NOTE 1. THE COMPANY

QuadraMed Corporation along with its subsidiaries (the Company or QuadraMed) is dedicated to improving healthcare delivery by providing innovative healthcare information technology and services. QuadraMed provides healthcare information technology products and services that help healthcare providers to improve the quality of the care they deliver and the efficiency with which it is delivered. QuadraMed does this by developing and implementing sophisticated, user-friendly software applications designed and developed by the healthcare professionals and software specialists we employ.

QuadraMed s products are designed to eliminate paper, improve processes, and decrease error through the efficient management of patient clinical and financial records. Our products are used by acute care hospitals, specialty hospitals, Veterans Health Administration facilities, and associated/affiliated businesses such as outpatient clinics, long-term care facilities, and rehabilitation hospitals of varying size from small single entity hospitals to large multi-facility care delivery organizations. Approximately 2,000 healthcare provider facilities utilize at least one QuadraMed product. QuadraMed s products are sold as standalone, bundled, or fully integrated software packages. QuadraMed also provides services to support the hospital s collection of receivables and its administration of contractual reimbursements from managed care companies.

Prior to November 5, 2003, QuadraMed was managed in three distinct business segments: Enterprise Division, Health Information Management (HIM) Software Division and Financial Services Division. On that date, QuadraMed consolidated the organization of the HIM Software Division and Enterprise Division into a single functional software organization. This reorganization was designed to use existing resources more efficiently and to facilitate the integration of products and technologies. The change does not affect the Financial Services Division.

NOTE 2. SIGNIFICANT ACCOUNTING POLICIES

Financial Statement Presentation

These consolidated financial statements are unaudited and have been prepared in conformity with generally accepted accounting principles and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) regarding interim financial reporting. Accordingly, they do not include all of the information and disclosures required by accounting principles generally accepted in the United States for complete financial statements. It is suggested that these interim financial statements be read in conjunction with the consolidated financial statements, and the notes thereto, included in the Company s Annual Report on Form 10-K/A for the year ended December 31, 2003. In the opinion of management, the consolidated financial statements for the periods presented herein include all normal and recurring adjustments that are necessary for a fair presentation of the results for these interim periods. The results of operations for the three and six months ended June 30, 2004 are not necessarily indicative of the results for the entire year ending December 31, 2004.

Pro Forma balance sheet presentation includes the retirement of the Company s 2008 and 2005 Notes subsequent to June 30, 2004. See NOTE 15 to these financial statements.

Principles of Consolidation

These consolidated financial statements include our accounts and all our significant business divisions and subsidiaries. Since February 2004, results of operations of Détente Systems Pty Limited (Détente) have been included in the Company s consolidated statements of operations. The

June 30, 2004 balance sheet of Tempus Software, Inc. (Tempus) has been included in the Company s consolidated balance sheet. Please see NOTE 4 for information related to the acquisitions of Détente and Tempus. All significant intercompany accounts and transactions between the Company and our subsidiaries have been eliminated in the consolidated financial statements.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current year presentation.

7

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates, assumptions, and judgments that affect the reported amounts of assets and liabilities, revenues, and expenses. Significant estimates and assumptions have been made regarding revenue recognition, the allowance for doubtful accounts, contingencies, litigation, intangibles resulting from our purchase business combinations and other amounts. We base our estimates and assumptions on historical experience and on various other assumptions which management believes to be reasonable under the circumstances. Uncertainties inherent in these estimates include, among other things, significant estimates within percentage-of-completion accounting. In addition, we annually review and test our estimates related to the valuations of intangibles including acquired software, goodwill, customer lists, trademarks and other intangibles, and capitalized software. Actual results may differ materially from these estimates.

Revenue Recognition

Our revenue is principally generated from three sources: (i) licensing arrangements, (ii) services and (iii) hardware.

Our license revenue consists of fees for licenses of proprietary and third-party software. Cost of license revenue primarily includes the costs of third-party software and royalties, and amortization of capitalized software. Our service revenue consists of maintenance, software installation, customer training, and consulting services related to our license revenue, fees for providing management services, such as accounts receivable and payment collection outsourcing, specialized staffing, analytical services and seminars. Cost of services consists primarily of salaries, benefits, and allocated costs related to providing such services. Hardware revenue includes third party hardware used to support our software installation. Cost of hardware revenue consists of third party equipment and installation.

We sell our products through our direct sales force. Our license agreements for such products do not provide for a right of return; and historically, product returns have not been significant.

We recognize revenue on our software products in accordance with Statement of Position (SOP) 97-2, Software Revenue Recognition, as amended, SOP 81-1; Accounting for Performance of Construction-Type and Certain Production-Type Contracts; and the Securities and Exchange Commission s Staff Accounting Bulletin (SAB) 104, Revenue Recognition.

We recognize revenue when all of the following criteria are met: there is persuasive evidence of an arrangement; the product has been delivered; we no longer have significant obligations with regard to implementation; the fee is fixed and determinable; and collectibility is probable. Delivery is considered to have occurred when title and risk of loss have been transferred to the customer, which generally occurs when media containing the licensed programs is provided to a common carrier. We consider all arrangements with payment terms extending beyond 180 days to be not fixed and determinable. If collectibility is not considered probable, revenue is recognized when the fee is collected.

We allocate revenue to each element in a multiple-element arrangement based on the element s respective fair value, with the fair value determined by the price charged when that element is sold separately. Specifically, we determine the fair value of the maintenance portion of the arrangement based as if sold separately and measured by the renewal rate offered to the customer. The professional services portion of the arrangement is based on hourly rates which we charge for these professional services when sold separately from software. If evidence of fair value of all undelivered elements exists but evidence does not exist for one or more delivered elements, then revenue is recognized using the

residual method. Under the residual method, the fair value of the undelivered elements is deferred and the remaining portion of the arrangement fee is recognized as revenue. The proportion of revenue recognized upon delivery may vary from quarter to quarter depending upon the mix of licensing arrangements, perpetual or term-based, and the determination of vendor-specific objective evidence (VSOE) of fair value for undelivered elements.

Certain of our perpetual and time-based licenses include unspecified upgrades. We recognize revenue from these contracts ratably over the term of the arrangement.

8

Contract accounting is applied where services include significant software modification, installation or customization. In such instances, the services and license fee is accounted for in accordance with SOP 81-1, whereby the revenue is recognized, generally using the percentage-of-completion method measured on labor input hours. If increases in projected costs-to-complete are sufficient to create a loss contract, the entire estimated loss is charged to operations in the period the loss first becomes known. The complexity of the estimation process and judgment related to the assumptions, risks and uncertainties inherent with the application of the percentage-of-completion method of accounting can affect the amounts of revenue and related expenses reported in our consolidated financial statements.

Service revenues from software maintenance and support are recognized ratably over the maintenance term, which in most cases is one year. Service revenues from training, consulting and other service elements are recognized as the services are performed. Service revenues from providing management services such as accounts receivable and payment collection outsourcing are recognized in accordance with SAB 104.

Hardware revenue is generated primarily from transactions in which customers purchased bundled solutions that included the Company s software and third-party hardware. If the bundled solution includes services that provide significant modification, installation or customization, contract accounting is applied in accordance with SOP 81-1, whereby the revenue is recognized, generally using the percentage-of-completion method measured on labor input hours. Otherwise, hardware revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the fee is fixed or determinable, and collection is probable.

Deferred revenue includes amounts billed to or received from customers for which revenue has not been recognized. This generally results from deferred maintenance; software installation, consulting and training services not yet rendered; and license revenue deferred until all revenue requirements have been met or as services have been performed. Additionally, there are term-based licenses for which revenues are recognized over the term of the contract, which is generally one year. Unbilled receivables are established when revenue is deemed to be recognized based on our revenue recognition policy, however, we do not yet have the right to bill the customer per the contract terms.

Cash and Cash Equivalents

Cash and cash equivalents consist of highly liquid investments that are comprised principally of taxable, short-term certificates of deposit, money market instruments and commercial paper with original maturities of three months or less at the time of purchase and demand deposits with financial institutions. These instruments carry insignificant interest rate risk because of their short-term maturities. Cash equivalents are stated at amounts that approximate fair value based on quoted market prices.

Accounts Receivable and Allowance for Doubtful Accounts

Accounts receivable consist primarily of amounts due us from our normal business activities. We provide an allowance for doubtful accounts to reflect the expected non-collection of accounts receivable based on past collection history and specific risks identified.

Intangible Assets

QuadraMed s acquisitions of other companies typically result in the acquisition of certain intangible assets and goodwill.

Goodwill. On January 1, 2002, the Company adopted Statement of Financial Accounting Standards (SFAS) No. 142, Goodwill and Other Intangible Assets. Under SFAS No. 142, goodwill and intangible assets deemed to have indefinite lives are to be separately disclosed on the balance sheet, and are no longer amortized but subject to annual impairment tests or whenever changes in circumstances indicate that the fair value of the Company is less than the carrying value.

Capitalized Software. Software development costs are capitalized upon the establishment of technological feasibility. In accordance with SFAS No. 86, Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed, we establish technological feasibility upon the completion of a working model and beta testing of the software product. The Company amortizes its capitalized software development costs on a straight-line basis generally over a period of five years.

Other Intangible Assets. Other intangible assets primarily relate to developed technology, trademarks and customer lists acquired in our business acquisitions. Other intangible assets also include acquired software whose amortization is included in cost of sales. On January 1, 2002, we adopted the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-Lived Assets. The provisions of this statement did not have a significant impact on our financial condition or operating results.

Developed technology costs are amortized on a straight-line basis over a period of three years. The majority of other intangible assets are amortized on a straight-line basis over a period of five to ten years. These assets are reviewed annually for impairment and written down to net realizable value, if necessary, in accordance with SFAS No. 144.

NOTE 3. RECENT ACCOUNTING PRONOUNCEMENTS

In May 2003, the FASB issued Statement of Financial Accounting Standards, or SFAS No. 150, *Accounting for Certain Financial Instruments with Characteristics of both Liabilities and Equity*. SFAS No. 150 establishes standards for how companies classify and measure certain financial instruments with characteristics of both liabilities and equity. It requires companies to classify a financial instrument that is within its scope as a liability or, in some circumstances, an asset. QuadraMed adopted the provisions of SFAS No. 150 effective beginning with the second quarter of fiscal 2004, and such adoption did not have a significant impact on QuadraMed s financial position and results of operations.

In November 2003, the Emerging Issues Task Force (EITF) issued EITF No. 03-6 Participating Securities and the Two-Class Method under FASB Statement No. 128, which provides for a two-class method of calculating earnings per share computations that relate to certain securities that would be considered to be participating in conjunction with certain common stock rights. This guidance would be applicable to the Company starting with the third quarter beginning July 1, 2004. The Company is currently evaluating the potential impact of this pronouncement on its financial statements.

NOTE 4. RECENT ACQUISITIONS

The following acquisitions have been accounted for using the purchase method of accounting in accordance with SFAS No. 141, Business Combination. The acquisition costs are allocated on a preliminary basis to the estimated fair market value of the assets acquired, including management s estimate for developed technologies and liabilities assumed. The final adjustments to the purchase price allocations are not expected to be material to the Consolidated Financial Statements.

Tempus Software, Inc.

On June 30, 2004, QuadraMed acquired all of the issued and outstanding capital stock of Tempus Software, Inc. (Tempus), a Florida corporation located in Jacksonville, Florida. Tempus is a leading enterprise scheduling and patient access software provider.

The balance sheet of Tempus has been included in the Company s consolidated balance sheet effective June 30, 2004. The preliminary purchase price consisted of \$5.3 million in cash and approximately 2.6 million shares of QuadraMed common stock, as well as approximately \$0.2 million of transaction and direct acquisition costs. On the closing date of the acquisition, \$0.6 million in cash and approximately 260,000 shares were deposited into an escrow account.

Tempus total revenue for the fiscal year ended December 31, 2003 was approximately \$7.3 million. The Company has determined that the acquisition of Tempus is not material and that pro forma disclosure of its financial statements is not required under SFAS No. 141.

