50,000 per violation, plus three times total remuneration offered, paid, solicited or received. Further, the Secretary of HHS has the authority to exclude or bar individuals or entities who violate the Anti-Kickback Statute from participating in Medicare and Medicaid.

The Anti-Kickback Statute is a broad law. Courts have stated that, under certain circumstances, the Anti-Kickback Statute is violated when just one purpose, as opposed to the primary purpose, of a payment is to induce referrals. To clarify what acts or arrangements will not be subject to prosecution by the OIG or the United States Attorney, HHS has adopted a set of safe harbor regulations and continues to publish clarifications to these safe harbors. If an arrangement meets all of the requirements of a safe harbor, it will not violate the Anti-Kickback Statute.

The types of arrangements covered by safe harbors include certain investments in companies whose stock is traded on a national exchange, certain small company investments in which physician ownership is limited, rentals of space, rentals of equipment, personal services and management contracts, sales of physician practices, physician referral services, warranties, discounts, payments to employees, group purchasing organizations, and waivers of beneficiary deductibles and co-payments. Each type of arrangement must meet specific requirements to enjoy the benefits of the applicable safe harbor. Meeting the requirements of a safe harbor will protect an arrangement from enforcement action by the government. However, the fact that an arrangement does not meet the requirements of a safe harbor does not mean that the arrangement is necessarily illegal or will be prosecuted under the Anti-Kickback Statute.

The OIG has issued a Special Fraud Alert concerning the pricing of laboratory testing at ESRD centers. Medicare pays for laboratory tests provided to ESRD patients in two different ways. Some laboratory tests are considered routine, and Medicare includes payment for those tests in the Medicare ESRD composite rate paid to the dialysis center. Some laboratory testing is not included in the composite rate, and these tests are billed by the laboratory directly to Medicare. In the Special Fraud Alert, the OIG stated it is aware of cases where a laboratory offers to perform tests included in the composite rate at a price below fair market value. In exchange, the dialysis facility agrees to refer all or most of its non-composite rate tests to the laboratory. The OIG identified such an arrangement as raising issues under the Anti-Kickback Statute. Management believes that our arrangements with laboratories reflect fair market value and comply with the Anti-Kickback Statute.

We seek to satisfy as many safe harbor requirements as possible when we are structuring business arrangements. However, not all of our arrangements satisfy all elements of a safe harbor. Management believes that we have a reasonable basis for concluding we substantially comply with the Anti-Kickback Statute and other applicable related federal and state laws and regulations. Management believes that our current arrangements with physicians including nephrologists owning our common stock, medical directors, laboratories, suppliers, hospitals, and other sources of referrals to our dialysis centers and our arrangements with hospitals to provide acute dialysis materially comply with the Anti-Kickback Statute. However, a government agency might take a position contrary to our interpretations or may require us to change our practices. If an agency were to take such a position, it could materially and adversely affect Renal Care Group.

The Stark Law

Congress has also passed significant prohibitions against some physician referrals of patients for health care services. These prohibitions are commonly known as the Stark Law. The Stark Law prohibits a physician from

making referrals for particular health care services (called designated health services) to entities with which the physician, or an immediate family member of the physician, has a financial relationship. If an arrangement is covered by the Stark Law, the requirements of a Stark Law exception must be met for the physician to be able to make referrals to the entity for designated health services.

Table of Contents

Under the Stark Law, the term financial relationship is defined very broadly to include most ownership and compensation relationships. The Stark Law also prohibits the entity receiving the referral from seeking payment under the Medicare and Medicaid programs for services rendered pursuant to a prohibited referral. If an entity is paid for services rendered pursuant to a prohibited referral, it may incur civil penalties or could be excluded from participating in Medicare or Medicaid.

The Stark Law restricts referrals for clinical laboratory services; physical therapy services; occupational therapy services; radiology services, including magnetic resonance imaging (MRI), computerized axial tomography (CAT) scans, and ultrasound services; radiation therapy services and supplies; durable medical equipment and supplies; parenteral and enteral nutrients, equipment, and supplies; prosthetics, orthotics, and prosthetic devices and supplies; home health services; outpatient prescription drugs; and inpatient and outpatient hospital services.

The Stark Law defines a financial relationship to include (1) a physician's ownership or investment interest in an entity and (2) a compensation relationship between a physician and an entity. Under the Stark Law, financial relationships include both direct and indirect relationships. We have compensation arrangements with medical directors or the professional practices of the medical directors. The medical directors or their practices may also own shares, and options to purchase shares, of our common stock. In addition, other physicians who refer patients to our centers may own our stock. If so, the medical directors and other physicians would have a financial relationship with us. Accordingly, these physicians would not be able to refer patients to our dialysis centers for designated health services unless a Stark Law exception applies.

Dialysis is not listed as a designated health service under the Stark Law. However, the definition of designated health services includes some items and services that are components of dialysis or that we may provide to patients in connection with dialysis services. On March 26, 2004, CMS issued Phase II of its regulations under the Stark Law (referred to as the Stark II Regulations). The Stark II Regulations exclude from the definition of covered designated health services those services that are reimbursed by Medicare as part of a composite rate. They also contain an exception under the Stark Law for clinical laboratory services that are included in the Medicare ESRD composite rate. Therefore, services that are included in the Medicare ESRD composite rate are not covered by the Stark Law.

Further, the Stark II Regulations exclude from the referral prohibition EPO and certain other dialysis-related drugs if certain requirements are met. The list of drugs eligible for this exception is published and updated from time to time by CMS. If the requirements are met, this exception applies whether or not these drugs are included in the Medicare ESRD composite rate.

The final regulations also exclude from the definition of inpatient hospital services any dialysis services provided by a hospital that is not certified by CMS to provide outpatient dialysis services. This rule would have the effect of excluding from the Stark Law prohibition, any dialysis services we provide under an acute dialysis contract with a hospital, if that hospital is not certified to provide outpatient dialysis. The Stark II Regulations exclude from the definition of durable medical equipment all equipment and supplies used in connection with home dialysis that are reimbursable under a composite rate. These Stark II Regulations exclude most of the items and services connected with dialysis from the Stark Law prohibitions.

If the Stark Law were found to apply to our relationships with referring physicians, there are exceptions to the Stark Law, which would permit such physicians to refer patients to us for designated health services if we meet certain requirements. The Stark Law contains exceptions for certain physician ownership or investment interests in entities and certain physician compensation arrangements with entities. The exceptions for compensation arrangements include employment relationships, personal services contracts, and space and equipment leases. If a compensation arrangement between a physician, or immediate family member of a physician, and an entity satisfies all requirements for a Stark Law exception, then the Stark Law will not prohibit the physician from referring patients to the entity for designated health services. The Stark II Regulations establish a safe harbor for compensation to physicians providing that hourly payments set under either of two methodologies will constitute fair market value, qualifying the arrangement for the fair market value exception under the Stark Law. The preamble to the Stark II Regulations contains a discussion indicating CMS's view that the hourly rate methodologies could be applicable to compensation under an ESRD facility medical director agreement. Our medical director agreements do not provide for compensation to our medical directors based on an hourly rate. However, we believe that our agreements with medical directors or

their professional practices provide for fair market value compensation and materially satisfy the Stark Law exception for personal service arrangements.

The Stark Law also includes an exception for a physician's ownership or investment interest in certain entities through the ownership of stock. If a physician owns stock in an entity, and the stock is listed on a national exchange or is quoted on the Nasdaq Stock Market and the ownership meets certain other requirements, then the Stark Law will not apply to prohibit the physician from referring to the entity for designated health services. The requirements for this Stark Law exception include a requirement that the

Table of Contents

entity issuing the stock have at least \$75.0 million in stockholders' equity at the end of its most recent fiscal year or on average during the previous three fiscal years. As of December 31, 2005, we had stockholders' equity of more than \$739.0 million. Management believes that physician ownership of our stock satisfies this Stark Law exception.

If an entity violates the Stark Law, it could be subject to civil penalties of up to \$15,000 per prohibited claim and may be excluded from Medicare and Medicaid. If the Stark Law applies to our relationships with referring physicians and no exceptions under the Stark Law are available, then we would be required to restructure these relationships or refuse to accept referrals for designated health services from these physicians. If we were found to have submitted claims to Medicare for services provided pursuant to a referral prohibited by the Stark Law, then we would be required to repay amounts we received from Medicare for those services and could be subject to civil monetary penalties. If we were required to repay amounts to Medicare or were subject to fines, our business and profits could be harmed.

Many states have physician relationship and referral statutes that are similar to the Stark Law. Management believes we are in substantial compliance with applicable state laws with respect to physician relationships and referrals. However, any finding that we are not in compliance with these state laws could require us to change our operations and could have a negative impact on us.

The Health Insurance Portability and Accountability Act of 1996

In an effort to combat health care fraud, Congress included several anti-fraud measures in the Health Insurance Portability and Accountability Act of 1996, also called HIPAA. Among other things, HIPAA broadened the scope of certain fraud and abuse laws, extended criminal penalties for Medicare and Medicaid fraud to other federal health care programs. HIPAA also expanded the authority of the OIG to exclude persons and entities from participating in the Medicare and Medicaid programs. HIPAA extended the Medicare and Medicaid civil monetary penalty provisions to other federal health care programs, increased the amounts of civil monetary penalties, and established a criminal health care fraud statute.

Federal health care offenses under HIPAA include health care fraud and making false statements relating to health care matters. Under HIPAA, among other things, any person or entity that knowingly and willfully defrauds or attempts to defraud a health care benefit program is subject to a fine, imprisonment or both. Also under HIPAA, any person or entity that knowingly and willfully falsifies, conceals or covers up a material fact, or makes any materially false or fraudulent statements in connection with the delivery of or payment for health care services by a health care benefit plan is subject to a fine, imprisonment or both.

HIPAA also required the OIG to issue advisory opinions to outside parties regarding the interpretation and applicability of the Anti-Kickback Statute and other OIG health care fraud and abuse sanctions. An OIG advisory opinion only applies to the people or entities that requested it. However, advisory opinions are published and made available to the public, and they provide guidance on practices the OIG believes may violate federal law. We have not requested any advisory opinions from the OIG. However, the OIG has issued several advisory opinions addressing practices of companies owning ESRD centers.

In advisory opinions addressing practices of companies owning ESRD centers, the OIG has advised ESRD companies that they may not pay policy premiums for Medicare supplemental insurance for patients, even patients with proven financial hardship. Prior to the adoption of HIPAA and the issuance of these OIG opinions, we had paid premiums for Medicare supplemental insurance for some patients with demonstrated financial need. We stopped making such payments following the adoption of HIPAA. Consistent with the OIG's advisory opinions, we have made donations to charitable foundations that may, but are not required to, make premium payments on behalf of ESRD patients. We believe, but cannot make assurances, that our current practices regarding supplemental insurance substantially comply with the general principles expressed by the OIG in these advisory opinions.

HHS has adopted regulations governing electronic transactions by certain entities involving health information. These regulations are part of the administrative simplification provisions of HIPAA. These regulations are commonly referred to as the Transaction Standards rule. The rule establishes standards for eight of the most common health care transactions by reference to technical standards promulgated by recognized standards publishing organizations. Under the new standards, any party transmitting or receiving health transactions electronically must send and receive data in a prescribed format, rather than the large number of different data formats previously used. This rule applies to Renal

Care Group as we submit and process health claims. The Transaction Standards rule also applies to many of our payors and to our relationships with those payors.

HHS has also adopted regulations implementing HIPAA that adopted standards for privacy of individually identifiable health information. These regulations cover health care providers, health care clearinghouses and health plans. The privacy regulations, among other things, require companies covered by the regulations:

Table of Contents

to obtain patient authorization prior to certain uses or disclosures of protected health information,

to provide notice of privacy practices to patients and obtain an acknowledgement that the patient has received the notice,

to respond to requests from patients for access to or to obtain a copy of their information,

to respond to patient requests for amendments of their information,

to designate a privacy officer,

to use and disclose only the minimum necessary information to accomplish a particular purpose, and

to establish policies and procedures with respect to uses and disclosures of protected health information.

These regulatory requirements impose significant administrative and financial obligations on companies that use or disclose individually identifiable information relating to the health of a patient. We have implemented policies and procedures to maintain patient privacy and comply with HIPAA's privacy requirements. The privacy regulations are extensive, and we may need to change some of our practices to comply with them as they are interpreted and as we deal with issues that arise.

HHS has also published regulations implementing HIPAA that govern the security of health information that is maintained or transmitted electronically. The regulations generally require the implementation of administrative, physical and technical safe guards to ensure the confidentiality, integrity and availability of electronic health information. Management believes we are in substantial compliance with these regulations.

The False Claims Act

The federal False Claims Act gives the federal government an additional way to police false bills or requests for payment for health care services. Under the False Claims Act, the government may fine any person who knowingly submits, or participates in submitting, claims for payment to the federal government that are false or fraudulent, or that contain false or misleading information. Any person who knowingly makes or uses a false record or statement to avoid paying the federal government may also be subject to fines under the False Claims Act. Under the False Claims Act, the term "person" means an individual, company or corporation. The federal government has used the False Claims Act widely to prosecute fraud against Medicare and other governmental programs in areas such as coding errors, billing for services not provided and submitting false cost reports. The False Claims Act has also been used to prosecute people or entities that bill services at a higher reimbursement rate than is allowed and billing for care that is not medically necessary.

The penalty for violation of the False Claims Act ranges from \$5,500 to \$11,000 for each fraudulent claim plus up to three times the amount of damages caused to the government as a result of each fraudulent claim. In addition to the False Claims Act, the federal government may use several criminal statutes to prosecute the submission of false or fraudulent claims for payment to the federal government. Many states have similar false claims statutes that impose liability for the types of acts prohibited by the False Claims Act.

Civil Monetary Penalties

The Secretary of HHS may impose civil monetary penalties on any person or entity that presents or causes to be presented certain ineligible claims for medical items or services. The amount of penalties varies, depending on the offense, from \$2,000 to \$50,000 per violation. HHS can impose penalties for false or fraudulent claims and those that include services not provided as claimed. In addition, HHS may impose penalties on claims:

for physician services the person or entity knew or should have known were rendered by a person who was unlicensed, or misrepresented either (1) his or her qualifications in obtaining his or her license or (2) his or her certification in a medical specialty;

that were furnished by a person who was, at the time the claim was made, excluded from the program to which the claim was made; or

that show a pattern of medically unnecessary items or services.

Table of Contents

Penalties also may be imposed on a person or entity that violates rules regarding the assignment of payments, that knowingly gives false or misleading information that could reasonably influence the discharge of patients from a hospital, or that offers inducements to beneficiaries for program services. Persons who have been excluded from the program and who retain ownership in a participating entity, or who contract with excluded persons, may be penalized. Penalties also are applicable in certain other cases, including violations of the federal Anti-Kickback Statute, payments to limit certain patient services and improper execution of statements of medical necessity.

Health Care Legislation and Regulatory Developments

Congress may enact legislation and/or CMS may promulgate regulations in the future that may significantly change the Medicare ESRD program or reduce the amount that Medicare and Medicaid will pay for our services. In addition, federal and state statutes or regulations may be enacted to impose additional requirements on us to continue to provide services to ESRD patients, to provide new services, or to maintain eligibility to participate in federal and state payment programs. Any new legislation or regulations, or new interpretations of existing statutes and regulations, governing reimbursement of dialysis providers or the manner in which dialysis companies provide services to patients could have a material impact on us and could adversely affect our profitability.

Joint Ventures

A number of the dialysis centers we operate are owned by joint ventures in which we own a controlling interest and one or more physicians or physician practice groups own a minority interest. The physician owners may also provide medical director services to those centers and/or to other centers we own and operate. Because our relationships with physicians are governed by the Anti-Kickback Statute, we have sought to satisfy as many safe harbor requirements as possible in structuring these joint venture arrangements. However, our joint venture arrangements do not satisfy all elements of a safe harbor. Management believes that we have a reasonable basis for concluding that we substantially comply with the Anti-Kickback Statute. We also believe we have structured the physician relationships in these joint ventures in a way that substantially complies with the Stark Law or meets applicable exceptions under the Stark Law. If the joint ventures were found to be in violation of the Anti-Kickback Statute or the Stark Law, we could be required to restructure them or refuse to accept referrals for designated health services from the physicians with whom the joint venture centers have a financial relationship. We also could be required to repay to Medicare amounts received by the joint ventures pursuant to prohibited referrals, and we could be subject to monetary penalties. If the joint venture centers are subject to any of these penalties, our business and profits could be damaged.

COMPETITION

The dialysis industry is highly competitive. Competition for qualified physicians to act as medical directors is also intense. According to CMS, there were more than 4,500 outpatient facilities providing dialysis in the United States at the end of 2003. We believe that as of December 31, 2005, approximately 67% of these facilities were owned by the three largest multi-center dialysis companies, approximately 15% were owned by independent physicians, small chains and other small operators, and approximately 18% were owned by hospitals. The largest multi-center dialysis company is DaVita, Inc., which acquired the United States dialysis services business of Gambro Healthcare in October 2005. Fresenius Medical Care, Inc., which also manufactures and sells dialysis equipment and supplies, is our next largest competitor. As a vertically integrated provider, Fresenius may have some competitive advantages.

