ING Clarion Global Real Estate Income Fund

Letter to Shareholders**Dear Shareholder:**

We are pleased to deliver the 2007 semi-annual report for the ING Clarion Global Real Estate Income Fund (the Fund). The Fund is now in its fourth year of operation and it continues to deliver our shareholders what we believe to be attractive dividend income, capital appreciation, and well diversified exposure to the growing universe of income producing global real estate securities.

Performance Review

After posting positive returns for the first five months of 2007, global real estate stocks sold off sharply in June falling -7.1% to finish barely positive for the first six-months of the year. The Fund was down for the same period, but still shows impressive gains over the last 12 months. The Net Asset Value (NAV) return for the first half of 2007 was -1.46%, but the market return (share price appreciation plus dividends received) was down more -19.04%, because the Fund's share price fell from an 8% premium at the end of last year to an 11% discount to NAV at June 30th. The closing price of the Fund on June 30th was \$19.36 per share versus an NAV per share of \$21.78. During the first six months of 2007 the S&P/Citigroup World Property Index (S&PWPI) rose a paltry 0.62% and the Morgan Stanley REIT Preferred Index (MSRPI) rose 1.20%. A blended benchmark of 80% S&PWPI and 20% MSRPI rose 0.79% in the first six months of 2007. The Fund's NAV return underperformance in 2007 was due entirely to the month of June due to the heavy weighting in common stock (88%) which underperformed preferred stocks materially in the month (-7.1% versus -0.3% for MSRPI in June). Over the last 12 months the Fund has delivered 29.25% NAV appreciation versus a 22.01% increase for the 80%/20% blend of S&PWPI and MSRPI for the same period. The Fund paid total dividends of \$0.69 per share during the first six months of the year consisting of six regular monthly dividends of \$0.115 per share. The annualized dividend of \$1.38 per share equates to a 7.1% yield on share price and a 6.3% yield on NAV.⁽¹⁾

	6 Months	1 Year	3 Years	Since Inception ⁽³⁾
ING Clarion Global Real Estate Income Fund Market Price	-19.04%	24.86%	29.15%	19.34%
ING Clarion Global Real Estate Income Fund Net Asset Value	-1.46%	29.25%	29.67%	24.74%
S&P/Citigroup World Property Index ⁽²⁾	0.62%	25.51%	26.97%	24.06%
Morgan Stanley Real Estate Preferred Index ⁽²⁾	1.20%	8.45%	7.70%	6.16%
Blend 80% S&P/Citigroup World Property Index, 20% Morgan Stanley Real Estate Preferred Index ⁽²⁾	0.79%	22.01%	23.00%	20.39%

Performance shown is historical and does not guarantee future results. Current performance may be higher or lower than performance quoted. Investment return and principal value of an investment will fluctuate, and shares when redeemed may be worth more or less than their original cost. Returns less than one year are not annualized. Total investment returns reflecting changes in net asset value per share and assume that dividends and capital gain distributions, if any, were reinvested. These percentages are not an indication of the performance of a shareholder's investment in the fund based on market price.

(1) Yields fluctuate and are not guaranteed. Annualized dividend yield is the latest monthly dividend shown as an annualized percentage of net asset value/market price at month-end. Annualized dividend yield simply measures the level of dividends and is not a complete measure of performance.

(2) The S&P/Citigroup World Property Index is unmanaged market-weighted total return index which consists of over 450 real estate companies from 18 developed markets with a free float total market capitalization of at least U.S. \$100 million that derive more than 60% of their revenue from real estate development, management, rental and/or direct investment in physical property. The Morgan Stanley REIT Preferred Index is a preferred stock market capitalization weighted index of all exchange traded preferred securities of equity REITS.

