Massachusetts Bay Transportation Authority Selects NICE Smart Video Solutions in Large-scale Upgrade Project

To improve security, customer service, and operational efficiency across mass transit system

Raanana, Israel, October 04, 2006 - NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has been selected by systems integrator Intelligent Systems Co., Inc. (iSYS) to supply advanced digital video surveillance and monitoring solutions as part of a large-scale upgrade project for the Massachusetts Bay Transportation Authority's (MBTA) new Automated Fare Collection (AFC) system.

NICE's advanced real-time distributed digital video solution will be deployed system-wide to help the MBTA, which provides service to 175 cities and towns, improve security, customer service, and operational efficiency. The advanced digital video solution will be utilized to automatically detect suspicious events and provide real-time alerts to security personnel. The result is enhanced commuter safety and better asset protection. The advanced digital video solution from NICE will be integrated with state of the art communications systems, enabling managers to see what is happening in more than seventy stations at any given time.

The MBTA uses six Hub Centers to monitor alarms from all across the transit system. The end result will be increased safety for both customers and employees and dramatically improved customer service throughout the entire MBTA system.

"In this unique application, the NICE solution provides unparalleled security and asset protection through proactive, automated focus and real-time notification for immediate resolution of security and customer support matters as they occur," said Ian Ehrenberg, VP and General Manager of NICE's digital video security division in the Americas.

About the MBTA

The MBTA service district includes 175 cities and towns. In 1997 the MBTA celebrated the 100th anniversary of the nation's first subway, the Green Line. The system contains a total of 181 routes and 252 stations (not including bus stops).

About Intelligent Systems Co., Inc. (iSYS)

iSYS is wholly owned subsidiary of City Lights Electrical Co., Inc. and is a leading New England based systems integrator, specializing in the application and implementation of communications based solutions within the transportation industry.

NICE Receives Follow-on Order to Boost Security at the Eiffel Tower

Company's smart video solutions help secure over 6 million annual visitors

October 09, 2006, Paris, France, Office - NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has received a follow-on order for its smart video solutions to help secure the Eiffel Tower.

With real-time, distributed digital video security solutions and advanced video analytics, NICE helps streamline security operations and protect the Eiffel Tower, enabling site managers to identify risk in real time, make optimal decisions, and take action that improves security.

NICE provides real-time threat detection. With advanced digital video analytics they can easily retrace the steps of suspicious individuals and verify whether the event indeed constitutes a real security risk. The result is enhanced safety of visitors to the monument.

"Currently deployed at a large number of high-profile city-centers, national monuments across the world, and highly trafficked locations, NICE's solutions have become the preferred choice for ensuring the safety and security of citizens and tourists. The continuing preference of NICE by this market is a testimony to our quality and reputation," said Israel Livnat, President of NICE's Security Group. "We are honored to be part of this project to and contribute to the protection of France's premier monument and its visitors."

**NICE and Avaya Extend Global Alliance to Deliver
the Market-Leading Workforce Management Solution from NICE Subsidiary IEX**

Leading Power Producer, Eskom, Maximizes Call Routing Investment with Avaya and IEX Technology

Ra'anana, Israel and Basking Ridge, NJ, October 10, 2006 - NICE Systems Ltd. (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance and Avaya Inc. (NYSE: AV), a leading global provider of business communications applications, systems and services, today announced the expansion of their global relationship to encompass the distribution of workforce management software from IEX Corporation, a subsidiary of NICE. The decision to extend the long-term distribution agreement between NICE and Avaya to include the IEX[®] TotalView[®] Workforce Management system is based upon the companies' shared vision for delivering a comprehensive suite of applications that address the full spectrum of contact center business issues - from operational to strategic.

Mutual contact center customers such as Eskom Holdings Ltd. of South Africa, one of the world's leading power producers, are already realizing substantial benefits from using IEX workforce management software in conjunction with Avaya intelligent routing technology.

"The IEX workforce management system has supplied us with a strong staff planning foundation while helping us maximize our Avaya call routing technology investments," said Eskom Corporate Specialist of Customer Service Kevin von Berg. The integrated contact routing simulation capabilities developed by IEX, in close collaboration with Avaya, have enabled Eskom to improve the accuracy of calculated staffing requirements and multiskilled agent efficiencies. TotalView will also play a vital role in staff planning and control based on automatic call distribution (ACD) and network routing rules in Eskom's newly rolled-out VoIP-based Virtual Contact Center configuration.

"We are excited about expanding our long-standing relationship with NICE to include workforce management technology from IEX," said Jim Smith, Avaya Vice President and General Manager, Customer Service Applications Division. "Adding TotalView to our portfolio gives us the strongest workforce management offering and the most complete contact center offering to serve our customers. We are now able to meet the business needs of mutual contact center clients like Eskom that need advanced multi-site and multi-skill staff planning support."

With the expansion of the distribution agreement, contact centers around the world can now purchase TotalView directly from Avaya in addition to the NICE Solutions, which Avaya has been reselling since 1997.

"NICE and Avaya have enjoyed a strong and fruitful relationship for many years," said NICE President Shlomo Shamir. "We are excited about extending that relationship to include distribution of solution offered by our new subsidiary, IEX. TotalView and NICE Perform(TM) have a strong synergy and are a natural fit to be sold in conjunction with Avaya call routing technology."

NICE also is a Premier member of the Avaya Developer*Connection* program - an initiative to promote the development, compliance-testing and co-marketing of innovative, third-party products that are compatible with standards-based Avaya solutions.

