Commission file number 0-23791

SONOSITE, INC.

(Exact name of registrant as specified in its charter)

Edgar Filing: SONOSITE INC - Form 10-Q

Washington (State or Other Jurisdiction of Incorporation or Organization)	91-1405022 (I.R.S. Employer Identification Number)
21919 30th Drive SE, Bothell, WA (Address of Principal Executive Offices)	98021-3904 (Zip Code)
(425) 951-1200 (Registrant's Telephone Number, Including Area Code)	

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer a non-accelerated filer or smaller reporting company. See definitions of a large accelerated filer, an accelerated filer a non-accelerated filer or smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Common Stock, \$0.01 par value (Class)	13,481,976 (Outstanding as of October 31, 2010)

Notes to Condensed Consolidated Financial Statements

(unaudited)

Interim Financial Information

1. Summary of significant accounting policies

Basis of Presentation

The information contained herein has been prepared in accordance with instructions for Form 10-Q and Article 10 of Regulation S-X. The information reflects, in the opinion of SonoSite, Inc. management, all adjustments necessary (which are of a normal and recurring nature) for a fair presentation of the results for the interim periods presented. The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of expected results for the entire year ending December 31, 2010 or for any other fiscal period. These condensed consolidated financial statements do not include all disclosures required by generally accepted accounting principles. For a presentation including all disclosures required by generally accepted accounting principles, these condensed consolidated financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2009, included in our Annual Report on Form 10-K.

Revenue

Effective January 1, 2010, we adopted new revenue recognition accounting guidance, which removes tangible products from the scope of the software revenue guidance if the products contain both software and non software components that function together to deliver a product's essential functionality. It also provides guidance on determining whether software deliverables in an arrangement that includes a tangible product are within the scope of the software revenue guidance. Concurrently, we adopted guidance that provides principles and application direction on whether multiple deliverables exist, how the arrangement should be separated, and the consideration allocated. It also requires an entity to allocate revenue in an arrangement using estimated selling prices of deliverables if a vendor does not have vendor-specific objective evidence (VSOE) or third-party evidence (TPE) of selling price. The guidance eliminates the use of the residual method, requires entities to allocate revenue using the relative-selling-price method and expands the disclosure requirements for multiple-deliverable revenue arrangements.

Under our current business practices, the new guidance will have an immaterial impact on our revenue accounting prospectively. Adoption of the new guidance does not require retroactive adjustment if adopted in the first quarter of a fiscal year. Revenue, income before income taxes, and net income in the prior year would not be impacted materially if the new guidance was applied; thus, our prior year consolidated financial statements are comparable to the current year.

Revenue from the sale of products that contain both software and non-software components that function together to deliver a product's essential functionality is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is reasonably assured. Generally, we recognize revenue on products and accessories when goods are shipped under an agreement with a customer, risk of loss and title have passed to the customer, sales returns are estimable and collection of any resulting receivable is considered reasonably assured. For extended warranty service contracts, revenue is recognized as services are provided or over the term of the contract. Revenue is recorded net of any discounts, trade-in allowances, and estimated returns. We estimate returns by reviewing our historical returns, considering customer reaction to new product introductions and current economic conditions. We recognize licensing revenue using the proportional performance method, a ratable recognition approach over the life of the license.

Our sales arrangements may contain multiple elements, which include hardware, software and services, including training. In multiple-element arrangements, consideration is required to be measured and allocated among separate units of accounting. Our units of accounting include systems with software required for the essential functionality of the system, transducers, extended service contracts, software not essential to the functionality of our products, and training.

Consideration is allocated among the separate units of accounting based on their relative selling prices. The relative selling price is determined using VSOE of the selling price if it exists; otherwise, TPE of selling price, defined as the standalone sale price of a vendor's or competitor's

Edgar Filing: SONOSITE INC - Form 10-Q

products, would be used. If neither VSOE nor TPE exists, the best estimate of selling price for that deliverable is used.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****1. Summary of significant accounting policies (Continued)*****Investment***

Our investment is accounted for using the cost method as we own less than twenty percent of the voting equity and do not exercise significant influence over operating and financial policies of the entity. The company we invested in is not publicly traded and, therefore, no established market exists for their securities. The fair value of a cost method investment is not estimated if there are no identified events or changes in circumstance that may have a significant adverse affect on the fair value of the investment. If we believe that the carrying value of the cost basis investment is in excess of estimated fair value, our policy is to record an impairment charge to adjust the carrying value to estimated fair value, if the impairment is deemed other-than-temporary.

Inventories

Inventories are stated at the lower of cost or market, on a first-in, first-out method. Included in our inventories balance are demonstration products used by our sales representatives and marketing department. Adjustments to reduce carrying costs are recorded for obsolete material, shrinkage, earlier generation products and used or refurbished products held either as saleable inventory or as demonstration product. If market conditions change or if the introduction of new products by us impacts the market for our previously released products, we may be required to further write down the carrying cost of our inventories.

Inventories consisted of the following (in thousands):

	September 30, 2010	As of December 31, 2009
Raw material	\$ 14,630	\$ 9,224
Demonstration inventory	13,612	12,270
Finished goods	10,264	10,722
Total	\$ 38,506	\$ 32,216

Warranty expense

We accrue estimated warranty expense at the time of sale for costs expected to be incurred under our product warranties. This provision for warranty expense is made based upon our historical product failure rates and service repair costs using management's judgment. Our warranty period is five years for the NanoMaxx[®], M-Turbo[®], S Series[®], MicroMaxx[®], and BioZ[®] systems. Our warranty period for our other products and remanufactured systems is one year.

The warranty liability is summarized as follows (in thousands):

Beginning of Period	Charged To Cost of	Liability from	Applied to Liability	End of Period
------------------------	-----------------------	-------------------	-------------------------	------------------

Edgar Filing: SONOSITE INC - Form 10-Q

		Revenue	Acquisition			
Three months ended September 30, 2010	\$ 9,430	\$ 1,441	\$	\$ (987)	\$ 9,884	
Three months ended September 30, 2009	\$ 7,900	\$ 1,208	\$ 301	\$ (708)	\$ 8,701	
Nine months ended September 30, 2010	\$ 8,400	\$ 4,009	\$ 129	\$ (2,654)	\$ 9,884	
Nine months ended September 30, 2009	\$ 7,094	\$ 3,245	\$ 301	\$ (1,939)	\$ 8,701	

Income taxes

The income tax provision for the three and nine months ended September 30, 2010 is based on projections of total year pre-tax income and the projected total year tax provision. Deferred income taxes are provided based on the estimated future tax effects of temporary differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates that are expected to apply to taxable income in the years in which those temporary differences and carryforwards are expected to be recovered or settled.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****1. Summary of significant accounting policies (Continued)***Net income (loss) per share*

Basic net income (loss) per share is based on the weighted average number of common shares outstanding during the period excluding shares repurchased by us but not yet settled as of the end of the period. Diluted net income (loss) per share is based on the weighted average number of common and dilutive common equivalent shares outstanding during the period. Potentially dilutive common equivalent shares consist of common stock issuable upon exercise of stock options and warrants, or upon vesting of restricted stock units using the treasury stock method. Diluted net income (loss) per share would also be impacted to reflect shares issuable upon conversion of our convertible senior notes if our share price exceeds \$38.20 per share. Our call option on our shares is anti-dilutive and, therefore, excluded from the calculation of diluted net income (loss) per share.

The following is a reconciliation of the numerator and denominator of the basic and diluted net income (loss) per share calculations (in thousands, except per share amounts):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net income (loss)	\$ 942	\$ (240)	\$ 4,200	\$ 1,048
Basic weighted average common shares outstanding	13,676	17,308	14,844	17,203
Effect of dilutive stock options and restricted stock units	471		503	447
Diluted weighted average common shares outstanding	14,147	17,308	15,347	17,650
Net income (loss) per share:				
Basic	\$ 0.07	\$ (0.01)	\$ 0.28	\$ 0.06
Diluted	\$ 0.07	\$ (0.01)	\$ 0.27	\$ 0.06

The following common equivalent shares were excluded from the computation of diluted net income (loss) per share as their effect would have been anti-dilutive (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Stock options and unvested restricted stock units	743	1,300	741	1,379
Warrants outstanding	1,122	1,184	1,122	1,184
Total common shares excluded from diluted net income (loss) per share	1,865	2,484	1,863	2,563

Edgar Filing: SONOSITE INC - Form 10-Q

The computation of diluted net income (loss) per share does not include any potential dilutive common shares associated with our convertible senior notes. The convertible senior notes would become dilutive and included in the calculation of diluted net income (loss) per share, for the number of shares that would be required to satisfy the conversion spread, if the average market price of our common stock exceeds \$38.20 per share.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****1. Summary of significant accounting policies (Continued)***Other comprehensive income*

Unrealized gains or losses on our available-for-sale securities that are considered temporary and foreign currency translation adjustments are included in accumulated other comprehensive income.

The following presents the components of comprehensive income (loss) (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Net income (loss)	\$ 942	\$ (240)	\$ 4,200	\$ 1,048
Other comprehensive (loss) income:				
Foreign currency translation adjustment	364	(1,592)	(161)	(2,874)
Unrealized gains (losses) arising during the period	4	(94)	(13)	(197)
Comprehensive (loss) income	\$ 1,310	\$ (1,926)	\$ 4,026	\$ (2,023)

Indemnification obligations and guarantees (excluding product warranty)

We provide (i) indemnifications of varying scope and size to our customers and distributors against claims of intellectual property infringement made by third parties arising from the use of our products; (ii) indemnifications of varying scope and size to our customers arising as a result of defects in the design or manufacture of our products or as the result of willful misconduct of our employees; (iii) indemnifications of varying scope and size to consultants against third party claims arising from the services they provide to us; and (iv) guarantees to support obligations of some of our subsidiaries such as lease payments. Prior to the acquisition, CardioDynamics International Corporation (CDIC) had provided a reimbursement guarantee to certain customers that Medicare reimbursement would not be rescinded. These guarantees expire over the next five years.

To date, we have not incurred material costs as a result of these obligations and do not expect to incur material costs in the future. Accordingly, we have not accrued any liabilities in our financial statements related to these indemnifications or guarantees.

2. Cash, cash equivalents and investment securities

The following table summarizes our cash, cash equivalents and investment securities at fair value (in thousands):

	September 30, 2010	December 31, 2009
Cash	\$ 11,153	\$ 7,858
Cash equivalents:		
Corporate debt securities		13,999

Edgar Filing: SONOSITE INC - Form 10-Q

Money market accounts	60,596	161,208
Total cash and cash equivalents	\$ 71,749	\$ 183,065
Short-term investment securities corporate bonds	\$	\$ 74,682

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****2. Cash, cash equivalents and investment securities (Continued)**

Cash and cash equivalents primarily consist of money market accounts with major U.S. banks and highly liquid debt instruments with maturities at purchase of three months or less. Investment securities primarily consist of high-grade corporate debt. We have the ability to hold our securities until maturity; however, we classify all securities as available-for-sale, as the sale of such securities may be required prior to maturity to implement management strategies. Realized gains and losses from the sale of available-for sale securities are determined on a specific identification basis. All investment securities are traded in active markets (Level 1) and matured by the end of the third quarter of 2010.

