PART I

ITEM 1. BUSINESS.

Introduction

Stelax Industries Ltd. (the "Registrant" or the "Company") ceased all trading operations in March 2002 when a Receiver acquired all assets of the Company's sole operating entity, Stelax (U.K.) Limited, assets that were subsequently sold to an affiliate of the Company. It is the Company's intention, subject to legal and financial restraints being removed, to incorporate other business activities in the future.

The financial statements included herein include restatements of fiscal year 2002 and 2001. Refer to note M of the consolidated financial statements for further details.

The registrant was incorporated under the laws of British Columbia, Canada in May 1987 as Zfax Image Corp, The Registrant changed its name from ZFAX Image Corp. to its present name in May 1996.

The Registrant's principal executive offices are now located at 5515 Meadow Crest Dr., Dallas, Texas 75229, and its telephone number is (214) 987-1197. Unless otherwise required by the context, the term "Company" as used herein shall mean the Registrant and the Registrant's U.K. subsidiary, hereinafter referred to as "Stelax (U.K.)".

Until 1992 the Registrant was engaged in the development and production of a portable facsimile machine using certain advanced facsimile technology. On March 31, 1995, the Registrant sold this business to the Zfax company president for book value.

On November 15, 1995, Zfax finalized agreements to acquire the real, personal and intellectual property comprising the Aberneath steel mill facility, paying cash of approximately \$1,377,000 and issuing 2,925,000 shares of Common Stock and assuming debt of approximately \$1,316,000. The Registrant financed the acquisition principally through the issuance of \$600,000 in convertible notes, which were subsequently converted, and the sale of \$1,540,000 of Common Stock and Warrants.

From 1995 through March 2002 the Registrant's principal activities were conducted through its wholly-owned subsidiary, Stelax (U.K.), a corporation organized under the laws of the United Kingdom.

In July 1996, the Registrant sold 10,800,000 shares of Common Stock, raising \$10,831,000. Approximately \$1,100,000 of the proceeds was used to liquidate outstanding mortgages on the Aberneath property. As part of this financing, the Registrant's Common Stock began trading on the Le Nouveau Marche of the Paris Stock Exchange.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Beginning in fiscal 1997, the Registrant commenced operations from the Aberneath plant, principally producing stainless steel. The Registrant also began developing the market for its Nuovinox product. In 1998, the market for stainless steel was subject to severe pricing pressures, and the Company determined to cease production of stainless steel while the Registrant developed the Nuovinox market. Operating losses since 1997 essentially depleted the Registrant's working capital.

In the first quarter of fiscal 2001, the Registrant began receiving orders for the Nuovinox product, In July 2000, with its assets unencumbered, the Registrant obtained financing from Bank of America so that the Registrant could fulfill those orders. This financing provided \$5,000,000 of a term loan, \$500,000 of receivable financing and \$250,000 inventory financing. Bank of America subsequently assigned this obligation to Wells Fargo. While the Registrant made some shipments in fiscal 2001, the registrant expended resources on new mill tooling, completing a finishing line and improving Nuovinox's metallurgical properties and product quality.

Stelax (U.K.) commenced quantity production in the quarter ended June30, 2001 but was unable to increase production to sufficiently large volumes to achieve profitability or service debt.

On March 7th, 2002 the subsidiary company, Stelax (U.K.), was placed into Administrative Receivership by Wells Fargo Bank, which held a loan note that ranked senior to all other debt of Stelax (U.K.). Control over the assets of Stelax (U.K.) passed from Stelax Industries to the U.K. Receiver at this point. A court judgement was subsequently obtained against Stelax Industries Ltd. Please refer to Item 3 for further details.

Until March 2002 Stelax (U.K.) owned certain property and intellectual rights in Wales, United Kingdom comprising the Aberneath steel mill facilities (the "Aberneath Facility"). The property comprised of land, buildings, plant and machinery. Stelax (U.K.) produced two separate product lines through the Aberneath Facility: (i) Nuovinox(TM), a stainless steel clad product with a

1

carbon steel core utilizing the Company's unique patented manufacturing process and (ii) steel abrasive shot pellets which are used as an abrasive cleaner and polisher in steel manufacturing. See "--- Products", below.

In the opinion of the Company's management, interest in the Nuovinox product remains strong.

With the appointment of the Receiver to the U.K. company in March 2002 the Company's operations ceased. The Receiver appointed to Stelax (U.K.) was the firm of Kingston Smith & Partners of 60, Goswell Rd., London EC1M 7AD.

With the acquisition of the assets by the Receiver and subsequent purchase by an affiliate of the Company, the Company lost all ability to produce Nuovinox, including any inventory, facilities, equipment and intellectual property such as patents and trademarks. All the assets were subsequently acquired by an affiliate of the Company, see below and see Item 12. Certain Relationships and Related Transactions.

Between March 2002 and August 2003 (inclusive), the Receiver exercised complete managerial control over the assets of Stelax (U.K.). Final delivery against one outstanding order was made in March 2002 but since that time no production or deliveries took place. All but one of the employees of the U.K. company was made redundant in March 2002. During the period March 2002 and August 2003 the Receiver was authorized to undertake the sale of the U.K. company's assets

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

either as a whole entity or on the basis of break up.

In June 2003 an affiliate of the Registrant Company, through an intermediary company (Timaran Ltd.), made a contract with the Receiver to purchase all of the Stelax (U.K.) assets held by the Receiver. The contract required staged payments over a three month licensed period. Timaran Ltd. started recommissioning and operating under this license agreement. In August Timaran completed the purchase of the U.K. assets from the Receiver. Timaran has assigned all its rights and interest to Stelax International Ltd., a private company organized in the United Kingdom and unassociated with Stelax Industries Ltd.

The Aberneath Facility (also referred to as The Wern Works)

The Aberneath Facility, now owned by Timaran Ltd., is located at Briton Ferry, Neath in South Wales, United Kingdom. The facility is located on the banks of the River Neath beside a deep water wharf and close to highway and national rail links. The facility includes approximately five acres of land. The steel mill plant is divided into three bays, each approximately 650 feet long, for a total of approximately 130,000 square feet of production space. There is a separate building on the premises with approximately 8,000 square feet of office and administrative space.

The facility has an open air storage and preparation area covering approximately two acres of land for the purpose of preparing scrap metal for use in the Nuovinox product. The interior of the plant contains a modern walking beam furnace, a rolling mill, a cooling and finishing area and a quality control process area. All production areas in the plant are serviced by overhead gantries or pedestal mounted or mobile cranes.

During the year ended March 31, 2000, the Company produced limited quantities of Nuovinox for use by potential customers in their testing and evaluation of the product. During the fiscal year ended March 31, 2001, the Company sold limited quantities of its Nuovinox product. Some production occurred in the fiscal year ended March 31, 2002 but the Company had depleted its capital resources which ultimately resulted in the Receiver gaining control and title over the Aberneath facility which was subsequently sold to Wells Fargo Business Credit, Inc.

Products

With the sale of the Company's sole operating assets by the Receiver to an affiliate of the Company, the Company's operations ceased. Prior to the possession of the U.K company's assets by the Receiver, the Company had been capable of producing two distinct product lines at it's Aberneath facility: (i) the Company's patented Nuovinox product, a stainless steel clad product with metallurgically joined carbon steel core and (ii) steel abrasive shot in various sizes marketed under the name Stelablast.

Nuovinox is a carbon steel product clad with stainless steel. From raw stainless steel the Registrant created tubes several inches in diameter and filled the tubes with treated scrap steel, reducing and elongating the tubes in a proprietary process until the desired product was created, usually rebar 1/2 inch or larger in diameter with a core of carbon steel and an outer casing of stainless steel. The most commonly produced product was rebar, but Nuovinox

could be manufactured in flat bar, round bar and pipes of various sizes and dimensions. The resultant product, which generally consisted of up to 25% of stainless steel by weight, created a molecular bond between the carbon steel core and the stainless steel exterior. The raw materials for the rebar comes from very low grade scrap steel.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Nuovinox has corrosion resistant properties comparable to stainless steel and achieves superior level of mechanical strength when compared with solid stainless steels manufactured by other parties. The Company priced Nuovinox at approximately one-third of the price of stainless steel products.

The properties of the stainless steel cladding enable Nuovinox to be used for many applications which require an upgrading of carbon steel or a substitute for stainless steel, in particular where corrosion resistance, hygiene and aesthetics are determining factors. Prior to the possession of all of the Company's assets, the Company believed there was considerable interest in Nuovinox from customers around the world who expressed their intention of using the product in a variety of applications, a belief that continues.

Nuovinox competed with carbon and stainless steel based on the following properties and characteristics of Nuovinox:

- " High level of corrosion resistance;
- " Stronger than pure stainless steel (when incorporating a high tensile carbon steel core);
- " Strength and ductility superior to mild steel; and
- " Minimal maintenance when incorporated in structures.

The abrasive products produced by the Company were produced as a by-product of the process used in producing Nuovinox. The Registrant believed that its abrasive product, Stelablast, offers a superior and longer lasting shot blast than conventional cast steel shot at a price of approximately 44% of conventional cast steel shot.

Customers and Distribution

During the 2000, 2001 and 2002 fiscal years, the Company distributed its Nuovinox and abrasive products through its direct marketing efforts. Over the last several years, the Registrant has developed contacts with United States and Federal and State transportation authorizations, confirming the utility of Nuovinox for highways and bridges.

In 1997, the United States passed the Intermodal Surface Transportation Act to test for new materials used in highway construction with a goal of achieving a 75 to 100 year life objective for bridges and highways. Existing highway life is approximately 25 years, largely because rebar and dowels rust, expand, and break down roads and bridges, particularly in high corrosive areas near salt water. Dowels are used to pin concrete highway sections that are about 15 feet apart with each lane requiring 12 dowels per join. While stainless steel can be used for pins and rebar in concrete highways, particularly in high corrosive areas, stainless steel costs approximately three times that of Nuovinox.