There are also a number of other health care providers that have entered or may decide to enter the dialysis business. Some of our competitors have substantially greater financial resources than ours, and they compete with us for acquisitions, development and/or management of dialysis centers and nephrology practices. We believe that competition for acquisitions has, over time, increased the cost of acquiring dialysis centers. We may also experience competition from centers established by former medical directors or other referring physicians. There can be no assurance that we will compete effectively with any of our competitors.

INSURANCE

We maintain professional liability insurance and general liability insurance policies for all of our operations. We also maintain insurance in amounts management deems adequate to cover property and casualty risks, workers compensation, and directors and officers liability. There can be no assurance that the aggregate amount and types of our insurance are adequate to cover all risks we may incur or that insurance will be available in the future.

Table of Contents

EMPLOYEES

At December 31, 2005, we employed 7,962 full-time employees and 1,454 part-time employees. Of the total employees, 76 were employed at our headquarters and 9,340 were employed at our dialysis facilities, laboratory or regional business offices. In management's opinion, employee relations are good.

INTERNET WEBSITE

Our internet website can be found at www.renalcaregroup.com. We make available free of charge on or through our internet website, access to our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed pursuant to the Exchange Act as soon as reasonably practicable after such material is filed with, or furnished to, the Securities and Exchange Commission. We will also provide a copy of these documents free of charge to shareholders upon request.

Item 1A. Risk Factors

You should carefully consider the risks described below before investing in Renal Care Group. The risks and uncertainties described below are not the only ones facing Renal Care Group. Other risks and uncertainties that we have not predicted or assessed may also adversely affect us.

If any of the following risks occurs, our earnings, financial condition or business could be materially harmed, and the trading price of our common stock could decline, resulting in the loss of all or part of your investment.

Completion of the Fresenius Medical Care transaction is subject to various conditions; as a result we can not assure you that our transaction with Fresenius Medical Care will be completed.

The completion of the acquisition of Renal Care Group by Fresenius Medical Care is subject to various conditions, including the following:

the termination or expiration of the waiting period under the Hart-Scott Rodino Antitrust Improvements Act of 1976, as amended, or the approval of the transaction under that act;

the absence of a temporary restraining order, preliminary or permanent injunction or other order issued by any court or other legal restraint or prohibition preventing the consummation of the transaction;

the accuracy of the representations and warranties of Renal Care Group and Fresenius Medical Care in the merger agreement;

the performance in all material respects by Renal Care Group and Fresenius Medical Care of all obligations required to be performed by each of them under the merger agreement at or prior to the effective time of the transaction;

the absence of an event, change, effect or development that, individually or in the aggregate, has had or would reasonably be expected to have, a material adverse effect on Renal Care Group as defined in the merger agreement; or

the satisfaction or waiver by the lenders of the conditions precedent to the initial funding of Fresenius Medical Care's financing commitments that are related to the delivery of releases of liens encumbering the assets of Renal Care Group and the delivery of financial statements of Renal Care Group.

Because of these conditions, the transaction with Fresenius Medical Care may not be completed. If the transaction is not completed for any reason, then our current management, under the direction of our Board of Directors, will continue to manage Renal Care Group.

Table of Contents

Failure to complete the Fresenius Medical Care transaction could negatively impact the market price of our common stock and our ability to operate our business.

If the transaction with Fresenius Medical Care is not completed for any reason, we will be subject to a number of material risks, including:

the market price of our common stock could decline;

we must pay some of the costs related to the transaction, such as legal and accounting fees and a portion of the investment banking fees and, in specified circumstances, termination fees and expense reimbursement payments, even if the transaction is not completed, and those costs will be expensed in the fiscal period in which termination occurs;

the diversion of management's attention from our day-to-day business and the unavoidable disruption to our associates and our relationships with patients, medical directors, attending physicians and suppliers, during the period before completion of the transaction, may make it difficult for us to regain our financial and market position if the transaction does not occur; and

the loss of key management, clinical and technical personnel who may be uncertain about their future roles and relationships with Renal Care Group following the completion of the transaction with Fresenius Medical Care could make it difficult for us to operate our business effectively and profitably if we are unable to replace these employees if the transaction with Fresenius Medical Care is not completed.

If the merger agreement is terminated and our Board of Directors seeks another transaction or business combination, then our shareholders cannot be certain that we will be able to find an acquirer willing to pay an equivalent or better price than the price to be paid by Fresenius Medical Care under the merger agreement.

Our profits are dependent on the services we provide to a small portion of our patients who are covered by private insurance.

In recent reviews of dialysis reimbursement, the Medicare Payment Advisory Commission, also known as MedPAC, has noted that Medicare payments for dialysis services are less than the average costs that providers incur to provide the services. Since Medicaid rates are comparable to those of Medicare and because Medicare only pays us 80% of the Medicare allowable amount (the patient, Medicaid or secondary insurance being responsible for the remaining 20%), the amount we receive from Medicare and Medicaid is less than our average cost per treatment. As a result, the payments we receive from private payors both subsidize the losses we incur on services for Medicare and Medicaid patients and generate all the profits we report. In fact, much of our profit is generated from private-pay patients for whom we are paid at amounts equal to several times Medicare rates. We estimate that Medicare and Medicaid are the primary payors for approximately 80% of the patients to whom we provide care but that only 55% of our net revenue in 2003, 53% of our net revenue in 2004 and 56% of our net revenue in 2005 were derived from Medicare and Medicaid. Therefore, if the private payors who pay for the care of the other 20% of our patients reduce their payments for our services, or if we experience a shift in our revenue mix toward Medicare or Medicaid reimbursement, then our revenue, cash flow and earnings would decrease, and our cash flow and profits would be disproportionately impacted.

Over the last few years, we have generally been able to implement annual price increases of between 7% and 12% for private insurers and managed care organizations, but government reimbursement has remained flat or has been increased only modestly. Management believes that health insurance pricing is cyclical and that we may be at or near the top of the cycle. During 2005 we experienced pricing pressure from a number of private payors. As a result of the industry cycle and this pricing pressure, management believes that our ability to maintain or raise rates to private insurers and managed care companies may be more limited over the next several years than it has been in the recent past. Management believes that the reductions in reimbursement by commercial insurers, along with pricing pressure from other commercial insurers and managed care organizations, could adversely impact our revenue per treatment and earnings per share in 2006. Any of the following events could have a material adverse effect on our revenue and earnings:

any number of economic or demographic factors could cause private insurers, hospitals or managed care companies to reduce the rates they pay us or to refuse to pay price increases or to work to reduce the rate of our price increases;

a portion of our business that is currently reimbursed by private insurers or hospitals may become reimbursed by managed care organizations, which generally have lower rates for our services; or

Table of Contents

a portion of our business that is currently reimbursed by private insurers at rates based on our billed charges may become reimbursed under a contract at lower rates.

If Congress or CMS changes the Medicare or Medicaid programs for dialysis, then our net revenue and earnings could decrease.

If the government changes the Medicare, Medicaid or other government programs or the rates those programs pay for our services, then our revenue and earnings may decline. We estimate that approximately 55% of our net revenue for 2003, 53% of our net revenue for 2004, and 56% of our net revenue in 2005 consisted of reimbursements from Medicare, Medicaid and comparable state programs, including reimbursement for the administration of EPO. Any of the following actions in connection with government programs could cause our revenue and earnings to decline:

a reduction of the amount paid to us under government programs;

an increase in the costs associated with performing our services that are subject to inflation, such as labor and supply costs, without a corresponding increase in reimbursement rates;

the inclusion of some or all ancillary services, for which we are now reimbursed separately, in the flat composite rate for a dialysis treatment; or

changes in laws, or the interpretations of laws, which could cause us to modify our operations.

We cannot predict whether any of the proposed cuts will be made or how they will affect us. In addition, Congress and CMS have proposed expanding the drugs and services that are included in the flat composite rate. CMS has indicated that it believes such a mechanism would be fairer and easier to administer. In addition, Congress mandated a change in the way we are paid for some of the drugs, including EPO, that we bill for outside of the flat composite rate. This change has resulted in lower reimbursement for these drugs and a higher composite rate. Under recently adopted regulations, in 2006 we will be reimbursed for separately billable ESRD drugs at average sales price plus 6.0%. In addition, the composite rate was increased by 14.7% to account for the change in drug reimbursement. Other regulations include changes in the geographic designations and wage indices used to calculate the composite rate in specific areas.

If states lower Medicaid reimbursement, then we would be less profitable.

The Medicaid programs in Alaska and New Mexico currently reimburse us for some items at rates higher than those paid by Medicare. These programs may reduce payment levels to be at or close to Medicare rates. In addition, a number of the states in which we operate are experiencing budget shortfalls, and some of these states may consider reducing Medicaid reimbursement, changing their Medicaid programs or not paying claims to address these shortfalls and cut costs. We are unable to predict whether and, if so, when any reductions in Medicaid reimbursement might occur and what their precise effect will be.

If reimbursement for EPO decreases, then we could be less profitable.

If government or private payors reduce reimbursement rates for EPO, for which we are currently reimbursed separately outside of the flat composite rate, then our revenue and earnings will decline. Revenues from the administration of EPO were approximately 24% of our net revenue for 2003, 26% of our net revenue for 2004 and 24% of our net revenue for 2005. Most of our payments for EPO come from government programs. For the year ended December 31, 2005, Medicare and Medicaid reimbursement represented approximately 56% of the total revenue we derived from EPO. A reduction in the reimbursement rate for EPO or the inclusion of EPO in the list of items covered by the flat composite rate could materially and adversely affect our net revenue and earnings. As discussed above, as part of the Medicare Modernization Act, Congress mandated a change in the way we are reimbursed for EPO, and CMS has adopted regulations to implement the change. In 2005 we were reimbursed for EPO at an average acquisition price. In 2006, we will be reimbursed for CMS published proposed rules for EPO at average sales price plus 6.0%. This average sales price plus 6.0% will be substantially less than average acquisition price.

Table of Contents

If Amgen raises the price for EPO or if EPO becomes in short supply, then we could be less profitable.

EPO is produced by a single manufacturer, Amgen, Inc. In April 2002, Amgen announced a 3.9% increase in the price of EPO. This price increase adversely affected our earnings in 2003, and changes in the rebate structure under our contracts with Amgen adversely affected our earnings in 2004 and 2005. In June 2005, Amgen implemented a 4.9% increase in the price of EPO. This price increase will not affect us in 2006. Further changes in the rebate structure under our current contract with Amgen or in Amgen's packaging process for EPO, may adversely affect our earnings in 2006. If Amgen imposes additional EPO price increases or if Amgen or other factors interrupt the supply of EPO, then our net revenue and earnings will decline.

If Amgen markets Aranesp® for ESRD patients, then we could be less profitable.

Amgen has developed and obtained FDA approval for another drug to treat anemia that is marketed as Aranesp® (darbepoetin alfa). Aranesp® is a longer acting form of bio-engineered protein that, like EPO, can be used to treat anemia. EPO is usually administered in conjunction with each dialysis treatment. Aranesp® can remain effective for two to three weeks. If Amgen markets Aranesp® for the treatment of dialysis patients, then our earnings could be materially and adversely affected by either of the following factors:

- our margins realized from the administration of Aranesp® could be lower than the margins realized on the administration of EPO; or

- physicians could decide to administer Aranesp® in their offices, and we would not recognize net revenue or profit from the administration of EPO or Aranesp®.

Changes in our clinical practices or reimbursement rules for EPO and other drugs could substantially reduce our revenue and earnings.

The administration of EPO and other drugs accounted for approximately 35% of our net revenue during 2005. Changes in physician practices or prescription patterns, changes in private and governmental reimbursement criteria or the introduction of new drugs or new types of drug administration could materially reduce our net revenue and profits. For example, some Medicare fiscal intermediaries have implemented or may implement local medical review policies for EPO and other drugs that would effectively limit reimbursement for those drugs. In 2005, CMS adopted a national policy that will establish limits on reimbursement for EPO. This policy will become effective in April 2006. These changes may have an adverse impact on our net revenue and earnings.

If our business is alleged or found to violate health care or other applicable laws, our net revenue and earnings could decrease.

We are subject to extensive federal, state and local regulation. The laws that apply to our operations include, but are not limited to, the following:

- fraud and abuse prohibitions under state and federal health care laws;

- prohibitions and limitations on patient referrals;

- billing and reimbursement rules, including false claims prohibitions under health care reimbursement laws;

- rules regarding the collection, use, storage and disclosure of patient health information, including HIPAA, and state law equivalents of HIPAA;

- facility licensure;

- health and safety requirements;

- environmental compliance; and

- medical and toxic waste disposal.

Table of Contents

Much of the regulation of our business, particularly in the areas of fraud and abuse and patient referral, is complex and open to differing interpretations. Due to the broad application of the statutory provisions and the absence in many instances of regulations or court decisions addressing the specific arrangements through which we conduct our business, including our arrangements with medical directors, physician stockholders and physician joint venture partners, governmental agencies could challenge some of our practices under these laws.

New regulations governing electronic transactions and the collection, use, storage, and disclosure of health information impose significant administrative and financial obligations on our business. If, after the required compliance date, we are found to have violated these regulations, we could be subject to:

criminal or civil penalties, including significant fines;

claims by people who believe their health information has been improperly used or disclosed; and

administrative penalties by payors.

Government investigations could adversely affect Renal Care Group.

Government investigations of health care providers, including dialysis providers, have continued to increase. We have been the subject of investigations in the past, we are involved in current investigations, and the government may investigate our business in the future. One of our competitors, DaVita, Inc., has announced that it is the subject of an investigation by the U.S. Attorney for the Eastern District of Pennsylvania. In December 2004, another competitor, Gambro Healthcare, Inc., settled matters related to an investigation by the U.S. Attorney's Office in St. Louis, Missouri and paid approximately \$350.0 million in connection with the settlement.

In March 2005, the office of the United States Attorney for the Eastern District of Missouri served a subpoena on DaVita, Inc. requiring the production of a broad range of documents. In April 2005, the office of the United States Attorney for the Eastern District of Missouri served a similar subpoena on Fresenius Medical Care.

On August 9, 2005, we received a subpoena from the office of the United States Attorney for the Eastern District of Missouri. The subpoena requires us to produce documents related to numerous aspects of our business and operations. The subpoena includes specific requests for documents related to our supply company, pharmaceutical and other services we provide to patients (including the administration of EPO), our relationships with pharmaceutical companies, our relationships with physicians, medical director compensation, joint ventures with physicians and our purchases of dialysis equipment from Fresenius Medical Care. The subpoena was issued in connection with a joint civil and criminal investigation. We are cooperating with the government's investigation; we have produced numerous documents to the government in response to this subpoena. We have incurred significant legal and other expenses in responding to the subpoena and have experienced some distraction of management attention. Compliance with the subpoena will require us to incur substantial additional legal expenses and will require further management attention. To our knowledge, no proceedings have been initiated against Renal Care Group at this time, but we cannot predict whether or when proceedings might be initiated. In addition, we cannot predict the outcome of any proceedings that may be initiated against us as a result of this investigation. Any such proceeding could have a material adverse effect on our business, financial condition results of operations.

On October 25, 2004, we received a subpoena from the office of the United States Attorney for the Eastern District of New York. The subpoena requires us to provide documents related to numerous aspects of our business and operations, including those of RenaLab, Inc., our laboratory. The subpoena includes specific requests for documents related to testing for parathyroid hormone (PTH) levels and vitamin D therapies. Our competitors DaVita, Fresenius Medical Care, and Gambro Healthcare, as well as other participants in the dialysis industry, have announced that they have received similar subpoenas. We are cooperating with the government's investigation. We have produced numerous documents to the government in response to this subpoena. We have incurred significant legal and other expenses responding to the subpoena. Compliance with this subpoena will require us to incur additional legal expenses and could distract management attention. To our knowledge, no proceedings have been initiated against Renal Care Group at this time, but we cannot predict whether or when proceedings might be initiated. We cannot predict the outcome of any proceedings that may be initiated against us as a result of this investigation. Any such proceedings could have a material adverse effect on our business, financial condition and results of operations.

If any aspect of our operations is found to violate applicable laws, then we may be subject to severe sanctions and we could be required to alter or discontinue the challenged conduct or both. If sanctions are imposed on us, then there could be a material adverse effect on our business, financial condition and results of operations. If we are required to alter or discontinue practices, then we may not be able to do so successfully, which could have a material adverse effect on our business, financial condition and results of operations.

If our joint ventures violate the law, our business could be damaged.

A number of the dialysis centers we operate are owned by joint ventures in which we hold a controlling interest and one or more physicians or physician practice groups hold a minority interest. The physician owners may also provide medical director services to those centers or other centers we own and operate. Our joint venture arrangements do not satisfy all elements of any safe harbor under

Table of Contents

the Anti-Kickback statutes. If one or more of our joint ventures were found to be in violation of the Anti-Kickback Statute or the Stark Law, we could be required to restructure them or refuse to accept referrals for designated health services from the physicians with whom those particular joint venture centers have a relationship. We also could be required to repay to Medicare amounts received by the joint ventures pursuant to prohibited referrals, and we could be subject to monetary penalties. If we are subject to any of these penalties, our business could be damaged.