Leading Japanese Insurance Provider, AXA to Implement NICE's VoIP Solutions in Four Sites

Solution selected for unmatched reliability and scalability for mission critical, distributed VoIP environments

Ra'anana, Israel, October 18, 2006 - NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that it has been selected by AXA Non-life Insurance Company Ltd., Japan, to supply its VoIP solution to centralize recording of customer interactions in its multi-site environment. The order was received through NICE channel partner ITFOR.

NICE's unified architecture enables AXA Non-life Insurance Company Ltd to implement centralized recording for hybrid capture of TDM and VoIP customer interactions, across four sites. The solution will also capture interactions on IP and digital phones from various leading vendors. AXA Non-life Insurance Company Ltd will benefit from NICE's system resilience, advanced redundancy capabilities, and a suite of applications for liability and risk management.

After a rigorous selection process, AXA Non-life Insurance Company Ltd. has selected NICE for a multi-site VoIP environment, to address challenges as a financial services provider.

"We are happy to have been chosen by AXA, one of Japan's leading financial services companies," said Doron Ben-Sira, President of NICE APAC. "NICE is leading the market in large-scale, mission-critical deployments of VoIP recording. Our VoIP solutions along with our advanced applications for quality monitoring, liability and interactions analytics have become the de-facto choice for organizations whether operating in pure VoIP or hybrid environments."

"Furthermore, the NICE Perform Compliance Suite is proving to be a unique competitive differentiator, as financial services organizations are seeking to harness the power of interaction analytics to address key challenges in regulatory compliance, risk management, and corporate governance," he continued.

About AXA Non-Life Insurance Japan

AXA Non-Life Insurance Company Limited (AXA Direct Japan) is a member of the AXA Group companies in Japan and has been doing business closely with AXA Japan Holding and AXA Life Insurance. AXA Non-Life Insurance sells its automobile products through their own contact centers, e-brokers, agents, FAX OCR and web site. Group products are sold through the sale network of AXA Life. Currently, there are four call centers located in different regions within Japan with more than 400 agents and 100 administrative staff working in the organization. Further

information can be obtained from the company website: www.axa-direct.co.jp

About AXA

AXA Group is a worldwide leader in Financial Protection. AXA's operations are diverse geographically, with major operations in Western Europe, North America and the Asia/Pacific area. AXA had Euro 1,064 billion in assets under management as of December 31, 2005. For full year 2005, IFRS revenues amounted to Euro 72 billion and IFRS underlying earnings amounted to Euro 3,258 billion. The AXA ordinary share is listed and trades under the symbol AXA on the Paris Stock Exchange. The AXA American Depository Share is also listed on the NYSE under the ticker symbol AXA.

About NICE

NICE Systems (NASDAQ: NICE) is the leading provider of Insight from Interactions(TM) solutions, based on advanced analytics of unstructured multimedia content - from telephony, web, radio and video communications. World's Largest Provider of Financial Services to Credit Unions, CUNA Mutual, Aims to Enhance Service and Revenues with NICE's Holistic Solution for Contact Centers

Utilizing NICE Perform(TM) and TotalView(TM) from NICE company, IEX

Ra'anana, Israel, October 25, 2006 - NICE Systems (NASDAQ: NICE), the global provider of advanced solutions that enable organizations to extract Insight from Interactions(TM) to drive performance, today announced that CUNA Mutual Group, the world's largest provider of financial services to credit unions and their members worldwide, expects to increase quality of customer service and revenues with NICE's holistic solution for contact centers with NICE Perform(TM) and TotalView(TM) from IEX, a NICE company. When all phases of the implementation are complete NICE will be implemented for 1000 agents at three sites.

The combined solutions' capabilities, along with performance management solutions from NICE, can provide CUNA Mutual with a holistic view of contact center business performance that uniquely addresses the full spectrum of business issues ranging from operational to strategic. NICE offers CUNA Mutual the leading solutions in quality monitoring, workforce management, interaction analytics, and coaching, enabling performance improvements at all levels - the agent, supervisor, and contact center, and providing a significant contribution to enterprise performance.

CUNA Mutual can now hone in on calls where particular issues are mentioned or an elevated level of emotion is displayed by the calling customer or handling service agent. This facilitates a deeper understanding of the issues that prompt customers to call or impact customer loyalty, and identifies areas, both within the call center and throughout the enterprise, where improvements may be needed. Furthermore, they can compile data seamlessly across the enterprise, enabling more accurate and effective forecasting, planning and scheduling of the workforce. This results in more consistent service to customers with lower operating costs and higher employee morale.

"CUNA Mutual is committed to providing best-in-class service possible to its customers," said Rick Roy, Senior Vice President Customer Operations, CUNA Mutual. "NICE has given us the tools we need to really hear what our customers are saying, while also improving operational efficiencies, maximizing resources, supporting agent training and coaching, and even increasing revenues."

"We also engaged NICE's Consulting Services team to help us maximize the benefits of the NICE solution, accelerate our ROI, focus on desirable outcomes, and deliver tangible and measurable results," added Mr. Roy .

"CUNA Mutual's implementation of the NICE suite of solutions for improving contact center business performance is one of the most advanced in the market," said Eran Gorev, President and CEO, NICE Systems Inc. "This is a great

example of a growing trend by companies to leverage a holistic view of the contact center and the insights gathered from customer interactions to better understand the needs of their customers and the dynamics of their market."

About CUNA Mutual

CUNA Mutual Group is the leading provider of financial services to credit unions and their members worldwide. More information on the company is available at www.cunamutual.com.