Despite the receivership of Stelax (U.K.) market interest in the Nuovinox product remains strong.

It is the Company's intention, subject to legal and financial restraints being removed, to incorporate other business activities in the future.

Industry Conditions and Competition

The steel industry is generally considered to be highly competitive and cyclical with a great number of large and sophisticated producers, all of whom have greater financial and technical resources than the Company. Additionally, the cycles for steel products vary from one specialty steel to another.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Economic conditions among end-users of steel products may result in cyclical downturns in business, even in markets expected to expand over the long term. Until a wide range of different products used in varying sections is produced by the Company, such downturns may have a significant impact on the Company's revenues.

Nuovinox is a new product that has been extensively tested. During the 2001 fiscal year, the Company received various commitments for the use of the product. Further product acceptance may be affected by pricing and the other variables. Management of the Company is not aware of any product other than pure stainless steel that competes directly with Nuovinox.

3

Currency Fluctuations

It was anticipated that the Company's expenses and sales would be denominated in several currencies, including major European currencies, the US Dollar and the Yen. As a result the Company's operating income and cash flow was significantly exposed to currency fluctuations. Management's policy is to monitor the Company's exposure to currency risks, and, as appropriate, use financial forward or other instruments to minimize the effect of these fluctuations. No such instruments were held as of March 31, 2002 or 2003 and there was no assurance that the Company would be able to obtain such instruments.

Research and Development

During the last three fiscal years the Company has not spent any significant amounts on research and development.

Patents and Trademarks

The Company held approximately 70 worldwide patents for Nuovinox. The Company considered its patents important for the success of this product. Presently the Company does not have any patent rights.

Employees

As of September 15, 2004, the Company did not have any employees or independent contractors working for it.

ITEM 2. PROPERTIES.

The Company's principal executive offices in the United States are located at a private residence, 5515 Meadow Crest Dr., Dallas, TX 75229. Until acquired by a Receiver in March 2002 the Company owned the land and buildings comprising the Aberneath Facility in Wales, United Kingdom. See Item 1. Business - The Aberneath Facility.

ITEM 3. LEGAL PROCEEDINGS.

In March 2002 Stelax (U.K.) was placed into administrative receivership by the loan creditor, Wells Fargo Business Credit Inc., who were exercising powers and remedies available to them by law and by the Debenture and Guarantee dated June 30, 2000 and made between the Banc of America and Stelax (U.K.) and assigned to Wells Fargo Business Credit Inc. on the April 20, 2001. The Registrant's operations thus ceased. Stelax Industries, Ltd., and Stelax U.K were collectively the borrowers under the aforementioned Debenture and Guarantee. The preferential rights under the latter over other creditors included that of action to liquidate the assets of the Company and levy late payment interest and

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

charges upon the borrowers. Wells Fargo exercised their power to appoint the Receiver to the U.K. company and gain control over the operational assets of the group. On January 31, 2003, the United States District Court for the Southern District of New York entered an Order of Judgment in favor of Wells Fargo Business Credit, Inc. against Stelax Industries, Ltd., and Stelax (U.K.) in the amount of \$4,041,778.27 plus \$911.46 per day for each day from August 22, 2002 until the entry of the judgment which occurred on January 31, 2003. The Company's calculation of cumulative interest to the March 31, 2002 was \$ 433,998 and continued to provide for interest at the rate of \$911.46 per each day throughout the fiscal year to March 31, 2003. The financial statements show a loan note payable of \$ 3,645,833 and accrued interest of \$766,513 at March 31, 2003. In the Order of Judgment, the judge adopted the magistrate's recommendations. The magistrate's recommendations indicated that the plaintiff filed a complaint against the defendants on March 5, 2002. On June 13, 2002, the Court's clerk issued a Certificate of Default and on July 2, 2002, the court entered the default judgment, referring the matter to the magistrate to determine damages. In August 2003 Timaran Limited purchased the assets of the U.K. company from the Receiver. Timaran Limited has assigned all its rights and interest in these assets to Stelax International Ltd., a private company unassociated with Stelax Industries Ltd. The judgement against Stelax Industries Ltd. still remains.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

Not applicable.

4

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS.

Market Information

During fiscal 2002 and 2003, the Registrant's Common Stock was quoted on the NASDAQ Bulletin Board System. The Registrant's Common Stock in the United States trades under the symbol "STAX". They represent inter-dealer prices and do not represent actual transactions. The range of the closing high and low bid and prices as quoted on the NASDAQ Bulletin Board from April 1, 2001 through March 31, 2003 is as follows:

Fiscal 2002 -----	High ----	Low ---	High ----
First Quarter	0.81	0.32	0.87
Second Quarter	0.70	0.25	0.73
Third Quarter	0.91	0.23	0.97
Fourth Quarter	0.75	0.24	0.78
	Bid		
	-----		-----
Fiscal 2003	High	Low	High

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

First Quarter	0.41	0.23	0.43
Second Quarter	0.34	0.19	0.50
Third Quarter	0.18	0.18	0.505
Fourth Quarter	0.38	0.21	0.46

The Registrant's Common Stock is also quoted on the Le Nouveau Marche of the Paris Stock Exchange. Trading on the Le Nouveau Marche commenced July 11, 1996.

Holder

As of September 15, 2004, there were approximately 200 holders of record of the Registrant's Common Stock.

Dividends

The future payment by the Registrant of dividends, if any, rests within the discretion of its Board of Directors and will depend upon the Registrant's earnings, if any, capital requirements and the Registrant's financial condition, as well as other relevant factors. The Registrant has not declared dividends since its inception, and has no present intention of paying cash dividends on its Common Stock in the foreseeable future.

Foreign Regulation

The Investment Canada Act ("ICA"), which became effective on June 30, 1985, regulates the acquisition by non-Canadians of control of a Canadian business enterprise. In effect, the ICA required review by Investment Canada, the agency which administers the ICA, and approval by the Canadian government in the case of an acquisition of control of a Canadian business by a non-Canadian where: (i) in the case of a direct acquisition (for example, through a share purchase or asset purchase), the assets of the business are \$5 million or more in value; or (ii) in the case of an indirect acquisition (for example, the acquisition of the foreign parent of the Canadian business) where the Canadian business has assets of \$50 million or more in value or if the Canadian business represents more than 50% of the assets of the original group and the Canadian business has assets of \$5 million or more in value. Review and approval are also required for the acquisition or establishment of a new business in areas concerning Canada's cultural heritage or national identity such as book publishing, film production and distribution, television and radio, production and distribution of music, and the oil and natural gas industry, regardless of the size of the investment.

In the context of the Company, in essence, three methods of acquiring control of a Canadian business are regulated by the ICA: (i) the acquisition of all or substantially all of the assets used in carrying on the Canadian business; (ii) the acquisition, directly and indirectly, of voting shares of a Canadian corporation carrying on the Canadian business; (iii) the acquisition of voting

control of an entity which controls, directly or indirectly, another entity carrying on a Canadian business. An acquisition of a majority of the voting interests of an entity, including a corporation, is deemed to be an acquisition of control under the ICA. An acquisition of less than one-third of the voting shares of a corporation is deemed not to be an acquisition of control. An acquisition of less than a majority, but one-third or more, of the voting shares of a corporation is presumed to be an acquisition of control unless it can be established that on the acquisition the corporation is not, in fact, controlled

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

by the acquirer through the ownership of voting shares. For partnerships, trusts, joint ventures or other unincorporated entities, an acquisition of less than a majority of the voting interests is deemed not to be an acquisition of control.

In 1988, the ICA was amended pursuant to the Free Trade Agreement dated January 2, 1988 between Canada and the United States to relax the restrictions of the ICA. As a result of these amendments, except where the Canadian business is in the cultural, oil and gas, uranium, financial services or transportation sectors, the threshold for direct acquisition of control by U.S. investors and other foreign investors acquiring control of a Canadian business from U.S. investors has been raised from \$5 million to \$150 million of gross assets, and indirect acquisitions are not reviewable.

In addition to the foregoing, the ICA requires that all other acquisitions of control of Canadian businesses by non-Canadians are subject to formal notification to the Canadian government. These provisions require a foreign investor to give notice in the required form, which notices are for information, as opposed to review, purposes.

The Company does not believe that it is subject to the provisions of ICA because it does not have a place of business or employees in Canada nor assets in Canada used to carry on the Company's business, all of which are definitional requirements to be considered a Canadian business subject to such act. The Company does not plan to alter its contacts with Canada and, therefore, believes that ICA will continue not to be applicable to the Common Stock of the Company and the acquisition thereof by a non-resident or non-citizen of Canada. However, in the event that management of the Company should for whatever reason decide that it would be in the best interests of the Company to hire employees in Canada, lease office space in Canada or acquire properties in Canada, the Company would probably be deemed to be a Canadian based enterprise and ICA would be applicable.

Certain Tax Matters

Following is a brief summary of the United States and Canadian federal income tax provisions which the Company believes are material to an understanding of the federal income tax matters relating to the ownership of the Company's Common Stock. The discussion is for general information only and is not a complete description of all potential consequences which may arise or of all the rules that may be relevant to certain stockholders. The discussion is not intended to be, nor should it be construed to be, legal or tax advice to any particular stockholder. It is the responsibility of each stockholder of the Company to consult with his own tax advisors with respect to these and other provisions which may affect his individual tax position.

The presently existing tax treaty between the United States and Canada essentially calls for taxation of stockholders by the stockholder's country of residence. In those instances in which a tax may be assessed by the other country, a corresponding credit against the tax owed in the country of residence is normally available. Stockholders of the Registrant should consult with their own tax advisors, however, for full details.