Changes in the health care delivery, financing or reimbursement systems could adversely affect our business.

The health care industry in the United States may be entering a period of change and uncertainty. Health care organizations, public or private, may dramatically change the way they operate and pay for services. Our business is designed to function within the current health care financing and reimbursement system. During the past several years, the health care industry has been subject to increasing levels of government regulation of, among other things, reimbursement rates and relationships with referring physicians. In addition, proposals to reform the health care system have been considered by Congress. In light of the continued increases in the cost of health care and the current economic situation coupled with the federal budget deficit, there may be new proposals to change the health care system and control costs. These proposals, if enacted, could further increase the government's oversight role and involvement in health care, lower reimbursement rates and otherwise change the operating environment for health care companies. We cannot predict the likelihood of those events or what impact they may have on our business.

If local physicians stop sending patients to our centers or were prohibited from doing so for regulatory reasons, then our revenue and earnings would decline.

Our dialysis centers depend on local nephrologists sending patients to the centers. Typically, one or a few physicians' patients make up all or a significant portion of the patient base at each of our dialysis centers, and the loss of the patient base of one or more of these physicians could have a material adverse effect on the operations of that center. The loss of the patient base of a significant number of local physicians could cause our revenue and earnings to decline. In many instances, the primary referral sources for our centers are physicians who also serve as medical directors of our centers and may be shareholders or minority participants in a joint venture. If the medical director relationship, stock ownership or joint venture relationship were found to violate applicable federal or state law, including fraud and abuse laws and laws prohibiting self-referrals, then these physicians could be forced to stop referring patients to our centers.

A number of our medical director agreements will expire over the next three years, unless they are renewed or renegotiated. We did not renew or renegotiate a small number of our medical director agreements that expired in 2005, and we may not be able to renew or renegotiate expiring medical director agreements successfully, or we may not be able to enforce the non-competition provisions of some of our medical director or other agreements. Any of these factors could result in a loss of patients, since dialysis patients are typically treated at a center where their physician, or a member of his or her practice group serves as medical director. We believe that our future success will depend in part on our ability to attract and retain qualified physicians to serve as medical directors of our dialysis centers.

The dialysis business is highly competitive. If we do not compete effectively in our markets, then we could lose market share and our rate of growth could slow.

The dialysis industry is largely consolidated, and the consolidation trend continues as large providers acquire other providers. In October 2005, DaVita acquired Gambro Healthcare's United States dialysis services business. As a result there are now three large dialysis companies (including Renal Care Group) that compete for the acquisition of outpatient dialysis centers and the development of relationships with referring physicians. The other two competitors are significantly larger companies, which may enable them to pay more or otherwise compete more effectively for acquisitions. In addition Fresenius Medical Care also manufactures dialysis equipment, which may allow it to benefit from lower equipment costs. We also face competition from new entrants into the market, including centers established by former medical directors or other referring physicians. We cannot assure you that we will be able to compete effectively with any of our competitors.

If we are unable to make acquisitions in the future, then our rate of growth will slow.

Much of our historical growth has come from acquisitions. In May 2005 we announced the definitive agreement under which Fresenius Medical Care has agreed to acquire Renal Care Group, subject to several conditions. While this transaction is pending it is unlikely that we will be able to complete acquisitions consistent with our historical

practices, because of uncertainty concerning Renal Care Group and restrictions in the merger agreement. We may be unable to identify and complete suitable acquisitions at prices we are

Table of Contents

willing to pay, or we may be unable to obtain the necessary financing. Further, due to the increased size of our business, the amount that acquired businesses contribute to our revenue and profits will continue to be smaller on a percentage basis. Also, we believe competition for acquisitions has intensified in light of the smaller pool of available acquisition candidates and other market forces. As a result, we believe it will be more difficult for us to acquire suitable companies on favorable terms. Further, the businesses we acquire may not perform well enough to justify our investment. If we are unable to make additional acquisitions on suitable terms, then we may not meet our growth expectations.

If acquired businesses have unknown liabilities, then we could be exposed to liabilities that could harm our business and profitability.

Businesses we acquire may have unknown or contingent liabilities, including liabilities for failure to comply with health care laws. Although we attempt to identify practices that may give rise to unknown or contingent liabilities and conform them to our standards after the acquisition, private plaintiffs or governmental agencies may still assert claims. Even though we generally seek to obtain indemnification from the sellers of businesses we buy, unknown and contingent liabilities may not be covered by indemnification or may exceed contractual limits or the financial capacity of the indemnifying party.

We may not have sufficient cash flow from our business to pay our substantial debt.

As of December 31, 2005, we had total consolidated debt of approximately \$576.1 million, including a \$20.8 million fair value premium on the 9.0% senior subordinated notes, and cash of approximately \$2.5 million. Also, subject to limitations, including those in our credit facility and those included in the indenture for our 9.0% senior subordinated notes, we are not and will not be prohibited from incurring additional debt.

Due to the large amount of our consolidated debt, we may not generate enough cash from our operations to meet these obligations or to fund other liquidity needs. Our ability to generate cash in the future is, to some extent, subject to risks and uncertainties that are beyond our control, including those described in this Risk Factors section. If we are unable to meet our debt obligations, we may need to refinance all or a portion of our indebtedness, sell assets or raise funds in the capital markets. However, we cannot assure you that, if we are unable to pay our debt, we will be able to refinance it, obtain additional equity capital or sell assets, in each case on commercially reasonable terms, or at all, or otherwise be able to fund our liquidity needs.

If for any reason we are unable to meet our debt obligations, we would be in default under the terms of the agreements governing our outstanding debt. If such a default were to occur, the lenders under our credit facility could elect to declare all amounts outstanding under the credit facility immediately due and payable, and the lenders would not be obligated to continue to advance funds to us under our credit facility. In addition, if such a default were to occur, the 9.0% senior subordinated notes would become immediately due and payable. If these debt obligations are accelerated, we cannot assure you that our assets will be sufficient to repay the money we owe to banks and other debt holders.

The large amount and terms of our outstanding debt may prevent us from taking actions we would otherwise consider in our best interest.

The indenture governing our 9.0% senior subordinated notes and our credit facility contain numerous financial and operating covenants that limit our ability to engage in activities such as:

- incurring additional debt;

- acquiring and developing new dialysis centers;

- making investments;

- creating liens;

- creating restrictions on the ability of our subsidiaries to pay dividends or other amounts to us;

- disposing of assets;

paying dividends on our capital stock;

24

Table of Contents

repurchasing our capital stock;

engaging in transactions with our affiliates; or

consolidating, merging or selling all or substantially all of our assets.

Our credit facility also requires us to comply with financial covenants, including a net worth test, a leverage ratio test and a fixed charge coverage ratio test. Our ability to comply with these covenants may be affected by events beyond our control, including those described in this Risk Factors section. A breach of any of the covenants contained in our credit facility or our inability to comply with the required financial covenants could result in an event of default, which would allow the lenders under our credit facility to declare all borrowings outstanding to be due and payable, and triggering an event of default under the indenture governing our 9.0% senior subordinated notes. In addition, our lenders could require us to apply all of our available cash to repay our borrowings or they could prevent us from making debt service payments on our 9.0% senior subordinated notes. If the amounts outstanding under our credit facility or these notes are accelerated, we cannot assure you that our assets would be sufficient to repay in full the money we owe the banks and our other debt holders.

The large amount of our outstanding debt and the limitations our credit facility impose on us could have adverse consequences, including:

having to use much of our cash flow for scheduled debt service rather than for operations, future business opportunities or other purposes, such as funding working capital and capital expenditures;

being unable to increase our borrowings under our credit facility or obtain other debt financing for future working capital, capital expenditures, acquisitions or other corporate purposes;

being less able to take advantage of significant business opportunities, including acquisitions or divestitures;

difficulty satisfying our obligations under our 9.0% senior subordinated notes;

increasing our vulnerability to general adverse economic and industry conditions; and

causing us to be at a competitive disadvantage to competitors with less debt.

If our costs of insurance and claims increase, then our earnings could decrease.

We currently maintain programs of general and professional liability insurance and directors and officers insurance with significant deductible or self-insured retention amounts on each claim. In addition, we generally self-insure our employee health plan and workers compensation program, while maintaining excess insurance for some very large claims. We have accepted higher deductibles and self-insurance exposure in each of the last several years to offset part of the increases in premiums for the programs. These deductibles and premiums increased substantially in 2002 and 2003. The rate of increase in deductibles and premiums has moderated somewhat, but there have still been increases, and there may be larger increases in the future. Our earnings could be materially and adversely affected by any of the following:

increases in premiums, deductibles and self-insurance retentions;

increases in the number of liability claims against us or the cost of settling or trying cases related to those claims; and

an inability to obtain one or more types of insurance on acceptable terms.

If our board of directors does not approve an acquisition or change in control, then our shareholders may not realize the full value of their stock.

We have agreed to be acquired by Fresenius Medical Care, subject to a number of conditions. The merger agreement includes provisions that would make it difficult for a competing bidder to acquire Renal Care Group. These provisions include our agreements not to solicit other offers and not to provide information to a potential bidder, as

well as our agreement to pay a termination fee to Fresenius Medical Care if we terminate the merger agreement and complete another transaction. In addition, our certificate of

Table of Contents

incorporation and bylaws contain a number of provisions that may delay, deter or inhibit a future acquisition or change in control that is not first approved by our board of directors. This could occur even if our shareholders receive an attractive offer for their shares or if a substantial number or even a majority of our shareholders believe the takeover is in their best interest. These provisions are intended to encourage any person interested in acquiring us to negotiate with and obtain approval from our board of directors before pursuing a transaction. Provisions that could delay, deter or inhibit a future acquisition or change in control include the following:

- a staggered board of directors that would require two annual meetings to replace a majority of the board of directors;

- restrictions on calling special meetings at which an acquisition or change in control might be brought to a vote of the shareholders;

- blank check preferred stock that may be issued by our board of directors without shareholder approval and that may be substantially dilutive or contain preferences or rights objectionable to an acquirer; and

- a poison pill that would substantially dilute the interest sought by an acquirer.

These provisions could also discourage bids for our common stock at a premium and cause the market price of our common stock to decline.

Our stock price is volatile and as a result, the value of your investment may go down for reasons unrelated to the performance of our business.

Our common stock is traded on the New York Stock Exchange. The market price of our common stock has been volatile, ranging from a low closing price of \$35.60 per share to a high closing price of \$47.44 per share during the year ended December 31, 2005. The market price for our common stock could fluctuate substantially based on a variety of factors, including the following:

- the failure to complete the transaction with Fresenius Medical Care;

- future announcements concerning us, our competitors or the health care market;

- the threat, commencement or outcome of litigation or government investigation;

- changes in government regulations; and

- changes in earnings estimates by analysts.

Furthermore, stock prices for many companies fluctuate widely for reasons that may be unrelated to their operating results. These fluctuations, coupled with changes in demand or reimbursement levels for our services and general economic, political and market conditions, could cause the market price of our common stock to decline.

Forward-Looking Statements

Some of the information in this annual report on Form 10-K represents forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as *may*, *will*, *expect*, *anticipate*, *believe*, *intend*, *estimate* and *continue* or similar words. You should read statements that contain these words carefully for the following reasons:

- the statements discuss our future expectations;

- the statements contain projections of our future earnings or of our financial condition; and

- the statements state other forward-looking information.

We believe it is important to communicate our expectations to our investors. There may, however, be events in the future that we are not accurately able to predict or over which we have no control. The risk factors listed above, as well as any cautionary language in or incorporated by reference into this annual report on Form 10-K, provide

examples of risks, uncertainties and events that may

26

Table of Contents

cause our actual results to differ materially from the expectations we describe in our forward-looking statements. The SEC allows us to incorporate by reference the information we file with them, which means we can disclose important information to you by referring you to those documents. Before you invest in our common stock, you should be aware that the occurrence of any of the events described in the above risk factors, elsewhere in or incorporated by reference into this quarterly report on Form 10-Q and other events that we have not predicted or assessed could have a material adverse effect on our earnings, financial condition and business. If the events described above or other unpredicted events occur, then the trading price of our common stock could decline and you may lose all or part of your investment.

Item 1B. *Unresolved Staff Comments*

None.

Table of Contents**Item 2. *Properties*****PROPERTIES**

As of December 31, 2005, we operated 456 outpatient dialysis centers in 34 states, of which 407 are located in leased facilities and 49 are owned. The following is a summary of our outpatient dialysis centers by state:

OUTPATIENT FACILITIES BY STATE

Alabama	19
Alaska	4
Arizona	31
Arkansas	11
Colorado	3
Florida	20
Georgia	21
Idaho	2
Illinois	34
Indiana	25
Iowa	1
Kansas	13
Kentucky	9
Louisiana	8
Massachusetts	2
Michigan	12
Mississippi	35
Missouri	26
Nebraska	3
Nevada	3
New Jersey	16
New Mexico	4
North Carolina	1
Ohio	29
Oklahoma	7
Oregon	10
Pennsylvania	17
Rhode Island	2
South Carolina	3
Tennessee	21
Texas	48
Virginia	4
Washington	10
Wisconsin	2
TOTAL	456

Our leases generally have terms ranging from one to 15 years and typically contain renewal options. The size of our centers ranges from approximately 1,000 to 25,000 square feet. We lease office space in Nashville, Tennessee for our corporate headquarters under a lease that expires in 2009. We lease other office space in and around Nashville, Tennessee for certain billing and computer operations. We consider our physical properties to be in good operating condition and suitable for the purposes for which they are being used.

Expansion or relocation of our dialysis centers is subject to compliance with conditions relating to participation in the Medicare ESRD program. In states that require a certificate of need or permit of approval, approval of the required application is usually necessary for expansion of an existing dialysis center or development of a new center.

We typically own the equipment used in our outpatient centers. We consider our equipment generally to be in good operating condition and suitable for the purposes for which it is being used.

Table of Contents

Item 3. Legal Proceedings

On August 9, 2005, we received a subpoena from the office of the United States Attorney for the Eastern District of Missouri. The subpoena requires the production of documents related to numerous aspects of our business and operations. The subpoena includes specific requests for documents related to our supply company, pharmaceutical and other services we provide to patients (including the administration of EPO), our relationships with pharmaceutical companies, our relationships with physicians, medical director compensation, joint ventures with physicians and our purchases of dialysis equipment from Fresenius Medical Care. The subpoena was issued in connection with a joint civil and criminal investigation. We are cooperating with the government's investigation; we have produced numerous documents to the government in response to the subpoena. We have incurred significant legal and other expenses responding to the subpoena and have experienced distraction of management attention. Compliance with the subpoena will require us to incur substantial additional legal and other expenses and will require further management attention. To our knowledge, no proceedings have been initiated against Renal Care Group at this time, but we cannot predict whether or when proceedings might be initiated. We cannot predict the outcome of any proceedings that may be initiated as a result of this investigation. Any such proceedings could have a material adverse effect on our business, financial condition and results of operation.

On October 25, 2004, we received a subpoena from the office of the United States Attorney for the Eastern District of New York. The subpoena requires the production of documents related to numerous aspects of our business and operations, including those of RenaLab, Inc., the Company's laboratory. The subpoena includes specific requests for documents related to testing for parathyroid hormone (PTH) levels and vitamin D therapies. We are cooperating with the government's investigation. We have produced numerous documents to the government in response to this subpoena. We have incurred significant legal and other expenses responding to the subpoena. Compliance with this subpoena will require us to incur significant additional legal and other expenses and could distract management attention. To our knowledge no proceedings have been initiated against us at this time, but we cannot predict whether or when proceedings might be initiated. We cannot predict the outcome of any proceedings that may be initiated against us as a result of this investigation. Any such proceedings could have a material adverse effect on our business financial condition and results of operations.

On May 11, 2005, Renal Care Group was served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Plumbers Local #65 Pension Fund, on behalf of itself and all others similarly situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. On May 26, 2005, we were served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Hawaii Structural Ironworkers Pension Trust Fund, on behalf of itself and all others similarly situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. On May 31, 2005, we were served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Indiana State District Council of Laborers and Hod Carriers Pension Fund, on behalf of itself and others similar situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. The original complaints in these three lawsuits were substantially identical. Each complaint was brought by the plaintiff shareholder as a purported class action on behalf of all shareholders similarly situated. The complaints allege that Renal Care Group and its directors engaged in self-dealing and breached their fiduciary duties to Renal Care Group's shareholders in connection with the merger agreement between Renal Care Group and Fresenius Medical Care because, among other things, Renal Care Group used a flawed process, the existence of the previously disclosed subpoena from the Department of Justice, the lack of independence of one of Renal Care Group's financial advisors and the existence of Renal Care Group's supplemental executive retirement plan. Renal Care Group removed these cases to federal court in June 2005.