10

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition (in thousands):

| Assets: | |
|------------------------------------|-----------|
| Current assets | \$ 3,053 |
| Property and equipment | 188 |
| Developed technology | 2,500 |
| Goodwill | 10,199 |
| | |
| | 15,940 |
| Liabilities: | |
| Current liabilities | 3,237 |
| | |
| Purchase price | 13,736 |
| Cash and cash equivalents acquired | (1,033) |
| | |
| Net purchase price | \$ 12,703 |
| | |

Détente Systems Pty Limited

On February 6, 2004, QuadraMed acquired all of the issued and outstanding capital stock of Détente Systems Pty Limited (Détente), an Australian proprietary limited company, and all of the units of trust ownership of the Détente Systems Trust (the Trust), an Australian business trust. Détente is engaged in the business of developing, selling and supporting clinical and laboratory systems in Australia, New Zealand, and the United Kingdom. The Trust holds title to all of the intellectual property used or useful in Détente business.

The results of operations of Detente have been included in the Company s consolidated statements of operations effective February 2004. The preliminary purchase price was approximately \$4.1 million in cash, which included approximately \$0.2 million of transaction and direct acquisition costs. Approximately \$2.7 million was paid on the closing date of the acquisition, and the balance was deposited into an escrow account to be payable upon the satisfactory performance of certain technology and performance goals relating to the acquired Détente technology, which are expected to be completed within six months of the acquisition date.

The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition (in thousands):

| Assets: | |
|------------------------|--------|
| Current assets | \$ 760 |
| Property and equipment | 157 |
| Developed technology | 1,000 |
| Goodwill | 3,696 |
| | |
| | 5,613 |
| Liabilities: | |
| Current liabilities | 1,184 |
| | |
| Purchase price | 4,429 |

| Cash and cash equivalents acquired | (355) |
|------------------------------------|----------|
| Net purchase price | \$ 4,074 |

Developed technology is being amortized on a straight-line basis over three years. Amortization of developed technology for the period from acquisition to June 30, 2004 was \$138,890.

Detente s total revenue for the fiscal year ended June 30, 2003 was approximately \$3.2 million. The Company has determined that the acquisition of Detente is not material and that pro forma disclosure of its financial statements is not required under SFAS No. 141.

NOTE 5. GOODWILL AND OTHER INTANGIBLE ASSETS

Goodwill and other intangible assets for the six-month period ended June 30, 2004 were as follows (in thousands):

| | Dec | As of ember 31, Q1 2003 Activity | | | |
|--------------------------|-------------|----------------------------------|----------|-----------|-------------|
| Cost | | | | | |
| Goodwill | \$ | 30,358 | \$ 3,696 | \$ 10,199 | \$ 44,253 |
| Capitalized software | | 13,446 | | | 13,446 |
| Other intangible assets | | 22,591 | 1,000 | 3,269 | 26,860 |
| | | | | | |
| | | 66,394 | 4,696 | 13,468 | 84,559 |
| Accumulated amortization | | | | | |
| Goodwill | \$ | (11,913) | \$ | \$ | \$ (11,913) |
| Capitalized software | | (10,227) | (552) | (539) | (11,318) |
| Other intangible assets | | (15,599) | (616) | (613) | (16,828) |
| | | | | | |
| | | (37,738) | (1,168) | (1,152) | (40,059) |
| Net book value | | | | | |
| Goodwill | \$ | 18,445 | \$ 3,696 | \$ 10,199 | \$ 32,340 |
| Capitalized software | | 3,219 | (552) | (539) | 2,128 |
| Other intangible assets | | 6,992 | 384 | 2,656 | 10,032 |
| | | | | | |
| | \$ | 28,656 | \$ 3,528 | \$ 12,316 | \$ 44,500 |
| | | | | | |

Amortization of acquired software, included in other intangible assets, for the three and six months ended June 30, 2004 and 2003 was \$195,000, \$369,000, and \$193,000, \$393,000, respectively, and is included in cost of license revenue. There were no impairment charges recorded during the three and six months ended June 30, 2004 and 2003.

NOTE 6. PREFERRED STOCK

On June 17, 2004, QuadraMed issued 4.0 million shares of Series A Cumulative Mandatory Convertible Preferred Stock (Preferred Stock) in a private, unregistered offering to qualified institutional buyers pursuant to Rule 144A under the Securities Act of 1933. The Preferred Stock was sold for \$25 per share, and QuadraMed used the \$96.1 million of net proceeds of the offering to repurchase all of its 10% Senior Secured Notes due 2008 and its 5.25% Convertible Subordinated Notes due 2005, together with accrued interest and related redemption premiums; and the remainder is used for general corporate purposes. See NOTES 7 & 15 for additional information on retirement of Notes.

Preferred Stock holders do not have any relative, participating, optional or other voting rights and powers, except that (i) if four quarterly dividend payments are in arrears, such holders are entitled to elect two substitute directors to the Board of Directors at any annual or special meeting, and (ii) in certain circumstances, such holders are entitled to vote on the authorization or creation of securities ranking on par with or above the Preferred Stock, certain amendments to the certificate of incorporation or the certificate of designation for the Preferred Stock, and the incurrence of new senior indebtedness in an aggregate principal amount exceeding \$8,000,000. Prior to the authorization or creation of, or increase in the authorized amount of, any shares of any class or series (or any security convertible into shares of any class or series) ranking senior to or on par with the Preferred Stock in the distribution of assets upon any liquidation, dissolution or winding up of QuadraMed or in the payment of dividends,

QuadraMed must have the affirmative vote of a majority of any outstanding shares of Preferred Stock (along with any shares of every other series or class of Common Stock ranking on par with the Preferred Stock having like voting rights).

The Preferred Stock is entitled to quarterly dividends of \$0.34 (5.5% per annum) and is convertible into shares of common stock of the Company at an initial conversion price of \$3.40, equivalent to a conversion rate of 7.35 shares of common stock for each share of preferred stock. The conversion price decreases to \$3.10 in the event that the volume weighted average of the daily market price per share during a period of 30 consecutive trading days equals \$2.75 or less during the one year period beginning on the first anniversary of the issue date. The Company has the right to demand conversion on or after May 31, 2007, in the event the volume weighted average of the daily market price per share during a period of 20 consecutive trading days equals or exceeds \$5.10.

Upon the conversion of shares of Preferred Stock to shares of Common Stock, the Preferred Stock holders have an option to convert and receive, when declared by the board of directors, dividends equal to the total previously unpaid dividends payable from the effective date of conversion through June 1, 2007 at a rate of \$1.375 per annum, or 5.50% per annum, discounted to present value at a rate of 5.5% per annum, payable in cash or common shares or any combination thereof at the option of the Company.

As a result of the aforementioned feature, the Company recorded dividends payable of \$14.1 million, which represents the present value of the three-year dividends. The carrying value of the preferred stock was reduced by this amount, which will be accreted over three years as a reduction to income available to common stockholders. The \$2.4 million discount will be amortized over three years as interest expense. If any preferred shares are converted prior to the end of the three-year period, the related accretion will be accelerated.

The following table summarizes the preferred stock activities (in thousands):

| Total issued | \$ 100,000 |
|---------------------------------|------------|
| Less: Issuance cost | (3,869) |
| Less: Accrued dividends payable | (14,051) |
| | |
| Preferred stock | \$ 82,080 |

NOTE 7. LONG-TERM DEBT

In June 2004, the Company commenced, with net proceeds from the Preferred Stock offering, a cash tender offer to purchase any and all of its outstanding Senior Secured Notes due 2008 (the 2008 Notes) and its 5.25% Convertible Subordinated 2005 Notes (the 2005 Notes). As of June 30, 2004, a principal balance of \$15.1 million of the 2008 Notes was retired with a premium of \$0.8 million (5%) and a principal balance of \$11.9 million of the 2005 Notes was retired with a premium of \$0.1 million (0.75%). As a result, the Company wrote off prorated portions of debt offering costs, the discount on the 2008 Notes, and effective interest rate adjustment and recorded a \$3.1 million loss on the retirement of Notes. The remaining Notes were retired subsequent to June 2004 at a loss of \$11.9 million. See NOTE 15 to these financial statements.

At June 30, 2004, long-term debt consisted of a principal balance of \$58.7 million for the 2008 Notes, unamortized discount of \$7.9 million, and a principal balance of \$56,000 for the 2005 Notes.

13

The following table sets forth a summary of the 2008 and 2005 Notes as of June 30, 2004 (in thousands):

| | | As of December 31, 2003 | | Q2 Activity | As of June 30, 2004 |
|---|----|-------------------------------|-----|----------------|---------------------|
| 10% Senior Secured Notes due 2008 | \$ | 72,294 | \$ | \$ (13,635) | \$ 58,659 |
| Unamortized discounts | _ | (11,061) | 457 | 2,728 | (7,876) |
| | | 61,233 | 457 | (10,907) | 50,783 |
| 5.25% Convertible Subordinated Notes due 2005 | \$ | 11,931 | | \$ (11,875) | \$ 56 |

NOTE 8. RESTRICTED STOCK GRANTS

QuadraMed grants its common stock as restricted shares under QuadraMed s 2004 Stock Compensation Plan to certain senior executives for no consideration. The outstanding restricted shares generally vest at the conclusion of a three or four-year period. QuadraMed has recorded the fair market value of the restricted shares granted as deferred compensation within the Stockholders Equity (Deficit) section of the Consolidated Balance Sheet. QuadraMed amortizes this amount over the related service period as it expects the shares to fully vest. Any changes in the expected or actual outcome of the grants are considered to be changes in estimate and are accordingly, recognized in the period the change becomes known.

During the three and six months ended June 30, 2004, 0 and 50,000 shares of fully-vested common stock were issued as restricted stock. During the three months ended June 30, 2003, 75,000 shares of restricted stock were issued. Compensation expense associated with the grants of restricted stock of \$265,000, \$573,000, and \$91,000, \$193,000 was recognized during the three and six months ended June 30, 2004 and 2003, respectively. As of June 30, 2004, 1,144,500 restricted shares remained subject to vesting.

NOTE 9. INCOME TAXES

The Company received income tax refunds during the six months ended June 30, 2004 and recorded the net amount as benefit for income taxes in the condensed consolidated statement of operations.

NOTE 10. NET LOSS PER SHARE AND COMPREHENSIVE LOSS

Basic net loss per share is computed by dividing net loss by the weighted average number of common shares outstanding during the period. Diluted net loss per share is computed by dividing income by the sum of the weighted average number of common shares and common equivalent shares outstanding during the period. Common equivalent shares consist of shares issuable upon the exercise of stock options and warrants (using the treasury stock method); convertible subordinated debentures (using the as-converted method); and convertible preferred stock. Common equivalent shares are excluded from the diluted computation only if their effect is anti-dilutive. As QuadraMed recorded net losses for each of the three and six month periods ended June 30, 2004 and 2003, no common equivalent shares were included in diluted net loss per share calculation because they were anti-dilutive. If QuadraMed had reported net income, the calculation of diluted earnings per share would have included an additional 34,661,000 common stock equivalent shares not included for basic earnings per share for the quarter ended June 30, 2004, resulting in total common stock equivalent shares of 69,533,000.

The components of QuadraMed s comprehensive loss include the unrealized gain (loss) on available-for-sale securities and foreign currency translation adjustment, which are not significant for any period presented. Total comprehensive loss amounted to \$9.7 million, \$14.3 million, and \$6.1 million, \$16.8 million for the three and six months ended June 30, 2004 and 2003, respectively.

14

NOTE 11. STOCK-BASED COMPENSATION

SFAS No. 123, Accounting for Stock Based Compensation, encourages, but does not require, companies to record compensation cost for stock based employee compensation plans at fair value. QuadraMed has chosen to account for stock based employee compensation using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and Related Interpretations. Accordingly, compensation cost for stock options granted to employees is measured as the excess, if any, of the quoted market price of QuadraMed s stock at the date of the grant over the amount an employee must pay to acquire the stock.