A. United States Taxes.

In general, a stockholder that is a non resident alien will not be taxed by the United States on dividends paid by the Registrant. However, a non resident alien stockholder who engages in a U.S. business under certain circumstances may be subject to United States federal income tax. Also, a non resident alien may be subject to United States withholding tax on dividends paid by the Registrant, though a tax treaty may alter this treatment. Please consult your tax advisor

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

regarding the impact of applicable tax treaties.

The gross amount of dividends received by a United States individual or United States resident will be subject to United States federal income tax generally in the same manner as dividends received from United States corporations. However, the stockholder generally may claim a credit against his United States federal income tax liability for the Canadian tax withheld from the dividend payment. The amount of the foreign tax credit is subject to various limitations. Stockholders should consult their own tax advisors with respect to such limitations. Dividends from foreign corporations such as the Registrant do not qualify for the dividends received deduction for corporate stockholders under Code Section 243, but may qualify for the dividends received

6

deduction for dividends paid by certain foreign corporations under Code Section 245 if the holder owns at least 10% of the stock of the Registrant by vote and value.

Except in the case of shares beneficially owned by a person who is or is deemed to be a resident of the United States or has or is deemed to have a "permanent establishment" in the United States, United States federal income tax consequences generally will not arise upon a disposition of the Registrant's Common Stock by a resident of Canada. The United States federal income tax consequences arising for a United States resident upon a disposition of the Registrant's Common Stock will depend upon whether such shares are capital assets. Generally, if the disposed stock is a capital asset, the entire gain or loss realized upon the disposition would be treated as capital gain or loss. Such capital gain or loss will be long-term if the Common Stock is held for more than one year. However, even if the shares are considered capital assets, under certain circumstances a portion of the gain may be recharacterized as ordinary income under Code Section 1248. If the disposed stock is not a capital asset, the entire gain or loss would be treated as ordinary income or loss.

Capital gains income generally is taxed at a maximum tax rate of 28%. An individual's capital losses are still allowed in full against capital gains. In addition, capital losses are allowed against up to \$3,000 of ordinary income, and the excess of net long-term capital loss over net short-term capital gain is allowed in full for this purpose.

B. Canadian Taxes.

The following is a summary of the principal Canadian federal income tax considerations generally applicable in respect of the Common Shares. The tax consequences to any particular holder of Common Shares will vary according to the status of that holder as an individual, trust, corporation, or member of a partnership, the jurisdiction in which that holder is subject to taxation, the place where that holder is resident and, generally, according to that holder's particular circumstances. This summary is applicable only to holders who are resident in the United States, have never been resident in Canada, hold their Common Shares as capital property, and will not use or hold the Common Shares in carrying on business in Canada.

This summary is based upon current provisions of the Income Tax Act of Canada and the regulations thereunder (collectively, the "ITA"), publicly-announced current proposals to amend the ITA and the current administrative practices of Revenue Canada. This summary does not take

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

into account provincial income tax consequences. The summary assumes that the publicly announced current proposals will be enacted as proposed with effective dates set out therein; otherwise, the summary assumes that there will be no other changes in law whether by judicial or legislative action.

This summary is of a general nature only and is not exhaustive of all possible income tax consequences. It is not intended as legal or tax advice to any particular holder of Common Shares and should not be so construed. Each holder should consult his own tax advisor with respect to the income tax consequences applicable to him in his own particular circumstances.

Disposition of Common Shares

Under the ITA, a gain from the sale of Common Shares by a non-resident will not be subject to Canadian tax, provided the shareholder (and/or persons who do not deal at arm's length with the shareholder) has not held a "substantial interest" in the Registrant (25% or more of the shares of any class of the Registrant's stock) at any time in the five years preceding the disposition. Generally, the Canadian-United States Tax Convention (the "Tax Convention") will exempt from Canadian taxation any capital gain realized by a resident of the United States, provided that the value of the common stock is not derived principally from real property situated in Canada.

If a non-resident was to dispose of Common Shares to another Canadian corporation which deals or is deemed to deal on a non-arm's length basis with the non-resident and which, immediately after the disposition, is connected with the Registrant (i.e., controls the Registrant or holds shares representing more than 10% of the voting power and more than 10% of the market value of all issued and outstanding Common Shares of the Registrant), the excess of the proceeds over the paid-up capital of the Common Shares sold will be deemed to be taxable as a dividend either immediately or eventually by means of a deduction in computing the paid-up capital of the purchasing corporation.

7

Dividends

In the case of any dividends paid to non-residents, the Canadian tax is withheld by the Registrant, which remits only the net amount to the shareholder. By virtue of Article X of the Tax Convention, the rate of tax on dividends paid to beneficial owners who are residents of the United States is generally limited to 15% of the gross dividend (or 10%, reducing to 6% in 1996 and 5% in 1997 and thereafter, in the case of certain corporate shareholders owning at least 10% of the Registrant's voting shares). In the absence of the treaty provisions, the rate of Canadian withholding tax imposed on non-residents is 25% of the gross dividend. Stock dividends received by non-residents from the Registrant are treated by Canada as ordinary dividends.

ITEM 6. SELECTED FINANCIAL DATA

The table below sets forth certain financial data for the Company for its fiscal years ended March 31, 2003 to 1999 and should be read in conjunction with the Consolidated Financial Statements and Notes thereto included elsewhere herein.

	YEARS ENDED MARCH 31,	
	2002	2001

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

		(restated)1	(restated)1
Sales	\$ -	\$ 559,170	\$ 304,377

Total Liabilities	5,484,655	5,180,734	5,791,155
Common Stock Outstanding at year end	47,948,038	43,184,775	39,240,175
Net Loss per share	\$ (0.03)	\$ (0.26)	\$ (0.08)

1 See Note N in the Notes to Consolidated Financial Statements herein

2 The data for this period has been restated from that presented previously to reflect those adjustments set forth in Note N that affect these periods.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL PLAN OF OPERATION.

Forward-Looking Statements - Cautionary Statements. This Annual Report contains certain "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act"), and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Specifically, all statements other than statements of historical facts included in this report regarding the Company's financial position, business strategy and plans and objectives of management of the Company for future operations are forward-looking statements. These forward-looking statements are based on the beliefs of the Company's management, as well as assumptions made by and information currently available to the Company's management. When used in this report, the words "anticipate," "believe," "estimate," "expect," and "intend" and words or phrases of similar import, as they relate to the Company or Company management, are intended to identify forward-looking statements. Such statements reflect the current view of the Company with respect to future events and are subject to risks, uncertainties and assumptions related to various factors including, without limitation, competitive factors, general economic conditions, customer relations, increases in raw material prices, governmental regulation and supervision, seasonality, acceptance of the Company's Nuovinox products in the marketplace, technological changes and changes in industry practices ("cautionary statements"). Although the Company believes that its expectations are reasonable, it can give no assurance that such expectations will prove to be correct. Based upon changing conditions, should any one or more of these risks or uncertainties materialize, or should any underlying assumptions prove incorrect, actual results may vary materially from those described herein as anticipated, believed, estimated, expected or intended. All subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the applicable cautionary statements.

Liquidity and Capital Resources

With the Company's cessation of operations because of the receivership in March 2002 of Stelax (U.K.) and subsequent judgment against Stelax Industries Ltd, Stelax (U.K.)'s parent, the Company lacked any resources to conduct operations or to pay its creditors. The Company does not envisage being capable of either unless debt forgiveness is obtained from the loan creditor, Wells Fargo Inc. The financial statements have been prepared on the basis that the company is a "going concern". In the absence of any debt forgiveness from Wells Fargo the

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Company cannot pay its debts and is not a "going concern". However the Directors of the Company do not believe that any material adjustments to the values of assets or liabilities would be necessary to reflect the "liquidation basis".

With the Company's plant facilities unencumbered, in July 2000 the Company's United States subsidiary entered into a Loan and Security Agreement with Bank of America Commercial Finance Corporation (the "Loan Agreement") whereby the Company obtained a Term Loan as well as Revolving Credit and Credit Accommodations. The maximum amount that could have been borrowed under the Loan Agreement was \$5,750,000. The loan was subsequently assigned to Wells Fargo.

The proceeds from the term loan were used to fund operational losses to the extent necessary to cover the start up period for Nuovinox sales and to finance inventory and receivables to the extent that the Company needed funds in excess of borrowing under the Term Loan for inventory and receivables.

Financially, the Company had to achieve positive cash flow, including debt service, from the capital provided from the Loan Agreement. This goal seemed achievable because the Nuovinox product had received strong acceptance and a large number of orders. Production of Nuovinox began in large quantities in the first quarter 2001, the delay being caused by the development of processes unique to the product, development that had not been completed and implemented successfully until shortly before the Company's subsidiary entered into receivership in March 2002.

In fiscal 2001, cash used by operating and investing activities were funded through a line of credit. This line of credit resulted in \$4,166,666 being infused into the Company. Net cash used in operations was \$3,169,320, principally due to out net losses and an increase in working capital of \$ 855,534. The increase in working capital was attributable primarily to the settlement of trade creditors following the receipt of loan funds. Offsetting the \$3,169,320 in cash consumed in operations was \$24,820 from the purchase of stock by affiliates of the Company. The Company had purchases of equipment and intangibles of \$266,130. Accordingly, these uses of cash were funded by the \$4,166,666 from the Company's institutional lender resulting in an increase in cash of \$756,036 over the year taking cash balances to a year end position of \$800,696. Interest paid out within the year amounted to \$382,098.

