PRESS RELEASE

Amsterdam - 15 February 2007

ING posts record results: underlying net profit up 24.3% in 2006 to EUR 7,750 million

Results demonstrate the solid earnings capacity of ING's business portfolio

- **4th-quarter underlying net profit rises 37.4% to record EUR 2,124 million**
- **Net inflow of EUR 43.8 billion in 2006 brings assets under management to EUR 600.0 billion at year-end**
- **Full-year net profit increases 6.7% to EUR 7,692 million, or EUR 3.57 per share**
- **Total dividend proposed at EUR 1.32 per share, up 12% from EUR 1.18 in 2005**

Strong momentum continues at ING's three key growth engines in 4th quarter

- **Life insurance in developing markets post 23.5% increase in sales to EUR 530 million**
- **ING Direct adds EUR 5.4 billion in mortgages and maintains level of profitability in challenging environment**
- **Retirement Services accumulation product sales in the U.S. increase 21.7% in fourth quarter**

Strategic Focus for 2007: emphasise growth while maintaining high returns

- **Returns are at attractive levels in all lines of business, with a RAROC of 20.4% and IRR at 13.3%**
- **Priority for 2007 is continued focus on profitable growth across all six business lines**
- **Continued attention for expense control while investing in growth opportunities**

Chairman's Statement

Over the past three years we have consistently focused on growing our businesses, increasing returns, and improving the execution of the business fundamentals in order to create more value for our shareholders. Our results for 2006 show that this strategy continues to pay off, said Michel Tilmant, Chairman of ING Group. We have improved returns in all of our business lines by releasing capital from divested businesses and investing where we can generate growth at solid returns. Our growth engines continue to show strong business momentum. We have kept costs under control while investing in growth opportunities, improving operations in mature businesses, and strengthening compliance overall.

Our strong profit growth in 2006 demonstrates the solid earnings capacity of ING's portfolio of businesses. While the current interest rate environment is challenging, particularly for our banking businesses, the interest margin stabilised in the fourth quarter. At the same time we have benefited from rallying equity and real estate markets, a benign credit environment, a favourable underwriting cycle in non-life insurance and lower taxes. The bulk of our businesses have shown a strong performance, although Japan and the U.S. individual life business require management attention, and we are actively addressing those.

Against that backdrop, ING produced record earnings. Our capital position is strong, allowing ING to raise the annual dividend by 12%, providing an attractive yield to our investors while retaining EUR 4.8 billion to invest in the continued growth of our businesses.

With returns at attractive levels, ING will emphasise growth in 2007 by seeking profitable growth across all six business lines. Our three growth engines – life insurance in developing markets, retirement services and ING Direct will continue to be key drivers of growth. In addition, we will invest in new greenfields to create the next generation of growth engines.

In mature markets we also enjoy businesses with strong profitable growth segments, such as savings and mortgages, private banking, ING Real Estate and leasing. We will further leverage our strong position to achieve growth by sharpening our focus on the customer, enhancing product innovation and growing market share. At the same time we will work to improve execution, including efficiency, risk and compliance.

Looking forward, risk costs and non-life claims will trend gradually to more normalised levels, however we do not anticipate a significant shift in the market environment over the coming period. We are confident that ING is well positioned through our portfolio of businesses to capture growth opportunities and continue to create value for our shareholders.

Underlying profit excludes divestments and special items as specified in Appendix 2.

P&L figures compare 4Q2006 with 4Q2005. Returns such as RAROC and IRR are calculated on a full-year basis.

1. Underlying profit before tax and underlying net profit are non-GAAP measures for profit excluding divestments and special items as specified in Appendix 2

Earnings Analysis: Fourth Quarter

ING posted record earnings in the fourth quarter, driven by a strong underlying performance and a lower tax rate. Underlying net profit was up 37.4% to EUR 2,124 million, and underlying profit before tax rose 16.6% to EUR 2,496 million.

Growth was led by strong results from insurance, where underlying profit before tax rose 31.1%. Results were supported by growth in assets under management in the life business and favourable underwriting experience in non-life. Profit from Insurance Americas rose 27.1% as strong equity markets boosted results in retirement services and variable annuities, while the non-life business in Latin America showed a sharp improvement. Insurance Asia/Pacific posted a 25.0% increase in profit, driven by strong sales in South Korea and asset growth in Japan. Profit from Insurance Europe was up 14.3%, lifted by favourable underwriting results in the Dutch non-life business and growth in Central Europe.

At the banking business, total underlying profit before tax was up 3.4%. Strong volume growth helped offset the impact of flat yield curves, and the interest margin stabilised. Risk costs increased from historic lows. Expenses remained under control, despite one-off items in the fourth quarter both years. Wholesale Banking posted an 11.0% increase in profit driven by ING Real Estate. Retail Banking showed a decline of 12.8% reflecting higher incidental expenses. Excluding those items, profit from Retail Banking was up 9.0% as continued growth more than compensated for the impact of flat yield curves. ING Direct's profit was stable at EUR 183 million as commercial growth offset the impact of flat yield curves.

Edgar Filing: ING GROEP NV - Form 6-K

Underlying net profit growth was supported by a lower effective tax rate of 11.5% in the fourth quarter due to tax-exempt income from equity investments, releases of tax provisions and a reduction of corporate income tax rates. The low effective tax rate in the fourth quarter brought the rate for the full year down to 18.8%, below the expected range of 20-25%.

Net profit, including the impact of divestments and special items, rose 14.2% to EUR 2,101 million, or EUR 0.98 per share. The divestment of Degussa Bank resulted in a net loss of EUR 23 million in the fourth quarter of 2006, while the fourth quarter of 2005 included a net gain of EUR 18 million from divestments, a loss of EUR 2 million from divested units and EUR 278 million from the release of tax provisions and the establishment of a tax asset.

Contrary to the third quarter, results in the fourth quarter were positively impacted by a EUR 97 million revaluation of strategic derivatives for which hedge accounting is not applied. That compares with a negative revaluation of EUR 85 million in the third quarter, when interest rates declined. The EUR 182 million swing contributed to the increase in earnings from the third quarter to the fourth, when underlying net profit rose 28.4%, or by EUR 470 million, to EUR 2,124 million. Compared with the fourth quarter of 2005, the revaluation of derivatives was EUR 37 million higher.

KPIs: Growth

ING Direct adds EUR 5.4 billion in mortgages in 4Q

New sales (APE) from developing markets up 23.5%

Retirement services accumulation sales increased 21.7%

ING's three key growth engines continued to show strong business momentum in the fourth quarter. ING Direct remained focused on expanding its mortgage business in the current interest rate environment. In the fourth quarter ING Direct added EUR 5.4 billion in new mortgages, excluding currency impacts and the sale of Degussa Bank, bringing the total portfolio to EUR 69.0 billion. Funds entrusted showed a net outflow of EUR 0.4 billion as ING Direct balanced growth with profitability, notably in the U.K. Off-balance sheet funds increased by EUR 1.4 billion as some customers shifted from savings to mutual funds. In the U.S., ING Direct continued to expand its geographical footprint with launches in Atlanta in November and Miami in January 2007. The life insurance businesses in developing markets showed strong sales with annualised premium equivalent (APE) up 23.5% to EUR 530 million. That was driven by sales of single-premium products, which almost doubled to EUR 456 million, as new unit-linked products were introduced in Central Europe and Asia. Sales of U.S. retirement services accumulation products rose 21.7% and variable annuity sales were up 15.2% as the U.S. business continues to focus on meeting the needs of baby boomers as they reach retirement.

KPIs: Returns

Banking RAROC rises to 20.4% from 19.1%

IRR on new life sales increases slightly to 13.3%

VNB declines due in part to increase in discount rate

Margins remained strong as ING focuses on balancing growth and returns to maximise value creation. The risk-adjusted return on capital after tax at the banking businesses improved to 20.4% in 2006 from 19.1% driven by ING Real Estate. The internal rate of return on new life insurance sales improved slightly to 13.3%. The value of new life business declined in the fourth quarter, due in part to a retroactive increase in the discount rates to reflect higher interest rates. That had a negative impact of EUR 42 million on the full-year value of new business, which was taken as an adjustment in the fourth quarter. Excluding that change, the value of new business on a normalised basis was down 23.8% to EUR 170 million, impacted by lower sales in Japan and a delay in regulatory approval requiring the U.S. individual life business to continue holding non-economic regulatory reserves. The core U.S. retirement services and variable annuities businesses as well as the developing markets in Central Europe showed strong growth.