QuadraMed has determined pro-forma information regarding net income and earnings per share as if we had accounted for employee stock options under the fair value method as required by SFAS No. 123. The fair value of these stock-based awards to employees was estimated using the Black-Scholes option pricing model. Had compensation cost for the Company s stock option plan and employee stock purchase plan been determined consistent with SFAS No. 123, the Company s reported net loss and net loss per share would have been changed to the amounts indicated below (in thousands except per share data):

| | Th | Three months ended June | | | |
|--|--------|---------------------------------------|------|------------------------------------|--|
| | | 2004 | | 2003 | |
| Net loss, as reported | \$ | (9,669) | \$ | (6,274) | |
| Add: Stock-based employee compensation expense included in reported net loss | | 326 | | 102 | |
| Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards | | (1,711) | | (1,089) | |
| | _ | | _ | | |
| Pro forma net loss | \$ | (11,054) | \$ | (7,261) | |
| | _ | | _ | | |
| Basic and diluted net loss per common share, as reported | \$ | (0.28) | \$ | (0.23) | |
| Basic and diluted net loss per common share, pro forma | \$ | (0.32) | \$ | (0.27) | |
| | | | | | |
| | 5 | Six months e | nded | June 30, | |
| | - | Six months en | nded | June 30, 2003 | |
| Net loss, as reported | - | 2004 | _ | 2003 | |
| Net loss, as reported Add: Stock-based employee compensation expense included in reported net loss | - | | _ | | |
| Net loss, as reported Add: Stock-based employee compensation expense included in reported net loss Deduct: Total stock-based employee compensation expense determined under fair value based | - | 2004 \$ (14,210) | _ | 2003 (16,952) | |
| Add: Stock-based employee compensation expense included in reported net loss | - | 2004 \$ (14,210) | _ | 2003 (16,952) | |
| Add: Stock-based employee compensation expense included in reported net loss Deduct: Total stock-based employee compensation expense determined under fair value based | | 2004 \$ (14,210) 789 | \$ | 2003 (16,952) 268 | |
| Add: Stock-based employee compensation expense included in reported net loss Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards | | 2004 \$ (14,210) 789 (4,590) | \$ | 2003 (16,952) 268 (2,214) | |
| Add: Stock-based employee compensation expense included in reported net loss Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards | - (| 2004 \$ (14,210) 789 (4,590) | \$ | 2003 (16,952) 268 (2,214) | |

The fair value of each option grant is estimated on the date of the grant using the Black-Scholes option-pricing model with the following assumptions:

Edgar Filing: QUADRAMED CORP - Form 10-Q/A

| | 2004 | 2003 |
|---------------------------------|-----------|-----------|
| | | |
| Expected dividend yield | | |
| Expected stock price volatility | 120.48% | 140.99% |
| Risk-free interest rate | 3.36% | 2.74% |
| Expected life of options | 4.3 years | 5.0 years |

NOTE 12. SEGMENT REPORTING

Prior to November 5, 2003, QuadraMed aligned its operations into three business segments for management reporting purposes. These segments were based on product functionality and shared target markets. QuadraMed s business segments were (i) the Enterprise Division, (ii) the Health Information Management (HIM) Software Division, and (iii) the Financial Services Division. On November 5, 2003, QuadraMed consolidated the HIM Software Division and Enterprise Division into a single functional software organization. This reorganization is designed to use existing resources more efficiently and to facilitate the integration of products and technologies. The change does not affect the Financial Services Division. The financial results for these operating segments for prior periods have been reclassified to conform to the current period presentation.

The operations and assets of the Company are primarily located in the United States. Results of operations for the Company are provided to QuadraMed s Chief Operating Decision Makers (CODMs), which are the Chairman of the Board and Chief Executive Officer, President and Chief Operating Officer, and Chief Financial Officer.

Summary financial data by business segment as reported to the CODM is presented below for the three and six months ended June 30, 2004 and 2003 (in thousands):

Three months ended June 30,

| | | 2004 | | | 2003 | |
|---|------------|-----------|--------------|------------|-----------|--------------|
| | | Financial | Consolidated | | Financial | Consolidated |
| Description | Software | Services | Total | Software | Services | Total |
| Total revenues | \$ 30,470 | \$ 1,428 | \$ 31,898 | \$ 27,177 | \$ 2,259 | \$ 29,436 |
| Gross margin | \$ 18,088 | \$ (3) | \$ 18,085 | \$ 15,635 | \$ 274 | \$ 15,909 |
| Interest expense, net | \$ (1,954) | \$ (335) | \$ (2,289) | \$ (2,364) | \$ (548) | \$ (2,912) |
| Segment assets | \$ 197,039 | \$ 2,764 | \$ 199,803 | \$ 121,731 | \$ 5,676 | \$ 127,407 |
| Total depreciation and amortization (1) | \$ 2,733 | \$ 178 | \$ 2,911 | \$ 3,122 | \$ 433 | \$ 3,555 |

(1) Total depreciation and amortization is comprised of capitalized and acquired software amortization reflected in gross margin; equipment depreciation, amortization of deferred compensation and amortization of other intangibles included in operating expenses; and amortization of debt-offering costs and discounts that are reflected in interest expense.

Six months ended June 30,

| | | 2004 | | | 2003 | |
|-----------------------|------------|-----------------------|-----------------------|------------|-----------------------|-----------------------|
| Description | Software | Financial Services | Consolidated Total | Software | Financial Services | Consolidated Total |
| Total revenues | \$ 65,115 | \$ 3,253 | \$ 68,368 | \$ 53,506 | \$ 5,165 | \$ 58,671 |
| Gross margin | \$ 39,054 | \$ (3) | \$ 39,051 | \$ 29,950 | \$ 888 | \$ 30,838 |
| Interest expense, net | \$ (4,133) | \$ (527) | \$ (4,660) | \$ (3,193) | \$ (625) | \$ (3,818) |

| Segment assets | \$ 197,039 | \$ 2,764 | \$ 199,803 | \$ 121,731 | \$ 5,676 | \$ 127,407 |
|---|------------|----------|---------------|------------|----------|---------------|
| Total depreciation and amortization (1) | \$ 5,263 | \$ 383 | \$ 5,646 | \$ 5,373 | \$ 650 | \$ 6,023 |

(1) Total depreciation and amortization is comprised of capitalized and acquired software amortization reflected in gross margin; equipment depreciation, amortization of deferred compensation and amortization of other intangibles included in operating expenses; and amortization of debt-offering costs and discounts that are reflected in interest expense.

16

NOTE 13. MAJOR CUSTOMERS

In the three months ended June 30, 2004, one single customer, Micron Government Computer Systems (Micron), accounted for 10% of total revenues. Another customer, The County of Los Angeles (LACO), accounted for 14% of total revenues for the six months ended June 30, 2004. No single customer accounted for more than 10% of total revenues in the three and six months ended June 30, 2003.

NOTE 14. LITIGATION AND OTHER MATTERS

In October 2002, a series of securities law class action complaints and a derivative suit were filed by certain of our shareholders against QuadraMed and certain of its officers and directors. On April 21, 2004, the Court approved the final settlement of the shareholder derivative case. On July 30, 2004, the Court approved the final settlement of the federal securities class action litigation.

Also as previously reported on February 28, 2003 and October 10, 2003, QuadraMed was subject to an investigation and proposed enforcement action by the staff of the Securities and Exchange Commission. On April 30, 2004, the matter was settled with a Cease and Desist Order issued by the SEC, to which QuadraMed consented, without admitting or denying the findings in the Order. No fine was assessed against QuadraMed. The Order requires QuadraMed to cease and desist from violations of the antifraud, periodic reporting and books and records provisions of the Securities Exchange Act of 1934.

In June 2000, QuadraMed entered into a Separation Agreement with James Durham upon his resignation as QuadraMed s Chief Executive Officer. This agreement was amended in July 2001 when Mr. Durham resigned from QuadraMed s Board of Directors. Pursuant to the agreement, as amended, Mr. Durham received approximately \$3.2 million as of the dates of the agreements, a \$250,000 per year salary through January 1, 2001, a \$2,000 per month salary until December 31, 2003, the vesting of approximately 100,000 unvested options, the vesting of interest in QuadraMed s Supplemental Employee Retirement Plan (the SERP), and payments of approximately \$500,000 per year by QuadraMed into his account in the SERP Trust, all subject to the terms and conditions of the agreement, as amended. Among other terms, the Separation Agreement contained a provision for non-disparagement, requiring Mr. Durham to refrain from directly or indirectly disparaging QuadraMed or its stockholders, directors, officers, employees, or agents for the term in which Mr. Durham was receiving payments under the Separation Agreement and for a period of one year thereafter. In a November 2002 article published in the *Marin Independent Journal* for which he was interviewed, Mr. Durham made repeated disparaging remarks about QuadraMed and its management. QuadraMed notified him that his published remarks were in breach of his Separation Agreement. Subsequent to the publication of this article, Mr. Durham requested a lump sum election for his SERP benefits. The amount of payment called for in the SERP is described in Note 14 Employee Benefit Plans Supplemental Executive Retirement Plan of the Company s Annual Report on Form 10-K/A for 2003.

In light of Mr. Durham s breach of his Separation Agreement, QuadraMed has notified Mr. Durham and his counsel that it is not obligated to fund additional SERP payments on behalf of Mr. Durham and that it will not pay him the requested lump sum for his SERP benefits. In January 2004, Mr. Durham filed an amended complaint against QuadraMed in the Superior Court of the State of California, Marin County, alleging a breach of his SERP contract and a breach of good faith and fair dealing under this contract. This amended complaint seeks payment of his lump sum SERP benefits, interest, attorneys fees, and other relief. On January 30, 2004, this matter was moved to the United States District Court, Northern District of California. QuadraMed has filed an answer and a counterclaim seeking a declaration that QuadraMed is not obligated to pay Mr. Durham s SERP benefits as a result of Mr. Durham s breach of his Separation Agreement. The case is in discovery and a jury trial has been scheduled for May 23, 2005. The parties participated in court-ordered mediation in early October 200, which did not result in a settlement. Mr. Durham has now filed a motion for partial summary judgment on the issue of liability as to his claim for SERP benefits and for complete summary judgment as to QuadraMed s counterclaim. QuadraMed has filed an opposition to that motion. A hearing on the summary judgment motion is scheduled for November 19, 2004. QuadraMed intends to defend itself vigorously against these allegations and feels that it is in the best interests of QuadraMed and its stockholders to defend this action, due to Mr. Durham s disparaging comments after his resignation and his breach of the Separation Agreement, as amended, unless the action can be resolved through an acceptable compromise settlement. The ultimate outcome of these matters cannot presently be determined.

17

NOTE 15. SUBSEQUENT EVENTS

Subsequent to June 30, 2004, the Company retired all of its remaining \$58.7 million of the 2008 Notes and \$56,000 of the 2005 Notes. Total cash payment was \$63.2 million, which includes additional interest expense of \$54,000 subsequent to June 2004. Total loss recorded on the retirement of debt in July 2004 was approximately \$11.9 million, which includes premiums of \$2.9 million and write-offs of remaining balances of debt offering costs of \$737,000, discount to the 2008 Notes of \$7.9 million and effective interest rate adjustment of \$339,000.

The following is a pro forma balance sheet presenting the effect of the retirement as if the remaining Notes had been retired as of June 30, 2004 and the related loss recorded as of June 30, 2004 (in thousands, unaudited):

| | June 30, 2004 Debt retirement subsequent to June 30, | | Pro Forma June 30, 2004 |
|--|---|-------------|-------------------------------|
| Assets | | | |
| Current assets | | | |

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement on Risks Associated With Forward-Looking Statements

You should read the following discussion in conjunction with our Condensed Consolidated Financial Statements and related footnotes. This Report contains forward-looking statements as defined by Section 28A of the Securities Act of 1993 and Section 27E of the Securities Act of 1934 that are subject to risks and uncertainties. The words believe, expect, target, goal, project, anticipate, predict, intend, plan, will, should, could, and similar expressions and their negatives are intended to identify such statements. Forward-looking statements are not guarantees of future performance, anticipated trends and growth in businesses, or other characterizations of future events or circumstances and are to be interpreted only as of the date on which they are made. We undertake no obligation to update or revise any forward-looking statement. You should not place undue reliance on these forward-looking statements. Our actual results could differ materially from those anticipated in these forward-looking statements for many reasons, including the risks faced by us described below and elsewhere in this Report, and in other documents we file with the SEC from time to time.