The plaintiffs in the first two cases dismissed them without prejudice in July 2005, and the third plaintiff filed an amended complaint. The amended complaint asserts the same grounds articulated in the original complaint adding more specific allegations regarding the termination fee, the no solicitation clause and the matching rights provision in

the Merger Agreement, and it adds allegations that the our Proxy Statement makes material misrepresentations and omissions regarding the process by which the Merger Agreement was negotiated. Specifically, the Amended Complaint asserts that the Proxy Statement makes material misstatements or omissions regarding: (1) the reason why our management and Board engaged in a closed process of negotiating a potential merger with Fresenius and did not solicit potential competing bids from alternative purchasers; (2) the reason why our Board did not appoint a special committee to evaluate the fairness of the merger; (3) the alternatives available to Renal Care Group, including potential alternative transactions and other strategic business opportunities, which purportedly were considered by the our Board during the strategic planning process the Board engaged in during the second half of 2004; (4) all information regarding conflicts of interest suffered by defendants and their financial and legal advisors as alleged herein; (5) all information regarding past investment banking services Bank of America has performed for Renal Care Group and Fresenius Medical Care and the compensation Bank of America received for those services; (6) the forecasts and projections prepared by our management for fiscal years 2005 through 2008 that were referenced in the fairness opinions by Morgan Stanley; (7) the estimates of transaction synergies provided by our management that were referenced in the fairness opinions by Morgan Stanley; and (8) information concerning the amount of money Bank of America and Morgan Stanley will receive in connection with the Proposed Acquisition. Renal Care Group believes that the allegations in the pending complaint are without merit. Completion of the merger is subject to customary conditions, including the absence of any order or injunction prohibiting the closing. The pending complaint seeks to enjoin and prevent the parties from completing the Fresenius Medical Care transaction. The pending complaint was remanded to Tennessee state court in September 2005.

Table of Contents

We are involved in litigation and regulatory investigations arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, management believes these matters will be resolved without material adverse effect on Renal Care Group's consolidated financial position or results of operations.

Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. We believe that we are in compliance with all applicable laws and regulations governing the Medicare and Medicaid programs.

Item 4. Submission of Matters to a Vote of Security Holders

We did not submit any matter to a vote of our shareholders during the fourth quarter of 2005.

PART II**Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities****PRICE RANGE OF COMMON STOCK**

Our common stock is traded on the New York Stock Exchange under the symbol RCI. The following table sets forth the quarterly high and low closing sales prices as reported on the New York Stock Exchange for the last two fiscal years.

	2004	High	Low
First quarter		\$31.43	\$27.55
Second quarter		\$34.29	\$29.93
Third quarter		\$33.24	\$30.09
Fourth quarter		\$36.10	\$30.00
	2005	High	Low
First quarter		\$40.00	\$35.60
Second quarter		\$46.38	\$37.20
Third quarter		\$47.32	\$46.15
Fourth quarter		\$47.44	\$46.85

HOLDERS

As of March 9, 2006, the approximate number of registered stockholders was 131, and we had approximately 40,500 beneficial owners.

DIVIDEND POLICY

We have never paid any cash dividend on our capital stock. We currently anticipate that all of our earnings will be retained to finance the growth and development of our business or to repurchase common stock. We currently do not anticipate that any cash dividend will be declared or paid on our common stock in the foreseeable future. Any future declaration of dividends will be subject to the discretion of our Board of Directors and its review of our earnings, financial condition, capital requirements and surplus, contractual restrictions to pay such dividends and other factors the Board of Directors deems relevant.

Table of Contents**Item 6. Selected Financial Data**

The selected financial data for the years ended December 31, 2001, 2002, 2003, 2004 and 2005 are derived from the audited consolidated financial statements of the Company and its subsidiaries. The consolidated financial statements and related notes for the years ended December 31, 2003, 2004 and 2005, together with the related Reports of Independent Registered Public Accounting Firm are included elsewhere in this annual report on Form 10-K. Please read the following data in conjunction with the financial statements and related notes and Management's Discussion and Analysis of Financial Condition and Results of Operations that appear elsewhere in this annual report on Form 10-K.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis contains forward-looking statements about our plans and expectations of what may happen in the future. Forward-looking statements are based on a number of assumptions and estimates that are inherently subject to significant risks and uncertainties, and our results could differ materially from the results anticipated by our forward-looking statements as a result of many known or unknown factors, including, but not limited to, those factors discussed on pages 18 to 27 under the heading Risk Factors. Also, please read the cautionary notice regarding forward-looking statements set forth at the beginning of this annual report.

Please read the following discussion in conjunction with our consolidated financial statements and the related notes contained elsewhere in this annual report on Form 10-K.

Overview

Renal Care Group provides dialysis services to patients with chronic kidney failure. As of December 31, 2005, we provided dialysis and ancillary services to over 32,300 patients through 456 outpatient dialysis centers in 34 states, in addition to providing acute dialysis services to more than 200 hospitals.

Table of Contents

Our net revenue has been derived primarily from the following sources:

outpatient hemodialysis services;

ancillary services associated with outpatient dialysis, primarily the administration of EPO and other drugs;

home dialysis services;

inpatient hemodialysis services provided to acute care hospitals and skilled nursing facilities;

laboratory services; and

management contracts with hospital-based medical university dialysis programs.

Most patients with ESRD receive three dialysis treatments each week in an outpatient setting. Reimbursement for these services is provided primarily by the Medicare ESRD program based on rates established by CMS. For the year ended December 31, 2005, approximately 56% of our net revenue was derived from reimbursement under the Medicare and Medicaid programs. Medicare reimbursement is subject to rate and other legislative changes by Congress and periodic changes in regulations, including changes that may reduce payments under the ESRD program. Congress approved increases in the composite rate of 1.6% for each of 2005 and 2006. The average revenue per treatment we receive from Medicare and Medicaid is less than our average cost per treatment. Management expects this situation to continue. Any reduction in Medicare and Medicaid payments or shift in our revenue mix toward Medicare or Medicaid reimbursement could materially adversely affect our business and financial condition.

The Medicare composite rate applies to a designated group of outpatient dialysis services, including the dialysis treatment, supplies used for the treatment, certain laboratory tests and medications, and most of the home dialysis services we provide. We receive separate reimbursement outside the composite rate for some other services, drugs (including specific drugs such as EPO) and some physician-ordered tests, including laboratory tests, provided to dialysis patients.

If a patient has private health insurance, then that patient's treatment is typically reimbursed at rates significantly higher than those paid by Medicare during the first 30 months of care. After that period, Medicare becomes the primary payor. Reimbursement for dialysis services provided pursuant to a hospital contract is negotiated with the individual hospital and is usually higher than Medicare rates. Because dialysis is a life-sustaining therapy to treat a chronic disease, utilization is predictable and is not subject to seasonal fluctuations.

We derive a significant portion of our net revenue and net income from the administration of EPO. EPO is manufactured by a single company, Amgen, Inc. In April 2002, Amgen implemented its third EPO price increase of 3.9% in as many years. Because we were already under contract with Amgen through 2002, this price increase did not affect our results of operations during 2002. Key components of the 2002 pricing formula were maintained in our 2003 contract with Amgen. Therefore, while the 2002 price increase had an adverse effect on our 2003 results of operations, we were able to mitigate approximately 80% of the increase. Amgen did not implement a price increase in 2003, but changes in our contract with Amgen for 2004 resulted in an increase in our cost of EPO. Changes in our contract with Amgen for 2005 along with changes in Amgen's packaging practices for EPO resulted in an increase in our cost of EPO in 2005. Changes in our contract with Amgen for 2006 may result in an increase in our cost of EPO in 2006.

In addition, Congress mandated a change in the way we are paid beginning in 2005 for some drugs, including EPO, that we bill for outside of the flat composite rate. This change will result in lower reimbursement for these drugs and a higher composite rate. Under recently adopted regulations, in 2006 we will be reimbursed for separately billable ESRD drugs at the rate of average sales price plus 6.0%. In addition, the composite rate has been increased by 14.7% in 2006 to account for the change in drug reimbursement. These regulations also include geographic designations and wage indices used to calculate the composite rate as well as a budget-neutrality adjustment. We believe these changes coupled with the 1.6% increase in the Medicare composite rate approved for 2006 will have a positive effect on our revenue per treatment and earnings in 2006.

Table of Contents

Critical Accounting Policies

In accordance with SEC financial reporting release, FR-60, *Cautionary Advice Regarding Disclosure About Critical Accounting Policies*, we have identified accounting policies that we consider critical to our business. Management identified these policies based on their importance to our Consolidated Financial Statements and on the degrees of subjectivity and complexity involved in these policies. In addition to these critical policies, a summary of significant accounting policies is included in our consolidated financial statements and related notes, contained elsewhere in this annual report on Form 10-K.

The discussion and analysis of our financial condition and results of operations in this annual report on Form 10-K are based upon our Consolidated Financial Statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, net revenues and expenses, and related disclosures of contingent assets and liabilities. We regularly evaluate our critical accounting policies and estimates, including those related to net revenue and contractual provisions and provision for doubtful accounts. We base our estimates on historical experience and upon assumptions that we believe are reasonable under the circumstances. The results of these estimates form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following critical accounting policies require significant judgments and estimates in the preparation of our consolidated financial statements.

Net Revenue and Contractual Provisions

We recognize revenue net of contractual provisions as services are provided and invoices for those services are issued. Contractual provisions represent the difference between our gross billed charges and the amount we expect to receive. Under the Medicare ESRD program, Medicare reimbursement rates for outpatient dialysis treatments are fixed under a composite rate structure. The composite rate applies to a designated group of outpatient dialysis services, including dialysis treatment, supplies, some laboratory tests and some medications. There are other drugs, laboratory tests and services that are eligible for separate reimbursement outside the composite rate. Most state Medicaid plans follow reimbursement methodologies that are similar to the Medicare program, but other payors, particularly private insurance plans and managed care payors, reimburse us under contractual arrangements or based on our charges. Each of these sources of revenues presents unique challenges to the process of recording contractual provisions.

We have made significant investments in human resources and information systems to enable us to estimate the appropriate amount of contractual provisions as we provide services. Actual levels of reimbursement, however, are sometimes difficult to determine due to the complexity of the applicable regulations or contracts. As a result, we may in fact collect more or less than the amount we expected when we provided and billed for the services. In addition, regulations and contracts may be changed, making system updates and maintenance necessary for estimating net revenue accurately. As a result, management may make adjustments to the contractual provisions estimated by the system based on actual collection experience and other factors.

Provision for Doubtful Accounts

Collecting outstanding accounts receivable is critical to our success. Our primary source of collection risk is related to the portion of our charges for which the patient is responsible. For Medicare patients, the patients' responsibility is 20% of Medicare allowable charges, and for other patients, the patients' responsibility varies based on their health coverage. We record an estimate of the provision for doubtful accounts in the period in which the revenue is recognized based on management's estimate of the net collectibility of the accounts receivable. Management estimates and monitors the net collectibility of accounts receivable based upon a variety of factors, including the analysis of payor mix, subsequent collection analysis and review of detailed agings of accounts receivable. Significant changes in our payor mix or business office operations could have a significant impact on our results of operations and cash flows.

Table of Contents*Self-Insurance Accruals*

From time to time, we are subject to professional liability, general liability and workers compensation claims or lawsuits in the ordinary course of business. To mitigate a portion of this risk, we maintain insurance for professional liability and general liability claims exceeding certain individual amounts and for workers compensation claims exceeding certain individual and aggregate amounts. We estimate the self-insured retention portion of professional liability, general liability and workers compensation risks using third-party actuarial calculations that include historical claims data, demographic factors and other assumptions. The estimated accrual for professional liability, general liability and workers compensation claims could be significantly affected if current and future occurrences differ from historical claims trends. While management monitors current claims closely and considers outcomes when estimating its self-insurance accruals, the complexity of the claims, the wide range of potential outcomes and changes in the legal climate often complicate our ability to make precise estimates.

Impairment of Goodwill and Long-Lived Assets

Pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets*, we review goodwill for impairment at a reporting unit level at least annually. Goodwill is tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Goodwill is assigned to each reporting unit based on the geographic location of assets. If the fair value of a reporting unit is determined to be less than its carrying amount, then the Company compares the implied fair value of the goodwill to its carrying value. If the implied fair value of the goodwill is less than its carrying value, then an impairment loss is recognized for that difference. No goodwill impairment losses were recognized during 2003, 2004 or 2005.

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, when events, circumstances or operating results indicate that the carrying value of certain long-lived assets and related identifiable intangible assets (excluding goodwill) that are expected to be held and used, might be impaired, we evaluate such assets for impairment based on estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. If related long-lived assets are identified as impaired, the impairment is equal to the amount by which the carrying value of the assets exceeds the fair value of those assets as determined by independent appraisals or estimates of discounted future cash flows. Long-lived assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Income Taxes

We account for income taxes under the asset and liability method and recognize deferred tax assets and liabilities for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which these temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date for the change. Management identifies deferred tax assets that more likely than not will not be realized and records a valuation allowance. We also establish accruals for tax uncertainties that we deem to be probable of loss and that can be reasonably estimated.

Results of Operations

The following table sets forth results of operations (in thousands) for the periods indicated and the percentage of net revenue represented by the financial line items shown:

	Year Ended December 31,					
	2003		2004		2005	
Net revenue	\$ 1,005,319	100.0%	\$ 1,345,047	100.0%	\$ 1,570,226	100.0%

Provision for income taxes	62,542	6.2	76,217	5.7	87,912	5.6
Net income	\$ 102,056	10.2%	\$ 121,833	9.1%	\$ 129,713	8.3%

Table of Contents**Year Ended December 31, 2005 Compared to Year Ended December 31, 2004**

Net Revenue. Net revenue increased from \$1,345.0 million for the year ended December 31, 2004 to \$1,570.2 million for the year ended December 31, 2005, an increase of \$225.2 million, or 16.7%. This increase resulted primarily from a 14.1% increase in the number of treatments we performed from 4,240,440 in 2004 to 4,837,565 in 2005 and a 2.2% increase in the average patient revenue per dialysis treatment from \$316 in 2004 to \$323 in 2005. The increase was largely due to the impact of price increases to our commercial payors and benefits from renegotiating certain managed care contracts. In addition, revenue per treatment increased modestly as a result of the net impact of Medicare's 1.6% composite rate increase and changes in its reimbursement for separately billable drugs, along with the case mix adjustment that became effective in April 2005, all of which resulted from the Medicare Modernization Act. These favorable effects on our revenue per treatment were partially offset by increases in the percentage of total net revenue that was derived from reimbursement under the Medicare and Medicaid programs. We expect our 2006 patient service revenue per dialysis treatment increases to be consistent with the increase experienced in 2006.

Patient Care Costs. Patient care costs consist of costs directly related to the care of patients, including direct labor, drugs and other medical supplies, and operational costs of facilities. Patient care costs increased from \$893.5 million for the year ended December 31, 2004 to \$1,039.3 million for the year ended December 31, 2005, an increase of 16.3%. This increase was due principally to the increase in the number of treatments performed during the period, which was reflected in corresponding increases in the use of labor, drugs and supplies. Patient care costs as a percentage of net revenue decreased slightly from 66.4% in 2004 to 66.2% in 2005. Patient care costs per treatment increased 1.9% from \$211 in 2004 to \$215 in 2005. The increase in patient care costs per treatment was primarily due to increased labor costs, as we utilized more contract labor in 2005 than we used in 2004 and as labor and benefit costs rose generally. The effect of these increases was partially offset by decreases in our accruals for self-insurance liabilities and workers' compensation liabilities.

General and Administrative Expenses. General and administrative expenses include corporate office costs and other costs not directly related to the care of patients, including facility administration, accounting, billing and information systems. General and administrative expenses increased from \$106.8 million for the year ended December 31, 2004 to \$141.2 million for the year ended December 31, 2005, an increase of 32.2%. The increase in general and administrative expenses included \$14.9 million of transaction costs that we incurred in connection with the agreement by Fresenius Medical Care to acquire Renal Care Group. In addition, we experienced significant increases in legal costs during 2005 as we responded to the investigations under the subpoenas we received from the offices of the United States Attorney for the Eastern District of Missouri and the United States Attorney for the Eastern District of New York. General and administrative expenses as a percentage of net revenue increased from 7.9% in 2004 to 9.0% in 2005. Excluding the effect of the \$14.9 million of costs related to the transaction with Fresenius Medicare Care, general and administrative costs as a percentage of revenue were 8.0% in 2005. Management believes that we will continue to face significant increases in general and administrative expenses in connection with both the Fresenius Medical Care transaction and compliance with the Missouri and New York subpoenas.