Edgar Filing: ING CLARION GLOBAL REAL ESTATE INCOME FUND - Form N-CSRS

(3) *Since inception performance calculated using an inception date of 2/24/04, which coincides with the first market price and NAV published.*

ING Clarion Global Real Estate Income Fund **Letter to Shareholders** continued

Portfolio Review

The Fund's investments remain well-diversified by property type and geography as shown in the pie charts below. The Fund's allocation to U.S. REIT Common Stock has shifted markedly over the past 12 months, down 8% from a year ago. The change in regional allocation was made in response to changing relative values and the improving fundamentals in many international real estate markets, especially those in the Asia-Pacific region and in resource rich countries. At June 30th, the Fund's portfolio was 20% in Asia-Pacific, 24% in Europe (including the UK), 8% in Canada (one of the best performing countries this year), 12% in U.S. preferred stock of real estate companies, and 36% in U.S. REIT common stock. Generally, the Fund's low weighting to preferred stock of real estate companies has contributed to the Fund's good absolute and relative performance over the past year. June was an exception, however, when common stock significantly underperformed preferred stock.

The Fund recognized significant realized gains during the first six months of 2007. The realized gains were largely a result of mergers and acquisitions as we received significant cash and recognized significant gains when the takeovers of some portfolio holdings were culminated in 2007. Trading was largely focused on redeploying the Funds received from takeovers and increasing the portfolio weighting to Asia and Europe.

Total preferred stock and debt of the Fund was \$1,095 million (or 33% of the Fund's total assets), which is comfortably below the 35% leverage discussed in the Fund's offering documents. We chose to lock in attractive longer-term rates on \$400M by executing two interest rate swaps in May 2004, one of which expired on 7/01/07. The remaining swap has an average rate of 4.3% thus assuring an attractive low interest cost for the term remaining on the swap of approximately 2 years. We are exploring pricing and options to replace the expired swap and to increase the amount of borrowing that is fixed .

(3) Percentages presented are based on managed fund assets and are subject to change.

Market Commentary

The best performing region for the six months per the S&P/Citigroup World Property Index, was the Asia-Pacific region (12.0%). All three major countries in the Asia Pacific region outperformed: Japan (9.1%), Australia (8.1%), and Hong Kong (13.6%). The Fund's performance was also helped by its allocations to Canada (up 8.3%). Performance for other regions was disappointing as stocks in the Europe fell -7.8% driven primarily by the United Kingdom which fell -16.4%. The U.S. was also a laggard falling -6.2%.

Rising interest rates - bane or boon? In many parts of the world, central bankers are raising interest rates. For many investors the knee-jerk reaction is to sell real estate stocks when interest rates are rising, which explains some of the poor performance for real estate stocks in the second quarter. However, a thorough analysis casts some doubt on the wisdom of selling. Real estate stocks have historically low correlation to bonds. The correlation between global real estate securities and global bonds is actually quite low over the last 10 years suggesting that it is wrong to think of high-yielding real estate stocks as bond surrogates. When rates rise due to strong economic growth, real estate cash flows are often positively affected. Demand rises, rents increase and real estate company cash flows. Often times the increase in real estate values from higher cash flow growth more than offsets the pricing pressure of higher rates.

The recent sell-off seems overdone given the stability of private market values. With the increase in interest rates (particularly long-term rates), it is reasonable to expect that investors will increase required yields on real estate. In real estate jargon, the initial yield requirement is called a cap rate (short for capitalization rates). Speculation is that higher interest rates will lead to higher cap rates resulting in lower real estate values (or NAVs) assuming cash flows remain constant. It seems a good theory, but so far the facts are that cap rates have shown little movement. Based on conversations with private market buyers (including ING real estate's private equity professionals), there appears to have been little change in cap rates and valuations so far. We estimate that real estate stocks are trading in many regions at double-digit discounts to NAV. Even if cap rates eventually go up, it seems the market has already marked down the values of real estate stocks sufficiently to match the recent changes in interest rates and then some.

Meanwhile, M&A confirms good value in public markets. Private equity buyers continue to take advantage of the discount pricing of public real estate companies, especially in Australia and the U.S. Our portfolio continues to benefit from this activity. Investa Property Group, one of our largest positions in Australia is being taken private by Morgan Stanley. One of our Canadian investments, Sunrise Canada, was acquired by Ventas earlier this year. One of our top ten holdings, Archstone-Smith, a leading owner of apartments in the U.S. is the subject of a takeover bid by Tishman-Speyer announced in late May. Even in Europe, M&A was a factor in the second quarter as Unibail agreed to acquire Rodamco Europe (another large holding in the Fund) to create the biggest owner of retail in Europe in a stock for stock deal set to close later this year. The acceleration in M&A activity is a reminder that if the market continues to discount the value of public companies, money will take advantage of the arbitrage opportunity.