In fiscal 2002, there were no other sources of funds to cover cash used by operating and investing activities and in March 2002, the U.K. subsidiary entered into receivership. The Company's cash position decreased by \$796,594 in fiscal 2002 consuming the \$800,696 cash balance that existed at the end of fiscal 2001. Operating activities consumed \$519,386. While the Company lost \$10,751,019, \$7,027,482 was a non-cash write down of assets controlled by the receiver. Of the balance, \$465,820 consisted of the non-cash depreciation charge. The majority of this amount was funded through an increase in accounts payable accruals, and payables to related parties of \$2,058,566, an increase that was accrued for but not paid. Reductions in inventory, receivables, and other assets generated \$514,733 cash. The Company utilized an additional \$520,833 in cash to reduce debt, debt owed primarily to a commercial lender which triggered the receivership in March 2002. The Company received \$322,755 from the sale of stock resulting in a cash decrease from financing activities of \$198,078. There were no purchases of property, equipment or intangibles in this period and no cash payment in regard to interest within the year. The resulting year end cash & equivalents balance was \$4,102.

In fiscal year 2003, there was no commercial activity within the Company. The Company consumed \$1,285 cash. Cash used by operating activities was \$60,162 and this was funded by a \$1,276,001 increase in accounts payable and payables to related parties, accordingly, operating activities used \$60,162 cash which was partly funded by \$58,877 cash received from the sale of stock to affiliates of the Company. There were no purchases of property, equipment or intangibles in

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

this period and no cash payment in regard to interest within the year. The resulting year end cash and equivalents balance was \$ 2,817. In fiscal year 2003, the President of the Company and the President of the subsidiary converted debt owed to each into Common Stock of the Company. This conversion was in regard to a total debt of \$1,008,080 and was converted for 4,241,273 shares.

At the present time the Company possesses no operational activities and lacks cash resources to either service or repay its debt. Debt forgiveness from its major creditor, Wells Fargo Inc. would allow the Company to reverse this position. Liquidation of the Company is not imminent and therefore the Directors have concluded that it is appropriate to prepare the financial statements on a going concern basis. The Company's audit report is modified because of this concern. The Directors of the Company do not believe that any material adjustments to the values of assets or liabilities would be necessary to reflect the "liquidation basis".

9

2003 versus 2002

The Company had no revenues in fiscal 2003 and incurred a loss of \$1,445,492, \$ 443,223 of which was interest expense (including \$73,329 interest computed on warrants). The whole of these expenses were marketing, general and administrative expenses incurred in connection with administration of the registrant whilst the U.K. subsidiary, was under the control of the Receiver. Within the \$1,002,269 loss from operations legal and accounting expense accounted for \$214,048, bad debt write off for \$ 37,711 and management and affiliate fees for \$ 285,895. Many of the other expenses such as listing fees, travel and motoring, rent and insurance, phones, and advertising & marketing were accounted for within the account statements but were settled, in the first instance, by the President of the Company who subsequently recharged the Company accordingly. This increased related party debt was partly offset by conversion of debt into common stock The Plant was not operational throughout the period and therefore no cost of sales were incurred. The depletion of cash reserves meant that the company earned no interest within 2003 but continued to accrue interest on its debt to Wells Fargo. Of the \$443,223 interest shown within the financial statements \$ 332,000 was accrued interest on the Wells Fargo indebtedness. However total interest in 2003 was lower than in 2002 due mainly to the reduction in interest being accrued on a reduced related party loan.

2002 versus 2001

The Company's revenues increased to \$559,170 in fiscal 2002 period compared to revenues of \$304,377 in the earlier period, an 83.71% increase. Revenues in fiscal 2001 were less than fiscal 2002 because production of Nuovinox(TM), which began in the first quarter of fiscal 2001, was not as efficient as in fiscal 2002, such inefficiencies reflecting the development of manufacturing processes and resulting improvement of those processes continuing into the 2002 fiscal year. Revenues reflect the net sales value achieved less any discount, if any.

However, by the end of fiscal 2001 on March 31, 2001, the Company had used the maximum amount available under the Loan Agreement. The Company had to reduce staffing and limit production in the second quarter of fiscal 2002 due principally to the unavailability of capital to expand production and meet demand.

Cost of sales in fiscal 2002 were \$1,782,066 compared to \$ 1,314,330 in 2001, that is, in fiscal 2002 each \$1.00 in revenue cost about \$3.14 compared to \$1.00 in revenue in fiscal 2001 costing about \$2.31. Cost of sales figures incorporate

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

the cost of direct raw materials and consumables consumed, plant repair and maintenance, overheads directly attributed to the running of the Plant and include direct and indirect wages together with factory staff salaries includes the portion of depreciation and amortisation in respect of plant utilized in the attainment of the revenue, \$328,667 and \$293,121 respectively. The balance of depreciation and amortisation is charged to selling, general and administration expenses. Freight charges are also included within the cost of sales figures. Management undertook analyses of individual expenses to identify where positive and / or negative variances to budget have occurred. Conclusions drawn were that efficiencies and subsequent cost reductions within the production process were being evidenced. The workforce was becoming more multi skilled and experienced, areas of process improvement had been identified and implemented, better utilization of power sources was being achieved and as labour and plant running costs are semi fixed in nature overall throughputs per man hour were rising as production levels rose. Cost of sales exceeded revenue in both years for a number of reasons. Despite the gross contribution (Revenue less cost of direct materials) being in excess of 55% for both years the volume of sales achieved had simply not been sufficient to generate the total gross contribution to cover the cost of direct material and all other costs incorporated into cost of sales.. Total production output and throughput per hour rates needed to be elevated against the backcloth of relatively fixed direct on-costs of wages, depreciation and other factory overheads. Better energy usage and the removal of the other inefficiencies would also be contributory factors. Additionally the Company could see further benefit accruing from being able to purchase its raw material in larger volumes and thus hopefully at lower cost.

Selling, general and administrative expenses include all other costs other than interest. Fiscal year 2002 saw an 4% increase in these expenses, from \$1,520,428 to \$ 1,579,935 with the greater part of this increase being due to higher insurance, legal and accountancy costs. Such costs are however relatively fixed in nature. Management reviews movements of overhead costs between years and also reviews their percentage relativity to revenues.

Interest income declined to \$2,505 in fiscal 2002 from \$92,840 in fiscal 2001. While declining interest rates on cash balances contributed to the decline in interest income between the two periods, the Company's cash balances declined throughout the 2002 fiscal year as operational losses consumed cash resulting in less cash earning interest as these balances declined. At the end of fiscal 2001, the Company had a cash balance of \$800,696 which decreased throughout fiscal 2002 to \$211,763, \$45,327, \$15,035 and \$4,102 at the end of each succeeding fiscal quarter. As cash decreased, borrowing under the Company's

10

credit facilities increased such that interest expense increased in fiscal 2002 to \$923,211 from \$594,176 in fiscal 2001.

Included within the Company's consolidated statement of operations was that of the investment write down and other charges associated with the U.K. subsidiary being placed under administrative receivership in March 2002. A total charge of \$7,027,482 is included in the total net loss of \$ 10,751,019.

Accounting Policies

The Company's accounting policies are detailed in Note A to the Consolidated Financial Statements. The Company follows US GAAP. In applying these accounting policies in the preparation of the consolidated financial statements, management is required to make estimates and assumptions about future events that affect the reporting and disclosure of assets and liabilities at the balance sheet dates and the reported amounts of revenue and expense during the periods

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

covered. The following is a summary of certain critical accounting policies of Stelax Industries which are impacted by judgments and uncertainties and for which different amounts would be reported under a different set of conditions or using different assumptions.

Revenue recognition -- Stelax Industries pursues its policy on revenue recognition in line with the guidance given in SAB 101. In recognizing revenue the company looks to the existence of a contract to sell the goods to the buyer, that delivery has occurred, that the Company's price to the to the buyer has been fixed and that collectibility is reasonably assured. It records revenue upon receipt and acceptance by the customer. Once product is delivered and accepted there are no further consequential performance obligations on the seller in regard to that delivery. For the years ended March 31, 2003, 2002, and 2001, there was no unbilled revenue included in total revenues and at the fiscal year end of March 31, 2003 all cash against billed revenue had been received within the fiscal year itself. This also applied to the position at the year end March 31, 2002. At March 31,2001 \$111,981 was due from trade debtors but had been fully received at the time of financial statement preparation. The \$111,981 was comprised of monies owed by nominated USA Department of Transport nominated sub-contractors who had accepted delivery of the respective product. Collectibility of such monies was deemed assured in any case at fiscal year end. However as a precautionary measure the Company serves notice on the customer that Title Transfer becomes effective on the day that that payment for goods is received and cleared, failing which the Company has the right to recover those goods in the event of customer default. Goods in transit are subject to insurance cover put in place by the Company, the Seller and therefore the Company removes the risk of loss of revenue whilst the goods are in transit to the buyer.

RECENTLY ISSUED BUT NOT YET ADOPTED ACCOUNTING STANDARDS

In view of the fact that the Company has no operations no recently issued but not yet adopted accounting pronouncements are expected to have a material impact on the Company's results of operations or financial position.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Company does not engage and has not engaged in any hedging activities. In particular, the Company does not hedge, nor has it hedged, its sales for currency fluctuations, and, accordingly, does not acquire market risk sensitive instruments. Over the last two fiscal years, market risks have been negligible because of the small amount of operations in which the Company has engaged.

After the Company's U.K. subsidiary was placed into administrative receivership in March 2002, the Company's operations effectively ceased, and prior to that time the Company's primary market risk was a currency exchange rate risk. The Company did not engage in management of that risk.