KPIs: Execution

Cost/income ratio banking improved in 4Q and full-year

Efficiency ratios for life insurance improved slightly

Agreements for outsourcing of Ops&IT finalised in 4Q

Improving the execution of the business fundamentals remains a priority for ING, including increasing efficiency, cost control, customer satisfaction, risk and compliance. Operating expenses remained under control in the fourth quarter, despite continued investments in new growth initiatives. Recurring expenses for the Group were up 3.5% in the fourth quarter and 2.4% for the full year, excluding one-off items, currency effects and expenses at the growth businesses of ING Direct, ING Real Estate and Insurance Asia/Pacific. The cost/income ratio of the banking operations improved by 10 basis points in the fourth quarter and by 1.5%-points on a full-year basis, despite EUR 164 million in additional compliance costs in 2006 and investments to grow at ING Real Estate, ING Direct and the Retail Banking activities in developing markets. The project to outsource parts of Operations & IT in the Benelux is on track with all three major outsourcing agreements finalised in the fourth quarter. The IT outsourcing and streamlining initiatives are expected to deliver annual cost savings of EUR 230 million from 2008. On the insurance side, expenses to life premiums improved slightly to 13.26% from 13.28%, while expenses to assets under management improved to 0.75% from 0.82%.

Profit by Business Line: Fourth Quarter

Insurance

Strong equity markets helped drive growth in sales and assets at ING's life insurance businesses, while the non-life business

continued to benefit from favourable claims experience in most markets. Underlying profit before tax from ING's insurance businesses rose 31.1% to EUR 1,340 million. Results from life insurance grew 24.5%, led by the U.S., South Korea, Japan and Central Europe. Underlying profit before tax from non-life insurance rose 50.0% to EUR 396 million, driven by releases from insurance provisions and favourable claims experience in the Netherlands as well as a strong improvement in Latin America. Total premium income was down 3.7% to EUR 11,265 million due to currency effects, while the U.S., Central Europe and Asia excluding Japan showed strong growth. Operating expenses remained under control, increasing 1.6%, or 5.1% excluding currencies, reflecting a release of employee benefit provisions in 2005 as well as continued investments to grow the businesses in Asia and Central Europe.

Insurance Europe

Favourable underwriting experience at the Dutch non-life business and strong growth in Central Europe drove underlying profit before tax at Insurance Europe up 14.3% to EUR 641 million. Premium income declined 4.9% reflecting lower group life premiums in the Netherlands, while life premiums in Central & Rest of Europe and non-life premiums in the Netherlands showed strong growth. Expenses were under control, with recurring expenses down 0.3% despite investments to grow the business in Central Europe. Total underlying operating expenses increased 10.9% including a software writedown in the Netherlands in the fourth quarter of 2006 and a release of employee benefit provisions in the fourth quarter of 2005. The value of new business was down 5.3% to EUR 71 million on a normalised basis as a decline in the Netherlands more than offset strong production in Central & Rest of Europe.

Insurance Americas

Higher equity markets drove growth in assets under management and fee income at the U.S. insurance businesses, while the non-life business in Latin America improved compared with the 2005, when results were impacted by hurricane claims in Mexico. That lifted underlying profit before tax from Insurance Americas by 27.1% to EUR 539 million. Premium income increased 7.8% excluding currency effects as all countries reported higher premiums, while operating expenses were flat. Profit in the U.S. rose 31.5%, excluding currency effects and investment-related gains, driven by higher fee income as assets increased. Sales of retirement services asset accumulation products were up 21.7% and variable annuity sales increased 15.2%. Profit from the Canadian non-life business declined 29.3% excluding currency effects, due in part to weather-related claims. The value of new life business declined to EUR 19 million on a normalised basis due to regulatory delays which extended the requirement to hold non-economic regulatory reserves in the U.S. individual life business. The normalised value of new business for the U.S. excluding the traditional life business was EUR 39 million in the fourth quarter, while Latin America reported EUR -3 million.

Insurance Asia/Pacific

Higher sales in South Korea and strong growth of assets under management in Japan drove underlying profit before tax from Insurance Asia/Pacific up 25.0% to EUR 140 million. Sales declined in Japan, where the market has become increasingly competitive, leading to a 9.6% decline in life premium income for the region. Excluding Japan, premium income for Asia/Pacific was up 15.9%, driven by growth of 34.4% in South Korea, 28.8% in Australia & New Zealand and 35.9% in Hong Kong. Operating expenses were up 10.7%, reflecting investments to support the growth of the business, particularly in South Korea, India, Malaysia and Thailand. In Taiwan, ING strengthened reserves by EUR 52 million due to the continued low interest rate environment. The reserve adequacy at a 50% confidence level for ING Life Taiwan improved to EUR 298 million from EUR 253 million at the end of September. The value of new business declined 11.1% to EUR 80 million on a normalised basis reflecting lower sales in Japan and regulatory pricing changes in South Korea in April 2006.

Corporate Line Insurance

The Corporate Line Insurance improved to EUR 20 million from EUR -75 million in the fourth quarter of 2005 when results included a loss on the buy-back of legacy debt in the U.S. and lower results from in-house reinsurance following three hurricanes in Mexico. Realised gains on equities reflected in the Corporate Line were slightly lower, with EUR 148 million in the fourth quarter of 2006 and EUR 162 million a year earlier. The revaluation of strategic derivatives used to hedge interest on core debt was a positive EUR 23 million, down from EUR 25 million in the fourth quarter of 2005, but up from a negative revaluation of EUR 70 million in the third quarter when long-term interest rates declined sharply.

Banking

ING's banking activities continued to show strong growth in savings and mortgages, which helped offset the impact of flat yield curves. Operating expenses were under control, while risk costs increased from historical lows as releases diminish. Underlying profit before tax rose 3.4% to EUR 1,156 million, driven by an 8.8% increase in income, notably from ING Real Estate. Interest income remained stable as strong volume growth offset the impact of flat yield curves. Lending increased by EUR 6.0 billion in the fourth quarter, despite a negative currency impact and the divestment of Degussa Bank. Growth was driven mainly by mortgage lending at ING Direct and the Retail Banking activities in the Netherlands. The total interest margin stabilised in the fourth quarter at 1.05% on an annualised basis, down 1 basis point from the third quarter and 10 basis points from the fourth quarter last year. Income growth was also supported by a EUR 112 million positive revaluation of non-trading derivatives as interest rates increased. Operating expenses were up 4.0% on a recurring basis, excluding additional compliance costs in 2006 and a release of employee benefit provisions in the fourth quarter of 2005. The cost/income ratio improved by 10 basis points to 65.8% in the fourth quarter and declined to 63.6% on a full-year basis despite the incidental costs and investments to support the growth of ING Real Estate and the Retail Banking businesses in developing markets. Loan loss provisions increased to EUR 88 million from EUR 20 million as releases of past provisions continue to diminish. However, at

an annualised 11 basis points of average credit-risk-weighted assets, risk costs remain well below normalised levels and there is no indication of a deterioration in the quality of the credit portfolio. Continued attention for capital allocation and pricing discipline helped push the after-tax risk-adjusted return on capital up to 20.4% from 19.1%.

Wholesale Banking

Strong growth in income, particularly at ING Real Estate drove underlying profit before tax from Wholesale Banking up 11.0% to EUR 546 million. Income rose 15.3% driven by a 50.2% increase at ING Real Estate as well as growth from General Lending and Payments & Cash Management as well as Leasing & Factoring. Recurring expenses were up 7.2%, reflecting investments at ING Real Estate and higher bonuses. Total underlying operating expenses were up 13.2%, including one-off compliance-related costs in 2006 and a release of employee benefit provisions in the fourth quarter of 2005. Wholesale Banking recorded a net addition to the provision of loan losses of EUR 20 million after 7 quarters of net releases as releases from old provisions continue to diminish. Returns increased, driven by ING Real Estate as well as efforts to optimise capital allocation and manage growth in risk-weighted assets within the business line. The risk-adjusted return on capital after tax improved to 20.6% from 17.3%.

Retail Banking

Strong volume growth in savings and mortgages helped offset the impact of flat yield curves at the Retail Banking activities. Underlying profit before tax declined 12.8% to EUR 441 million, reflecting higher one-off expenses. Excluding one-off expenses, operating costs rose 2.0% and profit would have been up 9.0%. Total underlying operating expenses increased 9.5% including EUR 35 million in additional compliance expenses in the fourth quarter of 2006 and a EUR 83 million release of employee benefit provisions a year earlier. Underlying income rose 3.2% driven by volume growth in savings and mortgages and a capital gain in Belgium. The residential mortgage portfolio in the Netherlands grew by EUR 1.6 billion, double the production in the third quarter, driven by the success of Postbank's budget mortgage. Risk costs increased as releases diminish, however there was no sign of a deterioration in the lending portfolio. Pricing discipline helped sustain high returns, with a risk-adjusted return on capital after tax of 32.5% for Retail Banking.

ING Direct

Continued commercial growth at ING Direct offset the impact of flat yield curves and investments to expand the geographical footprint and product range. Underlying profit before tax at ING Direct remained strong at EUR 183 million. The interest margin improved by 2 basis points from the third quarter to 0.87% in the fourth, although it remained below the 0.96% achieved in the fourth quarter of 2005. Nonetheless, total income increased 4.0%. ING Direct continued to focus on growing its mortgage portfolio in the current interest rate environment and production remained strong. It added EUR 5.4 billion in new mortgages in the fourth quarter, excluding currency effects and the sale of Degussa Bank. Another 587,000 new customers were added, supported by the expansion of the U.S. footprint to Chicago in the third quarter and Atlanta in the fourth. Funds entrusted declined by EUR 0.4 billion, driven mainly by transfers to off-balance sheet products and an outflow in the U.K. Off-balance sheet funds entrusted showed strong growth, adding EUR 1.4 billion, as some clients shifted from savings to mutual funds. The risk-adjusted return on capital after tax declined to 11.6%, partially due to higher taxes.