We remain cautiously optimistic about the total return potential of an actively managed portfolio of real estate stocks. We acknowledge that the sector may continue to experience higher-than-average volatility until investors overcome the near-term wall of worry about higher interest rates. We believe the Fund remains well positioned to meet its primary objective of delivering a high level of stable monthly income as well as its secondary objective of capital appreciation. We appreciate your continued faith and confidence.
Sincerely,

T. Ritson Ferguson
President and
Chief Executive Officer

Steven D. Burton
Co-Portfolio Manager

Table of Contents

ING Clarion Global Real Estate Income Fund **Financial Highlights** continued

- (3) Based on average shares outstanding.
- (4) Total investment return on net asset value is calculated assuming a purchase at the offering price of \$15.00 (less \$0.675 sales load) per share paid by the initial shareholder on the first day and a sale at NAV on the last day of the period reported. Total investment return based upon market value is calculated assuming a purchase of Common Shares at the then-current market price of \$15.00 on February 25, 2004 (initial public offering).
- (5) Total investment return does not reflect brokerage commissions. A return calculated for a period of less than one year is not annualized. Dividends and distributions are assumed to be reinvested at the prices obtained under the Trust's Dividend Reinvestment Plan. NAV total return is calculated assuming reinvestment of distributions at NAV on the date of the distribution.
- (6) Annualized.
- + Does not reflect the effects of dividends to Preferred Shareholders.
- ++ The final determination of the source of the 2007 distributions for tax purposes will be made after the end of the Fund's fiscal year.

12 Semi-Annual Report June 30, 2007

Table of Contents

ING Clarion Global Real Estate Income Fund

Notes to **Financial Statements** June 30, 2007 (unaudited)

1. Fund Organization

ING Clarion Global Real Estate Income Fund (the Trust) is a non-diversified, closed-end management investment company that was organized as a Delaware statutory trust on November 6, 2003 under the Investment Company Act of 1940, as amended. ING Clarion Real Estate Securities, L.P. (the Advisor) is the Trust's investment advisor. The Trust commenced operations on February 18, 2004.

2. Significant Accounting Policies

The following accounting policies are in accordance with U.S. generally accepted accounting principles and are consistently followed by the Trust.

Securities Valuation The net asset value of the common shares of the Trust will be computed based upon the value of the Trust's portfolio securities and other assets. The Trust calculates net asset value per common share by subtracting the Trust's liabilities (including accrued expenses, dividends payable and any borrowings of the Trust) and the liquidation value of any outstanding preferred shares from the Trust's total assets (the value of the securities the Trust holds, plus cash or other assets, including interest accrued but not yet received) and dividing the result by the total number of common shares of the Trust outstanding. Net asset value per common share will be determined as of the close of the regular trading session (usually 4:00 p.m., EST) on the New York Stock Exchange (NYSE) on each business day on which the NYSE is open for trading.

For purposes of determining the net asset value of the Trust, readily marketable portfolio assets traded principally on an exchange, or on a similar regulated market reporting contemporaneous transaction prices, are valued, except as indicated below, at the last sale price for such assets on such principal markets on the business day on which such value is being determined. If there has been no sale on such day, the securities are valued at the mean of the closing bid and asked prices on such day. If no bid or asked prices are quoted on such day, then the security is valued by such method as the Trust's board of trustees (the Board) shall determine in good faith to reflect its fair market value. Readily marketable assets not traded on such a market are valued at the current bid prices provided by dealers or other sources approved by the Board, including pricing services when such prices are believed by the Board to reflect the fair market value of such assets. The prices provided by a pricing service take into account institutional size trading in similar groups of assets and any developments related to specific assets. Foreign securities are valued based upon quotations from the primary market in which they are traded and are translated from the local currency into U.S. dollars using current exchange rates. In addition, if quotations are not readily available, or if the values have been materially affected by events occurring after the closing of a foreign market, assets may be valued by another method that the Board of Trustees believes accurately reflects fair value. Other assets are valued at fair value by or pursuant to guidelines approved by the Board.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities, which mature in 60 days or less are valued at, amortized cost, which approximates market value.

