Item 1. Reports to Stockholders.

The Report to Shareholders is attached herewith.

FLAHERTY & CRUMRINE DYNAMIC PREFERRED AND INCOME FUND

To the Shareholders of Flaherty & Crumrine Dynamic Preferred and Income Fund:

Fiscal 2013 presented many challenges, but your Fund delivered respectable performance. As seen in the following table, total return on net asset value (NAV) was +3.5% for the fourth fiscal quarter² and -0.9% since the inception of the Fund in May 2013.

TOTAL RETURN ON NET ASSET VALUE FOR PERIODS ENDED NOVEMBER 30, 2013

(Unaudited)

	Actual Returns		
	Three Months	Six Months	Life of Fund ⁽¹⁾
Flaherty & Crumrine Dynamic Preferred and Income Fund	3.5%	-0.6%	-0.9%
Barclays Capital U.S. Aggregate Index ⁽²⁾	1.4%	-0.6%	-0.7%
S&P 500 Index ⁽³⁾	11.2%	11.9%	10.7%

(1) Since inception on May 29, 2013.

(2) The Barclays Capital U.S. Aggregate Index is an unmanaged index considered representative of the U.S. investment grade, fixed-rate bond market.

(3) The S&P 500 is a capitalization-weighted index of 500 common stocks. The index is designed to measure performance of the broad domestic economy through changes in the aggregate market value of 500 stocks representing all major industries.

Current performance may be lower or higher than the quoted past performance, which cannot guarantee future results. In addition, NAV performance will vary from market price performance, and you may have a taxable gain or loss when you sell your shares.

The table includes performance of two indices, Barclays Capital U.S. Aggregate and S&P 500 as proxies for bond and stock markets, respectively. While neither is a benchmark for Fund performance, they provide context for broad alternative-asset categories.

Total return based on market price of Fund shares was -3.8% for the quarter, even though total return on NAV was significantly better at +3.5%. For fiscal 2013, total return on market price was a disappointing -17.4%.

On December 11th, the Fund announced a special dividend of \$0.052 per share, in addition to increasing its regular monthly dividend to \$0.16. Moreover, we have tried to be proactive in making investments and using leverage to produce high, sustainable income for shareholders. The proof of the pudding is in the eating as of January 10, 2014 the current pre-tax monthly distribution rate on market price was 9.19%, and 55.9% of its 2013 dividends were characterized as qualified dividend income (with very favorable 15% and 20% tax rates).

¹ Following the methodology required by the SEC, total return assumes dividend reinvestment and includes income and principal change, plus the impact of the Fund's leverage and expenses.

² September 1 - November 30, 2013

Our outlook for the preferred market is guardedly positive. We expect economic growth will accelerate gradually, but further increases in interest rates will be measured and monetary policy will remain accommodative for some time to come. Financial companies, the largest component of the preferred universe, are now healthier and more transparent than any time in memory. Against this backdrop, preferred securities should remain attractive for long-term investors.

Between early May and mid-September, intermediate and long-term interest rates rose significantly, as investors expressed concern over looming changes in monetary policy at the Federal Reserve (for Fed watchers, the so-called tapering of quantitative easing). Since then, these rates are little changed. The economy is on a path of recovery, but data suggest tepid and uneven growth. At present, we believe interest rates are consistent with moderate acceleration of economic activity in 2014, although our outlook for growth is slightly below consensus.

Short term interest rates are still hovering near zero (the key rates being fed funds and LIBOR). We monitor these closely as they drive the Fund's cost of leverage. As the economy improves, these rates eventually will rise; however, we expect short-term interest rates to remain at or near current levels throughout 2014. And, we have locked in our leverage costs until December 2015 on a little more than 90% of our outstanding leverage. This fixed pricing provides comfort that increases in short-term interest rates will not immediately limit the Fund's ability to maintain its dividend level.

In addition to interest rates, regulatory developments remain center stage for the preferred market. A massive overhaul of rules and regulations overseeing banking and financial institutions is mostly complete, and implementation is well underway. We know with certainty preferred securities (in various forms) will continue to be a key component of capital for these industries. As rules are finalized, we gain a clearer sense about the types and amounts of preferred securities companies will likely utilize.

Many of the new rules are intended to keep companies from engaging in risky business practices that might lead to future crises. This will likely prove futile, as many risks are revealed only in hindsight. However, we believe the rules for reporting *will* result in greater transparency. Improved reporting makes the playing field more level, so the advantage will go to those who can make better decisions, rather than those receiving selective disclosure. And just maybe, markets will impose greater discipline on management. New rules also require financial companies to carry much more capital than before, which should make them more resilient in future downturns.

Our investment approach is simple to state and, hopefully, hard to replicate:

Produce in-depth, independent and objective credit research;

Dissect and analyze details of the securities in which we invest; and

Apply our long experience managing preferred securities portfolios to balance risks and returns revealed by those efforts.

It doesn't always work perfectly, but it has worked pretty well for more than thirty years.

In the section below, we dig deeper into topics mentioned here as well as others of interest to shareholders. In addition, we encourage you to visit the Fund's website, www.preferredincome.com for timely and important information.

Sincerely,

The Flaherty & Crumrine Portfolio Management Team:

R. Eric Chadwick

Donald F. Crumrine

Robert M. Ettinger

Bradford S. Stone

DISCUSSION TOPICS

(Unaudited)

The Fund's Portfolio Results and Components of Total Return on NAV

The table below reflects performance over both the recent six months and the Fund's fiscal year of each element comprising total return for the Fund, namely: (a) investing in a portfolio of securities; (b) possibly hedging that portfolio of securities against significant increases in long-term interest rates; and (c) utilizing leverage to enhance returns to shareholders. Next, we compute the impact of the Fund's operating expenses. All of the parts are summed to determine total return on NAV.

Components of DFP's Total Return on NAV

for Periods Ended November 30, 2013

	<i>Six Months⁽¹⁾</i>	<i>Life of Fund⁽¹⁾⁽²⁾</i>
Total Return on Unleveraged Securities Portfolio (including principal change and income)	-1.3%	-2.0%
Return from Interest Rate Hedging Strategy	N/A	N/A
Impact of Leverage (including leverage expense)	1.2%	1.6%
Expenses (excluding leverage expense)	-0.5%	-0.5%
<i>Total Return on NAV</i>	-0.6%	-0.9%

⁽¹⁾ Actual, not annualized.

⁽²⁾ Since inception on May 29, 2013.

For comparison, the following table displays returns over the same time periods on three indices compiled by Bank of America Merrill Lynch, reflecting various segments of the preferred securities market. Because these index returns exclude all expenses and the impact of leverage, they compare most directly to the top line in the Fund's performance table above (Total Return on Unleveraged Securities Portfolio).

Total Returns of Bank of America Merrill Lynch Preferred Securities Indices*

for Periods Ended November 30, 2013

	<i>Six Months⁽¹⁾</i>	<i>Life of Fund⁽¹⁾⁽²⁾</i>
BofA Merrill Lynch 8% Capped DRD Preferred Stock Index SM	-6.5%	-7.9%
BofA Merrill Lynch 8% Capped Hybrid Preferred Securities Index SM	-4.4%	-5.3%
BofA Merrill Lynch 8% Capped Corporate U.S. Capital Securities Index SM	-1.1%	-1.5%

* The Bank of America Merrill Lynch 8% Capped DRD Preferred Stock IndexSM (P8D0) includes investment grade preferred securities issued by both corporations and government agencies that qualify for the corporate dividend received deduction with issuer concentration capped at a maximum of 8%. The Bank of America Merrill Lynch 8% Capped Hybrid Preferred Securities IndexSM (P8HO) includes taxable, fixed-rate, U.S. dollar-denominated investment-grade, preferred securities listed on a U.S. exchange with issuer concentration capped at 8%. The Bank of America Merrill Lynch 8% Capped Corporate U.S. Capital Securities IndexSM (C8CT) includes investment grade fixed rate or fixed-to-floating rate \$1,000 par securities that receive some degree of equity credit from the rating agencies or their regulators with issuer concentration capped at a maximum of 8%. All index returns include interest and dividend income, but, unlike the Fund's returns, are unmanaged and do not reflect any expenses.

⁽¹⁾ Actual, not annualized.

⁽²⁾ Since Fund's inception on May 29, 2013.

Over both the past six-month period and the slightly longer time period since the Fund's inception in late-May 2013, its (unleveraged) securities portfolio beat two and slightly underperformed the third of the three preferred market indices shown above. While the total return on the unleveraged securities portfolio was slightly negative during both time periods, the Fund's total return on NAV, which includes the impact of leverage, was actually less negative. Although leverage typically reduces returns during periods of adverse market conditions, the timing of implementing leverage benefited the Fund's return on NAV over both these time periods.