The amortized cost, gross unrealized holding gains and losses and fair value of investment securities classified as available-for-sale securities were as follows (in thousands):

	Amortized cost	Gross unrealized holding gains	Gross unrealized holding losses	Fair value
As of September 30, 2010:				
Cash equivalents:				
Money market accounts	\$ 60,596	\$	\$	\$ 60,596
Total cash equivalents	\$ 60,596	\$	\$	\$ 60,596
As of December 31, 2009:				
Cash equivalents:				
Corporate debt securities	\$ 13,996	\$ 3	\$	\$ 13,999
Money market accounts	\$ 161,208	\$	\$	161,208
Total cash equivalents	\$ 175,204	\$ 3	\$	\$ 175,207
Short-term investments:				
Corporate bonds	\$ 74,668	\$ 18	\$ (4)	\$ 74,682

The following table summarizes our realized gains and losses on sales and redemptions of investments (in thousands):

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2009	
Gains	\$	\$ 117	\$	\$ 130
Losses	(1)		(1)	
Realized gain, net	\$ (1)	\$ 117	\$ (1)	\$ 130

3. Investment

During 2010, we invested \$8.0 million in Carticept Medical Inc. (Carticept), a privately held company that develops innovative products for the treatment of musculoskeletal injuries. Concurrently, we entered a joint distribution arrangement with Carticept. This investment is accounted for as a cost basis investment as we own less than 20% of the voting equity and do not have the ability to exercise significant influence. In October 2010 our chief executive officer was elected to Carticept board of directors. We will regularly evaluate the carrying value of this cost-method investment for impairment and whether any events or circumstances are identified that would significantly impair the fair value of the investment. No event has occurred that would adversely affect the carrying value of this investment.

We are a principal owner and distributor of Carticept. During 2010, we have recognized revenue of \$0.1 million for the three months ended September 30, 2010 and \$0.8 million year to date from Carticept. Accounts receivable from Carticept was not material as of September 31, 2010.

As part of our distribution agreement with Carticept, in 2012 we are required to procure a minimum number of Carticept products that will be determined based on distribution activity in 2011.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****4. Stock repurchase**

During the three months ended September 30, 2010, we repurchased 915,986 shares of our common stock in the open market for an aggregate price of \$25.9 million at an average price of \$28.27. These repurchases were made using existing cash resources.

During the nine months ended September 30, 2010 the following additional share repurchases were made;

In June 2010, we repurchased 364,638 shares of our common stock in the open market for an aggregate price of \$10.2 million, including shares repurchased but not yet settled at an average price of \$27.75 per share. These repurchases were made using existing cash resources.

In March 2010, we repurchased 2,960,350 shares of our common stock at \$30 per share for an aggregate price of \$88.8 million. In connection with this stock repurchase, we incurred transaction costs of \$1.2 million. This repurchase was made using existing cash resources. During the three months ended March 31, 2010, we also reclassified treasury stock of \$0.1 million to retained earnings.

The following table summarizes the impact to equity related to the stock repurchases (in thousands):

	Nine months ended September 30, 2010
Shareholders' equity:	
Common stock, \$0.01 par value	\$ (42)
Accumulated deficit	(126,061)
 Total impact to shareholders' equity	 \$ (126,103)

We have authorization from our board of directors to repurchase up to \$150.0 million of our common stock or convertible debt. The repurchase program may be suspended or discontinued at any time without notice. As of September 30, 2010 the remaining amount that has been authorized to repurchase our common stock or convertible debt is \$23.9 million.

5. Acquisitions

On June 30, 2010, we acquired all of the outstanding stock of VisualSonics, Inc. (VisualSonics), a leader in the development, manufacturing, and marketing of ultra high-resolution, ultrasound-based imaging technology (micro-ultrasound) designed to enable discovery research, medical diagnosis and imaging small physiological structures in humans and animals. VisualSonics' micro-ultrasound product platform currently serves the pre-clinical research market. We intend to integrate VisualSonics' micro-ultrasound technology with our miniaturization competency and user design to deliver ultra high-frequency micro-ultrasound into clinical medicine.

Cash consideration of \$64.5 million was transferred for the shares of VisualSonics. Operating expenses include acquisition related charges of \$2.5 million for the three and six months ended June 30, 2010.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)**

The following table summarizes the acquisition-date fair value of the assets acquired and the liabilities assumed in connection with the business combination (in thousands):

	June 30, 2010
Assets	
Current assets:	
Cash and cash equivalents	\$ 3,322
Accounts receivable	4,538
Inventories	5,002
Deferred income taxes	135
Prepaid expenses and other current assets	1,320
Total current assets	14,317
Property and equipment, net	1,312
Identifiable intangible assets	32,910
Goodwill	32,489
Total assets	\$ 81,028
Liabilities	
Current liabilities:	
Accounts payable	\$ 2,178
Accrued expenses and other current liabilities	3,277
Deferred revenue	410
Total current liabilities	5,865
Long-term debt	8,828
Deferred tax liabilities	1,424
Other non-current liabilities	371
Total liabilities	16,488
Net assets acquired	\$ 64,540

These assets and liabilities were recorded at the acquisition-date fair value. We used an income approach, which is a measurement of the present value of the net economic benefit or cost expected to be derived from an asset or liability, to measure the acquired assets and liabilities excluding inventory, and property and equipment. Inventory was measured using a cost approach. Property and equipment were valued using a combination of the market and cost approaches.

Intangibles assets acquired consisted of the following (in thousands):

Edgar Filing: SONOSITE INC - Form 10-Q

	Amount	Amortization Period (in years)
Trademarks	\$ 3,060	25
Developed technology	22,620	3 to 10
Customer relationships	7,230	5 to 7
 Total intangibles	 \$ 32,910	

The total fair value of trade receivables acquired amounted to \$4.5 million which equated the amount due on these receivables.

We recognized a warranty liability of \$0.1 million related to VisualSonics products. We expect to incur the majority of these costs by the end of 2011. The potential undiscounted amount of all future payments that we could be required to make under the warranty arrangements is estimated to be \$0.1 million.

We assumed long-term debt with an acquisition date fair value of \$8.8 million which we repaid on June 30, 2010. As a result of our decision to repay the debt prior to its maturity we paid \$0.1 million prepayment penalty which has been recorded as interest expense during the quarter ended June 30, 2010.

We have not been able to complete the analysis of potential exposure to Federal, State, Local and International taxes. We are still gathering the information needed to determine whether a liability as of the acquisition date requires a preliminary amount as part of the acquisition accounting. During the measurement period the preliminary amount will be updated based upon new information received related to the facts and circumstances that existed at the acquisition date.

The results of VisualSonics operations are included in our condensed consolidated financial statements since the date of acquisition on June 30, 2010.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)**

In August 2009, we acquired all of the outstanding stock of CDIC, a leader in impedance cardiography (ICG) for noninvasive hemodynamic assessment that develops, manufactures, and markets ICG devices and sensors. The ICG product line provides non-invasive assessment of cardiac output and other hemodynamic parameters. The business combination enables us to expand our distribution platform and product offerings into primary care. The results of CDIC 's operations have been included in our consolidated financial statements since the date of acquisition.

For comparability purposes, the following table presents our pro forma revenue and earnings (loss) for the three and nine months period ended September 30, 2009 and 2010, had the CDIC and VisualSonics acquisitions date been January 1, 2009 (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Revenue	\$ 68,538	\$ 62,719	\$ 201,712	\$ 189,188
Net income (loss)	\$ 942	\$ (2,421)	\$ 1,612	\$ (4,754)
Net income (loss) per diluted share	\$ 0.07	\$ (0.15)	\$ 0.09	\$ (0.25)

Because VisualSonics fiscal year end is September, three months prior to our year-end, revenue and earnings in the pro forma disclosures have been adjusted to reflect our fiscal year. Additionally, VisualSonics earnings were adjusted to reflect the statutory tax rate utilized by VisualSonics in the pro forma periods presented. Pro forma earnings (loss) exclude non-recurring charges including acquisition costs, and expenses-related to long-term debt and liability classified equity instruments, but includes amortization of intangible assets and share based compensation resulting from this acquisition.

Because CDIC 's fiscal year ended in November, one month prior to our year-end, revenue and earnings (loss) in the pro forma disclosures have been adjusted to reflect our fiscal year. Additionally, CDIC earnings were adjusted to reflect the statutory tax rate utilized by SonoSite in the pro forma periods presented. Pro forma earnings (loss) exclude non-recurring charges including acquisition costs, and integration costs, and gain on bargain purchase, but include amortization of intangible assets resulting from this acquisition.

6. Income tax expense

The income tax provision for the three and nine months ended September 30, 2010 is based on projections of total year pre-tax income and the annual effective tax rate. The annual effective tax rate is applied to our ordinary worldwide pre-tax income. Discrete items are individually computed and recognized when the items occur. The following table summarizes our income tax provision (in thousands except percentages):

	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Income tax provision (benefit)	\$ 347	\$ (484)	\$ 1,208	\$ 298
Effective tax rate	26.9%	66.9%	22.3%	22.1%

Edgar Filing: SONOSITE INC - Form 10-Q

The decrease in our consolidated effective tax rate for the three months ended September 30, 2010 as compared to the same period in 2009 was primarily due to adjustments to our income tax provision after the filing of the US Federal income tax returns. During the three months ended September 30, 2010 and 2009, we filed our US federal income tax returns and revised the estimated amounts recorded in the income tax provision. The adjustments recorded in 2010 decreased the income tax expense for the three months ended September 30, 2010 whereas the adjustment recorded in 2009 resulted in an increase in income tax expense for the three months ended September 30, 2009. The slight increase in our consolidated effective tax rate for the nine months ended September 30, 2010 as compared to the same period for 2009 resulted from a discrete benefit recorded in the period due to favorable resolution of uncertain tax positions upon completion of tax audits in our foreign jurisdictions and a decrease in rate due to the statutory increase in the domestic production activities deduction for 2010. This was offset by an increase in rate due to the expiration of the U.S. research and development credit expiration after 2009 and non-deductible transaction costs.

During the nine months ended September 30, 2010 a valuation allowance of \$0.6 million was recorded as part of the VisualSonics acquisition. There was no change to the valuation allowance recorded in 2009 of \$1.5 million, which included a \$1.2 million valuation allowance established against state NOL carryforwards acquired and a \$0.3 million valuation allowance established against capital loss carryforwards.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****7. Convertible senior notes**

In July 2007, we completed the offering of \$225.0 million aggregate principal amount of 3.75% convertible senior notes (Notes), which are due in 2014. The Notes may be converted, under certain circumstances described below, based on an initial conversion rate of 26.1792 shares of common stock per \$1,000 principal amount of notes (which is equivalent to an initial conversion price of approximately \$38.20 per share). The net proceeds from the issuance of the Notes were \$217.6 million, after deducting debt issuance costs. The Notes have no restrictive covenants and the if-converted value is approximately equivalent to the current principal outstanding.

To account for the Notes, we bifurcated a component of the conversion option. We calculated the fair value of the liability component of the Notes using a discount rate of similar liabilities without conversion features and determined the carrying amount of the equity component by deducting the fair value of the liability component from the initial carrying value of the convertible debt. This resulted in an initial recognition of \$63.9 million of debt discount, to be amortized over a seven year period at an effective interest rate of 8.5%, and a corresponding deferred tax liability of \$23.6 million. Additionally, \$2.1 million of debt issuance costs, which were included in other assets in our consolidated balance sheet, were classified as equity on a proportionate basis as the equity component.

The following table summarizes the carrying value of the debt and equity components (in thousands):

	September 30, 2010	As of December 31, 2009
Convertible senior notes:		
Outstanding	\$ 114,745	\$ 114,745
Debt discount	(18,799)	(22,171)
Convertible senior notes, net	\$ 95,946	\$ 92,574
Equity component	\$ 33,957	\$ 33,957

The debt discount and debt issuance costs are being amortized through July 2014. Interest expense for the amortization of debt discount and debt issuance costs was \$1.2 million for the three months ended September 30, 2010 and \$3.7 million year to date. Interest expense for the contractual coupon was \$1.1 million for the three months ended September 30, 2010 and \$3.2 million for year to date. Interest expense related to the amortization of debt discount and debt issuance costs was \$1.2 million and \$3.8 million for the three and nine months ended September 30, 2009. Interest expense related to the contractual coupon was \$1.1 million and \$3.5 million for the three and nine months ended September 30, 2009.

In the first quarter of 2009, we repurchased \$25.0 million in principal amount of our Notes for \$20.5 million. As a result of these repurchases, we recorded a gain of \$1.3 million, net of \$0.5 million deferred financing costs and costs to complete the repurchase transaction, in other income. We also partially unwound the associated convertible note hedges, which resulted in proceeds to us of approximately \$1.4 million for the sale of call options, offset by \$1.3 million we paid for the repurchase of warrants. Following the repurchases, unamortized debt issuance costs approximated \$2.1 million.