Foreign Currency Translation The books and records of the Trust are maintained in U.S. dollars. Foreign currency amounts are translated into U.S. dollars on the following basis:

- (i) market value of investment securities, other assets and liabilities at the current rates of exchange;
- (ii)

purchases and sales of investment securities, income and expenses at the rate of exchange prevailing on the respective dates of such transactions.

Although the net assets of the Trust are presented at the foreign exchange rates and market values at the close of each fiscal period, the Trust does not isolate that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of long-term securities held at the end of the fiscal period. Similarly, the Trust does not isolate the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the fiscal period. Accordingly, realized foreign currency gains or losses will be included in the reported net realized gains or losses on investment transactions.

Net realized gains or losses on foreign currency transactions represent net foreign exchange gains or losses from the holding of foreign currencies, currency gains or losses realized between the trade date and settlement date on securities transactions, and the difference between the amounts of dividends, interest and foreign withholding taxes recorded on the Trust's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized currency gains or losses from valuing foreign currency denominated assets or liabilities (other than investments) at period end exchange rates are reflected as a component of net unrealized appreciation or depreciation on investments and foreign currencies.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin as a result of, among other factors, the possibility of political or economic instability, or the level of governmental supervision and regulation of foreign securities markets.

Forward Exchange Currency Contracts The Trust may enter into forward exchange currency contracts in order to hedge its exposure to changes in foreign currency exchange rates on its foreign portfolio holdings, to hedge certain firm purchase and sales commitments denominated in foreign currencies and for investment purposes. A forward exchange currency contract is a commitment to purchase or sell a foreign currency on a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contracts and the closing of such contracts would be included in net realized gain or loss on foreign currency transactions.

Table of Contents

ING Clarion Global Real Estate Income Fund **Notes to Financial Statements** (unaudited) continued

Fluctuations in the value of open forward exchange currency contracts are recorded for financial reporting purposes as unrealized appreciation and depreciation by the Trust.

The Trust's custodian will place and maintain cash not available for investment or other liquid assets in a separate account of the Trust having a value at least equal to the aggregate amount of the Trust's commitments under forward exchange currency contracts entered into with respect to position hedges.

Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the U.S. dollar. The face or contract amount, in U.S. dollars, reflects the total exposure the Trust has in that particular currency contract. As of June 30, 2007, the Trust did not hold any forward exchange currency contracts.

Securities Transactions and Investment Income Securities transactions are recorded on a trade date basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost. Dividend income is recorded on the ex-dividend date. Distributions received from investments in REITs are recorded as dividend income on ex-dividend date, subject to reclassification upon notice of the character of such distributions by the issuer. The portion of dividend attributable to the return of capital is recorded against the cost basis of the security. Withholding taxes on foreign dividends are recorded net of reclaimable amounts, at the time the related income is earned. Non-cash dividends included in dividend income, if any, are recorded at the fair market value of the securities received. Interest income, including accretion of original issue discount, where applicable, and accretion of discount on short-term investments, is recorded on the accrual basis. Realized gains and losses from securities transactions are recorded on the basis of identified cost.

Swaps The Trust may enter into swap agreements. A swap is an agreement to exchange the return generated by one instrument for the return generated by another instrument. The Trust enters into interest rate swap agreements to manage its exposure to interest rate and credit risk. Interest rate swap agreements involve the exchange by the Trust with another party of their respective commitments to pay or receive interest. Dividends and interest on the securities in the swap are included in the value of the exchange. The swaps are valued daily at current market value and any unrealized gain or loss is included in the Statement of Assets and Liabilities. Gain or loss is realized on the periodic reset date or termination date of the swap and is equal to the difference between the Trust's basis in the swap and the proceeds of the closing transaction, including any fees. During the period that the swap agreement is open, the Trust may be subject to risk from the potential inability of the counterparty to meet the terms of the agreement. The swaps involve elements of both market and credit risk in excess of the amounts reflected on the Statement of Assets and Liabilities.