Corporate Line Banking

The Corporate Line Banking recorded a loss of EUR 14 million before tax, compared with a loss of EUR 64 million in the fourth quarter last year. The improvement is mainly caused by a EUR 15 million gain from a FX-hedge, lower interest expenses related to capital management, and a decline in expenses not allocated to the business lines.

Assets under Management

Assets under Management increased by EUR 30.7 billion, or 5.4%, in the fourth quarter to EUR 600.0 billion at the end of 2006. All six business lines contributed to the growth. The increase was driven by a sound net inflow of EUR 12.7 billion as well as EUR 20.6 billion from favourable stock market developments and EUR 4.3 billion from acquisitions. Exchange rates had a negative impact of EUR 6.9 billion. The growth was achieved mainly in the third-party assets which increased by EUR 25.8 billion to EUR 404.5 billion, accounting for 67% of total assets under management. Proprietary assets grew by EUR 4.9 billion to EUR 195.5 billion.

Capital Management

ING's capital position remained robust in the fourth quarter of 2006. Shareholders' equity increased to EUR 38.3 billion from EUR 36.7 billion at the end of the third quarter, mainly due to EUR 2.1 billion of net profit generated and an increase in unrealised gains on equity securities. The leverage position of ING Group was reduced from 9.4% to 9.0%, well below the 10% limit. The E.U. capital coverage ratio of ING Insurance increased further to 274% from 256%. The Tier-1 ratio of the Bank increased from 7.48% to 7.63% due to the temporary impact from the acquisition of Summit REIT by ING Real Estate. Standard & Poor's and Moody's both maintain a stable outlook on the ratings of ING Group (AA-, Aa3) and ING Insurance was recently one of two European insurers to receive an excellent enterprise risk management rating from Standard & Poor's.

Dividend

At the Annual General Meeting of Shareholders on 24 April 2007, ING will propose a total dividend for 2006 of EUR 1.32 per (depository receipt for an) ordinary share, up from EUR 1.18 in 2005. Taking into account the interim dividend of EUR 0.59 made payable in August 2006, the final dividend will amount to EUR 0.73 to be paid fully in cash. ING's shares will be quoted ex-dividend as of 26 April 2007 and the dividend will be made payable on May 3, 2007.

Earnings Analysis: Fourth Quarter

Strong equity markets helped drive growth in sales and assets at ING's life insurance businesses, while the non-life businesses continued to benefit from favourable underwriting experience in most markets. Underlying profit before tax from ING's insurance businesses rose 31.1% to EUR 1,340 million. Results from life insurance grew by 24.5% to EUR 944 million, driven by strong results in the U.S., South Korea, Japan and Central Europe. Profit from non-life insurance rose 50.0% to EUR 396 million driven by releases from insurance provisions and favourable claims experience in the Netherlands as well as a strong improvement in Latin America. In Canada non-life results declined, mainly due to higher weather-related claims.

The low effective tax rate pushed underlying net profit up 66.2% to EUR 1,183 million. Net profit, including the impact of divestments and special items, rose 37.4% to EUR 1,183 million including a realised gain on divestments and a release of tax provisions in the fourth quarter of 2005.

Currency effects had a negative impact on premium income, which declined 3.7% to EUR 11,265. Excluding currencies, premium income was up 1.9% due to growth in Central Europe, the U.S. and South Korea, while premiums in the Netherlands and Japan declined.

Edgar Filing: ING GROEP NV - Form 6-K

Investment and other income rose 8.9% to EUR 2,819 million due to higher realised gains and fair value changes on investments and a moderate increase of direct investment income. Commission income was up 42.2% to EUR 418 million reflecting growth in assets under management particularly in the U.S. and Japan.

Operating expenses rose 1.6%, or 5.1% excluding currency

6

effects, mainly due to a release of employee benefit provisions in the Netherlands in the fourth quarter of 2005 as well as investments to support growth in Central Europe and Asia.

Life Insurance: Key Figures

1. Figures are full year

Life insurance

Underlying profit before tax from life insurance rose 24.5% to EUR 944 million, driven by the U.S., South Korea, Japan and Central Europe. Currency effects pushed life premium income down 4.8%, however excluding currency effects life premiums were flat. Operating expenses increased 5.7% reflecting one-off expenses in the Netherlands. Operating expenses as a percentage of assets under management for investment products improved to 0.75% for the full year 2006 from 0.82% in 2005, mainly reflecting the growth of the assets under management. Expenses as a percentage of premiums for traditional life products improved slightly to 13.26% from 13.28% in 2005.

New Business Production

The value of new business declined in the fourth quarter, due in part to a retroactive increase in the discount rates to reflect higher interest rates. That had a negative impact of EUR 42 million on the full-year value of new business, which was taken as an adjustment in the fourth quarter. On a normalised basis, reflecting the approximate value calculated without the fourth quarter adjustment to discount rates, the value of new business was down 23.8% to EUR 170 million. That was due to lower sales in Japan and a delay in regulatory approval requiring the U.S. individual life business to continue holding non-economic regulatory reserves. The core U.S. retirement services and variable annuities businesses as well as the developing markets in Central Europe showed strong growth. The internal rate of return increased slightly to 13.3%.

Non-Life Insurance: Key Figures

In EUR million	4Q2006	4Q2005	Change
----------------	--------	--------	--------

Gross premium income	1,440	1,379	4.4%
Operating expenses	347	382	-9.2%
Underlying profit before tax	396	264	50.0%

Expense ratio ¹	31.8%	31.9%	
Combined ratio¹	90.5%	94.6%	

1. Figures are full year

Non-life insurance

ING's non-life insurance businesses continued to benefit from favourable underwriting results in most markets. Underlying profit before tax from non-life insurance rose 50.0% to EUR 396 million driven by releases from insurance provisions and a favourable claims environment in the Netherlands. Results in Latin America also improved strongly from the fourth quarter of 2005, when the Mexican business faced claims from three hurricanes. Underwriting results in Canada deteriorated by 33.7% due to higher claims related to bad weather conditions. Overall the combined ratio improved to 90.5% for full year 2006 from 94.6%. Non-life premium income rose 4.4%, or 10.0% excluding currency effects, driven by the Netherlands and Canada. Operating expenses declined 9.2%, but were flat excluding currency effects.

Focus: 2006 Embedded Value

The embedded value of ING's life insurance businesses increased 7.7% to EUR 29,714 million in 2006 before EUR 1,994 million in net dividends were paid to ING Group, taking the year-end embedded value to EUR 27,718 million. In addition to the required return of EUR 1,716 million, new business production contributed EUR 807 million in the year while strong investment returns and other financial variances added EUR 1,240 million and the investment return on free surplus added another EUR 968 million. Currency effects had a negative impact of EUR 1,164 million, and a change in economic assumptions had a negative impact of EUR 1,534 million, mainly due to a decrease in the long-term risk free interest rates in Taiwan from 5.75% to 3.93% to bring them more into line with market rates. The embedded value of the life insurance activities of Insurance Europe increased 15.2% to EUR 17,191 million before dividends, driven by EUR 219 million in new business production as well as favourable equity returns and pension performance. At Insurance Americas, the embedded value rose 2.9% to EUR 11,171 million before dividends, reflecting EUR 167 million in new business written in 2006 as well as positive variances and assumption changes. At Insurance Asia/Pacific, the embedded value declined 24.8% to EUR 1,353 million, reflecting the change in economic assumptions in Taiwan.

For further detail on the embedded value please refer to Appendix 7 of the press release and the full EV report available at www.ing.com.

Key Performance Indicators

Sales in Central & Rest of Europe rise 39.8%

IRR on new life business increases to 14.9%

Recurring expenses under control

At Insurance Europe, ING is investing for growth in Central Europe while continuing to focus on improving efficiency, increasing bank distribution and maintaining pricing discipline in the competitive Dutch and Belgian markets.

ING's life insurance and pension businesses in Central & Rest of Europe posted a 39.8% increase in sales (APE) to EUR 116 million in the fourth quarter as the company continues to focus on product innovation, expanding distribution and increasing the productivity of the tied-agent sales forces. Product development was accelerated in 2006 with a total of 30 new products and 26 riders introduced across the region. ING is also investing for long-term growth in new greenfield operations, including Russia and Bulgaria, and is launching pension funds in Romania for the third pillar this year and second pillar next year.