Holders of our remaining outstanding Notes may convert their Notes based on an initial conversion rate of 26.1792 shares of our common stock per \$1,000 principal amount of notes, subject to adjustment, at their option at any time prior to April 15, 2014 under the following

Edgar Filing: SONOSITE INC - Form 10-Q

circumstances: (1) during any fiscal quarter beginning after September 30, 2007 (and only during such fiscal quarter), if the last reported sale price of our common stock for at least 20 trading days during the 30 consecutive trading days ending on the last trading day of the immediately preceding fiscal quarter is greater than or equal to 130% of the applicable conversion price on each applicable trading day of such preceding fiscal quarter; (2) during the five business day period after any ten consecutive trading day period in which the trading price per note for each day of that ten consecutive trading day period was less than 98% of the product of the last reported sale price of our common stock and the conversion rate on such day; or (3) upon the occurrence of specified corporate transactions. On or after April 15, 2014, holders may convert their Notes at any time prior to the close of business on the third scheduled trading day immediately preceding the maturity date.

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****7. Convertible senior notes (Continued)**

Upon conversion, we will pay cash and shares of our common stock, if any, based on a daily conversion rate multiplied by a volume weighted average price of our common stock during a specified period following the conversion date. Conversions will be settled in cash up to the principal amount of the Notes, with any conversion value above the principal amount settled in shares of our common stock. Holders of the Notes may require us to repurchase the notes for cash equal to 100% of the principal amount to be repurchased plus accrued and unpaid interest upon the occurrence of a fundamental change. In addition, we will adjust the conversion rate for holders who elect to convert notes in connection with a fundamental change. We may not redeem any of the Notes at our option prior to maturity.

In connection with our purchase of CDIC, we acquired long-term debt. As of September 30, 2010, we had remaining long-term debt of \$0.3 million, related to two bank loans, secured by the building acquired, with fixed interest rates of 5.9% and 5.3% through July 2011, when they become adjustable. Both loans mature on August 31, 2021.

Our long-term debt is measured for disclosure only at fair value using quoted market prices (Level 1). As of September 30, 2010, the fair value of the face amount of our outstanding long-term debt (excluding the debt discount) was \$128.3 million.

8. Hedging activities

We are exposed to foreign currency risk from both trade and intercompany balances denominated in currencies other than US Dollar (USD) and from translation of our foreign subsidiaries operating results. We enter into foreign currency forward and option contracts to reduce the impact of fluctuations on earnings associated with foreign currency exchange rate changes. These foreign currencies include the Australian dollar, the British pound, the Canadian dollar, the European Union euro, and the Japanese yen. We use foreign exchange contracts to mitigate risk and do not intend to engage in speculative transactions. Currently our foreign exchange contracts do not qualify for derivative hedge accounting. We seek to manage the counterparty risk associated with engaging in foreign currency contracts by limiting transactions to counterparties with which we have established banking relationships.

We use foreign currency forward contracts to hedge a substantial portion of our receivable balances denominated in currencies other than the USD. As of September 30, 2010, we had \$65.2 million in notional amount of foreign currency contracts that expire through October 29, 2010. Gains and losses in the fair value of these contracts are intended to offset the losses and gains, resulting from the changes in the underlying intercompany balances. The fair value of these contracts as of September 30, 2010 was not material to our results of operations or our financial position.

We use foreign currency forward and option contracts to hedge the impact of currency fluctuations on the translation of the financial statements of our foreign operations. As of September 30, 2010, we had \$13.8 million in notional amount of foreign currency contracts expiring at various dates through June 30, 2011. The fair value of these contracts as of September 30, 2010 was not material to our results of operations or our financial position.

Recognized gains and losses are included in other income on the condensed consolidated statement of income as follows (in thousands):

	Three Months Ended	September 30,	Nine Months Ended	September 30,
	2010	2009	2010	2009
Balance Sheet Hedges:				

Edgar Filing: SONOSITE INC - Form 10-Q

Loss on foreign currency hedges	\$ (4,306)	\$ (2,862)	\$ (2,922)	\$ (3,612)
Gain on translation of intercompany receivables	3,960	2,555	1,854	3,468
Loss on foreign currency net income hedges	(1,198)	(340)	(551)	(378)
Loss related to hedge activities	\$ (1,544)	\$ (647)	\$ (1,619)	\$ (522)

Table of Contents**SonoSite, Inc.****Notes to Condensed Consolidated Financial Statements (Continued)****(unaudited)****9. Segment reporting**

We have one reportable segment. We have integrated CDIC and are currently in the process of integrating VisualSonics into our business. We do not consider either of these businesses as separate operating segments. We market our products in the United States and internationally through our direct sales force and our indirect distribution channels. Our chief operating decision maker evaluates resource allocation decisions and our performance based upon revenue recorded in geographic regions and does not receive financial information about expense allocation disaggregated by geographic regions. Geographic regions are determined by the shipping destination. Revenue by geographic location is as follows (in thousands):

	Three Months		Nine Months	
	Ended September 30, 2010	2009	Ended September 30, 2010	2009
United States	\$ 34,886	\$ 26,917	\$ 91,359	\$ 74,036
Europe, Africa and the Middle East	17,211	12,240	46,789	40,586
Latin America and Canada	5,039	5,030	14,549	15,079
Asia Pacific	11,402	9,384	33,367	27,960
Total revenue	\$ 68,538	\$ 53,571	\$ 186,064	\$ 157,661

10. Commitments and contingencies

In order to protect or enforce our patent rights, we may initiate patent litigation. Others may initiate patent litigation against us. We currently do not have any material outstanding claims that we have initiated or that have been initiated against us.

During quarter ended September 30, 2010 we took action to ensure compliance with certain contractual pricing agreements. We believe the recorded amount represents our obligation; however final settlement has not been reached with the customer. A reduction to revenue of \$0.8 million was recorded for the estimated liability.

11. Accounting pronouncements issued not yet adopted

On January 4, 2010, the FASB issued Accounting Standards Update No. 2010-06, Fair Value Measurements and Disclosures (Topic 820) Improving Disclosures about Fair Value Measurements (ASU 2010-06). ASU 2010-06 requires additional disclosure within the rollforward activity for assets and liabilities measured at fair value on a recurring basis, including transfers of assets and liabilities between Level 1 and Level 2 of the fair value hierarchy and the separate presentation of purchases, sales, issuances and settlements of assets and liabilities within Level 3 of the fair value hierarchy. In addition, ASU 2010-06 requires enhanced disclosures of the valuation techniques and inputs used in the fair value measurements within Level 2 and Level 3. ASU 2010-06 was adopted for the first quarter ending March 31, 2010, except for the disclosure of purchases, sales, issuances and settlements of Level 3 measurements, for which disclosures are not required until first quarter of fiscal 2011. During the third quarter of fiscal 2010, we did not have any transfers of assets or liabilities between Level 1 and Level 2 of the fair value hierarchy. The adoption of the additional disclosures for Level 1 and Level 2 fair value measurements did not have an impact on our financial position, results of operations or cash flows. We are currently evaluating the potential impact of the disclosures regarding Level 3 fair value measurements.

In March 2010, the Patient Protection and Affordable Care Act and the Health Care and Education Act of 2010 (the Acts) became law. Based on our preliminary review, the Acts do not appear to create any substantial, immediate costs. Because we do not provide retirees with post-65 medical coverage, the elimination of the tax deduction related to the Medicare Part D subsidy in the Patient Protection and Affordable Care Act

Edgar Filing: SONOSITE INC - Form 10-Q

will not impact our consolidated financial statements. We are continuing to evaluate the impact, if any of the Acts on our financial position and results of operations. Given the scope and complexity of the legislation and the fact that extensive implementing regulations remain to be promulgated, it is difficult to predict future impacts of the passage of this legislation.

As part of the health care reform provisions, a 2.3% tax will be imposed on the sale of taxable medical devices beginning in 2013. Like other taxes based on revenue-producing transactions, companies may elect to classify the excise tax in the income statement as an expense or a reduction of revenues. We expect to be subject to the excise tax and are currently evaluating the impact it will have on our business.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This quarterly report on Form 10-Q contains forward-looking statements. Forward-looking statements provide our current expectations or forecasts of future events. Forward-looking statements in this report include, without limitation:

Words such as believe, anticipate, expect and intend may identify forward-looking statements, but the absence of these words does not necessarily mean that a statement is not forward-looking. Forward-looking statements are subject to known and unknown risks and uncertainties, and are based on potentially inaccurate assumptions that could cause actual results to differ materially from those expected or implied by the forward-looking statements. You should not unduly rely on these forward-looking statements, which speak only as of the date of this report.

We undertake no obligation to publicly update any forward-looking statement, whether as a result of new information, future events or otherwise. You are advised, however, to consult any further disclosures we make on related subjects in our future quarterly reports on Form 10-Q, current reports on Form 8-K and annual reports on Form 10-K. Also note that we provide a cautionary discussion of risks, uncertainties and possibly inaccurate assumptions relevant to our business in Item 1A. Risk Factors section of our Annual Report on Form 10-K for the year ended December 31, 2009. These are risks that could cause our actual results to differ materially from those anticipated in our forward-looking statements or from our expected or historical results. Other factors besides the risks, uncertainties and possibly inaccurate assumptions described in this report could also affect actual results.

Overview

The following Management's Discussion and Analysis (MD&A) is intended to help the reader understand the results of operations and financial condition of SonoSite, Inc. MD&A is provided as a supplement to, and should be read in conjunction with, our condensed consolidated financial statements and the accompanying notes to the condensed consolidated financial statements.

Our business strategy is to lead in the design, development and commercialization of high performance, innovative ultrasound technology and hand-cared ultrasound (HCU) systems. We intend to sustain long-term growth of our business through technological innovation, broadening of sales distribution channels, entering into and maintaining strategic relationships, expanding into new clinical and geographic markets, and delivering high-quality products to customers. We are focusing on the development of innovative products with the objective of improving patient care and efficiency through ease of use, high performance imaging, and providing quicker results to physicians and clinicians. We also are investing in research and development in existing and new lines of business and other areas that we believe may contribute to our long-term growth. Recognizing that the current uncertain state of the global economy is challenging, we are focused on increasing sales force efficiency and effective cost management.

Over the last few years, we have laid a foundation for long-term growth through expansion in four vertical markets including acute, primary care, musculoskeletal, and field medicine. We will be introducing innovative products, entering into strategic relationships, expanding into new markets, and providing high quality products with an industry-leading 5-year warranty. In fiscal year 2010, we plan to continue to build on this foundation and to execute well in key areas, including innovation in existing and new technologies, building and maintaining key relationships in distribution channels, improving sales productivity, delivering high quality products, and managing the expense structure.

In August 2009, we acquired all of the outstanding stock of CardioDynamics International Corporation (CDIC), a leader in impedance cardiography (ICG) for noninvasive hemodynamic assessment that develops, manufactures, and markets ICG devices and sensors. The ICG product line provides non-invasive assessment of cardiac output and other hemodynamic parameters. The business combination enables us to expand our distribution platform and product offerings into the primary care setting.

In June, 2010 we acquired all of the outstanding stock of VisualSonics, Inc. (VisualSonics) a leader in high-frequency, high-resolution, ultrasound-based imaging systems (or micro-ultrasound systems) designed specifically for live imaging of small animals. Live imaging is a useful tool for life sciences research and for the pre-clinical stage of the drug development process. VisualSonics technology provides clinicians and research scientists with a simple method for viewing and quantifying extremely small physiological structures and for imaging living tissue with near-microscopic resolution. This business combination positions us for long-term growth in both the clinical point-of-care markets, and the pre-clinical markets.