Results of Operations (unaudited)

The following table sets forth selected data for the indicated periods. Percentages are expressed as a percentage of total revenues, except for cost of revenue, which is expressed as a percentage of the related revenue classification (in thousands, except percentages).

| | Three months ended June 30, | | | | | | |

Revenue

Total revenue. Total revenues for the three months ended June 30, 2004 were \$31.9 million, an increase of \$2.5 million or 8% from \$29.4 million for the three months ended June 30, 2003. Enterprise and Health Information Management (HIM) product solutions contributed \$30.5 million, an increase of \$3.3 million or 12% from the same period last year. Financial Services contributed approximately \$1.4 million, a decrease of \$0.8 million or 37% from the same period last year. The Education service line of Financial Services Division was eliminated in the current quarter, contributing \$0.2 million decrease for three months ended June 30, 2004 compared to the same quarter last year.

Total revenues for the six months ended June 30, 2004 were \$68.4 million, an increase of \$9.7 million or 17% from \$58.7 million for the six months ended June 30, 2003. Enterprise and HIM product solutions contributed \$65.1 million, an increase of \$11.6 million or 22% from the same period in the prior year. Financial Services contributed approximately \$3.3 million, a decrease of \$1.9 million or 37% from the same period in the prior year. Approximately \$0.6 million of the decrease in Financial Services Division is attributable to the elimination of the Education service line.

Services and other. Services and other revenue consists of professional services, such as implementation and installation services; training; maintenance, which consists of technical support and product upgrades; reimbursable expenses and other services revenue. Professional services are typically provided over a period of three to six months for the HIM product solutions and two years for the Enterprise product solutions. These services are provided subsequent to the signing of a software license agreement and depend almost exclusively on our software license revenues. Financial Services revenue is recognized as services are performed. Our maintenance revenues depend on both licenses of our software products and renewals of maintenance agreements by our existing customer base and are recognized ratably over the term of the agreement.

20

Services revenue of \$4.8 million, or 15% of total revenues, in the three months ended June 30, 2004 increased \$0.1 million compared to \$4.7 million, or 16% of total revenues, in the same period of the prior year. The increase is due primarily to an increase in Enterprise and HIM product solutions of \$1.0 million to \$3.4 million due to a growth in supplemental services provided to our existing customers. This was offset by a decrease in Services revenues for Financial Services of \$0.9 million to \$1.4 million due to a reduction in signed contracts and elimination of the education service line.

Services revenue of \$9.3 million, or 13% of total revenues, in the six months ended June 30, 2004 decreased \$0.2 million compared to \$9.5 million, or 16% of total revenues, in the same period of the prior year. The decrease is due primarily to a decrease in Services revenues for Financial Services of \$1.9 million to \$3.3 million due to a reduction in signed contracts and elimination of the education service line. This was offset by an increase in Enterprise and HIM product solutions of \$1.8 million to \$6.0 million due to an increase in supplemental services provided to our existing customers.

Maintenance revenue was \$10.1 million in the three months ended June 30, 2004 compared to \$9.2 million in the three months ended June 30, 2003, representing an increase of \$0.9 million or 10%. During the six months ended June 30, 2004 maintenance revenue was \$20.2 million compared to \$17.8 million in the six months ended June 30, 2003, representing an increase of \$2.4 million or 13%. Maintenance revenue, as a percentage of total revenue, was 32%, 30% and 31%, 30% in the three and six months ended June 30, 2004 and 2003, respectively. The increase in maintenance revenue is primarily due to increased customer base for Enterprise and HIM products. Maintenance contracts are recognized ratably over the period of term.

Installation and other services revenue increased \$0.4 million to \$4.7 million in the three months ended June 30, 2004 from \$4.4 in the three months ended June 30, 2003. During the six months ended June 30, 2004, installation and other services revenue increased \$1.0 million to \$9.6 million from \$8.6 million in the six months ended June 30, 2003. Installation revenue increased primarily due to an increase in the work performed during the current period.

Licenses. License revenue consists of fees and licenses of proprietary and third-party software. We market our products through our direct sales force. License revenue for the three months ended June 30, 2004 was \$11.2 million, an increase of \$1.0 million or 10% from \$10.2 million in the three months ended June 30, 2003. The increase is primarily attributable to the timing of revenue recognized under the completed contract and percentage of completion methods, an expansion of our customer base and new product introductions at the end of fiscal 2002. In addition, license revenue increased for the completion of Company commitments under previously deferred contracts.

License revenue for the six months ended June 30, 2004 was \$23.7 million, an increase of \$4.0 million or 20% from \$19.7 million in the six months ended June 30, 2003. License revenue from HIM products solutions increased approximately \$1.5 million to \$10.7 million in the six months ended June 30, 2004, primarily due to a strong growth in sales to agencies of the US Government and government contractors year over year. License revenue for Enterprise product solutions increased by approximately \$2.5 million to \$12.9 million in the six months ended June 30, 2004 primarily due to the completion of Company commitments under previously deferred contracts.

Hardware. Hardware revenue consists of sale of third-party hardware purchased specifically for use by our software product customers. Hardware revenue in the three months ended June 30, 2004 increased slightly to \$1.0 million from \$0.9 million in the corresponding period of the prior year. During the six months ended June 30, 2004 and 2003, hardware revenue was \$5.5 million and \$3.1 million, respectively, an increase of \$2.4 million or 78%. The increase was primarily attributable to the completion and acceptance, in the current year, of a large contract signed at the end of fiscal year 2003.

Revenue recognized for the three and six months ended June 30, 2004 and 2003 includes:

amounts initially recorded as deferred revenue in which the Company has now completed its contractual commitments;

service revenue relating to installation, training, seminars and financial services during the period; and

revenues recognized on a cash-basis after the Company s contractual commitment has been completed and cash has been received from the customer.

21

The following table is a summary roll forward schedule of the deferred revenue (in thousands):

| | For the three r June | |
|--|-------------------------|---------------------|
| | 2004 | 2003 |
| Deferred revenue, beginning balance | \$ 51,908 | \$ 48,704 |
| Add: revenue deferred | 24,088 | 21,855 |
| Less: deferred revenue recognized | (28,052) | (23,504) |
| Add: deferred revenue acquired in acquisition | 2,381 | |
| Deferred revenue, ending balance | \$ 50,325 | \$ 47,055 |
| | For the six m | |
| | 2004 | |
| | | 2003 |
| Deferred revenue, beginning balance | \$ 48,502 | |
| Deferred revenue, beginning balance Add: revenue deferred | \$ 48,502 57,039 | \$ 39,492 55,065 |
| | | \$ 39,492 |
| Add: revenue deferred | 57,039 | \$ 39,492 55,065 |

Cost of Revenue

Cost of services and other. Cost of services and other consists of salaries and related expenses associated with services performed for customer support, installation, maintenance and consulting services. Cost of services and other for the three months ended June 30, 2004 was \$9.5 million, a decrease of \$1.6 million from \$11.1 million for the three months ended June 30, 2003. As a percentage of services and other revenue, cost of services and other was 48% and 61% for the three months ended June 30, 2004 and 2003, respectively. The decrease was primarily due to a decrease in personnel costs and overall expenses for the Financial Services Division of \$0.3 million, HIM product solutions of \$0.4 million and Enterprise product solutions of \$0.6 million.

Cost of services and other for the six months ended June 30, 2004 decreased \$2.6 million from \$21.8 million for the six months ended June 30, 2003 to \$19.2 million for the six months ended June 30, 2004. Cost of services and other, as a percentage of revenue, for the six months ended June 30, 2003 and 2004 was 49% and 61%, respectively. The decrease was primarily due to a decrease in personnel costs and overall expenses for the Financial Services Division of \$0.9 million, HIM product solutions of \$0.4 million and Enterprise product solutions of \$0.5 million.

Cost of licenses. Cost of licenses consists primarily of the cost of third-party software, royalties and amortization of capitalized and acquired software. A significant percentage of our total cost of revenue is attributable to the cost of third-party software royalties and licenses relating to

software embedded within our software applications. Generally, third-party royalty fees fluctuate based on revenue or the number of the Company's customers and therefore will fluctuate on a quarter to quarter basis. Cost of licenses in the three months ended June 30, 2004 increased \$1.7 million to \$3.5 from \$1.8 million for the three months ended June 30, 2003. As a percentage of license revenue, cost of licenses was 31% and 17% for the three months ended June 30, 2004 and 2003, respectively. The increase in cost of license revenue was primarily due to an increase in the cost of third-party software for the Enterprise solution suite of \$0.8 million as well as an increase in royalty fees of \$1.0 million for HIM product solution.

Cost of licenses for the six months ended June 30, 2004 increased \$3.0 million to \$6.6 million from \$3.6 million for the six months ended June 30, 2003. Cost of licenses as a percentage of license revenue, for the six months ended June 30, 2003 and 2004 was 28% and 18%, respectively. The increase in the cost of license revenue was primarily due to an increase in the cost of third-party software for the Enterprise products of \$0.9 million as well as an increase in HIM solution royalty fees of \$2.0 million.

22

Cost of hardware. Cost of hardware consists of third-party hardware and installation costs. Cost of hardware for the three months ended June 30, 2004 was \$0.8 million, an increase of \$0.2 million, compared to \$0.6 million for the same period in the prior year. As a percentage of hardware revenue, cost of hardware was 75% and 63% for the three months ended June 30, 2004 and 2003, respectively. The increase was directly affected by the increase in hardware revenue in the first quarter of 2004, primarily attributable to the completion and acceptance, in the current year, of a large contract signed at the end of fiscal year 2003.

During the six months ended June 30, 2004 and 2003 cost of hardware was \$3.6 million and \$2.4 million, an increase of \$1.2 million or 50%. Hardware cost as a percentage of hardware revenue for the six months ended June 30, 2004 and 2003 was 65% and 77%, respectively. Cost of hardware was directly affected by the increase in hardware revenue in the first quarter of 2004, primarily attributable to the completion and acceptance, in the current year, of a large contract signed at the end of fiscal year 2003.

Gross Margin

Gross margin on license revenue declined due to increased royalty expenses associated with HIM solutions revenue. Gross margin on services and other revenue improved due to efficiencies within the installation and maintenance departments, and due to lower revenues in the Financial Services Division, which generally has lower gross margins. The margin on hardware revenue improved due to an increase in profitability in hardware contracts signed in the current year.

Operating Expenses

General and administration. General and administration expense consists of compensation and benefit costs for executive, finance, legal, information technology, and administrative personnel as well as bad debt expense and professional fees. General and administration expense, including unusual charges, decreased to \$8.2 million and \$17.5 million for the three and six months ended June 30, 2004 compared to \$8.7 and \$20.8 million in the same period in 2003. This is due to the reduction of costs related to the restatement of financial statements in 2003.

General and administration expense, excluding unusual charges of \$318,000 (see unusual charges below), increased to \$7.9 million in the three months ended June 30, 2004 compared to \$5.4 million in the same quarter prior year. As a percentage of total revenues, general and administration expense was 25% and 18% in the three months ended June 30, 2004 and 2003, respectively.

For the six months ended June 30, 2004, general and administration expense, excluding unusual charges of \$1.9 million, increased to \$15.6 million from \$13.4 million in the comparable period in 2003. As a percentage of total revenues, general and administration expense remained constant at 23% for the six months ended June 30, 2004 as compared to the six months ended June 30, 2003.