The Trust entered into interest rate swap agreements for the six months ended June 30, 2007. Details of the swap agreements outstanding as of June 30, 2007 were as follows:

Counterparty	Termination Date	Notional Amount (000)	Fixed Rate	Floating Rate	Unrealized Appreciation
Citigroup	7/01/2007	\$200,000	3.68%	1 Month LIBOR	\$ 283,176
Royal Bank of Canada	7/01/2009	200,000	4.32%	1 Month LIBOR	3,526,019
					\$3,809,195

For each swap noted, the Trust pays a fixed rate and receives a floating rate.

Dividends and Distributions to Shareholders Dividends from net investment income, if any, are declared and paid on a monthly basis. Distributions from net realized capital gains, if any, are normally distributed in December. Income dividends and capital gain distributions to common shareholders are recorded on the ex-dividend date. To the extent the Trust's net realized capital gains, if any, can be offset by capital loss carryforwards, it is the policy of the Trust not to distribute such gains.

The current monthly rate is \$0.115 per share. The Trust continues to evaluate its monthly distribution policy in light of ongoing economic and market conditions and may change the amount of the monthly distributions in the future.

Use of Estimates The preparation of financial statements, in conformity with U.S. generally accepted accounting principles, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of financial statements and the reported amounts of expenses during the reporting period. Actual results could differ from those estimates.

3. Concentration of Risk

Under normal market conditions, the Trust's investments will be concentrated in income-producing common equity securities, preferred securities, convertible securities and non-convertible debt securities issued by companies deriving the majority of their revenue from the ownership, construction, financing, management and/or sale of commercial, industrial, and/or residential real estate. Values of the securities of such companies may fluctuate due to economic, legal, cultural, geopolitical or technological developments affecting various global real estate industries.

4. Investment Management Agreement and Other Agreements

Pursuant to an investment management agreement between the Advisor and the Trust, the Advisor is responsible for the daily management of the Trust's portfolio of investments, which includes buying and selling securities for the Trust, as well as investment research. The Advisor will receive an annual fee from the Trust based on the average weekly value of the Trust's managed assets, which includes the amount from the issuance of the preferred shares. The Trust pays for investment advisory services and facilities through a fee

14 Semi-Annual Report June 30, 2007

Table of Contents

ING Clarion Global Real Estate Income Fund **Notes to Financial Statements** (unaudited) continued

payable monthly in arrears at an annual rate equal to 0.85% of the average weekly value of the Trust's managed assets plus certain direct and allocated expenses of the Advisor incurred on the Trust's behalf. The Advisor has agreed to waive a portion of its management fee in the amount of 0.25% of the average weekly values of the Trust's managed assets for the first five years of the Trust's operations (through February, 2009), and for a declining amount for an additional four years (through February, 2013). During the six months ended June 30, 2007, the Trust incurred management fees of \$10,351,025, which are net of \$4,312,927 in management fees waived by the Advisor.

The Trust has multiple service agreements with The Bank of New York (BNY). Under the servicing agreements, BNY will perform custodial, fund accounting, certain administrative services, and transfer agency services for the Trust. As custodian, BNY is responsible for the custody of the Trust's assets. As administrator, BNY is responsible for maintaining the books and records of the Trust's securities and cash. As transfer agent, BNY is responsible for performing transfer agency services for the Trust. The Bank of New York is a subsidiary of The Bank of New York Company, Inc. (BNYCo), a financial holding company. The Bank of New York is the principal operating subsidiary of BNYCo. On July 2, 2007, BNYCo merged with Mellon Financial Corporation. The new company is called The Bank of New York Mellon Corporation.

5. Portfolio Securities

For the six months ended June 30, 2007, there were purchases and sales transactions of \$131,500,872 and \$177,698,600, respectively.

6. Federal Income Taxes

The Trust intends to elect to be, and qualify for treatment as, a regulated investment company under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). A regulated investment company generally pays no federal income tax on the income and gains that it distributes. The Trust intends to meet the calendar year distribution requirements imposed by the Code to avoid the imposition of a 4% excise tax.

The Trust distinguishes between dividends on a tax basis and on a financial reporting basis and only distributions in excess of tax basis earnings and profits are reported in the financial statements as a tax return of capital. Differences in the recognition or classification of income between the financial statements and tax earnings and profits which result in temporary over-distributions for financial statement purposes are classified as distributions in excess of net investment income or accumulated net realized gains in the components of net assets on the Statement of Assets and Liabilities.