Recurring expenses remained under control, despite investments to grow the business in Central Europe. In the Netherlands, headcount reductions at Nationale-Nederlanden are ahead of plan and cost savings are progressing, however additional investments are being made, due in part to new regulations which came into effect in 2007. That resulted in increased expense assumptions which had a negative impact of EUR 361 million on 2006 embedded value. The Dutch insurance industry has recently come under criticism from consumer organisations and the Dutch regulator with respect to the level and transparency of costs for universal life insurance products, including those sold by Nationale-Nederlanden and other ING subsidiaries, either directly or through intermediaries. No legal proceedings have yet been instituted against Nationale-Nederlanden or any other ING subsidiaries. Discussions are ongoing between the insurance industry and consumer organisations.

In January, ING announced plans to restructure its Belgian insurance business to focus on bancassurance distribution, and it will seek to divest the broker and employee benefits businesses.

Earnings Analysis: Fourth Quarter

Higher non-life results and a strong investment performance in the Netherlands, as well as continued growth in Central & Rest of Europe, lifted underlying profit before tax at Insurance Europe by 14.3% to EUR 641 million. Lower premiums in the Dutch group life business led to a 4.9% decline in total premium income, despite higher non-life premi-

1. Figures are full year

ums in the Netherlands and growth in Central & Rest of Europe. Investment and other income rose 8.6% to EUR 1,358 million, mainly due to higher dividends, capital gains on bonds and a EUR 40 million swing in revaluations of real estate and private equity, both at Nationale-Nederlanden and RVS.

Recurring expenses for the region were flat, despite investments to grow the business in Central & Rest of Europe, including start-up costs for greenfield operations in Russia and Bulgaria. Total underlying operating expenses increased 10.9% for the region and 13.1% in the Netherlands, largely due to EUR 33 million in software impairments in the fourth quarter of 2006 and releases of employee benefit provisions in 2005.

Life insurance

Underlying profit before tax from life insurance declined 4.2% to EUR 413 million as lower results in the Netherlands and Belgium more than offset a strong increase in Central Europe. Profit in Belgium was 29.0% lower, mainly due to a change in the commission structure with ING Bank Belgium. The 4.7% decline in the Netherlands was primarily due to the one-off release of technical provisions in 2005 following legal changes and an increase in expenses. That

offset higher investment returns, particularly from real estate and private equity revaluations. Life results in Central & Rest of Europe were 11.5% higher, driven by strong growth in assets under management at the pension fund in Poland and strong sales in Greece and Hungary. Life premiums declined 7.3% as declines in the Netherlands and Belgium more than offset a 16.6% increase in Central & Rest of Europe, driven by strong sales in Poland, Hungary and Greece. Operating expenses increased, reflecting further investments and start-up costs for greenfield operations in Bulgaria and Russia.

New business production

The value of new life business declined 5.3% on a normalised basis to EUR 71 million as a lower internal rate of return in the Netherlands due to pricing competition more than offset the impact of strong production in Central & Rest of Europe. Sales (APE) increased 14.9% across the region with the largest gains in Central & Rest of Europe. The internal rate of return rose to 14.9%, driven by an increase in Central Europe.

Non-life insurance

A very strong performance in the Netherlands pushed underlying profit before tax from non-life up 75.4%, driven by favourable claims experience as well as EUR 108 million in releases of insurance provisions, up from EUR 41 million a year earlier. In Belgium, non-life profits declined due to higher claims and a lower reinsurance result. Non-Life premiums increased 15.2%, driven by a 27.0% increase in the Netherlands, mainly due to premium refunds in 2005 in the Loss of Income line after legal changes. Premium income in Belgium declined 14.1%, following the partial sale of its Health portfolio. Operating expenses rose 6.1% overall and 7.9% in the Netherlands, mainly due to software impairments.

Key Performance Indicators

Value of new business, IRR impacted by individual life

Retirement Services accumulation sales up 21.7%

Operating expenses flat excluding currencies

Insurance Americas continues to focus on value creation by delivering top-line growth while maintaining solid returns and expense discipline. In the U.S. the company is positioning itself to better meet the needs of baby boomers as they enter retirement, and in the fourth quarter ING realigned its U.S. businesses, bringing retirement services and annuities together in a new wealth management division. The individual and group life insurance businesses were brought together with reinsurance to better leverage risk management skills across the U.S.

In the fourth quarter, sales of retirement services accumulation products continued to be robust, increasing 21.7%, and variable annuity sales rose 15.2%. On a U.S. reporting basis, sales of these products increased 55.4% and 15.3% respectively. Despite a strong performance from the U.S. wealth management businesses, the value of new business for Insurance Americas declined to EUR 19 million on a normalised basis. Lower sales and the requirement to hold non-economic regulatory reserves in the U.S. individual life business had a negative impact of EUR 17 million. Excluding that impact the value of new business for the U.S. was EUR 39 million. Operating expenses flat excluding currency effects, while premium income rose 7.8%.

Earnings Analysis: Fourth Quarter

Underlying profit before tax increased 27.1 % to EUR 539 million, driven by strong equity markets in the U.S. and an improvement in the Latin American non-life business, which was impacted by hurricane claims in 2005. Excluding EUR 17 million of higher investment-related gains and a EUR 37 million negative impact from currency movements, profit rose 34.3% driven by higher fee income in the U.S. Profit before tax in Canada declined from record 2005 levels as the combined ratio increased by 230 basis points to 89.1%.

Excluding currency effects, premium income at Insurance Americas rose 7.8%, led by higher sales of retirement services accumulation products and variable annuities, while operating expenses were flat.

Life insurance

Life underlying profit before tax rose 43.9% to EUR 413 million, or 56.0% excluding currency impacts. Underlying profit in the U.S. excluding currency effects and EUR 45 million of higher investment-related gains rose 31.5%, led by higher fee income from growth in assets under management. Profit in Latin America rose 63.0% on higher results in Mexico and Chile.

Life premium income increased 8.1% excluding currencies as

1. Figures are full year

U.S. life premium rose 8.0%, driven by higher sales of retirement services accumulation products and variable annuities. Individual life sales declined due to price increases in universal life which more than offset strong term-life sales.

Premium income in Latin America rose 17.8% excluding currencies, lifted by higher group life sales in Mexico and sales of pension products in Chile and Peru. Operating expenses increased 0.7% excluding currency movements as modestly lower expenses in the U.S. offset increases in Peru and Mexico.

New business production

The value of new life business for Insurance Americas declined to EUR 19 million on a normalised basis, despite a strong performance from the U.S. wealth management businesses. The lower result was due, in part to the continued impact of the pension transfer war in Mexico, and results at the U.S. individual life business, including lower sales. In addition, the optimal solution is not yet in place to address the requirement to hold non-economic regulatory reserves at the U.S. individual life business. Excluding individual life, the value of new business was EUR 39 million for the U.S. businesses and the IRR was 12.0% or 12.8% on a U.S. reporting basis. ING is in the process of obtaining regulatory approval of our solution to the non-economic regulatory reserve issue. When received, it will apply retroactively to 2006 new business, and the benefits, which are estimated to be about EUR 30 million, will be captured in embedded value profit in 2007. The value of new life business in Latin America was EUR -3 million on a normalised basis due to the adverse impact of lapse assumption changes in Mexico reflecting the pension transfer war

in 2006.

1. Figures are full year

Non-life insurance

Underlying profit before tax from non-life insurance declined 8.0% to EUR 126 million, including an EUR 11 million negative currency impact. Profit in Canada declined 33.7%, or 29.3% excluding currency effects, to EUR 118 million on lower underwriting income due to weather-related losses and less favourable developments in prior-year reserves. Non-life profit from Latin America was EUR 8 million compared with a loss in the fourth quarter of 2005 when earnings were impacted by three hurricanes in Mexico. Excluding currencies, premium income increased 5.5%, led by a 6.6% increase in Canada as higher sales of auto insurance more than offset the impact of rate reductions. Operating expenses declined 6.3%, or 1.0% excluding currency movements, led by lower expenses in Latin America, largely in Mexico.

Key Performance Indicators

VNB impacted by Japan sales, reduced pricing in Korea

Sales up 13.1% in Asia/Pacific excluding Japan

Assets under management up 8.9% to EUR 84.2 billion

At Insurance Asia/Pacific, ING is focused on delivering profitable growth by increasing bank distribution, improving the productivity of the tied-agent sales force, and stepping up product innovation across the region. The company is working to expand its product range, supplementing traditional life and asset accumulation products with more wealth management and income products to target the growing retiree segment in Asia. Initiatives are also underway to increase operational efficiency by standardising key processes across the region in order to reap the benefits of scale, and efficiency ratios improved. Expenses to life premiums were down to 8.24% and expenses to assets under management declined to 0.83%.

Assets under management in Japan showed strong growth, which fuelled earnings growth for the region, however new sales declined in an increasingly competitive market. Excluding Japan, sales were up 13.1% to EUR 407 million and premium income increased 15.8%. Sales of single premium products climbed more than 300% in South Korea and more than tripled in Hong Kong following a successful bancassurance campaign. The net inflow of assets under management in the region reached EUR 3.0 billion in the fourth quarter, and total assets under management were up 8.9% to EUR 84.2 billion.