Key opportunities include the following:

Product Innovation Our products provide exceptional reliability, image quality, and ease of use in a lightweight design that can be hand-carried, used on a stand or mounted on a wall or ceiling. We are committed to continuing to develop our next generation of products and expanding our

existing product base by using new and existing technologies. In 2010

Table of Contents

we introduced Enhanced Needle Visualization, a significant development in ultrasound imaging that enables improved needle tracking with increased confidence during deep needle procedures. In 2009, we introduced the NanoMaxx, which is based on our fourth generation product platform, and we acquired the ICG product lines from CDIC. We will continue to release new and innovative products in 2011.

Strategic Relationships and Acquisitions We are focused on building relationships and gaining access to products and technologies that will enable us to continue to penetrate and develop point-of-care visualization. We believe that new relationships, products, and technologies can accelerate access to customers not served by our direct sales force. Through our acquisition of VisualSonics we intend to integrate micro-ultrasound technology with our miniaturization competency and user design to deliver ultra high-frequency micro-ultrasound into clinical medicine. During the second quarter of 2010 we announced an alliance with Physio-Control, Inc., the global leader in the development and delivery of emergency medical response solutions, for the development of the point-of-care visualization market in the emergency medical services segment. During the 2010, we invested in Carticept Medical Inc. (Carticept), a privately held company that develops innovative injection products for the treatment of musculoskeletal injuries. We believe this relationship will expand our access to the market segment for ultrasound-guided injections.

Expansion of Cardiovascular Disease Management (CVDM) and Vascular Access Markets We intend to maximize growth in CVDM through the introduction of new products, expansion of our sales force domestically and internationally. We also intend to expand our presence in the vascular market through the growth of sales of NanoMaxx, our most recently released product.

Results of Operations

Our results of operations for the three and nine months ended September 30, 2010 and 2009 include operating results from CDIC, which was acquired in August 2009 and VisualSonics, which was acquired on June 30, 2010. The following financial information sets forth our results of operations and is derived from our condensed consolidated financial statements (in thousands except percentages):

	Three Months Ended September 30,				Nine Months Ended September 30,			
	2010		2009		2010		2009	
Revenue	\$ 68,538	100.0%	\$ 53,571	100.0%	\$ 186,064	100.0%	\$ 157,661	100.0%
Cost of revenue	19,675	28.7	16,021	29.9	53,150	28.6	48,033	30.5
Gross margin	48,863	71.3	37,550	70.1	132,914	71.4	109,628	69.5
Operating expenses:								
Research and development	8,455	12.3	6,497	12.1	23,263	12.5	21,569	13.7
Selling, general and administrative	35,320	51.5	28,764	53.7	95,745	51.5	82,151	52.1
License income and litigation settlement							(924)	(0.6)
Total operating expenses	43,775	63.9	35,261	65.8	119,008	64.0	102,796	65.2
Operating income	5,088	7.4	2,289	4.3	13,906	7.5	6,832	4.3
Other loss	(3,799)	(5.5)	(3,013)	(5.6)	(8,498)	(4.6)	(5,486)	(3.5)
Income (loss) before income taxes	1,289	1.9	(724)	(1.4)	5,408	2.9	1,346	0.9
Income tax provision (benefit)	347	0.5	(484)	(0.9)	1,208	0.6	298	0.2
Net income (loss)	\$ 942	1.4%	\$ (240)	(0.4)%	\$ 4,200	2.3%	\$ 1,048	0.7%

Table of Contents**Revenue**

Overall revenue increased for the three and nine months ended September 30, 2010 compared to the three and nine months ended September 30, 2009. The increase for the three months ended September 30, 2010 was attributable to revenue growth from the acquisition of VisualSonics and organic growth in all sales channels, U.S. Direct, Enterprise, and International. The performance for the nine months ended September 30, 2010 was attributable to revenue growth from the acquisition of VisualSonics, organic growth from the U.S. Direct and International channels, a decline in revenue from the Enterprise channel, and a favorable impact from exchange rates of 1.1%. Revenue is as follows (in thousands except percentages):

	Three Months			Nine Months		
	Ended		Percentage Change	Ended		Percentage Change
	September 30,			September 30,		
	2010	2009		2010	2009	
Revenue:						
United States	\$ 31,266	\$ 26,918	16.2 %	\$ 88,237	\$ 74,037	19.2 %
International	28,560	26,653	7.2	89,115	83,624	6.6
VisualSonics	8,712		100.0	8,712		100.0
Total revenue	\$ 68,538	\$ 53,571	27.9 %	\$ 186,064	\$ 157,661	18.0 %

United States

U.S. revenue for three months ended September 30, 2010 increased by 16.1% compared to the three months ended September 30, 2009 due primarily to an increase in direct sales and enterprise sales. U.S. revenues for the nine months ended September 30, 2010 increased by 19.2% due primarily to an increase in direct sales offset by a decrease in enterprise sales. Both the three months and nine month ended September 30, 2010 were impacted by a reduction to revenue of \$0.8 million related to a contractual pricing adjustment.

International

International revenue for the three months ended September 30, 2010 increased by 7.2% compared to the three months ended September 30, 2009 due primarily to increased revenues from Asia Pacific, Europe, Africa and the Middle East. These increases were offset by decreased revenues in Canada and Latin America over the three months ended September 30, 2009. Changes in exchange rates had a marginal impact on revenue for the three months ended September 30, 2010 as compared to the three months ended September 30, 2009. For the nine months ended September 30, 2010 revenue increased 6.6% compared to the nine months ended September 30, 2009 due primarily to increased revenues from Asia Pacific, Europe, Africa and the Middle East, over the nine months ended September 30, 2009. These increases were offset by decreased revenues in Canada and Latin America over the nine months ended September 30, 2009. Changes in exchange rates had a combined 2.2% favorable impact on revenue for the nine months ended September 30, 2010 as compared to the nine months ended September 30, 2009.

VisualSonics

On June 30, 2010, we acquired all of the outstanding stock of VisualSonics. Revenue from VisualSonics for both the three months ended and the nine months ended September 30, 2010 was \$8.7 million.

Fiscal Year 2010 Outlook

We expect revenue to increase with the inclusion of VisualSonics in 2010 compared to 2009. We expect to introduce new products and features, to develop the cardiovascular disease market, and to continue international expansion. Our revenue may be negatively impacted by economic factors. The expansion of our four vertical markets including acute, primary care, muscular skeletal, and field medicine, may not be as successful as anticipated and we may encounter regulatory and other issues in the approval and sale of our products. Introduction of new products may not be as successful as anticipated. Our revenue may also be impacted by fluctuations in foreign currency exchange rates in the countries in which we sell our products. Increased competition may also impact our anticipated revenue growth. We currently face competition from larger

companies that manufacture cart-based and portable ultrasound systems and have greater financial and other resources.

Table of Contents**Gross margin**

	Three Months Ended		Percentage of Revenue		Nine Months Ended		Percentage of Revenue	
	September 30, 2010	September 30, 2009	2010	2009	September 30, 2010	September 30, 2009	2010	2009
Gross margin	\$ 48,863	\$ 37,550	71.3%	70.1%	\$ 132,914	\$ 109,628	71.4%	69.5%

Gross margin for the three months ended September 30, 2010 increased by 1.2 percentage points compared to the three months ended September 30, 2009 due to improved sales mix, license revenue, offset by the contractual pricing adjustment of \$0.8 million and the slightly lower margins of VisualSonics. Currency impact for the three months ended September 30, 2010 was negligible. Gross margin for the nine months ended September 30, 2010 increased by 1.9 percentage points compared to the nine months ended September 30, 2009 due to improved sales mix, license revenue, and a favorable foreign currency impact of approximately 0.3%, offset by the contractual pricing adjustment of \$0.8 million and the slightly lower margins of VisualSonics.

Fiscal Year 2010 Outlook

We expect gross margins with the inclusion of VisualSonics in 2010 to range between 70% and 71%. Increased competition from existing and new competitors as well as pricing pressure due to economic conditions could result in lower average realized prices which could lower our gross margin. Our gross margin can be expected to fluctuate in future periods based on the mix of business between direct, government and distributor sales; mix of U.S. and international sales; and our product and accessories sales mixes. Our gross margin may also be impacted by fluctuations in foreign exchange rates. Changes in our cost of inventory may also impact our gross margin. Adjustments to reduce carrying costs are recorded for obsolete material, earlier generation products and used or refurbished products held either as saleable inventory or as demonstration product. Our cost to provide warranty services may increase if we experience an increase in failure rates or replacement costs differ from our estimates. If market conditions change or the introduction of new products by us or our competitors impacts the market for our previously released products, we may be required to write down the carrying value of our inventory, resulting in a negative impact on gross margins. We rely on our sales forecasts by product to determine production volume. To the extent our sales forecasts or product mix estimates are inaccurate, we may produce excess inventory or experience inventory shortages, which may result in an increase in our cost of revenue, a decrease in our gross margin or lost sales.

Operating expenses

	Three Months Ended		Percentage of Revenue		Nine Months Ended		Percentage of Revenue	
	September 30, 2010	September 30, 2009	2010	2009	September 30, 2010	September 30, 2009	2010	2009
Research and development	\$ 8,455	\$ 6,497	12.3%	12.1%	\$ 23,263	\$ 21,569	12.5%	13.7%
Sales, general and administrative	\$ 35,320	\$ 28,764	51.5%	53.7%	\$ 95,745	\$ 82,151	51.5%	52.1%
License income and litigation settlement	\$	\$			\$	\$ (924)		(0.6)%

Research and development expenses were \$8.5 million for the three months ended September 30, 2010, compared to \$6.5 million for the three months ended September 30, 2009. The increase for the three months September 30, 2010 compared to the prior year was primarily attributable an increase in materials costs, outside services, payroll expenses and the addition of VisualSonics. For the nine months ended September 30, 2010 research and development expenses were \$23.3 million compared to \$21.6 million for the nine months ended September 30, 2009. The increase for the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009 was primarily attributable to an increase in outside services, payroll expenses, travel, and the addition of VisualSonics, offset by a decrease in material costs and depreciation.

Sales, general and administrative expenses were \$35.3 million for the three months ended September 30, 2010, compared to \$28.8 million for the three months ended September 30, 2009. The increase for the three months September 30, compared to the prior year was primarily attributable to the addition of VisualSonics and associated acquisition and integration costs, as well as restructuring costs of \$0.7 million. For the nine months ended September 30, 2010 sales, general and administrative expenses were \$95.7 million for the nine months ended September 30, 2010, compared to \$82.2 million for the nine months ended September 30, 2009. The increase for the nine months September 30, 2010 compared to the prior year was primarily attributable to the addition of VisualSonics and associated acquisition and integration costs, as well as restructuring costs of \$0.7 million, offset by decreased stock based compensation expense and decreased legal costs.

Table of Contents

License income and litigation settlement was \$0.9 million for the nine months ended September 30, 2009 resulting from the settlement of patent dispute.

Fiscal Year 2010 Outlook

We anticipate that operating expenses will be higher in 2010 compared to 2009 due to acquisition costs of VisualSonics and the addition of the operations of CDIC and VisualSonics for the entire year.

Other loss

	Three Months Ended		Percentage of Revenue		Nine Months Ended		Percentage of Revenue	
	September 30, 2010	September 30, 2009	2010	2009	September 30, 2010	September 30, 2009	2010	2009
Other loss	\$ 3,799	\$ 3,013	(5.5)%	(5.6)%	\$ 8,498	\$ 5,486	(4.6)%	(3.5)%

Total other loss was \$3.8 million for the three months ended September 30, 2010, compared to \$3.0 million for the three months ended September 30, 2009. The increase for the three months September 30, 2010 compared to the prior year was due to lower interest income resulting from lower cash and investment balances, offset by higher foreign exchange hedge losses. Other losses were \$8.5 million for the nine months ended September 30, 2010, compared to \$5.5 million for the nine months ended September 30, 2009. The increase for the nine months September 30, 2010 compared to the prior year was primarily attributable a gain on debt repurchase of \$1.5 million recorded in the prior year, lower interest income resulting from lower cash and investment balances, offset by higher foreign exchange hedge losses.

Fiscal Year 2010 Outlook

We anticipate that other loss will increase in 2010 compared to 2009 due to the gain on debt repurchase recorded in the prior year and lower interest income resulting from lower cash and investment balances, as well as weakening the US dollar.