The increase in general and administration expense excluding unusual charges for the three and six months ended June 30, 2004 is mainly attributable to the increase in bad debt expense for accounts receivable of \$1.1 million and \$1.7 million, respectively over the same periods in 2003. As of June 30, 2004, there were 117 employees in general and administrative departments compared to 110 employees as of June 30, 2003.

Software development. Software development expense includes costs associated with the development of new products, enhancements of existing products for which technological feasibility has not been achieved, and quality assurance activities and primarily relates to compensation and benefits costs. Software development costs in the three months ended June 30, 2004 were \$6.8 million compared to \$5.0 million in the same period in 2003, representing an increase of \$1.8 million. As a percentage of total revenues, software development costs were 21% and 17% for the quarters ended June 30, 2004 and 2003, respectively. For the six months ended June 30, 2004, software development costs were \$13.9 million, an increase of \$3.6 million or 35% from \$10.3 million in the first half of 2003.

The increase was primarily attributed to an increase in personnel costs and overall expenses for software development departments. As of June 30, 2004, there were 229 employees in software development departments compared to 212 employees as of June 30, 2003.

23

Table of Contents

Sales and marketing. Sales and marketing expense includes costs associated with our sales and marketing personnel and consists primarily of compensation and benefits, commissions and bonuses, promotional and advertising expenses. Sales and marketing expense in the three months ended June 30, 2004 was \$6.0 million, an increase of \$1.2 million or 25% compared to \$4.8 million in the corresponding period of 2003. As a percentage of total revenues, sales and marketing expenses was 19% for the three months ended June 30, 2004 as compared to 16% in the same quarter of 2003. For the six months ended June 30, 2004, sales and marketing expense was \$11.9 million, an increase of \$1.4 million or 13% compared to \$10.5 million for the first half of the 2003.

The increase in sales and marketing expenses is related to an increase in commission expenses of \$1.3 million for both the three and six months ended June 30, 2004. As of June 30, 2004, there were 106 employees in sales and marketing departments compared to 108 employees as of June 30, 2003.

Amortization of intangible assets and depreciation. Amortization of intangible assets and depreciation expense for the three months ended June 30, 2004 was \$1.2 million, a decrease of \$0.3 million compared to \$1.5 million in the same period in 2003. For the six months ended June 30, 2004, amortization of intangible assets and depreciation expense decreased to \$2.4 million from \$3.0 million in the corresponding period of 2003 mainly due to a decrease in depreciation expense as assets became fully depreciated, offset by a slight increase in the amortization of identifiable intangible assets related to the developed technologies of Détente.

Unusual charges. Unusual charges of \$318,000 and \$1.9 million for the three months and six months ended June 30, 2004 includes \$842,000 in retention bonuses and severance payments made to the San Rafael employees in connection with moving the Corporate offices to Reston Virginia, \$365,000 in salaries paid to transitioning the Corporate offices to Reston and \$680,000 in legal fees associated with the settlement of securities class action litigation and the shareholder derivative litigation. Unusual charges of \$3.3 million and \$7.5 million for the three and six months ended June 30, 2003 represents restatement costs.

Other Income (Expense)

Other income (expense), net. Net other expense was \$5.5 million and \$2.1 million for the three month period ended on June 30, 2004 and 2003, and \$7.7 million and \$3.1 million for the six months ended June 30, 2004 and 2003, respectively. The increase was primarily due to the additional interest expense on the 2008 Notes entered into April 2003, amortization of the associated expense related to the warrants and loss on the retirement of debt.

Income Taxes

Provision (benefits) for income taxes. For the six month ended June 30, 2004, the Company had income tax benefit of \$200,000, which represents tax refunds received in the first quarter of the current year as a result of the restatement of the Company s 2001 financial statements. There was no provision for income taxes for the three month and six month periods ended June 30, 2003.

Liquidity and Capital Resources

Balance Sheet

As of June 30, 2004, we had \$91.4 million in cash and cash equivalents, compared to \$36.9 million as of December 31, 2003. Cash increased primarily due to net receipts from the Preferred Stock offering in June 2004. The Company used \$63.2 million to retire the remaining balance of its 2008 and 2005 Notes subsequent to June 30, 2004, resulting in a pro forma cash balance of \$28.2 million. Please see NOTE 15 to these financial statements.

As of June 30, 2004, we had working capital of \$53.1 million compared to \$13.0 million as of December 31, 2003. Working capital, net of deferred revenue and related accounts receivable, was \$95.4 million as of June 30, 2004 compared to \$52.5 million as of December 31, 2003. Working capital, net of deferred revenue and related accounts receivable was \$33.4 million on a pro forma basis after the Notes were retired subsequent to June 30, 2004.

Accounts receivable decreased by \$3.3 million to \$27.6 million as of June 30, 2004 from \$30.9 million as of December 31, 2003 on a net basis. Accounts receivable decreased primarily because of increased collection efforts and write-offs of \$1.1 million, offset by a \$1.5 million increase as a result of Tempus acquisition. During the quarter ended June 30, 2004, the allowance for doubtful accounts decreased slightly by \$200,000. QuadraMed maintains an allowance for doubtful accounts to reflect the expected non-collection of accounts receivable based on

24

Table of Contents

past collection history and specific risks identified within the portfolio. If the financial condition of QuadraMed s customers were to deteriorate resulting in an impairment of their ability to make payments, or if payments from customers are significantly delayed, additional allowance might be required.

Prepaid expenses and other current assets decreased by \$1.1 million as of June 30, 2004 to \$10.1 million as of June 30, 2004 compared to \$11.3 million in December 31, 2003. The decrease is due primarily to amortization of government royalties. The decrease is partially offset by the addition of prepaid expenses acquired in Tempus acquisition.

Goodwill increased by approximately \$13.9 million from December 31, 2003 to June 30, 2004 due to the acquisitions of Détente and Tempus in the first quarter and second quarters of 2004, respectively. In addition, other intangible assets increased by \$4.3 million due to the acquisition of Détente and Tempus in the first and second quarter of 2004, respectively.

Other long-term assets decreased slightly by \$0.2 million from December 31, 2003 to June 30, 2004. This decrease is primarily due to decrease in deposits and debt offering costs. The decreases were offset partially by increases to acquisition costs associated with Tempus and Détente.

Accrued payroll and related expenses decreased by \$1.9 million to \$9.2 million at June 30, 2004 from \$11.1 million at December 31, 2003 principally due to decreases in accrued severance expenses and incentive bonuses.

In the second quarter ended June 30, 2004, the Company accrued approximately \$14.1 million for dividends payable to the shareholders of its newly issued Preferred Stock. Other accrued liabilities decreased approximately \$1.8 million from December 31, 2003 to June 30, 2004. This decrease is due primarily to reduction in accrued contract costs and royalties. The royalty accrual decreased due to timing of payment, which is dependent on our collections. The decrease is partially offset by other accrued liabilities acquired in the Tempus acquisition.

Deferred revenue increased by \$1.8 million from December 31, 2003 to June 30, 2004, and the increase was primarily related to the addition of deferred revenue from the Tempus acquisition. The increase was offset by approximately \$0.5 million decrease in QuadraMed deferred revenue, which is due to timing of reaching billing milestones and revenue recognition criteria. In most instances, except for training, seminars and financial services, deferred revenue is increased when the Company invoices a customer, and is decreased when revenue is recognized based on percentage completion or obtainment of a milestone in the customer contract. Unbilled revenue is revenue recorded which has not been invoiced. Invoices that have been issued and remain uncollected are recorded in the deferred revenue and accounts receivable balances. In determining the allowance for doubtful accounts the Company excludes invoices that remain recorded both in deferred revenue and accounts receivable since no revenue has been recognized on these balances.

Long-term debt decreased by approximately \$22.3 million from December 31, 2003 to June 30, 2004. The decrease is primarily attributable to the \$10.4 million retirement of the 2008 Notes and the \$11.8 million retirement of the 2005 Notes.

Cash Flows

The Company s consolidated statement of cash flows is summarized below (in thousands):

For the Six Months Ended June 30,

| | 2004 | | 2003 | | |
|---|---------------|----|---------|--|--|
| Cash used in operating activities | \$ (7,691) | \$ | (5,398) | | |
| Cash provided by (used in) investing activities | (9,786) | | 2,622 | | |
| Cash provided by financing activities | 71,933 | | 8,587 | | |
| Net increase in cash and cash equivalents | 54,456 | | 5,811 | | |

During the six months ended June 30, 2004, \$7.7 million was used in operating activities, compared to \$5.4 million used in the same period in the prior year. The net loss of \$14.2 million was reduced by non-cash charges totaling approximately \$9.7 million, including depreciation and amortization of \$5.6 million, bad debt expense of

\$1.8 million, and loss on retirement of debt of \$2.3 million. A decrease in accounts receivable increased cash from operating activities by \$3.4 million, whereas a decrease in accounts payable and accrued liabilities used \$6.1 million for operating activities. Significant disbursements during the period presented, most of which occurred during the second quarter, included approximately \$3.0 million for hardware related to a single customer for which revenue was recognized; interest payments of \$2.5 million on our 2005 and 2008 Notes; and payments of approximately \$3.0 million related to legal matters.

Cash flows used in investing activities totaled \$9.8 million during the six months ended June 30, 2004. The acquisition of Détente and Tempus used cash of approximately \$4.1 million and \$5.1 million, respectively. Capital expenditures used cash of \$2.3 million. These cash outlays were partially offset by the change in restricted cash of \$1.6 million resulted from a release of an escrow related to HIMS sale in 2003.

Financing activities provided cash of \$71.9 million for the six months ended June 30, 2004 principally from the issuance of preferred and common stock, offset by cash used in the repayment of our 2005 and 2008 Notes.

At June 30, 2004, the Company s balance of cash and cash equivalents was \$91.4 million. Pro forma cash balance after the retirement of the Company s Notes subsequent to June 30, 2004 was \$28.2 million. Please see NOTE 15 to these financial statements. The Company believes that its current balance of cash and cash equivalents and funds generated from operations, if any, will be sufficient to fund the Company s current projected cash needs for the foreseeable future.

Commitments

The following table summarizes financial data for our contractual obligations and other commercial commitments, including interest obligations, as of June 30, 2004 (in thousands):

| | | Payments Due by Period | | | |
|--|-----------|------------------------|--------------|--------------|---------------|
| | Total | Less than 1 year | 1-3 years | 4-5 years | After 5 years |
| Contractual Obligations | | | | | |
| Long-term debt (1) | \$ 58,715 | \$ 58,715 | \$ | \$ | \$ |
| Interest on long term debt (1) | 1,465 | 1,465 | | | |
| Operating leases (2) | 25,442 | 2,161 | 8,410 | 7,960 | 6,911 |
| Other long-term obligations | 483 | | 483 | | |
| | | | | | |
| Total contractual cash obligations | \$ 86,105 | \$ 62,341 | \$ 8,893 | \$ 7,960 | \$6,911 |
| | | | | | |
| Other Commercial Commitments | | | | | |
| Standby letters of credit ⁽³⁾ | \$ 3,976 | \$ 1,000 | \$ 2,620 | \$ | \$ 356 |
| T-t-1i-1itut- | e 2.076 | ¢ 1,000 | ¢ 2.620 | Φ. | ¢ 256 |
| Total commercial commitments | \$ 3,976 | \$ 1,000 | \$ 2,620 | \$ | \$ 356 |

- (1) Subsequent to June 30, 2004, the Company retired all of its remaining principal balance of \$58.7 million of the 2008 Notes and \$56,000 of the 2005 Notes. Please see NOTE 15 to these financial statements.
- (2) The Company may vacate or sublease the San Rafael, California facility in 2004 in connection with the relocation of our headquarters to Reston, Virginia. The San Rafael minimum lease payments total approximately \$5.4 million for years 2004 through 2009, which is included in the schedule above. As a result, these amounts may become payable prior to the original contract term.
- (3) The 1-3 year amount of \$2.6 million represents collateral securing a performance bond. The amount of this collateral may be less in the future.