Growth initiatives continued in the fourth quarter. In China, ING Capital Life received approval to start life insurance operations in Henan Province, making it the first Sino-Foreign joint venture to start operations in the province.

Investments are continuing to accelerate growth in India, with the roll-out of new branches across the country. Some 5,200 new agents were added across Asia/Pacific in the fourth quarter, mainly in India and South Korea, bringing the total sales force for the region to 62,700. In addition ING added new distribution agreements with banks in India, China and South Korea, and now has partnerships with 123 banks in the region. In South Korea, ING Investment Management received a license in November and offered its first mutual funds to the market in January 2007.

Earnings Analysis: Fourth Quarter

Profit growth at Insurance Asia/Pacific remained strong in the fourth quarter as underlying profit before tax climbed to EUR 140 million from EUR 112 million in the fourth quarter last year. Profit growth was driven by increased volumes in South Korea and higher fees in Japan as assets under management increased strongly. Profit declined 16.7% compared with the third quarter when Japan recorded profits from the hedging strategy on the SPVA books.

1. Figures are full year

Australia and New Zealand increased by EUR 3 million to EUR 40 million due to growth in assets under management and in-force business. Life insurance accounted for EUR 138 million of total underlying profit before tax and non-life insurance profit accounted for EUR 2 million.

Lower sales in Japan pushed life premium income down 9.6% to EUR 2,846 million. Excluding Japan, premiums were up 15.8% to EUR 1,963 million, driven by growth of 34.4% in South Korea, 28.8% in Australia & New Zealand and 35.9% in Hong Kong.

Operational efficiency improved despite a 10.7% increase in operating expenses as investments continued to support the growth of the business, particularly in South Korea, India, Malaysia and Thailand. Expenses declined 11.1% in Australia & New Zealand. Operating expenses as a percentage of premiums on traditional life insurance products were reduced to 8.24% from 8.33%, mainly due to improvements in Japan and the rest of Asia.

In Taiwan, a charge of EUR 52 million was taken in the fourth quarter to strengthen reserves due to the continued low interest rate environment, reducing profit in the quarter to nil. The reserve adequacy at a 50% confidence level for ING Life Taiwan increased to EUR 298 million from EUR 253 million at the end of September.

New business production

The value of new life business increased to EUR 95 million in the fourth quarter, due to a favourable impact from the change in discount rate. On a normalised basis, the value of new business declined to EUR 80 million from EUR 90 million, reflecting lower sales in Japan and regulatory pricing changes in South Korea. Sales in South Korea were up 14.9% to EUR 216 million. Australia's value of new business increased to EUR 12 million from EUR 5 million, driven by strong sales of the OneCare product at attractive margins. Taiwan's value of new business declined to EUR 28 million on a normalised basis, reflecting lower sales due to a decline in the Taiwanese dollar, while unit-linked sales increased. The internal rate of return in Asia/Pacific increased further to EUR 16.8%, mainly due to product changes in Taiwan and a shift across the region to less capital-intensive products, such as unit-linked.

Earnings Analysis: Fourth Quarter

Higher volumes in savings and mortgages as well as strong growth at ING Real Estate more than offset the impact of flat yield curves at the banking businesses. Underlying profit before tax rose 3.4% to EUR 1,156 million. Income growth was driven by ING Real Estate, while interest income remained stable as strong volume growth at Retail Banking and ING Direct was largely offset by flatter yield curves and lower prepayment penalties on mortgages. Expenses were higher in the fourth quarter due to one-off compliance costs and a release from employee benefit provisions in the fourth quarter of 2005. Excluding all non-recurring items, expenses rose 4.0%. Risk costs increased as releases of old provisions diminished, however the quality of the portfolio remains strong. Continued focus on value creation and capital allocation helped sustain returns. The underlying RAROC after tax increased to 20.4%, reflecting continued strong returns in Retail Banking and substantially higher results at ING Real Estate.

Underlying net profit from banking rose 12.8% to EUR 941 million, supported by a lower effective tax rate due to high tax-exempt gains on equities. Net profit declined 6.2% to EUR 918 million, including a net loss of EUR 23 million on the sale of Degussa Bank in the fourth quarter of 2006 and EUR 148 million from the establishment of a tax asset a year earlier.

Income

Total underlying income from banking rose 8.8% to EUR 3,637 million driven by higher investment income and higher commission income, mainly from the investment management activities of ING Real Estate. The underlying interest result was flat as volume growth in savings and mortgages offset a decline in the interest margin. Lower interest results in Retail Banking offset increases in

Wholesale Banking and ING Direct. The total interest margin stabilised in the fourth quarter at 1.05% on an annualised basis, down 1 basis point from the third quarter and 10 basis points lower than the fourth quarter last year. The decrease was due to a flattening of the yield curve, some pressure on client margins and the ongoing growth of ING Direct, which has a lower average interest margin of 0.87%.

Banking: Loans and Advances to Customers

In EUR billion	31 Dec. 2006	30 Sept. 2006	Change
Public authorities	11.9	11.9	0.0%
Other corporate	217.7	216.7	0.5%
Total corporate	229.6	228.6	0.4%
Mortgages	185.3	180.7	2.5%
Other personal	25.5	25.2	1.2%
Total personal	210.8	205.9	2.4%
Provisions for bank lending	-2.6	-2.7	
Total bank lending	437.8	431.8	1.4%

Volume growth remained robust, despite a negative impact from exchange rates and the sale of Degussa Bank at year-end 2006. Loans and advances to customers of the banking operations increased by EUR 6.0 billion to EUR 437.8 billion at the end of December including a EUR 1.8 billion negative impact from currencies and the Degussa Bank sale. Corporate lending increased 0.4% or EUR 1.0 billion, as a EUR 4.1 billion increase outside the Netherlands was partially offset by a EUR 3.1 billion decline in the Netherlands mainly due to the termination of a large repo transaction. Personal lending grew by 2.4%, or EUR 4.9 billion, to EUR 210.8 billion, driven by strong growth in mortgages. Residential mortgages were up EUR 4.6 billion, driven mainly by ING Direct and the retail banking activities in the Netherlands. Customer deposits and other funds on deposit of the banking operations decreased by EUR 4.8 billion, or 1.0%, to EUR 496.8 billion at the end of December.

Investment income rose 78.6% to EUR 225 million, mainly due to higher realised gains on equities and bonds, higher fair-value changes on real estate and an increase in rental income. This was partly offset by lower results from the sale of fixed assets. Commission income increased 13.2% to EUR 696 million. That was driven by higher management fees, mainly from the investment management activities at ING Real Estate, and increased fees from the securities business, brokerage & advisory and insurance broking. Commission on funds transfer declined almost entirely due to a reclassification of payment expenses from operating expenses to commissions paid. Other income rose 53.4% to EUR 336 million, supported by a EUR 112 million positive valuation result on non-trading derivatives as long-term interest rates increased. That compares with a positive revaluation of EUR 24 million in the fourth quarter of 2005 and a negative revaluation of EUR 52 million in the third quarter of 2006, when interest rates declined.

Expenses

Recurring expenses rose 4.0%, mainly due to investments to support growth at ING Real Estate, ING Direct and the Retail Banking activities in growth markets. Total underlying operating expenses were up 8.6% to EUR 2,393 million including EUR 76 million in additional compliance costs this quarter and a EUR 119 million release from employee benefit provisions in the fourth quarter of 2005. Out of the EUR 170 million in additional costs initially expected in

2006 for a compliance review and customer due diligence, about EUR 164 million was taken and additional compliance-related expenses are anticipated in 2007. The outsourcing project at Ops&IT is on track and all three major outsourcing agreements were finalised in the fourth quarter. Out of EUR 120 million in expected costs for the project, a total of EUR 88 million was booked in 2005 and 2006. The IT outsourcing and streamlining projects announced in 2005 are expected to generate annual cost savings of EUR 230 million from 2008. The underlying cost/income ratio of the banking operations improved by 10 basis points in the fourth quarter to 65.8% despite the increased compliance costs and investments for growth. On a full-year basis the cost/income ratio improved to 63.6% from 65.1% in 2005, showing the strong cost containment within the bank. The number of staff increased to 65,356 from 64,097 driven by growth at ING Direct, ING Real Estate and the retail banking activities in India and Romania. The divestments in 2006 of Williams de Broë, Deutsche Hypothekbank and Degussa Bank resulted in a decrease of 852 full-time staff.

Risk costs began to increase as releases of old provisions diminish, however there is no sign of a deterioration in the quality of the portfolio. The underlying addition to the provision for loan losses was EUR 88 million compared with EUR 20 million in the fourth quarter last year. At an annualised 11 basis points of average credit-risk-weighted assets, risk costs remained well below the normalised level of 25-30 basis points. In 2007, risk costs are expected to remain well below historical norms, although a gradual return to normalised levels is expected over the coming years.

raroc

Higher economic returns in 2006 and a stringent approach to capital allocation led to a further increase in returns at the banking operations. The underlying risk-adjusted return on capital (RAROC) after tax improved to 20.4% from 19.1%, driven by a strong improvement at Wholesale Banking as returns at ING Real Estate increased. Underlying economic capital increased by EUR 1.0 billion to EUR 15.9 billion due to model refinements as well as continued growth of ING Direct and Retail Banking. In the RAROC calculation, the actual credit-risk provisioning is replaced by statistically expected losses reflecting the average credit losses over the entire economic cycle. As ING prepares for Basel II, further refinements to the model are in progress, which are expected to be implemented in 2007.