Provision for Doubtful Accounts. Management determines the provision for doubtful accounts as a function of payor mix, billing practices and other factors. We reserve for doubtful accounts in the period when we recognize revenue based on management's estimate of the net collectibility of the accounts receivable. Management estimates the net collectibility of accounts receivable based upon a variety of factors. These factors include, but are not limited to, analyzing revenues generated from payor sources, performing subsequent collection testing and regularly reviewing detailed accounts receivable agings. Management makes adjustments to the allowance for doubtful accounts as necessary based on the results of management's reviews of the net collectibility of accounts receivable. The provision for doubtful accounts decreased from \$32.6 million in 2004 to \$32.0 million in 2005, a decrease of \$572,000, or 1.8%. The provision for doubtful accounts as a percentage of net revenue decreased from 2.4% in 2004 to 2.0% in 2005. The decrease in the provision for doubtful accounts was the result of our collection of approximately \$4.3 million in Medicare cost report payments in the third quarter of 2005. Specifically, during the third quarter of 2005 we recorded the final determination of significant Medicare cost report amounts related to acquired National Nephrology

Associates operations. Excluding the impact of any additional Medicare bad debt recoveries, management expects the provision for doubtful accounts for 2006 to be in our historic range of between 2.0% and 2.5% of net revenue.

Depreciation and Amortization. Depreciation and amortization increased from \$58.3 million for the year ended December 31, 2004 to \$71.4 million for the year ended December 31, 2005, an increase of 22.4%. This increase was due to the start-up of dialysis facilities, the normal replacement costs of dialysis facilities and equipment, the purchase of information systems and the amortization

Table of Contents

of separately identifiable intangible assets associated with acquisitions. Depreciation and amortization as a percentage of net revenue increased from 4.3% in 2004 to 4.5% in 2005.

Income from Operations. Income from operations increased from \$253.8 million for the year ended December 31, 2004 to \$286.4 million for the year ended December 31, 2005, an increase of 12.8%. Income from operations as a percentage of net revenue decreased from 18.9% in 2004 to 18.2% in 2005 period as a result of the combined effects of the factors discussed above, principally the increase in general and administrative expenses.

Interest Expense, Net. Interest expense increased from \$20.6 million for the year-ended December 31, 2004 to \$32.9 million for the year ended December 31, 2005. This increase was the result of higher average borrowings in 2005, which were primarily associated with the recent acquisitions, our purchases of noncontrolling interests in joint venture entities that we consolidated. In addition, interest expense was higher as a result of increases in the Company's weighted average borrowing rate as interest rates rose throughout 2005.

Minority Interest. Minority interest represents the proportionate equity interest of other owners in consolidated entities that we do not wholly own. The financial results of those entities are included in the Company's consolidated results. Minority interest as a percentage of net revenue decreased from 2.6% in 2004 to 2.3% in 2005. The reduction in minority interest expense as a percentage of revenue was the result of our purchase of the interests of the minority partners in some of our joint ventures coupled with a slight decrease in the profitability of some of the facilities that we operate as joint ventures. During 2005, we purchased minority partner interests in ten joint ventures. As of December 31, 2005, we were the majority and controlling owner in 64 joint ventures as compared to 70 as of December 31, 2004.

Provision for Income Taxes. Income tax expense increased from \$76.2 million in 2004 to \$87.9 million in 2005, an increase of \$11.7 million or 15.3%. The increase is a result of increases in pre-tax earnings and our effective tax rate. Our effective tax rate was 38.5% for the 2004 period compared to 40.4% for the 2005 period. The increase is primarily attributable to the fact that some of the transaction costs we incurred in connection with the agreement with Fresenius Medical Care to acquire Renal Care Group will not be deductible for income tax purposes.

Net Income. Net income increased from \$121.8 million in 2004 to \$129.7 million in 2005, an increase of \$7.9 million or 6.5%. This increase was a result of the items discussed above.

Year Ended December 31, 2004 Compared to Year Ended December 31, 2003

Net Revenue. Net revenue increased from \$1,005.3 million for the year ended December 31, 2003 to \$1,345.0 million for the year ended December 31, 2004, an increase of \$339.7 million, or 33.8%. This increase resulted primarily from a 30.3% increase in the number of treatments we performed from 3,254,447 in 2003 to 4,240,440 in 2004 and a 2.6% increase in the average patient revenue per dialysis treatment from \$308 in 2003 to \$316 in 2004. This growth in treatments was largely the result of our acquisition of NNA in April 2004 and our other 2004 acquisitions, along with a 3.3% increase in same-market treatments for 2004 over 2003. The increase in patient revenue per treatment from 2003 was largely due to the impact of our annual price increase implemented in the fourth quarter of 2003 along with favorable renegotiations of some of our managed care contracts, increased utilization of some ancillary drugs, primarily EPO, and the favorable resolution of several contractual issues with payors during 2004. This increase was partially offset by lower revenue per treatment in the former NNA operations.

Patient Care Costs. Patient care costs increased from \$653.3 million for the year ended December 31, 2003 to \$893.5 million for the year ended December 31, 2004, an increase of 36.8%. This increase was due principally to the increase in the number of treatments performed during the period, which was reflected in corresponding increases in the use of labor, drugs and supplies. Patient care costs as a percentage of net revenue increased from 65.0% in 2003 to 66.4% in 2004. This increase was due to generally higher salary and benefit costs, lease costs and routine supply costs experienced in the former NNA facilities. Patient care costs per treatment increased 5.0% from \$201 in 2003 to \$211 in 2004. The increase in patient care costs per treatment was due to increases in the price and utilization of EPO, increased labor costs, increases in the cost of insurance, increases in self-insurance accruals, and changes in the utilization of certain ancillary drugs, as well as the higher cost structure in the former NNA facilities.

General and Administrative Expenses. General and administrative expenses increased from \$90.2 million for the year ended December 31, 2003 to \$106.8 million for the year ended December 31, 2004, an increase of 18.4%. The increase in general and administrative expenses over 2003 was due to increased costs associated with the acquisitions

that we closed in 2004. General and administrative expenses as percentage of revenue decreased from 9.0% in 2003 to 7.9% in 2004 as we leveraged our corporate functions over a larger base of revenue as a result of our acquisitions in

Table of Contents

2004 and because general and administrative expenses for 2004 did not include the \$5.4 million charge we incurred in the first quarter of 2003 for a retirement benefit plan for our former chairman, chief executive officer and president. General and administrative expenses in the fourth quarter of 2004 included write-offs of expenses incurred in connection with several acquisitions that were not completed and the cost of complying with the subpoena we received from the United States Attorney's Office for the Eastern District of New York.

Provision for Doubtful Accounts. The provision for doubtful accounts increased from \$26.2 million in 2003 to \$32.6 million in 2004, an increase of \$6.4 million, or 24.2%. The provision for doubtful accounts as a percentage of net revenue decreased in 2004 to 2.4% from 2.6% in 2003 principally as a result of our improved collection experience.

Depreciation and Amortization. Depreciation and amortization increased from \$44.9 million for the year ended December 31, 2003 to \$58.3 million for the year ended December 31, 2004, an increase of 29.9%. This increase was due to the start-up of dialysis facilities, the normal replacement costs of dialysis facilities and equipment, the purchase of information systems and the amortization of separately identifiable intangible assets associated with acquisitions. Depreciation and amortization as a percentage of net revenue decreased from 4.5% in 2003 to 4.3% in 2004 principally as a result of NNA's practice of leasing dialysis equipment under operating leases, which resulted in lower depreciation and amortization and higher patient care costs.

Income from Operations. Income from operations increased from \$190.7 million for the year ended December 31, 2003 to \$253.8 million for the year ended December 31, 2004, an increase of 33.1%. Income from operations as a percentage of net revenue decreased slightly from 19.0% in 2003 to 18.9% in 2004 period principally as a result of the acquisition of NNA, which had generally lower margins than the Company as a result of NNA's lower revenue per treatment and higher patient care costs and other factors discussed above.

Interest Expense, Net. Interest expense increased from \$629,000 for the year-ended December 31, 2003 to \$20.6 million for the year ended December 31, 2004. This increase was the result of substantially higher average borrowings in 2004, which were associated with the completion of our program to repurchase \$250.0 million in common stock between November 2003 and March 2004, our 2004 acquisitions and the assumption of NNA's \$160.0 million 9.0% senior subordinated notes.

Minority Interest. Minority interest as a percentage of net revenue increased to 2.6% in 2004 from 2.5% in 2003. The change in minority interest expense as a percentage of revenue occurred as acquisitions in 2004 increased the percentage of our facilities that operate as joint ventures. As of December 31, 2004, we were the majority and controlling owner in 70 joint ventures, as compared to 50 as of December 31, 2003.

Provision for Income Taxes. Income tax expense increased from \$62.5 million in 2003 to \$76.2 million in 2004, an increase of \$13.7 million or 21.9%. The increase is a result of increases in pre-tax earnings and our effective tax rate. Our effective tax rate was 38.0% for the 2003 period compared to 38.5% for the 2004 period. The increase reflects a higher overall effective rate associated with the operations acquired from NNA.

Net Income. Net income increased from \$102.1 million in 2003 to \$121.8 million in 2004, an increase of \$19.8 million or 19.4%. This increase was a result of the items discussed above.

Liquidity and Capital Resources

We require capital primarily to acquire and develop dialysis centers, to purchase property and equipment for existing centers, to repurchase shares of our common stock and to finance working capital needs. At December 31, 2005, our working capital was \$140.2 million; cash and cash equivalents were \$2.5 million; and our current ratio was 1.5 to 1.0.

Net cash provided by operating activities was \$190.0 million for the year ended December 31, 2005. Cash provided by operating activities consists primarily of net income before depreciation and amortization expense, adjusted for changes in components of working capital, primarily accounts receivable. Net cash used in investing activities was \$285.5 million for the year ended December 31, 2005. Cash used in investing activities consisted primarily of \$91.4 million of purchases of property and equipment, \$146.8 million of cash paid for acquisitions, net of cash acquired and \$51.0 million of cash paid for noncontrolling interests in consolidated subsidiaries. Net cash provided by financing activities was \$80.1 million for the year ended December 31, 2005. Cash provided by financing activities primarily reflects proceeds from the issuance of long-term debt, net of payments of \$77.7 million, net proceeds of

\$17.0 million from the issuance of common stock, offset by \$9.4 million in repurchases of our common stock.

Table of Contents

We are a party to a credit agreement with a group of banks totaling up to \$700.0 million. The credit agreement has a \$150.0 million revolving credit facility, a \$325.0 million term loan facility, a \$100.0 million second term loan, and a \$125.0 million incremental term loan facility. Borrowings under the incremental term loan facility are subject to obtaining commitments from the banks and finalizing specific terms. In May 2005, we finalized the terms of a \$100.0 million incremental term loan under the credit agreement, and we refer to this loan as the second term loan. We used the proceeds of this second term loan to finance some of our 2005 acquisitions. The revolving credit facility and the \$425.0 million term loans have a final maturity of February 10, 2009. Each of our wholly-owned subsidiaries has guaranteed all of our obligations under the credit agreement. Further, our obligations under the credit agreement, and our subsidiaries' obligations under their guarantees, are secured by a pledge of the equity interests we hold in each of our subsidiaries. The credit agreement includes financial covenants that are customary based on the amount and duration of the agreement.

Borrowings under the \$150.0 million revolving credit facility may be used for acquisitions, repurchases of our stock, capital expenditures, working capital and general corporate purposes. As of December 31, 2005, we can borrow up to \$150.0 million under the revolving credit facility but cannot borrow any additional amounts under the \$325.0 million term loan facility, the \$100.0 million second term loan, or the \$125.0 million incremental term loan facility. At December 31, 2005, our outstanding indebtedness was \$576.1 million, including a remaining balance of \$290.5 million under the term loan facility, \$100.0 million under the second term loan, \$180.5 million of 9.0% senior subordinated notes assumed in our acquisition of NNA and \$5.1 million of other indebtedness, primarily capital leases.

Borrowings under our credit agreement bear interest at variable rates determined by our leverage ratio. These variable rate debt instruments carry a degree of interest rate risk, and we will face higher interest costs on this debt if interest rates rise.

Effective June 30, 2004, we entered into interest rate swap agreements to hedge the interest rate risk on \$150.0 million of our \$325.0 million term loan facility. Under these interest rate swap agreements we exchange fixed and variable rate interest payments based on a \$150.0 million notional principal amount through March 30, 2007. The notional amount of \$150.0 million and the interest rate of 3.5% are fixed in the agreements. The changes in cash flows under these agreements are expected to offset the changes in interest rate payments attributable to fluctuations in LIBOR. The hedge is structured to qualify for the shortcut method; therefore, we record changes in the fair value of the agreement directly in other comprehensive income. The interest payments under this agreement are settled on a net basis each calendar quarter.

The 9.0% senior subordinated notes we assumed in the NNA transaction bear interest at the rate of 9.0% on the face amount. As of December 31, 2005 these notes have a remaining face value of \$159.7 million and are recorded at their carrying value of \$180.5 million. These notes do not provide for scheduled principal amortization and are scheduled to mature on November 1, 2011. Each of our wholly-owned subsidiaries has guaranteed all of our obligations under these notes. The rights of the noteholders and our obligations under these notes are set forth in an indenture we assumed in connection with the NNA acquisition. The indenture includes customary financial covenants.

As a result of our indebtedness, we will incur substantial interest expense in and after 2006. Based on our outstanding funded indebtedness of \$555.3 million, excluding the unamortized fair value premium of \$20.8 million on the 9.0% Senior Subordinated Notes, the aggregate maturities of our borrowings are as follows: 2006 \$42.2 million; 2007 \$80.3 million; 2008 \$208.0 million; 2009 \$62.0 million; 2010 \$318,000; and thereafter \$162.6 million.

We plan to make capital expenditures of between \$90.0 million and \$100.0 million in 2006, primarily for equipment replacement, expansion of existing dialysis facilities and construction of de novo facilities. We expect that these capital expenditures will be funded with cash provided by operating activities and our existing credit facility. Management believes that capital resources available to us will be sufficient to meet the needs of our business, both on a short- and long-term basis.

We have a stock repurchase program. Pending the completion of the Fresenius Medical Care transaction we do not plan to repurchase shares under this program. During 2004, we repurchased 4.6 million shares for \$137.8 million, and in the first quarter of

Table of Contents

2005, we repurchased 252,000 shares of common stock for approximately \$9.4 million. As of December 31, 2005, we had repurchased an aggregate of 14.8 million shares under our stock repurchase plan, for a total of approximately \$381.6 million.

SEC financial reporting release, FR-61, *Commission Statement about Management's Discussion and Analysis of Financial Condition and Results of Operations* encourages public companies to give investors additional information about funds that will be required to operate their businesses in the future under agreements that are in place today. In accordance with FR-61, the following table gives information about our existing contractual obligations. At December 31, 2005, we had no significant contingent commitments.

Contractual Obligations	Total	Payments Due by Period (in thousands)			
		Less than 1 year	1 - 3 years	3 - 5 years	After 5 years
Long-term debt	\$ 550,695	\$ 42,260	\$ 287,031	\$ 61,719	\$ 159,685
Capital leases	7,126	800	1,401	1,191	3,734
Operating leases	302,306	47,961	86,376	66,054	101,915
Medical director fee obligations	168,511	28,971	52,686	38,847	48,007
Total contractual cash obligations	\$ 1,028,638	\$ 119,992	\$ 427,494	\$ 167,811	\$ 313,341

Newly Issued Accounting Standards

In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS No. 123(R)), which is a revision of SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123). SFAS No. 123(R) supersedes APB Opinion No. 25, *Accounting for Stock Issued to Employees*, and amended SFAS No. 95, *Statement of Cash Flows*. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. We adopted SFAS No. 123(R) on January 1, 2006.

As permitted by SFAS No. 123, for periods ended prior to January 1, 2006 we accounted for share-based payments to employees using APB Opinion No. 25's intrinsic value method and, as such, generally recognize no compensation cost for employee stock options. We cannot predict the impact of adopting of SFAS No. 123(R) because it will depend on levels of share-based payments granted in the future. However, had we adopted SFAS No. 123(R) in prior periods, the impact of that standard would have approximated the impact of SFAS No. 123 as described in the disclosure of pro forma net income and earnings per share in Note 9 to our consolidated financial statements. SFAS No. 123(R) also requires the benefits of tax deductions in excess of recognized compensation cost to be reported as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after we adopt SFAS 123(R). While we cannot estimate what those amounts will be in the future (because they depend on, among other things, when employees exercise stock options), the amount of operating cash flows recognized in prior periods for such excess tax deductions were \$13.6 million, \$11.3 million and \$8.6 million in 2003, 2004, and 2005, respectively.

Impact of Inflation

A substantial portion of our net revenue is subject to reimbursement rates that are regulated by the federal government and do not automatically adjust for inflation. We are unable to increase the amount we receive for the services provided by our dialysis business that are reimbursed under or by reference to the Medicare composite rate. Increased operating costs due to inflation, such as labor and supply costs (including the cost of EPO), without a corresponding increase in reimbursement rates, may adversely affect our results of operations, financial condition and business.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

Table of Contents

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

Cash Balances

We maintain all cash in United States dollars in highly liquid, interest-bearing, investment grade instruments with maturities of less than three months, which we consider cash equivalents; therefore, we have no market risk sensitive instruments.

