Item 5. Other Events.

This information is being filed in order to conform with the transition provisions of Financial Accounting Standards Board (FASB) Statement 143, Accounting for Asset Retirement Obligations (Statement 143).

In 2001, the FASB issued Statement 143. Statement 143 requires entities to record the fair value of a liability for an asset retirement obligation in the period in which it is incurred, a corresponding increase in the carrying amount of the related long-lived asset and is effective for fiscal years beginning after June 15, 2002. We adopted Statement 143 effective January 1, 2003, using the cumulative effect approach to recognize transition amounts for asset retirement obligations, asset retirement costs and accumulated depreciation. We previously recorded estimated costs of dismantlement, removal, site restoration

and similar activities as part of our depreciation, depletion and amortization for oil and natural gas properties and recorded a separate liability for such amounts in other liabilities. The effect of adopting Statement 143 on January 1, 2003, on our results of operations and financial condition, included a net increase in long-term liabilities of \$14.2 million; an increase in net property, plant and equipment of \$17.8 million; a cumulative effect of adoption income of \$2.3 million, net of deferred income taxes of \$1.3 million.

The following pro forma data summarizes our net income (loss) and net income (loss) per share as if we had adopted the provisions of Statement 143 on January 1, 2000, including an associated pro forma asset retirement obligation of \$33.3 million, \$25.9 million and \$23.6 million as of December 31, 2002, 2001 and 2000, respectively and \$1.3 million as of January 1, 2000 (in thousands, except per share amounts):