We believe that we will have sufficient liquidity and capital resources to fund our obligations through the next twelve months.

26

Business Risks

Our business and future performance may be affected by the following. You should carefully consider the following factors and other information set forth in this report, including our financial statements and the related debt. The risks set forth below are in addition to risks that apply to most businesses.

We Have Incurred Losses from Continuing Operations for the Past Five Years, Except 2001.

We incurred losses from continuing operations of \$23.9 million and \$20.9 million for the years ended December 31, 2003 and 2002, respectively. Although we had income from continuing operations of \$12.0 million in 2001, we incurred losses for continuing operations of \$39.4 million in 2000.

Our losses have impaired our ability to market our products and services in competition against companies that are more profitable. If we are unable to achieve or sustain profitability, it may impair our ability to compete effectively.

Our Ability to Borrow or Issue Additional Shares of Preferred Stock Is Restricted by the Terms of Our Series A Preferred Stock.

The certificate of designation governing our Series A Cumulative Mandatory Convertible Preferred Stock (the Series A Preferred Stock) provides that so long as at least 600,000 shares of Series A Preferred Stock are outstanding, at least 66-2/3% of the votes entitled to be cast by the holders of the Preferred Stock shall be required to approve the incurrence by QuadraMed of any long term, senior indebtedness of QuadraMed in an aggregate principal amount exceeding \$8,000,000, excluding certain prior existing indebtedness. Furthermore, the certificate of designation requires the affirmative vote of a majority of any outstanding shares the Series A Preferred Stock prior to the authorization or creation of, or increase in the authorized amount of, any shares of any class or series (or any security convertible into shares of any class or series) ranking senior to or on par with the Preferred Stock in the distribution of assets upon any liquidation, dissolution or winding up of QuadraMed or in the payment of dividends. This may hinder or delay our ability to borrow funds or issue Preferred Stock.

Our Auditing Firm Has Found a Material Weakness in Our System of Internal Controls, Policies, and Procedures, Which Could Adversely Affect Our Ability to Record, Process, Summarize and Report Certain Financial Data.

In April 2003, PricewaterhouseCoopers (PwC) informed our management and Audit Committee of its concerns regarding material weaknesses in our system of internal controls, policies and procedures, including the adequacy and reliability of certain financial information, and certain financial personnel. Specifically, PwC reported material weaknesses in:

the accounting for software revenue and related expense recognition,

the reporting of discontinued operations,

the accounting for our investment in certain non-consolidated subsidiaries,

the accounting for certain life insurance contracts and the Supplemental Executive Retirement Plan,

the accounting and reporting of non-recurring charges,

the accounting for stock-based compensation,

the accounting and reporting of capitalized software development costs,

the accounting for income taxes,

the documentation supporting the accounting for certain business combinations, and

timely analysis and reconciliation of general ledger accounts.

27

PwC further stated that these material weaknesses would require PwC to expand the scope of its uncompleted audit of fiscal year 2002, and that its findings to date may materially impact the fairness and reliability of our previously issued financial statements as previously filed with the SEC and the report of the prior independent public accountants on those financial statements.

We implemented certain new procedures and corrective actions that addressed the cited weaknesses. These corrective actions included:

We engaged Deloitte & Touche LLP (D&T) to perform a forensic analysis of the Company s accounting records and reported results for the years 2000 through 2002. D&T s forensic analysis also covered years 1999 and prior to the extent any items originating in earlier years impact 2000, 2001 or 2002;

We engaged a team of accounting consultants, most of whom are certified public accountants with technology industry experience, to lead the restatement effort of the financial statements for 1999, 2000 and 2001 and the first quarter of 2002. D&T transitioned detailed work and reconciliations to this group of professionals. These professionals filled in gaps in the financial organization where temporary vacancy occurred. They reviewed all material business transactions including revenue, contracts, acquisitions and dispositions of businesses, impairment of assets, accrued and actual expenses, stockholders equity transactions and accounting and financial reporting thereof for 1999, 2000 and 2001 and the first quarter of 2002;

We retained Charles Stahl, formerly an audit partner with Deloitte & Touche, LLP, as a full-time consultant and then hired him as Executive Vice President and Chief Financial Officer to lead the final phase of the restatement effort and the strengthening of our internal controls; and

Our Audit Committee engaged a financial expert to advise them and strengthen the Audit Committee s role in corporate governance.

The Company and our Chief Financial Officer have built a complete permanent finance department to replace the one that was based, in part, on consultants.

In February 2004, BDO Seidman, LLP (BDO) informed our management and Audit Committee of its concern regarding a material weakness in our system of internal controls, policies and procedures to track movements in deferred revenue on a roll forward basis. As a result, it was difficult for management to continually monitor movements in the account. Analytical review was done at the end of each period but not on an overall roll forward basis.

The Company has now implemented procedures to report movements in deferred revenue on an overall roll forward basis. We are also in the process of upgrading our computer software which is expected to be completed in the second half of 2004. The Company believes the costs associated with implementing these processes and computer software to be immaterial.

In its report, BDO also identified reportable conditions related to:

internal controls over analysis and review of customer contracts;

the revenue transactions cycle;

unbilled and deferred revenue balances; and

percentage of completion revenue recognition.

The Company is addressing these items by implementing the following procedures:

documenting the formal review of contracts in the determination of proper revenue accounting;

redesigning the contracting process and review procedures;

upgrading computer software relating to contracts and billing; and

strengthening documentation standards for revenue recognition for percentage completion revenue accounting.

28

All of these procedures, except for the computer software upgrade noted above, were implemented in the first half of 2004. Management believes that the Company s internal controls over financial reporting for the first half of 2004 are effective.

We Were Subject to a Formal SEC Inquiry as a Result of the Restatement of Our Financial Statements, and the SEC Has Issued a Cease and Desist Order to which We Have Consented.

Following our August 12, 2002 announcement that we intended to restate prior period financial statements, the staff of the San Francisco District Office of the SEC requested certain information concerning the anticipated restatement as part of an informal, preliminary inquiry.

As previously disclosed on February 28, 2003 and October 10, 2003, QuadraMed was subject to an investigation and proposed enforcement action by the staff of the Securities and Exchange Commission. The proposed action involved accounting for transactions that QuadraMed entered into with Health+Cast LLP in 1998 and 1999. The 1999 transactions were restated as part of QuadraMed s restatement of its 1999 financial statements. None of the individuals who were involved with the Health+Cast transactions are any currently associated with QuadraMed. On April 30, 2004, the matter was settled with a Cease and Desist Order issued by the SEC, to which QuadraMed consented without admitting or denying the findings in the Order. No fine was assessed against QuadraMed. The Order requires QuadraMed to cease and desist from violations of the antifraud, periodic reporting and books and records provisions of the Securities Exchange Act of 1934.

Our Common Stock Has Been Delisted from the Nasdaq Stock Market, which Could Result in Loss of Investors, Increased Obligations under State Securities Laws, Decreased Coverage by Securities Analysts and Impairment of Our Ability to Compete.

We received notice from the Nasdaq Stock Market requiring us to file Forms 10-Q for the quarters ended June 30 and September 30, 2002 as well as restated financial statements for the years ended December 31, 2001, 2000, and 1999 on or before February 28, 2003. Because we were unable to meet these requirements in a timely manner, on March 4, 2003 our Common Stock was delisted from the Nasdaq Stock Market. The delisting of our stock triggered a repurchase event under the terms of a May 1, 1998 indenture agreement for our 2005 Notes. This repurchase event required us to partially refinance our 2005 Notes. On April 17, 2003, we repurchased \$61.8 million of our outstanding 2005 Notes and issued \$71 million in 2008 Notes and warrants to purchase 11,303,842 shares of our Common Stock. We also issued warrants to purchase 282,596 shares of our Common Stock to Philadelphia Brokerage Corporation as consideration for their role in the issuance of the 2008 Notes.

Delisting from the Nasdaq National Market subjects us to numerous consequences that may adversely affect our business, including the loss of investors. We may no longer qualify for exemptions from state securities registration requirements. Without an exemption from registration, we may need to file time-consuming and costly registration statements for future securities transactions and issuances and to amend our stock option and stock option purchase plans. Delisting may make it unlikely we will have coverage by securities analysts. Furthermore, delisting may impair our ability to compete.

We Have a Limited Trading Market, which Could Affect Your Ability to Sell Shares of Our Common Stock and the Price You May Receive for Our Common Stock.

There is currently a limited trading market for our Common Stock on the Over-the-Counter Bulletin Board and the Pink Sheets . The ability to trade our Common Stock on the over-the-counter market depends on the presence and investment decisions of willing buyers and sellers. Therefore, the market of investors who are willing to purchase our Common Stock is limited, the volume of our Common Stock traded on a

daily basis is low, and the liquidity of our Common Stock is limited. All of these will affect your ability to sell and the price you may receive for our Common Stock. While we have applied for quotation of our Common Stock on the American Stock Exchange (AMEX) there can be no assurance that our Common Stock will be accepted for quotation by the AMEX or any other exchange.

The Trading Price of Our Common Stock Has Been, and Is Expected to Continue to Be, Volatile.

The Nasdaq National Market on which our Common Stock was listed, the Pink Sheets over-the-counter market and the Over-the-Counter Bulletin Board, where our stock currently trades, and stock markets in general, have historically experienced extreme price and volume fluctuations that have affected companies unrelated to their

29

| individual operating performance. | The trading price of our | Common Stock has be | een and is likely to | o continue to be volati | ile due to such factors |
|-----------------------------------|--------------------------|---------------------|----------------------|-------------------------|-------------------------|
| as: | | | | | |

Variations in quarterly results of operations

Announcements of new products or acquisitions by our competitors;

Government regulatory action;

Resolution of pending or unasserted litigation, including the existing stockholder lawsuits and SEC investigation;

Developments or disputes with respect to proprietary rights; and

General trends in our industry and overall market conditions.

Movements in prices of equity securities in general may also affect the market price of our common stock.

Our Quarterly Operating Results Are Subject to Fluctuations, Which Could Adversely Affect Our Financial Results and the Market Price of Our Common Stock.

Our quarterly operating results have varied significantly in the past and may fluctuate in the future as a result of a variety of factors, many of which are outside our control. Accordingly, quarter-to-quarter comparisons of our operating results may not be indicative of our future performance. Some of the factors causing these fluctuations include:

Variability in demand for products and services;

Introduction of product enhancements and new products by us and our competitors;

Timing and significance of announcements concerning present or prospective strategic alliances;

Discontinuation of, or reduction in, the products and services we offer;

Loss of customers due to consolidation in the healthcare industry;

Delays in product delivery requested by our customers;

Customer budget cycle fluctuation; Investment in marketing, sales, software development, and administrative personnel necessary to support anticipated operations; Costs incurred for marketing and sales promotional activities; Software defects and other product quality factors; General economic conditions and their impact on the healthcare industry; Cooperation from competitors on interfaces and implementation when a customer chooses a QuadraMed software application to use with various vendors; Delays in implementation due to product readiness, customer induced delays in training or installation, and third party interface development delays; Final negotiated sales prices of systems; Federal regulations (i.e., OIG, HIPAA, ICD-10) that can increase demand for new, updated systems; Federal regulations that directly affect reimbursements received, and therefore the amount of money available for purchasing information systems; and The fines and penalties a healthcare provider or system may incur due to fraudulent billing practices. In addition to the foregoing, a significant percentage of our total cost of revenue is attributable to the cost of third party software royalties and

licenses relating to third party software embedded within our software applications. The cost of third-party software royalties and licenses, as a percentage of total cost of revenue, was approximately 23% and 13% for the six months ended June 30, 2004 and 2003, respectively. Generally, royalty fees for third party licenses will fluctuate based on revenue or the number of our customers and therefore will fluctuate on a quarter to quarter basis.

Our operating expense levels, which increase with the addition of acquired businesses, are relatively fixed. Accordingly, if future revenues are below expectations, we would experience a disproportionate adverse affect on our net income and financial results. In the event of a revenue shortfall, we will likely be unable to, or may elect not to, reduce spending quickly enough to offset any such shortfall. As a result, it is possible that our future revenues or operating results may fall below the expectations of securities analysts and investors. In such a case, the price of our publicly traded securities may be adversely affected.