In order to present paid-in capital in excess of par and accumulated net realized gains or losses on the Statement of Assets and Liabilities that more closely represent their tax character, certain adjustments have been made to additional paid-in capital, undistributed net investment income and accumulated net realized gains or losses on investments. For the year ended December 31, 2006, the adjustments were to decrease accumulated net realized gain on investments by \$5,671,898 and increase undistributed net investment income by \$5,671,898 due to the difference in the treatment for book and tax purposes of certain investments.

The final determination of the source of the 2007 distributions for tax purposes will be made after the end of the Trust's fiscal year and will be reported to shareholders in February 2007 on Form 1099-DIV.

Information on the components of net assets as of June 30, 2007 is as follows:

Cost of Investments	Gross Unrealized Appreciation	Gross Unrealized Depreciation	Net Unrealized Appreciation on Investments
\$2,343,096,644	\$967,236,036	\$(19,240,520)	\$947,995,516

For the year ended December 31, 2006, the tax character of distributions paid, as reflected in the Statements of Changes in Net Assets, were \$265,465,336 of ordinary income and \$100,149,675 of long-term capital, respectively.

7. Borrowings

The Trust leverages through the issuance of preferred shares, and/or borrowings in an aggregate amount of approximately 35% of the Trust's capital to buy additional securities. The Trust may borrow from banks or other financial institutions. The use of preferred shares and other borrowing techniques to leverage the common shares can create risks.

The Trust has access to a secured line of credit up to \$300,000,000 from BNY for borrowing purposes. Borrowings under this arrangement bear interest at the Federal funds rate plus 50 basis points. At June 30, 2007, there was an outstanding borrowing of \$185,178,500 in connection with the Trust's line of credit.

The average daily amount of borrowings during the six months ended June 30, 2007 was \$193,437,929, with a related weighted average interest rate of 5.83%. The maximum amount outstanding for the six months ended June 30, 2007, was \$396,446,000.

8. Capital

During 2004, the Trust issued 101,000,000 shares of Common Stock at \$15.00. In connection with the Trust's DRIP plan, the Trust issued 106,999 and 1,408,492 common shares in 2007 and 2006, respectively. At June 30, 2007, the Trust had outstanding common shares of 102,676,778 with a par value of \$0.001 per share. The Advisor owned 6,981 shares of the common shares outstanding.

On February 26, 2004, the Trust's Board authorized the issuance of preferred shares, in addition to the existing common shares, as part of its leverage strategy. Preferred shares issued by the Trust have seniority over the common shares.

The Trust issued 4,000 shares of Preferred Shares Series T28A, 4,000 shares of Preferred Shares Series W28B, 4,000 shares of Preferred Shares Series T28C, 4,000 shares of Preferred Shares Series W28D, 6,200 shares of Preferred Shares Series T7 and 6,200 shares of Preferred Shares Series W7, each with a liquidation value of \$25,000 per share plus accumulated and unpaid dividends.

Table of ContentsING Clarion Global Real Estate Income Fund **Notes to Financial Statements** (unaudited) continued

Dividends will be accumulated daily at an annual rate set through auction procedures. Distributions of net realized capital gains, if any, will be paid annually. On January 17, 2007, the Trust issued 4,000 shares each of Preferred Shares Series TH and F, respectively, for approximately \$197,700,000 (sales proceeds less sales load and offering costs). Consistent with the other preferred shares each share has a liquidation value of \$25,000 per share plus accumulated and unpaid dividends and have seniority over common shares.

For the six months ended June 30, 2007, the annualized dividend rates ranged from:

	High	Low	At June 30, 2007
Series T28A	5.30%	5.15%	5.20%
Series W28B	5.30	5.18	5.18
Series T28C	5.25	5.19	5.22
Series W28D	5.30	5.20	5.20
Series T7	5.26	4.95	5.15
Series W7	5.27	5.00	5.20
Series TH7	5.27	5.00	5.27
Series F7	5.30	5.00	5.30

The Trust is subject to certain limitations and restrictions while preferred shares are outstanding. Failure to comply with these limitations and restrictions could preclude the Trust from declaring any dividends or distributions to common shareholders or repurchasing common shares and/or could trigger the mandatory redemption of preferred shares at their liquidation value.