Total Return on Market Price of Fund Shares

While our focus is primarily on managing the Fund's investment portfolio, our shareholders' actual return is comprised of the Fund's monthly dividend payments *plus* changes in its *market price*. During the period since the Fund's inception in late-May 2013 through November 30, 2013, total return on market price of Fund shares declined by 17.4% as the Fund's market-price premium to NAV declined to a discount.

In a more perfect world, the market price of Fund shares and its NAV, as shown in the above chart, would track more closely. If so, the resulting premium or discount of the Fund, calculated as the difference between these two inputs and expressed as a percentage, would remain relatively close to zero. However, as can be seen in the chart below, this has not been the case. Clearly, it hasn't been a perfect world for DFP since the Fund's inception in late-May 2013. Just prior to the Fund beginning trading, Chairman Bernanke announced that the Federal Reserve was considering scaling back its latest program of Quantitative Easing, and virtually all U.S. dollar-denominated fixed-income securities suffered price declines over the next several months. The Fund was no exception, as its market price that had been trading at a premium to NAV swung to a low double-digit discount. While following the end of the Fund's fiscal year that discount has narrowed some, it remains close to double-digit levels.

Although divergence between NAV and market price of a closed-end fund is generally driven by supply/demand imbalances affecting its market price, we can only speculate about why the relationship between the Fund's market price and NAV hasn't been closer.

Based on a closing price of \$20.53 on December 31st, the current annualized yield on market price of Fund shares (assuming its new monthly distribution of \$0.16 does not change) is 9.35%. In our opinion, this distribution rate measures up favorably with most comparable fixed-income investment opportunities.

Preferred Market Conditions

Three factors dominated the preferred market in 2013 – credit quality, market size and interest rates. Since the depths of the financial crisis in 2008/09, improving credit quality and contraction in market size have boosted the preferred market. More recently, the market has been battered by concerns over rising interest rates as the economy strengthens.

We focus on companies in financial industries such as banking and insurance because they are the dominant issuers of preferred securities, and of course comprise the bulk of the Fund's investments. The nature of preferred capital, subordinated to debt but not dilutive like equity, makes it particularly useful to regulated companies in these more-leveraged industries.

The financial crisis exposed unwise and risky practices at many financial companies, with several getting swallowed up or shut down. But well-managed companies also paid a steep price for the sins of the few. In the U.S., the Dodd-Frank Financial Regulatory Reform Bill, the most sweeping regulatory change in decades, dramatically altered the way all financial companies operate. Similar changes are being made abroad. The new rules restrict certain risky activities and force companies to have more skin in the game. In our view, these changes (along with increased transparency) have improved fundamental credit quality.

Among other things, financial companies must alter the amount and tenor of preferred capital they issue. Most trust preferred issues have been redeemed, frequently replaced with new issues structured to satisfy requirements of the new rules. As is often the case, what's old is new again – traditional perpetual, non-cumulative preferred stock is once again being issued by domestic banks. Many of these new issues fit nicely in the Fund's portfolio.

Non-US banks have been utilizing a newer structure, generically-called contingent-capital securities (CoCo). These typically mandate principal be written down or wiped out if certain financial thresholds are breached. So far, we have adopted a wait and see attitude on CoCo securities; a repeat of the financial crisis, real or perceived, may impact this structure more harshly than others.

The jump in intermediate and long term interest rates this the past summer resulted in price declines for most fixed-income securities, including preferreds. Although interest rates have been relatively stable in recent months, some interesting anomalies have developed in the preferred market.

With equity markets at or near all-time highs, some investors chose to take money off the table and sell appreciated stocks. For some, realizing gains creates tax liabilities. Strategies to reduce this tax bill usually start with realizing losses, if available, on other portfolio holdings.

We believe the poorer performing preferred securities were targeted for tax-loss selling, and in turn, lower prices led to more selling. This is nothing new, a phenomenon we ve seen before; we ll do our best to take advantage of the opportunity.

Monthly Distributions to Fund Shareholders

Fiscal-year 2013 presented many challenges related to interest rates and valuations of preferred securities, but income continues to be a very bright spot for the Fund. Conditions have been near ideal for generating high current income attractive yields on preferred securities owned by the Fund combined with historically low rates for leverage used in our strategy.

If there is a silver lining to market weakness that began in early summer, it is that higher rates and wider spreads all but stopped issuer redemptions during the second half of the year. Market weakness allowed the Fund to invest a good portion of the portfolio at these higher yields.

The combination of these factors resulted in positive dividend actions in December. First, the Fund made a *special* distribution of income in December of \$0.052 per share. Second, the Fund increased the *regular* monthly dividend by 2.6% to \$0.16 per share beginning with the December dividend. For calendar year 2013, total distributions to shareholders (including the special distribution) were 5.5% higher than the sum of ordinary monthly distributions during the year.

When it comes to projecting income available to shareholders in future years, the elephant in the room is the expected cost of leverage. The use of leverage is an important part of the Fund s strategy for producing high current income, and we could not produce the Fund s current level of income without it. We expect leverage costs will remain low into 2015, and maybe longer, given our economic outlook and guidance from the Federal Reserve.

We fixed the cost on 92.8% of the leverage balance¹ for a period of two years beginning in December, 2013. The remaining part of the balance (and any increase in leverage balance) will continue to be at a variable rate, as it was before, at 3-month LIBOR +0.75% (reset quarterly). Fixing most of the leverage cost will remove some of the uncertainty around the level of distributions over the next couple of years.

We want shareholders to understand the Fund s strategy for producing high current income, including risk factors that affect distribution rates both positive and negative. We believe the Fund s strategy of investing in preferred securities and using leverage in an efficient manner will continue to produce a competitive distribution rate for shareholders.

¹ Fixed the rate at 1.19% on \$205 million out of \$221 million of total leverage balance as of the date of the fixing.

Economic Conditions

The U.S. economy strengthened in the second half of the year and appears to be on solid footing heading into 2014. Inflation-adjusted gross domestic product (real GDP) should post about 3% annualized growth in 2013's second half after rising just 1.8% in the first half. Private economists forecast real GDP growth of 2.6% in 2014; the Federal Reserve is more optimistic, expecting 2.8-3.2% growth.

The economic outlook remains mixed but mostly improving. Job gains have accelerated in recent months, and wages are slowly picking up. However, consumers continue to deleverage and pay down debt, restraining consumption. Housing remains a bright spot that should add to economic growth despite higher mortgage rates. Business investment should improve a bit, and government spending should be less of a drag on growth in 2014 than it was last year. Finally, global economic growth is improving, although recovery remains fragile in Europe and a number of developing countries.

On balance, we expect 2.2-2.5% real GDP growth in 2014, slower than the Fed's relatively optimistic outlook. For monetary policy, moderate growth means no rate hikes and only gradual reductions in securities purchases this year—an outlook that appears largely incorporated into current prices. Long-term interest rates should drift higher, but further rate increases are likely to be modest. We are mindful, however, that there may be periodic growth scares that could push rates upward quickly; investors should be prepared for volatility in 2014.

More positively, credit conditions continue to improve. A growing economy, lower leverage and stronger balance sheets mean better fundamental credit quality for preferred securities, and we foresee this improvement continuing for some time to come. We expect yield spreads on preferred securities to narrow over time.

Putting this together, we expect returns on preferred securities to be coupon or coupon minus in 2014 rather than coupon plus experienced from 2009-2012. However, despite this more challenging market environment, we believe preferred securities remain attractive relative to short-duration bond alternatives, and investors should return to them as fears of rapidly rising interest rates subside.

Hedging Interest Rate Risk

The Fund can employ hedging strategies to protect against rising interest rates. As described above, the Fund has fixed the cost of most of its borrowings for two years. It can also hedge some or all of its holdings of preferred securities. So far, we have decided not to hedge the Fund's securities holdings. We think shareholders should understand why we have made those decisions.

We assess three main factors when making hedging decisions. First, correlation between preferred securities and the Fund's hedging instruments (Treasury bond futures, interest rate swaps, and options on both) needs to be sufficiently positive that we can have reasonable confidence the value of a hedge position will increase when preferred securities' prices decrease. From early in the financial crisis until spring of 2013, prices of preferred securities were at best loosely correlated to Treasuries. Beginning in early May, however, correlation increased substantially, and we now can be reasonably confident that an interest-rate hedging strategy would, in fact, be a hedge rather than just a bet on higher long-term Treasury rates.

Second, we need to consider the cost of hedging. In the case of hedging the Fund's leverage, we were able to fix leverage cost for two years for only slightly more than the current cost of floating-rate borrowing. Although short-term interest rates probably will not rise much over the next two years, there is risk they could, and we were able to substantially reduce that risk at a small cost.

It's a different story for long-term interest rates. Currently, the Treasury yield curve is steep (approaching 400 basis points from overnight to 30 years), and option prices are also high. Given our outlook for only moderate economic growth, we believe markets have priced in a larger increase in interest rates than we are likely to experience. We may be wrong about that, but rates would have to rise quite substantially from current levels for hedging to be profitable, given what is already priced into today's yield curve.

Finally, we consider valuation on preferred securities. We believe yields on preferred securities, currently in a range of 6.75-7.25% (with outliers on either side), are attractive compared to a 4% long-bond yield (roughly its yield on December 31, 2013) and even compared to Treasuries at 5%, if and when they get there. Spreads of 300 basis points over Treasuries provide substantial protection against higher rates.

We are monitoring hedge alternatives closely and will consider hedging if circumstances warrant it. For now, we think costs of hedging the impact of changes in long-term interest rates on the Fund's preferred securities portfolio outweigh any benefits.

Federal Tax Advantages of 2013 Calendar Year Distributions

In calendar year 2013, approximately 55.9% of distributions made by the Fund was eligible for treatment as qualified dividend income, or QDI. For taxpayers in the 15% marginal tax bracket, QDI is taxed by the federal government at 0% instead of an individual's ordinary income tax rate; for taxpayers in the 25%-35% marginal tax brackets, QDI is taxed at 15%; and for taxpayers in the 39.6% marginal tax bracket, QDI is taxed at 20%.

For an individual in the 28% marginal tax bracket, this means that the Fund's total distributions will only be taxed at a blended 20.7% rate versus the 28% rate which would apply to distributions by a fund investing in traditional corporate bonds. This tax advantage means that, all other things being equal, such an individual who held 100 shares of Common Stock of the Fund for the calendar year would have had to receive approximately \$103 in distributions from a fully-taxable bond fund to net the same after-tax amount as the \$94 in distributions paid by the Fund.

For detailed information about tax treatment of particular distributions received from the Fund, please see the Form 1099 you receive from either the Fund or your broker.

Corporate shareholders also receive a federal tax benefit from the 22.6% distributions that were eligible for the inter-corporate dividends received deduction, or DRD.

It is important to remember that composition of the portfolio and income distributions can change from one year to the next, and that the QDI or DRD portions of 2014's distributions may not be the same (or even similar) to 2013.

FINANCIAL HIGHLIGHTS

For a Common Stock share outstanding throughout the period

Contained below is per share operating performance data, total investment returns, ratios to average net assets and other supplemental data. This information has been derived from information provided in the financial statements and market price data for the Fund's shares.

	For the period from May 29, 2013⁽¹⁾ through November 30, 2013
PER SHARE OPERATING PERFORMANCE:	
Net asset value, beginning of period	\$ 23.83 ⁽²⁾
INVESTMENT OPERATIONS:	
Net investment income	0.72
Net realized and unrealized gain/(loss) on investments	(1.02)
Total from investment operations	(0.30)
DISTRIBUTIONS TO COMMON STOCK SHAREHOLDERS:	
From net investment income	(0.78)
Total distributions to Common Stock Shareholders	(0.78)
Net asset value, end of period	\$ 22.75
Market value, end of period	\$ 19.89
Total investment return based on net asset value ^{*(3)}	(0.93%) ^{***}
Total investment return based on market value ^{*(3)}	(17.44%) ^{***}
RATIOS TO AVERAGE NET ASSETS AVAILABLE TO COMMON STOCK SHAREHOLDERS:	
Total net assets, end of period (in 000's)	435,749
Operating expenses including interest expense ⁽⁴⁾	1.47%**
Operating expenses excluding interest expense	1.06%**
Net investment income	6.29%**
SUPPLEMENTAL DATA:	
Portfolio turnover rate	10% ^{***}
Total managed assets, end of period (in 000's)	656,749
Ratio of operating expenses including interest expense ⁽⁴⁾	1.07%**
Ratio of operating expenses excluding interest expense	0.77%**

* Assumes reinvestment of distributions at the price obtained by the Fund's Dividend Reinvestment and Cash Purchase Plan.

** Annualized.

*** Not Annualized.

The net investment income ratios reflect income net of operating expenses, including interest expense.

Information presented under heading Supplemental Data includes loan principal balance.

(1) Commencement of operations.

(2) Net asset value at beginning of period reflects the deduction of the sales load of \$1.125 per share and offering costs of \$0.05 per share paid by the shareholder from the \$25.00 offering price.

Edgar Filing: Flaherty & Crumrine Dynamic Preferred & Income Fund Inc - Form N-CSR

- (3) Total return on net asset value is calculated assuming a purchase at the offering price of \$25.00 on the inception date of trading (May 29, 2013) less the sales load of \$1.125 and offering costs of \$0.05 and the ending net asset value per share. Total return on market value is calculated assuming a purchase at the offering price of \$25.00 on the inception date of trading (May 29, 2013) and the sale at the current market price on the last day of the period. Total return on net asset value and total return on market value are not computed on an annualized basis.
- (4) See Note 8.

The accompanying notes are an integral part of the financial statements.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

FINANCIAL HIGHLIGHTS (Continued)

Per Share of Common Stock

	Total Dividends Paid	Net Asset Value	NYSE Closing Price	Dividend Reinvestment Price⁽¹⁾
May 31, 2013	N/A	\$ 23.76	\$ 25.00	N/A

November 29, 2013	0.156	22.75	19.89	19.85

⁽¹⁾ Whenever the net asset value per share of the Fund's Common Stock is less than or equal to the market price per share on the reinvestment date, new shares issued will be valued at the higher of net asset value or 95% of the then current market price. Otherwise, the reinvestment shares of Common Stock will be purchased in the open market.

Senior Securities

	11/30/2013
Total Debt Outstanding, End of Period (000s) ⁽¹⁾	221,000
Asset Coverage per \$1,000 of Debt ⁽²⁾	2,972

⁽¹⁾ See Note 8.

⁽²⁾ Calculated by subtracting the Fund's total liabilities (excluding the loan) from the Fund's total assets and dividing that amount by the loan outstanding in 000's.

The accompanying notes are an integral part of the financial statements.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS

1. Organization

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated (the Fund) was incorporated as a Maryland corporation on October 10, 2012, and commenced operations on May 29, 2013 as a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the 1940 Act). The Fund's investment objective is to seek total return, with an emphasis on high current income.

2. Significant Accounting Policies

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of the financial statements is in conformity with U.S. generally accepted accounting principles (U.S. GAAP) and requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities in the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

Portfolio valuation: The net asset value of the Fund's Common Stock is determined by the Fund's Administrator daily in accordance with the policies and procedures approved by the Board of Directors of the Fund. It is determined by dividing the value of the Fund's net assets available to Common Stock by the number of shares of Common Stock outstanding. The value of the Fund's net assets available to Common Stock is deemed to equal the value of the Fund's total assets less (i) the Fund's liabilities and (ii) the aggregate liquidation value of any outstanding preferred stock.

The Fund's preferred and debt securities are valued on the basis of current market quotations provided by independent pricing services or dealers approved by the Board of Directors of the Fund. Each quotation is based on the mean of the bid and asked prices of a security. In determining the value of a particular preferred or debt security, a pricing service or dealer may use information with respect to transactions in such investments, quotations, market transactions in comparable investments, various relationships observed in the market between investments, and/or calculated yield measures based on valuation technology commonly employed in the market for such investments. Common stocks that are traded on stock exchanges are valued at the last sale price or official close price on the exchange, as of the close of business on the day the securities are being valued or, lacking any sales, at the last available mean price. Futures contracts and option contracts on futures contracts are valued on the basis of the settlement price for such contracts on the primary exchange on which they trade. Investments in over-the-counter derivative instruments, such as interest rate swaps and options thereon (swaptions), are valued using prices supplied by a pricing service, or if such prices are unavailable, prices provided by a single broker or dealer that is not the counterparty or, if no such prices are available, at a price at which the counterparty to the contract would repurchase the instrument or terminate the contract. Investments for which market quotations are not readily available or for which management determines that the prices are not reflective of current market conditions are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including reference to valuations of other securities which are comparable in quality, maturity and type.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

Investments in money market instruments and all debt and preferred securities which mature in 60 days or less are valued at amortized cost. Investments in money market funds are valued at the net asset value of such funds.

Fair Value Measurements: The Fund has performed an analysis of all existing investments and derivative instruments to determine the significance and character of all inputs to their fair value determination. The levels of fair value inputs used to measure the Fund's investments are characterized into a fair value hierarchy. Where inputs for an asset or liability fall into more than one level in the fair value hierarchy, the investment is classified in its entirety based on the lowest level input that is significant to that investment's valuation. The three levels of the fair value hierarchy are described below:

Level 1 quoted prices in active markets for identical securities

Level 2 other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. Transfers in and out of levels are recognized at market value at the end of the period. A summary of the inputs used to value the Fund's investments as of November 30, 2013 is as follows:

	Total Value at November 30, 2013	Level 1 Quoted Price	Level 2 Significant Observable Inputs	Level 3 Significant Unobservable Inputs
Preferred Securities				
Banking	\$ 319,078,353	\$ 214,844,073	\$ 104,234,280	\$
Financial Services	11,188,270	11,188,270		
Insurance	207,726,111	126,560,318	81,165,793	
Utilities	33,190,468	22,482,028	10,708,440	
Energy	19,482,358	6,294,954	13,187,404	
Real Estate Investment Trust (REIT)	40,005,945	40,005,945		
Miscellaneous Industries	3,953,775		3,953,775	
Corporate Debt Securities	8,913,135	8,154,856	758,279	
Money Market Fund	5,361,824	5,361,824		
Total Investments	\$ 648,900,239	\$ 434,892,268	\$ 214,007,971	\$

During the reporting period, securities with an aggregate market value of \$20,096,125 were transferred into Level 1 from Level 2. During the reporting period, securities with an aggregate market value of \$7,964,316 were transferred into Level 2 from Level 1. The securities were transferred because of a reduction in the amount of observable market data, resulting from: a decrease in market activity for the securities, reduced availability of quoted prices for the securities, or de-listing of securities from a national securities exchange that resulted in a material decrease in activity.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

The fair values of the Fund's investments are generally based on market information and quotes received from brokers or independent pricing services approved by the Board and unaffiliated with the Adviser. To assess the continuing appropriateness of security valuations, management, in consultation with the Adviser, regularly compares current prices to prior prices, prices across comparable securities, actual sale prices for securities in the Fund's portfolio, and market information obtained by the Adviser as a function of being an active participant in the markets.

Securities with quotes that are based on actual trades or actionable bids and offers with a sufficient level of activity on or near the measurement date are classified as Level 1. Securities that are priced using quotes derived from implied values, indicative bids and offers, or a limited number of actual trades or the same information for securities that are similar in many respects to those being valued are classified as Level 2. If market information is not available for securities being valued, or materially-comparable securities, then those securities are classified as Level 3. In considering market information, management evaluates changes in liquidity, willingness of a broker to execute at the quoted price, the depth and consistency of prices from pricing services, and the existence of observable trades in the market.

Securities transactions and investment income: Securities transactions are recorded as of the trade date. Realized gains and losses from securities sold are recorded on the specific identified cost basis. Dividend income is recorded on ex-dividend dates. Interest income is recorded on the accrual basis. The Fund also amortizes premiums and accretes discounts on fixed income securities using the effective yield method.

Options: Purchases of options are recorded as an investment, the value of which is marked-to-market at each valuation date. When the Fund enters into a closing sale transaction, the Fund will record a gain or loss depending on the difference between the purchase and sale price.

When the Fund writes an option, an amount equal to the premium received by the Fund is recorded as a liability, the value of which is marked-to-market at each valuation date. When a written option expires, the Fund realizes a gain equal to the amount of the premium originally received. When the Fund enters into a closing purchase transaction, the Fund realizes a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option is eliminated. When a call option is exercised, the Fund realizes a gain or loss from the sale of the underlying security and the proceeds from such sale are increased by the amount of the premium originally received. When a put option is exercised, the amount of the premium originally received will reduce the cost of the security which the Fund purchased upon exercise.

Repurchase agreements: The Fund may engage in repurchase agreement transactions. The Adviser reviews and approves the eligibility of the banks and dealers with which the Fund may enter into repurchase agreement transactions. The value of the collateral underlying such transactions is at least equal at all times to the total amount of the repurchase obligations, including interest. The Fund maintains possession of the collateral through its custodian and, in the event of counterparty default, the Fund has the right to use the collateral to offset losses incurred. There is the possibility of loss to the Fund in the event the Fund is delayed or prevented from exercising its rights to dispose of the collateral securities.

Federal income taxes: The Fund intends to continue to qualify as a regulated investment company by complying with the requirements under subchapter M of the Internal Revenue Code of 1986, as amended,

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

applicable to regulated investment companies and intends to distribute substantially all of its taxable net investment income to its shareholders. Therefore, no federal income tax provision is required.

Management has analyzed the Fund's tax positions, and has concluded that no provision for federal income tax is required in the Fund's financial statements. The Fund's major tax jurisdictions are federal and California. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

Dividends and distributions to shareholders: The Fund expects to declare dividends on a monthly basis to shareholders of Common Stock (Shareholders). Distributions to Shareholders are recorded on the ex-dividend date. Any net realized short-term capital gains will be distributed to Shareholders at least annually. Any net realized long-term capital gains may be distributed to Shareholders at least annually or may be retained by the Fund as determined by the Fund's Board of Directors. Capital gains retained by the Fund are subject to tax at the capital gains corporate tax rate. Subject to the Fund qualifying as a regulated investment company, any taxes paid by the Fund on such net realized long-term capital gains may be used by the Fund's Shareholders as a credit against their own tax liabilities. The Fund may pay distributions in excess of the Fund's net investment company taxable income and this excess would be a tax-free return of capital distributed from the Fund's assets.

Income and capital gain distributions are determined and characterized in accordance with income tax regulations which may differ from U.S. GAAP. These differences are primarily due to (1) differing treatments of income and gains on various investment securities held by the Fund, including timing differences, (2) the attribution of expenses against certain components of taxable investment income, and (3) federal regulations requiring proportionate allocation of income and gains to all classes of shareholders.

Distributions from net realized gains for book purposes may include short-term capital gains, which are included as ordinary income for tax purposes, and may exclude amortization of premium and discount on certain fixed income securities, which are not reflected in ordinary income for tax purposes. The tax character of distributions paid during 2013 was as follows:

Distributions paid in fiscal year 2013		
	Ordinary Income	Long-Term Capital Gains
Common Stock	\$14,942,290	\$0

As of November 30, 2013, the components of distributable earnings (i.e., ordinary income and capital gain/loss) available to Shareholders, on a tax basis, were as follows:

Capital (Loss) Carryforward	Undistributed Ordinary Income	Undistributed Long-Term Gain	Net Unrealized Appreciation/(Depreciation)
\$(1,122,554)	\$1,276,248	\$0	\$(20,455,496)

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

The composition of the Fund's accumulated realized capital losses is indicated below. These losses may be carried forward and offset against future capital gains through the dates listed below.

No Expiration	No Expiration	
Short Term	Long Term	Total
\$1,122,554	\$0	\$1,122,554

Reclassification of accounts: During the year ended November 30, 2013, reclassifications were made in the Fund's capital accounts to report these balances on a tax basis, excluding temporary differences, as of November 30, 2013. Additional adjustments may be required in subsequent reporting periods. These reclassifications have no impact on the net asset value of the Fund. The calculation of net investment income per share in the financial highlights excludes these adjustments. Below are the reclassifications:

Paid-in Capital	Undistributed Net Investment Income	Accumulated Net Realized Gain on Investments
\$32,884	\$1,794,262	\$(1,827,146)

Excise tax: The Internal Revenue Code of 1986, as amended, imposes a 4% nondeductible excise tax on the Fund to the extent the Fund does not distribute by the end of any calendar year at least (1) 98% of the sum of its net investment income for that year and 98.2% of its capital gains (both long-term and short term) for its fiscal year and (2) certain undistributed amounts from previous years. The Fund is subject to a payment of \$909 of federal excise taxes attributed to calendar year 2013.

3. Derivative Instruments

The Fund intends to use derivatives primarily to economically hedge against risks in the portfolio, namely interest rate risk and credit risk. The Fund may use options on treasury futures contracts for the purpose of economically hedging against a significant increase in long-term interest rates. If the strategy is employed, the Fund would purchase put options on treasury futures contracts that would increase in value if long-term interest rates increased significantly, offsetting some of the related decline in portfolio asset values. The Fund may also purchase and write call options on treasury futures contracts to supplement the put option strategy and also to reduce the overall cost of the interest rate hedge (by earning premiums from the net sale of call options).

The Fund has the authority to use other derivatives for hedging or to increase expected return, but has not employed any of these derivatives to-date and does not anticipate broad use of these derivatives in the near future (although this may change without advance notice). Other approved derivatives strategies include: buying and selling credit default swaps, interest rate swaps and options thereon (swaptions), and options on securities. Accounting policies for specific derivatives, including the location of these items in the financial statements, are included in Note 2 as appropriate. No assurance can be given that such use of derivatives will achieve their desired purposes or, in the case of hedging, will result in an overall reduction of risk to the Fund.

The Fund did not use any derivatives during the year ended November 30, 2013.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

Options on Financial Futures Contracts: When the interest rate hedging strategy is employed, the Fund intends to use options on financial futures contracts in much the same way as described above. The risk associated with purchasing options, and therefore the maximum loss the Fund would incur, is limited to the purchase price originally paid. The risk in writing a call option is that the Fund may forego the opportunity for profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised.

4. Investment Advisory Fee, Administration Fee, Transfer Agent Fee, Custodian Fee, Directors Fees and Chief Compliance Officer Fee

Flaherty & Crumrine Incorporated (the Adviser) serves as the Fund's investment adviser. The Fund pays the Adviser a monthly fee at an annual rate of 0.575% of the Fund's average daily managed assets up to \$200 million and 0.50% of the Fund's average daily managed assets of \$200 million or more. For purposes of calculating such a fee managed assets means the Fund's net assets, plus the principal amount of loans from financial institutions or debt securities issued by the Fund, the liquidation preference of preferred stock issued by the Fund, if any, and the proceeds of any reverse repurchase agreements entered into by the Fund.

Destra Capital Investments LLC (the Servicing Agent) serves as the Fund's shareholder servicing agent. As compensation for its services, the Fund pays the Servicing Agent a fee computed and paid monthly at the annual rate of 0.12% of the Fund's average daily net assets through the first year of the Fund's agreement with the Servicing Agent and 0.10% of the Fund's average daily net assets for the remainder of the term of the agreement. For these purposes, Average Net Assets are the average daily net assets available to the Fund's common shareholders.

BNY Mellon Investment Servicing (US) Inc. (BNY Mellon) serves as the Fund's administrator (the Administrator). As Administrator, BNY Mellon calculates the net asset value of the Fund's shares attributable to Common Stock and generally assists in all aspects of the Fund's administration and operation. As compensation for BNY Mellon's services as Administrator, the Fund pays BNY Mellon a monthly fee at an annual rate of 0.10% of the first \$200 million of the Fund's average daily total managed assets, 0.04% of the next \$300 million of the Fund's average daily total managed assets, 0.03% of the next \$500 million of the Fund's average daily total managed assets and 0.02% of the Fund's average daily total managed assets above \$1 billion. For purposes of calculating such fee, the Fund's total managed assets means the total assets of the Fund (including any assets attributable to any Fund auction rate preferred stock that may be outstanding or otherwise attributable to the use of leverage) minus the sum of accrued liabilities (other than debt, if any, representing financial leverage).

BNY Mellon also serves as the Fund's Common Stock dividend-paying agent and registrar (the Transfer Agent). As compensation for BNY Mellon's services as Transfer Agent, the Fund pays BNY Mellon a monthly fee in the amount of \$1,500.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

The Bank of New York Mellon (the Custodian) serves as the Fund's Custodian. As compensation for the Custodian's services as custodian, the Fund pays the Custodian a monthly fee at the annual rate of 0.01% of the first \$200 million of the Fund's average daily total managed assets, 0.008% of the next \$300 million of the Fund's average daily total managed assets, 0.006% of the next \$500 million of the Fund's average daily total managed assets and 0.005% of the Fund's average daily total managed assets above \$1 billion. For purposes of calculating such fee, the Fund's total managed assets means the total assets of the Fund (including any assets attributable to any Fund auction rate preferred stock that may be outstanding or otherwise attributable to the use of leverage) minus the sum of accrued liabilities (other than debt, if any, representing financial leverage).

The Fund currently pays each Director who is not a director, officer or employee of the Adviser a fee of \$9,000 per annum, plus \$750 for each in-person meeting of the Board of Directors or Audit Committee, \$500 for each in-person meeting of the Nominating Committee, and \$250 for each telephone meeting. The Audit Committee Chairman receives an additional annual fee of \$3,000. The Fund also reimburses all Directors for travel and out-of-pocket expenses incurred in connection with such meetings.

The Fund currently pays the Adviser a fee of \$35,000 per annum for Chief Compliance Officer services and reimburses out-of-pocket expenses incurred in connection with providing services in this role.

5. Purchases and Sales of Securities

For the year ended November 30, 2013, the cost of purchases and proceeds from sales of securities, excluding short-term investments, aggregated \$719,874,177 and \$54,521,048, respectively.

At November 30, 2013, the aggregate cost of securities for federal income tax purposes was \$669,355,735, the aggregate gross unrealized appreciation for all securities in which there is an excess of value over tax cost was \$2,610,434 and the aggregate gross unrealized depreciation for all securities in which there is an excess of tax cost over value was \$20,455,496.

6. Common Stock

At November 30, 2013, 240,000,000 shares of \$0.01 par value Common Stock were authorized. At November 30, 2013, there were 19,156,782 shares of Common Stock issued and outstanding.

Organization Expenses and Costs of the Common Stock Offering: Organization expenses relating to organizing the Fund of \$86,350 have been paid by the Adviser. Costs of the Common Stock offering were estimated to be approximately \$957,629. The Adviser has also agreed to pay offering costs (excluding sales charges) that exceed \$0.05 per share. Costs of the Common Stock offering up to \$0.05 per share and sales charges will be borne by the Fund and its shareholders and are accounted for as a reduction to paid-in capital. Based on the initial offering of 18,000,000 shares, and the subsequent offering of 1,152,584 shares through exercise of the underwriter's over-allotment option in connection with the initial offering, \$957,629 of the offering costs will be borne by the Fund.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

Common Stock transactions are reflected in the following table:

	Year Ended 11/30/13 (Fund Inception to Date)			
	Shares	Gross Amount	Sales Load	Net Amount
Beginning Capitalization	4,198	\$ 100,017	\$	\$ 100,017
Initial Public Offering on 05/29/13	18,000,000	450,000,000	20,250,000	429,750,000
Shares offered through exercise of Underwriters over-allotment option on 07/08/13	1,152,584	28,814,600	1,296,657	27,517,943
Total	19,156,782	\$ 478,914,617	\$ 21,546,657	\$ 457,367,960

7. Preferred Stock

The Fund has the authority to issue 10,000,000 shares of \$0.01 par value preferred stock. The Fund does not currently have any issued and outstanding shares of preferred stock.

8. Committed Financing Agreement

The Fund has entered into a committed financing agreement (Financing Agreement) that allows the Fund to borrow on a secured basis, which the Fund uses in the normal course of business as financial leverage. Such leveraging tends to magnify both the risks and opportunities to Shareholders. As of November 30, 2013, the committed amount, and amount borrowed, under the Financing Agreement was \$221 million, respectively.

The lender charges an annualized rate of 0.65% on the undrawn (committed) balance, and three-month LIBOR (reset quarterly) plus 0.75% on the drawn (borrowed) balance. For the year ended November 30, 2013, the daily weighted average annualized interest rate on the drawn balance was 1.01% and the average daily loan balance was \$196,450,980. LIBOR rates may vary in a manner unrelated to the income received on the Fund's assets, which could have either a beneficial or detrimental impact on net investment income and gains available to Shareholders.

Subsequent to the reporting period, effective on December 13, 2013, the Fund fixed the cost on \$205 million of the leverage balance at a rate of 1.19% for a period of two years. The remaining leverage balance (and any increase in leverage balance) will continue to be at a variable rate, as described above.

The Fund is required to meet certain asset coverage requirements under the Financing Agreement and under the 1940 Act. In accordance with the asset coverage requirements, at least two-thirds of the Fund's assets are expected to be pledged as collateral assuming the full committed amount is drawn. Securities pledged as collateral are identified in the portfolio of investments. If the Fund fails to meet these requirements, or maintain other financial covenants required under the Financing Agreement, the Fund may be required to repay immediately, in part or in full, the amount borrowed under the Financing Agreement. Additionally, failure to meet the foregoing requirements or covenants could restrict the Fund's ability to pay

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

NOTES TO FINANCIAL STATEMENTS (Continued)

dividends to Shareholders and could necessitate sales of portfolio securities at inopportune times. The Financing Agreement has no stated maturity, but may be terminated by either party without cause with six months' advance notice.

Under the terms of the Financing Agreement, the lender has the ability to borrow a portion of the securities pledged as collateral against the loan (Rehypothecated Securities), subject to certain limits. The Fund receives a fee from the lender in connection with any Rehypothecated Securities. The Fund may recall any Rehypothecated Security at any time and the lender is required to return the security in a timely fashion. In the event the lender does not return the security, the Fund will have the right to, among other things, apply and set off an amount equal to 100% of the then-current fair market value of such Rehypothecated Securities against any loan amounts owed to the lender under the Financing Agreement. Rehypothecated Securities are marked-to-market daily and adjusted as necessary so the value of all Rehypothecated Securities does not exceed 100% of the loan amount under the Financing Agreement. The Fund will continue to earn and receive all dividends, interest, and other distributions on Rehypothecated Securities. Rehypothecated Securities are identified in the Portfolio of Investments listing and fees earned from rehypothecation are included in the Statement of Operations.

9. Portfolio Investments, Concentration and Investment Quality

Under normal market conditions, the Fund invests at least 80% of its managed assets in a portfolio of preferred and other income-producing securities issued by U.S. and non-U.S. companies, including traditional preferred stock, hybrid and trust preferred securities that have characteristics of both equity and debt securities, convertible securities, subordinated debt, and senior debt. Managed assets means the Fund's net assets, plus the principal amount of loans from financial institutions or debt securities issued by the Fund, the liquidation preference of preferred stock issued by the Fund, if any, and the proceeds of any reverse repurchase agreements entered into by the Fund. Also, under normal market conditions, the Fund will invest more than 25% of its total assets in the financials sector, which for this purpose is comprised of the bank, thrifts & mortgage finance, diversified financial services, finance, consumer finance, capital markets, asset management & custody, investment banking & brokerage, insurance, insurance brokers, and real estate investment trust (REIT) industries. From time to time, the Fund may have 25% or more of its total assets invested in any one of these industries. The Fund's portfolio may therefore be subject to greater risk and market fluctuation than a portfolio of securities representing a broader range of investment alternatives.

The Fund will invest at least 80% of its managed assets in (a) investment grade quality securities or (b) below investment grade quality securities of companies with investment grade senior unsecured debt outstanding, in either case determined at the time of purchase. Consequently, the Fund may invest up to 20% of its managed assets in securities of companies with below investment grade quality senior unsecured debt outstanding. In addition, the Fund may invest in unrated securities that the Fund's investment adviser deems to be comparable in quality to rated issues in which the Fund is authorized to invest.

The Fund may invest up to 15% of its managed assets in common stocks, and up to 100% of its managed assets in securities of non-U.S. companies. Investments may include U.S. dollar-denominated

NOTES TO FINANCIAL STATEMENTS (Continued)

securities and non-U.S. dollar-denominated securities issued by companies organized or headquartered in foreign countries and/or doing significant business outside the United States.

The Fund may employ certain investment techniques in accordance with its fundamental investment policies. These may include the use of when-issued and delayed delivery transactions. Securities purchased or sold on a when-issued or delayed delivery basis may be settled within 45 days after the date of the transaction. The Fund may also enter into transactions, in accordance with its investment policies, involving short sales of securities and purchases of securities on margin. Such transactions may expose the Fund to credit and market valuation risk greater than that associated with regular trade settlement procedures.

10. Subsequent Events

Management has evaluated the impact of all subsequent events on the Fund through the date the financial statements were issued, and has determined that there were no subsequent events requiring recognition or disclosure in the financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors of

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

We have audited the accompanying statement of assets and liabilities of Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated, including the Portfolio of investments, as of November 30, 2013, and the related statement of operations, changes in net assets, cash flows and financial highlights for the period from May 29, 2013 (commencement of operations) through November 30, 2013. These financial statements and financial highlights are the responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of November 30, 2013, by correspondence with the custodian, and brokers or by other appropriate auditing procedures. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated as of November 30, 2013, the results of its operations, the changes in its net assets, its cash flows and financial highlights for the period from May 29, 2013 through November 30, 2013, in conformity with accounting principles generally accepted in the United States of America.

Boston, Massachusetts

January 21, 2014

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

ADDITIONAL INFORMATION (Unaudited)

Dividend Reinvestment and Cash Purchase Plan

Under the Fund's Dividend Reinvestment and Cash Purchase Plan (the Plan), a shareholder whose Common Stock is registered in his or her own name will have all distributions reinvested automatically by BNY Mellon as agent under the Plan, unless the shareholder elects to receive cash. Registered shareholders may elect to receive cash by contacting BNY Mellon at the number provided below. If shares are registered in the name of a broker-dealer or other nominee (that is, in street name) and the broker or nominee participates in the Plan, distributions may be reinvested by the broker or nominee in additional shares under the Plan, unless the shareholder elects to receive distributions in cash. Shareholders may elect to receive cash by contacting their broker or nominee. A shareholder who holds Common Stock registered in the name of a broker or other nominee may not be able to transfer the Common Stock to another broker or nominee and continue to participate in the Plan. Investors who own Common Stock registered in street name should consult their broker or nominee for details regarding reinvestment.

The number of shares of Common Stock distributed to participants in the Plan in lieu of a cash dividend is determined in the following manner. Whenever the market price per share of the Fund's Common Stock is equal to or exceeds the net asset value per share on the valuation date, participants in the Plan will be issued new shares valued at the higher of net asset value or 95% of the then current market value. Otherwise, BNY Mellon will buy shares of the Fund's Common Stock in the open market, on the New York Stock Exchange (NYSE) or elsewhere, on or shortly after the payment date of the dividend or distribution and continuing until the ex-dividend date of the Fund's next distribution to holders of the Common Stock or until it has expended for such purchases all of the cash that would otherwise be payable to the participants. The number of purchased shares that will then be credited to the participants' accounts will be based on the average per share purchase price of the shares so purchased, including brokerage commissions. If BNY Mellon commences purchases in the open market and the then current market price of the shares (plus any estimated brokerage commissions) subsequently exceeds their net asset value most recently determined before the completion of the purchases, BNY Mellon will attempt to terminate purchases in the open market and cause the Fund to issue the remaining dividend or distribution in shares. In this case, the number of shares received by the participant will be based on the weighted average of prices paid for shares purchased in the open market and the price at which the Fund issues the remaining shares. These remaining shares will be issued by the Fund at the higher of net asset value or 95% of the then current market value.

Plan participants are not subject to any charge for reinvesting dividends or capital gains distributions. Each Plan participant will, however, bear a proportionate share of brokerage commissions incurred with respect to BNY Mellon's open market purchases in connection with the reinvestment of dividends or capital gains distributions. For the year ended November 30, 2013, \$7 in brokerage commissions were incurred.

The automatic reinvestment of dividends and capital gains distributions will not relieve Plan participants of any income tax that may be payable on the dividends or capital gains distributions. A participant in the Plan will be treated for Federal income tax purposes as having received, on the dividend payment date, a dividend or distribution in an amount equal to the cash that the participant could have received instead of shares.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

ADDITIONAL INFORMATION (Unaudited) (Continued)

In addition to acquiring shares of Common Stock through the reinvestment of cash dividends and distributions, a shareholder may invest any further amounts from \$100 to \$3,000 semi-annually at the then current market price in shares purchased through the Plan. Such semi-annual investments are subject to any brokerage commission charges incurred by BNY Mellon under the Plan.

A shareholder whose Common Stock is registered in his or her own name may terminate participation in the Plan at any time by notifying BNY Mellon in writing, by completing the form on the back of the Plan account statement and forwarding it to BNY Mellon, or by calling BNY Mellon directly. A termination will be effective immediately if notice is received by BNY Mellon not less than 10 days before any dividend or distribution record date. Otherwise, the termination will be effective, and only with respect to any subsequent dividends or distributions, on the first day after the dividend or distribution has been credited to the participant's account in additional shares of the Fund. Upon termination and according to a participant's instructions, BNY Mellon will either (a) issue certificates for the whole shares credited to the shareholder's Plan account and a check representing any fractional shares or (b) sell the shares in the market. Shareholders who hold Common Stock registered in the name of a broker or other nominee should consult their broker or nominee to terminate participation.

The Plan is described in more detail in the Fund's Plan brochure. Information concerning the Plan may be obtained from BNY Mellon at 1-866-351-7446.

Proxy Voting Policies and Proxy Voting Record on Form N-PX

The Fund files Form N-PX with its complete proxy voting record for the 12 months ended June 30th no later than August 31st of each year. The Fund filed its latest Form N-PX with the Securities and Exchange Commission (SEC) on August 13, 2013. This filing, as well as the Fund's proxy voting policies and procedures, are available (i) without charge, upon request, by calling the Fund's transfer agent at 1-866-351-7446 and (ii) on the SEC's website at www.sec.gov. In addition, the Fund's proxy voting policies and procedures are available on the Fund's website at www.preferredincome.com.

Portfolio Schedule on Form N-Q

The Fund files a complete schedule of portfolio holdings with the SEC for the first and third fiscal quarters on Form N-Q, the latest of which was filed for the quarter ended August 31, 2013. The Fund's Form N-Q is available on the SEC's website at www.sec.gov or may be viewed and obtained from the SEC's Public Reference Room in Washington D.C. Information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330.

Portfolio Management Team

In managing the day-to-day operations of the Fund, the Adviser relies on the expertise of its team of money management professionals, consisting of Messrs. Crumrine, Ettinger, Stone and Chadwick. The professional backgrounds of each member of the management team are included in the Information about Fund Directors and Officers section of this report.

Flaherty & Crumrine Dynamic Preferred and Income Fund Incorporated

ADDITIONAL INFORMATION (Unaudited) (Continued)

Supplementary Tax Information

Distributions to Common Stock Shareholders are characterized as follows for purposes of Federal income taxes (as a percentage of total distributions). Individual Shareholders will receive a Form 1099-DIV in 2014 with information about the tax character of distributions they received in calendar year 2013.

	Individual Shareholder		Corporate Shareholder	
	QDI	Ordinary Income	DRD	Ordinary Income
Fiscal Year 2013	57.75%	42.25%	22.58%	77.42%
Calendar Year 2013	55.90%	44.10%	22.58%	77.42%

Annual Report

November 30, 2013

www.preferredincome.com

Item 2. Code of Ethics.

- (a) The registrant, as of the end of the period covered by this report, has adopted a code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party.
- (c) There have been no amendments, during the period covered by this report, to a provision of the code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party, and that relates to any element of the code of ethics description.
- (d) The registrant has not granted any waivers, including an implicit waiver, from a provision of the code of ethics that applies to the registrant's principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, regardless of whether these individuals are employed by the registrant or a third party, that relates to one or more of the items set forth in paragraph (b) of this item's instructions.

Item 3. Audit Committee Financial Expert.

As of the end of the period covered by the report, the registrant's board of directors has determined that David Gale, Karen H. Hogan and Robert F. Wulf are each qualified to serve as an audit committee financial expert serving on its audit committee and that they all are independent, as defined by the Securities and Exchange Commission.

Item 4. Principal Accountant Fees and Services.

Audit Fees

- (a) The aggregate fees billed for the last fiscal year for professional services rendered by the principal accountant for the audit of the registrant's annual financial statements or services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for that fiscal year are \$46,350 for 2013.

Audit-Related Fees

- (b) The aggregate fees billed in the last fiscal year for assurance and related services by the principal accountant that are reasonably related to the performance of the audit of the registrant's financial statements and are not reported under paragraph (a) of this Item are \$0 for 2013.

Tax Fees

- (c) The aggregate fees billed in the last fiscal years for professional services rendered by the principal accountant for tax compliance, tax advice, and tax planning are \$8,910 for 2013.

All Other Fees

- (d) The aggregate fees billed in the last fiscal year for products and services provided by the principal accountant, other than the services reported in paragraphs (a) through (c) of this Item are \$54,500 for 2013.

- (e)(1) The Fund's Audit Committee Charter states that the Audit Committee shall have the duty and power to pre-approve all audit and non-audit services to be provided by the auditors to the Fund, and all non-audit services to be provided by the auditors to the Fund's investment adviser and any service providers controlling, controlled by or under common control with the Fund's investment adviser that provide ongoing services to the Fund, if the engagement relates directly to the operations and financial reporting of the Fund.

- (e)(2) The percentage of services described in each of paragraphs (b) through (d) of this Item that were approved by the audit committee pursuant to paragraph (c)(7)(i)(C) of Rule 2-01 of Regulation S-X are as follows:

(b) N/A

(c) 100%

(d) 100%

- (f) The percentage of hours expended on the principal accountant's engagement to audit the registrant's financial statements for the most recent fiscal year that were attributed to work performed by persons other than the principal accountant's full-time, permanent employees was zero percent.

- (g) The aggregate non-audit fees billed by the registrant's accountant for services rendered to the registrant, and rendered to the registrant's investment adviser (not including any sub-adviser whose role is primarily portfolio management and is subcontracted with or overseen by another investment adviser), and any entity controlling, controlled by, or under common control with the adviser that provides ongoing services to the registrant for the last fiscal year of the registrant was \$0 for 2013.

- (h) Not applicable.

Item 5. Audit Committee of Listed registrants.

- (a) The registrant has a separately designated audit committee consisting of all the independent directors of the registrant. The members of the audit committee are: David Gale, Morgan Gust, Karen H. Hogan, and Robert F. Wulf.

Item 6. Investments.

- (a) Schedule of Investments in securities of unaffiliated issuers as of the close of the reporting period is included as part of the report to shareholders filed under Item 1 of this form.
- (b) Not applicable.

Item 7. Disclosure of Proxy Voting Policies and Procedures for Closed-End Management Investment Companies.

The Proxy Voting Policies are attached herewith.

ADVISER PROXY VOTING POLICIES AND PROCEDURES

Flaherty & Crumrine Incorporated (FCI) acts as discretionary investment adviser for various clients, including the following seven pooled investment vehicles (the Funds):

As adviser to the U.S. Funds

- Flaherty & Crumrine Preferred Income Fund
- Flaherty & Crumrine Preferred Income Opportunity Fund
- Flaherty & Crumrine Preferred Securities Income Fund
- Flaherty & Crumrine Total Return Fund
- Flaherty & Crumrine Dynamic Preferred and Income Fund

As sub-adviser

to the Canadian Fund

- Flaherty & Crumrine Investment Grade Fixed Income Fund

As sub-adviser

to the Mutual Fund

- Destra Preferred and Income Securities Fund

FCI s authority to vote proxies for its clients is established through the delegation of discretionary authority under its investment advisory contracts and the U.S. Funds have adopted these policies and procedures for themselves

Purpose

These policies and procedures are designed to satisfy FCI s duties of care and loyalty to its clients with respect to monitoring corporate events and exercising proxy authority in the best interests of such clients.

In connection with this objective, these policies and procedures are designed to deal with potential complexities which may arise in cases where FCI s interests conflict or appear to conflict with the interests of its clients.

These policies and procedures are also designed to communicate with clients the methods and rationale whereby FCI exercises proxy voting authority.

This document is available to any client or Fund shareholder upon request and FCI will make available to such clients and Fund shareholders the record of FCI's votes promptly upon request and to the extent required by Federal law and regulations.

Fundamental Standard

FCI will be guided by the principle that, in those cases where it has proxy voting authority, it will vote proxies, and take such other corporate actions, consistent with the interest of its clients in a manner free of conflicts of interest with the objective of client wealth maximization.

General

FCI has divided its discussion in this document into two major categories: voting with respect to common stock and voting with respect to senior equity, e.g., preferred stock and similar securities. In those events where FCI may have to take action with respect to debt, such as in the case of amendments of covenants or in the case of default, bankruptcy, reorganization, etc., FCI will apply the same principles as would apply to common or preferred stock, *mutatis mutandis*.

These policies and procedures apply only where the client has granted discretionary authority with respect to proxy voting. Where FCI does not have authority, it will keep appropriate written records evidencing that such discretionary authority has not been granted.

FCI may choose not to keep written copies of proxy materials that are subject to SEC regulation and maintained in the SEC's EDGAR database. In other instances, FCI will keep appropriate written records in its files or in reasonably accessible storage.

Similarly, FCI will keep in its files, or reasonably accessible storage, work papers and other materials that were significant to FCI in making a decision how to vote.

For purposes of decision making, FCI will assume that each ballot for which it casts votes is the only security of an issuer held by the client. Thus, when casting votes where FCI may have discretionary authority with regard to several different securities of the same issuer, it may vote securities in favor for those securities or classes where FCI has determined the matter in question to be beneficial while, at the same time, voting against for those securities or classes where FCI has determined the matter to be adverse. Such cases occasionally arise, for example, in those instances where a vote is required by both common and preferred shareholders, voting as separate classes, for a change in the terms regarding preferred stock issuance.

FCI will reach its voting decisions independently, after appropriate investigation. It does not generally intend to delegate its decision making or to rely on the recommendations of any third party, although it may take such recommendations into consideration. FCI may consult with such other experts, such as CPAs, investment bankers, attorneys, etc., as it regards necessary to help it reach informed decisions.

Absent good reason to the contrary, FCI will generally give substantial weight to management recommendations regarding voting. This is based on the view that management is usually in the best position to know which corporate actions are in the best interests of common shareholders as a whole.

With regard to those shareholder-originated proposals which are typically described as social, environmental, and corporate responsibility matters, FCI will typically give weight to management's recommendations and vote against such shareholder proposals, particularly if the adoption of such proposals would bring about burdens or costs not borne by those of the issuer's competitors.

In cases where the voting of proxies would not justify the time and costs involved, FCI may refrain from voting. From the individual client's perspective, this would most typically come about in the case of small holdings, such as might arise in connection with spin-offs or other corporate reorganizations. From the perspective of FCI's institutional clients, this envisions cases (1) as more fully described below where preferred and common shareholders vote together as a class or (2) other similar or analogous instances.

Ultimately, all voting decisions are made on a case-by-case basis, taking relevant considerations into account.

Voting of Common Stock Proxies

FCI categorizes matters as either routine or non-routine, which definition may or may not precisely conform to the definitions set forth by securities exchanges or other bodies categorizing such matters. Routine matters would include such things as the voting for directors and the ratification of auditors and most shareholder proposals regarding social, environmental, and corporate responsibility matters. Absent good reason to the contrary, FCI normally will vote in favor of management's recommendations on these routine matters.

Non-routine matters might include, without limitation, such things as (1) amendments to management incentive plans, (2) the authorization of additional common or preferred stock, (3) initiation or termination of barriers to takeover or acquisition, (4) mergers or acquisitions, (5) changes in the state of incorporation, (6) corporate reorganizations, and (7) contested director slates. In non-routine matters, FCI, as a matter of policy, will attempt to be generally familiar with the questions at issue. This will include, without limitation, studying news in the popular press, regulatory filings, and competing proxy solicitation materials, if any. Non-routine matters will be voted on a case-by-case basis, given the complexity of many of these issues.

Voting of Preferred Stock Proxies

Preferred stock, which is defined to include any form of equity senior to common stock, generally has voting rights only in the event that the issuer has not made timely payments of income and principal to shareholders or in the event that a corporation desires to effectuate some change in its articles of incorporation which might modify the rights of preferred stockholders. These are non-routine in both form and substance.