Future Sales of Our Common Stock in the Public Market, Warrants or Option Exercises and Sales Could Lower Our Stock Price.

A substantial number of shares of our Common Stock are subject to stock options and warrants, and are issuable upon conversion of our Preferred Stock may be converted into shares of Common Stock. We cannot predict the effect, if any, that future sales of shares of Common Stock, or the availability of shares of Common Stock for future sale, will have on the market price of our Common Stock. Sales of substantial amounts of Common Stock, including shares registered under the S-1 Registration Statement filed on January 21, 2004, or issued upon the exercise of stock options or the conversion of our Preferred Stock, or the perception that such sales could occur, may adversely affect prevailing market prices for our Common Stock.

Provisions in Our Certificate of Incorporation and Bylaws and Delaware Law Could Delay or Discourage a Takeover which Could Adversely Affect the Price of Our Common Stock.

Our Board of Directors has the authority to issue up to five million shares of Preferred Stock and to determine the price, rights, preferences, privileges, and restrictions, including voting rights, of those shares without any further vote or action by holders of our Common Stock. If Preferred Stock is issued, the voting and other rights of the holders of our Common Stock may be subject to, and may be adversely affected by, the rights of the holders of our Preferred Stock. The issuance of Preferred Stock may have the effect of delaying or preventing a change of control of QuadraMed that could have been at a premium price to our stockholders. Our Board of Directors has issued four million shares of such Preferred Stock as Series A Cumulative Mandatory Convertible Preferred Shares, and the holders of this Preferred Stock have certain voting and board appointment rights.

Certain provisions of our certificate of incorporation and bylaws could discourage potential takeover attempts and make attempts to change management by stockholders difficult. Our Board of Directors has the authority to impose various procedural and other requirements that could make it more difficult for our stockholders to effect certain corporate actions. In addition, our certificate of incorporation provides that directors may be removed only by the affirmative vote of the holders of two-thirds of the shares of our capital stock entitled to vote. Any vacancy on our Board of Directors may be filled only by a vote of the majority of directors then in office. Further, our certificate of incorporation provides that the affirmative vote of two-thirds of the shares entitled to vote, voting together as a single class, subject to certain exceptions, is required for certain business combination transactions. These provisions, and certain other provisions of our certificate of incorporation, could have the effect of delaying or preventing (i) a tender offer for our common stock or other changes of control of QuadraMed that could be at a premium price or (ii) changes in our management.

In addition, certain provisions of Delaware law could have the effect of delaying or preventing a change of control of QuadraMed. Section 203 of the Delaware General Corporation Law, for example, prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years from the date the person became an interested stockholder unless certain conditions are met.

We Do Not Expect to Pay Cash Dividends on Common Stock in the Foreseeable Future.

We have not declared or paid cash or other dividends on our Common Stock and do not expect to pay cash dividends for the foreseeable future. Our ability to pay dividends is also restricted by the terms of our Series A Preferred Shares which mandate the payment of cumulative dividends prior to any payment of dividends on our Common Stock. We currently intend to retain all future earnings for use in the operation of our business and to fund future growth. Any future cash dividends will depend upon our results of operations, financial conditions, cash requirements, the availability of a surplus and other factors.

We May Be Liable for Violating the Intellectual Property Rights of Third Parties, which Could Lead Us to Incur Substantial Litigation Expenses, and, If There Were an Adverse Judgment, Liability for Any Infringement.

We do not believe that the intellectual property important to the operation of our business, whether owned by us or licensed to us by a third party, infringes or violates the intellectual property rights of any other party. However, intellectual property litigation is increasingly common in the software industry. The risk of an infringement claim against us may increase over time as the number of competitors in our industry segment grows and the functionality of products overlaps. Third parties have, in the past, asserted infringement claims and could assert infringement claims against us in the future. Regardless of the merits, we could incur substantial litigation

expenses in defending any such asserted claim. In the event of an unfavorable ruling on any such claim, a license or similar agreement may not be available to us on reasonable terms, if at all. Infringement may also result in significant monetary liabilities that could have a material adverse effect on our business, financial condition, and results of operations. We may not be successful in the defense of these or similar claims. We have taken steps to contractually limit our liability for the use of intellectual property licensed to us by third parties. However, there can be no guarantee that we have adequate protection.

Our Inability to Protect Our Intellectual Property Could Lead to Unauthorized Use of Our Products, Which Could Have an Adverse Effect on Our Business.

We rely on a combination of trade secret, copyright and trademark laws, nondisclosure, non-compete, and other contractual provisions to protect our proprietary rights. In 2001, we filed our first patent application covering our developed technology, the Affinity CPOE software application. This application lapsed, and we have no patents. Measures taken by us to protect our intellectual property may not be adequate, and our competitors could independently develop products and services that are substantially equivalent or superior to our products and services. Any infringement or misappropriation of our proprietary software and databases could put us at a competitive disadvantage in a highly competitive market and could cause us to lose revenues, incur substantial litigation expense, and divert management s attention from other operations.

We are Dependent Upon Third Party Software Licenses in Connection with the Sale of Our Software. If These Licenses Are Not Renewed or Are Terminated, We May Not Be Able to Continue to Use the Related Technology on Commercially Reasonable Terms or at All.

We depend on licenses from a number of third party vendors for certain technology, including the computer hardware, operating systems, database management systems, programming language, and runtime environment, upon which we develop and operate our products. We are materially reliant upon licenses with the following third party vendors: InterSystems Corporation, Oracle, Microsoft, Quovadx, the American Medical Association (AMA), the American Hospital Association (AHA) and others. Most of these licenses expire within three to five years. Such licenses can be renewed only by mutual consent and may be terminated if we breach the license terms and fail to cure the breach within a specified time period. If such licenses are terminated, we may not be able to continue using the technology on commercially reasonable terms or at all. As a result, we may have to discontinue, delay or reduce product shipments until equivalent technology is obtained, which could have a material adverse effect on our business, financial condition, and results of operations. However, as all application software companies, including QuadraMed and our competitors, are reliant on licensed technology and third party components, we believe our reliance on such technology and licenses places us at no competitive disadvantage.

At present, there is no equivalent technology for the Intersystems Corporation technology which is an integral component of our Affinity product line. The Company has entered into several agreements with InterSystems Corporation regarding the licensed technology relating to our Affinity product line. However, if InterSystems Corporation ceased to offer this technology and no other vendor provided the technology, we would be required to migrate our Affinity products to a new database platform or redesign our products to work with new software tools. This could be very costly and difficult to achieve and could have a material adverse effect on our business, financial condition and results of operations. There can be no assurance that we would successfully migrate our Affinity products to a new platform. Most of our third-party licenses are non-exclusive and competitors may obtain the same or similar technology. In addition, if vendors choose to discontinue support of the licensed technology, we may not be able to modify or adapt our products.

We Face Product Development Risks Associated with Rapid Technological Changes.

The healthcare software market is highly fragmented and characterized by ongoing technological developments, evolving industry standards, and rapid changes in customer requirements. Our success depends on our ability to timely and effectively:

Offer a broad range of software products;

Enhance existing products and expand product offerings;

Respond promptly to new customer requirements and industry standards;

Remain compatible with popular operating systems and develop products that are compatible with the new or otherwise emerging operating systems; and

32

Table of Contents

Develop new interfaces with competing HIS vendors to fully integrate our Quantim product suite in order to maximize features and functionality of the new products.

Our performance depends in large part upon our ability to provide the increasing functionality required by our customers through the timely development and successful introduction of new products and enhancements to our existing suite of products. We may not successfully, or in a timely manner, develop, acquire, integrate, introduce, or market new products or product enhancements. Product enhancements or new products developed by us also may not meet the requirements of hospitals or other healthcare providers and payers or achieve or sustain market acceptance. Our failure to either estimate accurately the resources and related expenses required for a project, or to complete our contractual obligations in a manner consistent with the project plan upon which a contract was based, could have a material adverse effect on our business, financial condition, and results of operations. In addition, our failure to meet a customer—s expectations in the performance of our services could damage our reputation and adversely affect our ability to attract new business.

A Significant Amount of Our Assets Comprise Goodwill, Customer Lists and Other Intangible Items Subject to Impairment and Adjustment That Could Possibly Negatively Impact Our Results of Operations and Stockholders Equity.

A significant amount of our assets comprise intangible assets, such as the value of the installed customer base, core technology, capitalized software, goodwill, and other identifiable intangible assets acquired through our acquisitions, such as trademarks.

Pursuant to SFAS No. 142, we must test goodwill and other intangible assets for impairment at least annually and adjust them when impaired to the appropriate net realizable value. We performed an impairment test on the carrying value of our goodwill and intangibles as of January 1, 2004 and 2003. We determined that there was no impairment as of these dates. In addition, our internally developed software has been capitalized assuming our earnings from these product developments exceeds the costs incurred to develop them. If it is determined that these assets have been impaired and our future operating results will not support the existing carrying value of our intangible assets, we will be required to adjust the carrying value of such assets to net realizable value.

We, however, cannot predict that all of our intangible assets will continue to remain unimpaired. Our future operating results and stockholders equity could possibly decrease with any future impairment and write-down of goodwill, customer lists, or other such intangibles.

The Nature of Our Products Makes Us Particularly Vulnerable to Undetected Errors or Bugs that Could Reduce Revenues, Market Share or Demand for Our Products and Services.

Products such as those we offer may contain errors or failures, especially when initially introduced or when new versions are released. Although we conduct extensive testing on our products, software errors have been discovered in certain enhancements and products after their introduction. Despite such testing by us and by our current and potential customers, products under development, enhancements, or shipped products may contain errors or performance failures, resulting in, among other things:

Loss of customers and revenue;

Delay in market acceptance;

| Damage to ou | r reputation; or | | | | | |
|----------------|------------------|-----------|--|--|--|--|
| | | | | | | |
| Increased serv | vice and warrant | ty costs. | | | | |
| | | | | | | |

Any of these consequences could have a material adverse effect on our business, financial condition, and results of operations.

If Our Products Fail to Accurately Assess, Process, or Collect Healthcare Claims or Administer Managed Care Contracts, We Could Be Subject to Costly Litigation and Be Forced to Make Costly Changes to Our Products.

Some of our products and services are used in the payment, collection, coding, and billing of healthcare claims and the administration of managed care contracts. If our employees or products fail to accurately assess, process, or collect these claims, customers could file claims against us. Our insurance coverage may not be

33

adequate to cover such claims. A successful claim that is in excess of, or is not covered by, insurance coverage could adversely affect our business, financial condition, and results of operations. Even a claim without merit could result in significant legal defense costs and could consume management time and resources. In addition, claims could increase our premiums such that appropriate insurance could not be found at commercially reasonable rates. Furthermore, if we were found liable, we may have to significantly alter one or more of our products, possibly resulting in additional unanticipated software development expenses.

Changes in Procurement Practices of Hospitals Have and May Continue to Have a Negative Impact on Our Revenues.

A substantial portion of our revenues has been and is expected to continue to be derived from sales of software products and services to hospitals. Consolidation in the healthcare industry, particularly in the hospital and managed care markets, could decrease the number of existing or potential purchasers of products and services and could adversely affect our business. In addition, the decision to purchase our products often involves a committee approval. Consequently, it is difficult for us to predict the timing or outcome of the buying decisions of our customers or potential customers. In addition, many healthcare providers are consolidating to create integrated delivery networks with greater regional market power. These emerging systems could have greater bargaining power, which may lead to decreases in prices for our products, which could adversely affect our business, financial condition, and results of operations.

Changes in the Healthcare Financing and Reimbursement System Could Adversely Affect the Amount of and Manner in which Our Customers Purchase Our Products And Services.