Key Performance Indicators

Underlying RAROC after tax increases to 20.6%

Income increases 15.3% driven by ING Real Estate

Cost/income ratio improves in 4Q and full year

ING's Wholesale Banking business line continues to focus on maximising value creation by optimising capital allocation and focusing on those clients and products where ING can deliver value-added service and generate attractive returns. That includes controlling the growth of risk-weighted assets, particularly in General Lending, and focusing on high-value products such as ING Real Estate, Structured Finance, and Leasing. Those initiatives continued to payoff in 2006, pushing the risk-adjusted return on capital after tax to 20.6% from 17.3%, while total risk-weighted assets were unchanged. Income increased 15.3% in the fourth quarter, while expenses remained under control. The cost/income ratio improved to 62.9% in the fourth quarter, despite higher one-off compliance costs and growth at ING Real Estate, and the ratio improved to 58.6% on a full-year basis.

In the fourth quarter Wholesale Banking reorganised its client coverage model, creating a global Corporate Clients division to focus on ING's key client relationships. In the mid-corporate market, Wholesale Banking is working to further leverage its strong franchises in the Netherlands, Belgium, Poland and Romania. Investments continued on the products side with the purchase of Summit REIT by ING Real Estate in the fourth quarter. ING Lease launched new greenfields in Slovakia, Romania and Hungary, and ING Commercial Finance started a greenfield in Romania to capitalise on growth in Central Europe.

Earnings Analysis: Fourth Quarter

Strong income growth more than offset higher expenses and a return to a net addition to the provision for loan losses in the fourth quarter of 2006, resulting in an 11.0% increase in underlying profit before tax to EUR 546 million. Profit growth was driven by strong results at ING Real Estate, where underlying profit before tax rose 129.7% to EUR 232 million driven by an improvement in results from the development activities and a strong increase in assets under

management. Results from General Lending and Payments & Cash Management posted an 80.2% increase to EUR 146 million driven by higher income while Leasing & Factoring rose 16.7% to EUR 56 million. Structured Finance declined to EUR 125 million from a very strong EUR 170 million in the fourth

1. Figures are full year

quarter last year. Challenging market conditions for the Strategic Trading business, including flat yield curves and historically low volatility, led to a 55.1% decline at Financial Markets, however the client-based financial markets business remained strong. The Other Wholesale Banking products declined from a profit before tax of EUR 43 million to a loss of EUR 35 million, driven by high compliance-related costs in 2006 and a release from employee benefit provisions in the fourth quarter of 2005.

Income

Underlying income from Wholesale Banking rose 15.3% to EUR 1,526 million, driven by a 50.2% increase at ING Real Estate as well as higher income from General Lending & PCM and Leasing & Factoring. Structured Finance had a strong quarter, although income was lower compared with record fourth quarter 2005. The interest result rose 8.9% and commission income was up 19.3%, notably in asset management fees and securities business. Other income rose 47.3% due to improved net trading income and results on the sale of development projects at ING Real Estate.

Expenses

Recurring expenses increased 7.2%, reflecting growth at ING Real Estate as well as EUR 33 million in higher bonuses. Total underlying operating expenses were up 13.2% including EUR 41 million in compliance-related costs this quarter and a EUR 36 million release from employee benefit provisions in the fourth quarter of 2005. Additional compliance costs amounted to EUR 79 million in 2006, slightly higher than the EUR 70 million initially expected. Despite those expenses, the cost/income ratio improved slightly in the fourth quarter to 62.9%, and on a full-year basis the cost/income ratio improved to 58.6% from 59.8%. Staff numbers were up 1.2% at 20,605.

Wholesale Banking made a net addition to the provision for loan losses of EUR 20 million after seven quarters of net releases.

raroc

Returns increased strongly with the underlying risk-adjusted return on capital after tax up to 20.6% from 17.3%, driven by higher returns from ING Real Estate. The Wholesale Banking activities in the Netherlands showed a decrease while Belgium and the Rest of World improved. The economic capital of Wholesale Banking declined 2.2% to EUR 8,135 million led by decreases at ING Real Estate and the Wholesale Banking businesses in Belgium and the Rest of World.

3. 31 December compared with 30 September 2006

ING Real Estate benefited from strong demand for property funds among institutional investors and a sharp improvement at the Development business. Underlying profit before tax rose 129.7% to EUR 232 million. Development turned from a loss of EUR 40 million to a profit of EUR 67 million, supported by high results on the sale of finished projects as well as EUR 40 million in impairments on projects in the fourth quarter of 2005. Profit before tax at Investment Management rose 33.3% to EUR 44 million as assets under management increased by EUR 18.5 billion to EUR 65.6 billion, including EUR 2.3 billion from the purchase of Summit REIT. The 22.9% increase in profit from the Investment Portfolio was driven by fair value changes on real estate. Finance's profit declined 7.9% to EUR 35 million due to an increase in risk costs, while the portfolio grew by EUR 2.3 billion to EUR 22.6 billion. The 2006 pre-tax RAROC of ING Real Estate rose sharply to 58.6% from 27.5% due to higher returns and a decline in economic capital.

Key Performance Indicators

RAROC after tax continues to be high at 32.5%

Income up 3.2%, supported by strong volume growth

Operating expenses under control excluding one-offs

ING's Retail Banking business line is focused on delivering profitable growth in key products in the home markets of the Benelux while investing for growth in developing markets such as Poland, India and Romania. In the Netherlands and Belgium the emphasis is on selectively growing market share in savings and mortgages while maintaining attractive returns and increasing efficiency by streamlining Ops&IT and business processes. In developing markets, ING is investing to expand its branch networks in Poland, Romania and India.

Product innovation helped to support strong volume growth in almost all products in the fourth quarter, which more than compensated for pressure on interest income due to flat yield curves and increased competition. The residential mortgage portfolio in the Netherlands grew by EUR 1.6 billion in the fourth quarter, double the production in the third quarter, driven by the success of Postbank's budget mortgage. Continued pricing discipline helped sustain high returns, with a total risk-adjusted return on capital after tax of 32.5%. Operating expenses remained under control and the cost/income ratio improved 1.3%-points in 2006 to 65.5% despite additional compliance costs and investments in growth markets.

In December, ING reached an agreement to sell its Dutch Regio Bank unit to SNS Reaal as the company focuses on its primary distribution channels in the Netherlands. The company also continues to look at efficiency gains in the Netherlands in both front and back office.

Earnings Analysis: Fourth Quarter

Continued growth in savings and mortgages helped offset the impact of flat yield curves at the Retail Banking activities. Underlying profit before tax declined 12.8% to EUR 441 million, due to higher one-off expenses. Excluding non-recurring items, operating expenses in the fourth quarter rose 2.0% and profit would have been up 9.0%. Total underlying income rose 3.2%, supported by volume growth and a capital gain in Belgium.

Profit before tax in the Netherlands declined 25.9% to EUR 294 million reflecting the one-off expenses, which included a EUR 83 million release from employee benefit provisions in the fourth quarter last year and EUR 35 million in additional compliance costs this quarter. Excluding non-recurring items, profit at the Dutch retail businesses rose 0.6%. In Belgium, profit before tax was up 43.8% to EUR 138 million, including a EUR 44 million capital gain on the sale of ING's stake in Banksys. In Poland, profit from the retail banking activities of ING Bank Slaski declined to EUR 9 million from EUR 13 million, as risk costs turned to a small addition compared with a EUR 5 million release. That offset strong income growth of 16.1% in Poland driven by savings, current accounts and mutual funds. The pre-

2. Figures are full year

tax results of the retail banking activities in Rest of World were break-even, unchanged from the same quarter last year.

Income

Underlying income rose 3.2% to EUR 1,502 million as volume growth in savings and mortgages, as well as the capital gain in Belgium, more than off set the impact of flatten ing yield curves and a reclassification of payment expenses from operating expenses to funds transfer commissions paid. The total interest result declined 5.8% as volume growth in savings and mortgages was offset by the impact of low interest rates and a flat yield curve, as well as lower prepayment penalties on mortgages. Investment income included EUR 44 million from the gain on the sale of ING s

investment in Banksys in Belgium. Commission income rose 6.3% driven by higher fees from the securities business and higher insurance broking commission, while funds transfer commission declined due to the shift of payment expenses to commissions paid.