Income tax provision (benefit)

	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Income tax provision (benefit)	\$ 347	\$ (484)	\$ 1,208	\$ 298
Effective tax rate	26.9%	66.9%	22.3%	22.1%

The income tax provision (benefit) is based on a blended federal and state rate applied to U.S. income and the applicable foreign rates applied to foreign income. The decrease in our consolidated effective tax rate for the three months ended September 30, 2010 as compared to the same period in 2009 was primarily due to adjustments to our income tax provision after the filing of the US Federal income tax returns. During the three months ended September 30, 2010 and 2009, we filed our US federal income tax returns and revised the estimated amounts recorded in the income tax provision. The adjustments recorded in 2010 decreased the income tax expense for the three months ended September 30, 2010 whereas the adjustment recorded in 2009 resulted in an increase in income tax expense for the three months ended September 30, 2009. The slight increase in our annual effective tax rate for the nine months ended September 30, 2010 as compared to the same period for 2009 resulted from an increase in rate due to the expiration of the U.S. research and development credit expiration after 2009 and non-deductible transaction costs. This was offset by a discrete benefit recorded in the period due to favorable resolution of uncertain tax positions upon completion of tax audits in our foreign jurisdictions and a decrease in rate due to the statutory increase in the domestic production activities deduction for 2010.

In the nine months ended September 30, 2010, we recorded discrete tax benefits of \$1.2 million related to favorable resolution of uncertain tax positions upon completion of tax audits in our foreign jurisdictions. The recording of these discrete items in the first nine months of 2010 results in an overall year-to-date effective tax rate of 22.3%.

Fiscal Year 2010 Outlook

We anticipate that our consolidated effective tax rate will be 36% for fiscal year 2010, however, if the research and development credit is reinstated by U.S. Congress during 2010, and we would expect the effective tax rate to decrease.

Table of Contents*Liquidity and Capital Resources*

Our cash and cash equivalents balance was \$71.7 million as of September 30, 2010, compared to \$183.1 million as of December 31, 2009. Cash and cash equivalents were primarily invested in money market accounts. We have no short-term investment securities as of September 30, 2010, compared to \$74.7 million as of December 31, 2009. Investment securities generally consisted of corporate debt. We had the ability to hold our securities until maturity; however, we classify all securities as available-for-sale, as the sale of such securities may be required prior to maturity to implement management strategies.

Cash Flows

	Nine Months Ended	
	September 30,	
	2010	2009
Net cash provided by (used in):		
Operating activities	\$ 17,527	\$ 8,911
Investing activities	4,105	23,077
Financing activities	(131,354)	(25,532)
Effect of exchange rate changes on cash and cash equivalents	(1,594)	(4,679)
Net change in cash and cash equivalents	\$ (111,316)	\$ 1,777

Operating activities provided cash of \$17.5 million for the nine months ended September 30, 2010, compared to \$8.9 million for the nine months ended September 30, 2009. The increase in cash flows from operating activities for the nine months ended September 30, 2010 compared to the nine months ended September 30, 2009 was attributable to improved net income, decreased noncash charges and a net increase in working capital.

Investing activities provided cash of \$4.1 million for the nine months ended September 30, 2010, compared to \$23.1 million for the nine months ended September 30, 2009. The decrease in cash provided by investing activities for the nine months ended September 30, 2010 compared to September 30, 2009 was due primarily to our \$61.2 million acquisition of VisualSonics and our \$8.0 million investment in Carticept, partially offset by an increase in net cash provided by maturities of investment securities.

Financing activities used cash of \$131.4 million for the nine months ended September 30, 2010, compared to \$25.5 million for the nine months ended September 30, 2009. The increase in cash used in financing activities for the nine months ended September 30, 2010, compared to September 30, 2009, resulted primarily from \$126.1 million in repurchases of our stock and the repayment of VisualSonics long-term debt of \$8.9 million, compared to convertible debt repurchases of \$25.8 million for the nine months ended September 30, 2009.

We believe that our existing cash and cash generated from operations will be sufficient to fund our operations, capital expenditures and repurchases of convertible debt or our stock for the foreseeable future. Nevertheless, we may experience an increased need for additional cash due to:

any significant decline in our revenue or gross margin;

any delay or inability to collect accounts receivable;

any acquisition or strategic investment in another business;

Edgar Filing: SONOSITE INC - Form 10-Q

any significant increase in expenditures as a result of expansion of our sales and marketing infrastructure, our manufacturing capability or our product development activities;

any significant increase in our sales and marketing expenditures as a result of our introduction of new products; and

newly enacted health care reform provisions, such as the 2.3% excise tax imposed on the sale of taxable medical devices beginning in 2013.

Table of Contents

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with instructions for Form 10-Q and Article 10 of Regulation S-X. The preparation of these condensed consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenue and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to product returns, bad debts, inventories, investments, warranty obligations, service contracts, contingencies and litigation. We base our estimates on historical experience and on various other assumptions that we believe are reasonable under the circumstances. The results form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

As discussed in Item 7, Management Discussion and Analysis of Financial Condition and Results of Operations of our annual report on Form 10-K for the year ended December 31, 2009, our critical accounting policies and estimates include revenue recognition, business combination, valuation of investments and inventories, warranty expense, income taxes, stock-based compensation, and convertible debt. There were no significant changes to these critical accounting policies during 2010 except as follows:

Revenue Recognition. On January 1, 2010, we adopted new revenue recognition accounting guidance, which removes tangible products from the scope of the software revenue guidance if the products contain both software and non-software components that function together to deliver a product's essential functionality. It also provides guidance on determining whether software deliverables in an arrangement that includes a tangible product are within the scope of the software revenue guidance. Concurrently, we adopted guidance that provides principles and application direction on whether multiple deliverables exist, how the arrangement should be separated, and the consideration allocated. It also requires an entity to allocate revenue in an arrangement using estimated selling prices of deliverables if a vendor does not have vendor-specific objective evidence or third-party evidence of selling price. The guidance eliminates the use of the residual method, requires entities to allocate revenue using the relative-selling-price method and significantly expands the disclosure requirements for multiple-deliverable revenue arrangements.

Revenue from the sale of products that contain both software and non-software components that function together to deliver a product's essential functionality is recognized when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is reasonably assured. Generally, we recognize revenue on products and accessories when goods are shipped under an agreement with a customer, risk of loss and title have passed to the customer, sales returns are estimable and collection of any resulting receivable is considered reasonably assured. For extended warranty service contracts, revenue is recognized as services are provided or over the term of the contract.

Revenue is recorded net of any discounts, trade-in allowances, and estimated returns. We estimate returns by reviewing our historical returns, considering customer reaction to new product introductions and current economic conditions. We recognize licensing revenue using the proportional performance method, a ratable recognition approach over the life of the license.

Our sales arrangements may contain multiple elements, which include hardware, software and services including training. In multiple-element arrangements, consideration is required to be measured and allocated among separate units of accounting. Our units of accounting include systems with software required for the essential functionality of the system, transducers, extended service contracts, software not essential to the functionality of our products, and training.

Consideration is allocated among the separate units of accounting based on their relative selling prices. The relative selling price is determined using vendor-specific objective evidence (VSOE) of the selling price if it exists; otherwise, third-party evidence (TPE) of selling price, defined as the standalone sale price of a vendor's or competitor's products, would be used. If neither VSOE nor TPE exists, the best estimate of selling price for that deliverable is used.

Revenue for software and software-related elements that are not essential to the functionality of a product and when the software elements are more than incidental to the product as a whole, is recognized in accordance with software revenue recognition rules. We have VSOE of fair value for our undelivered products. Accordingly, for transactions that have undelivered elements for which we have VSOE of the elements, revenue equal to the total fair value of the undelivered elements is deferred and is not recognized until the element is delivered to the customer. When the undelivered element represents services under extended service contracts, revenue equal to the stated price is deferred and recognized evenly over the contract term as those services are provided.

Edgar Filing: SONOSITE INC - Form 10-Q

Investment: We hold an investment in an entity where we own less than twenty percent of the voting equity and do not exercise significant influence over operating and financial policies of the entity is accounted for using the cost method. In October 2010 our chief executive officer was elected to Carticept board of directors. The evaluation of whether we exert significant influence over the entity involves judgment considering the various terms of the arrangement. Our investment is in a company that is not publicly traded and, therefore, no established market for their securities

Table of Contents

exists. The fair value of a cost method investment is not estimated if there are no identified events or changes in circumstance that may have a significant adverse affect on the fair value of the investment. If we believe that the carrying value of an investment is in excess of estimated fair value, our policy is to record an impairment charge to adjust the carrying value to estimated fair value, if the impairment is deemed other-than-temporary.

Business Combination. In June 2010, we acquired all of the outstanding stock of VisualSonics. The purchase method of accounting was used to account for this acquisition. The cost of an acquisition is measured at the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. Because the cost of acquisition is greater than the fair value of the net assets of the subsidiary acquired, the excess of the value of the purchase price over the net assets acquired has been recorded as goodwill. We recorded identifiable intangible assets including customer relationships, developed technology, and trademarks, which have lives from three to twenty-five years.

Goodwill and other intangible assets. We evaluate goodwill for impairment annually during the fourth quarter, or more frequently if facts and circumstances indicate reporting unit carrying values exceed its estimated fair value. Intangible assets subject to amortization, which consist mainly of customer relationships, acquired technology, trademarks, and non-compete agreements, are amortized using the straight-line method over their estimated useful lives of three to seven years. Indefinite-lived intangible assets are tested for impairment annually and more frequently if facts and circumstances indicate that the asset might be impaired. An impairment in the carrying value of an intangible asset is recognized whenever anticipated future undiscounted cash flows from an intangible asset are estimated to be less than its carrying value.

Upon completion of the December 2009 annual impairment assessment, we determined that no impairment was indicated as the estimated fair value of each of the reporting units exceeded its respective carrying value. As of September 30, 2010, we do not believe any significant indicators of impairment exist for our goodwill that would require additional analysis before our next annual evaluation. Significant management judgment is required in the forecasts of future operating results that are used in our impairment evaluations. These estimates are consistent with the plans and estimates used to manage our business. It is possible, however, that plans may change and estimates used may prove to be inaccurate. If our actual results, or the plans and estimates used in future impairment analyses, are lower than the original estimates used to assess the recoverability of these assets, we could incur future impairment charges.

Item 3. Quantitative and Qualitative Disclosures about Market Risk***Interest rate risk***

We are exposed to market risk relating to changes in interest rates, which could adversely affect the value of our investments.

As of September 30, 2010, our investment portfolio consisted of \$60.6 million of interest-bearing money market accounts. We believe that the impact on the fair market value of our securities and related earnings for 2010 from a hypothetical 10% increase or decrease in market interest rates would not have a material impact on the investment portfolio.

Foreign currency risk

Because of our international presence, we are exposed to foreign currency risk from both trade and intercompany balances denominated in currencies other than US Dollar (USD) and from translation of our foreign subsidiaries operating results. We enter into foreign currency forward and option contracts to reduce the impact of fluctuations on earnings associated with foreign currency exchange rate changes. These foreign currencies include the Australian dollar, the British pound, the Canadian dollar, the European Union euro, and the Japanese yen. We use foreign exchange contracts to mitigate risk and do not intend to engage in speculative transactions. Currently our foreign exchange contracts do not qualify for derivative hedge accounting. We seek to manage the counterparty risk associated with engaging in foreign currency contracts by limiting transactions to counterparties with which we have established banking relationships.

A sensitivity analysis of a change in the fair value of these contracts, totaling \$79.0 million in notional amount, indicates that if the USD weakened by 10% against the applicable foreign currency, the fair value of these contracts would decrease by approximately \$7.9 million. Conversely, if the USD strengthened by 10% against the applicable foreign currency, the fair value of these contracts would increase by approximately \$7.8 million. The offsetting gains and losses resulting from the changes in the intercompany balances as described above are not reflected in the sensitivity analysis above.