In January 2003 a United States Federal District Court entered a judgment against the Company (See Item 3. Legal Proceedings) in the amount \$4,041,778.27 plus interest. The judgment is denominated in United States Dollars, and the Company does not believe that it is appropriate to engage in financial risk management of this judgment.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The debt shown in the balance sheet at March 31, 2003 comprises of \$390,230 payable to trade creditors, \$682,079 payable to related parties, and \$ 4,412,346 payable on the Wells Fargo loan note. All are overdue for payment. The latter item is comprised of \$3,645,833 loan capital outstanding and \$766,513 on-going accrued interest. Wells Fargo was the creditor that appointed the Receiver in March 2002.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

See the consolidated financial statements beginning at page F-2 of this Form 10-K Annual Report.

11

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Not applicable.

12

ITEM 9A. CONTROLS AND PROCEDURES.

Annual Evaluation of Our Disclosure Controls and Internal Controls

Within the 90 days prior to the date of this Annual Report on Form 10-K, management evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures and the internal controls and procedures for financial reporting. This controls evaluation was done under the supervision and with the participation of the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), both offices being performed by Harmon H. Hardy. Following are the conclusions of Mr. Hardy, acting as the Company's CEO and the CFO, with respect to the effectiveness of our disclosure controls and internal controls as of March 13, 2003.

CEO and CFO Certifications

Appearing immediately following the Signatures section of this Annual Report on Form 10-K there are certifications of the CEO and the CFO. The certifications are required in accordance with Section 302 of the Sarbanes-Oxley Act of 2002. This section of the Annual Report is the information concerning the controls evaluation referred to in the Section 302 certifications and this information should be read in conjunction with the Section 302 certifications for a more complete understanding of the topics presented.

Disclosure Controls and Internal Controls

Disclosure controls are procedures that are designed with the objective of ensuring that information required to be disclosed in reports filed under the Securities Exchange Act of 1934, or the Exchange Act, such as this Annual Report, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls are also designed with the objective of ensuring that such information is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosure. Internal controls are procedures which are designed with the objective of providing reasonable assurance that the Company's transactions are properly authorized, its assets are safeguarded against unauthorized or improper use and transactions are properly recorded and reported, all to permit the preparation of the Company's financial statements in conformity with generally accepted accounting principles.

Scope of the Controls Evaluation

The evaluation of our disclosure controls and our internal controls by our CEO and our CFO included a review of all previously existing controls as well as

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

those recently implemented by the Company and the effect of the controls on the information generated for use in this Annual Report on Form 10-K. In the course of the controls evaluation, management sought to identify data errors, controls problems or acts of fraud and to confirm that appropriate corrective action, including process improvements, were being undertaken. The internal controls are also evaluated on an ongoing basis by the Company's independent auditors in connection with their audit and review activities. The overall goals of these various evaluation activities are to monitor the Company's disclosure controls and internal controls and to make modifications as necessary, with the intent being that the disclosure controls and the internal controls will be maintained as dynamic systems that change (including with improvements and corrections) as conditions warrant. Among other matters, management sought in its evaluation to determine whether there were any "significant deficiencies" or "material weaknesses" in the Company's internal controls, or whether any acts of fraud involving personnel who have a significant role in the internal controls were identified. This information was important both for the controls evaluation generally and because Items 5 and 6 in the Section 302 certifications of the CEO and the CFO require that the CEO and the CFO disclose such information to the Company's Board of Directors, which acts as the Company's Audit Committee, and to the independent auditors and to report on related matters in this section of the Annual Report on Form 10-K. In the professional auditing literature, "significant deficiencies" are referred to as "reportable conditions." These are control issues that could have a significant adverse effect on the ability to record, process, summarize and report financial data in the financial statements. A "material weakness" is defined in the auditing literature as a particularly serious reportable condition where the internal control does not reduce to a relatively low level the risk that misstatements caused by error or fraud may occur in amounts that would be material in relation to the financial statements and not be detected within a timely period by employees in the normal course of performing their assigned functions. Management also sought to deal with other controls matters in the controls evaluation and, in each case if a problem was identified, to consider what revision, improvement and/or correction to make in accordance with ongoing procedures.

13

Conclusions

Based upon the controls evaluation, Mr. Hardy, acting as the Company's CEO and CFO has concluded that the Company's disclosure controls are effective to ensure that material information relating to the Company is made known to management particularly during the period when the Company's periodic reports are being prepared, and that the Company's internal controls are effective to provide reasonable assurance that the Company's financial statements are fairly presented in conformity with generally accepted accounting principles. Further, since the date of the controls evaluation to the date of this Annual Report, there have been no significant changes in internal controls or in other factors that could significantly affect internal controls, including any corrective actions with regard to significant deficiencies and material weaknesses.

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

Directors and Officers

Directors and executive officers are elected to serve until each's respective successor is elected and qualified, typically at the next ensuing annual meeting of stockholders. The directors and executive officers of the Company as of March

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

31, 2000 are as follows:

Name and Age	Position	Served In Office Since
Harmon S. Hardy, 74	Chairman of the Board, President and Chief Financial Officer	1987
Ruben Grubner, 47	Director	1995
William D. Alexander, 54	Director	1996

Harmon S. Hardy has been the President of the Company since its inception in May, 1987 and is Chairman and President of various other entities. Mr. Hardy devotes a substantial portion of his time to the matters and business of the Company.

Ruben Grubner has been President of Altec Travel, a travel service firm in Vancouver, B.C., Canada since 1978.

William D. Alexander is a Senior Vice-President with Bank of Nova Scotia in Toronto, Canada and has been employed by the bank since 1987.

Audit Committee

The Company does not have an audit committee.

Compliance with Section 16(a) of the Securities Exchange Act of 1934

Section 16(a) of the Securities Exchange Act of 1934 requires the Company's officers and directors, and persons who own more than 10% of a registered class of the Company's equity securities, to file reports of ownership and changes in ownership with the Securities and Exchange Commission. Officers, directors and 10% stockholders are required by regulations promulgated by the Securities and Exchange Commission to furnish the Company copies of all Section 16(a) reports they file.

14

The Company believes all Section 16(a) filing requirements applicable to its officers, directors and 10% beneficial owners were complied with through March 31, 2003, except that the directors failed to file timely reports regarding the grant of stock options.

Code of Ethics

Given that the Company's operations have been in receivership, the Company has not adopted a Code of Ethics for the principal executive officer, principal financial officer, or principal accounting officer or controller.

ITEM 11. EXECUTIVE COMPENSATION

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

The following table sets forth information with respect to the compensation to the Company's chief executive officer at March 31, 2003 for services rendered during the fiscal years ended March 31, 2003, 2002, and 2001. The table includes for the same periods those individuals receiving in excess of \$100,000 per year.

Name	Year	Salary	Bonus	Other	Options (Shares)
Annual Compensation (1)					
Harmon S. Hardy	2003	\$ 144,000	\$ -	\$ -	-
Chairman of the	2002	\$ 144,000	\$ -	\$ -	-
Board of Directors, President and Chief Financial Officer	2001	\$ 144,000	\$ -	\$ -	-
A. Cacace	2003	\$ 126,895	\$ -	\$ -	-
Managing Director	2002	\$ 133,805	\$ -	\$ -	-
of Stelax (U.K.)	2001	\$ 145,800	\$ -	\$ -	-

- (1) The compensation described in the table does not include the cost to the Company of benefits furnished to certain officers, including premiums for health insurance, and other personal benefits provided to such individuals that are extended in connection with the conduct of the Company's business. No executive officer named above received other compensation in excess of the lesser of \$50,000 or 10% of such officer's salary and bonus compensation. Any other payments to officers of the Company were direct reimbursements to those officers for payment outlays made on behalf of the Company and in respect of business expenses.
- (2) Includes a monthly car allowance which has been accrued but not paid.
- (3) Mr. Cacace's salary was paid in Pounds Sterling and converted at the rate of 1.41 pounds per Dollar. Of \$126,895 salary, \$74,250 was accrued but not paid. See 2003 versus 2002 commentary on page 10.
- (4) The entire amount was accrued but not paid.

2002 Option Grants

There were 200,000 options granted to Mr. Hardy during the fiscal year ended March 31, 2002. In addition the exercise date on 1,350,000 of options granted to Mr. Hardy was extended from January 2002 to January 2005 during the fiscal year ended March 31, 2002. The appraised market value of the company's stock at the time option grant was extended was below the exercise price. There were no options granted to Mr. Cacace during the fiscal year ended March 31, 2002, however the exercise date on 500,000 of options granted to Mr. Cacace was extended from January 2002 to January 2005 during the fiscal year ended March 31, 2002. The appraised market value of the company's stock at the time option grant was extended was below the exercise price.

See Item 12. Certain Relationships and Related Transactions.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The following table sets forth, as of March 31, 2003, the number and percentage of outstanding shares of Common Stock beneficially owned by (i) each person known by the Company to be a beneficial owner of more than five percent (5%) of the Company's Common Stock; (ii) each of the executive officers of the Company; (iii) each director of the Company; and (iv) all officers and other directors as a group:

Name and Address of Beneficial Owner (1)	Shares of Common Stock Beneficially Owned
Harmon S. Hardy, Jr. 4004 Belt Line Road, Suite 107 Dallas, TX 75244	11,916,061
Ruben Grubner	100,000
William D. Alexander	200,000
All Officers and other Directors as a Group	11,382,182

* Represents less than one percent

(1) The persons named in the table have sole voting and investment power with respect to all shares of Common Stock showing as beneficially owned by them, subject to community property laws, where applicable, and the information contained in the footnotes to the table.

(2) Includes options to purchase 3,000,000 shares of common stock.

(3) Includes options to purchase 100,000 shares of common stock.