Expenses

Strong cost control continues, and expenses rose 2.0% on a recurring basis, mainly due to investments in growth markets such as Poland, India and Romania. Total underlying operating expenses rose 9.5% including EUR 35 million in additional compliance-related costs and the reclassification of payment expenses in the fourth quarter this year and a EUR 83 million release of employee benefit provisions a year earlier, both in the Netherlands. Out of the EUR 100 million in compliance costs expected in 2006 for customer due diligence, EUR 85 million was taken and further compliance costs are expected in 2007. Expenses in Poland rose 14.6% due to higher staff costs and investments in the branch network. The overall cost/income ratio increased to 67.4% in the fourth quarter reflecting the one-off costs. On a full-year basis the cost/income ratio improved to 65.5% from 66.8% despite increased compliance costs and investments in growth markets. Staff numbers rose 0.9% to 37,113 due to growth in India and Romania.

The addition to the provision of loan losses increased to EUR 48 million from EUR 25 million in the fourth quarter of 2005 as releases diminished, however there was no sign of a deterioration in the quality of the portfolio. Belgium and Poland turned from net releases to additions. The addition equalled an annualised 20 basis points of average credit-risk-weighted assets up from 11 basis points in the fourth quarter of 2005.

RAROC

The retail banking business maintained strong returns despite the challenging yield curve environment. The underlying risk-adjusted return on capital after tax declined slightly to 32.5% from 34.1% in 2005, mainly due to model refinements. The Netherlands and Belgium both continued to show strong pretax RAROCs and Poland jumped to 22.5% from 6.7% as returns increased. Total economic capital grew by EUR 0.7 billion to EUR 4.1 billion reflecting business growth, model refinements, the increased value of ING's stake in Kookmin Bank, and the purchase of a 19.9% stake in Bank of Beijing.

30
September 2006

The underlying profit before tax of the Private Banking activities within Retail Banking declined 16.1% to EUR 52 million, due to an increase in expenses following a release of employee benefit provisions in 2005. Full year profit before tax was up 15.8% to EUR 242 million. The cost/income ratio increased to 65.6% in the quarter, however on a full-year basis it improved 2.5%-points to 62.2%. Total assets under administration for private banking clients increased by EUR 2.6 billion in the fourth quarter to EUR 59.2 billion at year-end, supported by higher stock markets and a net inflow of EUR 1.5 billion.

Key Performance Indicators

Own-originated mortgage production reaches EUR 5.8 bln

587,000 new customers added in fourth quarter

Funds entrusted declined by EUR 0.4 billion

ING Direct continues to invest in long-term value creation by building its client base, expanding its geographical footprint, and gradually rolling out new products to serve a broader range of customer needs. In the U.S., ING Direct launched in Atlanta in November and Miami in January 2007. A new payment account called *Electric Orange* was introduced in the U.S. in December allowing customers to manage their money while earning high interest on their total account balance. A residential mortgage product was successfully introduced in the U.K. in October. The portfolio reached GBP 89 million at year-end and the pipeline of pending mortgages shows promising growth. ING Direct Spain introduced five new *Orange Pension Plan* products in November. The sale of Degussa Bank, a unit of ING DiBa in Germany, was completed on 31 December 2006, resulting in an accounting loss of EUR 23 million which is excluded from the underlying results.

Earnings remained strong despite the impact from raising client rates in all countries in the third quarter as well as further investments to develop new products. As the challenging interest rate environment persisted, ING Direct was less aggressive in following market rates on savings accounts and continued to focus instead on growth in mortgages and other products. The own-originated residential mortgage portfolio grew by EUR 5.8 billion in the quarter, excluding the impact of currencies and the sale of Degussa Bank, and the total mortgage portfolio, including bought mortgage pools, grew by EUR 5.4 billion on the same basis to EUR 69.0 billion.

In the fourth quarter, short term-interest rates increased in three of the five currency zones where ING Direct operates while long-term interest rates remained compressed. Client rates were raised in Spain, Australia, the U.S. and Germany, and a further increase in Germany has been announced since the end of December. In the U.K. client rates did not follow increases in the central bank rates. Excluding currency effects and the sale of Degussa Bank, total funds entrusted declined by EUR 0.4 billion, driven mainly by transfers to off-balance sheet products and an outflow in the U.K. Off-balance sheet funds rose EUR 1.4 billion to EUR 14.6 billion as some customers shifted from savings to mutual funds. Total retail balances, including savings, mortgages, and off-balance sheet products reached EUR 279.5 billion, an increase of EUR 6.4 billion excluding currencies and the sale of Degussa Bank. ING Direct added 587,000 new customers in the fourth quarter, bringing the total to 17.5 million, with almost 3 million new customers added in 2006.

Earnings Analysis: Fourth Quarter

Underlying profit before tax of ING Direct remained strong at EUR 183 million as the company maintained profitability

while continuing to invest to grow the business and expand the product offering. Continued commercial growth offset the impact of flat yield curves and the interest margin stabilised in the fourth quarter. Profit for the full year was up 16.2% to EUR 717 million, illustrating the resilience of the business model in a challenging rate environment.

Income

Total underlying income rose 4.0% to EUR 598 million. The interest margin increased 2 basis points to 0.87% from 0.85% in the third quarter, however remained below the margin of 0.96% achieved in the fourth quarter of 2005.

Expenses

Operating expenses increased 4.2% to EUR 395 million, mainly due to higher staff numbers to support business growth. Marketing costs declined by EUR 3 million compared with the fourth quarter last year. The cost/income ratio was 66.1%, up slightly from 65.9% in the fourth quarter of 2005, reflecting investments to develop new products. For full-year 2006, the operational cost base (excluding marketing expenses) was 0.41 % of total assets compared with 0.40% in 2005. The number of full-time staff increased to 7,638 from 6,964 a year earlier.

The addition to the provision for loan losses increased to EUR 20 million, or an annualised 9 basis points of average credit-risk-weighted assets, up from with 7 basis points a year earlier.

RAROC

The after-tax risk-adjusted return on capital of ING Direct declined to 11.6% in the full-year 2006 from 14.9% in 2005, partly due to higher tax charges. The pre-tax RAROC decreased to 19.1% from 20.9%. Economic capital increased to EUR 3.4 billion from EUR 3.1 billion, reflecting continued growth of the business.

Geographical Breakdown

Higher results were posted in Germany & Austria, the U.K., Italy and Spain, while the U.S., Canada, Australia and France reported lower results. Underlying profit before tax in Germany & Austria rose to EUR 100 million from EUR 78 million, supported by the continued growth of the business, particularly in mortgages and off-balance sheet funds. The sale of Degussa Bank had a negative impact of EUR 2.0 billion in funds entrusted, EUR 2.2 billion on mortgages and 141,000 on the number of clients, which are reflected in the year-end figures of Germany & Austria.

Profit before tax of ING Direct in the U.S. declined to EUR 9 million from EUR 38 million as a result of increases in client rates and an inverse yield curve. Growth continued with 250,000 new customers added. ING Direct Canada faced the same interest rate environment, resulting in a decline of the profit before tax to EUR 14 million from EUR 20 million. Both countries reported a decline in funds entrusted due to currency effects, while in local currencies funds entrusted increased by USD 0.8 billion and CAD 0.7 billion respectively.

In the U.K. ING Direct posted a profit before tax of EUR 5 million compared with a loss of EUR 7 million in the fourth quarter last year. Funds entrusted showed a net outflow of GBP 1.1 billion as client rates were not raised in pace with increases in central bank rates.

ING Card

ING Card reported a breakeven result in the fourth quarter of 2006, an improvement of EUR 2 million compared to the fourth quarter last year. Starting in the first quarter of 2007, ING Card will be reported under the Retail Banking business line.

Total AuM increases to EUR 600.0 billion

EUR 12.7 billion in net inflow achieved in 4Q

Third-party AuM up 6.8% to EUR 404.5 billion

Assets under Management

Assets under Management increased by EUR 30.7 billion, or 5.4%, in the fourth quarter to EUR 600.0 billion at the end of 2006. All six business lines contributed to the growth. The increase was driven by a sound net inflow of EUR 12.7 billion, EUR 20.6 billion from favourable stock market developments and EUR 4.3 billion from acquisitions, including Summit REIT and ABN Amro's domestic asset management business in Taiwan. Exchange rates had a negative impact of EUR 6.9 billion. The growth was achieved mainly in the third-party assets which increased by EUR 25.8 billion to EUR 404.5 billion, accounting for 67% of total assets under management. Proprietary assets grew by EUR 4.9 billion to EUR 195.5 billion.

In flow

The net in flow of EUR 12.7 billion achieved in the fourth quarter brought the total net inflow for full-year 2006 up to EUR 43.8 billion. The fourth-quarter increase was driven by continued strong demand for property investment funds at ING Real Estate (EUR 5.4 billion) as well as strong sales at Insurance Asia/Pacific (EUR 3.0 billion) and Retail Banking (EUR 2.1 billion). Insurance Europe contributed EUR 1.8 billion and ING Direct EUR 0.5 billion, while Insurance Americas posted a slight outflow of EUR 0.1 billion.