Changes in current healthcare financing and reimbursement systems could result in unplanned product enhancements, delays, or cancellations of product orders or shipments, or reduce the need for certain systems. We could also have the endorsement of products by hospital associations or other customers revoked. Any of these occurrences could have a material adverse effect on our business. Alternatively, the federal government recently mandated that all but small health care providers submit claims to Medicare in electronic format, which may positively affect our systems and product.

The healthcare industry in the United States is subject to changing political, economic, and regulatory influences that may affect the procurement practices and operations of healthcare organizations. The traditional hospital delivery system is evolving as more hospital services are being provided by niche, free standing practices and outpatient providers. The commercial value and appeal of our products may be adversely affected if the current healthcare financing and reimbursement system were to change. During the past several years, the healthcare industry has been subject to increasing levels of governmental regulation. Proposals to reform the healthcare system have been and are being considered by the United States Congress. These proposals, if enacted, could adversely affect the commercial value and appeal of our products or change the operating environment of our customers in ways that cannot be predicted. Healthcare organizations may react to these proposals by curtailing or deferring investments, including those for our products and services. In addition, the regulations promulgated under HIPAA could lead healthcare organizations to curtail or defer investments in non-HIPAA related features in the next several years.

The Variability and Length of Our Sales Cycle for Our Products May Exacerbate the Unpredictability and Volatility of Our Operating Results.

We cannot accurately forecast the timing of customer purchases due to the complex procurement decision processes of most healthcare providers and payers. How and when to implement, replace, expand or substantially modify an information system are major decisions for hospitals, and such decisions require significant capital expenditures by them. As a result, we typically experience sales cycles that extend over several quarters. In particular, our Affinity enterprise software has a higher average selling price and longer sales cycle than many of our other

products. As a result, we have only a limited ability to forecast the timing and size of specific sales, making the prediction of quarterly financial performance more difficult.

We Operate in a Highly Competitive Market.

Competition for our products and services is intense and is expected to increase. Increased competition could result in reductions in our prices, gross margins, and market share and have a material adverse effect on our business, financial condition, and results of operations. We compete with other providers of healthcare information

34

software and services, as well as healthcare consulting firms. Some competitors have formed business alliances with other competitors that may affect our ability to work with some potential customers. In addition, if some of our competitors merge, a stronger competitor may emerge. Some principal competitors include:

In the market for enterprise healthcare information systems: McKesson Corporation, Inc., Shared Medical Systems, Inc., a division of Siemens, MediTech Corporation, Eclipsys Corporation, Cerner, and IDX Corporation;

In the market for electronic document management products: McKesson Corporation, SoftMed Corporation Inc., FileNet, Lanvision, MedPlus, and Eclipsys Corporation;

In the market for MPI products and services: Madison Technologies, Inc., McKesson Corporation, Shared Medical Systems, Inc., a division of Siemens, and Medibase;

In the market for decision support products: Eclipsys Corporation, Healthcare Microsystems, Inc., a division of Health Management Systems Inc., McKesson Corporation, Shared Medical Systems, Inc., a division of Siemens, and MediQual Systems, Inc., a division of Cardinal Health, Inc.;

In the market for coding, compliance, data, and record management products in the Health Information Management Software Division: 3M Corporation, SoftMed Corporation, Inc., MetaHealth, Eclipsys Corporation and HSS, Inc.; and

In the market for financial services: Advanced Receivables Strategy, Inc., a division of Perot Systems Corporation, NCO Group, Inc., Outsourcing Solutions, Inc., Health Management Systems, Inc., and Triage Consulting Group.

Current and prospective customers also evaluate our products capabilities against the merits of their existing information systems and expertise. Major software information systems companies, including those specializing in the healthcare industry, that do not presently offer competing products may enter our markets. Many of our competitors and potential competitors have significantly greater financial, technical, product development, marketing and other resources, and market recognition than we have. Many of these competitors also have, or may develop or acquire, substantial installed customer bases in the healthcare industry. As a result of these factors, our competitors may be able to respond more quickly to new or emerging technologies, changes in customer requirements, and changes in the political, economic or regulatory environment in the healthcare industry.

These competitors may be in a position to devote greater resources to the development, promotion, and sale of their products than we can. We may not be able to compete successfully against current and future competitors, and such competitive pressures could materially adversely affect our business, financial condition, and operating results.

We Have Encountered Significant Challenges Integrating Acquired Businesses, and Future Transactions May Adversely Affect Our Business, Operations, and Financial Condition.

From 1993 to 1999, we completed 28 acquisitions, and we encountered significant challenges integrating the acquired businesses into our operations. From 2000 through 2003, we made significant progress toward that integration. However, we continue to support several different technology platforms. In February 2004, we acquired Détente Systems Pty Limited, an Australian proprietary limited company, and Détente Systems Trust, an Australian business trust, and in June 2004, we acquired Tempus Software, Inc., a Florida corporation. In the future, we plan

to make investments in or acquire additional complementary businesses, products, services or technologies. These investments and acquisitions will create new integration challenges. Some of the challenges we have encountered, and may encounter with acquisitions in the future, in integrating acquired businesses have included:

| Interruption, disruption or delay of our ongoing business; |
|---|
| Distraction of management s attention from other matters; |
| Additional operational and administrative expenses; |
| Difficulty managing geographically dispersed operations; |
| Failure of acquired businesses to achieve expected results, resulting in our failure to realize anticipated benefits; |
| Write-down or reclassification of acquired assets; |
| Failure to retain key acquired personnel and difficulty and expense of training those retained; |
| Increases in stock compensation expense and increased compensation expense resulting from newly hired employees; |
| Assumption of liabilities and potential for disputes with the sellers of acquired businesses; |
| 35 |

Customer dissatisfaction or performance problems related to acquired businesses;

Failure to maintain good relations with customers or suppliers;

Exposure to the risks of entering markets in which we have no direct prior experience and to risks associated with market acceptance of acquired products and technologies; and

Platform and technical issues related to integrating systems from various acquired companies.

All of these factors have had an adverse effect on our business, financial condition, and results of operations in the past, and could have an adverse effect in the future.

No Mirror Processing Site for Our Customer Data Processing Facilities Exists; Our Business, Financial Condition, and Results of Operations Could Be Adversely Affected if These Facilities Were Subject to a Closure from a Catastrophic Event or Otherwise.

We currently process substantially all of our customer data at several of our facilities across the United States. Although we back up our data nightly and have safeguards for emergencies, such as power interruption or breakdown in temperature controls, we have no mirror processing site to which processing could be transferred in the case of a catastrophic event at any of these facilities. If a major catastrophic event occurs at these facilities possibly leading to an interruption of data processing, or any other interruption or closure, our business, financial condition, and results of operations could be adversely affected.

We May Be Required to Make Substantial Changes to Our Products If They Become Subject to FDA Regulation, Which Could Require a Significant Capital Investment.

Computer products used or intended for use in the diagnosis, cure, mitigation, treatment, or prevention of diseases or other conditions or that affect the structure or function of the body are subject to regulation by the FDA under the Federal Food, Drug and Cosmetic Act. At present, none of our software products are so regulated. In the future, the FDA could determine that some of our products, because of their predictive aspects, are clinical decision tools and subject them to regulation. Compliance with FDA regulations could be burdensome, time consuming, and expensive. Other new laws and regulations affecting healthcare software development and marketing also could be enacted in the future. If so, it is possible that our costs and the length of time for product development and marketing could increase and that other unforeseeable consequences could arise.

Governmental Regulation of the Confidentiality of Patient Health Information Could Result in Our Customers Being Unable to Use Our Products Without Significant Modification, Which Could Require Us to Expend Substantial Amounts.

There is substantial state and federal regulation of the confidentiality of patient health information and the circumstances under which such information may be used by, disclosed to or processed by us as a consequence of our contacts with various health care providers. Although compliance with these laws and regulations is presently the principal responsibility of the hospital, physician, or other healthcare provider, regulations governing patient confidentiality rights are dynamic and rapidly evolving. Changes may be made which require us to change our systems and our methods which could require significant expenditure of capital and decrease future business prospects. Additional federal and

state legislation governing the dissemination of individually identifiable information have been proposed and may be adopted, which may also significantly affect our business.

The Health Insurance Portability and Accountability Act of 1996 (HIPAA) is a federal law that affects the use, disclosure, transmission and storage of individually identifiable health information. As directed by HIPAA, the United States Department of Health and Human Services (HHS) must promulgate standards and implementation guidelines for certain electronic health transactions, code sets, data security, unique identification numbers, and privacy of individually identifiable health information. HHS has issued some of these regulations in final form while others remain in development. Moreover, HHS could, at any time in the future, modify any existing final regulations in a manner that could require us to change our systems or operations.

First, HHS published a final regulation governing transaction and code set standards that had an initial compliance date of October 16, 2002. If a covered entity (health care providers that transmit certain covered transactions in electronic form, health plans and health care clearinghouses) or its agent filed a timely extension, the covered entity would have received an additional year to comply with the HIPAA transaction and code sets requirements, until October 16, 2003. As a consequence, all covered entities must now comply with this regulation.

36

Table of Contents

As noted above, HHS may make further revisions to the transactions and code sets standards which could require us to change our products and systems to enable our covered entity customers to meet such obligations.

Second, HHS has published a final HIPAA privacy regulation which had a compliance date of April 14, 2003. The HIPAA privacy regulation is complex and far reaching. Similar to the HIPAA transaction and code sets regulation, the HIPAA privacy regulation applies to covered entities. Covered entities are, in most instances, required to execute a contract with any business associate that performs certain services on the covered entity s behalf involving protected health information. Under the regulations, QuadraMed s Financial Services and Electronic Data Interchange businesses are considered covered entities and are therefore governed by HIPAA regulations. QuadraMed s hospital customers are covered entities, and to the extent that QuadraMed customers use the software to manipulate protected health information and submit electronic transactions, QuadraMed is required by its customer contracts to ensure that the software complies with all relevant regulations. The HIPAA privacy regulation and state healthcare privacy regulations could materially restrict the ability of healthcare providers to disclose protected health information from patient records using our products and services or could require us to make additional capital expenditures to be in compliance. Accordingly, the HIPAA privacy regulation and state privacy laws may significantly impact our product s use in the health care delivery system and therefore, decrease our revenue, increase working capital requirements and decrease future business prospects.

Third, HHS has published the final HIPAA security regulation with a compliance date of April 21, 2005. The HIPAA security regulation applies to the use, disclosure, transmission, storage and destruction of electronic protected health information by covered entities. Covered entities must implement stringent security measures to ensure the confidentiality of the electronic protected health information, and to protect against the unauthorized use of the electronic protected health information. Implementing such measures will require us to expend substantial capital due to required product, service, and procedure changes.

QuadraMed has completed modifications to its business practices and software offerings and is currently in full compliance with HIPAA regulations. However, HHS continues to publish change notices to existing rules and propose new rules. There is no certainty that QuadraMed will be able to respond to all such rules in a timely manner and our inability to do so could adversely affect our business.

Government Regulation to Adopt and Implement ICD-10-CM and ICD-10-PCS Medical Code Set Standards Could Require Substantial Modification of Our Coding and Compliance Software.

The American Health Information Management Association (AHIMA) and other prominent healthcare industry advocacy groups are calling on the Department of Health and Human Services (HHS) and the healthcare industry to take action to adopt and implement ICD-10-CM and ICD-10-PCS code sets, rules, and guidelines as a replacement for current ICD-9-CM guidelines used in our software products. Adoption of these new code sets would require us to change our systems and our methods which could require a significant expenditure of software development capital and decrease future business prospects for our current product line.

37

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk

Our exposure to market risk for changes in interest rates primarily relates to our investment portfolio. It is our intent to ensure the safety and preservation of our invested principal funds by limiting default risk, market risk, and re-investment risk. We invest in high-quality issuances, including money market funds and corporate and United States government debt securities. We have a policy of investing in securities with maturities of two years or less. We do not invest in derivatives or foreign investments.

The table below presents fair values of principal amounts and weighted average interest rates for our investment portfolio as of June 30, 2004 (in thousands, except average interest rates):