(4) Includes options to purchase 200,000 shares of common stock.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

As of March 31, 2003 and 2002, the Company owed an aggregate of \$682,079 and \$864,250, respectively, to Mr. Hardy, the Company's President, and to his affiliates. These amounts are payable on demand. Effective January 12, 1999, Mr. Hardy began providing a line of credit up to \$600,000 for the benefit of the Company. The credit line bears interest at 10% per annum. The Company granted 600,000 warrants to purchase common stock of the Company at \$0.30 per shares as consideration of the credit line. In fiscal year 2000, the line of credit was extended to \$1,200,000 at the same interest rate, and the Company granted Mr.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Hardy a warrant to purchase an additional 600,000 shares of common stock for \$0.50 per share. The warrants may be exercised for a period of five years from the date of the grant. At March 31, 2003 and 2002, \$309,164 and \$478,283 of the total owed to Mr. Hardy represented draws on the line of credit and interest.

Subsequent to March 31, 2003, Audit fees of 17,000 pound sterling have been paid personally by Mr. Hardy in respect of March 31, 2003 and 2002.

At March 31, 2003 and 2002, the Company owed to Mr. Cacace personally \$74,250 and \$0, respectively.

16

On January 1, 1999, and again on December 15, 2000, Mr. Hardy and the President of a subsidiary converted debt owed to each into common stock of the Company. The conversion resulted in the Company issuing 1,125,000 and 1,500,000 shares of common stock being issued in exchange for \$225,000 and \$375,000 of debt, respectively. The exchange ratio was at current market price of the common stock. In fiscal year 2002 Mr. Hardy and Mr. Cacace converted debt owed to each into common stock of the Company. The conversion resulted in the Company issuing 3,100,000 shares of common stock, being issued in exchange for \$ 775,000 debt. In fiscal year 2003 Mr. Hardy and Mr. Cacace converted debt owed to each into common stock of the Company. The conversion resulted in the Company issuing 4,582,182 shares of common stock, being issued in exchange for \$ 1,088,080 debt. The exchange ratio was at the current market price of the Common Stock.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Stelax Industries Ltd
British Columbia, Canada

We have audited the accompanying consolidated balance sheet of Stelax Industries Ltd and subsidiary as of March 31, 2003 and 2002, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the years in the three year period ended March 31, 2003. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements based on our audits.

We conducted our audits in accordance with standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Stelax Industries Ltd and subsidiary as of March 31, 2003 and 2002, and the results of their operations and their cash flows for each of the years in the three year period ended March 31, 2003 in conformity with accounting principles accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note I to the financial statements, at March 31, 2003, the Company was not in compliance with certain covenants of its long-term loan agreement as a consequence of which a Receiver was appointed to the company's U.K. subsidiary and a judgement was made against the company. As discussed in Note I there is substantial doubt about the Company's ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

As discussed in Note N, the accompanying financial statements for the years ended March 31, 2002 and 2001 have been restated.

STELAX INDUSTRIES LTD.
NOTES TO FINANCIAL STATEMENTS
(Presented in United States Dollars)

A. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ORGANIZATION

Stelax Industries, Ltd. (a Canadian corporation) formerly Zfax Image Corp., (the "Company") was incorporated on May 5, 1987, primarily to develop and produce portable facsimile machines. These operations were conducted through the Company's formerly owned subsidiary, Zfax, Inc.

On July 11, 1995, the Company incorporated Stelax (U.K.) Limited ("Stelax") as a wholly owned subsidiary in the United Kingdom to acquire certain assets of a

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

steel mill in West Glamorgan, Wales and establish operations in the stainless steel manufacturing business. The financial statements for the years ended March 31, 2001 and 2000 include the accounts of the Company and its U.K. subsidiary. The operating loss of this subsidiary was \$2,223,244, and \$2,080,970 for the years ended March 31, 2001 and 2000 and it had identifiable assets of \$9,362,218 at March 31, 2000. All significant intercompany balances and transactions were eliminated. On March 7, 2002 an Administrative Receiver was appointed to manage the assets covered by the note payable agreement. The financial statements at March 31, 2002 consolidate the results of the subsidiary up to March 7, 2002, thereafter the subsidiary has been reported using the cost method. The operating loss of this subsidiary was \$2,295,227 up to March 7, 2002. The company considers the investment in the subsidiary to be worthless. Accordingly the investment has been written off at March 31, 2002 resulting in a loss of \$7,027,482.

The Company's consolidated financial statements are presented in accordance with accounting principles generally accepted in the United States of America (US GAAP). The financial statements have been prepared on the basis that the company is a "going concern". In the absence of any debt forgiveness from Wells Fargo the Company cannot pay its debts and is not a "going concern". However the Directors of the Company do not believe that any material adjustments to the values of assets or liabilities would be necessary to reflect the "liquidation basis" and believe that the Company can become a going concern again in the future but hinges this opinion on the willingness of the loan creditor, Wells Fargo, to grant debt forgiveness. It would become a going concern by incorporating other business activities into the Group. The Company is in default of covenants and repayment schedules on the Term Loan, Revolving Credit and Credit Accommodations with Wells Fargo Business Credit, inc. As a result of these defaults on March 7, 2002 Wells Fargo appointed an Administrative Receiver to the subsidiary under the terms of the debenture instrument to manage the assets covered by the note payable agreement. The group's operations therefore ceased from this point. . On January 31, 2003, the United States District Court for the Southern District of New York entered an Order of Judgment in favor of Wells Fargo Business Credit, Inc. against Stelax Industries, Ltd., Stelax (U.K.), and Stelax Industries in the amount of \$4,041,778.27 plus \$911.46 per day for each day from August 22, 2002 until the entry of the judgment which occurred on January 31, 2003. In the Order of Judgment, the judge adopted the magistrate's recommendations. The magistrate's recommendations indicated that the plaintiff filed a complaint against the defendants on March 5, 2002. On June 13, 2002, the Court's clerk issued a Certificate of Default and on July 2, 2002, the court entered the default judgment, referring the matter to the magistrate to determine damages. In August 2003 Timaran Limited purchased the assets of the U.K. company from the Receiver. Timaran Limited has assigned all its rights and interest in these assets to Stelax International Ltd., a private company unassociated with Stelax Industries Ltd. The judgement against Stelax Industries Ltd. still remains.

DECONSOLIDATION OF STELAX (U.K.)

Under generally accepted accounting principles consolidation is generally required for investments of more than 50% of the outstanding voting stock of an investee except when control is not held by the majority owner.

On March 7, 2002 a Receiver was appointed to Stelax (U.K.) pursuant to a debenture instrument executed over the whole of the assets of the company in favour of Bank of America Finance Corporation dated June 30, 2000 and assigned to Wells Fargo Business Credit Inc on April 20, 2001.

Accordingly from March 7, 2002 control rests with the Receiver not Stelax Industries.

The results of Stelax (U.K.) have been consolidated up to March 7, 2002. Thereafter Stelax (U.K.) has been reported using the cost method. At March 7,

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

2002 Stelax (U.K.) had net assets of \$7,249,614 principally consisting of plant and equipment at the Aberneath facility in South Wales, United Kingdom, including \$222,132 of amounts related with foreign currency translation,

F-7

included in Cumulative Translation Adjustment. Following the appointment of the Receiver this investment was reported as a single line item in "Investments" using the cost method. However, Stelax Industries does not expect to recover any monies from the Receiver in respect of this investment. This investment has therefore been written off, and a loss of \$7,027,482 has been recorded in the income statement for the year to March 31, 2002.

CASH AND CASH EQUIVALENTS

The Company considers all highly liquid investments with an original maturity of three months or less when purchased to be cash equivalents.

LOSS PER SHARE

The computation of loss per share is based upon the weighted average shares of Common Stock outstanding during the period.

DEPRECIATION AND AMORTIZATION

Depreciation is provided using the straight-line method over the estimated useful lives of their assets as follows:

Buildings	20 years
Plant and equipment	4 to 20 years
Intangible assets (Patents)	12 years

Total Depreciation and amortisation in the years ended March 31 2003, 2002 and 2001 were \$ 0, \$ 548,167, and \$ 555,231 respectively. In the consolidated statement of operations depreciation and amortisation on plant utilized in the attainment of revenue appears within cost of sales and are \$0, \$ 328,667 and \$ 293,121 respectively. The remaining depreciation and amortisation are included within selling, general and administration expenses.

RESEARCH AND DEVELOPMENT

Research and development expenses are charged to operations as incurred. There were no research and development costs of any significance for the years ended March 31, 2003, 2002, and 2001. Process improvement costs are expensed as they arise.

USE OF ESTIMATES

The preparation of the consolidated financial statements in conformity with US generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

IMPAIRMENT OF LONG-LIVED ASSETS

The Company accounts for impaired long-lived assets in accordance with Statement of Financial Accounting Standards ("SFAS") No. 144 "Accounting for Impairment or Disposal of Long-Lived Assets". This standard prescribes the method for asset impairment evaluation for long-lived assets and certain identifiable intangibles that are either held and used or to be disposed of. The Company reviews the carrying values of its long-lived and identifiable intangible assets for

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

possible impairment whenever events or changes in circumstances indicate that the carrying amount of assets may not be recoverable.

COMPREHENSIVE LOSS

Comprehensive loss is reported in accordance with SFAS No. 130, "Reporting Comprehensive Income." Other comprehensive loss includes foreign currency translation adjustments.

WARRANTS

The proceeds received upon issuance of debt and detachable warrants is allocated between the debt and the warrants on a relative fair value basis. The fair value of the warrants is determined with reference to a Black-Scholes valuation model. Any resulting debt discount is amortised over the term of the debt using the effective interest rate method.

The fair value of warrants issued in connection with the grant of a line of credit is deferred and recognized in the income statement on a straight-line basis over the period under which the credit facility is available. When amounts are drawn down the unamortized deferred warrant cost is allocated, on a pro-rata basis, between the draw down amount and remaining available credit facility. The portion allocated to the draw down amount is recognized over the period of the loan using the effective interest rate method.