The holders of preferred shares have voting rights equal to the holders of common shares (one vote per share) and will vote together with holders of common shares as a single class. However, holders of preferred shares, voting as a separate class, are also entitled to elect two Trustees. In addition, the Investment Company Act of 1940, as amended, requires that, along with approval by shareholders that might otherwise be required, the approval of the holders of a majority of any outstanding preferred shares, voting separately as a class, would be required to (a) adopt any plan of reorganization that would adversely affect the preferred shares, (b) change a Trust's sub-classification as a closed-end investment company or change its fundamental investment restrictions and (c) change the nature of its business so as to cease to be an investment company.

9. Indemnifications

The Trust enters into contracts that contain a variety of indemnifications. The Trust's exposure under these arrangements is unknown. However, the Trust has not had prior claims or losses or current claims or losses pursuant to these contracts.

10. New Accounting Pronouncements

Effective June 29, 2007, the Fund adopted FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented, and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold are recorded as a tax benefit or expense in the current year. The adoption of FIN 48 did not result in the recording of any

tax benefit or expense in the current period. Management's determination regarding FIN 48 may be subject to review and adjustment at a later date based on factors including, but not limited to, an on-going analysis of tax laws, regulations and interpretations thereof.

On September 15, 2006, the FASB released Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157) which provides enhanced guidance for measuring fair value. The standard requires companies to provide expanded information about the assets and liabilities measured at fair value and the potential effect of these fair valuations on an entity's financial performance. The standard does not expand the use of fair value in any new circumstances, but provides clarification on acceptable fair valuation methods and applications. Adoption of FAS 157 is required for fiscal years beginning after November 15, 2007. At this time, management is evaluating the implications of FAS 157 and its impact in the financial statements has not yet been determined.

ING Clarion Global Real Estate Income Fund

Dividend Reinvestment Plan (unaudited)

Pursuant to the Trust's Dividend Reinvestment Plan (the "Plan"), shareholders of the Trust are automatically enrolled, to have all distributions of dividends and capital gains reinvested by The Bank of New York (the "Plan Agent") in the Trust's shares pursuant to the Plan. You may elect not to participate in the Plan and to receive all dividends in cash by sending written instructions or by contacting The Bank of New York, as dividend disbursing agent, at the address set forth below. Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by contacting the Plan Agent before the dividend record date; otherwise such termination or resumption will be effective with respect to any subsequently declared dividend or other distribution. Shareholders who do not participate in the Plan will receive all distributions in cash paid by check and mailed directly to the shareholders of record (or if the shares are held in street or other nominee name, then to the nominee) by the Plan Agent, which serves as agent for the shareholders in administering the Plan.

After the Trust declares a dividend or determines to make a capital gain distribution, the Plan Agent will acquire shares for the participants' account, depending upon the circumstances described below, either (i) through receipt of unissued but authorized shares from the Trust (newly issued shares) or (ii) by open market purchases. If, on the dividend payment date, the NAV is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participants. The number of newly issued shares to be credited to each participant's account will be determined by dividing the dollar amount of the dividend by the NAV on the date the shares are issued. However, if the NAV is less than 95% of the market price on the payment date, the dollar amount of the dividend will be divided by 95% of the market price on the payment date. If, on the dividend payment date, the NAV is greater than the market value per share plus estimated brokerage commissions (such condition being referred to herein as "market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participants in open-market purchases.

The Plan Agent's fees for the handling of the reinvestment of dividends and distributions will be paid by the Trust. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open market purchases in connection with the reinvestment of dividends and distributions. The automatic reinvestment of dividends and distributions will not relieve participants of any Federal income tax that may be payable on such dividends or distributions.

The Trust reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Trust reserves the right to amend the Plan to include a service charge payable by the participants. Participants that request a sale of shares through the Plan Agent are subject to a \$2.50 sales fee and a \$0.15 per share sold brokerage commission. All correspondence concerning the Plan should be directed to the Plan Agent at The Bank of New York, Attention: Stock Transfer Department, P.O. Box 11258, New York, NY 10286-1258, Phone Number: (800) 432-8224.