Table of Contents

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

As of September 30, 2010, our chief executive officer and our chief financial officer have evaluated the effectiveness of our disclosure controls and procedures as defined in Rules 13a-15 (e) and 15d-15 (e) of the Securities Exchange Act of 1934 (the Exchange Act), and they have concluded that our disclosure controls and procedures were effective to ensure that the information required to be disclosed by us in reports we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

Changes in internal control over financial reporting

We continue to review, revise and improve the effectiveness of our internal controls. There have been no changes in the our internal controls over financial reporting during the third quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II: OTHER INFORMATION

Item 1. Legal Proceedings

We currently do not have any material outstanding claims that we have initiated or that have been initiated against us.

Item 1A. Risk Factors

Our operations and cash flows are subject to various risks and uncertainties, including those described below, which could adversely affect our business, financial condition, and the trading price of our common stock.

We may be unable to expand the market for our products to new applications and new users, which could limit our ability to grow our business.

We seek to sell our products to current users of ultrasound and ICG equipment, physicians, and other healthcare providers who do not currently use ultrasound or ICG equipment. Our market focus, and we believe our greatest growth opportunities, will come from new point-of-care clinical applications and products and new users of ultrasound or ICG technology. Any new users of ultrasound will not only require training and education to properly administer ultrasound examinations but also must develop an appreciation of the treatment value of our products so that our products will become successfully integrated into their day-to-day practices. Although we have spent, and will continue to spend, considerable marketing resources educating potential customers about the value of HCU products in new applications, our efforts may be unsuccessful. If these potential customers are unable or unwilling to be trained due to cost, time constraints, unavailability of courses or other reasons, or if they consider our products nonessential to their medical practices, our ability to expand the market for our products and to increase our revenues could be limited.

Our efforts to integrate the business and technology of any future acquisition may result in significant costs or create significant disruptions that outweigh the benefits of any such acquisition.

On June 30, 2010, we acquired all of the outstanding stock of VisualSonics, Inc. (VisualSonics), a leader in the development, manufacturing, and marketing of ultra high-resolution, ultrasound-based imaging technology (micro-ultrasound) designed to enable discovery research, medical diagnosis and imaging small physiological structures in humans and animals. VisualSonics' micro-ultrasound product platform currently serves the pre-clinical research market.

On August 14, 2009, we acquired all of the outstanding stock of CDIC, a leader in ICG for noninvasive hemodynamic assessment that develops, manufactures, and markets ICG devices and sensors. The ICG product line provides non-invasive assessment of cardiac output and other hemodynamic parameters.

Table of Contents

We may explore the possible acquisition of one or more medical device companies or medical device products or technologies in an effort to expand our product portfolio, expand our sales channels, create international operating leverage, improve marketing and other efficiencies or leverage manufacturing and supply chain economics. If we are unable to identify suitable acquisition candidates or to successfully consummate and integrate acquisitions into our business, our ability to grow our business may be affected.

Any acquisition we do complete may be costly and difficult and we may experience:

difficulty in integrating operations, including combining teams and processes in various functional areas;

delays in realizing the benefits of the acquired company or technology;

limited market acceptance of acquired products or technology;

diversion of our management's time and attention from other business concerns;

lack of or limited direct experience in new markets we may enter;

difficulties in obtaining regulatory approvals or reimbursement codes for acquired technologies;

increased risk of product liability actions from acquired products or technologies;

additional costs, including fees and expenses of professionals involved in completing the integration process; and

unexpected costs associated with existing liabilities of any acquired business.

In addition, an acquisition could materially impair our operating results by causing us to incur additional debt or requiring us to incur acquisition or integration related charges. If we fail in our attempts to integrate any acquired business or technology, or if the business fails to meet our forecasts, our financial resources or financial results could be negatively impaired.

If healthcare reimbursement policies place limits on which providers may receive payment for imaging services or substantially reduce reimbursement amounts or coverage for specific procedures, market acceptance of our products may be reduced.

Continued demand for our products depends in part on the extent to which our customers continue to receive reimbursement for the use of our products from third-party payers such as Medicare, Medicaid and private health insurers (and equivalent third-party payers in foreign countries). Presently, reimbursement policies for physician-performed diagnostic ultrasound services are fairly unrestricted in the United States and payment levels are sufficient to enable providers to recoup the costs of purchasing ultrasound systems in a reasonable timeframe. The continuing efforts of governmental authorities, private health insurers and other third-party payers to contain or reduce the costs of healthcare could, however, result in reduced or more restrictive payment for ultrasound services. Additionally, some private insurers have implemented imaging privileging programs as a means of controlling utilization of imaging services. Finally, both governmental and private third-party payers are calling for increasing amounts of clinical evidence of beneficial patient outcomes in addition to proof of clinical efficacy as a prerequisite to granting new or continued coverage for technologies and devices.

Edgar Filing: SONOSITE INC - Form 10-Q

We may be unable to compete effectively and could fail to generate sufficient revenue to maintain our business.

Competition in the cart-based and portable ultrasound systems market is very significant. Our main competitors in this industry are GE Healthcare, Siemens, and Philips. These companies are very large global organizations that have the following competitive advantages over us:

significantly greater financial and infrastructure resources;

larger research and development staffs;

greater experience in product manufacturing, marketing and distribution;

greater brand name recognition; and

long-standing relationships with many of our existing and potential customers. These manufacturers of cart-based and portable ultrasound systems could use their greater resources to further increase the level of competition in the market through various means, including:

price and payment terms that we are unable to match;

marketing strategies that bundle the sale of portable systems with other medical products that we do not sell;

technological innovation;

market penetration and hospital systems integration that we cannot match;

employee compensation that we cannot match; and

complementary services such as warranty protection, maintenance and product training that are outside of the scope of our product offerings.

Table of Contents

Existing product supply relationships between these competitors and our potential customers could adversely impact the level or rate of adoption of our products due to brand loyalty or preferred customer discounts. Competing portable or traditional cart-based ultrasound devices may be more accepted or cost-effective than our products. Competition from these companies for employees with experience in the primary point-of-care market could result in higher turnover of our employees. If we are unable to respond to competitive pressures within the cart-based and HCU markets, we could experience delayed or reduced market acceptance of our products, higher expenses and lower revenue.

We expect the market for high-performance HCU products and the competition in the HCU market will continue to increase as new and existing competitors enter the portable ultrasound market or modify their existing products to more closely approximate the combined portability, quality, performance and cost of our products. If we are unable to compete effectively with current or new entrants to the high-performance HCU market, we will be unable to generate sufficient revenue to maintain our business.

In October 2009, we resolved all pending patent litigation with GE. Under the terms of the settlement, GE made an up front royalty payment to SonoSite of \$21 million and will pay an ongoing royalty on U.S. sales and production of hand-carried ultrasound systems in exchange for a non-exclusive perpetual, nontransferable worldwide license to the 412 patent. We may face increasing competition as a result of this settlement.

Unfavorable economic conditions may have an adverse impact on our business.

Unfavorable changes in economic conditions, including inflation, recession, or other changes in economic conditions, may result in lower consumer healthcare spending as well as physician and hospital spending and availability of credit. If demand for medical devices or budgets for capital improvements decline, our revenue could be adversely affected. Additionally, if our suppliers face challenges in obtaining credit, in selling their products or otherwise in operating their businesses, they may become unable to continue to offer the materials we use to manufacture our products, which could result in sales disruption.

We may face significant challenges if global economic conditions do not improve or continue to worsen, including reduced demand for our products and services, increased order cancellations and longer sales cycles and slower adoption of new technologies; increased difficulty in collecting accounts receivable and risk of excess and obsolete inventories; increased price competition in our served markets; supply chain interruptions, which could disrupt our ability to produce our products; and increased risk of impairment of investments, goodwill and intangible and long-lived assets.

Changes in the healthcare industry could result in a reduction in the size of the market for our products or may require us to decrease the selling price for our products, either of which could have a negative impact on our financial performance.

Trends toward managed care, healthcare cost containment, and other changes in government and private sector initiatives in the United States and other countries in which we do business are placing increased emphasis on lowering the cost of medical services, which could adversely affect the demand for or the prices of our products. For example:

major third-party payers of hospital and non-hospital based healthcare services, including Medicare, Medicaid and private healthcare insurers, could revise their payment methodologies and impose stricter standards for reimbursement of imaging procedures charges and/or a lower or more bundled payment;

the recently passed Patient Protection and Affordable Health Care Act (A.R. 3590) and the Health Care and Education Reconciliation Act (H.R. 4872) includes an excise tax on medical device manufacturers designed to raise \$20 billion over ten years. Unless this tax is repealed, beginning in January of 2013 medical device manufacturers will be required to pay 2.3% of U.S. revenue to meet their obligation. Other aspects of healthcare reform legislation, such as reductions in reimbursements to hospitals may dampen demand for our products.

there has been a consolidation among healthcare facilities and purchasers of medical devices in the United States and foreign countries who prefer to limit the number of suppliers from whom they purchase medical products, and these entities may decide to stop purchasing our products or demand discounts on our prices;

there is economic pressure to contain healthcare costs in worldwide markets; and

there are proposed and existing laws and regulations in domestic and international markets regulating pricing and profitability of companies in the healthcare industry.

These trends could lead to pressure to reduce prices for our products and could cause a decrease in the size of the market that could adversely affect our revenue and profitability, which could harm our business.

Failure to develop and innovate new products and product features could adversely affect our business and negatively impact future revenues.

Because substantially all of our revenue comes from the sales of our existing HCU systems and related products, in order to remain competitive, our future financial success will depend in large part upon our ability to successfully invent, deliver and market new and innovative products and product features. In 2009, 2008 and 2007, we released several new products, including the NanoMaxx ultrasound tool, M-Turbo system and the S Series ultrasound tools, which are customized for different clinical applications. The development of new, technologically advanced products and product features is a complex and uncertain process

Table of Contents

requiring great innovation and the ability to anticipate technological and market trends and needs. We may be unable to achieve or maintain market acceptance of any new products we develop, and we may be required to expend more costs than anticipated to successfully develop and introduce these products. Without successful product innovation and market introduction of new product offerings and feature improvements, our products will become technologically obsolete and we will be unable to compete effectively in the ultrasound market. Additionally, we may be unable to create or introduce new products or features in the CVDM market or any new markets that we may enter. Even with successful innovation and development, we cannot assure you that revenues will continue to remain at or above current levels or that we will continue to be financially profitable.

Because technological innovation is complex, it can require long development and testing periods. If the launch of new products or product improvements is delayed for any reason, our business may be adversely affected. Factors which could cause delays in our product development or release schedules or cancellation of product development projects include:

research and development challenges;

lack of technological expertise outside of ultrasound;

defects or errors in newly developed products or software for those products;

third-party intellectual property rights that preclude us from pursuing a new product design; and

the availability, cost and performance of supplies and components needed for new products.

We may experience delays in our innovation cycle, and in the scheduled introduction of future new products. Any such delays could adversely affect our ability to compete effectively in the markets that we serve and could adversely affect our operating results.

We could experience production delays, cost increases, and lost sales if our suppliers fail to supply components on a timely basis or if we are required to switch suppliers.

We depend on suppliers, including some single-source suppliers, to provide highly specialized parts, such as custom-designed integrated circuits, cable assemblies and transducer components. We also depend on single-source suppliers to provide other components, such as image displays, batteries, capacitors and cables. We do not maintain significant inventories of certain components, and may experience an interruption of supply if a supplier is unable or unwilling to meet our time, quantity and quality requirements. There are relatively few alternative sources of supply for some of these components. An increase in demand for some parts by other companies could also interrupt our supply of components. We have in the past experienced supply problems in timeliness and quality, but to date these problems have not resulted in lost sales or lower demand. Nevertheless, if we experience an interruption of supply or are required to switch suppliers, the manufacture and delivery of our products could be interrupted, our manufacturing costs could substantially increase and product sales could be substantially reduced.

In addition, our circuit boards are produced in Malaysia by one of the world's largest electronic manufacturing services suppliers. These circuit boards are highly customized and securing a different source of supply for this critical component of our product would be particularly difficult. If we experience delays in the receipt or deterioration in product yields of these critical components, we may experience delays in manufacturing resulting in lost sales or an increase in costs, which could cause deterioration in gross margin.