Outstanding Debt

As of December 31, 2005, we had outstanding debt of \$576.1 million, including a \$20.8 million fair value premium on the 9.0% senior subordinated notes. This debt consisted of \$290.5 million outstanding under a term loan facility and \$100.0 million outstanding under a second term loan, \$180.5 million of indebtedness relating to the 9.0% senior subordinated notes due 2011 and approximately \$5.1 million outstanding under various capital leases and notes payable. Borrowings of \$140.5 million under the term loan facility and the \$100.0 million under the second term loan bear interest at variable rates based on LIBOR rates or the prime rate that are determined by our leverage ratio. The remaining \$150.0 million under the term loan are fixed at a rate of 3.5% plus an additional spread based on the Company's leverage ratio under interest rate swap agreements that became effective on June 30, 2004. Our weighted average borrowing rates under the term loan facility and the second term loan as of December 31, 2005, were 5.7% and 5.4%, respectively. We expect these rates to rise in the future if interest rates rise on the portion that bears interest at floating rates. Outstanding senior subordinated notes bear nominal interest at 9.0% on the \$159.7 million outstanding face amount of the notes. The unamortized \$20.8 million fair value premium is being recognized over the life of the notes using the effective interest method and is recorded as a reduction to interest expense. Accordingly, the effective interest rate on the notes was 6.4% as of December 31, 2005. At December 31, 2005, the fair value of our indebtedness under the credit facility and senior subordinated notes approximated carrying value. At the December 31, 2005 borrowing levels and giving effect to the impact of our interest rate swap agreements, if there had been a 1% increase in the variable interest rates, then our pre-tax income would have decreased by approximately \$5.3 million for the year ended December 31, 2005.

Item 8. *Financial Statements and Supplementary Data*

The consolidated financial statements and financial statement schedule in Part IV, Item 15(a) (1) and (2) of the report are incorporated by reference into this Item 8.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Our Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. Our Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, we maintain disclosure controls and procedures that provide reasonable assurance that information that we are required to disclose in the reports that we file or submit under the Securities Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and our Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal control over financial reporting that occurred during the year ended December 31, 2005 that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management's Report on Internal Control Over Financial Reporting set forth on Page F-1 in Part IV, Item 15(a) of this report and the Attestation Report of the Registered Public Accounting Firm set forth on Page F-3 are incorporated by reference into this Item 9A.

Item 9B. *Other Information*

None.

Election of Directors and Management Directors and Executive Officers included in the Company's definitive Proxy Statement relating to the 2006 Annual Meeting of Stockholders.

We have adopted a code of ethics that applies to all of our directors, officers and employees. This code is publicly available in the investor relations area of our website at www.renalcaregroup.com. This code of ethics is not incorporated in this report by reference. Copies of our code of ethics may also be requested in print by writing to Investor Relations at Renal Care Group, Inc., 2525 West End Avenue, Suite 600, Nashville, Tennessee 37203.

Item 11. Executive Compensation

The information required by this item will appear in the section entitled Executive Compensation included in the Company's definitive Proxy Statement relating to the 2006 Annual Meeting of Stockholders, which information, other than the Compensation Committee Report and Performance Graph required by Items 402(k) and (l) of Regulation S-K, is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters
Securities Authorized for Issuance Under Equity Compensation Plans (number of shares in thousands)

The following table summarizes our equity compensation plans as of December 31, 2005:

Plan Category (1)	Number of Shares to Be Issued Upon Exercise of Outstanding Options, Warrants And Rights (a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights (b)	Number of Shares Remaining Available For Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected In Column (a)) (c)
Equity compensation plans approved by stockholders	7,893	\$ 20.83	7,116
Equity compensation plans not approved by stockholders (2)	124	\$ 7.80	
Total	8,017	\$ 21.48	7,116

(1) Renal Care Group currently has three option plans that were assumed in connection with a merger, acquisition or other transaction. The first such plan was adopted by Renal Disease Management by Physicians, Inc. in 1997, and there are 9 options issued and outstanding to purchase shares at a weighted average exercise price of \$15.16. The second plan was adopted by Dialysis Centers of America, Inc. in 1995, and there are 18 options issued and outstanding to purchase shares at a weighted average exercise price of \$17.05. The third plan was adopted in 1994, and there are 13 options issued and outstanding under such plan to purchase shares at a weighted average exercise price of \$2.22.

(2) These options were issued outside of our existing stock option plans to certain employees, officers, directors, and other key persons. These options vest over various periods up to five years and have a term of 10 years from the

date of issuance.

Further information concerning these plans is incorporated by reference to Note 9 in the Consolidated Financial Statements included in this annual report on Form 10-K.

MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Management of Renal Care Group, Inc. is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act rules 13a-15(f). The Company's internal control over financial reporting is a process designed under the supervision of the Company's chief executive officer and chief financial officer to provide reasonable assurance about the reliability of financial reporting and the preparation of the Company's financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles.

As of December 31, 2005 management conducted an assessment of the effectiveness of the Company's internal control over financial reporting based on the framework established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, management has determined that the Company's internal control over financial reporting as of December 31, 2005 is effective.

The Company's internal control over financial reporting includes policies and procedures that (1) pertain to the maintenance of records that accurately and fairly reflect transactions and dispositions of assets in reasonable detail; (2) provide reasonable assurances that the Company records transactions as necessary to permit preparation of financial statements in accordance with U.S. generally accepted accounting principles, and that the Company makes receipts and expenditures only in accordance with authorizations of management of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Company's assets that could have a material effect on the Company's financial statements.

Management's assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2005 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in that firm's attestation report appearing on page F-3.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To The Board of Directors and Shareholders of
Renal Care Group, Inc.

We have audited the accompanying consolidated balance sheets of Renal Care Group, Inc. as of December 31, 2004 and 2005 and the related consolidated income statements, statements of stockholders' equity, and statements of cash flows for each of the three years in the period ended December 31, 2005. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Renal Care Group, Inc. at December 31, 2004 and 2005 and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2005, in conformity with U. S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of Renal Care Group, Inc.'s internal control over financial reporting as of December 31, 2005, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission, and our report dated March 10, 2006 expressed an unqualified opinion thereon.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Renal Care Group, Inc.

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that Renal Care Group, Inc. maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that Renal Care Group, Inc. maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on the COSO criteria. Also, in our opinion, Renal Care Group, Inc. maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets as of December 31, 2004 and 2005, and the related consolidated income statements, statements of stockholders' equity, and statements of cash flows for each of the three years in the period ended December 31, 2005 of Renal Care Group, Inc., and our report dated March 10, 2006 expressed an unqualified opinion thereon.

Renal Care Group, Inc.
Notes to Consolidated Financial Statements
(dollars in thousands, except per share data)
December 31, 2005

1. ORGANIZATION

Renal Care Group, Inc. (the Company) provides dialysis services to patients with chronic kidney failure, also known as end-stage renal disease (ESRD). As of December 31, 2005, the Company provided dialysis and ancillary services to over 32,300 patients through 456 outpatient dialysis centers in 34 states. In addition to its outpatient dialysis center operations, as of December 31, 2005, the Company provided acute dialysis services through contractual relationships with more than 200 hospitals.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation and Consolidation

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries and its majority-owned subsidiaries and joint venture entities over which the Company exercises majority-voting control and for which control is other than temporary. All significant intercompany transactions and accounts are eliminated in consolidation.

Use of Estimates

Management has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these financial statements in conformity with U.S. generally accepted accounting principles. Actual results could differ from those estimates.

Cash Equivalents

The Company considers all highly-liquid investments with original maturities of three months or less to be cash equivalents. The Company places its cash in financial institutions that are federally insured and limits the amount of credit exposure with any one financial institution.

Inventories

Inventories consist of drugs, supplies and parts used in dialysis treatments and are stated at the lower of cost or market. Cost is determined using either the first-in, first-out method or the average cost method.

Property, Plant and Equipment

Property, plant and equipment are stated at cost less accumulated depreciation. Routine maintenance and repairs are charged to expense as incurred. Depreciation is calculated on the straight-line method over the useful lives of the related assets, ranging from three to thirty years. Leasehold improvements are amortized using the straight-line method over the shorter of the related lease terms or the useful lives.

Goodwill and Other Intangibles

The Company accounts for goodwill and other intangible assets in accordance with Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets* (SFAS No. 142). For all periods presented, the Company did not amortize goodwill or intangible assets with indefinite lives in accordance with SFAS No. 142. As of December 31, 2004 and 2005, the carrying amount of goodwill was \$694,264 and \$849,879, respectively. For all periods presented, all separately identifiable intangible assets with definite lives were amortized over their respective useful lives.

Table of Contents

Due to Third-Party Payors

Amounts reflected as due to third-party payors include amounts received in excess of revenue recognized for specific billed charges. These amounts are commonly referred to as overpayments. Overpayments received from federally funded programs are reported to the federal program in accordance with the program's established procedures. For overpayments received from non-federally funded payors, the Company uses various procedures to communicate and refund such amounts to the payors. These amounts remain classified as due to third-party payors until the Company makes a refund, the payor makes a recoupment or the amount is otherwise recognized based on final resolution with the payor.

Minority Interest

Minority interest represents the proportionate equity interest of other owners in the Company's consolidated entities that are not wholly owned. As of December 31, 2005, the Company was the majority and controlling owner in 64 joint ventures.

Stock Based Compensation

SFAS No. 148, *Accounting for Stock-Based Compensation-Transition and Disclosure* (SFAS No. 148), which amended SFAS No. 123, *Accounting for Stock-Based Compensation* (SFAS No. 123), provides alternative methods of transition for a voluntary change to the fair value-based method of accounting for stock-based employee compensation. SFAS No. 148 also amends the disclosure requirements of SFAS No. 123 to require more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. These consolidated financial statements and related notes include the disclosure requirements of SFAS No. 148. However, the Company has elected to account for its stock-based compensation plans under the intrinsic value-based method of accounting prescribed by APB Opinion No. 25, *Accounting for Stock Issued to Employees* (APB Opinion No. 25), and does not utilize the fair value method.

On December 16, 2004, the Financial Accounting Standards Board (FASB) issued SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS No. 123(R)), which is a revision of SFAS No. 123. SFAS No. 123(R) supersedes APB Opinion No. 25 and amended SFAS No. 95, *Statement of Cash Flows*. Generally, the approach in SFAS No. 123(R) is similar to the approach described in SFAS No. 123. However, SFAS No. 123(R) requires all share-based payments to employees, including grants of employee stock options, to be recognized in the income statement based on their fair values. Pro forma disclosure is no longer an alternative. The Company adopted SFAS No. 123(R) on January 1, 2006. As permitted by SFAS No. 123, for periods ended prior to January 1, 2006, the Company has accounted for share-based payments to employees using APB Opinion No. 25's intrinsic value method and, as such, generally recognizes no compensation cost for employee stock options. The impact of adopting of SFAS No. 123(R) cannot be predicted at this time because it will depend on levels of share-based payments in the future. However, had the Company adopted SFAS No. 123(R) in prior periods, the impact of that standard would have approximated the impact of SFAS No. 123 as described in the disclosure of pro forma net income and earnings per share in Note 9 to these consolidated financial statements. SFAS No. 123(R) also requires the Company to recognize the benefits of tax deductions in excess of recognized compensation cost as a financing cash flow, rather than as an operating cash flow as required under current literature. This requirement will reduce net operating cash flows and increase net financing cash flows in periods after the Company adopts SFAS 123(R). While the Company cannot estimate what those amounts will be in the future (because they depend on, among other things, when employees exercise stock options), the amount of operating cash flows recognized in prior periods for such excess tax deductions were \$13,550, \$11,300 and \$8,600 in 2003, 2004, and 2005, respectively.

Net Revenue

Net revenue is recognized as services are provided and invoiced at the estimated net realizable amount from Medicare, Medicaid, commercial insurers and other third-party payors. The Company's net revenue is largely derived from the following sources:

Outpatient hemodialysis;

Ancillary services associated with outpatient dialysis, primarily the administration of erythropoietin (EPO) and other drugs;

Home dialysis services;

Inpatient hemodialysis services provided to acute care hospitals and skilled nursing facilities;
F-11

Table of Contents

Laboratory services; and

Management contracts with hospital-based medical university dialysis programs.

The Medicare and Medicaid programs, along with certain third-party payors, reimburse the Company at amounts that are different from the Company's established rates. Contractual adjustments represent the difference between the amounts billed for these services and the amounts that are reimbursable by third-party payors. A summary of the basis for reimbursement with these payors follows:

Medicare

The Company is reimbursed by the Medicare program predominantly on a prospective payment system for dialysis services. Under the prospective payment system, each facility receives a composite rate per treatment. The composite rate is subject to regional differences based on various factors, including labor costs. Some drugs and other ancillary services are reimbursed on a fee for service basis.

Medicaid

Medicaid is a program funded by the federal and state governments. It is administered by the states, with reimbursements varying by state. The Medicaid programs are separately administered in each state in which the Company operates, and the state Medicaid programs reimburse the Company predominantly on a prospective payment system for dialysis services rendered.

Third-Party Settlements

During the year ended December 31, 2005 the Company obtained final determination of certain Medicare cost report settlements. Accordingly, during this period the Company recognized a change in estimate of \$2,611 (net of related tax expense of \$1,676) resulting in a reduction to the provision for doubtful accounts.

Other

Payments from commercial insurers, other third-party payors and patients are received pursuant to a variety of reimbursement arrangements. Generally payments from commercial insurers and other third-party payors are greater than those received from the Medicare and Medicaid programs.

Reimbursements from Medicare and Medicaid approximated 55%, 53% and 56% of net revenue for the years ended December 31, 2003, 2004 and 2005, respectively.

Provision for Doubtful Accounts

The provision for doubtful accounts is determined as a function of payor mix, billing practices and other factors. The Company reserves for doubtful accounts in the period in which the revenue is recognized based on management's estimate of the net collectibility of the accounts receivable. Management estimates and monitors the net collectibility of accounts receivable based upon a variety of factors. These factors include, but are not limited to, analyzing revenues generated from payor sources, performing subsequent collection testing and regularly reviewing detailed accounts receivable agings.

Income Taxes

The Company accounts for income taxes under the asset and liability method. The Company recognizes deferred tax assets and liabilities for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which these temporary differences are expected to be recovered or settled. The effect of a change in tax rates on deferred tax assets and liabilities is recognized in income in the period that includes the enactment date for the change. The Company identifies deferred tax assets that more likely than not will not be realized and records a valuation allowance. The Company also establishes accruals for tax uncertainties that it deems to be probable of loss and that can be reasonably estimated.

Self Insurance

The Company is subject to professional liability, general liability and workers compensation claims or lawsuits in the ordinary course of business. Accordingly, the Company maintains insurance for professional liability and general liability claims exceeding certain individual amounts. Premiums paid under the Company's professional liability policy may be retrospectively adjusted depending upon claims experience during the policy term. Similarly, the Company

maintains workers compensation insurance for claims exceeding certain individual and aggregate amounts. The Company estimates its self-insured retention portion of professional liability, general liability and workers

F-12

Table of Contents

compensation risks using third party actuarial calculations that include historical claims data, demographic factors and other assumptions.

Fair Value of Financial Instruments

Cash and Cash Equivalents

The carrying amounts reported in the consolidated balance sheets for cash and cash equivalents approximate fair value.

Accounts Receivable, Accounts Payable and Accrued Liabilities

The carrying amounts reported in the consolidated balance sheets for accounts receivable, accounts payable and accrued liabilities approximate fair value. Accounts receivable are generally unsecured.

Long-Term Debt

Based upon the borrowing rates currently available to the Company, the carrying amounts reported in the consolidated balance sheets for long-term debt approximate fair value.

Concentration of Credit Risks

The Company's primary concentration of credit risk exists within accounts receivable, which consist of amounts owed by various governmental agencies, insurance companies and private patients. Receivables from Medicare and Medicaid represented 45% and 42% of gross accounts receivable at December 31, 2004 and 2005, respectively. Concentration of credit risk relating to accounts receivable is limited to some extent by the diversity of the number of patients and payors and the geographic dispersion of the Company's operations.

The Company administers EPO to most of its patients to treat anemia, a medical complication frequently experienced by dialysis patients. Revenue from the administration of EPO was 24% of the net revenue of the Company for the year ended December 31, 2003, 26% of the net revenue of the Company for the year ended December 31, 2004 and 24% of the net revenue of the Company for the year ended December 31, 2005. EPO is produced by a single manufacturer.

Impairment of Goodwill and Long-Lived Assets to be Disposed Of

Pursuant to SFAS No. 142, *Goodwill and Other Intangible Assets*, the Company reviews goodwill for impairment at a reporting unit level at least annually. Goodwill is tested for impairment between annual tests if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Goodwill is assigned to each reporting unit based on the geographic location of assets acquired. If the fair value of a reporting unit is determined to be less than its carrying amount, then the Company compares the implied fair value of the goodwill to its carrying value. If the implied fair value of the goodwill is less than its carrying value, then an impairment loss is recognized for that difference. No goodwill impairment losses were recognized during 2003, 2004 or 2005.

In accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, when events, circumstances or operating results indicate that the carrying value of certain long-lived assets and related identifiable intangible assets (excluding goodwill) that are expected to be held and used, might be impaired, the Company evaluates such assets for impairment based on estimated undiscounted cash flows expected to result from the use and eventual disposition of the assets. If related long-lived assets are identified as impaired, the impairment is equal to the amount by which the carrying value of the assets exceeds the fair value of those assets as determined by independent appraisals or estimates of discounted future cash flows. Long-lived assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Derivative Financial Instruments

The Company manages its interest rate risk by using interest rate swaps to achieve an overall desired position on floating interest rates. Effective June 30, 2004, the Company entered into an interest rate swap agreement to hedge the interest rate risk on \$150,000 of our term loan. These derivative financial instruments are not held or issued for trading purposes. The derivatives are recognized as either assets or liabilities in the statement of financial position and measured at fair value. The hedge is structured to qualify for the shortcut

Table of Contents

method; therefore, changes in the fair value of the agreement are recorded as other comprehensive income (loss). During 2005 the fair value of the interest rate swaps, net of a tax expense of \$989, increased by approximately \$1,589 and was recognized as other comprehensive income.

Reclassifications

Certain prior year balances have been reclassified to conform to the current year presentation. These reclassifications had no effect on the results of operations as previously reported.

3. ACQUISITION BY FRESENIUS MEDICAL CARE AG

On May 3, 2005 the Company entered into a definitive merger agreement with Fresenius Medical Care AG in which Fresenius Medical Care agreed to acquire all of Renal Care Group's outstanding stock. Fresenius Medical Care will pay \$48.00 for each of the Company's outstanding shares of common stock. Fresenius Medical Care will acquire Renal Care Group subject to its outstanding indebtedness, which was approximately \$576,121 as of December 31, 2005. In connection with the Fresenius Medical Care transaction, the Company incurred general and administrative expenses of approximately \$14,925 pre-tax in the year ended December 31, 2005.

The Company's Board of Directors and the management and supervisory boards of Fresenius Medical Care have approved the transaction, and on August 24, 2005 the Company's stockholders voted to approve the transaction. Completion of the transaction is subject to customary conditions to closing, including the termination or expiration of the waiting period under the Hart-Scott Rodino Antitrust Improvements Act of 1976, as amended. In June 2005, the Company received a request for additional information under the Hart-Scott Rodino Act from the Federal Trade Commission. The Company is providing information to the Federal Trade Commission to respond to this request. The Fresenius Medical Care transaction may not be completed before 30 days after certification by the Company and Fresenius Medical Care of substantial compliance with the Federal Trade Commission's request for additional information or until earlier satisfaction by the Federal Trade Commission that the transactions will not raise anticompetitive concerns. Management believes the transaction will close in the first quarter of 2006.

On February 15, 2006, the Company announced that the Company and Fresenius Medical Care had entered into a definitive agreement to sell approximately 100 dialysis centers to National Renal Institutes, Inc., a wholly owned subsidiary of DSI Holding Company, Inc. The divestiture of these centers is an important step toward concluding the review by the United States Federal Trade Commission (FTC) of Fresenius Medical Care's acquisition of the Company. The purchase price for the divested centers is approximately \$450 million to be paid in cash, subject to post-closing adjustments for working capital and other routine matters. The sale of the centers is expected to close shortly after the completion of the Company's acquisition by Fresenius Medical Care. Both the divestiture and the transaction with Fresenius Medical Care remain subject to FTC approval.

On May 11, 2005, the Company was served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Plumbers Local #65 Pension Fund, on behalf of itself and all others similarly situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. On May 26, 2005, the Company was served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Hawaii Structural Ironworkers Pension Trust Fund, on behalf of itself and all others similarly situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. On May 31, 2005, the Company was served with a complaint in the Chancery Court for the State of Tennessee Twentieth Judicial District at Nashville styled *Indiana State District Council of Laborers and Hod Carriers Pension Fund, on behalf of itself and others similar situated, Plaintiff, vs. Renal Care Group, Inc., William P. Johnston, Gary Brukardt, Peter J. Grua, Joseph C. Hutts, Harry R. Jacobson, William V. Lapham, Thomas A. Lowery, Stephen D. McMurray and C. Thomas Smith, Defendants*. The original complaints in these three lawsuits were substantially identical. Each complaint was brought by the plaintiff shareholder as a purported class action on behalf of all shareholders similarly situated. The complaints allege that the Company and its directors engaged in self-dealing and breached their fiduciary duties to the Company's shareholders in connection with the merger agreement between the Company and Fresenius Medical Care because, among other things, the Company used a flawed process, the existence of the previously disclosed subpoena from the Department

of Justice, the lack of independence of one of the Company's financial advisors and the existence of the Company's supplemental executive retirement plan. The Company removed these cases to federal court in June 2005. The plaintiffs in the first two cases dismissed them without prejudice in July 2005, and the third plaintiff filed an amended complaint. The amended complaint asserts the same grounds articulated in the original complaint adding more specific allegations regarding the termination fee, the non-solicitation clause and the matching rights provision in the Merger Agreement, and it adds allegations that our proxy statement makes material misrepresentations and omissions regarding the process by which the merger agreement was negotiated. Specifically, the amended complaint asserts that the proxy statement makes material misstatements or omissions regarding: (1) the reason the Company's management and board engaged in a closed process of negotiating a potential merger with Fresenius Medical Care and did not solicit potential competing bids from alternative purchasers; (2) the reason the Company's board did not appoint a special committee to evaluate the fairness of the merger; (3) the alternatives available to the Company including potential alternative transactions and other strategic business opportunities, which purportedly were considered by the Company's board during the strategic planning process the board engaged in during the second half of 2004; (4) all information regarding conflicts of interest suffered by defendants and their financial and legal advisors as alleged herein; (5) all information regarding past investment banking services Bank of America has performed for the Company and Fresenius Medical Care and the compensation Bank of America received for those services; (6) the forecasts and projections prepared by the Company's management for fiscal years 2005 through 2008 that were referenced in the fairness opinions by Morgan Stanley; (7) the estimates of transaction synergies provided by the Company's management that were referenced in the fairness opinions by Morgan Stanley; and (8) information concerning the amount of money Bank of America and Morgan Stanley will receive in connection with the proposed merger. The Company believes that the allegations in the pending complaint are without merit. Completion of the merger is subject to customary conditions, including the absence of any order or injunction prohibiting the closing. The pending complaint seeks to enjoin and prevent the parties from completing the Fresenius Medical Care transaction. The pending complaint was remanded to Tennessee state court in September 2005.

F-14

Table of Contents**4. BUSINESS ACQUISITIONS****2005 Acquisitions**

During 2005, the Company completed five acquisitions. The combined net assets acquired and resulting net cash purchase price paid in these acquisitions were \$146,809. The purchase price in these transactions consisted exclusively of cash. Each of the transactions involved the acquisition of one or more entities that provide care to ESRD patients through owned dialysis facilities. The acquired businesses either strengthened existing market share within a specific geographic area or provided an entrance into a new market. Goodwill resulting from these transactions amounted to \$124,017, and the Company expects that all of the goodwill will be deductible for income tax purposes. Intangible assets typically represent the value assigned to certain contracts such as non-competition agreements and acute dialysis service agreements entered into in the transactions. These amounts are amortized over the lives of the contracts, which generally range from five to fifteen years.

The following table summarizes the preliminarily estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for the five acquisitions the Company completed during 2005:

Accounts receivable, net	\$ 1,122
Inventory and other current assets	807
Property, plant and equipment, net	17,199
Intangible assets	7,341
Goodwill	124,017
 Total assets acquired	 150,486
Total liabilities assumed, net	(3,677)
 Net assets acquired	 \$ 146,809

The Company began recording the results of operations for each of these acquired businesses at the effective date of the transaction.

In 2005 the Company purchased noncontrolling interests in 14 consolidated subsidiaries for an aggregate purchase price of \$50,984. As a result of these transactions approximately \$9,998 of minority interest liabilities were extinguished, and \$40,986 of goodwill and other intangible assets resulted from the transaction.

2004 Acquisitions

During 2004, the Company completed eight acquisitions. The combined net assets acquired and resulting net cash purchase price paid in these acquisitions were \$297,885. Our largest acquisition was the purchase of National Nephrology Associates, Inc. (NNA) on April 2, 2004. The purchase price of NNA consisted of a net cash payment of approximately \$163,000 and the assumption of all of NNA's outstanding debt, including its \$160,000, 9.0% senior subordinated notes. NNA provided dialysis services to approximately 5,600 patients and operated 87 outpatient dialysis facilities in 15 states, as well as providing acute dialysis services to more than 50 hospitals.

Each of the eight transactions involved the acquisition of one or more entities that provide care to ESRD patients through owned dialysis facilities. The acquired businesses either strengthened existing market share within a specific geographic area or provided an entrance into a new market. Goodwill resulting from these transactions amounted to \$407,686, and approximately \$225,856 of that goodwill is deductible for income tax purposes.

Table of Contents

The following table summarizes the preliminarily estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for the eight acquisitions the Company completed during 2004:

Accounts receivable, net	\$ 45,410
Inventory and other current assets	23,778
Property, plant and equipment, net	50,713
Intangible assets	20,646
Goodwill	407,686
Other Assets	19,343
 Total assets acquired	 567,576
Total liabilities assumed	(269,691)
 Net assets acquired	 \$ 297,885

The Company began recording the results of operations for each of these acquired businesses at the effective date of the transaction.

Some of the estimated fair values of assets and liabilities were preliminary and were adjusted in 2005. The adjustments primarily included deferred tax assets and liabilities. As of December 31, 2005, management does not anticipate any additional adjustments related to 2004 acquisitions. Intangible assets primarily represent the value assigned to contracts such as non-competition agreements and acute dialysis service agreements entered into in the transactions. Related amounts are amortized over the lives of the contracts, which generally range from five to fifteen years.

2003 Acquisitions

During 2003, the Company completed three acquisitions, which were accounted for under the purchase method of accounting. The combined purchase price paid in these acquisitions was \$14,154 and consisted exclusively of cash. Each of the transactions involved the acquisition of assets of entities that provide care to ESRD patients through owned dialysis facilities. The acquired businesses either strengthened the Company's existing market share within a specific geographic area or provided the Company with an entrance into a new market.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition for the three acquisitions the Company completed in 2003:

Accounts receivable, net	\$ 986
Inventory	255
Property, plant and equipment, net	1,579
Intangible assets	656
Goodwill	10,912
 Total assets acquired	 14,388
Total liabilities assumed	(234)
 Net assets acquired	 \$ 14,154

The Company began recording the results of operations for each of these acquired businesses at the effective date of the transaction.

Goodwill resulting from these transactions amounted to \$10,912, and the Company expects that all of that goodwill will be deductible for income tax purposes. Intangible assets typically represent the value assigned to certain contracts such as non-competition agreements and acute dialysis service agreements entered into in the transactions. These amounts are amortized over the lives of the contracts, which generally range from five to ten years.

Table of Contents**Pro Forma Data (unaudited)**

The following summary, prepared on a pro forma basis, combines the results of operations of the Company and the acquired businesses, as if each of the 2005 acquisitions had been consummated as of the beginning of each year below, giving effect to adjustments such as amortization of intangibles, interest expense and related income taxes.

	2004	2005
Pro forma net revenue	\$ 1,419,259	\$ 1,595,441
Pro forma net income	\$ 130,807	\$ 132,444
Pro forma net income per share		
Basic	\$ 1.94	\$ 1.94
Diluted	\$ 1.87	\$ 1.87

The unaudited pro forma results of operations are not necessarily indicative of what actually would have occurred if the acquisitions had been completed prior to the beginning of the periods presented.

5. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment (including assets recorded under capital leases) consist of the following:

	December 31,	
	2004	2005
Medical equipment	\$ 190,267	\$ 224,543
Computer software and equipment	69,072	86,570
Furniture and fixtures	34,011	38,858
Leasehold improvements	145,882	179,705
Buildings	45,132	53,033
Construction-in-progress	16,341	15,462
	500,705	598,171
Less accumulated depreciation	(184,173)	(235,947)
	\$ 316,532	\$ 362,224

Depreciation expense was \$42,561, \$53,538 and \$64,952 for the years ended December 31, 2003, 2004 and 2005, respectively.

6. GOODWILL AND INTANGIBLE ASSETS

In accordance with the requirements of SFAS No. 142, the Company discontinued amortizing goodwill effective January 1, 2002, and it is required to disclose goodwill separately from other intangible assets in the balance sheet. Additionally, the Company must test goodwill for impairment on a periodic basis. The Company completed its annual impairment testing and identified no impairments as of December 31, 2005.

Changes in the carrying amount of goodwill for the years ended December 31, 2004 and 2005, are as follows:

Balance as of December 31, 2003	\$ 286,578
Goodwill acquired during the period	407,686
Balance as of December 31, 2004	694,264
Goodwill acquired during the period	124,017
Goodwill resulting from acquiring noncontrolling interests	40,386

Purchase price allocation period adjustment	(8,788)
Balance as of December 31, 2005	\$ 849,879

F-17

Table of Contents

The Company's separately-identifiable intangible assets, which consist primarily of non-competition agreements and acute dialysis services agreements, are as follows:

	December 31,	
	2004	2005
Carrying amount	\$ 49,012	\$ 59,737
Accumulated amortization	(14,692)	(20,560)
Net	\$ 34,320	\$ 39,177

Separately-identifiable intangible assets are being amortized over their useful lives, ranging from five to fifteen years. Amortization expense was \$2,344, \$4,811 and \$6,448 for the years ended December 31, 2003, 2004 and 2005, respectively. Estimated amortization expense for each of the next five fiscal years is as follows:

Year ending December 31,	Amount
2006	\$ 6,126
2007	5,456
2008	5,088
2009	3,857
2010	2,868

7. LONG-TERM DEBT

Long-term debt consisted of the following as of December 31, 2004 and December 31, 2005:

	December 31, 2004	December 31, 2005
Term loan facility, bearing interest at a variable rate (5.7% at December 31, 2005)	\$ 312,813	\$ 290,469
Second term loan, bearing interest at a variable rate (5.4% at December 31, 2005)		100,000
9.0% senior subordinated notes	159,685	159,685
Obligations under capital leases	4,151	4,624
Other	3,357	542
Total indebtedness, excluding fair value premium	480,006	555,320
Add: 9.0% senior subordinated notes fair value premium	23,608	20,801
Total long-term debt	503,614	576,121
Less: current portion	23,969	42,198
	\$ 479,645	\$ 533,923

Credit Agreements

The Company is a party to a credit agreement (the 2004 Agreement) with a group of banks totaling up to \$700,000. The 2004 agreement has a \$150,000 revolving credit facility, a \$325,000 term loan facility, a \$100,000 second term loan facility and a \$125,000 incremental term loan facility. In May 2005, the Company completed an incremental term loan of \$100,000 under the 2004 Agreement. The Company used the proceeds of this incremental term loan to finance some of its 2005 acquisitions. The revolving credit facility, the \$425,000 term loan facilities have a final maturity of February 10, 2009. Each of the Company's wholly-owned subsidiaries has guaranteed all of its obligations under the

2004 Agreement. Further, the Company obligations under the 2004 Agreement, and its subsidiaries' obligations under their guarantees, are secured by a pledge of the equity interests the Company holds in each of its subsidiaries. The 2004 Agreement includes financial covenants that are customary based on the amount and duration of the agreement. The revolving credit facility under the 2004 Agreement may be used for acquisitions, repurchases of Company common stock, capital expenditures, working capital and general corporate purposes. Borrowings under the 2004 Agreement accrue interest at variable rates determined by the Company's leverage ratio. Effective June 30, 2004, the Company entered into interest rate swap agreements to hedge interest rate risk on \$150,000 of our term loan (See Interest Rate Swap below). The portion of the Company's borrowings that is subject to variable rates carries a degree of interest rate risk. Specifically, the Company will face higher interest costs on this debt if interest rates rise.

9.0% Senior Subordinated Notes

With the acquisition of NNA, the Company assumed all of NNA's outstanding debt including its 9.0% senior subordinated notes (the Notes), due 2011. The Company recorded the Notes at the face value of \$160,000 plus an additional \$25,600 representing the difference between the fair

F-18

Table of Contents

value of the Notes and the face amount on the date of acquisition. Accordingly, the Notes were recorded at the estimated fair value of \$185,600. As of December 31, 2005, the carrying value of the Notes was \$180,486. The Notes bear interest at the rate of 9.0% per annum on the face amount. The fair value premium is being recognized over the life of the Notes using the effective interest method and is recorded as a reduction to interest expense. Accordingly, the effective interest rate on the Notes as of December 31, 2005 was 6.4%. Each of the Company's wholly-owned subsidiaries has guaranteed all of the Company's obligations under these notes. The rights of the noteholders and the Company's obligations under these notes are set forth in an indenture that NNA entered into in October 2003, which the Company assumed in connection with the NNA acquisition. The indenture includes customary financial covenants.