F-8

OTHER ASSETS

The balance of other assets at 31st March 2002 was zero. The remaining balance of the financing costs associated with the Term Loan which had been subject to amortisation over the life of the loan was written off at March 31, 2002.

INCOME TAXES

The Company uses the liability method of accounting for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes." Under the liability method, deferred income taxes are determined based upon enacted tax laws and rates applied to the difference between the financial statement and tax bases of assets and liabilities.

SEGMENT INFORMATION

The Company reports segment information in accordance with SFAS No. 131, "Disclosure about Segments of an Enterprise and Related Information." The Company operates in one industry, the manufacture of steel related products, in accordance with SFAS No. 131.

FOREIGN CURRENCY TRANSLATION

In accordance with the provisions of SFAS No. 52, "Foreign Currency Translation," exchange adjustments resulting from foreign currency transactions generally are recognized currently in income, whereas adjustments resulting from translations of financial statements are reflected in accumulated other comprehensive income (loss). The cumulative currency translation loss as of March 31, 2003 was \$nil. Gains and losses on foreign currency transactions for the fiscal years ended March 31, 2003, March 31, 2002 and March 31, 2001 resulted in net foreign currency gains/(losses) of \$ nil, \$(222,132) and \$26,453 respectively.

FINANCIAL INSTRUMENTS

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

The fair values of financial instruments are determined by reference to various market data and other valuation techniques, as appropriate. Unless otherwise disclosed, the fair values of financial instruments approximate their recorded values.

REVENUE RECOGNITION

Stelax Industries pursues its policy on revenue recognition in line with the guidance given in SAB 101. In recognizing revenue the company looks to the existence of a contract to sell the goods to the buyer, that delivery has occurred, that the Company's price to the to the buyer has been fixed and that collectibility is reasonably assured. It records revenue upon receipt and acceptance by the customer. Once product is delivered and accepted there are no further consequential performance obligations on the seller in regard to that delivery. For the years ended March 31, 2003, 2002, and 2001, there was no unbilled revenue included in total revenues and at the fiscal year end of 31 March 2003 all cash against billed revenue had been received within the fiscal year itself. This also applied to the position at the year end 31st March 2002. For both of these years revenue recognition is therefore not an issue. At the 31st March 2001 \$111,981 was due from trade debtors but had been fully received at the time of financial statement preparation. The \$111,981 was comprised of monies owed by nominated USA Department of Transport nominated sub-contractors who had accepted delivery of the respective product. Collectibility of such monies was deemed assured in any case at fiscal year end. However as a precautionary measure the Company serves notice on the customer that Title Transfer becomes effective on the day that that payment for goods is received and cleared, failing which the Company has the right to recover those goods in the event of customer default. Goods in transit are subject to insurance cover put in place by the Company, the Seller and therefore the Company removes the risk of loss of revenue whilst the goods are in transit to the buyer.

STOCK BASED COMPENSATION

The Company accounts for its stock-based compensation related to its employees under APB 25 and has adopted the disclosure-only provisions of SFAS No. 123, "Accounting for Stock-Based Compensation" ("SFAS No. 123"). In December 2002, the FASB issued SFAS No. 148, "Accounting for Stock-Based Compensation - Transition and Disclosure, an amendment of SFAS No. 123" ("SFAS No. 148").

SFAS 123 requires disclosure of pro forma information regarding net income and earnings per share had compensation cost been determined using the fair value method. The fair value of the Company's stock based awards was estimated as of the date of grant using the Black-Scholes option pricing model. Limitations on the effectiveness of the Black-Scholes option valuation model are that it was

F-9

developed for use in estimating the fair value of trade options which have no vesting restriction and are fully transferable and that the model requires the use of highly subjective assumptions including expected stock price volatility. Because changes in the subjective input assumptions can materially affect the fair value estimate, in management's opinion, the existing models do not necessarily provide a reliable single measure of the fair value of its stock based awards. The fair value of options granted was estimated assuming no dividends and using the following weighted average assumptions.

The following tables set forth the required annual reconciliation of reported and Pro Forma Net Income and EPS under SFAS No. 148:

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

	2003	2002	
Net (Loss) applicable to common stock	\$ (1,445,492)	\$ (10,751,019)	\$

Per share as reported (basic and diluted)	\$ (0.03)	\$ (0.26)	\$
Per share pro forma (basic and diluted)	\$ (0.03)	\$ (0.28)	\$

B. RELATED PARTY TRANSACTIONS

As of March 31, 2003 and 2002, funds were due to the President and his affiliates totaling \$682,079 and \$864,250 respectively. These amounts are payable on demand. Effective January 12, 1999, the President of the Company began providing a line of credit up to \$600,000 for the benefit of the Company. The credit line bears interest at 10% and 600,000 warrants to purchase Common Stock of the Company at \$.30 a share were issued as consideration for such credit line. In fiscal year 2000, the line of credit was extended to \$1,200,000 at the same interest rate. An additional 600,000 warrants were issued at \$.50 a share. The warrants are valid for five (5) years. The fair value calculated using the Black-Scholes option valuation model was \$353,984 and as such additional paid in capital and pre-paid interest has been recognized. The interest is being amortised over the life of the loans using the interest method. At March 31, 2003 and 2002, \$167,684 and \$478,283 of the total owed to the President represented draws on the line of credit and accrued interest.

At March 31, 2003 and 2002, the Company owed the President of the subsidiary \$74,250 and \$nil, respectively.

In fiscal year 2003, the President of the Company and the President of the subsidiary converted debt owed to each into Common Stock of the Company. This conversion was in regard to a total debt of \$1,008,080 and was converted for 4,582,182 shares. During fiscal year 2002, the President of the Company and the President of the subsidiary converted debt owed to each into Common Stock of the Company. The conversion resulted in 3,100,000 common shares being issued in exchange for \$775,000 of debt, respectively. On December 15, 2000, the President of the Company and the President of the subsidiary converted debt owed to each into Common Stock of the Company. The conversion resulted in 1,500,000 common shares being issued in exchange for \$375,000 of debt, respectively. The exchange ratio was at current market price of the Common Stock.

The \$3000 shown as receivable from a related party at March 31, 2003 represents amounts advanced in respect of expenses. It was reduced to zero in the first quarter of fiscal 2004 as the related party has submitted duly authorized expenses against the Company.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

C. MAJOR CUSTOMER INFORMATION

In fiscal year 2003 there were no customers.

One customer accounted for approximately 21% and another accounted for approximately 14% of new sales in fiscal 2002. In fiscal 2001 one customer accounted for approximately 50% of net sales.

F-10

D. MAJOR SUPPLIERS' INFORMATION

The Company had no inventory suppliers in fiscal year 2003.

In fiscal year 2002 one supplier accounted for 24% of all inventory purchases.

The Company purchased inventory from two suppliers during the fiscal year ended March 31, 2001 accounting for 23% and 19% of total inventory purchases respectively. As of March 31, 2001 the Company had \$nil and \$nil respectively in amounts owed to these suppliers included in accounts payable. In 2002 the Company purchased inventory from one supplier accounting for 24% of total inventory purchased. As of March 31, 2002 the Company owed \$nil to this supplier.

E. OPTIONS

The Company has granted stock options to certain directors, officers, employees, investors and consultants to purchase shares of the Company's Common Stock under a non-qualified plan. No new options were issued in fiscal year 2003. The options are valid for three to five years.

A summary of the stock option transactions follows:

	NUMBER OF SHARES	EXERCISE PRICE PER SHARE	WEIGHT AVERAGE EXERCISE PRICE
	-----	-----	-----
Options outstanding March 31, 2000	7,105,000		
Issued	65,000	\$0.50-\$0.85	
Options outstanding March 31, 2001	7,170,000		
Issued	1,770,000	\$0.40-\$0.75	
Options outstanding March 31, 2002	8,940,000		
Issued	-		
Options outstanding March 31, 2003	8,940,000		

The following table summarizes information about stock options outstanding at March 31, 2003:

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

RANGE OF EXERCISE PRICES -----	NUMBER OF SHARES -----	WEIGHTED AVERAGE REMAINING CONTRACTUAL LIFE -----
\$0.30 - 0.50	7,210,000	16 months
\$0.51 - 0.80	800,000	14 months
\$0.81 - 1.10	930,000	9 months

	8,940,000	

Stock options are exercisable from date of grant until expiry date which range from January 2002 to January 2005.

The fair value of the options granted has been estimated assuming no dividends and using the following assumptions:

	2003	2002	2001
Risk free interest rate	N/A	5.38%	5.12%
Expected term	N/A	2-5 years	2-5 years
Volatility	N/A	154%	102%
Weighted average fair value per share for options granted during the year	N/A	\$0.51	\$0.90

During the fiscal year ended March, 31 2002 the exercise date on 1,350,000 options granted to the President of Company and 500,000 options granted to the President of the subsidiary was extended from January 2002 to January 2005. At the date of the extension the share price was lower than that at the original grant date and the exercise price. Accordingly, no incremental compensation expense was recognized.

F-11

F. COMMITMENTS AND CONTINGENCIES

The Company had occupied corporate office space in Dallas, Texas on a month to month lease, after completing a long term lease. Rent expense for fiscal year 2003, 2002, and 2001 respectively was \$0, \$7,396, and \$17,714.

G. INCOME TAXES

The Company, as a Canadian corporation, does not file United States income tax returns.

