Notes to the Schedule of Investments (Unaudited)

Security valuation. Investments are stated at value as of the close of regular trading on the New York Stock Exchange (NYSE), normally at 4:00 P.M., Eastern Time. The Fund uses a three-tier hierarchy to prioritize the pricing assumptions, referred to as inputs, used in valuation techniques to measure fair value. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes significant observable inputs. Observable inputs may include quoted prices for similar securities, interest rates, prepayment speeds and credit risk. Prices for securities valued using these techniques are received from independent pricing vendors and brokers and are based on an evaluation of the inputs described. Level 3 includes significant unobservable inputs when market prices are not readily available or reliable, including the Fund sown assumptions in determining the fair value of investments. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the values by input classification of the Fund

s investments as of July 31, 2010, by major security category or type:

			Level 2	Level 3
	Total Market	Level 1	Significant	Significant
	Value at	Quoted	Observable	Unobservable
Investments in Securities	7-31-10	Price	Inputs	Inputs
Capital Markets	\$11,522,227	\$11,522,227		

Total Investments in Securities	\$376,877,791	\$350,394,251	\$18,065,819	\$8,417,721
Short-Term Investments	22,984,498	10,784,518	12,199,980	
Thrifts & Mortgage Finance	30,716,595	30,716,595		
Diversified Financial Services	39,058,697	37,751,197	1,307,500	
Commercial Banks	272,595,774	259,619,714	\$4,558,339	\$8,417,721

The following is a reconciliation of Level 3 assets for which significant unobservable inputs were used to determine fair value:

Investments in Securities	Commercial Banks
Balance as of 10-31-09	\$575,620
Accrued discounts/premiums	-
Realized gain (loss)	-
change in unrealized gain (loss)	(599,336)
Net purchases (sales)	8,441,437
Net transfers in and/out of Level 3	-
Balance as of 7-31-10	\$8,417,721

During the nine month period ended July 31, 2010, there were no significant transfers in or out of Level 1 or Level 2 assets.

In order to value the securities, the Fund uses the following valuation techniques. Equity securities held by the Fund are valued at the last sale price or official closing price on the principal securities exchange on which they trade. In the event there were no sales during the day or closing prices are not available, then securities are valued using the last quoted

5

bid or evaluated price. Foreign securities and currencies are valued in U.S. dollars, based on foreign currency exchange rates supplied by an independent pricing service. Certain securities traded only in the over-the-counter market are valued at the last bid price quoted by brokers making markets in the securities at the close of trading. Certain short-term securities are valued at amortized cost. John Hancock Collateral Investment Trust (JHCIT), an affiliate of the Fund, is valued at its closing net asset value (NAV). JHCIT has a floating NAV and invests in short-term investments as part of a securities lending program.

Other portfolio securities and assets, where market quotations are not readily available, are valued at fair value, as determined in good faith by the Fund Pricing Committee, following procedures established by the Board of Trustees. Generally, trading in non-U.S. securities is substantially completed each day at various times prior to the close of trading on the NYSE. Significant market events that affect the values of non-U.S. securities may occur after the time when the valuation of the securities is generally determined and the close of the NYSE.

During significant market events, these securities will be valued at fair value, as determined in good faith, following procedures established by the Board of Trustees. The Fund may used a fair valuation model to value non-U.S. securities in order to adjust for events which may occur between the close of foreign exchanges and the close of the NYSE.

Securities lending. The Fund may lend its securities to earn additional income. It receives and maintains cash collateral received from the borrower in an amount not less than the market value of the loaned securities. The Fund will invest its collateral in JHCIT, as a result, the Fund will receive the benefit of any gains and bear any losses generated by JHCIT. Although risk of the loss of the securities lent is mitigated by holding the collateral, the Fund could experience a delay in recovering its securities and a possible loss of income or value if the borrower fails to return the securities or if collateral investments decline in value. The Fund may receive compensation for lending its securities by retaining a portion of the return on the investment of the collateral and compensation from fees earned from borrowers of the securities.

Transactions in securities of affiliated issuers. Affiliated issuers, as defined by the Investment Company Act of 1940, as amended, are those in which the Fund sholdings of an issuer represent 5% or more of the outstanding voting securities of the issuer. A summary of the Fund transactions in the securities of these issuers during the nine month period ended July 31, 2010, is set forth below:

	Beginning	Ending