If our relationships with our distributors are unsuccessful, our ability to sell our products could be limited.

We currently depend on distributors to help promote market acceptance and demand for our products in countries in which we do not have a direct sales force. Distributors that are in the business of selling other medical products may not devote a sufficient level of resources and support required to generate awareness of our products and grow or maintain product sales. If our distributors are unwilling or unable to market

and sell our products, or if they do not perform to our expectations, we could experience delayed or reduced market acceptance and sales of our products. In addition, disagreements with our distributors or non-performance by these third parties could lead to costly and time-consuming litigation or arbitration and disrupt distribution channels for a period of time and require us to re-establish a distribution channel.

Increased reliance on group purchasing organizations and U.S. governmental agencies may lead to pressure on pricing and increased competition.

We depend on group purchasing organizations and U.S. governmental agencies for significant revenues. These groups represent 79.8% of our U.S. revenues. The multi-year agreements with these entities are complex, and include contractual pricing limitations, and required fees. These agreements provide access to customers and contain provision related to pricing, usage, cost-effectiveness, and use of competitor products. This enhanced purchasing power may also lead to pressure on pricing and increased use of preferred vendors. In addition, our status as a U.S. government contractor requires us to comply with numerous laws and regulations. We intend to continue to expand use of these contracts and negotiate renewals of existing agreements. However if we do not manage these relationship effectively, renew on satisfactory terms or fulfill the contractual and legal requirements with the group purchasing organizations and U.S. governmental agencies, our ability to sell to them could be restricted or terminated and our results could be adversely affected. During quarter ended September 30, 2010 we determined that we were not meeting the requirements of certain contractual pricing agreements. A non-recurring charge to revenue of \$0.8 million was recorded for the estimated liability.

Table of Contents

We derive a significant portion of our revenue from foreign sales and are subject to the risks of doing business in other countries.

We have thirteen wholly owned subsidiaries located in the following countries: Australia, Canada, China, France, Germany, India, Italy, Japan, Spain, Singapore and the United Kingdom. The percentage of our total revenue originating outside the United States equaled 54%, 51% and 49% for the years ended December 31, 2009, 2008 and 2007, respectively. Successful maintenance of these international operations requires us to:

maintain an efficient and self-reliant local infrastructure;

continue to attract, hire, train, manage and retain qualified local sales and administrative personnel;

continue to identify new non-U.S. distributors and maintain our relationship with our existing distributors;

comply with diverse and potentially burdensome local regulatory requirements and export laws, including license requirements, trade restrictions and tariff increases; and

maintain complex information, financial, distribution and control systems.

The international sale and shipment of our products subject us to extensive United States and foreign governmental trade regulations. Failure to comply with any legal and regulatory obligations could impact us in ways including, but not limited to, denial of export privileges, criminal, civil, and administrative penalties, fines, seizure of shipments, and restrictions on certain business activities.

Our presence in international markets has required, and will continue to require, substantial financial and managerial resources. The costs of maintaining our presence in international markets are unpredictable and difficult to control. In addition, we may be subject to the following conditions in countries where we conduct our operations:

changes or uncertainties in economic, legal, regulatory, social and political conditions in the Company's markets;

currency exchange rate fluctuations;

difficulty in enforcing any judgment against non-U.S. distributors or other third parties upon which our business is heavily dependent; and

reduced protection for our intellectual property rights.

Despite our expenditures and efforts internationally to mitigate the challenges above, we may not continue to generate a proportional substantial increase in international revenue, and such a deficiency would impact our operating results.

Fluctuations in foreign currency exchange rates could result in declines in our reported revenue and earnings.

Total sales denominated in a currency other than USD were \$61.3 million or 32.9% of our total consolidated revenue and total expenses denominated in a currency other than USD were \$31.1 million or 26.1% of our total consolidated operating expenses for the nine months ended September 30, 2010. As a result, our results of operations could be adversely affected by certain movements in exchange rates. Although we take

Edgar Filing: SONOSITE INC - Form 10-Q

steps to hedge a portion of our net foreign currency exposures, there is no assurance that our hedging strategy will be successful or that the hedging markets will have sufficient liquidity or depth for us to implement our strategy in a cost effective manner. . Additionally, we seek to manage the counterparty risk associated with engaging in foreign currency contracts by limiting transactions to counterparties with which we have established banking relationships. In addition, as of September 30, 2010, 66.6% of our accounts receivable balance was from international customers, of which 58.8%, or \$27.0 million, was denominated in a currency other than USD. Although we regularly review our receivable positions in foreign countries for any indication that collection may be at risk, our revenue from international sales may be adversely affected by longer receivables collection periods and greater difficulty in receivables collection.

If we, or our suppliers, are unable to obtain timely U.S. and foreign governmental regulatory approvals applicable to our products and manufacturing practices, we could experience product introduction delays, production delays, cost increases and lost sales and our future revenues may be adversely affected.

Our products, our manufacturing and marketing activities, and the manufacturing activities of our third-party medical device manufacturers are subject to extensive regulation by a number of governmental agencies, including the FDA, and comparable international agencies. We and our third-party manufacturers are or may be required to:

obtain prior clearance or approval from these agencies before we can market and sell our products;

undergo rigorous inspections by domestic and international agencies; and

satisfy content requirements for all of our sales and promotional materials.

The process for obtaining regulatory approval can be lengthy and expensive, and the results are unpredictable. If we are unable to obtain clearances or approvals needed to market existing or new products, or obtain such clearances or approvals in a timely manner, our revenues and profitability could be adversely affected. Moreover, clearances and approvals, if granted, may limit the uses for which a product may be marketed, which could reduce or eliminate the commercial benefit of manufacturing any such product.

Table of Contents

To ensure that manufacturers adhere to good manufacturing practices, medical device manufacturers are routinely subject to periodic inspections by the FDA and may be inspected by foreign regulatory agencies from countries in which we do business. In addition, BSI performs periodic assessments of our manufacturing processes and quality system. Compliance with the regulations of various agencies, including the Environmental Protection Agency and the Occupational Safety and Health Administration, may require us to incur substantial costs and may delay or prevent the introduction of new or improved products. Although to date these actions by regulatory bodies have not required us to incur substantial costs or delay product shipments, we expect to experience further inspections and incur additional costs as a result of governmental regulation.

Failure to comply with applicable regulatory requirements can result in enforcement action, including product recall, the issuance of fines, injunctions, civil and criminal penalties, detaining or banning our products, and operating restrictions. Our third-party medical device manufacturers may also be subject to the same sanctions if they fail to comply with the laws and regulations and, as a result, may fail to supply us with components required to manufacture our products.

Failure to sustain profitability, grow, or manage our growth could impair our ability to achieve our business objectives.

For the nine months ended September 30, 2010, our revenue increased to \$186.1 million from \$157.7 million for the nine months ended September 30, 2009. We intend to continue to grow our business; however, we may be unable to sustain or increase our revenue or profitability on a quarterly or annual basis. We may incur losses if we cannot increase or sustain our revenue. Additionally, operating expenses would increase if we continue to pursue acquisitions of companies or technologies to further our growth.

Future growth could strain our existing management, operational and financial resources and, if we are unable to manage this growth successfully and retain or attract qualified personnel, our business and financial performance will be adversely affected. In order to manage our growth effectively, we will need to improve the productivity and efficiency of our existing sales, manufacturing, operational, administrative, and international support staff and our management and information systems. We may be unable to hire and retain the personnel necessary to operate and expand our business. We also may be unable to increase the productivity and efficiency of our existing resources.

We may be unable to predict our sales and plan manufacturing requirements with accuracy, which may adversely affect our operating results.

Our customers typically order products on a purchase order basis. In some circumstances, customer orders may be cancelled, changed or delayed on short notice. Lack of significant order backlog makes it difficult for us to forecast future sales with certainty and could result in over or under production, which could lead to higher expense, lower than anticipated revenue, and reduced gross margin. Varying quarterly demands from our customers, particularly as we introduce new products, also make it difficult to accurately forecast component and product requirements, exposing us to the following risks:

If we overestimate our requirements, we may be obligated to purchase more components or third-party products than we need; and

If we underestimate our requirements or experience shortages of product components from time to time, we could experience an interruption in revenue, because our third-party manufacturers and suppliers may have an inadequate product or product component inventory to satisfy our requirements.

The final assembly and testing of our products is done at both our Bothell, Washington factory and at our VisualSonics factory in Toronto, Ontario, Canada, where we integrate different components manufactured by various suppliers. If we encounter supplier, regulatory, engineering or technical difficulties in manufacturing on account of events at our factory or our suppliers' factories, we may incur delays in delivery of these products to customers and that could adversely affect our revenues.

Our reliance on a single corporate headquarters and manufacturing facility may expose us to greater risk from natural disasters or other unforeseen catastrophic events.

Our corporate headquarters and manufacturing facilities are located in two buildings in Bothell, Washington, in close proximity to each other. Despite precautions taken by us, a natural disaster such as an earthquake or other unanticipated catastrophic events at this location could

Edgar Filing: SONOSITE INC - Form 10-Q

significantly impair our ability to manufacture our products and operate our business. Our facilities information data center and certain manufacturing equipment would be difficult to replace and could require substantial replacement lead-time. Such catastrophic events may also destroy any inventory of product or components and information systems. While we carry insurance for natural disasters and business interruption for our Bothell facilities, the occurrence of such an event could result in losses that exceed the amount of our insurance coverage, which would impair our financial results.

Table of Contents

Existing or potential intellectual property claims and litigation either initiated by or against us may divert our resources and subject us to significant liability for damages, substantial litigation expense and the loss of our proprietary rights.

In order to protect or enforce our patent rights, we may initiate patent litigation. For example, in 2007, we initiated a lawsuit against Zonare for patent infringement, a case which settled in 2008.

Others may initiate patent litigation against us. For example, in 2007 and again in 2008, GE Healthcare initiated patent litigation against us, alleging that we infringed several of their patents and attempting to invalidate one of our key patents. In 2009, we settled all pending patent litigation worldwide with GE. If we fail to successfully defend claims against us, we may be required to pay monetary damages (including treble damages) and, unless we are able to redesign our products to avoid infringing the asserted patents or to license proprietary rights from them, we may be prevented from continuing to market and sell certain of our products, sales of which represent a substantial portion of our total revenue. If this outcome were to occur, we may be unable to redesign our products in a timely and cost effective manner, and licensing proprietary rights may not be possible on commercially reasonable terms, if at all. Even if we are successful in defending these actions and in proving infringement, we will incur substantial costs that could adversely affect our financial condition and the actions will be distracting to management.

We may become subject to interference proceedings conducted in patent and trademark offices to determine the priority of inventions. There are numerous issued and pending patents in the ultrasound field. The validity and breadth of medical technology patents may involve complex legal and factual questions for which important legal principles may remain unresolved.

We may be liable for infringing the intellectual property of others as there could be existing patents of which we are unaware, or pending applications of which we are unaware which may later result in issued patents, that one or more of our products may infringe.

We may also become involved in the defense and prosecution, if necessary, of intellectual property suits, patent interferences, opposition proceedings and other administrative proceedings.

Involvement in intellectual property claims and litigation, including those described above, could have significant adverse consequences, including:

diversion of management, scientific and financial resources;

exposure to significant adverse judgments and financial liabilities;

substantial litigation costs;

product shipment delays and lost sales;

inability to design around third party patents;

modification of our products; or

discontinuation of product sales.

We may not be able to protect our intellectual property rights.

Edgar Filing: SONOSITE INC - Form 10-Q

Much of our value arises out of our proprietary technology and intellectual property for the design, manufacture and use of point-of-care ultrasound imaging systems, including development of point-of-care high frequency micro ultrasound technology, and pre-clinical high frequency micro ultrasound systems. We rely on patent, copyright, trade secret and trademark laws to protect our proprietary technology and limit the ability of others to compete with us using the same or similar technology. Third parties may infringe or misappropriate our intellectual property, which could harm our business.