Interest Rate Swap

Effective June 30, 2004, the Company entered into interest rate swap agreements to hedge the interest rate risk on \$150,000 of its term loan. Under these interest rate swap agreements the Company will exchange fixed and variable rate interest payments based on a \$150,000 notional principal amount through March 30, 2007. The notional amount of \$150,000 and interest payments of 3.5% are fixed in the agreements. The interest payments are subject to adjustment based on our leverage ratio. The changes in cash flows under these agreements are expected to offset the changes in interest rate payments attributable to fluctuations in LIBOR. The hedge is structured to qualify for the shortcut method as prescribed by Statement of Financial Accounting Standard No. 133, *Accounting for Derivative Instruments and Hedging Activities*; therefore, the Company will record changes in the fair value of the agreement directly in comprehensive income. As of December 31, 2005, the notional amount of the swap agreements was \$150,000 and its fair value was a \$2,247 asset, resulting in other comprehensive income during 2005 of \$1,589 (net of a related tax expense of \$989).

Obligations Under Capital Leases

Obligations under capital leases consist primarily of capital leases for buildings and equipment maturing at various times through May 2020. See the maturity schedule for capital leases included at Note 10.

Other

The other long-term debt consists primarily of notes maturing at various times through February 2009.

Maturities of Long-Term Debt

The aggregate maturities of long-term debt, excluding the fair value premium, at December 31, 2005 are as follows:

2006	\$ 42,198
2007	80,250
2008	207,977
2009	61,993
2010	318
Thereafter	162,584
	\$ 555,320

Table of Contents**Guarantor Information**

Our wholly-owned subsidiaries have guaranteed the Notes as well as our obligations under the 2004 Agreement. The Company conducts substantially all of its business through subsidiaries. Presented below is condensed consolidating financial information as of December 31, 2004 and 2005 and for each of the three years in the period ended December 31, 2005. The information segregates Renal Care Group, Inc. (the parent company), the combined wholly-owned subsidiary guarantors and the combined non-guarantor subsidiaries and reflects consolidating adjustments. All of the subsidiary guarantees are both full and unconditional, and joint and several.

Table of Contents**8. INCOME TAXES**

The provision for income taxes consists of the following:

	Year Ended December 31,		
	2003	2004	2005
Current:			
Federal	\$ 38,716	\$ 52,274	\$ 66,910
State and local	4,309	8,020	10,681
	43,025	60,294	77,591
Deferred:			
Federal	17,152	14,062	9,580
State and local	2,365	1,861	741
	19,517	15,923	10,321
Provision for income taxes	\$ 62,542	\$ 76,217	\$ 87,912

At December 31, 2005, the Company had net operating loss carryforwards of approximately \$249,000 for state income tax purposes that expire in years 2006 through 2023, and a capital loss carryforward of approximately \$2,245, the majority of which expires in 2006. The utilization of the state net operating loss carryforwards in future years is dependent upon the profitability of certain subsidiary corporations. The utilization of the capital loss carryforward requires capital gain income in the future. Therefore, the Company has recorded a valuation allowance of \$8,323 against the deferred tax asset attributable to the state net operating loss carryforwards and the capital loss carryforward, which represents a decrease in the valuation allowance of \$2,036 in 2005.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

Components of the Company's deferred tax liabilities and assets are as follows:

	December 31,	
	2004	2005
Deferred tax assets:		
Net operating loss carryforwards	\$ 9,531	\$ 7,539
Capital loss carryforward	828	853
Allowance for doubtful accounts	6,973	9,999
Accrued vacation and other accrued liabilities	28,243	29,165
Notes revaluation	8,971	7,904
Investment in partnerships	226	1,205
Other	781	114
Less: valuation allowance	(10,359)	(8,323)
	45,194	48,456
Deferred tax liabilities:		
Depreciation	25,967	19,843
Amortization	41,042	51,451
	67,009	71,294

Net deferred tax liability	\$ 21,815	\$ 22,838
----------------------------	-----------	-----------

In addition to the provision for income taxes included in the accompanying statements of operations, a deferred tax expense of \$989 related to the interest rate swap agreement has been reflected in the accumulated other comprehensive income as reported in stockholders' equity for the year ended December 31, 2005.

F-23

Table of Contents

The following is a reconciliation of the statutory federal and state income tax rates to the effective rates as a percentage of income before provision for income taxes as reported in the consolidated financial statements:

	Year Ended December 31,		
	2003	2004	2005
U.S. federal income tax rate	35.0%	35.0%	35.0%
State income tax, net of federal income tax benefit	1.7	2.5	4.2
Decrease in valuation allowances	1.0	0.7	(0.8)
Nondeductible merger-related costs			1.8
Other	0.3	0.3	0.2
Effective income tax rate	38.0%	38.5%	40.4%

9. STOCKHOLDERS' EQUITY (numbers of shares in thousands)**Stock Option Plans**

As of December 31, 2005, the Company had seven stock option plans. The Company has also issued options, referred to in these financial statements as Free Standing Options outside of these plans. Options issued as Free Standing Options are for employees, officers, directors, and other key persons. Free Standing Options vest over various periods up to five years and have a term of ten years from the date of issuance.

Options issued under the 2004, 1999 and 1996 Employee Plans have similar terms and purposes. Specifically, options under each of these plans are available for grant to eligible employees and other key persons, the options generally vest over four to five years and have a term of ten years from the date of issuance. These plans were adopted in 2004, 1999 and 1996, and have 6,750, 11,250, and 9,000 shares of common stock reserved for issuance, respectively.

Options issued under the Equity Compensation Plan (Equity Plan), adopted by Dialysis Centers of America, Inc. (DCA) in 1995, are for eligible employees and other key persons. The options vest over periods up to three years and have a term of ten years from the date of issuance. There are 525 shares of common stock reserved for issuance. The Company merged with DCA in a pooling-of-interests transaction in February 1999.

Options issued under the 1994 Stock Option Plan (1994 Plan) are for directors, officers and other key persons. These options vest over four years, and have a term of ten years from the date of issuance. This plan was adopted in 1994, and there are 1,080 shares of common stock reserved for issuance.

Options issued under the Directors Plan are for non-management directors. These options vest immediately, and have a term of ten years from the date of issuance. The plan was adopted in 1996, and there are 337 shares of common stock reserved for issuance.

Options issued under the RDM Plan, adopted by Renal Disease Management by Physicians, Inc. (RDM) in 1997, are for directors, officers, and other key persons. These options vest immediately upon grant and have a term of 5 to 10 years from the date of issuance. There are 163 shares of common stock reserved for issuance. The Company merged with RDM in a pooling-of-interests transaction in April 2000.

The Company has adopted the disclosure-only provisions of SFAS No. 123 and SFAS No. 148, but applies APB Opinion No. 25 and related interpretations in accounting for its plans. Therefore, compensation expense would generally be recorded only if on the date of grant the then-current market price of the underlying stock exceeded the exercise price.

\$46.36 \$46.36	59	9.44	46.36	59	46.36
\$2.22 \$46.36	8,017	6.48	\$21.48	8,017	\$21.48

Pro forma information regarding net income and net income per share is required by SFAS No. 123 and SFAS No. 148, and has been determined as if the Company had accounted for its employee stock options under the fair value method of that Statement. The fair value for these options was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions:

	Year Ended December 31,		
	2003	2004	2005
Expected volatility	39%	37%	35%
Expected dividend yield	None	None	None
Risk-free interest rate	3.25%	3.70%	4.20%
Expected life of options	5 years	4 years	4 years

F-25

Table of Contents

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options, which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because the Company's employee stock options have characteristics that are significantly different from those of traded options, and because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its employee stock options.

All outstanding stock options and all of the outstanding nonvested stock awards became fully vested on August 24, 2005, as a result of the stockholders' vote to approve Fresenius Medical Care's acquisition of Renal Care Group, which represented a change of control under the applicable provisions of the Company's stock-based compensation plans. The information set forth below reflects the estimated pro-forma after tax charge the Company would have incurred during each period presented. As a result of the accelerated vesting of stock options all remaining unamortized stock option expense is reflected in the 2005 period.

The following table presents the pro forma effect on net income and net income per share as if we had applied the fair value based method and recognition provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, to stock-based compensation to employees and directors:

	Year Ended December 31		
	2003	2004	2005
Net income, as reported	\$ 102,056	\$ 121,833	\$ 129,713
Add: stock-based compensation expense, net of related tax effects, included in the determination of net income as reported	424	244	431
Less: stock-based compensation expense, net of related tax effects, determined by the fair value-based method	(8,663)	(10,365)	(23,236)
Pro forma net income	\$ 93,817	\$ 111,712	\$ 106,908
Net income per share:			
Basic, as reported	\$ 1.40	\$ 1.80	\$ 1.90
Basic, pro forma	\$ 1.29	\$ 1.65	\$ 1.57
Diluted, as reported	\$ 1.37	\$ 1.74	\$ 1.83
Diluted, pro forma	\$ 1.26	\$ 1.60	\$ 1.51

The effect of applying SFAS No. 123 and SFAS No. 148 for providing pro forma disclosure is not likely to be representative of the effect on reported net income for future years.

Stock Split

On April 27, 2004, the Company announced a three-for-two stock split in the form of a stock dividend distributed to shareholders of record as of May 7, 2004. On May 24, 2004 the Company issued one share for every two shares held by shareholders as of the record date. The par value of our common stock remained unchanged at \$0.01. All share amounts in these financial statements have been restated to reflect the stock split.

Authorized Shares

On June 9, 2004, the Company's shareholders approved an amendment to the certificate of incorporation increasing the number of authorized shares of common stock from 90,000 to 150,000.

Table of Contents**10. LEASES**

The Company rents office space and space for its dialysis facilities under lease agreements that are classified as operating leases for financial statement purposes. The Company's capital leases are primarily for buildings and equipment. At December 31, 2005, future minimum rental payments for non-cancelable operating leases with terms of one year or more, and capital leases consisted of the following:

	Operating Leases	Capital Leases
2006	\$ 47,961	\$ 800
2007	45,417	743
2008	40,959	658
2009	35,226	588
2010	30,828	603
Thereafter	101,915	3,734
Less: portion representing interest		(2,502)
	\$ 302,306	\$ 4,624

Certain leases of the Company contain escalating payments and are recorded on a straight-line basis. Rent expense was \$30,729, \$45,055 and \$52,040 for the years ended December 31, 2003, 2004 and 2005, respectively.

11. EMPLOYEE BENEFIT PLANS**Defined Contribution Plans**

The Company has qualified defined contribution plans covering substantially all employees that permit participants to make voluntary contributions. The Company pays all general and administrative expenses of the plans and makes matching contributions on behalf of the employees. The Company made contributions relating to these plans totaling \$2,978, \$3,294 and \$3,541 for the years ended December 31, 2003, 2004 and 2005, respectively.

Defined Benefit Plans

On January 1, 2005, the Company adopted a Supplemental Executive Retirement Plan (SERP) that provides retirement benefits to the Company's executive officers. The SERP is accounted for as a defined benefit plan under SFAS No. 87, *Employers' Accounting for Pensions*. For the year ended December 31, 2005, the Company has recognized pension costs of \$1,354. As of December 31, 2005 the Company has recorded an accrued pension liability of \$2,864 and an intangible asset of \$1,510.

Effective January 29, 2003, the Company implemented a retirement benefit plan for Sam A. Brooks, the Company's former Chairman, Chief Executive Officer and President. Mr. Brooks died March 20, 2003. The plan provides that the Company will make 120 monthly payments of \$54 each to Mr. Brooks' beneficiary, beginning in April 2003. As a result, the Company recorded a \$5,350 charge representing the pre-tax net present value of such payments during the first quarter of 2003. As of December 31, 2005 the Company has accrued liabilities totaling \$4,085 related to this defined benefit plan.

Employee Stock Purchase Plan

The Company has an Employee Stock Purchase Plan (Stock Purchase Plan) that provides substantially all employees an opportunity to purchase shares of its common stock in amounts not to exceed 10% of eligible compensation or \$25 of common stock each calendar year. Annually, the participant's December 31 account balance is used to purchase shares of stock at the lesser of 85% of the fair market value of shares at the beginning of the year or December 31. On May 14, 2005 the Company discontinued employee contributions to the Employee Stock Purchase Plan as a result of the pending Fresenius Medical Care transaction. At December 31, 2004 and 2005, \$4,511 and \$2,036, respectively, were included in accrued wages and benefits relating to the Stock Purchase Plan.

12. EARNINGS PER SHARE

Basic net income per share is based on the weighted average number of common shares outstanding during the periods. Diluted net income per share is based on the weighted average number of common shares outstanding during the periods plus the effect of dilutive stock options calculated using the treasury stock method.

F-27

Table of Contents

The following table sets forth the computation of basic and diluted net income per share.

	2003	2004	2005
Numerator:			
Numerator for basic and diluted net income per share	\$ 102,056	\$ 121,833	\$ 129,713
Denominator:			
Denominator for basic net income per share weighted-average shares	72,719	67,581	68,110
Effect of dilutive securities:			
Stock options	2,034	2,311	2,724
Denominator for diluted net income per share-adjusted weighted-average shares and assumed conversions	74,753	69,892	70,834
Basic net income per share	\$ 1.40	\$ 1.80	\$ 1.90
Diluted net income per share	\$ 1.37	\$ 1.74	\$ 1.83

13. COMMITMENTS AND CONTINGENCIES

On August 9, 2005, the Company received a subpoena from the office of the United States Attorney for the Eastern District of Missouri. The subpoena requires the Company to produce documents related to numerous aspects of our business and operations. The subpoena includes specific requests for documents related to the Company's supply company, pharmaceutical and other ancillary services the Company provides to patients (including the administration of EPO), the Company's relationships with pharmaceutical companies, the Company's relationships with physicians, medical director compensation, joint ventures with physicians and the Company's purchases of dialysis equipment from Fresenius Medical Care. The subpoena was issued in connection with a joint civil and criminal investigation. The Company is cooperating with the government's investigation; the Company has produced numerous documents to the government in response to this subpoena. The Company has incurred significant legal and other expenses responding to the subpoena and has experienced distraction of management attention. Compliance with the subpoena will require the Company to incur substantial additional legal and other expenses and will require further management attention. To the Company's knowledge, no proceedings have been initiated against it at this time, but the Company cannot predict whether or when proceedings might be initiated. In addition, the Company cannot predict the outcome of any proceedings that may be initiated against the Company as a result of this investigation. Any such proceedings could have a material adverse effect on the Company's business, financial condition and results of operations.

On October 25, 2004, the Company received a subpoena from the office of the United States Attorney for the Eastern District of New York. The subpoena requires the Company to produce documents related to numerous aspects of our business and operations, including those of RenaLab, Inc., the Company's laboratory. The subpoena includes specific requests for documents related to testing for parathyroid hormone (PTH) levels and vitamin D therapies. The Company is cooperating with the government's investigation. The Company has produced numerous documents to the government in response to this subpoena. The Company has incurred significant legal and other expenses responding to the subpoena. Compliance with this subpoena will require the Company to incur additional legal expenses and could distract management attention. To the Company's knowledge, no proceedings have been initiated against the Company at this time, but the Company cannot predict whether or when proceedings might be initiated. The Company cannot predict the outcome of any proceedings that may be initiated against it as a result of this investigation. Any such proceedings could have a material adverse effect on the Company's business, financial condition and results of operations.

If any aspect of the Company's operations is found to violate applicable laws, then the Company may be subject to severe sanctions, and the Company could be required to alter or discontinue the challenged conduct or both. If sanctions are imposed on the Company, then there could be a material adverse effect on the Company's business, financial condition and results of operations. If the Company is required to alter or discontinue practices, then the

Company may not be able to do so successfully, which could have a material adverse effect on the Company's business, financial condition and results of operations.

Laws and regulations governing the Medicare and Medicaid programs are complex and subject to interpretation. The Company believes that it is in compliance with all applicable laws and regulations governing the Medicare and Medicaid programs. Compliance with such laws and regulations can be subject to additional government review and interpretation as well as significant regulatory action including fines, penalties, and exclusion from the Medicare and Medicaid programs.

The Company is involved in other litigation and regulatory investigations arising in the ordinary course of business. In the opinion of management, after consultation with legal counsel, these matters will be resolved without material adverse effect on the Company's consolidated financial position or results of operations.

The Company generally engages practicing board-certified or board-eligible nephrologists to serve as medical directors for its centers. Medical directors are responsible for the administration and monitoring of the Company's patient care policies, including patient education, administration of dialysis treatment, development programs and assessment of all patients. The Company pays medical director fees that are consistent with the fair market value of the required supervisory services. Such medical director agreements typically have a term of five to ten years with renewal options of two or three years. As of December 31, 2005, estimated commitments for medical director fees for the year 2006 are \$28,971 and are \$139,540 over the remaining lives of the agreements.

F-28

Table of Contents**14. SELECTED QUARTERLY FINANCIAL DATA (unaudited)**

The following tables include, for 2004 and 2005, certain selected quarterly financial data. In the opinion of the Company's management, this unaudited information has been prepared on the same basis as the audited information and includes all adjustments necessary to present fairly the information included therein. The operating results for any quarter are not necessarily indicative of results for any future period.

	2004			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Net revenue	\$ 278,028	\$ 340,854	\$ 356,111	\$ 370,054
Operating expenses	209,158	265,239	274,200	284,254