Assets under Management by Manager

ING's asset management units manage a total of EUR 520.7 billion in assets, of which EUR 195.5 billion is proprietary assets of ING Group and EUR 325.2 billion is third-party assets. In addition, ING's business lines have distributed EUR 79.3 billion of funds managed by external fund managers under open-architecture systems, illustrating the strength of ING's distribution channels, particularly the U.S. retirement services and annuities businesses, ING Direct and ING Life Japan.

ING Investment Management

ING Investment Management oversees both third-party assets and proprietary assets of ING Group. The total assets managed by ING IM amounted to EUR 369.3 billion of which EUR 209.0 billion is third-party assets. Total third-party assets increased 4.3% in the fourth quarter driven by a net inflow of EUR 2.1 billion and favourable stock markets.

The third-party assets at ING IM Europe rose 3.3% to EUR 92.1 billion, driven by a EUR 0.4 billion increase at ING IM in Poland supported by sales through ING Bank Śląski's fund distribution platform. ING IM Europe made the most successful fund introduction in the Netherlands this year with the ING Opportunity Obligatie Fonds. This is the first absolute return fund launched by ING in the Netherlands and generated inflow of EUR 0.3 billion in a highly competitive market.

In Asia/Pacific third-party assets increased 11.1% to EUR 44.0 billion of which EUR 2.4 billion was attributable to the acquisition of ABN Amro's domestic asset management business in Taiwan in the fourth quarter. ING IM Asia/Pacific was granted a license to open an investment management office in South Korea, an attractive market given its aging population.

Third-party assets at ING IM Americas increased 1.8% to EUR 72.9 billion. The net inflow reached EUR 1.3 billion in the fourth quarter, while favourable stock markets were offset by a weaker U.S. dollar. The inflow was driven by strong sales of fixed-income products totalling EUR 0.7 billion across its Investment Grade, High Yield, Stable Value and Senior Bank Loan strategies. ING Funds in the U.S. launched the ING Risk Managed Natural Resources Fund which raised EUR 0.4 billion from retail investors. This unique energy and materials fund was designed by ING Investment Management to seek total return in the sector with reduced volatility and an attractive distribution yield. At the end of 2006 ING IM delivered a sound performance with 67% of mutual fund assets outperforming their benchmark and 63% outperforming their peer median on a 3-year basis.

ING Real Estate

Assets under management at ING Real Estate, including the Investment Management and Development portfolios, increased by EUR 10.6 billion in the fourth quarter to EUR 68.1 billion. The total portfolio of ING Real Estate, including the finance portfolio, increased to EUR 90.7 billion at the end of 2006 from EUR 79.2 billion at the third quarter. Growth was driven mainly by the Investment Management business, where assets under management grew by EUR 10.8 billion in the fourth quarter to EUR 65.6 billion. Strong inflow of EUR 5.9 billion was achieved across all existing funds particularly the global real estate securities and multi-manager businesses. The purchase of Summit Real Estate Investment Trust in Canada, which was completed in the fourth quarter, added EUR 2.3 billion to the portfolio. The newly launched ING Real Estate China Opportunity Fund raised EUR 350 million in the fourth quarter. The Development portfolio ended the quarter slightly lower at EUR 2.5 billion following the successful sale of large retail and office projects, notably in Spain and Netherlands. The Finance portfolio grew by EUR 0.9 billion to EUR 22.6 billion. ING Real Estate continued efforts to diversify the finance portfolio while maintaining market leadership in the Netherlands. International lending now accounts for 38% of the total portfolio, up from 30% at year-end 2005.

ING Private Banking

ING Private Banking administers EUR 59.2 billion of assets for its clients of which EUR 4.4 billion was invested in investment funds from ING and EUR 4.1 billion in externally managed funds. The remainder, together with discretionary insurance linked investments of EUR 0.7 billion managed for Insurance Europe, brings the total assets under management by ING Private Banking on EUR 51.4 billion. Total administered assets increased by EUR 2.6 billion in the fourth quarter, driven by a net inflow of EUR 1.5 billion as well as favourable stock markets. Net inflow was mainly raised in Switzerland (EUR 0.5 billion) and the Netherlands (EUR 0.5 billion). Most of the assets of ING Private Banking are concentrated in Belgium, Luxembourg and Switzerland (EUR 30.4 billion) and the

Netherlands (EUR 17.5 billion).

Debt/equity ratio (d/(d+e))	9.01%	9.41%

ING's capital position remains strong

Net income drives growth in capital base

Debt/equity ratios well within limits

ING's CapitalBase

ING's capital position remained robust in the fourth quarter of 2006. Shareholders' equity increased to EUR 38.3 billion from EUR 36.7 billion at the end of the third quarter, mainly due to EUR 2.1 billion of net profit generated and an increase in unrealised gains on equity securities. That was offset by exchange rate differences and a decline in unrealised gains on debt securities as interest rates rose.

Capital Market Transactions

In November ING Group bought 4,190,000 of its own shares on the open market at an average price of EUR 33.92 to adjust its delta hedge portfolio for employee options. As of 31 December 2006 the hedge book holds 52.7 million (depository receipts for) ordinary ING shares representing 2.4% of the total 2,205 million shares outstanding. In the fourth quarter of 2006 ING raised CAD 0.3 billion of Tier 2 capital in Canada and EUR 1 billion of 5-year floating-rate senior debt for ING Bank Australia. USD 1 billion in 5-year floating-rate senior extendible notes was raised for ING Insurance.

Capital Ratios

The Group calculates its capital ratios on the basis of adjusted equity, which is shareholders' equity plus hybrid Tier-1 capital minus the revaluation reserve fixed-income securities. The leverage positions of ING Group and ING Insurance both remained well within target in the fourth quarter. Compared with the previous quarter, the Group's debt/equity ratio was reduced from 9.4% to 9.0%, well below the 10% limit. This was due entirely to an increase in adjusted equity as core debt was unchanged. Adjusted equity at ING Insurance also increased, however that was offset by an increase in the core debt, and the leverage ratio increased from 13.1% to 14.2%, still comfortably below the 15% limit. Core debt increased due to a decline in the cash positions of some insurance subsidiaries. The E.U. capital coverage ratio of ING Insurance increased further to 274% from 256%. The Tier-1 ratio of the Bank increased from 7.48% to 7.63%, due to the temporary impact from the acquisition of Summit REIT by ING Real Estate. Growth in

risk-weighted assets was limited due to a securitisation programme.

APPENDIX 7: EMBEDDED VALUE & NEW BUSINESS**Embedded Value and Embedded Value Profit**

Life insurance embedded value increased 7.7% to EUR 29,714, before EUR 1,994 million in dividends was paid from the life insurance businesses to ING Group, bringing the embedded value at year-end to EUR 27,718 million.

The change in embedded value reflects the positive contribution of EUR 807 million in value associated with new business, the required return on the value of inforce of EUR 1,716 million, and variances from expectations of EUR 1,207 million. These variances primarily reflect the impact of favourable equity and fixed income returns, hedge costs, and credit defaults. The investment return on free surplus of EUR 968 million also reflects the strong equity market performance. Changes in economic assumptions had a negative impact of EUR 1,534 million, primarily related to a decrease in the long-term risk free interest rates in Taiwan from 5.75% to 3.93%. The strengthening of the euro against most other currencies reduced the embedded value by EUR 1,164 million and discount rate changes were responsible for a EUR 338 million decrease.

Embedded value profit is a measure used by ING to evaluate performance over the year. It includes forces that are considered to be within management's control, such as the value of new business, variances from the expectations for the year, and assumption changes other than economic assumption changes, which are set by ING Group based on market rates. For 2006, the embedded value profit of EUR 1,981 million is down 12.1%. The VNB and financial variances were comparable to 2005, but operational performance variances decreased from EUR 294 million in 2005 to EUR 222 million in 2006. Most of the decrease is attributable to Taiwan, which declined from EUR 71 million in 2005 to EUR -173 million in 2006. The adverse result in 2006 is largely due to higher-than-expected persistency. Operating assumption changes declined from EUR 50 million in 2005 to EUR -33 million due to an increase to the maintenance assumptions at Nationale-Nederlanden and RVS, which was partially offset by a number of changes including higher assumed fees in Poland, a change to the crediting rate strategy at U.S. Retirement Services,

ING Group's 2006 Annual Accounts will be prepared in accordance with International Financial Reporting Standards as adopted by the European Union (IFRS-EU). In preparing the financial information in this press release, the same accounting principles are applied as in the 2005 ING Group Annual Accounts. All figures in this document are unaudited.

Certain of the statements contained in this release are statements of future expectations and other forward-looking statements. These expectations are based on management's current views and assumptions and involve known and unknown risks and uncertainties. Actual results, performance or events may differ materially from those in such statements due to, among other things, (i) general economic conditions, in particular economic conditions in ING's core markets, (ii) performance of financial markets, including developing markets, (iii) the frequency and severity of insured loss events, (iv) mortality and morbidity levels and trends, (v) persistency levels, (vi) interest rate levels, (vii) currency exchange rates, (viii) general competitive factors, (ix) changes in laws and regulations, and (x) changes in the policies of governments and/or regulatory authorities. ING assumes no obligation to update any forward-looking information contained in this document.