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The only component of deferred taxes for the Company is its net operating loss carry forwards of approximately \$11,996,076 in Canada which began to expire in 1997 and \$nil in the U.K. Deferred tax assets at March 31, are:

	2003	2002
	-----	-----
Deferred tax assets	\$ 4,558,510	\$ 4,009,220
Valuation allowance	(4,558,510)	(4,009,220)
Net deferred-tax asset	\$ -	\$ -

The valuation allowance was increased by \$549,290 and \$3,473,840 during the fiscal years ended March 31, 2003 and 2002, respectively. Given the loss making position of the Company, it is uncertain whether losses could be utilized in the foreseeable future and therefore no benefit for deferred tax has been taken. The significant reduction in 2002 followed the write off of the U.K. assets pursuant to the receiver being appointed.

H. STOCKHOLDERS' EQUITY

Shares reserved for future issuance include 10,790,000 shares for stock options. From time to time, the directors may declare and authorize payments of dividends to the stockholders of record. To date, no dividends have been declared or paid.

In fiscal year 2001, 65,000 Common Stock options were issued with exercise prices in the range of \$.50 to \$.85 per share.

In fiscal year 2002, 1,770,000 Common Stock options were issued with exercise prices in the range of \$.40 to \$.85 per share.

No options were issued in fiscal year 2003.

In fiscal year 2003, related parties converted debt owed of \$1,008,080 into common shares of 4,582,182.

In fiscal year 2002, related parties converted note payable of \$ 775,000 into common shares of 3,100,000.

In fiscal year 2001, related parties converted debt owed of \$375,000 into common shares of 1,500,000.

During fiscal year 2003, 2002, and 2001, 181,081, 844,600, and 82,733 Common Stock shares were sold for cash totaling \$58,877, \$322,755, and \$24,820, respectively.

I. GOING CONCERN

The Company is in default of covenants and repayment schedules on the Term Loan, Revolving Credit and Credit Accommodations with Wells Fargo Business Credit, Inc. As a result of these defaults on March 7, 2002 Wells Fargo appointed an Administrative Receiver to the subsidiary under the terms of the debenture instrument. The Receiver therefore acquired control of the U.K. assets including the group's Aberneath Steel Mill facility on March 7, 2002. The group's operations therefore ceased from this point.

In March 2002 Stelax (U.K.) was placed into administrative receivership by, the loan creditor, Wells Fargo., who were exercising powers and remedies available to them by law and by the Debenture and Guarantee dated June 30, 2000 and made

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

between the Banc of America and Stelax (U.K.) and assigned to Wells Fargo Business Credit Inc. on the April 20, 2001. The Registrant's operations thus ceased. Stelax U.K. and Stelax USA Inc. were collectively the borrowers under the aforementioned Debenture and Guarantee. The preferential rights under the latter over other creditors included that of action to liquidate the assets of the Company and levy late payment interest and charges upon the borrowers. Wells Fargo exercised their power to appoint the Receiver to the U.K. company and gain

F-12

control over the operational assets of the group. On January 31, 2003, the United States District Court for the Southern District of New York entered an Order of Judgment in favor of Wells Fargo Business Credit, Inc. against Stelax Industries, Ltd., Stelax (U.K.), and Stelax Industries in the amount of \$4,041,778.27 plus \$911.46 per day for each day from August 22, 2002 until the entry of the judgment which occurred on January 31, 2003. The Company's calculation of cumulative interest to the March 31, 2002 was \$ 433,998 and continued to provide for interest at the rate of \$911.46 per each day as a prudent measure throughout the fiscal year to March 31, 2003. Final settlement of the indebtedness may prove this to be an over-provision. The financial statements show a loan note payable of \$ 3,645,833 and accrued interest of \$ 766,513 at March 31, 2003. totalling In the Order of Judgment, the judge adopted the magistrate's recommendations. The magistrate's recommendations indicated that the plaintiff filed a complaint against the defendants on March 5, 2002. On June 13, 2002, the Court's clerk issued a Certificate of Default and on July 2, 2002, the court entered the default judgment, referring the matter to the magistrate to determine damages. In August 2003 Timaran Limited purchased the assets of the U.K. company from the Receiver. Timaran Limited has assigned all its rights and interest in these assets to Stelax International Ltd., a private company unassociated with Stelax Industries Ltd. The judgement against Stelax Industries Ltd. still remains.

The financial statements have been prepared on the basis that the company is a "going concern". In the absence of any debt forgiveness from Wells Fargo the Company cannot pay its debts and is not a "going concern". However the Directors of the Company do not believe that any material adjustments to the values of assets or liabilities would be necessary to reflect the "liquidation basis".

The Directors are of the opinion that the Company can become a going concern again in the future but hinges this opinion on the willingness of the loan creditor, Wells Fargo, to grant debt forgiveness. It would become a going concern by incorporating other business activities into the Group. There is no current intention to place the Company into liquidation.

J. NET LOSS PER SHARE

Losses per share have been computed in accordance with SFAS No. 128, Earnings per Share. Basic and diluted losses per share are computed by dividing net loss by the weighted average number of shares of Common Stock outstanding during the year. Outstanding Common Stock options and warrants have been excluded from the calculation of diluted losses per share because their effect would be antidilutive. The number of share options outstanding at the March 31, 2003 that could be potentially dilutive was 8,940,000. (March 31, 2002 - 8,940,000; March 31, 2001 7,105,000). See Note E. In addition, the number of warrants outstanding at March 31, 2003 that could be potentially dilutive was (March 31, 2003 - 160,000, March 31, 2001 - 160,000). See notes B and K.

K. BANK FINANCING

In July 2000 the Company obtained a Term Loan as well as Revolving Credit and

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

Credit Accommodations. The balance of the loan at March 31, 2003 and 2002 was \$3,645,833 and \$3,645,833. The original loan debt of \$4,166,166 had been reduced by repayments totaling \$ 520,833 in fiscal 2002. Due to the appointment of an Administrative Receiver in the subsidiary, the entire note payable is due in full.

In connection with the Loan Agreement the Company granted a warrant to Bank of America Commercial Finance Corporation to purchase up to 160,000 shares of Common Stock. These warrants for purchase of shares of the Registrant were issued at a price equal to 105% of the market value at the time of closing of the loan agreement.

The fair value calculated using the Black-Scholes option valuation model was \$123,076 and this amount has been credited to additional paid in capital in July 2000 and has been accreted as interest expense in the accompanying financial statements. The assumptions used in calculating this fair value were dividend yield 0%, risk free interest rate 50%; volatility 105%; and expected term of three years.

F-13

L. QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

Fiscal 2003	Revenues	Net Loss	Net Loss Per Share
-----	-----	-----	-----
March	\$ Nil	\$ 323,139	\$ 0.026
December	Nil	254,200	0.010
September	Nil	595,683	0.013
June	Nil	272,471	0.007

Fiscal 2002	Revenues	Net Loss	Net Loss Per Share
----	-----	-----	-----
March	\$ Nil	\$ 8,079,408	\$ 0.26
December	26,335	763,120	0.06
September	266,338	1,082,722	0.03
June	266,497	825,768	0.02

As discussed in Note N the prior year financial restatements have been restated. The quarterly financial information reported above has also been restated to reflect these changes. The effect on the net loss as previously reported in the Form 10Q's is as follows:

	As previously Reported	Restated
	-----	-----
Fiscal 2003		
December	(272,532)	(254,200)
September	(614,015)	(595,683)
June	(290,803)	(272,471)
Fiscal 2002		
March	(8,019,158)	(8,079,408)
December	(722,120)	(763,120)
September	(1,041,722)	(1,082,722)
June	(784,768)	(825,768)
	(10,567,768)	(10,750,019)

Edgar Filing: STELAX INDUSTRIES LTD - Form 10-K

The revenue figure previously reported for December 2002 and March 2003 have also been restated, to correct for credit notes raised in the March 2003 quarter which relate to December 2002 sales.

M Subsequent events

In June 2003 an affiliate of the Registrant Company, through an intermediary company (Timaran Ltd.), made a contract with the Receiver to purchase all of the Stelax (U.K.) assets held by the Receiver. The contract required staged payments over a three month licensed period. Timaran Ltd. started recommissioning and operating under this license agreement. In August Timaran completed the purchase of the U.K. assets from the Receiver. Timaran has assigned all its rights and interest to Stelax International Ltd., a private company organized in the United Kingdom and unassociated with Stelax Industries Ltd.

N Notes on restated 2001 and 2002 data in 2003 10K.

The Company has reclassified and restated certain items in its financial statements for the years ended March 31, 2001, and 2002. The Company has reclassified and restated certain items for the quarters subsequent to those times.

The reclassification relates to depreciation of \$293,121 in fiscal 2001 and \$328,667 in fiscal 2002 being reclassified from selling, general and administrative expense to cost of sales. In addition, a note receivable of \$141,480 related to a stock issuance has been offset against amounts payable to related parties. The restatement of the income statement relates to (1) the prior incorrect accounting for the value of certain warrants issued by the Company and the consequent lack of amortization of interest of \$129,144 and \$164,001, respectively, on those warrants in fiscal 2001 and fiscal 2002; (2) the write off of other assets in fiscal 2002 in the amount of \$102,934; and (3) the movement of \$83,684 from translation adjustment to an expense.

The restatement of the cash flow statement relates to (1) the treatment of stock issued for compensation (2) the elimination of the investment write-down of \$7,027,482 in fiscal 2002 from cash flow from provided by investing activities; (3) the elimination of non-cash transactions of \$775,000 in fiscal 2002 and \$375,000 in fiscal 2001 relating to the issuance of common stock in exchange for debt from cash flow provided by financing activities and (4) the reclassification of foreign currency translation gains/losses to the relevant

F-14

caption within the reconciliation of net loss to cash outflow from operating activities.

The effect of these reclassifications and restatements and the related financial statement captions for the respective periods during 2001 and 2002 are as follows:
