Long term	202,403	23,337	427,928	24,431

Deferred taxes have been recorded based on the assumption of their future realization, as follows:

- a) The transferred tax credit consists of the net balance of goodwill and the reserve for maintenance of integrity of shareholders' equity (Note 29); it is realized as goodwill and is being amortized by TCO and its subsidiaries until June 30, 2009.
- b) Temporary differences will be realized upon payment of the accruals, effective losses on bad debts and realization of inventories.

Technical feasibility studies, approved by Company's Board of Directors and Fiscal Council, indicate the full recovery of the deferred taxes recognized as determined by CVM Resolution No. 371.

Realization of the tax credits is estimated as follows:

Year		Company	Consolidated
2004		60,331	154,533
2005		48,986	78,703
2006		44,903	102,212

2009		<u>18,708</u>	<u>42,589</u>
Total		<u>262,734</u>	<u>582,461</u>

CVM Resolution No. 371 determines that periodic studies must be carried out to support the maintenance of the amounts recorded. The subsidiary TCO IP did not recognize deferred income and social contribution taxes on tax losses and temporary differences, due to the lack of projections of taxable income to be generated in the short term.

17. RESERVE FOR CONTINGENCIES

The Company and its subsidiaries are parties to certain lawsuits involving labor, tax and civil matters. Management has recognized reserves for cases in which the likelihood of an unfavorable outcome is considered probable by its legal counsel.

Components of the reserves are as follows:

	<u>Company</u>		<u>Consolidated</u>	
	<u>06/30/04</u>	<u>03/31/04</u>	<u>06/30/04</u>	<u>03/31/04</u>

Short Term	345	-	2,434	-
Long Term	114,707	109,281	117,554	112,134

Telebrás

Corresponds to original loans from Telecomunicações Brasileiras S.A. - Telebrás that, according to Attachment II to the Spin-off Report dated February 28, 1998, approved by the Shareholders' Meeting held in May 1998, and in the opinion of the Company's management, should be allocated to the respective holding companies of Telegoiás and Telebrasília Celular S.A.

Management believes that there was an error in the allocation of the loans upon the spin-off and suspended the payments after the change in the Company's control. The loans are restated based on the general market price index (IGP-M) plus interest of 6% per year.

In June 1999, the Company filed a lawsuit claiming that all assets related to these loans, as well as the accessory items of these assets, are owned by it, and claiming for refund for the installments paid.

In November 1999, the Company's management decided to transfer to the holding company the liability arising from the loan originally payable to Telebrás, since the liability was absorbed in the spin-off process.

On August 1, 2001, a court decision dismissed the Company's claims in the declaratory action; however, on October 8, 2001, the Company filed an appeal, which has not yet been judged to date.

The Company's legal counsel believes that the chances of an unfavorable outcome on these contingencies are probable as to the merit of the claim and possible as to the restatement index. The unaccrued difference as of June 30, 2004 between the original contractual rates and the restatement index used as described above is estimated at R\$33,447 (R\$29,286 as of March 31, 2004).

a) Tax

Probable loss

In the second quarter, no new significant tax lawsuits that were classified as having a "probable" unfavorable outcome were filed. The changes in the reserves for tax contingencies correspond to the monthly changes in the lawsuits since the previous year.

Remote loss

In the second quarter, no significant new tax lawsuits that were classified as having a "possible" unfavorable outcome were filed. No significant changes in the lawsuits indicated in this report have occurred since the previous year.

b) Labor and civil

Include several labor and civil claims, for which a reserve has been recognized as shown above, in an amount considered to be sufficient to cover probable losses.

In the cases in which the chance of loss is classified as possible, the amount involved is R\$7,751 (R\$7,751 as of March 30, 2004) for civil claims, and R\$1,381 (R\$1,149 as of March 30, 2004) for labor claims.

18. LEASES (CONSOLIDATED)

The outstanding obligation under such agreements, adjusted at the exchange rate prevailing at June 30, 2004, is R\$2.201 (R\$2.934 as of March 31, 2004). 26. TAXES ON INCOME

The Company and its subsidiaries estimate monthly the amounts for income and social contribution taxes, on the accrual basis. The subsidiary TCO IP has tax losses without deferral of income and social contribution taxes since no taxable income is expected. The income and social contribution taxes effect on these losses is recorded under "Unrecognized income and social contribution taxes" in the reconciliation of taxes on income below, in the amount of R\$617. Deferred taxes are provided on temporary differences as shown in Note 7. Income and social contribution taxes charged to income consist of the following:

	<u>Company</u>		<u>Consolidated</u>

27. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONSOLIDATED)

a) Risk considerations

The Company and its subsidiaries provide cellular mobile services in the States of Goiás, Tocantins, Mato Grosso, Mato Grosso do Sul, Rondônia, Acre, Amazonas, Roraima, Amapá, Pará, Maranhão and Distrito Federal, in accordance with the terms of concessions granted by the Federal Government. The operators are also engaged in the purchase and sale of handsets through their own sales network as well as distribution channels, thus fostering their essential activities. The major market risks to which the Company and its subsidiaries are exposed include:

- Credit risk - arising from any difficulty in collecting telecommunication services provided to customers and revenues from the sale of handsets by the distribution network.
- Interest rate risk - resulting from debt and premiums on derivative instruments contracted at floating rates and involving the risk of interest expenses increasing as a result of an unfavorable upward trend in interest rates (LIBOR, CDI and TJLP).
- Currency risk - related to debt contracted in foreign currency and associated with potential losses resulting from adverse exchange rate movements.

Since they were formed, the Company and its subsidiaries have been actively managing and mitigating risks inherent in their operations by means of comprehensive operating procedures, policies and initiatives.

Credit risk

Credit risk from providing telecommunication services is minimized by strictly monitoring the Company's customer portfolio and actively addressing delinquent receivables by means of clear policies relating to the concession of postpaid services of the Company's and its subsidiaries' customers, 81% of which (73% as of June 30, 2003) use prepaid services that require pre-loading, thus not representing a credit risk.

Credit risk from the sale of handsets is managed by following a conservative credit granting policy, which encompasses the use of advanced risk management methods that include applying credit scoring techniques, analyzing the potential customer's balance sheet, and making inquiries of credit protection agencies' databases. In addition, an automatic control has been implemented in the sales module for releasing products, which is integrated with the distribution module of the Company's ERP system for consistent transactions.

The Company is also subject to credit risk from temporary cash investments and receivables from swap operations. The Company diversifies this exposure between leading financial institutions.

Interest rate risk

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

The Company and its subsidiaries are exposed to fluctuations in TJLP (local index) on financing from the BNDES. As of June 30, 2004, these operations amounted to R\$149,141 (R\$160,106 as of March 31, 2004).

The Company is also exposed to interest rate risk, especially associated with the cost of CDI rates, due to its exchange rate derivative transactions. However, the balance of temporary cash investments, also indexed to the CDI, neutralizes this effect.

The Company and its subsidiaries have not entered into derivative operations to hedge against these risks.

Foreign currency-denominated loans are also exposed to Libor interest rate risk associated with foreign loans. As of June 30, 2004, these operations amounted to US\$35,161,000 (US\$54,508,000 as of March 31, 2004).

Currency risk

The Company and its subsidiaries utilize derivative instruments to protect against currency risk on foreign currency-denominated loans. Such instruments usually include swap contracts.

The Company's and its subsidiaries' net exposure to currency risk as of March 31, 2004 is shown in the table below:

	<u>US\$</u>
Loans and financing - US\$	(35,470)
Loans and financing - UMBNDES (*)	(4,869)
Hedge instruments	<u>40,861</u>
Net exposure	<u>522</u>

(*) UMBNDES is a monetary unit prepared by the BNDES, consisting of a basket of foreign currencies, the principal of which is the U.S. dollar; for this reason, the Company and its subsidiaries consider it as U.S. dollar in the risk coverage analysis related to fluctuations in exchange rates.

b) Derivative instruments

The Company and its subsidiaries record derivative gains and losses as a component of net financial expenses.

Book and market values of loans and financing and derivative instruments are estimated as follows:

	Book	Market	Unrealized
	<u>value</u>	<u>value</u>	<u>gain</u>
Loans and financing	(291,708)	(282,869)	8,839
Derivative instruments	<u>(4,555)</u>	<u>454</u>	<u>5,009</u>
Total	<u>(296,263)</u>	<u>(282,415)</u>	<u>13,848</u>

c) Market value of financial instruments

The market values of loans and financing and swap contracts were determined based on the discounted cash flows, using projected available interest rate information.

Estimated market values of the Company's financial assets and liabilities have been determined using available market information and appropriate valuation methodologies. Accordingly, the estimates presented above are not necessarily indicative of the amounts that could be realized in a current market exchange. The use of different market assumptions may have a material effect on the estimated market values.

28. POST-RETIREMENT BENEFIT PLANS

The Company, together with other companies of the former Telebrás System, sponsors private pension and health care plans for retired employees, managed by Fundação Sistel de Seguridade Social ("Sistel") as follows:

a) PBS A - A multi-sponsored defined benefit plan, for participants already covered who were in such position on January 31, 2000.

b) PBS TCO - A defined benefit plan sponsored individually by the Company.

c) PAMA - A multi-sponsored healthcare plan for retired employees and their dependents, at shared costs.

Contributions to the PBS-TCO plan are determined based on actuarial valuations prepared by independent actuaries, in accordance with rules in force in Brazil. Costing is determined using the capitalization method, and the contribution due by the sponsor is equivalent to 13.5% of payroll for participating employees, of which 12% is allocated to fund the PBS-TCO and 1.5% for the PAMA plan.

d) TCO PREV - An individual defined contribution plan, established by SISTEL in August 2000. The Company's contributions to the TCO PREV plan are equal to those of the participants, up to 8% of the contribution salary, according to the percentage chosen by the participant.

In the first half of 2004, the Company contributed R\$2 (R\$2 in 2003) to the PBS-TCO Plan and R\$3,577 (R\$2,011 in 2003) to the TCO PREV Plan.

In the first half of 2004, the Company and its subsidiaries recognized on a proportional basis the actuarial cost estimated for 2004, and recorded the amount of R\$2,810 as of June 30, 2004.

29. CORPORATE RESTRUCTURING

On May 13, 2004, the Boards of Directors of the Company and its Parent Company approved a corporate restructuring for the purpose of transferring to the Company and its subsidiaries the goodwill paid by TCP on the acquisition of the ownership control of TCO, in the amount of R\$1,503,121 as of May 31, 2004.

Before the goodwill was transferred to the Company, a reserve for maintenance of integrity of the merging company's shareholders' equity, in the amount of R\$992,060, was recognized. Therefore, the net assets transferred to the Company was R\$511,061, which essentially represents the tax benefit arising from the deductibility of said goodwill upon its transfer to the Company and its subsidiaries.

The merged net assets will be amortized over a five-year estimated period, and against a special goodwill reserve to be transferred to the capital account in favor of the parent company upon the realization of the tax benefit, ensuring to the other shareholders a participation in these capital increases, should the determined funds be paid to TCP.

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

On June 30, 2004 the transfer of part of the net assets to its subsidiaries, based on valuation reports prepared by independent specialists, was approved, as follows:

<u>Company</u>	<u>Goodwill</u>	Reserve for maintenance of integrity of shareholders' <u>equity</u>	<u>Net</u>
Telemat	248,558	164,048	84,510
Telegoiás	352,025	232,336	119,689

Total	<u>1,503,121</u>	<u>992,060</u>	<u>511,061</u>

Concomitantly with the transfer of part of the net assets to the subsidiaries, the proposal for merging the shares of minority shareholders of subsidiaries was approved, and these shareholders will receive Company shares proportionally to the fair value valuation report prepared by independent specialists. The transfer of ownership interest in subsidiaries resulted in a capital increase of R\$28,554.

The accounting records maintained for corporate and tax purposes of the companies include specific accounts related to transferred goodwill, reserve, amortization, reversal and corresponding tax credits. As of June 30, 2004, balances are as follows:

	<u>Company</u>		<u>Consolidated</u>

Edgar Filing: TELE CENTRO OESTE CELULAR PARTICIPACOES - Form 6-K

Effect on net income	=	=	=	=

As shown above, the amortization of goodwill, net of the reversal of the reserve and the corresponding tax credit, results in a zero effect on income and, consequently, on the basis for calculating the mandatory minimum dividend. For a better presentation of the financial position of the Companies in the financial statements, the net amount, which, in essence, represents the transferred tax credit balance, was classified in the balance sheet as current and long-term assets under deferred taxes (Note 7).