In the case of non-routine matters having to do with the modification of the rights or protections accorded preferred stock shareholders, FCI will attempt, wherever possible, to assess the costs and benefits of such modifications and will vote in favor of such modifications only if they are in the best interests of preferred shareholders or if the issuer has offered sufficient compensation to preferred stock shareholders to offset the reasonably foreseeable adverse consequences of such modifications. A similar type of analysis would be made in the case where preferred shares, as a class, are entitled to vote on a merger or other substantial transaction.

In the case of the election of directors when timely payments to preferred shareholders have not been made (contingent voting), FCI will cast its votes on a case-by-case basis after investigation of the qualifications and independence of the persons standing for election.

Routine matters regarding preferred stock are the exception, rather than the rule, and typically arise when the preferred and common shareholders vote together as a class on such matters as election of directors. FCI will vote on a case-by-case basis, reflecting the principles set forth elsewhere in this

document. However, in those instances (1) where the common shares of an issuer are held by a parent company and (2) where, because of that, the election outcome is not in doubt, FCI does not intend to vote such proxies since the time and costs would outweigh the benefits.

Actual and Apparent Conflicts of Interest

Potential conflicts of interest between FCI and FCI's clients may arise when FCI's relationships with an issuer or with a related third party conflict or appear to conflict with the best interests of FCI's clients.

FCI will indicate in its voting records available to clients whether or not a material conflict exists or appears to exist. In addition, FCI will communicate with the client (which means the independent Directors or Director(s) they may so designate in the case of the U.S. Funds and the investment adviser in the case of the Canadian Fund or the Mutual Fund) in instances when a material conflict of interest may be apparent. FCI must describe the conflict to the client and state FCI's voting recommendation and the basis therefor. If the client considers there to be a reasonable basis for the proposed vote notwithstanding the conflict or, in the case of the Funds, that the recommendation was not affected by the conflict (without considering the merits of the proposal), FCI will vote in accordance with the recommendation it had made to the client.

In all such instances, FCI will keep reasonable documentation supporting its voting decisions and/or recommendations to clients.

Amendment of the Policies and Procedures

These policies and procedures may be modified at any time by action of the Board of Directors of FCI but will not become effective, in the case of the U.S. Funds, unless they are approved by majority vote of the non-interested directors of the U.S. Funds. Any such modifications will be sent to FCI's clients by mail and/or other electronic means in a timely manner. These policies and procedures, and any amendments hereto, will be posted on the U.S. Funds websites and will be disclosed in reports to shareholders as required by law.

Item 8. Portfolio Managers of Closed-End Management Investment Companies.

The following paragraphs provide certain information with respect to the portfolio managers of the Fund and the material conflicts of interest that may arise in connection with their management of the investments of the Fund, on the one hand, and the investments of other client accounts for which they have responsibility, on the other hand. Certain other potential conflicts of interest with respect to personal trading and proxy voting are discussed above under Item 2 - Codes of Ethics and Item 7 - Proxy Voting Policies.

(a)(1) Portfolio Managers

R. Eric Chadwick, Donald F. Crumrine, Robert M. Ettinger and Bradford S. Stone jointly serve as the Portfolio Managers of the Fund. Additional biographical information about the portfolio managers is available in the Annual Report included in Response to Item 1 above.

(a)(2) Other Accounts Managed By Portfolio Managers

The tables below illustrate other accounts where each of the above-mentioned four portfolio managers has significant day-to-day management responsibilities as of November 30, 2013:

Name of Portfolio <u>Manager</u> or <u>Team Member</u>	Type of Accounts	Total		# of Accounts Managed for which Advisory Fee is Based on Performance
		# of Accounts Managed	Total Assets (mm)	
1. Donald F. Crumrine	Other Registered Investment Companies:	5	\$1,970	0
	Other Pooled Investment Vehicles:	1	\$176	0
	Other Accounts:	9	\$2,753	0
2. Robert M. Ettinger	Other Registered Investment Companies:	5	\$1,970	0
	Other Pooled Investment Vehicles:	1	\$176	0
	Other Accounts:	9	\$2,753	0
3. R. Eric Chadwick	Other Registered Investment Companies:	5	\$1,970	0
	Other Pooled Investment Vehicles:	1	\$176	0
	Other Accounts:	9	\$2,753	0
4. Bradford S. Stone	Other Registered Investment Companies:	5	\$1,970	0
	Other Pooled Investment Vehicles:	1	\$176	0
	Other Accounts:	9	\$2,753	0

Potential Conflicts of Interest

In addition to the Fund, the Portfolio Managers jointly manage accounts for four other closed-end funds, one mutual fund, one Canadian fund and other institutional clients. As a result, potential conflicts of interest may arise as follows:

Allocation of Limited Time and Attention. The Portfolio Managers may devote unequal time and attention to the management of all accounts. As a result, the Portfolio Managers may not be able to formulate as complete a strategy or identify equally attractive investment opportunities for each of those accounts as might be the case if they were to devote substantially more attention to the management of one account.

Allocation of Limited Investment Opportunities. If the Portfolio Managers identify an investment opportunity that may be suitable for multiple accounts, the Fund may not be able to take full advantage of that opportunity because the opportunity may need to be allocated among other accounts.

Pursuit of Differing Strategies. At times, the Portfolio Managers may determine that an investment opportunity may be appropriate for only some accounts or may decide that certain of these accounts should take differing positions (i.e., may buy or sell the particular security at different times or the same time or in differing amounts) with respect to a particular security. In these cases, the Portfolio Manager may place separate transactions for one or more accounts which may affect the market price of the security or the execution of the transaction, or both, to the detriment of one or more other accounts.

Variation in Compensation. A conflict of interest may arise where the financial or other benefits available to the Portfolio Manager differ among accounts. While the Adviser only charges fees based on assets under management and does not receive a performance fee from any of its accounts, and while it strives to maintain uniform fee schedules, it does have different fee schedules based on the differing advisory services required by some accounts. Consequently, though the differences in such fee rates are

slight, the Portfolio Managers may be motivated to favor certain accounts over others. In addition, the desire to maintain assets under management or to derive other rewards, financial or otherwise, could influence the Portfolio Managers in affording preferential treatment to those accounts that could most significantly benefit the Adviser.

The Adviser and the Fund have adopted compliance policies and procedures that are designed to address the various conflicts of interest that may arise for the Adviser and its staff members. However, there is no guarantee that such policies and procedures will be able to detect and prevent every situation in which an actual or potential conflict may arise.

(a)(3) Portfolio Manager Compensation

Compensation is paid solely by the Adviser. Each Portfolio Manager receives the same fixed salary. In addition, each Portfolio Manager receives a bonus based on peer reviews of his performance and the total net investment advisory fees received by Flaherty & Crumrine (which are in turn based on the value of its assets under management). The Portfolio Managers do not receive deferred compensation, but participate in a profit-sharing plan available to all employees of the Adviser; amounts are determined as a percentage of the employee's eligible compensation for a calendar year based on IRS limitations. Each Portfolio Manager is also a shareholder of Flaherty & Crumrine and receives quarterly dividends based on his equity interest in the company.

(a)(4) Disclosure of Securities Ownership

The following indicates the dollar range of beneficial ownership of shares by each Portfolio Manager as of November 30, 2013:

Name	Dollar Range of Fund Shares Beneficially Owned*
R. Eric Chadwick	\$100,001 to \$500,000
Donald F. Crumrine	\$100,001 to \$500,000
Robert M. Ettinger	\$100,001 to \$500,000
Bradford S. Stone	\$100,001 to \$500,000

**Includes 4,198 shares held by Flaherty & Crumrine Incorporated of which each portfolio manager has beneficial ownership.*

(b) Not applicable.

Item 9. Purchases of Equity Securities by Closed-End Management Investment Company and Affiliated Purchasers.

Not applicable.

Item 10. Submission of Matters to a Vote of Security Holders.

There have been no material changes to the procedures by which the shareholders may recommend nominees to the registrant's board of directors, where those changes were implemented after the registrant last provided disclosure in response to the requirements of Item 407(c)(2)(iv) of Regulation S-K (17 CFR 229.407) (as required by

Item 22(b)(15) of Schedule 14A (17 CFR 240.14a-101), or this Item.

Item 11. Controls and Procedures.

- (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-3(c) under the Investment Company Act of 1940, as amended (the 1940 Act) (17 CFR 270.30a-3(c))) are effective, as of a date within 90 days of the filing date of the report that includes the disclosure required by this paragraph, based on their evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the registrant's second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

- (a)(1) Code of ethics, or any amendment thereto, that is the subject of disclosure required by Item 2 is attached hereto.
- (a)(2) Certifications pursuant to Rule 30a-2(a) under the 1940 Act and Section 302 of the Sarbanes-Oxley Act of 2002 are attached hereto.
- (a)(3) Not applicable.
- (b) Certifications pursuant to Rule 30a-2(b) under the 1940 Act and Section 906 of the Sarbanes-Oxley Act of 2002 are attached hereto.

(12.other)Not applicable.