We currently hold 145 U.S and foreign patents relating to our technology. We also license a number of patents from academic institutions, other commercial entities and licensing organizations, including key patents relating to our high frequency micro ultrasound technology and our LumenVu technology. A number of other patents are pending in the United States and in foreign jurisdictions. Although we enter into confidentiality agreements with our employees, consultants and strategic partners, and generally control access to and distribution of our proprietary information, the steps we have taken to protect our intellectual property may not prevent misappropriation. In addition, we do not know whether we will be able to defend our proprietary rights since the validity, enforceability and scope of protection of proprietary rights is still evolving.

Policing unauthorized use of our intellectual property is difficult, costly and time-intensive. We may fail to prevent misappropriation of our technology, particularly in countries where the laws may not protect our proprietary rights to the same extent as do the laws of the United States. If we cannot prevent other companies from using our proprietary technology or if our patents are found invalid or otherwise unenforceable, we may be unable to compete effectively against other manufacturers of ultrasound systems, which could decrease our market share. In addition, the breach of a patent licensing agreement by us may result in termination of a patent license.

We may incur greater than expected warranty expense.

We expect our warranty liability and expense to continue to increase significantly due to the five-year warranty offered with the NanoMaxx, S Series and M-Turbo, MicroMaxx and BioZ systems. Should actual failure rates and repair or replacement costs differ from our estimates, additional warranty expense may be incurred and our financial results may be materially affected.

Table of Contents

Our business objectives and financial results depend on our ability to attract and retain talented employees.

Our success depends heavily on our ability to attract and retain the services of certain key employees or certain technical expertise. Competition among medical device companies for qualified employees is intense. We may fail to retain these key employees, and we may fail to attract qualified replacements if they do leave. We do not maintain key-person insurance on any of our employees. We do not have employment agreements with any of our employees except for employees in certain countries outside the United States and change in control agreements with certain members of senior management. The loss of any of our key employees could significantly delay or prevent the achievement of our product development or business objectives.

In addition, our future success will depend, to a significant extent, on the ability of our management to operate effectively, both individually and as a group. We must successfully manage transition and replacement issues that may result from the departure or retirement of members of our senior management. Transitions of management personnel may cause disruption to our operations or customer relationships, or a decline in our financial results.

Seasonality and concentration of revenues at the end of the quarter could cause our revenues to fall below the expectations of securities analysts and investors, resulting in a decrease in our stock price.

As a result of customer buying patterns and the efforts of our sales force to meet or exceed year-end and quarterly quotas, historically we have earned a substantial portion of each year's revenues during the last quarter and a substantial portion of each quarter's revenues during its last month. If expected revenues at the end of any quarter are delayed, our revenues for that quarter could fall below the expectations of securities analysts and investors, resulting in a decrease in our stock price.

Our investment securities may be adversely impacted by economic factors beyond our control and we may incur additional impairment charges to our investment portfolio.

Our cash and cash equivalents made up over 22.6% of our total assets as of September 30, 2010. Although our holdings are liquid, economic factors could impact the liquidity of our portfolio and result in additional impairments to our investment portfolio, which could negatively affect our financial condition, cash flow and reported earnings.

If we fail to comply with our obligations in our license with ATL, we could lose license rights that are important to our business.

We license certain technology from ATL that is incorporated into our single technology platform, and we use this ATL technology in all of our HCU systems. A substantial majority of our revenue is attributable to products incorporating this ATL technology.

ATL may terminate our license in the event of an uncured material default by us in our obligations under the license agreement. The termination or other loss of our license to use ATL technology would significantly impair our ability to manufacture, market and sell our products. If this license is terminated, we may be unable to generate sufficient revenue to maintain our business.

If we incur a tax liability in connection with our spin-off from ATL, we would be required to pay a potentially significant expense, which would diminish our financial resources.

Our spin-off was treated by ATL as a tax-free spin-off under Section 355 of the Internal Revenue Code of 1986, or the Code. If ATL were to recognize a taxable gain from the spin-off, the Internal Revenue Service, or IRS, could impose that liability on any member of the ATL consolidated group as constituted prior to the spin-off, including us. Generally, the IRS may assert that our spin-off from ATL is a taxable transaction until the expiration of the statute of limitations applicable to ATL with respect to the spin-off transaction. The expiration of the statute of limitations with respect to the spin-off transaction depends upon the actions and tax filings of ATL and the special rules applicable to spin-offs in general, which special rules could result in the extension of the general statute of limitations for an indefinite period of time. In the event of a tax liability, ATL has agreed to cover 85% of any such liability, unless the tax is imposed due to our actions solely or by ATL solely, in which case, we have agreed with ATL that the party who is solely at fault shall bear all of the tax liability. We are unaware of any actions that would result in a tax liability to us under the indemnity agreement regarding the spin-off transaction. We are aware that ATL was acquired in a transaction subsequent to the spin-off transaction, which could potentially result in the spin-off being treated as a taxable transaction, but which resulting tax liability in our view would be the sole responsibility of ATL pursuant to our agreement with ATL. ATL may refuse, however, to indemnify us for a tax liability arising out of the spin-off transaction or may argue that it did not cause the tax liability to be imposed. In such event, we may incur a significant expense for all or a portion of the taxes related to the spin-off.

Product liability and other claims initiated against us and product field actions could increase our costs, delay or reduce our sales and damage our reputation, adversely affecting our financial condition.

Our business exposes us to the risk of product liability, malpractice or warranty claims inherent in the sale and support of medical device products, including those based on claims that the use or failure of one of our products resulted in a misdiagnosis or harm to a patient. Such claims may cause financial loss, damage our reputation by raising questions about our products' safety and efficacy, and could interfere with our efforts to market our products. Although to date we have not been involved in any medical malpractice or product liability litigation, we may incur significant liability if such litigation were to occur. We may also face adverse publicity resulting from product field actions or regulatory proceedings brought against us. Although we currently

Table of Contents

maintain liability insurance in amounts we believe are commercially reasonable, any product liability we incur may exceed our insurance coverage. Liability insurance is expensive and may cease to be available on acceptable terms, if at all. A product liability or other claim or product field action not covered by our insurance or exceeding our coverage could significantly impair our financial condition. In addition, a product field action or a liability claim against us could significantly harm our reputation and make it more difficult to obtain the funding and commercial relationships necessary to maintain our business.

Our articles of incorporation, bylaws, rights plan and Washington law contain provisions that could discourage a change in control.

Certain provisions of our restated articles of incorporation and bylaws, our shareholder rights plan and Washington law would make it more difficult for a third party to acquire us, even if doing so would be beneficial for our shareholders. This could limit the price that certain investors might be willing to pay in the future for shares of our common stock. For example, certain provisions of our articles of incorporation or bylaws:

allow our board to issue preferred stock without any vote or further action by the shareholders;

limit the right of shareholders to act by written consent without a meeting;

eliminate cumulative voting in the election of directors by holders of our common stock; and

specify a minimum threshold for shareholders to call a special meeting.

We have adopted a shareholder rights plan, which is triggered upon commencement or announcement of a hostile tender offer or when any one person or group acquires 20% or more of our common stock. Once triggered, the rights plan would result in the issuance of preferred stock to the holders of our common stock other than the acquirer. In November 2007, we renewed this plan until April 5, 2013.

We are also subject to certain provisions of Washington law that could delay or make more difficult a merger, tender offer or proxy contest involving us. In particular, Chapter 23B.19 of the Washington Business Corporation Act prohibits corporations incorporated in Washington from engaging in certain business combinations with any interested shareholder for a period of five years unless specific conditions are met.

These provisions of our restated articles of incorporation, bylaws and rights plan and Washington law could have the effect of delaying, deferring or preventing a change in control of us, including, without limitation, discouraging a proxy contest or making more difficult the acquisition of a substantial block of our common stock. The provisions could also limit the price that investors might be willing to pay in the future for shares of our common stock.

Conversion of our convertible senior notes will dilute the ownership interest of shareholders at the time of conversion.

Upon conversion of some or all of our senior notes the ownership interests of shareholders may be diluted. Any sales in the public market of the common stock issuable upon such conversion could adversely affect prevailing market prices of our common stock. In addition, the existence of the senior notes may encourage short selling by market participants because the conversion of the notes could be used to satisfy short positions, or anticipated conversion of the notes into shares of our common stock could depress the price of our common stock.

In addition, if a fundamental change occurs, under certain circumstances we will adjust the conversion rate by a number of shares of our common stock for notes converted in connection with such fundamental change. The adjustment to the conversion rate will be determined based on the date on which the fundamental change becomes effective and the price paid per share of our common stock in such transaction, as described under the terms of the senior notes.

As more fully defined in the indenture applicable to the notes, a fundamental change will be deemed to have occurred upon the consummation of certain significant corporate transactions, including for example, the acquisition by one party or group of more than 50% of the voting power of our common equity, the consummation of certain recapitalizations, consolidations or mergers, the sale of all or substantially all of our assets, shareholder approval of our liquidation or dissolution, the failure of our common stock to be listed on any U.S. national securities exchange or a change in the composition of our board of directors as a result of which our incumbent directors, or directors appointed by our incumbent directors, do not constitute a majority of our board.

Sales of a significant number of shares of our common stock in the public markets, or the perception of such sales, could depress the market price of our common stock.

Sales of a substantial number of shares of our common stock or other equity-related securities in the public markets could depress the market price of our common stock, and impair our ability to raise capital through the sale of additional equity securities. We cannot predict the effect that future sales of our common stock or other equity-related securities would have on the market price of our common stock. The price of our common stock could be affected by possible sales of our common stock by investors who view the notes as a more attractive means of equity participation in our company and by hedging or arbitrage trading activity, which we expect to occur involving our common stock. This hedging or arbitrage could, in turn, affect the market price of our common stock.

Table of Contents

The convertible note hedge and warrant transactions associated with our convertible senior notes may affect the value of our common stock.

The convertible note hedge and warrant transactions associated with our convertible senior notes may affect the value of our common stock. In connection with the pricing of our convertible senior notes, we entered into a convertible note hedge transaction with an option counterparty. We also entered into a warrant transaction with this option counterparty. The convertible note hedge transaction covers approximately 42% of any converted notes, and is expected to reduce potential dilution to our common stock upon any such conversion. However, the warrant transaction could separately have a dilutive effect on our earnings per share to the extent that the market value per share of our common stock exceeds the applicable strike price of the warrants.

In connection with establishing its initial hedge of these transactions, the option counterparty or its affiliates:

entered into various derivative transactions with respect to our common stock concurrently with or shortly after the pricing of the notes; and

may enter into or unwind various derivative transactions with respect to our common stock and/or purchase or sell our common stock in secondary market transactions following the pricing of the notes (and would likely do so during any observation period related to the conversion of the notes).

These activities could have the effect of increasing or preventing a decline in the price of our common stock concurrently with or shortly after the pricing of the notes and during any observation period related to a conversion of the notes.

In addition, the option counterparty or its affiliates will likely modify its hedge position from time to time prior to conversion or maturity of the notes by purchasing and selling our common stock, other of our securities or other instruments it may wish to use in connection with such hedging. In particular, such hedging activity would likely occur during any observation period for a conversion of notes, which may have a negative effect on the value of the consideration received in relation to the conversion of those notes.

We intend to exercise options we hold under the convertible note hedge transaction whenever notes are converted. In order to unwind its hedge position with respect to those exercised options, the option counterparty or its affiliates would expect to sell shares of our common stock in secondary market transactions or unwind various derivative transactions with respect to our common stock during the observation period for the converted notes. We have also agreed to indemnify the option counterparties for losses incurred in connection with a potential unwinding of its hedge positions under certain circumstances.

The potential effect, if any, of any of these transactions and activities on the market price of our common stock will depend in part on market conditions and cannot be ascertained as of the date of this annual report. Any of these activities could adversely affect the price of our common stock and, as a result, the value of the consideration and the number of shares of our common stock, if any, that the noteholders would receive upon the conversion of the notes
